MARCH 1962

the ADL bulletin

PUBLISHED BY THE ANTI-DEFAMATION LEAGUE OF B'NAI B'RITH

THE WHITE HOUSE

WASHINGTON

This special issue of the Anti-Defamation League Bulletin performs a public service by reporting on current civil rights efforts.

It is necessary that the private and public agencies working to promote human rights work together. No American should rest content until every citizen is assured his full rights -- until arbitrary discrimination of all forms is ended everywhere. The efforts of the government to secure these rights need careful appraisal and full criticism as well as encouragement. This information in this special issue is essential for that critical process.

Much has been done. But much more needs to be done. There is still a long way to go. This Administration is determined to do its part to get there -- to attain the great goal established by our Constitution: respect for the human dignity of all men -- equal opportunity in all parts of our public life, in all sections of this country.

John F. Kennedy

# *The Administration and Civil Rights*

## *The Administration and Civil Rights*

THIS in an unusual issue of the ADL Bulletin. In it, key government officials responsible for the Administration's program in the field of civil rights have taken the opportunity to write what is, in effect, a first-year report of their accomplishments.

For better or worse, the federal government is more directly involved in the lives of Americans than ever before. And the responsibility of the Executive Branch for implementing equal opportunity among all Americans has, accordingly, become greater than ever. It is for this reason that ADL has offered a forum for reporting this story, which we believe to be an impressive one.

This is hardly a case of government officials telling readers devoted to democratic ideas what they think will satisfy them. Each man represented here is passionately devoted to the cause of equal rights. Each is daily acting in behalf of this belief—within the framework of government — to reconcile skill and principle as best he knows how. Their effort here is to stimulate and encourage.

THERE are some areas not covered at length in this issue. For one thing, the long-promised executive order forbidding discrimination in federally-aided housing has not been signed (and is not discussed here.) President Kennedy has indicated that his delay in signing the order stems from a belief that he should not get too far ahead of public opinion in pressing for civil rights. The usual interpretation given this statement is that the President believes that the surest way to move ahead in the field of civil rights is to work constantly for an advancing consensus of national understanding and support.

But how slowly we, as a nation, seem to move! It will soon be one hundred years since President Lincoln issued his Emancipation Proclamation. Yet, not until 1948 did this country have an Executive Order setting a policy of equal treatment and opportunity—"without regard to race, color, religion, or national origin"—for all persons serving in so vital an area as our armed forces. Not until 1954 did the United States Supreme Court conclude that "separate but equal" is an unacceptable doctrine in this democracy. Not until 1957 did the Congress pass the first civil rights legislation since Reconstruction days.

The tragedy is that our civil rights problems remain. The wonder is the progress that Americans, together, are making to solve them.

Granted, this last statement can be challenged. Prejudice and encrusted traditions are daily robbing the unborn of their birthright, limiting or emotionally crippling a portion of American youth, and stripping their parents of their dignity and most basic rights. This is a hard fact of American life today, throughout the world.

STILL, I repeat, the wonder is the progress that Americans, together, are making to solve problems of prejudice and human rights. The inequities of the day, brutal as they may be, are but shadows of the past. All major American decisions, acts, trends—and wars—of this century have been on the side of humanity. The modern American public school system, with all of its problems, is helping to produce a generation of young Americans, flourishing intellectually, understanding and responsive to the problems of their world. This land and its people are blessed. Our progress in race relations is not to be measured by reduction in the number of lynchings but by the emergence of a middle class among Negroes, indistinguishable from other Americans in their lives and in their love of our best traditions. The racist is apt to be furtive and defensive; *our* concepts have changed and *his* time has run out. The demagogue, the bully, and the utterly selfish are still with us; their words have little real appeal to a people whose folk heroes are neither warriors nor kings but men and women with a common dedication to an almost abstract goodness and humanity. We are a people raised in the image of Lincoln.

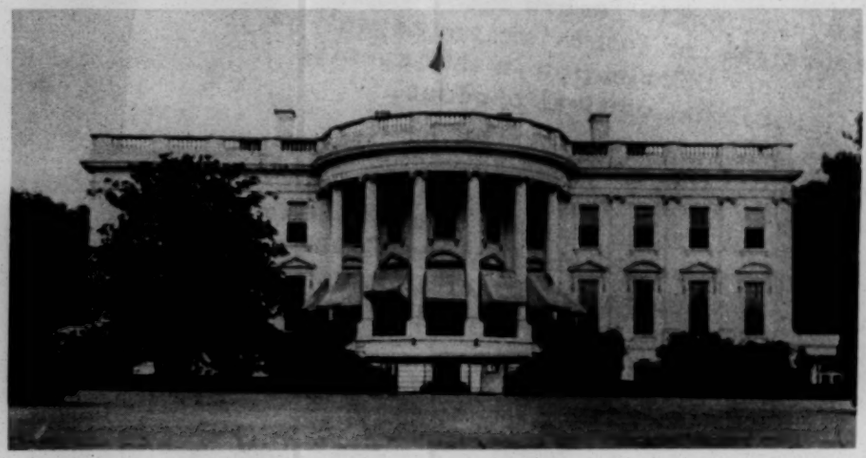
These too, I believe, are some of the hard facts, the greater ones, of America today.

It is in this context that the writers in this issue report on their activities and hopes—and frustrations—in the field of civil rights. With the insights given, it is the most solemn responsibility of the reader—with all his skill and heart—to determine how he can best daily serve too.

## COMMENT:

Benjamin R. Epstein

ADL NATIONAL DIRECTOR



**the ADL bulletin**

515 Madison Ave., New York 22
Vol. 19, No. 3 • March 1962

Funds for the work of the Anti-Defamation League are raised through the Joint Defense Appeal.

**The cover:** President Kennedy meets with the Civil Rights Commission.

Published monthly except July and August by Anti-Defamation League of B'nai B'rith, 515 Madison Avenue, New York 22, N.Y. Officers: Henry Edward Schultz, chairman; Meier Steinbrink, honorary chairman, Barney Balaban, Jacob K. Javits, Philip M. Klutznick, Herbert H. Lehman, Leon Lowenstein, William Sachs, Dore Schary, Melvin H. Schlesinger, Jesse Steinhart, honorary vice-chairmen; William P. Bloom, David Coleman, Maurice N. Dannenbaum, David H. Litter, Max J. Schneider, Louis Zara, life members; Abe Goldstein, Harold Lachman, David A. Rose, vice-chairmen; Benjamin Greenberg, treasurer; Herbert Levy, secretary; Benjamin R. Epstein, national director; Paul H. Sampliner, chairman, executive committee; Joseph Cohen, vice-chairman, executive committee; Label A. # *MOVING AHEAD: AIMS AND METHODS*

By Harris Wofford, Jr.

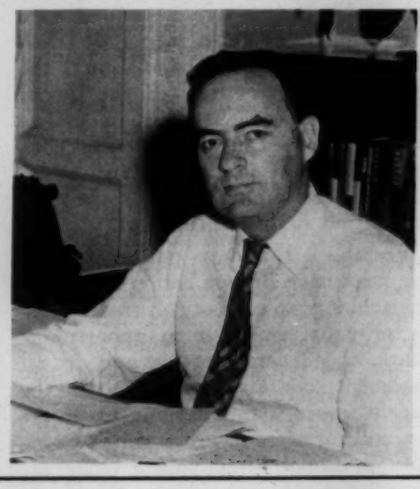
*Special Assistant to the President*

"Get America moving again," has been the Administration's battle cry this year. In civil rights the key to the problem of getting America moving has been to get the Executive Branch of the United States Government moving.

The government flies on three engines —the Legislative, the Executive and the Judicial Branches. For too long in civil rights we limped along on only one engine—the Federal Judiciary. It is near miracle that the courts have been able to carry us so far with so little help from the Congress and the Executive.

The main civil rights news from Washington is that the federal government is beginning to fly on all three engines.

**Harris Wofford, Jr.,** has two major assignments as Special Assistant to the President. He is chairman of the President's Subcabinet Group on Civil Rights and is involved in the setting up of Peace Corps units in various parts of the world. Mr. Wofford is on leave from the Notre Dame Law School as associate professor. He was formerly counsel to Father Hesburgh on the Civil Rights Commission, chief of the Commission's study and hearings on discrimination in housing, and an editor of its 1959 report. With his wife, he is co-author of the book "India Afire" (1951). He was born in New York City and is thirty five.



### *The Right to Vote*

In 1957 and 1960 Congress enacted two laws to protect the right to vote. And in 1962 the Administration is pressing for at least another significant step forward in this field: a law to prohibit the arbitrary use of literacy tests to deny the right to vote to colored Americans.

Pursuant to a proposed finding by Congress that literacy tests are being widely used to discriminate against Negroes (based on extensive reports from the Civil Rights Commission), this bill provides that satisfactory completion of sixth grade in any public or accredited private school is sufficient evidence of literacy for voting purposes. Passage of this bill would encourage Negroes to vote by removing one serious obstacle, and would simplify any necessary court actions to protect their right to vote. It would also enfranchise hundreds of thousands of literate Spanish-speaking and reading citizens in New York State.

Congress is just beginning to meet its responsibilities, but with a civil rights bill enacted by each of the last two Congresses, the legislative engine is turning—after three quarters of a century of inaction.

The Administration is using these powers given by Congress to attack the remaining voting discrimination which is concentrated in about 100 counties. In 1961, the Department of Justice intensified its investigation of voting denials (investigations are underway in at least sixty counties) and accelerated the pace of legal actions brought under the 1957 Act (law suits to require the registration of qualified Negroes are in process in about twenty counties). Suits have at last been brought in some of the deeply resistant areas for the first time.

The Justice Department has also acted vigorously to support efforts of Negroes to exercise this fundamental right to register and vote. When a Negro student leader, organizing a registration drive, was beaten and then arrested by local officials and prosecuted in state court, the Justice Department promptly went into federal court to enjoin such state intimidation and prosecution. The decision of the U. S. Court of Appeals to uphold this action means that the federal government can give far more effective protection to those conducting registration efforts.

When Negroes who sought to register and vote in Tennessee's Haywood and Fayette counties were evicted from their tenant farms, the Justice Department secured an injunction against such intimidation. When these Negroes still suffered economically and many were found to lack adequate food, the President directed the Department of Agriculture to make surplus food available in these counties.

### *Equal Job Opportunity*

But Executive action has not been confined to the field of voting. New leadership in the Executive Branch be-

gan on January 20, 1961, when President Kennedy noticed that there were no Negroes in the Coast Guard units in the Inaugural parade and lost no time in informing the Coast Guard that he wanted steps taken so that it would be more representative of all Americans when it marched by him again. (The Coast Guard has since undertaken an extensive recruitment drive to make its opportunities known to young Negroes.)

Soon after taking office the President requested a report from each department and major agency on the number of Negroes in grades from GS 12 to 18, with pay ranging from $9,000 to $18,000 a year. While Negroes comprise 13 percent of the total federal service of over two million employees (a higher ratio than their ratio in the total population), the reports showed very few in the higher grades—and, in some agencies, none. The President expressed his deep personal concern about this at an early Cabinet meeting, and asked each member to remedy the situation in his department.

To establish firm new policies for the whole Executive Branch and create effective machinery to promote affirmative action for equal employment opportunity in both the federal service and in all government contract employment, the President issued a far-reaching executive order, and formed a new President's Committee on Equal Employment Opportunity under the chairmanship of Vice President Lyndon Johnson.

"From this time forward," the President told the Committee at its first meeting, "the Committee will exercise the great powers given to it by executive order to remove permanently from government employment and work performed for the government every trace of discrimination because of race, creed, color or place of national origin." He stressed that it should not be an "honorary committee," nor "one which issues a number of statements, relying upon exhortation." "This Committee," he said, "has powers, and it has responsibilities."

Those powers and responsibilities have begun to be exercised and some significant progress can already be reported.

With the Committee's help and the strong backing of the White House, a number of agencies — particularly the Civil Service Commission, the Departments of State, Treasury, Agriculture and Commerce, and the Peace Corps— have carried out active programs of recruitment of members of minority groups.

The positive results are beginning to show. In the Labor Department, for instance, the number of Negro employees holding jobs in Grades 12 and above, has increased from twenty-four to forty-one in the last year, a 70 percent increase compared with only a 12 percent increase of total employment in these grades. In the Department of Agriculture the number of Negro employees in Grades 12 and above increased from fifteen to forty-six, a 200 percent increase, and over 400 Negroes have been appointed or promoted to places never before occupied by Negroes. Another 400 Negroes are holding such new positions in the Post Office.

The actual numbers show what is happening better than percentages: one agency's reported 250 percent increase in Negroes in GS 12 and above meant an increase from only four to ten. In another agency there was an even greater proportional increase: from none to one.

While some of the gains have been small, each one is a signal to other minority group members that the doors of opportunity are opening throughout the federal service.

### *"Plans for Progress"*

Important steps have also been taken to secure fair employment practices by companies engaged in work on government contracts. This is in line with the President's opening statement to his Committee on Equal Employment Opportunity on April 11, 1961:

> "Federal money should not be spent in any way which encourages discrimination, but rather should be spent in such a way that it encourages the national goal of equal opportunity."

In dealing with the first complaints filed with the Committee, alleging discrimination in the Marietta, Georgia, plant of the Lockheed Aircraft Corporation, the Committee did not limit itself to investigation of the particular complaints about that one plant. Instead it worked out with the company a broad "Plan for Progress," in which Lockheed undertook not only to end any practices of discrimination in one plant but to take positive steps throughout its whole operations, North and South, to recruit, hire, train and upgrade qualified Negro employees. In January, 1962 after only six months, Lockheed reported very substantial progress.

Segregation has been ended in its Marietta plant and some 200 Negroes have been hired, many of them in skilled crafts, or in supervisory, administrative and professional jobs. Some 1,000 Negroes were hired during this same six month period in all of Lockheed's plants—an increase of 26 percent, compared with an overall increase in its total work force of about 7 percent.

This is the kind of action possible when the leaders of business give leadership—when they and the corporations they head exercise their full responsibilities to the whole community. Over fifty government contractors have agreed to similar "plans for progress." Together with the strengthened enforcement powers of the President's Committee and the new compliance reporting system, this program holds a great promise.

The same approach is now being taken to the problem of discrimination in labor unions. The President's Committee is seeking agreement on similar "plans for progress" by the major unions.

There have been other actions to assure equal employment opportunity. The Department of Labor has revised its policies in an attempt to end the use of State Employment Services as a vehicle for processing discriminatory job orders and is endeavoring to end segregation of the employment offices themselves. The President's executive order dealing with federal employee - management relations assures that no union which practices racial discrimination will be able to avail itself of the strengthened procedures for representation.

**Some members of the Subcabinet Group, left to right: John Macy, chairman of the Civil Service Commission; John Feild, executive director of the President's Committee on Equal Employment Opportunity; Lisle Carter, deputy assistant secretary, Health, Education and Welfare; Jack Conway, deputy administrator, Housing and Home Finance Agency; Berl Bernhard, staff director, Civil Rights Commission; James Quigley, assistant secretary, HEW; Maceo Hubbard, special assistant to the Assistant Attorney General; and Mr. Wofford.**

### *School Desegregation*

Along with these efforts to protect the right to vote and to achieve equality of job opportunity, the Administration has been giving leadership in the effort to bring about peaceful and successful school integration. The Attorney General and Assistant Attorney General for civil rights and other Administration officials have worked quietly behind the scenes to promote the kind of orderly transition to first-step desegregation that has this year taken place in Atlanta, Dallas and Memphis.

And when moral support from the President was needed, the President has spoken. Soon after coming into office he spoke up on the crisis in New Orleans, paying "tribute" to the principals, officers of the school board and public school teachers:

> "These loyal citizens and educators are meeting their responsibilities and challenges with quiet intelligence and true courage. The whole country is in their debt... Let me also pay tribute to the school children and their parents, of both races, who have been on the frontlines of this problem. In accepting the command of the Constitution with dignity they, too, are contributing to the education of all Americans."

Three other times during his first year he issued similar appeals on this problem and threw his personal prestige behind the constructive efforts of local leaders, school boards, city officials, parents, teachers and students. No longer is there silence—a moral vacuum—in the Presidency on this greatest moral issue facing our nation.

WHILE THE law needs help of this kind, the efforts of persuasion need to be backed by the full power of the law. On school desegregation as in other matters, the Justice Department has taken vigorous and inventive court action.

In Louisiana, for the first time, the Federal Government brought a school desegregation suit, taking action not just to assist the court in restoring law and order, but to initiate desegregation in a new district. Similarly, all necessary steps, including court action, were taken to see that teachers in the desegregated schools of New Orleans were paid their salaries.

### *Equal Treatment in Travel*

This vigilant attention to detail was also exemplified during the Freedom Rides. After the initial violence, at every stage Justice Department officers were on hand and in action to protect the lives of the Freedom Riders—and to protect their right to travel in interstate commerce without racial discrimination. When federal marshals were required, they were sent immediately.

When the crisis passed, the issue was not allowed to fester. The Attorney General promptly brought a formal action before the Interstate Commerce Commission, petitioning for the adoption of enforceable rules requiring desegregation in all aspects of interstate bus transportation, including all eating facilities in terminals.

Following the ICC's unanimous decision to adopt these rules, the Justice Department took all necessary court actions to enforce them. Simultaneously, it persuaded all railroads still countenancing any racial segregation to cease such practices forthwith. And it has brought suit to end segregation in airport terminals where voluntary desegregation was refused.

Although a handful of communities are still resisting, the Freedom Rides and the action of the federal government have together changed the pattern throughout the South. The end of all enforced segregation in connection with all interstate transportation is in sight—within 1962.

### *Subcabinet Group on Civil Rights*

To promote and coordinate effective action by all parts of the Federal Government, in employment and in all other aspects of civil rights, the President established a Subcabinet Group on Civil Rights in early 1961. Assistant Secretary level representatives from all the departments and major agencies meet monthly at the White House, to discuss their common problems in carrying out the Administration's policies. The Subcabinet Group has undertaken to initiate action in affirmative recruitment for federal employment, has cooperated with the President's Committee in the discharge of its responsibilities and has begun to reassess those aspects of all federal programs which have a bearing on the equal rights of American citizens.

One of the ideas coming from an early meeting of the Subcabinet Group was for concerted action to recruit and hire qualified Negroes by all federal agencies operating in regional centers of federal employment. In one city there were reported to be over 15,000 federal employees, with only three Negroes above the bottom clerical or janitorial level—and these three segregated in the Negro section of town. It was decided to take one area at a time, assemblying the regional directors and personnel officers of all federal agencies operating in the area, and outlining a program of positive action to find, train, employ or upgrade qualified minority group personnel. Target dates were set when progress would be reviewed. The meetings were held under the joint auspices of the President's Committee and the Civil Service Commission, with representation from the White House. So far such sessions have been held in Atlanta, Nashville, Chicago, Los Angeles, St. Louis, Philadelphia, New Orleans and New York.

As a result, federal agency staffs in a number of cities have been integrated

for the first time. Also growing out of this has come concerted federal agency action to bring about the desegregation of eating places and other public facilities in all local buildings where federal offices are located.

Another unpublicized step taken by the Defense Department in the early days of the Subcabinet Group came in response to protests over the use of Army military police, on at least one occasion, to order Negro personnel to leave a restaurant when requested by the manager. After a review of the problem, the Secretary of Defense determined that military police could never be used to enforce segregation practices, that legal advice should be provided by the services to any serviceman in difficulty with local authorities on this issue, and that in areas where local facilities are not available to Negro servicemen, such facilities should, so far as possible, be provided on base for all servicemen.

### *Nondiscrimination in NDEA Institutes*

A step perhaps even more significant was taken by the Department of Health, Education and Welfare as a result of a study in connection with the Subcabinet Group. Without any fanfare, Secretary Ribicoff directed that HEW financing of language and guidance and counseling institutes under the National Defense Education Act be henceforth conditioned on an agreement by all participating universities that the institutes will be conducted on a nondiscriminatory basis.

Although more than 150 presidents of colleges and universities throughout the country were informed of this new policy, there was no outcry of any kind. Calmly and with understanding, the great majority of the participating educational institutions, in the South as elsewhere, accepted the new nondiscrimination clause in their contracts.

Six southern institutions did withdraw, but the withdrawal of one, the University of Alabama, was not based on the new policy. Among the twenty-two southern institutions which accepted were the Universities of Mississippi, Texas, Tennessee, Kentucky, North Carolina, Florida, Florida State, Miami, Emory, Vanderbilt, and William and Mary.

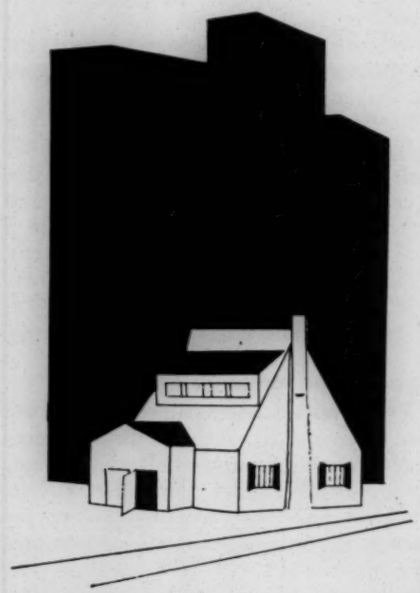
### *Other Administration Efforts*

Through the Subcabinet Group, Administration civil rights policies in various fields have been translated into action by all agencies and departments. One example is the President's policy against participation by federal officials in public meetings or conferences held under segregated circumstances. This policy was first enunciated when, after private negotiations had failed, the President publicly requested the Civil War Centennial Commission to move its commemoration of the firing on Fort Sumter from a segregated local hotel to the desegregated facilities of the Charleston Naval Station.

Later, Negro attorneys attended the dinner of the Atlanta Bar Association for the first time when Secretary Rusk, a native son of Georgia, explained the Administration's policy to local civil leaders.

The main strength of the Subcabinet Group comes from the strength of its parts. Take, for example, the new program to prevent racial discrimination against African and Asian diplomats. The White House staff of the Subcabinet Group has often been called upon by the State Department to assist in efforts to end such discrimination. In all those efforts—whether to desegregate restaurants along Route 40 or to open housing opportunities in the District of Columbia—we have stressed that the only way to stop insulting foreign diplomats is to stop all forms of discrimination against all persons of color. Secretary of State Rusk has made clear that "we cannot solve this problem if it involves a diplomatic passport to claim the moral rights of American citizens."

The point here is that this whole unprecedented effort by the State Department's Office of Protocol was initiated not by the Subcabinet Group but by the Chief of Protocol, Angier Biddle Duke, and it is being carried on persistently and energetically by the Assistant Chief of Protocol, Pedro Sanjuan.



Fortunately, the main parts of the federal civil rights machinery are in relatively good working order. The Civil Rights Division of the Justice Department, under Assistant Attorney General Burke Marshall, has never been more dedicated or more vigorous. The President's Committee on Equal Employment Opportunity, led by the powerful team of the Vice President and the Secretary of Labor, has brought together on one staff some of the most experienced professionals in the field, headed by John Feild, a former president of NAIRO and director of the Michigan FEPC.

The Civil Rights Commission, with two new members, Dean Erwin Griswold of Harvard Law School, and Dean Spottswood Robinson of Howard Law School, is no longer split down the middle. Under its new staff director, Berl Bernhard, the Commission is becoming a far more active instrument of intelligence and public education. A whole section of the Commission's staff, under William Taylor, is providing essential research and field work in support of the studies of the Subcabinet Group.

THE CENTRAL purpose of the Subcabinet Group and of all Administration efforts is to see that the power of all federal agencies and departments is used to promote equal opportunity. The President has made it clear that he wants federal power brought to bear on this problem consistently, intelligently, and effectively.

The President believes that the process of persuasion has proceeded far already, that a consensus of agreement with the great goals of the Constitution exists, and that the movement toward compliance with the Constitution has gained momentum. He wants this momentum to continue—and he expects that all parts of the federal government will take every necessary and proper step to promote it.

In his 1962 State of the Union message, President Kennedy said that "there is much more to be done—by the Executive, by the Courts, and by the Congress." There is no sense of satisfaction. There is full appreciation of the need for the Federal Government and for private organizations and citizens to get on with the job.

To the champions of civil rights the President has made it clear that he considers their efforts—and their criticisms—indispensable. He said in his message honoring Roy Wilkins after thirty years of service, that "it is the nation as a whole which should be congratulated" for having men like Wilkins and Martin Luther King and Whitney Young and the leaders of the Anti-Defamation League and B'nai B'rith "to spur it on to the essential goal of securing the full constitutional rights of all our citizens."

# "THE CONSCIENCE OF THE GOVERNMENT"

By Berl I. Bernhard

*Staff Director, United States Commission on Civil Rights*

**Berl I. Bernhard** joined the Commission on Civil Rights in November 1958, was appointed acting staff director by President Eisenhower two years later, and then named staff director by President Kennedy. He was born in New York City and attended Dartmouth College and Yale Law School (LL. B. 1954). In 1960 he was presented the Arthur S. Fleming Award as one of the ten outstanding young men in the federal government. He is thirty two.

The Commission on Civil Rights has just entered its fifth year. In its young life, it has issued nineteen documents and been the subject of considerable attention in the nation's news media. It has been hailed and praised, denounced and damned. Yet, only a few of its friends and fewer of its detractors have fully understood the purpose and functions of this Federal Commission.

This widespread confusion is not surprising. There are not many agencies within the Executive Branch of the Federal Government whose sole purpose is fact finding and reporting: these are the sole duties of the Commission on Civil Rights and it has no powers other than those that enable it to investigate effectively. The Civil Rights Act of 1957, by which Congress established the Commission, gave the agency three tasks: to investigate sworn complaints of denials of the right to vote on the basis of color, race, religion, or national origin; to gather and study information about legal developments constituting denials of the equal protection of the laws under the Constitution; and to appraise federal laws and policies with respect to the equal protection clause of the Constitution. These duties—together with the requirement for the submission of reports to the President and Congress—constitute the basis of all Commission activities.

It follows, therefore, that the Commission can offer no remedies to individual citizens who complain of specific instances of racially motivated injustice. Its function is to look beyond such cases to determine whether effective remedies are available to persons whose Constitutional rights have been violated. If no remedies are available, or if they are not effective, the Commission has the duty of calling this lack to the attention of the President and the Congress. In theory—and sometimes in practice—this will lead to legislation or executive action to prevent the recurrence of such deprivation of civil rights.

The history of the Commission's early investigations in the area of voting will help trace the process. On the basis of hearings, investigations, and reports from state advisory committees, the Commission, in its first statutory report, found that denials of the right to vote existed and that there were no adequate remedies available to its victims. The Commission proposed that Congress enact legislation to assure proper enforcement of the Constitutional prohibition of racial discrimination in the area of voting. It recommended that the Congress empower the President to appoint temporary federal registrars in districts or counties from which verified reports of racial discrimination against qualified potential voters had been received. This proposal led to the voting referee provision of the Civil Rights Act of 1960 which, though substantially different from the Commission's recommendation for registrars, was enacted within a year after the submission of the Commission's first biennial report.

Although the Commission's 1959 report included sections on education and housing, its main emphasis was on voting. During its second two-year term, the Commission continued its studies in the area of voting but focused increased attention on other civil rights problems too. Specifically, the Commission studied the civil rights aspects of education and housing, and initiated investigations in the areas of employment and the administration of justice. The result of these studies was a five-volume, 1393 page report, made public in the fall of 1961.

The Commission found some progress and many hopeful signs in its thorough review of the civil rights situation in America. Beyond that, it called to the attention of the President, the Congress and, thereby, of the people the tremendous job remaining.

*Voting*: In spite of some very specific Constitutional language, federal legislation, and numerous judicial decisions on the subject, there are still about 100 counties in which Negro citizens are actively prevented from exercising the right to vote. The Commission also called attention to the dilution of the right to vote caused by malapportionment and unequal electoral districting.

*Employment*: Negroes are still overwhelmingly confined to the least skilled, worst paid, and most insecure occupations. Unemployment, whether cyclical or structural, hits them first and most severely. This condition is perpetuated by barriers against Negro participation in many vocational training and apprenticeship programs. There are labor organiza-

**Members of the U.S. Commission on Civil Rights, left to right: Dean Spottswood W. Robinson III, of the Howard University Law School; Theodore M. Hesburgh, president of the University of Notre Dame; Staff director Bernhard; Dr. John A. Hannah, chairman of the Commission and president of Michigan State University; Robert G. Storey, Commission vice chairman and head of the Southwestern Legal Center; Dr. Robert S. Rankin, head of the Department of Political Science at Duke University; and Dean Erwin N. Griswold, of the Harvard University Law School.**

tions, particularly among the skilled craft unions, which continue to be instrumental in keeping Negroes within the confines of an economic ghetto.

*Education*: All aspects of discrimination are interrelated, but no one task is more important than assuring this and future generations of American Negroes that racial discrimination in education will not impede the full development of their minds and abilities. Other minority groups have overcome most of these barriers; given equal opportunity and encouragement, the Negro will do the same. However, equal educational opportunity has not yet been achieved, either in the South or elsewhere. Three Southern states still cling tenaciously to rigid racial segregation in all educational institutions. The other Southern and border states have made some progress toward eliminating race as a criterion for school assignment, but the pace has been excruciatingly slow. Moreover, the Commission's study shows clearly that school segregation is by no means limited to the South; the unwritten rules that confine Negroes to certain areas in most Northern and Western cities invariably result in segregated education.

*Housing*: In its 1961 Report, the Commission reiterated previous findings that a considerable number of Americans are being denied equal opportunity in housing because of their race or, less frequently, because of their religion or ancestry. In the light of these findings, the Commission considered the role of the federal government, which is deeply involved in the financing and construction of housing units throughout the country. It concluded that the current policies of the federal government in regard to housing are inconsistent with Constitutional principles and with the professed beliefs of the nation's leaders, both past and present.

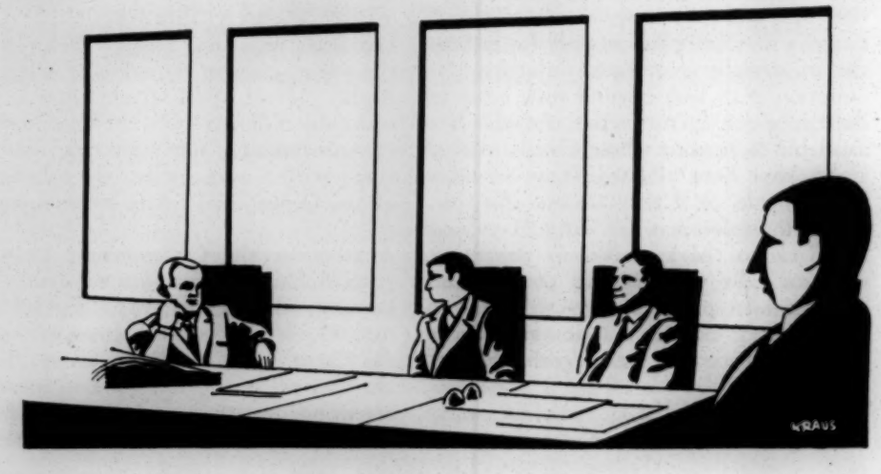
*The Administration of Justice*: Equal justice and equal protection are cornerstones of democracy. It is a saddening fact that there are persons in America who live in fear of unlawful police violence with official connivance. The Commission pointed out that the fact that most policemen do their duty without recourse to unlawful violence merely aggravates the criminal irresponsibility of those peace officers who use their office to terrorize the defenseless.

A reading of the Commission report leaves no room for smugness. The Commission made many recommendations for action by the federal government to cope with some of these problems. It recommended that the Congress abolish literacy tests in all elections, or, in the alternative, that it provide that a sixth grade education be considered sufficient proof of literacy. The Commission also called for legislation requiring every local school board that still maintains segregated schools to file a desegregation plan with a designated federal agency within six months. It also called for the enactment of federal laws providing strengthened criminal sanctions against unlawful official violence and subjecting local governments to liability for the unlawful acts of officers in their employ.

The Commission called on the President to take strong executive action in all fields, especially in the areas of housing and employment. The Commission's recommendations to the President are based on the conviction that the federal government should in no circumstances be involved—however indirectly—in any activities or programs from which any American citizens are excluded on the basis of race or religion. Nor should the federal government's vast influence be neutral in regard to discrimination.

THESE are some of the Commission's recent recommendations. The 1961 report contains a total of thirty-seven recommendations for legislative and executive actions. It is unlikely that all of these suggested actions will be taken at any time in the foreseeable future. But some action is being taken and the Administration, through the Mansfield bill, is seeking to enact into law the Commission's recommendation that literacy tests be abolished as a device to deny the right to vote.

The Commission is, in effect, the duly appointed conscience of the federal government in regard to civil rights. Few persons, and even fewer governments, listen to their consciences at all times. Yet progress toward the goal of equal opportunity seems inexorable. The Commission hopes it is making a constructive contribution to the pace and direction of that progress.



# THE ENFORCEMENT OF CIVIL RIGHTS

By Burke Marshall
*Assistant Attorney General*

**Burke Marshall,** Assistant Attorney General in charge of the Civil Rights Division, came to Washington from Plainfield, New Jersey, by way of Yale University, Tokyo (with the War Department 1946 - 1947) and Yale Law School (LL. B. 1951). In 1960, he became a partner in the Washington Law firm of Covington and Burling, specializing in anti-trust law. He is thirty nine.

Professor John Hope Franklin suggested in his recent Sidney Hillman lectures at Howard University that "enforcement, not enactment" is the key test of civil rights legislation. I agree. I think that we as a nation have made important progress in civil rights during the past year, and have done so simply by turning to use many existing tools and powers of the federal government which have not been used—or not fully used—in the past.

This has been on a much broader front than by enforcement of civil rights legislation by the Department of Justice. The Administration has, for example, started on the very long but very important task of ensuring full equality of employment opportunity not only in the federal government but also by the thousands of concerns contracting with the government. This start had not been made before in any affirmative or effective fashion.

There are other advances. A significant one reflecting the tone of the Administration is the creation of a Subcabinet Group, consisting of representatives of all of the important agencies and departments of the executive branch, to meet regularly at the White House. Its purpose, which I think has been realized, is to provide a forum in which the civil rights problems of the United States—and the impact and potential impact of the federal government on them—can be impressed particularly on the parts of the government whose primary responsibilities lie elsewhere.

What follows does not extend to these matters. It is limited to the work of the Department of Justice. But I do not want it to be thought that what follows tells the complete story. Civil rights problems in this country are not exclusively racial or Southern. Northern police misconduct is not principally racially motivated, and the Northern racial problems in administering school systems are not limited to New Rochelle. Irrational, invidious discrimination persists nationally in our housing, labor unions, corporations, hospitals, law firms, and universities, and—together with the lasting effects of past inequities—creates an ugly, persistent economic crisis for minority racial groups. This is a major national welfare and economic problem. Undeniably, however, the most apparent and, in some ways, most difficult legal civil rights problems—the problems which are the Department's responsibility—involve the Negro and the South. Consequently, this report, like our work, focuses on that region and its people.

Even within that limitation an exhaustive compendium of our statutes and activities is beyond the scope of this piece. Nor shall I offer a statistic-studded specialist's memorandum. Rather, I hope to exemplify the Justice Department's increasing civil rights role by describing several of our representative cases involving voting, transportation, and schools.

### *Voting*

In a large number (though by no means a majority) of counties in a small number of states the right to vote is denied to hundreds of citizens by preventing Negro registration in two major ways: discrimination by registrars in the application of qualification tests; and intimidation by (most often) private individuals. Prior to 1957 the Justice Department had only an unwieldy parcel of criminal statutes with which to implement the guarantees of the Fourteenth and Fifteenth Amendments. Criminal cases ran afoul of the South's assumptions in the form of Southern juries.

The Civil Rights Acts of 1957 and 1960 have given us three new tools. First, by proving discrimination or intimidation in court we can ask a federal judge to order the defendants to cease their actions or go to jail. Secondly, if we can prove a pattern or practice of discrimination, any Negro who is thereafter rejected by the Board of Registrars may apply to the federal court for a registration certificate which is valid at all subsequent elections. In determining the qualifications of the Negro applicant, the court *must* determine his qualifications in accordance with the qualifications *and standards* used by the registrars in registering white persons in the past. Thirdly, we now are able to prepare cases thoroughly before filing as we can compel local officials to let us examine and copy their registration records. How do these laws work?

Macon County occupies about 900 square miles in Southeastern Alabama. About 10,000 of the voting age popula-

**Attorney General Robert F. Kennedy (right) watches as his staff members research law on use of U.S. marshals for Montgomery, Alabama, bus integration affair.**

tion are Negroes, many of whom are associated with Tuskegee Institute and its related Veterans Hospital. By 1958, all 3000 eligible white persons, but only 1000 or ten percent of the Negroes, were registered. Investigation disclosed that the racially disparate voting figures were the result of myriad discriminatory devices. It developed that, in effect, whites became registered by reaching twenty-one. In fact, the registration books were taken to the homes of illiterates where—despite the state's stringent literacy statute—they were enrolled at their convenience.

The Negro applicant's route was far different. First, he had to ferret out a functioning registration board which, as often as not, had secreted itself in an unlikely part of the courthouse. Moreover, several of the post-1950 boards had to be sought soon after their appointments because they resigned after registering the newly eligible whites. If cornered, the Board subjected Negroes to interminable literacy tests so that, at most, three or four applicants were processed on a registration day. One woman wrote out Article II of the Constitution five different times in an eighteen-month period. Each time she "failed" the "test" because she omitted on her application form the date of the month on which she had moved into Macon County over ten years prior to the date of her application, even though she had lived there continuously ever since. All that the county required was a one-year residence for registration.

State law provides for about thirty registration days per year and some of these may be spent in precincts chosen by the registrars, i.e., non-Negro precincts. In short, most Negroes did not get to apply for registration and those who did were rejected for trivial errors on tests on which the whites received aid and assistance. All of this added up to these astonishing figures. In 1957-58 an average of about fifty Negroes were registered; in 1959 no Negroes were registered; in 1960 eight Negroes were registered. In 1961 to the date of the Federal Court's decree no Negroes were registered.

SUIT HAD been filed in December of 1958 under that part of the 1957 Act which is directed at discrimination by local officials. Delays followed—principally from the absence of a registration board when the suit was filed—and the situation was not dealt with until last year. Out of the trial last March came a strong, detailed court order which directed in effect that only the registration standards theretofore applied to whites could legally be applied to Negroes. The Department has been active in insuring compliance with the order, and obtained suplementary relief in September. The figures are graphic; as of March 1, almost 1300 Negroes had been registered since the court's decree. On the last two registration dates in Macon County an average of about 125 Negroes were processed for registration. Furthermore, throughout this period the District Judge has required the Board to report monthly as to its progress and with our help is constantly scrutinizing the registration procedures to preclude a departure from the terms of his order.

Between 1957 and January 1961, four other cases of this type were brought to court. Since that January, we have completed the last two of these cases—at least to judgment for the United States. In reality the cases are never completed until Negroes go into the voting booth as freely and as comfortably as whites. Fourteen additional cases have been instituted. Of these, three have already been tried, one in a county with over 100,000 people, and a preliminary hearing has been held on a fourth. One important case, brought against the State of Louisiana, challenges the constitutionality of its constitutional interpretation test.

AFTER I TOOK office as Assistant Attorney General, and after consultation with the Attorney General, I concluded that if the Civil Rights Acts were to be vigorously enforced as the President had directed, it would be necessary to seek out specific information about statistically suspicious counties, i.e., those in which the Negro population over twenty-one exceeds abnormally the number of Negroes registered and in which the white population over twenty-one is close to 100 % registered. Accordingly, we have inquired as to whether there is discrimination in a great number of these counties and within the coming months we will make additional inquiries into the rest of them.

One method of inquiry is by inspection of voter registration records. These have been inspected about forty times since the 1960 Civil Rights Act was passed. We have six non-legal personnel, under the supervision of three experienced trial attorneys, in the Division analyzing these records on a full-time basis.

We also interview persons who we believe have knowledge of relevant facts about discrimination. It should be kept in mind that for the untrained person it is not easy to discover legal evidence of discrimination. Local Negro leaders cannot pore over registration records, nor can they find out the experiences of white persons who have been registered. For instance, a state may prescribe that voters must explain a portion of the Constitution. The Negro leaders pass with flying colors, the rank and file do not. Those leaders do not know that in some counties, if a reading and writing test is involved, or an application must be completed, white applicants are assisted by the local officials while Negroes go it alone, fail, and go home to practice.

This is a sketch of what we are doing to secure the right to vote in the face of official discrimination. We have learned that the 1957 Civil Rights Act plus the risk of the appointment of federal refer-

ees under the 1960 Civil Rights Act has been effective in persuading Southern officials to change ways established for three-quarters of a century; that the voting problem exists in less than 200 counties in the South; that it will be possible to resolve the problem in some of these without litigation; and that with competent and hard-working personnel, proper organization, plus cooperation from the United States Attorneys' offices in the South, the eventual result everywhere is inevitable, although a major immediate step could be taken by favorable Congressional action on the Mansfield bill (S. 2750) on literacy and other performance tests which has bipartisan and Administration support.

I should also add that we have learned that in some cases—not as many as might be hoped for, but some—litigation is not proving necessary. The Attorney General has directed me to explore in advance of litigation all possible avenues of self-correction by local officials of whatever abuses and defects have existed. We in fact follow this path in all instances. As the law, and the consecuences of failing to respect it, become more generally known, I am hopeful that this manner of dissolving legal blocks to Negro registration will prove increasingly fruitful.

In some ways, the problem of intimidation—an intimidation mixed with indifference and apathy caused by years of rebuff and the loss of faith in our processes—is the more difficult one. The statute provides that no person shall attempt to intimidate, threaten or coerce any other person for the purpose of interfering with his right to vote at a federal election. It deals with many forms and causes of fear. For example, a person may be fired from his job because of his efforts to register; his credit may be cut off; the channels of trade may be closed to him; state criminal processes may be used to intimidate him.

WHEN INTIMIDATION occurs, its effect is devastating to the individual Negro involved and discouraging, to say the least, to all Negroes in the area. Consequently if we are going to enforce the statute we must act fast. Fortunately, while intimidation is hard to prove, all of the factors are not on the side of those attempting to prevent Negro registration and voting. Unlike school cases where the defendants are public officials and have at their disposal the resources of the public treasury, here the individual defendants stand on their own. In addition, intimidation cases are usually dramatic and public opinion is squarely with those who are trying to register to vote. Here are examples of the type of situation with which we deal:

Fayette and Haywood Counties lie near Mississippi in southwestern Tennessee. Almost 25,000 people live in each county and in both more than 60 percent of the residents are Negroes. In 1959 no Negroes were registered in Haywood County and only fifty-eight were on the rolls in Fayette.

Significant Negro registration activity began in Fayette County in 1959; there were no registration officials in Haywood County between 1958 and May of 1960. In the fall of 1959 Fayette County's whites cynically excluded Negroes from a local primary election which, the whites explained, was a private affair. The insularity bespoken by this tactic

was penetrated by an immediate voting discrimination suit which, in effect, brought word of the death and burial of the white primary some years before. A consent decree followed early in 1960.

To vote in Tennessee, a resident need only be twenty-one, sane, and law abiding. This absence of tests to be used to exclude Negroes, plus the white determination to retain political dominance, produced classic intimidation cases and the first tests of that portion of the 1957 Act.

The whites prepared and circulated lists of the Negro leaders' names. These persons were denied credit by the banks and merchants, their insurance policies were cancelled, they lost their jobs, and those who were retail merchants were unable to stock their shelves. But the whites, acting on outmoded assumptions, underestimated the Negroes' determination, and registration continued in both counties. Some time early in the summer of 1960, most of the white community decided in effect to depopulate the counties of Negroes by evicting sharecroppers and tenants from the farmland which they had worked for years. Only registrants and their families were given notice and these persons came to know the other pressures that their leaders had suffered from the beginning.

By mid-December 1960, the Department had filed three cases against more than 150 defendants in both counties, including individuals, banks and business associations. Some evictions occurred before we were able to obtain temporary injunctions on December 30, 1960 and in April, 1961, preliminary injunctions for the remainder of the cases were issued.

These cases are not over yet, and further comment is inappropriate. However, they establish our ability to deal with instances of economic reprisal directed at Negroes' efforts to vote. Moreover, this portion of our statute is not limited to privately imposed pressures. In one of the two other cases brought under it (now pending in the Supreme Court), a preliminary injunction was secured against the use of the state criminal processes—arrest, confinement, interrogation, bail, trial—if the processes were being used to deter registration by Negroes.

While these legal victories show progress, the statute alone can never be adequate to cope with the problem. First, we can enjoin the repetition of dramatic, violent intimidation, but that first incident, which is the basis for our subsequent court order, may itself deter the Negro community from further efforts for months or even years. Secondly, the Negro teachers, who are best equipped to lead others, are economically most dependent upon the whites and most susceptible to subtle intimidation of the sort that is difficult to link to voting in the courtroom. These problems will not ultimately be solved except with progress in other basic civil rights areas—the national problems of poverty and limited job opportunities to which I have already referred.

### *Schools*

It is a politically widely advertised fact that the Attorney General has no authority to initiate school desegregation suits. This does not mean, however, that the federal government has no responsibility on this important national problem. With the approval of the Attorney General, we have taken care not to use the lack of legislation as an excuse for inaction.

At a minimum, the responsibility of the Department of Justice in this area is to take any action that is necessary to protect the integrity of orders of the federal courts and to protect and promote the due administration of justice

in communities where school orders have issued. It is my personal belief that at least some, if not all, of the violence and law enforcement problems which have attended school desegregation in the past were caused—or at least were not averted—by reason of a failure to recognize explicitly and give effect to this responsibility. In some cities that failure created a temporary vacuum—a corresponding failure by the local officials and community to accept the inevitable and prepare for it—which proved disastrous.

This year the South and the nation made great symbolic progress in school desegregation. For the first time since 1954, many cities and towns accepted initial desegregation without a single instance of disorder. Particularly notable advances were made by entirely peaceful transitions in Atlanta, Dallas, New Orleans and Memphis.

The Department did what it could to make clear the recognition and acceptance of our responsibility, and to offer to local officials any kind of assistance which it was within the power of the federal government to grant.

FOR THE most part this work was done through informal conferences and a series of trips made by John Seigenthaler, administrative assistant to the Attorney General, and me to the major communities to be affected. In each case we attempted to be useful rather than coercive, suggestive rather than demanding. In each case we discovered an acceptance of responsibility on their part by local officials—in some cases, coupled with a remarkable willingness and ability to provide local leadership. In each case these officials, with the support and encouragement of others, in fact were fully effective in bringing their people into compliance with federal law in a fashion which reflected credit to the nation as a whole as well as to the South.

Where outside factors interfere with this kind of compliance, the Department has an additional litigating responsibility. This year we participated formally as a friend of the court in perhaps a dozen school cases. The St. Helena Parish, Louisiana, case illustrates some of the problems these cases raise. The Negro private plaintiffs filed suit in September of 1952. Numerous procedural delays followed, and the district court did not order desegregation of the school until May of 1960. As a part of its own massive resistance program, in 1960 and 1961 Louisiana enacted several parcels of obstructionistic statutes. The most quaint revived the doctrine of interposition; the most troublesome authorized each parish to abandon its schools by referendum. Interposition was aborted in a case involving the New Orleans school system, but on April 22, 1961, St. Helena Parish voted to close its schools.

The school closing law is ostensibly racially neutral; that is, it was not accompanied by legislative history disclosing the racial purpose. Thus the case presented delicate problems of the judicial probing of the legislative mind and, absent that, a state's abstract obligation to provide a public school system. In this context, the court directed specific inquiries to the parties, to the United States, and all other states' attorneys general. We had previously moved to enter the case as *amicus curiae*, and also responded to the court's inquiries in a brief taking the position that the Louisiana statute was unconstitutional under both the due process and the equal protection clauses of the Fourteenth Amendment. The court held the statute void, and the Supreme Court recently affirmed unanimously.

One other new development in this area is worth brief mention. We believe that the United States is authorized to protect its courts' orders by a civil suit for equity relief without a specific grant of standing from Congress, and have generally been upheld in this position. (A motion by the United States to intervene in the Prince Edward County case was denied, but the narrow grounds of the decision were limited to matters of timing and factors peculiar to that case.) Late last year officials in Louisiana permitted or arranged for the transfer of children from one parish which had been ordered to desegregate its schools to another that had not. We brought suit to desegregate the schools of the second parish, accepting children from the first, as the only realistic implementation of an order of our courts.

### *Transportation*

The right to travel in interstate commerce without distinction of race has been won since World War II largely by private plaintiffs on an arduous case-by-case basis. In several of the cases the Government participated as *amicus* at the Supreme Court level. In 1955 the ICC held that the non-discrimination provisions of federal law governing interstate carriers and their facilities meant race as well as rates. Before 1961, however, progress was spotty. The Justice Department was thought to be without authority to protect such private rights affirmatively and the limited resources of the ICC did not permit an effective enforcement campaign.

In 1960 the Supreme Court held that federal law protected interstate travelers from racial discrimination in facilities used regularly by interstate carriers, whether or not the facilities were owned or controlled by the carriers. The Freedom Rides followed in the spring of 1961. After a tense week following the first outbreak of violence, in which every effort was made to induce local and state officials to meet their responsibilities, the events demanded direct and large scale federal intervention. Some Alabama officials looked on as violence erupted in Montgomery. The right of citizens of the United States to elemental protection of the law, and to travel securely among the States, was at stake. Whatever the justification for complaint against the publicity methods used by the Freedom Riders, the legal situation and our responsibility were perfectly plain. Ordered liberty means the protected exercise of unpopular rights or it means nothing. It

was under these pressures, and for these reasons, that the Attorney General was compelled to send a substantial number of deputy marshals to Montgomery.

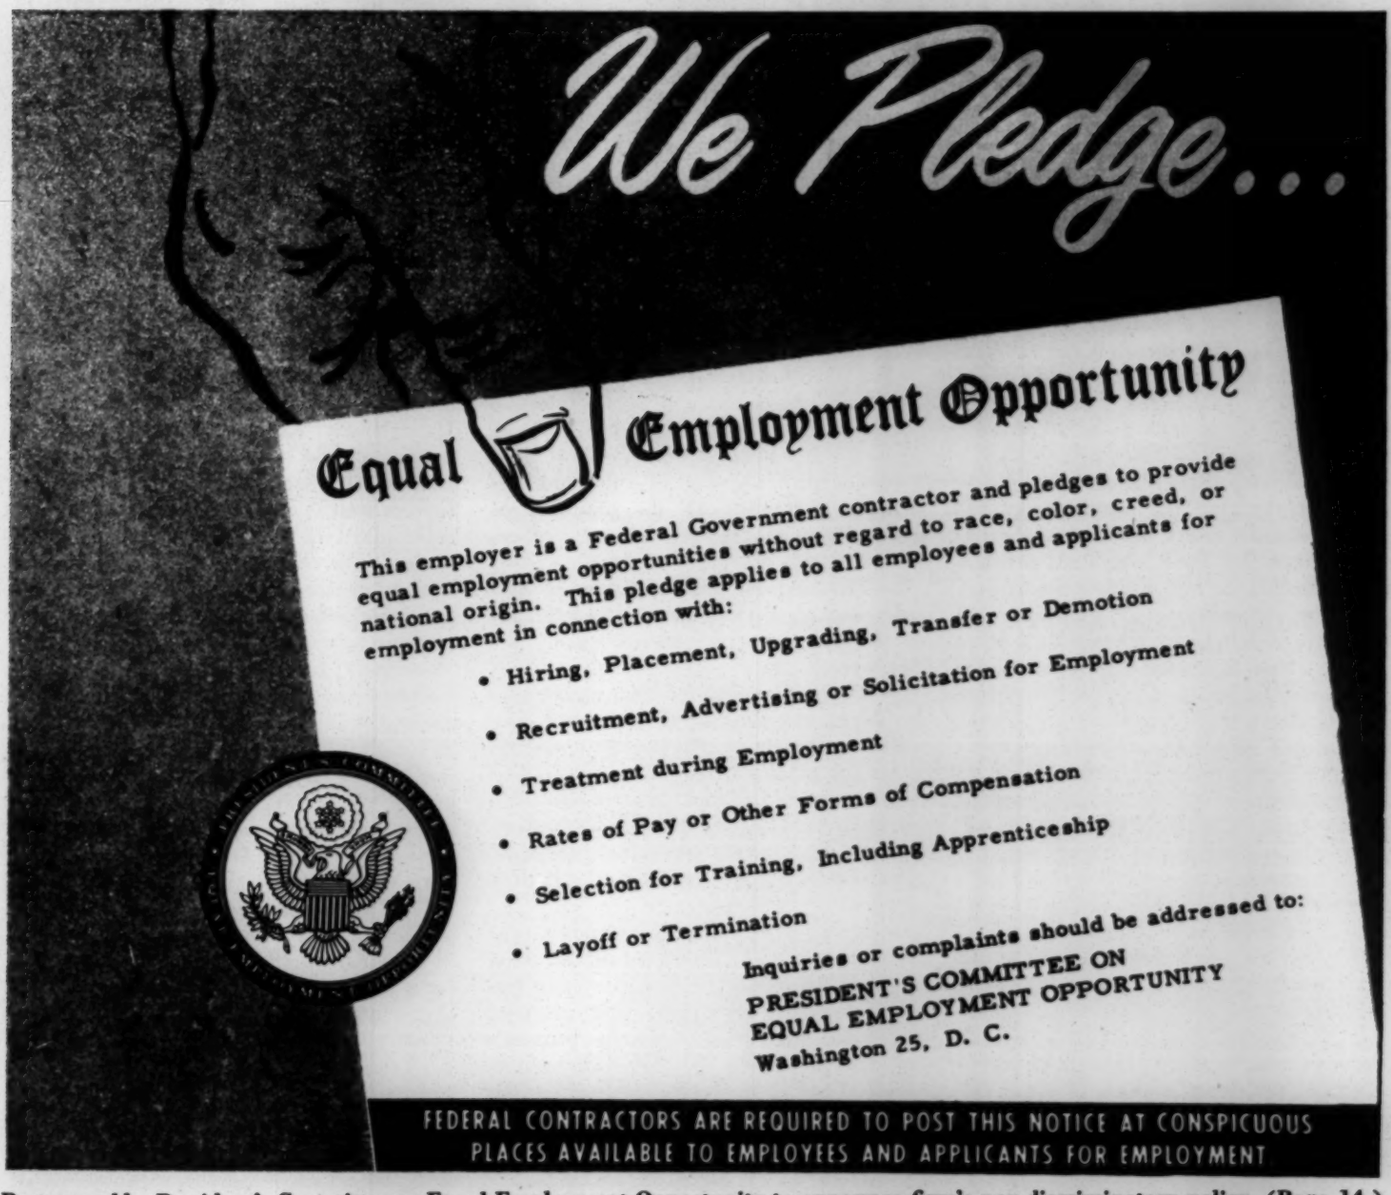
This necessity also mothered the Division's resuscitation of the much criticized Debs case theory, i.e., that the Federal Government has a litigable interest in interstate commerce free from private interference. On that basis we sued successfully to enjoin the U. S. Klans from interfering with the Freedom Rides and to compel the police of Montgomery, Alabama, to fulfill their obligation to protect persons engaged in lawful—though locally unpopular—activity.

Next, the Attorney General petitioned the ICC to issue comprehensive regulations forbidding racial distinctions in facilities used by interstate common carriers. These regulations were issued on September 22, 1961, and they became effective on November 1. We have brought suits to enforce compliance with them in Alabama, Louisiana, and Mississippi. Basically similar airport cases have been instituted in Alabama and Louisiana.

The results of this in a way are remarkable. Since May hundreds of bus terminals in hundreds of Southern cities and towns have been officially and formally desegregated. As a corollary we have been able, without litigation, to persuade the eighteen railroads operating in the South to take action to desegregate hundreds of additional rail terminal facilities. Where there were localities with continuing problems, we took action as promptly as possible to eliminate them. Virtually all rail and bus terminals are now at least formally desegregated, both officially and by the carriers. I think that everyone would admit that any remaining problems are now only a question of a short time.

This happened because of the basic respect the people of all parts of the United States have for the law, so long as they know the law is in fact—to return to the beginning of this piece—going to be enforced as well as enacted. We have used, in all three areas I have referred to, legal tools which were not generally known of, but tools which were always there, ready to be picked up. They have been used only to enforce principles of federal and constitutional law as to the basic framework of which there has been no serious dispute for some years.

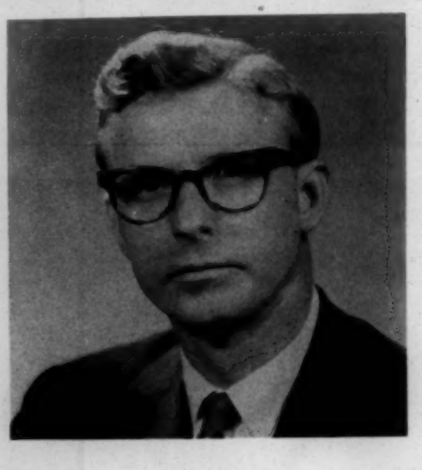
I think that there is a great deal more work of this kind which can be done in this way.



**Poster used by President's Committee on Equal Employment Opportunity to announce firm's non-discriminatory policy. (Page 14.)**

# EQUAL EMPLOYMENT OPPORTUNITY

By John G. Feild
*Executive Director*
*President's Committee on Equal Employment Opportunity*



**John G. Feild** became executive director of the President's Committee on Equal Employment Opportunity after more than ten years of service in the civil rights field. From 1956 to 1959 he was executive director of the Michigan Fair Employment Practices Commission. He has served as consultant on intergroup relations problems for a variety of public commissions and private agencies and in 1956, was national president of the National Association of Intergroup Relations Officials (NAIRO). He was born in Little Rock, Arkansas, and attended Wayne State University in Detroit. He is thirty nine.

We are now in the second generation of executive action by the Federal government aimed at insuring equal employment opportunity. There have been many orders in this field since Executive Order 8802 was issued by President Roosevelt on June 25, 1941. But none has been more extensive or more implemented by administrative authority than Executive Order 10925 issued by President Kennedy on March 6, 1961. In the past, there was relatively little administrative effort to make federal sanctions work on a comprehensive, across-the-board basis.

I do not mean to detract from the efforts and achievements of previous committees. Their work and progress laid the groundwork for the new executive order and the new President's Committee on Equal Employment Opportunity. Without that groundwork, it is doubtful that the powers afforded the new Committee in E. O. 10925 could have been provided.

The primary administrative responsibility for applying the provisions of the executive order rests upon the governmental agencies. The Committee is interdepartmental; its role is one primarily of reviewing, coordinating, guiding, and providing supporting and auxiliary services to those agencies. Specifically, the Committee has assumed responsibility for:

1. Undertaking programs of "affirmative action" with government contractors and government agencies aimed at the enlargement of equal employment opportunities regardless of race, creed, color or national origin.

2. Processing and resolving complaints filed by individuals under the provisions of the executive order and the Committee's Rules and Regulations.

3. Administering a comprehensive compliance reporting system.

4. Reviewing and auditing agency practices and procedures for implementation of the program.

The overall program of the Committee affects more than 60,000 government contractors and more than 20 million workers.

We have not yet been able, of course, to get all phases of the program into full operation, but we have moved along. Among the steps taken during 1961:

—The promulgation of rules and regulations pertaining to the practices of government contractors. (None had existed before).

—The revision and adoption of new rules and regulations governing practices of federal agencies toward their own employees.

—The designation of compliance and employment policy officers of high rank within each agency. A basic training program for employment policy officers and orientation and review sessions for compliance officers were also put into effect.

—A review of individual agencies' regulations concerning federal employment.

—A comprehensive study and recommendation for the operation of the most effective compliance reporting system was completed late last year. This involved thorough review of various proposals by the Business Advisory Committee of the Bureau of the Budget; similar review and discussion of feasibility with the contracting agencies; consultation with selected major contractors and subcontractors; technical discussions with representatives of the Bureau of Labor Statistics, the Census Bureau, the Labor Management Reports Section, and the Bureau of Old Age and Survivors Insurance of the Social Security Administration, as well as continuous discussion with representatives of the Bureau of the Budget. The compliance reporting system is now in operation and should provide the most effective tool yet devised for insuring equal job opportunity.

—The Committee also completed and reviewed the first comprehensive survey of employment practices within the federal establishment (embracing 2,196,557 employees.) A spot check of 15 agencies is now underway, and a second government-wide survey will be made in May. It also held, in 1961, six regional conferences of all federal facility directors on federal employment practices.

—New procedures for the processing of complaints filed under the executive order are now bringing about an increasing degree of corrective action in employment practices on the part of government contractors and agencies. Complaints have been filed with the Committee and the agencies at an unprecedented rate.

—Beyond these daily operations, a wholly new program designed to enlist

the cooperation of labor organizations has been set up. A community relations and information program has been organized, designed to inform business, labor and civic groups of the requirements of the executive order and the procedures of the Committee and the federal agencies. This includes use of mass media as well as an active program of direct consultation with trade, personnel and industrial relations associations, bar associations, labor councils and organizations, civic, religious and minority groups, and state and local agencies which have regulatory authority concerning merit employment practices. The primary objective of this program has been to help those affected by this executive order to understand that a new and meaningful approach is being taken.

MAJOR CONTRACTING agencies such as Defense and Atomic Energy have cooperated in administrative studies to find the best ways, within the regular structure of government procurement, of assuring that government contractors make good use of minority manpower. These studies have resulted in Defense Department approval of a program designed to provide technical services within the regular procurement structure, utilizing the compliance reporting system to help identify problem areas. This will bring about a new type of relationship between the contracting agency and the government contractor. The concept behind this new program is that a constructive partnership between industry, government, labor and community resources must be developed on a realistic basis, utilizing the knowledge gained in recent years in personnel management. It is designed to reach thousands of government contractors and subcontractors on a systematic basis.

The Committee has also undertaken consultations with a number of other federal agencies playing crucial roles in the manpower development and employment practices. For example, it has coordinated its efforts with the Bureau of Employment Security, which now seeks to establish nondiscriminatory employment procedures and practices on the part of state employment agencies. The Bureau of Apprenticeship and Training has set up new nondiscriminatory standards and is promoting the voluntary establishment of such standards on the part of Joint Apprenticeship Councils.

The Committee has also coordinated its efforts with the Department of Health, Education and Welfare, especially in the field of vocational education programs. New ideas and activities have been launched on a pilot basis and will soon be extended on a more general basis. Each of these programs will have a limited number of specialist personnel assigned to implement the policies.

A SUBCABINET level committee, coordinated by the White House, has served to bring about an extraordinary degree of emphasis on the goal of equal opportunity among federal agencies. A wide variety of individual agency actions, as well as government-wide programs, have

**Courtlandt Gross, president of the Lockheed Aircraft Corporation (second from left), signs a "Plan for Progress" with the Equal Employment Opportunity Committee as Vice President Johnson, President Kennedy and Secretary of Labor Arthur Goldberg look on. Below, the Vice President, at left, opens the Committee's first meeting.**

the ADL bulletin

Entered as 2nd class matter

**Equal Employment Opportunity officials include (left to right) Hobart Taylor, Jr., Special Counsel; Assistant Secretary of Labor Jerry R. Holleman, Executive Vice Chairman; and Mr. Feild.**

emanated from this committee. Many of these have been activated under the joint leadership of the Civil Service Commission and the staff of the Committee on Equal Employment Opportunity.

IN summary, I believe that during its first ten months the Committee has developed a comprehensive program designed to implement each of the four major responsibilities outlined earlier.

A new integrity, both as to procedure and substance, has been built into the complaint process. There has been improvement in the ability of the agencies and the Committee to deal with these situations effectively and to achieve corrective action. Among the improvements to date are the following "firsts" in Negro-white relationships:

¶Negro tobacco production workers in integrated facilities in North Carolina.

¶Wider job assignments and upgrading opportunities in aircraft in Georgia, North Carolina, California and other areas.

¶Integrated job assignments and upgrading opportunities in electronics in Nashville, Dallas and New Jersey.

¶Production and technical jobs in electronics in South Carolina.

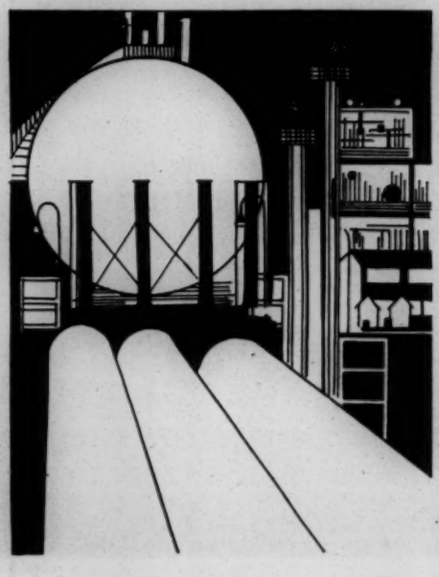
¶Production assignments in appliances and chemicals in Nashville.

¶Technical and clerical assignments in the oil industry in Southern Illinois.

¶Building trade assignments in construction in Florida and Louisiana.

¶New upgrading opportunities in shipbuilding on the West Coast.

¶Individual job adjustments in a variety of widely scattered situations throughout the country.



THIS type of corrective action is becoming a regular part of contract administration within the agencies. Hopefully, it is symptomatic of restored confidence on the part of minority groups in the fact that this Administration intends to act promptly and effectively on complaints. The rate of complaints being filed with this Committee is more than double that processed by the Nixon Committee during its peak of operation in 1958. This Committee has had more than 600 complaints filed with it in its first nine months; throughout the previous eight years only 1,042 complaints were received.

In addition to these efforts, the Committee has programs in the fields of in-service training, and supportive activities in the employment and educational areas. It also seeks to bring about the widest possible public understanding and support for the goals of the executive order.

One other important activity will close this preliminary report: the Plans for Progress program.

Shortly after the first meeting of the Committee on April 11, Vice President Johnson called a meeting of the presidents of the fifty largest defense contractors. Out of that meeting developed a strong spirit of cooperation by these large employers. After that meeting, negotiations were undertaken with the Lockheed Corporation concerning a number of complaints filed by employees in its Marietta, Ga., plant. Out of those consultations came the idea for development of a Plan for Progress for Lockheed. On May 25, in White House ceremonies, the Vice President and Courtlandt Gross, then president of Lockheed, signed a joint statement setting out what the company and the Committee would do to insure equal employment opportunity in all company operations.

By the time the Lockheed Plan was signed, negotiations were underway with a number of other contracting firms. In July, eight more firms signed their own Plans for Progress as worked out in cooperation with the Committee. In December, twelve more firms signed their Plans with the Vice President—bringing to 2,500,000 the number of employees covered by the program. At this writing, some fifty-two companies have developed their own Plans for Progress.

In the year ahead, the major contracting agencies will develop similar affirmative action programs with hundreds, perhaps thousands, of contractors. All of them will pledge their continuing determination to guarantee this most basic right—equal opportunity without regard to race, creed, color or national origin.

# ECONOMICS OF EQUALITY

Tom Kahn

The civil rights organizations have produced no detailed studies of the Negro's economic plight as it relates to national trends. Not until the March on Washington did the movement project a clear set of economic demands. They were essentially correct, but sketchy, and have since been pretty much forgotten. They need to be revived and popularized.

Several of the organizations, notably SNCC and CORE, have begun to recruit numbers of working class and unemployed Negroes, many of them youths. Attracted by the militant direct-action of these organizations, the new recruits become restless when activity ebbs and often drift away. To a large extent, this will be a perennial problem. Still, more intensive internal social-educational programs will certainly polish some rough diamonds and yield high-level leadership with deep roots in the community.

The task is not easy; it would be a pioneering effort in many ways similar to the worker-education programs developed by the early labor movement. Occasional area conferences are not enough. In techniques (though presumably not subject matter,) the civil rights organizations might take their cues from some of the radical political sects. Infused with the spirit of the movement, continuous classes in politics, economics, Negro history, etc., might take on a meaning they never had in the formal classroom. They should be combined with practical training in leadership and organization skills (writing, speechmaking, stencil-cutting, mimeographing, etc.)

Again, the civil rights organizations will not ultimately be able to enlist and maintain the participation of the Negro masses on the basis of a middle-class integrationist ideology. Nor can they do so on the basis of abstract economic analysis. But such analysis can lead to -- must lead to -- the formulation of dramatic economic demands that express real needs, arouse popular support, and stimulate greater awareness of basic issues.

The civil rights movement, as a first step, should make its economic demands explicit. The March on Washington, I believe, points the way with its key demand for a massive federal works program to put all Americans back to work.

A number of proposals have been advanced to solve the problem of unemployment. While space does not permit extensive analysis of these proposals, the major criticisms of each may be briefly outlined as an argument for the massive federal works program.

1) The Administration's proposed $11 billion tax-cut is the centerpiece of the Administration's program to reduce unemployment to ...4%! One fourth of the dollars involved go to the corporations to stimulate investment, the remainder go to individuals to stimulate consumption. But corporate profits are already at an all-time high; why assume that tax savings would be invested when available capital is not. Besides, the Council of Economic Advisors estimates that 70% of current business investment in plant and equipment is for modernization and replacement (read: automation) rather than expansion.

Professor Killingsworth makes a more profound criticism of the tax-cut in terms of the structural or class character of unemployment:

> Despite a steady (but slow) improvement in the average educational level of the work force, the change in the pattern of demand for labor has created a large surplus of poorly-educated workers and serious shortages of certain kinds of highly-educated workers. Because of the new employment patterns in the economy, a general increase in spending for goods and services by consumers and an increase in investment by business firms -- which are the hoped-for effects of the proposed $11 billion tax-cut -- would soon result in acute shortages of many kinds of highly educated workers without greatly reducing the present surplus of poorly-educated workers. The bottleneck in the supply of workers at the top of the educational ladder would seriously impede the continued economic expansion that is essential to reduce to tolerable levels the shocking rates of unemployment that we find today at the middle and bottom of the educational ladder.

Like Myrdal, Killingsworth emphasizes the need to improve the quality of the labor supply, and wryly observes that "while the Administration urgently presses for the $11-billion tax cut, we are actually spending around $100 million this year for manpower retraining."

2) Manpower retraining and education on a massive scale is indispensable to achieving and maintaining full employment in a technologically revolutionary society. But the immediate employment benefits of retraining are limited. Many blude-collar workers are beyond retraining, eg., miners, laborers and other unskilled workers over 40. Nor are educationally disadvantaged youth likely candidates for training in skilled jobs. And for what jobs do we retrain service personnel, who will soon feel the impact of cybernation? Before retraining could reach maximum effectiveness, the primary and secondary school systems will have to be radically improved. Even then, large numbers of marginal workers will not be able to make the necessary adjustments.

3) A shorter workweek has been advocated by the labor movement, on the grounds that rising productivity means that fewer manhours are required to create ever greater abundance of goods and services. Andrew J. Biemiller, director of the AFL-CIO Department of Legislation, has estimated by purely arithmetical calculation that another million jobs would result from each hour cut from the standard workweek; hence, a cut to 35-hours would produce five million new jobs.

The problem is that "purely arithmetical calculations" are wide of the mark since manhours are not exactly interchangeable units. There are skilled manhours and unskilled manhours. How does the shortening of the workweek of an automobile worker create a job for a displaced miner? It could, in fact, create a job for a machine. In his study on cybernation for the Center for the Study of Democratic Institutions, Donald N. Michael writes that the shorter workweek approach

> is intended to maintain the ability of workers to consume the products of cybernation and, in the case of blue-collar workers, to maintain the strength of unions. This would retain the consumer purchasing power capacity for x workers in those situations where the nature of the cybernation process is such that x men would do essentially the same work as x plus y men used to do. But when the task itself is eliminated or new tasks are developed that need different talents, shorter shifts clearly will not solve the problem. The latter conditions are then more likely ones as cybernation becomes more sophisticated.

The shorter workweek will doubtess be a concomitant or result of full employment, not the cause. Walter Reuther and other labor leaders most prominently associated with the shorter workweek demand before it loomed so large in official AFL-CIO policy have indicated that they do not consider

it a full-employment panacea, but see it as part of a program including a tax cut, public spending, and a liberal monetary policy. Nonetheless, so long as the shorter workweek remains the labor movement's key demand, the AFL-CIO will be suspect of protective unionism and indifference to the plight of masses of unemployed workers.

By contrast, the demand for a massive federal works program can be a natural rallying point for virtually all the unemployed. Such a program would do what others cannot--abolish class unemployment by providing job opportunities even for unskilled and semi-skilled workers.

Says Mr. Michael,

> If our understanding of the direction of cybernation is correct, the government will probably be faced for the indefinite future with the need to support part of the population through public works. There is no dearth of public work to be done, and it is not impossible that so much would continue to be needed that an appropriately organized public works program could stimulate the economy to the point that a substantial portion of the work force could be re-absorbed into the private sector. That is, although the proportion of workers needed for any particular taks will be reduced through the use of cybernation the total number of tasks that need to be done could equal or exceed the absolute number of people available to do them.

The civil rights movement should have a special interest in massive federal works program because it can provide jobs and additional purchasing power for the unskilled and semi-skilled categories in which Negroes are so heavily concentrated. No less important, Negroes will especially benefit from the fruits of public works: slum clearance, school and hospital construction, decongestant highway and road construction, new parks and playgrounds, carefully-planned public housing, etc. We can at least begin the rational reorganization and decentralization of our cities.

Some economists object that a public works program would have an air of "make-work" or "handout" that would demoralize workers. This need not be true. It depends upon the value society assigns to the work being performed. Certainly a public works program carried out by the guardians of the status quo -- who regard poverty as a moral flaw and those on relief as chiselers -- would have the predicted results. But under new political leadership genuinely committed to "getting America moving again," such a program could be cast in radically different terms: not as a "make-work," not even merely as an assault on unemployment, but as a historic crusade for the physical and social reconstruction, literally the rebuilding, of the nation. If unemployment did not exist, a national face-lifting would still be needed if our social services, our very patterns of life, are to catch up with Twentieth Century technology. In a rational and humane society, conscious of its own developing needs, participants in a reconstruction program would be accorded the respect reserved in the past for the financially successful.

To achieve its economic and social goals, a public works program would require democratic central planning. Which public projects, in which locations, will maximize employment? What kinds of financial control should be devised to assure independence from private banks and insurance companies? Prospective public housing tenants must have a way in determining where their new homes will be and what they will look like. Only intelligent planning can create neighborhoods that are racially, culturally, educationally and economically integrated.

Fair and full employment through a massive federal works program -- this is a civil rights demand. Vigorous agitation and direct action around it should become central for the movement.

THE NEW YORK TIMES, THURSDAY, MARCH 5, 1964.

# Maryland to Avoid Use of Dogs To Quell Negro Demonstrators

Special to The New York Times

ANNAPOLIS, Md., March 4—Simultaneous negotiations and demonstrations by militant college students here tonight won from Maryland authorities a pledge that state troopers would not use police dogs against civil rights marchers "unless there is a riot."

This was described as an "important victory" Negro spokesmen said it would be "more important for the state of Maryland than for us."

Student leaders of the Negro protest movement in Princess Anne, a rural college town down the Eastern Shore of the Chesapeake, were also given a promise by Gov. J. Millard Tawes that the administration would "exert all the powers of its office" to get through the Legislature next week a statewide public accommodations law.

In return, Negro demonstrations on the troubled Eastern Shore will be deferred, the students said, "to give the legislators a chance to work."

### Confer in Statehouse

The Governor and a group of his top aides, including Col. Carey Jarman, State Police Commandant, conferred with the Princess Anne students for two hours inside the historic Statehouse here while 75 youthful demonstrators from the Congress of Racial Equality staged a singing, handclapping sit-in on the second floor of the Capitol.

The CORE demonstrators numbered about one-third of a larger group that had gathered during the afternoon on the outside of the Statehouse. Officials of the National Association for the Advancement of Colored People had pleaded with the CORE group to go home as the meeting broke up.

But a young white student, Philip Perkins of College Park, Md., called together some followers and successfully detoured them up the broad marble steps of the Statehouse to a position outside the Governor's office.

### Asks for Decorum

At one point Clarence Mitchell 3d, a young Negro legislator from Baltimore, appealed to the students sprawled on the floor outside the only exit from the Governor's office to "maintain the decorum of the nonviolent movement and refrain from singing until the Legislature is out of session."

The Legislature, in its final hours here, was struggling to pass a controversial bill combining an income tax increase with a $16.3 million teacher salary increase. The students maintained silence until Mr. Mitchell returned to announce a dinner recess. Then they resumed their singing.

Princess Anne, a 300-year-old settlement of 1,300 persons, last week became the first place in the country in 1964 to use police dogs and fire hoses against Negroes demonstrating for equal rights. Students at Maryland State College, the town's only activity other than a scattering of stores, blocked the main street and were dispersed by state policemen using K-9 dogs. Sixty-two students were injured in the conflict with the police last Wednesday.

M E M O R A N D U M

TO: NEW YORK AREA CONTACTS

FROM: NORMAN HILL, ASSISTANT TO THE PROGRAM DIRECTOR

Before the Senate of N. Y. State is a bill sponsored by Senator Ivan Warner to amend the state civil rights law so that those arrested, detained or convicted for engaging in "peaceful demonstrations" to resist discriminatory treatment because of race, creed or color shall not be denied public employment, licenses, or other rights extended by the state.

This bill has immediate bearing on all CORE participants in direct action. The benefits are crucial and needed. We ask you to write NOW urging your Senator and Representative yo support this bill.

## FEDERAL ACTION FOR CIVIL RIGHTS

*The Commission's 1961 report documents and analyzes discrimination in five volumes titled* Voting, Education, Employment, Housing, *and* Justice, *and recommends a broad federal legislative and administrative program.*

**U.S. Commission on Civil Rights**

"No single, limited approach will bring an end to discrimination. . . . Assuring the right to vote, fundamental as that is, will not quickly assure equal protection of the laws in other aspects of the Negroes' life. Similarly the opening of new career opportunities to a particular minority will be of little use if its members have had no opportunity or reason to prepare themselves for such careers—or if they are barred from living near the 'new' places of work." Housing segregation helps produce segregated schools, which are generally inferior. Inferior schools perpetuate unequal employment. To complete the circle, restricted career choice undercuts the motives for pursuing education to the full extent of one's capabilities.

"Urban renewal is not in itself a civil rights problem, yet discrimination —in housing, in education, in employment—contributes in major degree to the creation and preservation of the slums. If they are to be abolished, discrimination will also have to go. Metropolitan . . . programs not primarily concerned with civil rights objectives may fail if they do not deal with questions of discrimination as well.

"The close relationship of civil rights to other areas of public concern may also mean that measures not directly aimed at discrimination may be helpful in eliminating it." The Commission's study of voting in Southern "black belt" counties, for example, strongly suggests that programs to stimulate, diversify, and industrialize depressed, one-crop agricultural areas "may ultimately do more than lawsuits to improve the economic, political, and legal status of black belt Negroes" by reducing their economic dependence and vulnerability to reprisals.

The Federal Government's responsibility for achieving equality of opportunity for all is far from exclusive. But it is a heavy, and as yet undischarged, responsibility and it is the statutory concern of the Commission. Underlying the Commission's recommendations are "the belief that the Presidency, and indeed the whole federal establishment, is preeminently a place for moral leadership . . . [and] the principle recently stressed by President Kennedy that 'Federal money should not be spent in any way which encourages discrimination, but rather . . . [to encourage] the national goal of equal opportunity.' "

### *The Power of the Law*

**Voting**

A wide variety of voting eligibility requirements can be, and are, used to deny the right to vote on grounds of race and color. Acting under the Fifteenth and Fourteenth Amendments to the Constitution, Congress should limit the grounds for disqualification, in all state and federal elections, to age, length of residence, confinement, or conviction of a felony; proof of six grades of formal schooling should satisfy all "literacy" and

similar tests. Congress should consider providing federal enforcement of population equality in both Congressional and state electoral districts.

**Education**

Compliance with the Supreme Court's school desegregation decisions is notoriously slow and too often merely token. Congress should require "every local school board which maintains any public school from which pupils are excluded on the basis of race, to file a plan for desegregation with a designated federal agency within six months after the adoption of such legislation," whether or not a court suit has been brought. The plan should provide for first steps toward compliance "at the beginning of the following school year, and complete desegregation as soon as practicable thereafter." Congress should direct the Attorney General to take appropriate enforcement action, and to give appropriate protection to school board members, school staff, school children and their parents, and citizens helping them, "from bodily harm, harassment, intimidation, and/or reprisal by officials or private persons."

**Housing**

Private lending institutions which benefit from federal programs and are supervised by federal agencies hold more than 60 per cent of the country's nonfarm home mortgage debt. On racial and religious grounds they deny large numbers of Americans equal housing opportunity and help make housing "'the one commodity in the American market . . . not freely available on equal terms to every one who can afford to pay.' . . . The Federal Government, either by executive or by Congressional action, [should] require all financial institutions engaged in a mortgage loan business that are supervised by a federal agency to conduct such business on a nondiscriminatory basis."

**Employment**

Similarly, internal nondiscrimination and nonsegregation should be required of all unions using National Labor Relations Board services.

**Justice**

While lynching may have become extinct, discriminatory law enforcement, police brutality, and official condonation of and connivance in private of violence are widespread. Existing civil rights legislation has suffered from crippling weaknesses, such as the requirement of "specific intent" to violate a victim's constitutional rights as distinguished from the general criminal intent to hurt him. Congress should consider extending the penalties of section 242 of the U.S. Criminal Code to all those "who maliciously perform, under color of law, certain described acts including the following:

"1) subjecting any person to physical injury for an unlawful purpose;

"2) subjecting any person to unnecessary force during the course of an arrest or while the person is being held in custody;

"3) subjecting any person to violence or unlawful restraint in the course of eliciting a confession to a crime or any other information;

"4) subjecting any person to violence or unlawful restraint for the purpose of obtaining anything of value;

"5) refusing to provide protection to any person from unlawful violence at the hands of private persons, knowing that such violence was planned or was then taking place;

"6) aiding or assisting private persons in any way to carry out acts of unlawful violence."

The Department of Justice should revise some of its policies and procedures that hamper federal criminal prosecutions for unlawful violence. It has taken advantage only once—and then successfully—of its statutory authority to institute prosecution by a sworn information to avoid the delay and the hazard of seeking indictment by a hostile grand jury. It has excessively relied on signed complaints, despite the fact that many victims are unaware of their rights, are fearful of retaliation, or assume that fed-

eral officers are closely linked with local policemen. It has suspended both investigation and prosecution as soon as state authorities have taken steps to prosecute local officers, making federal re-entry impractical if the state action proves ineffective. It has entrusted prosecution to U. S. Attorneys who are unfamiliar with the complex civil rights case law and, indeed, to a few who are openly hostile to Civil Rights Act prosecutions.

Civil suits brought by victims of police brutality are often fruitless because the policemen cannot pay the damages and the governmental entities that employ them will not. Congress should consider making all bodies that employ police liable for their misconduct.

To promote equal justice, Congress might empower the Attorney General to bring civil proceedings to prevent the exclusion of persons from jury service on account of race, color, or national origin.

### *The Use of Public Money*

**Withholding of funds**

Federal support of discriminatory institutions is unconscionable. Complete nondiscrimination and nonsegregation should be a condition for all federal aid to state employment agencies, institutions of higher education, public libraries (where the requirement was enacted in 1956 but has not been fully enforced), training and recruitment programs, and urban renewal plans. Mortgage insurance and loan guarantees should be restricted to nondiscriminatory builders and lending institutions. Up to 50 per cent of school grants-in-aid should be withheld on a basis proportional to the number of bi-racial but still segregated school districts within a state.

Nondiscrimination should be vigorously enforced in all federal employment, all employment supported by government aid funds (as well as contracts), and all labor unions dealing with government contractors.

**New programs**

The Commission recommends a number of new federal programs: For desegregating schools, direct technical assistance and training of personnel; matching grants for employment of social workers and specialists in desegregation problems; and loans for districts from which state or local funds are withdrawn as a result of desegregation.

To expand nondiscriminatory employment opportunities, expanded and new programs of assistance to vocational education, apprenticeship training, and retraining of jobless workers; helping the jobless move to find jobs; and federally subsidized employment, training, and special placement services for youths.

To extend equal opportunity in housing, improving relocation requirements for urban renewal and extending them to the federal highway program, which now has no relocation program.

To improve the quality of state and local police, working out a program of grants-in-aid to raise selection tests and standards, give better training in crime detection, constitutional rights and human relations, and support continuing education for policemen.

**Need for statistics**

The Commission is aware that many agencies have abandoned keeping racial records for legitimate fear that they can facilitate or invite discrimination. It has found, however, that statistical data are often necessary for policy planning and evaluating local, state, and federal programs in terms of equality of opportunity, and believes that means can be found to prevent discriminatory use. It recommends that information be systematically kept on voting registration and eligibility, school enrollment, employment and employment opportunities, availability of home mortgage credit, and related problems of discrimination. # The Not-Buying Power Of Philadelphia's Negroes

HANNAH LEES

PHILADELPHIA

WHEN FOUR HUNDRED ministers in one city advise their congregations not to buy something, a lot of whatever that something may be goes unbought and the company that makes it is quickly aware of the fact. For a month and a half, starting March 19, the congregations of four hundred Negro churches in Philadelphia have not bought Sunoco gas or oil for their cars and trucks or Sun fuel oil to heat their homes. Last January for exactly one week they were not buying Gulf gas or oil. Last October for two weeks they were not drinking Pepsi-Cola. And last summer for two months they were not eating any cakes or pies made by the Tasty Baking Company.

These periods of mass inaction have been the result of a joint decision reached last May by the pastors of those four hundred churches. They call it their Selective Patronage Program and their purpose is simple and forthright: to persuade—they reject words like "force" or "demand"—one company after another in Philadelphia to employ more Negroes in prestige jobs.

Their method is equally simple and forthright. A delegation of ministers, sometimes five, usually four, calls on whatever company the group has decided to investigate and politely inquires how many Negroes it employs and in what jobs. The companies have given this information willingly so far, and they might as well; the ministers usually already know, unofficially. The first meeting is always exploratory, but a second meeting is then requested a week or two later. At this meeting the ministers, though still quiet, still polite, are specific about what they want. At first it wasn't very much. Lately, as with the present Sun boycott, it has become a good deal. Whether they are now asking too much only time will tell.

With the Tasty Baking Company, the second firm they visited and the first one where they encountered opposition, the ministers asked the company to hire two Negro driver-salesmen, two Negro clerical workers, and three or four Negro girls in the icing department, where the workers had traditionally been all-white. They were not interested in the fact that the Tasty Baking Company already had hundreds of Negro employees. What they are interested in is placing Negro workers in positions of dignity and responsibility. Their aim is to change the public image of Negro workers. The Tasty Baking Company did not have any Negroes driving trucks or working in its office.

### 'Until Further Notice'

When Mr. Pass, the personnel manager of the company, and Mr. Kaiser, the president, pointed out that they had no need, just then, for more driver-salesmen or clerical workers, the ministers said politely but firmly that they still hoped these people could be hired within two weeks. If not, the four hundred ministers they represented would have to advise their congregations on the Sunday following not to buy any Tasty cakes or pies until they were hired.

Mr. Kaiser understandably felt pushed and resistant. The Negro driver-salesmen and clerks and icers were not hired within the two weeks, and the ministers did tell their congregations not to buy any Tasty cakes or pies until further notice. Printed advertisements to this effect mysteriously appeared in bars, beauty parlors, and barbershops. Nobody knows how many thousand dollars' worth of sales the Tasty Baking Company lost during those summer months, but there are 700,000 Negroes in Philadelphia and a large proportion have some connection with those four hundred churches. When the boycott was officially called off two months later from four hundred pulpits, the Tasty Baking Company had in its employ two Negro driver-salesmen, two Negro clerical workers, and some half-dozen Negro icers.

The Pepsi-Cola Company, which was called on last September, was also resistant to the ministers' requests. On October 2, a boycott was called from four hundred pulpits. Two days later the spokesman of the delegation received a telegram saying that Pepsi-Cola had hired the requested personnel. But the boycott lasted two weeks, because it is a policy of the ministers not to call a boycott off until the new employees are actually at work.

Gulf Oil, which was approached last winter at the height of the heating season, showed no interest in meeting with the ministers. When three weeks had gone by without an appointment being arranged, a boycott of Gulf products was called the next Sunday. The day after that the switchboards at Gulf were jammed with calls canceling oil contracts. Gulf then moved so quickly to meet the ministers' demands that the boycott lasted only a week. But here a new factor entered: the union. One of the ministers' stipulations, that the new Negro employees must not be the first to be laid off, conflicts with seniority provisions in Gulf's union contract. Union officials met with the ministers and explained that they were sympathetic with their

aims, but not when they collided with union bargaining. Three Negro truck drivers had been hired and after thirty days joined the union. All has been serene, but seasonal layoffs have begun by now. If drivers with seniority are laid off first, the union is not likely to take it lying down. The ministers may decide to finesse that one.

Bond Bread, Freihofer Bread, Coca-Cola, and Seven-Up all seem to have found the ministers' requests reasonable when they were called on. So, apparently, have Esso, Cities Service, Atlantic, and Mobil. None of these companies has had to cope with a boycott. Atlantic, which already had some Negroes in clerical and executive jobs before the ministers came to call, says it now has twenty-five Negroes in white-collar jobs, including a chemist, a psychologist, and a former football hero in sales promotion. They say that they are well pleased with the quality of work these employees do and with the general office morale. The ministers mention Atlantic frequently as an example of how smoothly their project goes when everyone co-operates.

THE ORIGIN and operation of the Selective Patronage Program are somewhat shrouded in mystery. It acknowledges no leaders, and no one will say who called the first meeting. "Some of us just got together," they say, "and decided we could not in good moral conscience remain silent while our congregations patronized companies that were discriminating against Negroes." The names of the ministers who have called on the various companies are on public record, but there is a different delegation for each company and a different spokesman. The Reverend Alfred G. Dunston, pastor of the Wesley A.M.E. Zion Church, has been the spokesman with Sun Oil. The Reverend Leon Sullivan of the Zion Baptist Church was the spokesman with the Tasty Baking Company. The Reverend Joshua E. Licorish, of Zion Methodist Church, was the spokesman with Gulf and with the union.

The Philadelphia Commission on Human Relations, which investigated the Tasty boycott at the request of the Chamber of Commerce—and found no illegal discrimination but no evidence of positive integration either—mentions Dr. Noah Moore, a bishop in the Methodist Church, the Reverend Lorenzo Shepard, pastor

of the Mount Olivet Baptist Tabernacle, and the Reverend Leon Sullivan as prominent in the campaign. But no one will say who makes up the priority committee, which meets —always at a different place—to decide on the next target and what they will ask for. They have, they say, no officers, no by-laws, no minutes, no dues, and no treasury.

"But it is the best-organized unorganized program you ever saw in action," one of them said to me. "We can call a boycott of a quarter of a million people within twenty-four hours and call it off within twenty-four hours." A quarter of a million is probably not too high. Lined up solidly behind the ministers are fraternal organizations, social clubs, insurance agents, bartenders, beauticians, the N.A.A.C.P., and the Negro newspapers. Even local dealers whose sales have been hurt by the various boycotts seem to go along with the program.

### Unorganized 'Advice'

Highhanded and arbitrary as the Selective Patronage Program may seem, it is hard to find anything illegal or even really unethical in it. The ministers are simply exercising their democratic right to "advise" their friends what to buy and what not to buy. They are, of course, using their buying power to pressure these companies to hire employees they may not need at the moment, but their position is that if they waited for any of these companies to *need* that many Negro employees they would wait a long time. "We have waited too long already," one of them said.

A consistent complaint of both liberals and conservatives has been that Negroes did not do enough for themselves, did not exercise enough leadership in solving their own problems. These Negro ministers are exercising leadership and, so far, with impunity. The Tasty Baking Company consulted both the Chamber of Commerce and their own lawyers to see if any counteraction were possible. The conclusion seemed to be that it would be pretty hard to take a group of unorganized ministers to court, and even if they could it would not help Tasty's position much.

The ministers point out that some three thousand Negro boys and girls graduate from Philadelphia high schools every year and usually end by taking the jobs that nobody else wants because they are the last to be chosen. Many of them, the ministers admit, are not as highly qualified as they should be, but even the qualified ones have to fight the preconceived idea that they are not qualified. This, essentially, is the battle the ministers are trying to fight for them.

There are some new elements to the Sun Oil boycott now in progress. The ministers are feeling their strength and pushing harder than ever before. They may be pushing too hard, but perhaps they have to, to find out how far and how fast they can move. They phoned Sun at the end of January and requested a meeting. Sun arranged a meeting for February 3 in a very relaxed mood. A year ago Sun had asked the Reverend Leon Sullivan and Dr. Jerome Holland, president of Hampton Institute, to advise it in setting up a program of increased Negro employment in white-collar jobs. At that time it had hired two Negro clerks. It had records of hundreds of Negro employees at its Marcus Hook refinery, some in responsible supervisory jobs. It had just decided to include three Negro colleges in its yearly talent search. Sun felt it was in the clear.

The ministers didn't agree. They weren't interested in the number of Negroes working in the refinery. Negroes had always held jobs like that. "You hired two Negro clerks a year ago, but none since," they said. "Two in an office force of fifteen

hundred isn't much, is it? And you have no Negroes driving trucks. And even though you plan to include Negroes in your talent search, you haven't actually hired any."

Sun said business had fallen off. They had had to move more slowly than they planned, but were now going ahead as fast as they could.

At the second meeting, two weeks later, the ministers quietly dropped what must have seemed to Sun a bombshell. They wanted Sun to hire twenty-four Negro employees: nineteen additional office workers, three permanent truck drivers, and a motor-products salesman. When? Within the next month.

Sun said that wasn't possible, not within a month. There would not be anywhere near nineteen new job openings in the office in that time. And how could it hire three new truck drivers when they were just about to lay off thirty-five as the heating season ended?

IT MAY BE a coincidence that what the ministers have asked for at Sun is just about equivalent to the number of white-collar Negroes now employed by Atlantic. Philadelphia is the home office of both Sun and Atlantic. Each of them has about fifteen hundred people working in its home office. The ministers say that twenty-five Negroes in an office force of that size is not much to ask; that they can be found and will have to be if Sun wants any Negro customers around Philadelphia. The Urban League could supply them, say the ministers; they themselves could supply them if asked.

Sun has not, so far, asked the ministers to recruit for them, but it has been in touch with the Urban League. By March 16, the last meeting before the boycott deadline of Sunday, March 19, Sun had interviewed nineteen Negro applicants for clerical work, and had hired one of them. The others, they said, did not have the necessary qualifications. Sun had also hired one Negro salesman and upgraded one man from mechanic to truck driver. The ministers had accepted Sun's stand that it could not take on new truck drivers while about to lay off old ones and said they would settle for upgrading to truck driver three of their men who were already employed by Sun.

The boycott was called on March 19 and is still in progress. As of late April, Sun had hired about half the workers requested by the ministers. There were seven more Negro girls in the home office, there were two Negro salesmen, and three drivers had been upgraded from work in the garage and the refinery. Sun says that from now on it will hire people as needed, interviewing both white and Negro applicants without discrimination. When asked about the loss in business, spokesmen for the firm shrug and say it is hard to estimate. They seem unruffled and without resentment, but say flatly that they cannot do more. And there is no reason why they should if they can get along without Negro customers. The ministers estimate, however, that Sun is losing some $7,000 a week. And the number of Negro customers Sun may have to get along without seems to be increasing.

Those four hundred unorganized ministers now plan to spread their boycott progressively, first across the state and then, they say, across the country if necessary. On Sunday, April 9, they began the first part of what they call the second phase of their program. All the Negro Masonic lodges across the state announced a boycott of Sun products. Their members number 25,000 and they claim to be able to

influence several times that many. Perhaps they can. If Sun has still not hired the requested twenty-four Negro workers in another couple of weeks, the ministers say the boycott will spread to all the churches across Pennsylvania, and after that to all the men's and women's clubs. And after that they will go beyond Pennsylvania.

Wouldn't it have been more logical, I asked, to start with all the churches in Pennsylvania?

"A boycott of the Masons is easier to control," I was told, "and easier to call off in a hurry if Sun fills its quota. We could easily call on a boycott of all the churches, but it might take a while to call it off. We don't want to hurt Sun. We aren't mad at anybody. We just want to see our boys and girls in decent jobs."

**Danger Ahead**

Do the ministers have this much power? They probably don't know themselves yet. They must feel there is a certain poetic justice in big business feeling pushed by its traditionally most subservient employees. They may feel there is a special poetic justice that Sun Oil, owned by the Pews who for years controlled the Negro vote in Philadelphia by dropping money where it would do the most good, should now be having to negotiate with the new Negroes. But this proposed state-wide and possibly nation-wide boycott which originated with four hundred unorganized ministers is loaded with dangerous possibilities. George Schermer, executive director of the Philadelphia Commission on Human Relations, has been glad to see these Negro ministers exercising leadership. As long as they can function in this amorphous state, he is all for them, he says, but if they can make good on this spreading boycott, it may be hard not to develop an overt organization with leaders and factions and ultimate corruption. At the very least, any real organization could sooner or later run into some sort of conspiracy suit. These are the dangers ahead of the crusading ministers.

"Power corrupts, you know the old saying," I reminded one of the ministers. "Aren't you afraid that all this mushrooming power may land you in trouble?" He smiled gently. "No, honey," he said, "because we haven't any heroes to feed on that power, we haven't any leaders or bosses. And we aren't going to have any. As long as we can make out without them, we'll do fine." As long as they can, he is probably right.

# Progressive Choice Reading Method

## Summary Overview

The theory and principles underlying The Progressive Choice (PC) Method are concerned with insuring that the learner is given information in doses which are (1) small enough for him to swallow, (2) given at a sufficiently slow pace for him to digest, and (3) agreeable enough to be palatable and to produce real feelings of satisfaction and accomplishment. The method also is designed to provide trainees with evidence of increasing ability to reach clearly defined goals. Finally, and above all, the PC Method is designed to develop increasing independence and responsibility, based on demonstrated mastery of the materials being learned. In addition to developing reading skills, the Progressive Choice approach has been used for developing pilot skills (Woolman, 1955), missile skills (Woolman, 1960), and conceptual skills (Woolman, 1962; Holt and Valentine, 1962). The following description of the Progressive Choice Method briefly indicates the general schema.

## The Progressive Choice Programming Method

### Sequential Organization

The body of information to be learned is broken down into discrete elements which are then organized into a sequence based on the following criteria:

(1) The learner is responsible to learn only one new learning unit at any given time.

(2) Each successive unit to be learned is as dissimilar as possible from the one preceding it.

(3) The learner must demonstrate that he can integrate the unit he is learning with all previously learned units.

### Functional Requirements

(1) Each unit to be learned should add to the learner's skill in meeting both the overall and specific objectives of the program.

(2) At any given time, what is learned should be perceived by the learner as being functionally useful.

(3) Each successive unit is of a positive nature. The trainee learns only material he can use; negative information, such as why alternative procedures are wrong, is avoided.

Informational Requirements

(1) The learner must always know his precise status in the program and be informed as to the relevancy and correctness of his responses immediately.

(2) The information and content of the initial body of material is designed to appeal to the needs, interests and values of the typical entry trainee. However, after the trainee experiences success in the program, the content of the material is gradually shifted to provide him with the techniques, language and skills necessary to effective function on completion of the program.

Motivational Inputs

(1) The program is designed initially to be consistent with the fundamental needs, interests and values of the learning population.

(2) The program specifies the goals and sub–goals to be met and continuously informs the learner as to his degree of success in meeting the goals.

(3) Progress is based on demonstrated mastery. As the learner moves through the program, he becomes increasingly independent.

(4) Progress in the program results in increased responsibility and authority. As he moves through the program, each trainee increasingly participates in the instruction of others who have not yet reached his level of achievement.

The Expanding Field of Choice

The Progressive Choice Method is designed so that at the outset, there is very little possibility of making incorrect choices. The learner achieves success at any given point in the program by making a choice which is appropriate for the particular context. As the learner demonstrates his ability to make consistently successful choices, he is given new information to learn. Thus, at the beginning of the program, there is very limited field of choice (to reduce the probability of error), but at the end of the program, there is almost limitless choice. As learning proceeds, the number of possible choices increases on the basis of demonstrated proficiency. The learner theoretically continues to respond with a very high probability of success, even when the program increases in complexity so that the number of possible errors has increased astronomically. Thus, The Progressive Choice Method reduces to a system of continually assuring that a learner master the possible choices at a given level before imposing the requirement that he learn another unit of information. Ultimately, he must demonstrate that he can successfully make appropriate and meaningful choices at the greatest level of complexity contained in the program. At this point, he has satisfied the original program objectives.

The general schema was first conceived in 1950 and used as a model for developing reading skills for individual children. A formal analysis of the general position was made in the writer's doctoral thesis (Woolman, 1955) and in a later paper (Rotberg and Woolman, 1963). Bloomer, in a series of experiments with normal first grade children, demonstrated that the PC Reading Method produced significantly higher reading scores at the end of the first grade (Bloomer, 1961).

Davy, using several alternative reading methods, as well as PC, demonstrated that the PC Reading Method was the most effective for teaching mentally retarded children to read (Woolman and Davy, 1963; Davy, 1962). The present analysis is concerned with investigating the success of the Accelerated Progressive Choice (APC) Reading Program in developing reading skills in adolescents and young adults from culturally deprived neighborhoods.

## The Accelerated Progressive Choice Reading Program

The APC Reading Program is a system of literacy training in which the learner first learns to comprehend terms orally and then, in a series of steps, learns to get the same meanings when the terms are presented visually. The APC Reading Program: (1) is designed to permit students to progress at their own rate of speed, (2) uses materials which are directed to the interests and values of the population, and (3) provides a detailed step-by-step procedure, which provides a tight synchrony between the workbooks used by students and the Instructor's Manual. The Instructor's Manual provides within itself, the techniques to be used by the instructor, as well as a program to provide a fundamental grasp of the pedagogical principles underlying the reading program. Thus, the instructor learns the procedures and concepts as he sees its effects on his trainees.

There is no requirement for classrooms or school facilities. The program can be used in community-action settings, churches, union halls, recreation halls, or available school facilities. Although it may be used by teachers in school settings, instruction can also be given by a literate adult, who has no teaching background.

## Objectives of the APC Reading Program

The APC Reading Program was designed to develop reading skills at a functional level in persons with a history of failure and avoidance of school-like situations. There were three major objectives:

(1) To produce a reading program which would insure a sixth-grade reading level to any trainee completing it successfully.
(2) To produce a reading program which would motivate dropouts and pre-dropouts to maintain sustained involvement in the literacy-skill program.
(3) To develop a literacy program which could be completed rapidly and which would produce substantial gain in reading skills within 150 training hours, or less.

Summary of Results

In the three pilot studies completed to date the results were:

(1) Washington Action for Youth (8 subjects):

Mean gain in scores on Stanford Achievement Test was 1.28 years after 40.3 hours of training time. Student reactions were positive; less than 25% of trainees dropped out of their own volition. Ratings of students by counselors indicate significant gains in verbal skills, task involvement, and social skills.

(2) Washington, D.C. Schools:

A summer–school class of 15 underachieving junior high school students were used as subjects. Mean gain was 1.50 years on the Stanford Achievement Test after 45 hours of instruction. There were no dropouts during the summer session, despite the necessity to use public transportation. Student reaction was extremely positive.

(3) Bank Street College Study:

The Bank Street College Study, used 102 trainees from Job Opportunities in Neighborhoods (JOIN), and The Police Athletic League of New York City as subjects, of which 22 received both pre–and post–tests. Gain was about 5 months on standard reading tests in a mean time of 22 hours. Observed student reactions to the program and their taped interviews were strongly positive.

Summary of Conclusions

On the basis of available data:

(1) The APC Reading Program is an effective tool for increasing literacy skills rapidly, though it is not known whether it is capable of producing a minimal sixth–grade reading level in less than 150 hours.

(2) The APC Reading Program does appear to motivate and involve the trainee population for which it was designed.

## Summary of Recommendations

(1) Further experimental studies are warranted to determine the value of the APC Reading Program both in school and community–action settings.

(2) Procedures within community–action programs should be carefully structured to obtain greater efficiency in the development of literacy skills.

(3) An extension to the APC Reading Program (The Vocabulary Expansion Program) is required to improve literacy, comprehension, and employment readiness.

# EVALUATIONS OF THE PROGRESSIVE CHOICE READING METHOD

MYRON WOOLMAN, Ph.D.
The Institute of Educational Research, Inc.

The dropout and adult illiterate is usually a product of a socially isolated and economically disadvantaged community with its own special customs, dialect and attitudes. Life within this community or ghetto is culturally isolated and often hostile. The dropout frequently bands with his peers, both for social exchange and defense. The special language, customs, and attitudes within the ghetto have little value when used outside its confines; in contrast to most members of the society, the ghetto-member must learn new terms, customs and attitudes before he can adapt successfully to the society at large. As voice-to-voice communication with non-ghetto members is rare, he must learn largely through the printed word or through the entertainment mass-media, but the information provided is of little value for adjustment to the outside world. The illiterate is an informational amputee, dependent on others to deliver whatever information they wish, when they wish to do so. He is blind to the obvious and seeks to hide his ignorance; he fears to move from the known and the familiar to the unknown and alien. In an age which gives power to those with knowledge, the illiterate is increasingly unable to cope with adult responsibility.

It is becoming increasingly clear that the elimination of illiteracy is a prerequisite to developing the kinds of job skills which provide stable employment in our increasingly technologically complex society.

The Bureau of Labor Standards of the U.S. Department of Labor (U.S. Dept. of Labor, 1962) recently stated:

> *The teenage drop-out, whether a delinquent or a non-delinquent, begins his adult life economically and socially handicapped. Since more than two-thirds of these youngsters, according to National Education Association figures, have average or above average ability, the high drop-out rate is not only tragically limiting to the individuals involved, but also is a costly waste of potential to American Society as a whole (p. 5).*

The projection of national population figures points to a serious aggravation of this social sore:

> *....the number of drop-outs will likely increase during the 1960s because of the greater number of high school age youth. The Department of Labor estimates that of the 26 million new workers entering the labor force in the present decade, some 7.5 million will not have completed high school. Of these, about 2.5 million youth will have completed only the eighth grade or less (p. 6).*

Statistics relating literacy level to delinquency, crime, welfare status and unemployment have attested with monotonous regularity to the fact that the illiterate is at a disadvantage and that large proportions are supported by the state in both institutional and non-institutional settings. The adult illiterate has a low income, unstable family relationships, and a higher probability for commitment. Illiterate mothers have a greater number of illegitimate children; illiterate inmates of criminal institutions have a greater probability of recidivism.

The school dropout is a frustrated adolescent at the peak of his energy level, who faces low employability and a future of little more than social parasitism. The victim of these societal inadequacies is limited largely to non-productive behavior as a consequence of low literacy levels and consequent low job skills. A report of the Sub-Committee to Investigate Juvenile Delinquency of the Senate Judiciary Committee (U.S. Senate, 1961) stated:

> *Today in many communities youth unemployment is a serious and economic problem. Unless remedial measures are found and applied, this problem may soon reach critical proportions all over the country with a direct bearing on the youth crime rate which has risen sharply each year for the last decade. Teenagers in the labor market have the highest rate of unemployment of any age group, generally about double the national average. Many experts in the delinquency field feel that this unemployment is a factor contributing to youth crime (p. 16).*

Reading skills and a carefully organized body of information offer access to the values, customs, and language used outside the ghetto-community; literacy represents the most powerful force for penetrating the ghetto and providing information required for surviving in the general society. The rapid and economical development of mass literacy skills represents the access route from community isolation and personal dependency to participation in our society as a productive and useful citizen.

# The Progressive Choice Reading Method

## Historical Perspectives

The Progressive Choice (PC) Reading Method has a substantial developmental history. The Method rests on a rather substantial theoretical and research foundation which probably merits recapitulation if the reader is to see some of the studies discussed here in their proper perspective as pilot tests of a method which has already undergone a number of experimental tests.

The Progressive Choice Reading Method was initially developed as a technique for producing reading skills by Woolman in 1950 and was the result of experimentation involving theoretical principles of discrimination and generalization as applied to the reading situation. Woolman further extended the theoretical base of the PC Reading Method in his dissertation entitled "The Effect of Varying the Number of Choices in the Identification of Very Similar Stimuli" (Woolman, 1955). The study used humans to test some of the major learning variables now contained in the PC Reading Method. The Method has been found effective for normals in six experimental studies conducted by Bloomer, who has made a summary table covering the six studies (N-561) which presents relative grade level on standard tests at the completion of first grade for Progressive Choice trained children and children trained by conventional methods (see Table 1). Briefly, six% of PC children and 29% of control children had scores below 2.0. Forty-two percent of PC trained children and 18% of the controls scored above 3.0. As is evident in both the Progressive Choice and conventional reading methods, slightly more than 50% of the scores were at second-grade level. Thus, as compared with conventional methods at the end of first grade: Bloomer's data show that significantly fewer PC children failed to score at second-grade level and that a significantly greater number of PC-trained children than controls scored at third-grade level. The mean achievement by grade level for all PC-trained children was 2.88. A description and evaluation of the PC Reading Program, from Bloomer's point of view, may be found in the article, "Reading Methodology: An Experimental Test of Some Alternative Organizational Principles" (Bloomer, 1961).

*Table 1*

*Summary of Six Bloomer Studies*

*Comparing PC and Conventional Reading Methods*

*Achievement Level End of First Grade by Percent*

| Teaching Method | Number of Classes | Number of Pupils | Percent of Pupils At Each Grade Achievement Level 1.0–1.99 | 2.0–2.99 | 3.0–3.99 | Total Percent |
|---|---|---|---|---|---|---|
| Progressive Choice | 7 | 178 | 6 | 52 | 42 | 100 |
| Combined Other Methods | 15 | 383 | 29 | 53 | 18 | 100 |

*Chi Square = .38.21 P less than .001*

A review of research on the reading skills of mentally retarded children by Ann Davy (Davy, 1961), revealed that there had been some success in teaching reading skills to "educable" mentally retarded children. There was, however, no evidence that "trainable" children had been systematically taught to read prior to her study. Davy, using an adaptation of the Progressive Choice Reading Method, showed positive results for each of thirteen trainable pupils with Stanford-Binet IQ's as low as 43 in a study which was carried on over a two-year period.

The Progressive Choice approach has applications in areas other than reading. The following excerpt from an analysis by Dr. Thomas Edwards, Senior Reading Consultant of Science Research Associates provides a concise statement on the various applications of the PC Method (Edwards, 1964).

> *....Too frequently materials are developed and published which are not firmly based on a systematic rationale which has internal consistency and is securely anchored in validated learning theory. Woolman's application of his Progressive Choice System to basic education and vocational training does not seem to be vulnerable to this criticism. Rather, it reflects a knowledge and application of currently popular systems for teaching reading, programmed instruction methods, personality factors effecting educational achievement and the relating of basic education to employability through pre-vocational education and vocational training.*

*The significant and unique characteristics of Woolman's Progressive Choice Method are as follows:*

1. *The materials to be learned are carefully programmed and presented in small, readily digestible units.*
2. *A rigorous sequence of skill or concept development is imposed which follows definite principles.*
3. *The learner is constantly required to make responses throughout the entire program.*
4. *Through continuous feedback, the learner is constantly aware of the adequacy and relevancy of his responses.*
5. *Learners progress only on the basis of demonstrated proficiency using built-in evaluation methods.*
6. *Learners are required to achieve specified goals and subgoals.*
7. *Both intrinsic and extrinsic motivational devices are used.*

*As applied to reading, the Progressive Choice Method is divided systematically into three cycles. These three cycles provide for a gradual, systematic progression from the very simple to increasing complexity; from regular and invariant phonene-grapheme relationships toward greater variance and irregularity. Each cycle is further subdivided into segments, with each segment consisting of two or three learning elements to be practiced and mastered before the learner proceeds to the next segment.*

*Another very unique and interesting aspect of Woolman's plan is the systematic programming of socially acceptable attitudes, values and behavioral patterns in the reading selections. This he accomplishes (a) through the systematic regulation of the topical content of his materials and (b) by building into his system opportunities for students to achieve status through achievement in the materials themselves and then assisting students in lower cycles.*

## *Components and Status of Woolman's Materials*

*Woolman's plans for a sequential development of basic education materials to lead toward and articulate with vocational materials is a very positive feature of his scheme. His proposed sequence in this development and accomplishments to date are as follows:*

### *1. Reading*

*The reading materials, based on the Progressive Choice Method, have been completed. As indicated above, they are designed to provide mastery of basic reading skills starting from total illiteracy and moving up to the eighth-grade level after an estimated 200 to 300 hours of instruction.*

2. *Vocabulary Expansion*

*The vocabulary expansion materials are currently under development and are designed to extend the range and depth of the reading vocabulary using various self–instructional methods to learn word meanings based on historical, social studies and literary content materials. Entry into this vocabulary program is planned to follow the basic reading skills program. It will consist of 100,000 base words and will finally total 500,000 words.*

3. *Quantitative Program: Science and Arithmetic*

*The quantitative program is also in the development stage. Its introduction is planned for the time when the learner has developed a greater facility in reading and an expanded vocabulary. This movement into the quantitative program is being designed to provide understanding of arithmetic operations while acquiring basic information about various sciences.*

4. *Basic Electricity Program*

*On completion of the basic science program, the learners may move into the basic electricity program area. This basic electricity program will be somewhat simpler than the one which Woolman designed for the Bell Telephone Laboratories employees. Learners will be required to extend and deepen arithmetic skills and move up to simple algebraic and trigonometric relationships in the course of completing the program. It is expected that this program will be within the grasp of a substantial proportion of the learners who complete the basic science program (pp. 13–14).*

## The Basal Progressive Choice Reading Program

### A Program for the Mentally Handicapped

The Basal Progressive Choice (BPC) Reading Program was designed to teach reading to the mentally retarded and/or culturally deprived child. It has been tested with encouraging results. The results of a study supported by the National Institute of Mental Health (NIMH-1010) are presented in our Progress Report, "Developing Symbolic Skills in the Mentally Handicapped", (Woolman and Davy, 1963). An overall comparison between Experimental and Control subjects is presented graphically in Figure 1. Note that Figure 1, demonstrates (1) that more Control children than BPC children showed no improvement in reading scores on the PC Marginal Diagnostic Reading Test and that more BPC-trained children showed gains in scores than did Control children. The difference between E and C children in reading score gains were highly significant. (Woolman and Davy, 1963).

### Reported Consequences of BPC on Transitional Children

The BPC Program was also tested in a sub-study involving 10 classes of Transitional first-grade children in Galena Park, Texas. Transitionals in this system are those children who are placed in Special (small classes - no more than 20 children) on the basis of emotional immaturity and/or cultural deprivation and have been judged as unable to perform adequately in Regular classes. Four of these Transitional classes (N=66) were given BPC training and six classes (N=103) continued with the reading method in general use (Controls). At the end of the first year in these classes, the children could be assigned to the Regular school program (either first or second grade). The school system assigned 41% of the Control children, and 56% of the BPC-trained children to Regular classes at the end of the first year of the program. Assignment to Regular classes was based on teacher evaluation, retesting of children and professional judgments. The vital question involving the Transitional child was not whether or not he was assigned to Regular classes, but how well he did once he got into Regular first or second grade. Accordingly, the Supervisor of Special Education was requested to ascertain performance and behavior in the Regular class situation. He was specifically requested to determine (1) whether they could perform their work at or above grade level, and (2) whether they could meet the more rigorous behavioral standards imposed by Regular teachers. The results of our inquiry are shown in Table 2.

*Figure 1*

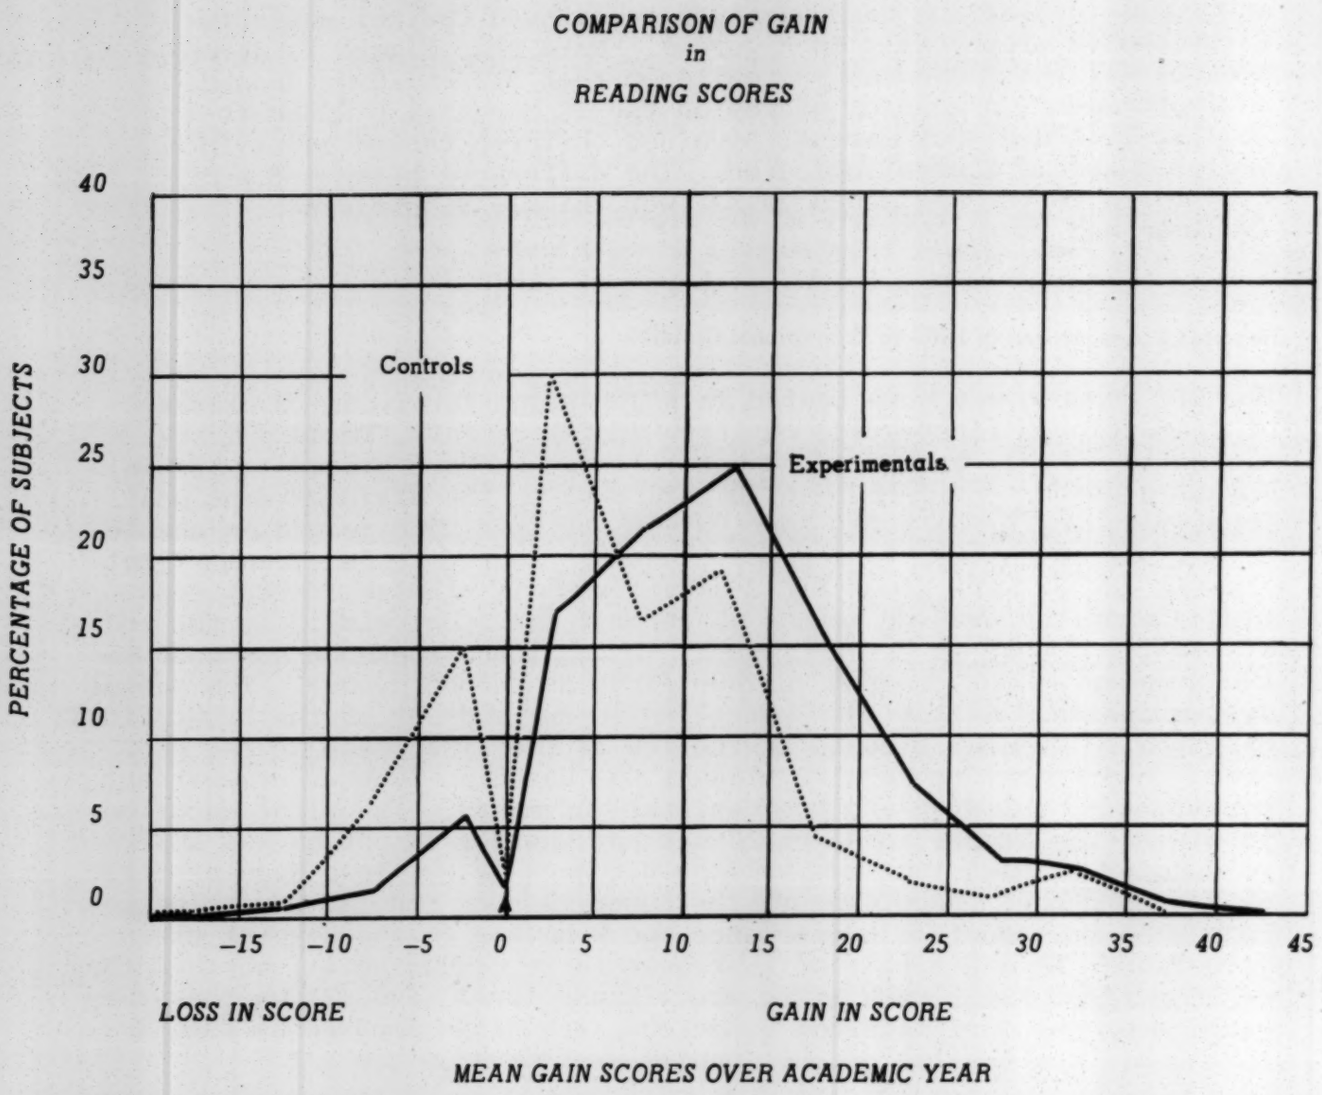

*Figure 1: Mean gain scores on PC Diagnostic Reading Test for all subjects showing percentage of subjects in each interval when all items are scored.*

*TABLE 2*

*Percentages of Transitional Children Assigned to Regular Classes Performing At or Above Grade Level*

| *Grade Level Assignment* | *Type of Training Previous Year* | *Number Assigned* | *Number Judged at/above Grade Level* | *Percentage Judged at/above Grade Level* |
|---|---|---|---|---|
| *Regular First Grade* | *BPC Trained* | *13* | *13* | *100.0%* |
| | *Control* | *15* | *8* | *42.1%* |
| *Regular Second Grade* | *BPC Trained* | *18* | *18* | *100.0%* |
| | *Control* | *20* | *0* | *0.0%* |
| *Total* | *BPC Trained* | *31* | *31* | *100.0%* |
| | *Control* | *39* | *8* | *20.5%* |

The results shown in Table 2 indicate that all BPC-trained children were evaluated as doing satisfactory work after assignment to the Regular classroom and that about one Control child in five was given a similar evaluation.

# The Accelerated Progressive Choice Reading Program

**A Program for the Culturally Deprived Adolescent**

The Accelerated Progressive Choice (APC) Reading Program is a self-contained method of teaching reading skills in which the information exchange between the student and the instructor is highly detailed and systematized. The Program is designed to permit: (1) teaching of a class of students by a literate, adult, non-teacher as well as by a certified teacher; (2) training to be conducted in any well-lit room as well as in a classroom. Reading skills are developed by presenting the material in small, readily digestible bits and building up reading skills in cumulative fashion. The content of the materials is designed to be consistent with the needs, interests and values of the learner, particularly in the initial stages of the program. However the content gradually shifts to functional language and concepts useful beyond the limits of the classroom or ghetto. The objective of the APC Reading Program is to provide a reading-skill level and a conceptual framework which can facilitate both employability and life adjustment.

The objectives of the APC Reading Program are:

1. To produce a sixth-grade reading-skill level within 150 hours of literacy training, regardless of initial reading achievement level.

2. To permit effective development of literacy skills, using untrained instructors in whatever space is available.

3. To provide motivation for the learner within the program itself.

4. To provide an attitudinal frame of reference and a functional vocabulary which facilitates adjustment outside the ghetto community.

5. To permit each learner to progress at his own optimal pace.

6. Ultimately, to develop an eighth-grade reading level within 300 hours of literacy training, regardless of initial reading achievement level.

**The Washington Action for Youth (WAY) Pilot Test**

The purpose of the Washington Action for Youth pilot study was to test the use of The Accelerated Progressive Choice (APC) Reading Program as a method for rapidly increasing the literacy level of Washington D.C. school dropouts with very low reading-achievement levels.

This project was viewed as giving an initial estimate of the efficiency of the APC Reading Program. We were concerned with its ability to maintain the involvement of students with a history of avoidance of school and obtaining some evidence as to whether real gains in reading skills occurred. If successful, we should have some evidence as to whether the APC Reading Program was a rapid tool suited for development of literacy skills in this underachieving population. We assumed a subject population which was relatively static, resistant to "schoolish" methods, suspicious of promises and false hopes, and without genuine hope of achievement. They were in a literacy program as a "last-straw" and lacked any genuine expectancy that it would really make "any difference". On the other hand, it was assumed that they would become aware of their handicap on the job market, and of the social and economic disadvantages implicit in their low literacy level; this would provide a latent motivational advantage, once they perceived themselves to be making progress.

The most serious error which we could make, in our judgment, was to provide an artificial working climate and/or a selected group of students which could combine to produce an inflated estimate of the value of the method. A selected student body could inflate the reading gains and therefore fail to predict what would occur in actual use; a residential program with a small student-instructor ratio, along with heavy time concentrations might produce even more spectacular results which would have no value for other Community-Action Programs since it could not be replicated in non-experimental settings. On this basis, our efforts were directed to trying out the APC Program in a situation which would give a conservative estimate of its value for community action.

In essence, we were seeking to try out the APC Reading Program under conditions which could be duplicated in any community. The subjects were to be, if anything, less effective than run-of-the-mill dropouts. The instructor was to be totally untrained as a teacher and was to have no background in the area of literacy. Similarly, classroom facilities were to be whatever was available. If the program worked under these "minimal yield" conditions, then, it presumably would be even more effective under more favorable circumstances.

Clearly, while the development of literacy skills is a prerequisite to self-sufficiency, it offers comparatively little practical gain if it merely shifts the reading level from comic books emphasizing pictorial display to comic books which contain a greater proportion of language content. The two major objectives were: (1) to produce an increase in reading-skill level, and concomitantly, (2) to improve self-confidence and independence. Testing of the effectiveness of this pilot program was, therefore, along both these dimensions.

### The Subjects

Subjects were dropouts with reading deficiencies, who ranged in age from 14 to 22 years. Both sex and race were irrelevant to the assignment of subjects to the APC Literacy Program. The fact that the WAY Counseling Center was in a neighborhood with a predominantly Negro population, resulted in an almost exclusively male Negro population. A WAY counselor had to recommend, and the potential APC trainee had to agree to enter the program. There were no criteria for entry related to interest, previous scholastic success or intelligence-test scores. The sampling was directed to obtaining a group of subjects from whom it would be possible to generalize to the population of underachieving, jobless, adolescent dropouts.

### Scheduling

As the APC Program was designed to permit each student to maintain his own individual pace, the subjects were in a relatively free scheduling situation as compared with the usual school situation. The literacy-training room was available for about three hours on most days. Initially, subjects were restricted to about one hour of literacy training per day. However, this time limit was removed, after approximately two weeks, when several students expressed a desire to use the program for the entire three-hour time block.

The program permitted flexible adaptation to both job training and employment; students who had other responsibilities showed up only one or two days a week; some students dropped out for several weeks and then resumed their literacy-skill training. Though this resulted in considerable fluctuation in attendance, it posed little hardship for the instructor as students could pick up their APC Programs and begin where they had left off. This freedom in scheduling was of particular importance as many of these young people had failed to develop the habits and attitudes necessary for punctual attendance; an open schedule permitted them to maintain progress without posing a requirement for punctuality. Trainees should obtain sufficient intrinsic satisfaction from the program's built-in success experiences and initial avoidance tendencies should tend to dissipate, if the program is to be effective with this population. Attendance and punctuality tended to improve once it became evident that lapses in attendance reduced the rate of acquisition of the very reading skills they were there to attain.

### The Instructor

The instructor was a clincically trained psychologist who was a member of the WAY staff. He totally lacked experience, both as a teacher and in the field of literacy. Further, at the outset, his clinical training and experience were in direct opposition to the structure inherent in the APC programmed materials; as his background was largely Freudian, the theoretical base underlying the construction of the program was uncongenial to both his experience and his interests. However he made a valiant effort to comply with the requirements of the program; but because of his lack of rapport with a programmed approach, he tended to follow the APC procedures mechanically. On the other hand, he displayed a warmth of manner and a genuine concern for the trainees which quickly claimed their confidence. Thus, the instructor was (1) untrained as a teacher; (2) disinterested in learning theory and programmed methods; (3) genuinely concerned with the students; and (4) followed the APC materials in a rote manner. The use of a psychologist as an instructor was considered to offer neither a positive bias (as would have occurred with a knowledgeable researcher doing the training) nor a negative bias which would be expected if the APC procedures were not followed.

### The Training Room

The room within the Counseling Center in which training was conducted was largish (10' x 25'). The APC Literacy Training Program was only one of the functions it served. It was also used for meetings by counselors and for conferences of various kinds. Thus, the room was not always available to students when they arrived. Sometimes, by necessity, there was no forewarning and APC trainees arrived and were required to wait for several hours before they could begin training or were told that no training could be given that day.

### The Tests

1. The Stanford Achievement Test (SAT) battery was selected for use at the beginning (pre-test) and end of literacy training (post-test) for the following reasons:

(a) The SAT is a high reliability reading test with widespread usage in the schools. Evaluations based on its scores would be meaningful to most educators and officials in the reading-skill area.

(b) It contains reading sub-tests within the battery consisting of: (1) Word Meaning, (2) Paragraph Meaning, and (3) Arithmetic Concepts.

2. The PC Marginal Diagnostic Reading Test is designed to evaluate very low levels of reading capability and may be used to get scores from non-readers as well as readers. It had already been used to evaluate mentally retarded children and demonstrated both good reliability and good teacher and student acceptance (split-half r = 95 for N = 170). It was used (with some change in directions) for the dropout population in the belief that it would be more sensitive than the SAT at very low reading-skill levels. We hoped in this way to obtain pre-test scores on subjects who simply could not, or would not, attempt the SAT.

3. The Social Effectiveness Evaluation Form (SEEF) was designed to obtain subjective ratings of change along three behavioral dimensions:

(a) Verbal Fluency Scale: Level of observed skill in the use of language.

(b) The Environmental Scale: Level of observed skill in adjusting to others in whatever social environment observation is possible.

(c) The Situational Involvement Scale: Level of motivation combined with ability to adapt, and to sustain involvement in completing a task.

The counselor to which the client was assigned was considered to be the most objective and knowledgable rater. Further, as counselors were clearly without favorable bias toward the APC Literacy Program, the chances of an inflated rating were believed to be minimal. Two SEEF ratings were made on each trainee by his WAY Counselor:

(a) within two weeks of the trainee's entry into the APC Literacy Program, and

(b) immediately after the literacy post-tests were administered.

SEEF ratings were sent immediately to IER and were not available to the counselor for reference. At the time of the first rating only one SEEF was supplied for each counselor. As the time interval between ratings was two to four months, there seemed little likelihood that the post-test ratings would be influenced by recall. On the basis of the precautions taken, the professional nature of the raters, and the time interval between ratings, it is assumed that the two successive SEEF ratings represent reasonably independent and unbiassed judgments by the WAY Counselors.

4. Other Evaluations included an effort to obtain evidence on IQ scores for those trainees who could write well enough to complete the Otis Self-Administering Test of Mental Ability (Intermediate Examination).

The WAY Instructor was also requested to periodically subjectively evaluate his students' (1) reading-skill development and (2) changes in attitude and behavior, in his best judgment as a clinical psychologist.

**Problems of Retaining Students in the Literacy Program**

Emphasis on immediate employment for clients took precedence over their entry into the literacy upgrading program. As a consequence of this quite understandable bias on the part of employment counselors, loss of students to employment programs was continuous and consequently, the size of the sample remained quite small. Eight students managed to stay in the program long enough to be pre-tested and post-tested. The following extract from a memo by the WAY APC Project Coordinator summarizes the problems faced in attempting to obtain a sample of students over a three-month period:

> *Since the inception of the Progressive Choice Program at the Youth Employment Counselling Center with mid-October's pre-testing, a total of 43 youths have been seen for some type of assessment via testing. Of these, 30 youths completed the entire pre-test battery which included the Stanford Achievement Test, Progressive Choice Diagnostic Reading Test, and (appropriate) intelligence test (i.e., the contingency being that, depending on achievement as measured by battery median on the S.A.T., youth whose academic level surpassed 4th grade level were given the Otis Self Administering Test, while the others took the S.R.A. Non-Verbal Test). Of these 30, 17 have actually begun PC, and 8 continued to progress steadily up to post-testing on January 6 and 7 of this year.*
>
> *Both time and content involvement for the 9 who dropped PC was minimal - for I feel that none of these youths became sufficiently involved with the material to justify calling them "drop-outs." The implication here, that of the "intrinsic" motivational properties incorporated into the materials will be explored further in this note.**

*M.A. Bernstein, Project Coordinator for Research, WAY to Dr. Roy J. Jones, Director of Training, WAY. "Appraisal of the Progressive Choice Method in the Youth Employment Counseling Center, January 13,1964.

The Reading Test Results: Eight students were pre-tested on the Stanford Achievement Test. Several others did not fill in their pre-tests and their post-test scores were not used as it could not be definitely ascertained whether they were non-readers or were simply resisting the pre-test situation. They were excluded, as a body, since it was quite possible that their inclusion would have substantially inflated the size of the mean difference between pre- and post-test scores if, in fact, only one of these trainees had been resistant.

The amount of time these eight trainees were actively involved in the program varied from 11 to 77 hours. Mean participation time was 40.3 hours. The mean weekly time per student was slightly in excess of four hours. (See Table 3 for the findings.)

**Results of the WAY Pilot Study**

Data from Washington Action for Youth based on only eight subjects indicated (1) a gain of 1.28 years on the Stanford Achievement Test in 40.3 training hours as well as substantial gains on the PC Marginal Diagnostic Reading Test; (2) significantly higher ratings by counselors in terms of verbal skills, social awareness, and task involvement; and (3) gains in general adjustment (reported by counselors, instructors, and trainees).

*Table 3*

*Stanford Achievement Test Difference–Score Results*

| *Stanford Achievement Test (SAT)* | *Means on Pre–test* | *Means on Post–test* | *Mean Difference* | *t Ratio* | *Significance* |
|---|---|---|---|---|---|
| *Reading* | *4.88* | *6.16* | *+ 1.28* | *3.34* | *p > .01* |
| *Combined Subtests** | *4.71* | *5.50* | *+ 0.79* | *3.11* | *p > .01* |

** Combined subtests include Word Meaning, Paragraph Meaning and Arithmetic Concepts subtests.*

The mean gain of 1.28 years on the Stanford Achievement Test in a mean of 40.3 hours of attendance and participation was highly encouraging. The mean gain on the SAT as a whole was .79 years, which suggests that there was probably some generalization to the other sub-tests. Despite the small size of the sample, the SAT reading-test results are highly significant. They permit the assertion to be made, with a high degree of confidence, (chance factors would produce these gains less than one time in a hundred) that the gain in reading scores was not attributable to chance. On the other hand, because there were no alternative reading methods with which to compare these results, no statement can be made comparing APC to possible successful alternative approaches; it is only possible to state that the improvement in scores was highly significant and indicates genuine progress despite the small sample size.

Seven of the eight trainees were given pre-and post-tests on the PC Marginal Diagnostic Reading Test. Each trainee showed gains (ranging from +5 to +19 points); the mean gain was 9.57 for all subjects tested. The differences between pre-and post-test scores on this test were highly significant indicating that the gains in mean score were not attributable to chance; the differences between the pre-and post-test means reflected a real gain on this test.

*Table 4*

*The Progressive Choice Diagnostic Reading Test Results**

*TRAINEES IN STUDY*

| | A | B | C | D | E | F | G | Group Mean Scores |
|---|---|---|---|---|---|---|---|---|
| *Pre-Test* | 68 | 81 | 85 | 72 | 76 | 81 | 73 | 76.57 |
| *Post-Test* | 82 | 91 | 90 | 91 | 83 | 86 | 80 | 86.14 |
| *Difference Scores* | +14 | +10 | + 5 | +19 | + 7 | + 5 | + 7 | 9.57 |

**Scores show number of correct items on test.*

In addition to the data obtained on the tests, ratings from counselors were obtained on the Social Effectiveness Evaluation Form (SEEF) previously described. (See Table 5.)

The SEEF Rating Results: The SEEF data indicate that counselors tended to give higher ratings to their APC clients after three months, than they had given initially. The results were significant for all three sub-scales and also were significant for the SEEF as a whole. These findings were consistent with counselor comments and with reactions by APC clients.

Counselor and supervisory statements indicate that initial attitudes towards the APC Program improved only after seeing its effect on clients. In this light, the ratings by WAY counselors may be viewed as reflecting some perception of positive change in their clients over this period. Whether or not this change can be directly attributable to the APC Reading Program cannot be determined on the basis of the data on hand. More important for this study is the fact that the attitudes of counselors did improve. This is highly encouraging since counselor cooperation is considered to be crucial to the success of literacy programs in the community-action-program context.

*Table 5*

*Gains in Social Effectiveness Score (SEEF) Ratings by WAY Counselors*

| | *Mean Pre–test* | *Mean Post–test* | *Mean Difference* | *t Ratio* | *Statistical Significance* |
|---|---|---|---|---|---|
| *Environmental* | 6.63 | 7.88 | + 1.25 | 2.24 | YES |
| *Verbal Fluency* | 6.38 | 7.50 | + 1.13 | 3.02 | YES |
| *Situational Involvement* | 5.63 | 7.13 | + 1.50 | 1.87 | YES* |
| *Total Score* | 18.63 | 22.50 | + 3.88 | 1.90 | YES* |

**Using a single tailed test.*

Though the Washington Action for Youth situation was far from ideal, it accuractely reflected the real life conditions to be faced by a literacy-development program in most community-action settings. Since then, our experiences in various community-action settings indicates that the WAY situation was typical rather than unique. An effective approach to providing literacy skills in a community-action context must be able to cope with administrative complexity, organizational emphasis on immediate employment rather than literacy-skills development, slip-ups in direction and control, and the multitudinous and inevitable problems incident to working with organizations which are themselves in process of birth and development.

## The Washington, D.C. School System Pilot Tests

The pilot data obtained from Washington Action for Youth was an indication that the APC Reading Program had promise in a community-action setting using available facilities and personnel. Although the sample was small, the results were sufficiently encouraging to seek other tests of the value of the APC Reading Program. An opportunity presented itself through the Washington, D.C. School System which had been testing the Basal PC Reading Program, designed for use with mental retardates. As part of their 1964 summer-school program, they wished to try the experimental APC Reading Program with a class of underachieving junior-high-school students. Although the materials were provided by IER, no assistance was given either inside or outside of the classroom. A teacher who had already used the BPC Reading Program with retarded children, was assigned to teach the reading class for a period of one month (45 school hours) in MacFarland Junior High School. Their major findings are contained in a rather lengthy report (Pitts, Payne 1964) to the D.C. School System and in a memo summarizing the findings which has kindly been made available to us. Excerpts from this memo follow:

> *In this study results for students in the Progressive Choice Program were highly encouraging.*
>
> *Junior high school children considered typical underachieving normals (Mean IQ – 95) gained a year and six months over a single summer period providing forty–five hours of instruction.*
>
> *All children showed remarkable involvement in the program as attested by their comments, attendance, and completion of the entire six week summer program. Not one student dropped out. The most significant aspect of this finding relates to the Mac–Farland students who did not live in or near Garnet area and, therefore, were required to pay carfare every day for six weeks. Attendance was excellent.**

**Anne W. Pitts, Reading Coordinator, District of Columbia Junior High Schools and Frances C. Payne, Chairman, Basic Track, MacFarland Junior High School to Dr. Carl F. Hansen, Superintendent of Schools, Washington, D.C. A memorandum, "Report on the effectiveness of programmed instruction: An adaptation of the Progressive Choice Reading Method", September 14, 1964.*

These results were of interest as subjects were still in a school setting. If adolescent children could obtain substantial gains in literacy level within the school environment, it seemed reasonable to expect that they should be able to perform better in their subject areas. This should result in more satisfaction and less frustration in the classroom context. The fact that none of the children dropped out of the summer-school program would indicate that the APC Reading Program might well have value in reducing the dropout rate. One other interesting aspect of the Pitts-Payne study was that it obtained a gain of 15 months with 45 hours of instruction time; the gain was of a similar order of magnitude to the 15 months gain in SAT scores obtained in 40.3 hours in the original WAY pilot study.

This similarity in findings has special point when it is considered that one group (dropout subjects) was taught by a clinical psychologist in a community-action context and the other by a trained teacher in a public-school setting using underachieving junior high school students. Both groups obtained substantial gains in reading skills, considering the amount of time involved in the training. The common factor was the use of the APC Reading Program.

### The Bank Street College Evaluation

Bank Street College of New York City performed a four-month pilot test of the APC Reading Program under a grant from the Office of Education. The Bank Street College study had limited objectives:

1. To make a preliminary analysis of the APC Reading Program as a system of literacy training for New York City dropouts.

2. In the event the results appeared to be favorable, to make a large-scale test of the APC Reading Program.

Bank Street College made arrangements with Job Opportunities in Neighborhoods (JOIN) and The Police Athletic League (PAL) to obtain the necessary space, subjects, and data. Five JOIN and two PAL literacy-training units were formed. Students were dropouts, the instructors were public-spirited members of these organizations. Most instructors had no prior experience as teachers or instructors. Instruction time spent in these experimental programs was without compensation. The following excerpts from the Bank Street College Report (Schwarz, 1964) recapitulate the major findings:

> *The observed reactions of students to the program were overwhelmingly positive. The anecdotes which support this judgment are too numerous to enumerate here, so only representative observations will be offered. ...*
>
> *In every group when the students finished the first book in one session, they were visibly amazed at themselves and couldn't stop there, even though some had come to the first session with the intention of making it the last.*

*It is not overstating to say that almost every youngster at some time finished a book toward the end of an instructional period and was asked if he wanted to stop or go on. The decisions were unanimously in favor of continuing immediately. In one group, where instruction was on a one to one basis and in three hour blocks of time, students wouldn't take a break and tutors finally would ask for one.*

*One incident which would touch anyone's sensitivity was of two boys who took the Cycle I Test at the close of an instructional period. The Bank Street Consultant and APC Representative were present that day and noticed that everyone except the two boys had left. The instructor said she knew they were waiting for her to score the tests. She did so, and they had not passed the compounding part.*

*The consultant questioned whether the outside noises interfered with accurate hearing, and the two boys were told that they had passed all except one part. They wanted to take that part again immediately. They did and passed it.*

*Though it was already long past the end of the session and though the instructor couldn't help them, they spent an additional half hour working at the new materials. One of the boys was the brother of a boy who recently was apprehended holding up a store and was shot attempting escape. He ran home and died in his brother's arms. This boy was <u>that</u> brother. . . . .*

*The feature of being able to proceed at one's own rate of speed and to check one's own work by folding back the page rather than having to appeal to the often disliked teacher image elicited many looks and comments of satisfaction.*

*There was evidence also that a majority of the students was interested and involved in the story material. They laughed aloud, made responsive comments, criticized characters and authors, etc.*

*As indicated earlier, these observations are representative of many more. They would seem to say that the program and materials have a unique appeal to the dropout population. Further, the psychological conditions considered necessary to effective learning – intrinsic motivation and involvement – seemed to be present (Section 1, pp. 9–10).*

The dropout rate initiated by the students during the Bank Street evaluation was less than 20%. Schwarz states:

> *Of the 102 participants, only 20 dropped out of the program. Of that number, ten dropped out of one group. The high dropout rate in this group leads to a very interesting insight which should be a guide in the selection of future instructors. The instructor often seemed to be the sterotype of the directive, authoritative teacher. Her teaching style would not allow the programmed materials to be used as specified (Section 1, p. 7).*

Comments on the pre-and post-test results indicate that testing is quite difficult with this population and requires a more rigorous type of situation.

> *In view of the above-described testing situation, and of the many uncontrolled factors, we can only conclude that the Woolman Reading Program did in general, tend to improve the reading ability of the students. Evaluation of the amount of improvement is impossible on the basis of our data. Only well-designed and controlled research can give us the necessary information for evaluation of its use with adolescent school dropouts (Section, 2, p. 6).*

The following table (Table 6) represents a summary of the responses of 22 students in the Bank Street study who were given taped interviews to obtain personal reactions to the APC Reading Program (reported in Section 1, page 6 of report). The interview was structured inasmuch as each interviewee was given the same basic questions, however the specific language of the interviewer was modified to accomodate to different subjects.

Table 6

Student Reactions
to the
APC Reading Program by Percent*

| Question | Yes | No | No Clear–cut Reply* |
|---|---|---|---|
| Has reading program helped you to read? | 54.5 | 9.1 | 36.4 |
| Did books seem stupid or babyish at beginning of program? | 54.5 | 36.4 | 9.1 |
| Do books still seem stupid or babyish? | 4.5 | 86.4 | 9.1 |
| Would you recommend changes in books? | 18.2 | 72.7 | 9.1 |
| Do you think other people like yourself would want to be in this reading program? | 100.0 | 0.0 | 0.0 |

*Data in this table, obtained from Bank Street Report, has been slightly modidied for purposes of clarity.

The five basic interview questions are shown in the first column of Table 6. Six out of seven respondents answering the first item (excluding No Clear-cut Replies) perceived themselves as having improved in reading skills. A majority of the respondents felt the program was "stupid" or "babyish" at the outset, but more than 95% of the respondents did not think so at the time of the interview. (Items 2 and 3). More than 80% of the students responding did not think the books should be changed. Finally, every one (100%) of the respondents asserted that "people like themselves" would want to be in the APC Reading Program.

### The Galena Park, Texas School System

The Galena Park School System, like the Washington, D.C. School System, became interested in the APC Reading Program after successful use of the Basal PC Reading Program in teaching reading skills to (1) mental retardates and (2) emotionally immature and/or culturally deprived elementary-school children.

This system first tried the APC Reading Program with a class of 15 severely underachieving junior high school students in a crash program in May and June of 1963. The Director of Special Education, (F. E. McGahan) has asserted that children have gained in both school performance and test scores in various areas as of the beginning of the new school year. The reaction by school authorities and teachers to the initial pilot study were extremely positive. At the request of the school system, three additional classes (76 students) are being pilot tested during the current school year. The data compiled by the Galena Park School System, on the results of the first pilot study have been requested and are presently being compiled.

### Additional APC Pilot Studies in Progress

In addition to the APC pilot studies previously described, there are several field tests now in progress on which very little data are yet available. The status of each of these will be covered briefly:

#### Mobilization for Youth

Data from summer-school testing have not yet been fully analyzed. In a recent letter, Alan Cohen, MFY Director of Reading, states that the program was very successful at a fourth-grade level (much below the age level at which it was designed to be used). After several months of study and exposure to the APC Reading Program in various MFY contexts, Cohen expressed his tentative conclusions: "PC is a good method. APC needs some revision, but as it stands now, it is the best existing program for non-reading kids. Its potential is great. ...."*

**S. Alan Cohen, Director of Reading, Mobilization for Youth to Dr. Myron Woolman, Director, Institute of Educational Research. A letter, October 8, 1964.*

### The Charlotte–Mecklenburg Study

The APC Reading Program was placed into effect in six classes in a Charlotte, N.C. junior high school as a part of a project coordinated through the North Carolina Fund. This program is of special interest as the classes consist of culturally deprived, low-achieving adolescents. Comparable Control children have been pre-tested. We plan to obtain our first post-test evaluations during December 1964. If low-achieving junior-high students can obtain reading skills as rapidly as now appears possible, this should result in changes in related behaviors, including school-dropout, job-skill development, court offenses, etc. It is possible that this study will be expanded to permit evaluation of by-product behaviors in the event that the literacy results appear promising.

### United Planning Organization

A project has recently been activated to provide literacy skills to 80 underachieving D.C. dropouts as a follow-up of the initial WAY pilot study. Trainees involved have low reading achievement and participate as part of the UPO work-study program. The fact that students are UPO employees has produced a highly stable work situation. Subjective reports on student progress are positive, though post-tests have not yet been given to any of these subjects.

### Action for Boston Community Development

The APC Reading Program has recently been put into effect in two counseling centers operated through ABCD. The programs have recently gotten into operation. Estimates of the program's effectiveness will not be available for some time. Initial counselor acceptance and cooperation in ABCD has been very good. The program is now facing the typical problems involving its relationship to the job-skill programs and its degree of administrative support.

## Discussion

The major objectives of the APC Reading Program are to:

1. Provide a system which will improve literacy skills efficiently and economically in the absence of special facilities and/or a traditionally trained teaching staff.

2. Provide a system of literacy training which would sustain the attention and involvement of the school dropout, potential dropout or young adult, regardless of race, cultural background and sex.

Operationally, the first objective was to achieve a minimum sixth-grade reading level in 150 hours, or less, for a trainee within the normal range of intelligence regardless of his initial reading level. Our second objective was to minimize the number of trainees who would drop out of the program of their own volition.

The results from Washington Action for Youth, the Washington, D.C. School System and Bank Street College can be summarized as follows:

> Trainees given the APC Reading Program gained in reading skills at rapid rates. The data supports an expectation that there will be a substantial mean gain on standard tests of reading achievement in less than 50 hours of exposure (WAY mean gain = 1.28 years in 40.3 hours; D.C. Schools mean gain = 1.50 years in 45.0 hours; Bank Street College = 0.4 years mean gain in 20 hours).

As none of the tests continued long enough to complete the full program, (150 hours), these data fail to fully test the validity of the first objective of the APC Reading Program, namely, that each trainee who completes the program will be able to read at, or above, the sixth-grade level. However, the data obtained are promising and do indicate the possibility that this first objective may be achieved using the program as it now exists. However, a test of adequate duration to determine whether or not the APC Reading Program can meet this objective has yet to be done.

With reference to the second objective, the WAY Project Coordinator reported that trainees rarely dropped out of the APC Reading Program of their own volition. He estimated that more than 75% of the trainees would have remained in the program had administrative reassignment not occurred. In the D.C. Schools Study, every student in the class continued in the program through the entire six-week summer school session, despite the fact that public transportation was necessary for attendance. In the Bank Street College Study, only 20 of the 82 students participating dropped out of the program of their own volition; half of these were being instructed by one teacher who, according to the writer, (Schwarz, 1964) failed to use the APC Reading Program properly.

Although ideally we would want 100% retention of trainees, the APC Reading Program appears to meet the second objective (trainee involvement and retention) reasonably well. The program does appear to obtain the necessary depth of student motivation from the adolescent and young-adult population in these pilot studies to maintain them in the literacy-training situation.

Thus, with reference to the initial objectives of the APC Reading Program, based on available data our initial conclusions are:

1. The APC Reading Program appears to provide a rapid method of improving literacy skills. The samples are insufficient to indicate how general these increases in skill will be for the population as a whole. The data reflects only partial completion of the APC Reading Program and fails to provide even pilot data on the upper limits of attainment which would be achieved by trainees who fully completed the APC Reading Program.

2. The pilot data indicate that the APC Reading Program involves and motivates a high proportion of dropouts and pre-dropouts.

By June, 1965 we expect to have evidence on the level of achievement obtained by junior high school students who complete the APC Reading Program, obtained from six classes of students from Charlotte, N.C., and three classes from Galena Park, Texas. Data on these students will be valuable for assessing the effects of completing the entire APC Reading Program in a school setting.

However, even if both school systems indicate that the APC Reading Program can meet both objectives within a formal school setting, we will still be unable to assert with certainty that the APC Reading Program can meet the same objectives in a community-action setting with dropouts and young adults. Unless the program is fully tested in non-school settings, using non-teachers as instructors, its true value as a social weapon cannot be adequately evaluated.

**Problems in the Community–Action Setting**

One problem that we have been reluctantly forced to recognize is that Community-Action Programs (CAPs) as presently constituted, have, to date, been unsuited as testing grounds for the APC Reading Program. Emphasis in these programs is on activities which will immediately improve the earning power, rather than life preparation of the CAP client. Setting up the necessary machinery to develop literacy skills within these agencies requires administrative support, counselor involvement, and a general commitment to providing a literacy-skill foundation on which to build job-skills. These requirements (plus

the time interval required to delay reading skills) are often inconsistent with the emphasis on immediate employment. The fact is that CAPs (1) have usually sent only a small fraction of their low-literacy trainees into the APC Reading Program; (2) have consistently withdrawn students from these programs for job placement and/or job training; and (3) have failed to follow the required testing and teaching procedures correctly. Our observations of CAPs are consistent with the following extract from The Bank Street College analysis (Schwarz, 1964):

> *It was recognized even before the reading programs were instituted that the way in which the programs were organized was not conducive to systematic testing and evaluation of the effectiveness of the Woolman Reading Program. In the first place, neither the organizations sponsoring the reading program nor the participating students were primarily interested in the reading program per se. Their primary focus was on jobs for the students (Section 2, p. 1).*

Schwarz's further statements indicate her experience paralleled our own with regard to administrative forces operating to reduce the number of trainees completing the APC Reading Program. Although only 20 of the 102 students dropped out of the program on their own initiative, more than three times as many were dropped because of administrative requirements. She states:

> *Administrative arrangements within the sponsoring organizations, e.g., teacher going on vacation or leaving, were also responsible in part, as was the fact that many of the students were given jobs and left before completing the sessions or taking the "post-test" (Section 2, p. 3).*

It must be recognized that in the community-action setting the immediate economic needs of the trainees are understandably prepotent for both the counseling staff and the trainees. The consequence is that literacy trainees consistently drop out of the literacy program temporarily or permanently, of their own volition or by direction of the counselors, to get employment for immediate income. If the literacy program were viewed as an organic part of a paid job-skill development, this pattern of agency-inspired dropouts could be sharply curtained by the simple expedients of classifying literacy-skill training as an organic part of the job-training system.

**Recommendation: Further Testing of the Accelerated Progressive Choice Reading Program in Both School and Community-Action Settings**

Further experimental studies are warranted to determine the value of the APC Reading Program, both in school and community-action settings.

**Recommendation: A Suggested Procedure for Systematizing Literacy Training in Community–Action Programs**

It is recommended that programs develop procedures to insure that low literacy-level trainees have a complete opportunity to sharply increase their literacy levels. The following set of procedures exemplifies a pattern which would provide both the incentive and the opportunity to increase literacy levels rapidly:

1. All trainees entering CAPs should be given a standardized reading battery to determine initial reading-achievement levels. All trainees reading at or below a sixth-grade reading-achievement level would automatically be funnelled into a Literacy Improvement Program (LIP). These low literacy-level trainees should probably be given a concentrated (six hour per day) program until they could demonstrate reading levels above sixth grade level or have spent 300 hours in this LIP phase.

2. Trainees who could not achieve literacy skills above sixth-grade level within 300 hours would continue as LIP trainees as long as they actively participated in the Community-Action Program on the assumption that the higher their literacy skills the greater their potential job security after leaving the Community-Action setting. Most of their training time after this first intensive phase, would be devoted to job skills.

3. Trainees who completed the APC Reading Program and scored at or below eighth-grade level, would be retained on a part time (one or two hours per day) basis until their reading achievement scores exceeded the eighth-grade level. During this phase they would be given Vocabulary Expansion Programs, methods to improve reading speed, etc.

4. Trainees whose test battery was initially above eighth-grade level on a post-test, would be entered into the job-skill program on a full time basis.

5. Job-skill training should be developed around the use of printed materials - rather than "voice-to-ear" methods to (a) further improve reading skills, (b) provide training in the use of manuals and other job-related information, and (c) demonstrate unambiguously the function of reading skills as the one technique which gives access to economically useful job-related information.

**Recommendation: The Development of the Vocabulary Expansion and Employability Phase**

The present Accelerated Progressive Choice Program is estimated to require 125 to 150 hours for completion. The learner has a reading capability but is still largely limited to his ghetto vocabulary and has little understanding of the skills involved in obtaining and maintaining stable employment. On completion of the complete APC Reading Program it is strongly recommended that a Vocabulary Expansion and Employability program be developed to (1) stablize and improve reading comprehension, and (2) provide information related to typical employment forms, interviews and relationships with superiors and peers on the job.

CORE NEW YORK PILOT TEST OF IER LITERACY MATERIALS

Agenda for Initial Orientation Session, December 19, 1964

I. Brief remarks will be made by the participants from both CORE and IER in the following order:

CORE participants:

| | | |
|---|---|---|
| Mr. James McCain | (3 minutes) | |
| Mr. Louis Smith | (3 minutes) | |
| Mr. Gordon Carey | (3 minutes) | |
| IER participants: | | |
| Dr. Myron Woolman | (15 minutes) | |
| Mr. Irwin Schpok | ( 3 minutes) | |
| Mrs. Joan Bacchus | ( 3 minutes) | (Total time: 30 minutes) |

II. Each Instructor-trainee will be given a Cycle I, Segment 1 Workbook and a Manual. Mrs. Joan Bacchus will then discuss, in a fairly detailed fashion, the mechanics of the Accelerated Progressive Choice (APC) Reading Program. Synchrony between the student workbook and the instructor's manual, overall format, procedures, symbols, learning levels in the program, and teaching devices which are unique to this program will be covered, with the first two letters in the segment used as illustrations of the topics being discussed. (time: 15 minutes)

III. A demonstration of the appropriate use of the materials and of the kind of interaction which should take place between student and instructor will be presented by Miss Pat Lowery (IER), who will take the part of the student(S) and Mrs. Bacchus, who will be the instructor(I). Miss Lowery will move through those workbook pages devoted to teaching the first letter (M), making appropriate responses as well as typical inappropriate responses, in an effort to point up all the possible procedures an instructor may have to follow in order to move a student through the program successfully. (time: 15 minutes)

IV. An Instructor-trainee will take the part of the student and Miss Lowery will be the instructor. She will move the trainee through the second letter (O). The use of Miss Lowery as instructor this time will point up the fact that although this is a tightly programmed literacy tool, with detailed and highly specific procedures which must be followed, the slight variation on the use of those procedures, introduced by the personality of the individual instructor, is not only possible, but desireable. (time: 10 minutes)

V. The Instructor-trainee who functioned as the student with Miss Lowery will continue as the student and another trainee will be the instructor. Mrs. Bacchus and Miss Lowery will assist, but as minimally as possible at this point. (time: 15 minutes)

VI. The Instructor-trainees will be split into Group A and Group B. Each trainee will be given a copy of the Cycle I, Segment 7 Workbook and the Manual. The first letter (N) in Segment 7 will be taught. Within Group A and Group B, teams of two will be formed, one trainee will function as the student and his team-mate will function as the instructor. When requested to do so, the team-mates will reverse roles. Miss Lowery will be responsible for one group and Mrs. Bacchus for the other, and will move from team to team, answering questions, pointing up inappropriate use of the program, making suggestions, etc. Dr. Woolman will move among both groups in the same fashion. (time: Total of 30 min.; - 15 min. + 15 min.)

VII. Each Instructor-trainee will be given a copy of the Cycle I CHECKOUT and the instructions an instructor must follow to administer the CHECKOUT effectively. Mrs. Bacchus will explain the functions and procedures involved in a Cycle CHECKOUT. Mr. Schpok will make a brief statement on the CHECKOUT, in terms of adequate data collection. (time: 15 min.)

VIII. Each Instructor-trainee will be given a copy of the Cycle II, Segment 3 Workbook and the Manual. Miss Lowery will make a brief statement on what is taught in Cycle II and will emphasize the increasing complexity of the program, from Cycle to Cycle. The teams in Groups A and B will continue to work together in the manner outlined in VI above, using the first few exercises in Segment 3. (time: 15 minutes)

IX. Each Instructor-trainee will be given a copy of the Cycle III, Segment 4 Workbook and the Manual. Mrs. Bacchus will make a brief statement on what is taught in the third and last Cycle of the program. Dr. Woolman will select one trainee to take the role of instructor and the other trainees will function as his class of students. When significant errors are made in the instructor's use of the program, either Dr. Woolman or Mrs. Bacchus will provide an explanation of the correct usage. (time: 15 minutes)

X. Four trainees will be selected to instruct and will be assigned two or three of the actual students present. Each student will be given a Cycle I, Segment 1 Workbook and the Instructor-trainees assigned students will proceed to instruct them. The remaining Instructor-trainees will be asked to observe the process. After 30 minutes, the observer-trainees will instruct and those who have been instructing will observe. After 30 minutes, the actual students may leave the session. (Total time: 1 hour; 30 minutes + 30 minutes)

XII. Remarks by Mr. James McCain will close the session.

General Comments:

In an orientation of this nature, the primary purpose is to insure that the Instructor-trainees develop a genuine and functional grasp of the methods and materials they will be using. But it is important for the CORE and IER participants to remember that while they feel a deep commitment and an enthusiasm for the Literacy Program, most of the trainees will be neutral, some may even be resistent, and some will see it as an exciting project. Therefore, another of our purposes will be to obtain the enthusiastic support of the trainees for the entire Literacy Program as well as of the value and usefulness of the specific reading program they will be using.

It seems adviseable to have those CORE staff people directly involved in this project (Mr. McCain, Mr. Smith and those of his staff present, as well as any others CORE may want to suggest) participate in the session not only as observers, but as trainees.

It would be advantageous for one CORE staff member to be assigned the task of being responsible for careful data control and collection and to work rather closely with Mr. Schpok, Data Analyst for IER.

# THE PROGRESSIVE CHOICE READING PROGRAM

**Myron Woolman**

2226 Wisconsin Avenue, N. W.

Washington 7, D. C.

ACKNOWLEDGEMENT

The demonstration of the value of the Progressive Choice Reading Method has been due largely to the efforts of Dr. Richard H. Bloomer, who has developed support materials, taught the method to his students, and performed the vital experiments which have given evidence of its effectiveness. Also, special appreciation is expressed to Ann Davy, who demonstrated the value of the Progressive Choice Reading Method in teaching reading skills to retarded children under difficult teaching conditions.

I would also like to add my thanks to the members of the project team who have worked so diligently to develop the P C Reading Method into synchronous programmed form: Ruth Ann Davy, Project Director; Mrs. Franklin Ramirez, Technical Research Associate and Misses Patti Lowery and Marcia Isabel Woolman, Research Assistants.

# THE PROGRESSIVE CHOICE READING PROGRAM

By
Myron Woolman

## GENERAL INTRODUCTION

Information important enough for dissemination is generally recorded in the visual codes termed "printing" and "writing." The mounting complexity and technicalization of Western civilization has increased the relative importance of the decoding skill we term "reading." The rapid digestion of large masses of printed documents by scientists, technologists, professionals and the population at large has become not only a necessity for maintaining technological growth, but may be decisive for survival. The major criterion for evaluating a civilization is the amount and quality of reading done by its members. Thus, the development of mechanisms to produce rapid and precise reading skills is vital for the development of individual careers central to the growth of science and technology, and an index to the level of civilization itself.

Typically, reading consists of the following operations:

1. A writer transforms words into a visual code which is functionally equivalent in meaning to the use of the same terms in common speech.

2. A viewer of the written or printed symbols perceives the visual pattern as a meaningful code, and transforms the symbols into meaningful terms which are functionally equivalent in meaning to those of the writer.

Thus, reading is defined as the operation of decoding meaningful visual symbols into speech equivalents. The reader must be able to establish

some congruency between visual patterns and meaningful aural patterns; or, more succinctly, the reader must translate a visual input into its voiced equivalent. The meaningfulness of a word's visual pattern thus depends on a prior acquisition of its meaningful aural pattern.

The large body of proactive and retroactive inhibition studies attests to the fact that order of presentation of the stimuli is an important factor in retention.[1,2,3,4] Further, the probability of a

[4]The proactive and retroactive inhibition studies were largely concerned with the mechanics underlying such variables as Primacy, Recency and Reminiscence. Later, these variables were placed into a learning theory rationale involving discrimination and generalization effects by Gibson and others.

Eleanor J. Gibson, "A Systematic Application of the Concepts of Generalization and Differentiation to Verbal Learning," Psychol. Rev., XLVII, May, 1940. Pp. 196-229.

correct response during learning has been shown to make a material contribution to learning outcomes.[5,6,7,8] Several experiments with human subjects add emphasis to (1) the importance of sequential relationships, (2) similarity relationships, and (3) response requirements for human learning.[9,10,11] The present Progressive Choice Reading Method was

[11]These studies were performed while the author was a member of the staff of the Human Resources Research Office, George Washington University, and should be completed within the year. Their data offers support for the following statements: (1) the sequence of presentation of material vitally affects learning outcomes; (2) the number of choices which the learner must make (all other factors constant) affects learning outcomes. It should be noted that both these factors affect the probability of a correct response.

designed to control (1) sequence of letter presentation, (2) similarity of sound and letter shape relations, and (3) the response conditions.

A general requirement in the organization of the Progressive Choice Reading Method was that the number of possible response alternatives should be increased only on the basis of demonstrated proficiency. Thus, as learning proceeds there is a progressive increase in the number of choice alternatives facing the learner. The Progressive Choice Reading Method is designed to increase in complexity on the basis of the learner's demonstrated proficiency.

## AN HISTORICAL INTRODUCTION TO READING THEORY

In Europe during the middle ages, reading instruction was viewed as a necessary condition for religious instruction. The "Primer" was originally a collection of those religious articles necessary to the layman as defined by the Council of Mainz in 813 A. D. The Roman alphabet was later added, followed by a word list and, in time, the "Primer" became the standard book for reading instruction. Protestantism, with its emphasis on personal interpretation of the Bible, required broader masses of skilled readers. With the translation of the Bible from the Latin into the various European spoken languages in the sixteenth century, a body of important literature related to the spoken language was available to the layman for the first time. Further, Protestant doctrine gave the individual a responsibility for reading this material in the vernacular language.[12] Thus, the Bible provided a great bridge across the chasm separating spoken from printed speech.

### Initial Alphabetical Emphasis

In America, prior to Horace Mann, emphasis was given to the names, shapes and sequences of letters as contained in the alphabet. Ancient alphabetical drills, inherited from the Hebrews and the Greeks and transmitted by the Romans into Western civilization, were still the

---

[12] Nila Benton Smith, American Reading Instruction. New York: The Silver Publishing Company, 1934.

basic approach to teaching reading skills.[13] Catechistic learning of the alphabet, as a prelude to the development of reading skills, still reflected the older relation between reading and religious instruction; this alphabetical substratum is clearly evident in the McGuffey Reader. Horace Mann, influenced by Prussian methods of teaching reading, contended that reading skills were largely a matter of deriving meaning from familiar terms, and that the units which were most familiar to children were words, not letters.[14] Mann increased emphasis on those visual and sound patterns which make up meaningful words and decreased emphasis on naming of letters as demanded by spelling. Mann's concern with the meanings of terms, rather than their elements, is strikingly similar in rationale to the now popular "whole-word" approach.

## The Whole-Word Method

The whole-word approach did not emerge full blown with the advent of the Gestaltists. It had been used sporadically prior to the appearance of the Gestalt rationale: In Germany, as early as 1657 it was used by Comenius; and in America, the whole-word approach was used by Worcester in a primer dated 1828.[15] At the end of the nineteenth century, Cattell

---

[13]Sally Childs, "In Clinical Programs: Sound Reading," New Frontiers in Reading. International Reading Association Conference Proceedings, 1960. P. 102.

[14]Emmett Albert Betts, Foundations of Reading Instruction. New York: American Book Company, 1946.

[15]Ibid., p. 377.

demonstrated that familiar words are read as whole compounds, rather than letter by letter, and provided evidence which appeared to support a whole-word approach.[16] With the advent of the Gestalt psychologists (Wertheimer, Kohler and Kaffka), a rationale appeared for teaching reading by total word configuration rather than letter elements. Although the Gestaltists did not themselves apply their position to the teaching of reading, the Gestalt framework was consistent with Cattell's earlier work and congenial to the development of primers such as "Look and See."

Brown, summarizing reading research during the past fifty years, states:

> ...while the general shape of a word has some cue value, the clear view of letters is a more important factor in word identification...the adult reader is able to identify words at a glance but it may be that this ability is best developed out of letter-by-letter reading.[17]

Clearly, the fact that words can be perceived as meaningful wholes does not begin to argue that reading should be taught in this manner. Further, Katona's recent work is viewed by Brown as offering support to reading methods which emphasize general phonetic principles despite problems arising from variations.[18] And, in considering the problem of

---

[16]Dolores Durkin, Phonics and the Teaching of Reading. New York: Teachers College, Columbia University, 1962.

[17]Roger Brown, Words and Things. Glencoe, Ill.: The Free Press, 1958.

[18]Ibid., p. 72.

phonic variation, Brown's[19] position is consistent with that of Childs:[20] Both hold that English is fundamentally a phonetic system, in that words are generated by fairly consistent signals rather than a semantic system in which each word has its own distinctive structure. Their analysis favors some type of phonetic training, requiring that the learner appreciate the significance of the internal elements within the word. The experimental evidence is both scanty and ambiguous, but appears to suggest that reading by whole words is facilitated by learning the letter elements as well.

Critique of Phonic and Whole-Word Methods

Methods of teaching English reading skills which emphasize phonic elements are vulnerable to two major criticisms:

1. As English is phonically inconsistent, a phonic approach is complicated by the fact that different words use the same letter to signify different sounds and, conversely, different letters may signify similar sounds.

2. As training focuses on sequence of sound patterns generated by letter sequences, there is a tendency for children to learn to read sounds rather than meaningful words.

Spache, in a detailed analysis of the evidence relevant to the phonics approach states:

> ...There is no such group of accepted beliefs as a phonetic method...we discover that learning phonics is apparently completely a memorization process based upon repetitive drill.[21]

---

[19]Ibid., p. 70.

[20]Childs, op. cit., p. 102.

[21]George D. Spache, "Limitations of the Phonetic Approach to Developmental and Remedial Reading," New Frontiers in Reading, V. International Reading Association Conference Proceedings, 1960.

He concluded:

> ...about all we can say from the phonics research is, first, that phonics instruction probably aids word recognition but secondly, that there is very little evidence on any given amount of any particular kind of phonics instruction.[22]

On the other hand, the whole-word approach has produced its own difficulties.[23] Disenchantment became apparent when the data revealed that:

1. Substantial proportions of students were not able to organize the letter sequences necessary for adequate spelling.
2. As reading vocabulary increased, problems inherent in pattern recognition (confusion of similar patterns, reversals, displacements, etc.) became important classroom problems.

Thus, the use of phonics appears to result in a class of problems produced through emphasis on the internal sound patterns of the words rather than word meanings. Conversely, the whole-word approach tends to de-emphasize structural components and to produce perceptual uncertainties which leads to poor spelling and confusion between similar pattern configurations. Each has proven to have both virtues and weaknesses in

---

[22] Ibid., p. 108.

[23] Brown, op. cit., p. 72.

the search for a simple method of providing reading skills.

The Linguistic Approach

The Linguistic approach of Bloomfield and Barnhart, explicated and presented in Let's Read,[24] is an effort at systemization differing in some details from the assumptions implicit in the typical whole-word approach. As explained, Barnhart,[25] who is an openly partisan exponent of the Bloomfield method, states that Bloomfield's approach involves vast numbers of associational patterns and the conversion of letters to sounds. The aim is to "convert any new written words to sounds."[26] In an earlier summary statement, Barnhart declares: "The basic procedure... is to concentrate upon establishing patterns of letters and sounds regardless of meaning, to provide the child with a constantly growing set of sound-letter consonants by means of which he converts letters to sounds and almost automatically converts sounds to meaningful words..."[27]

The experimental results obtained in a comparison between the Bloomfield Method and a conventional phonics method showed no significant differences at the end of first grade. This experimental evidence was neatly tabled by Barnhart with the following speculation: "Since word attack skills are cumulatively developed, it appears that a full evaluation of the Bloomfield plan can be obtained only upon completion of the program in the Third or even Fourth grade. Further...it is

---

[24]Leonard Bloomfield and Clarence L. Barnhart, Let's Read. Detroit: Wayne State University Press, 1961.

[25]Ibid., p. 6.
[26]Ibid., p. 7.
[27]Ibid., p. 6.

necessary that the linguist, the reading specialist and the educational psychologist unite their efforts...for the purpose of preparing a program of reading instruction in which the linguist's concept of word-attack will be integrated in the present day 'reading for meaning' theory."

The Bloomfield approach may be summarized as a whole-word approach based on the following rules:

1. The formation of a number of terms by rotating consonants around a given vowel. For example, Can, Dan, fan, man, are the initial terms. This rapidly evolves into such sentences as, Nan can fan Dan. Can Dan fan Nan?, etc. In similar fashions, the second series of lessons rotates consonants around the letter I (pronounced as in "big "). Thus it begins with big, dig, fig, etc.

2. As each successive vowel phases into the program, the learner is responsible for terms using the prior vowel sound (s). Thus, in the I exercises, the learner quickly faces Min had a pin. Can Nan win at Tag?, etc. The The Bloomfield method thus requires the learner to cumulate his skills in reading vowel-centered terms as he progresses.

Critique of the Bloomfield Approach

Bloomfield's linguistic approach is an interesting variation from the traditional phonics and whole-word approaches. In this writer's view, Bloomfield's method should have functional value for children of above average intellectual endowment, emotional stability, and a cultivated home environment. The Bloomfield method appears to assume the following existing capabilities prior to beginning the reading program:

1. The ability to discriminate between very similar letter forms.

2. The ability to pronounce the type of sequenced similar terms which have traditionally been used as tongue twisters Peter picked a peck...)

3. The ability to establish the meaning of the sounds and thus to develop comprehension "automatically," to use Barnhart's term.

More affirmatively, the limitation to a single new vowel in each exercise should offer a significant advantage. Also, Bloomfield's precise descriptions of basic relationships between sound and form should be helpful to the conscientious parent and teacher.

In summary, the Bloomfield method appears to assume the prior development of word meaning. It has a rudimentary cumulative-vowel structuring principle which should have teaching value. The writer believes that the method would tend to increase variance by favoring advantaged children and adding still further to the disadvantages of those already in culturally deprived environments. This expectation could possibly be checked by Barnhart with available data, and provide a more precise view of the possible value of the Bloomfield approach.

## THE PROGRESSIVE CHOICE APPROACH

The Progressive Choice Reading Method, which follows, differs substantially from the approaches previously described. It should be appraised as an effort to provide a systematic growth pattern in reading skill development. Its goals are: (1) to facilitate the development of reading skills by children, (2) reduce reading deficiencies, and (3) simplify the teaching task. Though the experimental results to date are promising, Progressive Choice should be viewed as a method in process of development rather than a crystallized system.

Every method of teaching reading is directed to the attainment of reader comprehension and speed. The differences separating the methods are in terms of the process of achieving these twin objectives.

Nila Smith, in a recent critique of several reading studies, presented some characteristics which should be embodied in any effective reading method:

> Provision for differentiation is evidenced in several different ways: In carefully controlled vocabulary which advances in small increments, (and) in carefully planned skill development programs which gradually extend in scope and sequence.[28]

The Progressive Choice Reading Method is concerned with both these criteria: It emphasizes comprehension while expanding the learning domain in small step by step increments; the learner is given a new element only when he proves mastery of learning materials to that point.

The Artificially Consistent Phonetic Framework

A major confounding factor permeating the teaching of English reading skills is the phonic fluctuation imbedded in the English language. The vocabulary in reading primers is generally limited to the use of the high frequency terms contained in the Lorge-Thorndike and Dale-Chall word lists. As these terms are based on usage and disregard phonetic consistency, our conventional primers force the child to contend with constantly shifting sound-letter combinations from the outset of their reading skill development.

---

[28] Nila B. Smith, "Differentiating Instruction to Provide for the Needs of Learners," New Frontiers in Reading, V. International Reading Association Conference Proceedings, 1960.

One important feature of the Progressive Choice Method is its emphasis on consistency in the relationship between sounds and shapes in the initial stages of learning. The major effort (in the initial stages) is to provide a situation in which the same response can be made correctly to the same letter or letter sequence regardless of the frequency of usage.

Sound-Shape Invariance

In the Progressive Choice Reading Method, phonetic consistency in the initial phase of learning is considered to be a major criterion for teaching reading skills. The consonants in the English language are quite consistent in terms of their associated sounds. Also, the selection of one major sound for each vowel provides an artificial framework in which sounds and letter shapes approximate a one to one correspondence. Thus, the learner has only one possible sound to give for any shape, and one shape for any sound. By reducing the number of choices he can make, we reduce the probability of error, and thus simplify his learning. The reduction in stimulus-response fluctuation is obtained by abandoning the criterion of frequency of usage for the initial reading words, and adhering to terms which are (1) phonetically consistent with one another and (2) already exist in the spoken language of the learner or can be readily taught. By imposing the restriction that each letter can have only one sound (within narrow limits of variation) the stability of the learning situation faced by the novice reader is increased.

The letter shapes associated with a given sound fluctuate in both size and form in most primers. To improve stability, the Progressive Choice Reading Method uses only upper case letters initially to reduce the number of different forms to which the learner responds. This sharply reduces the probability of errors of stimulus generalization, in which the learner responds to one pattern as if it were another. Upper case forms are used as they are more distinctive and require less motor skill to print. This latter point is particularly important as the PC learner prints from the outset of his training as part of the learning process.

Delaying Alphabetical Names

The temporal sequence in which the alphabetical names of the letters is learned is another important factor affecting the complexity of the learner's stimulus field. The alphabet provides a sequence of names of letters, but these names have no function in reading *per se*. Children who have learned both alphabetical names and sounds for the letters are thus faced with the choice of voicing the sound or the name in the presence of any given letter. In this view, the alphabetical name of a letter becomes an important source of learner error if introduced when the child is primarily learning to organize basic reading skills. The principle that the number of choices should be minimized requires the exclusion of alphabetical names until a later stage of the program. This position differs from that presented by Durkin who states:

> As a source of help in identifying correct sounds--the names of the letters are relatively insignificant. However, as a way of facilitating communication in the teaching--learning

> situation, knowledge of the names of letters is very significant and, for this reason, ought to be seen as still another kind of readiness for phonics.[29]

The view held by the writer is that Durkin over-emphasizes the importance of the alphabet as a communication device, and fails to assess the problems it creates. Increased learning difficulty is introduced into the student learning situation through the use of alphabetical names and through a teacher convenience. Admittedly, it appears to be an unnecessary complication. The learner does need the alphabet when he spells aloud and requires such sequential alphabetical devices as the dictionary, thesaurus and alphabetical listings. The alphabet can be delayed until these skills have function. The elimination of the alphabet as an initial learning requirement is consistent with the requirement of initial simplicity. In the Progressive Choice Reading Method, the learner has only one sound to associate to one shape in the initial phase (Cycle I). As the alphabetical names of the letters and their sequence are inconsistent with the rationale for the method, they are delayed until they are functionally useful for extending the learner's vocabulary and organizing information into alphabetical sequences.

The Criteria

Certainly, the evidence points to the fact that readers ultimately are able to read whole words as units.[30] The matter of primary concern is the way by which this whole word skill level is achieved.

---

[29]Durkin, op. cit., p. 19.

[30]Brown, op. cit., p. 67.

In the PC Reading Method it is assumed that meaningful reading is achieved most rapidly and efficiently by moving up a graded series of steps requiring the learner to demonstrate (1) that he can relate meaningful print to those terms which he can already understand in common speech; (2) that he can compound elements into successively larger aggregates; and (3) that he can read with understanding the same body of terms when presented in printed form. The objective is to progressively increase the capability of the learner to translate the code we call "print" into terms which are already meaningful to him in oral form.

In ascending order of difficulty, the criteria necessary to establish a reading capability are:

1. The Speech Knowledge Criterion: The ability to understand verbal stimuli when transmitted to the ear.

2. The Discrimination Criterion: The ability to distinguish differences amongst the letter forms.

3. The Identification Criterion: The ability to assign the proper sound to the proper form and the ability to print the proper letter-form on hearing its particular sound.

4. The Compounding Criterion: The ability to write the correct letter sequences on hearing meaningless blended sounds such as tob, bot, kal, lak, etc.

5. The Visual Meaning Criterion: The ability to select out meaningful words from meaningless letter sequences when presented in the form of print and to assign the same meaning to these terms as when heard in the form of speech sounds.

Great care must be taken to establish the fourth criterion as there is always the danger of confusing the sound producing and/or spelling capability from reading. It is especially important to establish the ability to reverse the meaningless compound letter sequences on hearing blended sounds and that the learner can make blended sounds in different sequences (OM and MO) when the order of the printed forms is reversed.

This ability to reverse directions is vital and is developed at the compounding (4th) level. However, if the learner can only compound, as required by the fourth criterion, he is only able to correctly relate the blended sounds to the print. To establish that he can read he must also show that he knows the difference between printed words and printed meaningless sounds. If meaningless print is interpreted as if it reflects meaningful language or if meaningful words are interpreted as mere sounds, the learner fails to meet the fifth criterion. The reader must be able to differentiate between the meaningless and the meaningful. The aphasic reader often makes the proper sounds but fails to attach the correct meaning. He is therefore only meeting the fourth criterion and has failed to connect the printed letter sequences with the words he uses in speech. The reader must satisfy all five criteria and if he fixates at any one of the lower levels, he develops a specific problem which can be overcome by techniques outlined in a later section of this paper. The PC Reading Method is designed to systematically move the reader through each of the five criteria in turn and markedly reduces the number of reading problems in terms of the evidence now available.

## HISTORY OF THE PROGRESSIVE CHOICE READING METHOD

The Progressive Choice Reading Method was designed by the author in 1950 while he was a graduate student at Columbia University. Initial results with individual students were very encouraging and formed the basis for a paper titled "A Discrimination Method of Teaching Reading", written for Professor Fred S. Keller. The question raised at that time was whether the writer was obtaining success through unknown idiosyncratic factors, related to personality characteristics, or whether the method could be used with equal success by others. This question was answered when Bloomer, after reading the paper and observing the author, was also successful in employing the Progressive Choice Reading Method with several problem readers. Dr. Bloomer's account of the origin of the method[31] is substantially correct except for the fact that the writer's daughter was entering second grade after leaving a first grade class in which reading skills were not taught.

In a recent speech Dr. Bloomer gave this account of his initial participation in the Progressive Choice Reading Method:

> ...Some ten years ago, Dr. Myron Woolman, currently at the Human Resources Research Office in Washington, and I were both graduate students at Columbia. Dr. Woolman was experimenting with the building of complex discriminations in rats. About the time that some of his work was coming to fruition, his daughter, then in first grade, changed schools. In the old school, they had not taught reading. In the new school, reading had been taught to a considerable degree, and the child had the option of learning to read or going back to kindergarten. Dr. Woolman applied the principles that he had been using to teach rats, to reach his daughter. In two weeks she was reading at first grade level.

---

[31] R. H. Bloomer, An Approach to the Teaching of Reading. An Address to the Buffalo Invitational Conference on the Progressive Choice Reading Method. New York: State University College of Education at Geneseo, May 1961.

I'm sure that this kind of story is familiar to all of you, for to a similar story we owe the inception of the "word method". Such unusual circumstances, of course, have relatively little meaning in the history of ideas, unless they can be verified. Several parents in the school of Dr. Woolman's daughter heard about his accomplishment and asked him to teach their children. This he did on an experimental basis, and was successful. During this period Dr. Woolman and I had a number of discussions on the reading problem, and I decided to teach some children to determine whether or not this was an individual phenomonon. My efforts, similarly, met with some very real success, but, again, the fact that two graduate students, with a fair degree of training, can teach children to read, does not make a method.

We both taught children individually for three years. Then, about seven years ago, I began to teach courses in reading and saw the need for the conversion of the Progressive Choice method to classroom use. I, therefore, set about to build the necessary scaling techniques and to adapt the program to its present level of development. Since then several hundred children have been taught by the Progressive Choice technique in experimental classroom situations. It has been used with mentally retarded children and emotionally disturbed children, as well as with normal children in the classroom. The results to this point have been encouraging. Considering the fact that a good number of teachers are using it both in the classroom and in remedial reading situations, we are no longer concerned that this is a private method.

The present paper is an effort to describe a more fully systematic organization of the PC Reading Method than was originally used. In addition to factors such as phonetic consistency, maximal stimulus discriminability, progressive growth in size of the learning units, use of upper case letters, the organization of material into three reading cycles, and the emphasis on meaning which were previous-

Validational Progressive Choice Studies

Bloomer's experimentation is mainly responsible for building the body of evidence supporting the practical utility of the Progressive Choice Reading Method in the classroom. He taught the Progressive Choice Reading Method to his student teachers both at Wichita University and Geneseo State Teachers College, and developed the necessary support materials for these students: Manuals for teacher use in the classroom, a phonetically consistent word list, and indices relating similarity between letters and similarity between sounds.[32] In addition Dr. Bloomer ran a series of studies to compare the effectivenss of the Progressive Choice Reading Method with conventional methods, using first grade children as experimental and control subjects. He performed six studies in all and, in all cases, the children given the Progressive Choice method were superior at statistically significant levels to children taught by conventional methods.

Schools, teachers, test instruments and conditions differed in each study. However, subjects were, in each case, normal first grade children randomly assigned to classes. The experimental (Progressive Choice) teachers were recent graduates of Geneseo State University with limited classroom experience, who had recently been taught the Progressive Choice Reading Method by Professor Bloomer. They used the Progressive Choice manuals and materials he had developed, rather than reading materials used by the school. To insure natural use of the Progressive Choice Reading Method, there was no supervision at any time.

---

[32]George S. Haspiel and Richard H. Bloomer, "Maximum Auditory Perception (MAP) Word List," Journal of Speech and Hearing Disorders, XXVI, May, 1961, No. 2. Pp. 156-163.

The children were tested at the beginning of first grade and at its completion, using such tests as the Gates Reading Readiness Test, The Metropolitan Achievement Tests, and the Gates Primary Test.

Recently, Dr. Bloomer summarized the results from four of his studies in an article in the Reading Teacher[33] in which he also presented his interpretation of the principles underlying the Progressive Choice Reading Method. As this represents a summary, we quote from his procedures and results:

PROCEDURE

Population: The four experimental and six control classes were in three central schools in communities of 5,000 to 7,000 population. Pupils in two of the schools were randomly assigned classes; pupils in the third were alphabetically assigned.

Teachers in the experiment: The experimental teachers averaged 5.0 years of teaching and 12 graduate hours. The control teachers average 7.8 years of teaching and 14.3 graduate hours. To control the factor of differential motivation of teachers to succeed, one experimental teacher was randomly selected by the principal and the experimenter. The other three were volunteers. No significant difference appeared in final test scores of the experimental teachers.

Each control teacher was aware of the experiment and that comparative measurements would be made of her class at the year's end. Each taught with the program she had customarily used. No significant differences appeared in final test scores of the control teachers, indicating equivalent performance levels in control classes.

The method: Experimental teachers taught from a specially prepared, mimeographed workbook systematically presenting the Progressive Choice Method. Twenty-five workbook units were followed by a reader with twenty phonetically consistent stories. Each workbook unit presented a letter in isolation with its more frequent sound followed by words made of any previously learned letters and the unit letter. Words were combined into meaningful phrases; special exercises taught discrimination between the unit letters similar in shape or sound.

---

[33] R. H. Bloomer, Reading Methodology: "An Experimental Test of Some Alternative Organizational Principles," The Reading Teacher, January 1961.

When all letters and their most frequent sounds were learned the children began the phonetically consistent readers, readability controlled by word length, average time per day for teaching reading was approximately an hour and a half. On completion of method material, experimental teachers used a basal reader supplied by the school, which all children in the experimental groups finished by the year's end. Individual reading in supplemental readers followed the experimental course of study.

Control teachers used basal reader material they had used the previous year, which all but one followed closely. The other used an individualized reading approach where each child worked with a different book. The amount of time spent in reading was at the teacher's discretion; each control teacher reported spending considerable time with upper and middle groups in independent reading of supplemental readers.

Tests: Initially the Gates' Reading Readiness Test was given to experimental and control classes the last week in September. Final tests in June were Gates Primary Reading Tests for Word Recognition, Sentence Reading, and Paragraph Reading. All pupils who had not taken both initial and final tests were excluded from the study. Data were treated by analysis of co-variance.

## RESULTS

In no case was any mean of any control class superior to mean performance of any experimental class. Average superiority of the experimental group was 4.3 months in word recognition, 3.4 months in sentence reading, 2.9 months in paragraph reading, and in average reading, 3.4 months.

Reading readiness: Readiness scores for the two groups were not the same. The advantage was in favor of the experimental group, the difference significant beyond the .01 level. When readiness was held consistent by analysis of co-variance (in other words, when the experimental and control groups were made equal in readiness scores by a statistical procedure) the experimental group was superior to the control group in word recognition, sentence reading, and reading average. Difference between experimental and control groups in paragraph reading can be seen as a function of difference in readiness scores.

After the seventeen-week experimental program, the experimental pupils were grouped and given their basal reader materials. At this time the pupils were largely able to read independently; hence preparation time for each story was lessened considerably. Words which they could not figure out with their phonetic skills were necessarily taught by sight, and a small amount of time was spent on meanings of words not previously encountered.

The pupils completed the first year of their basal reading program, including pre-primer, and reader, in less than half the time normally required. The fastest children read and discussed all the stories in approximately four and one-half months. All experimental pupils had

completed all the basal reader material by final testing. Most read numbers of supplementary books as well. In essence, these children not only learned to read better, but covered material more efficiently.

More recently, Bloomer has made a summary table covering the six studies (N-561) which presents relative grade level on standard tests at the completion of first grade for Progressive Choice trained children and children trained by conventional methods (See Table I). Briefly, six percent of PC Children and 29% of control children had scores below 2.0. Forty-two per cent of PC trained children and 18 per cent of the controls scored above 3.0. As is evident in both the Progressive Choice and conventional reading methods, slightly more than 50% of the scores were at second grade level. Thus, as compared with conventional methods at the end of first grade: Bloomer's data shows that significantly fewer PC children failed to score at second grade level and that a significantly greater number number of PC trained children than Controls scored at third grade level. The mean achievement by grade level for all PC-trained children was 2.88.

TABLE I

SUMMARY OF SIX EXPERIMENTAL STUDIES

COMPARING PC AND CONVENTIONAL READING METHODS

Achievement Level of First Grade Pupils by Percent

| Teaching Method | Number of Classes | Number of Pupils | 1.0-1.9 | 2.0-2.9 | 3.0-3.9 | % |
|---|---|---|---|---|---|---|

Davy, in a recent study exploring the Progressive Choice Reading Method, obtained extremely encouraging results in teaching reading skills to mentally retarded children. The study is, however, subject to criticism on several grounds: (1) it lacked a control group; (2) Davy taught the class herself and was probably more motivated and knowledgeable than could be expected of the typical teacher; (3) the evaluations of student skills used a non-standard test. On the other hand, there are no standard tests developed for a mentally retarded population. Also, the difference in performance between initiation and conclusion of training provides a basic type of control similar to that used in the biological and physical sciences where measurable changes in the material under observation are customarily used as indices. With reference to the fact that Davy taught the classes, it is clear from her thesis and the writer's personal knowledge that she was handicapped by available teaching time and poor facilities.

The Davy study was conducted in active coordination with the writer. The criterion tests were designed to avoid spurious reading scores based on (1) guessing; (2) mock-reading skills where words are correct but correctness is based on relating words to particular pictures, cards, shapes, locations, facial expressions, etc. These tests were designed to insure that the children demonstrated that they understood the meanings of the words they read. The author was not present at the time of testing, but did assist in designing the procedures. From later discussion of the test administrations with Davy, it seems evident that these tests were executed with commendable care

and precision. The summary and conclusions from the Davy Study follow:

## SUMMARY AND CONCLUSIONS

An experimental reading program using Woolman's Progressive Choice Method was conducted for a two-year period in a school for trainable-retarded children. A total of thirteen children participated at some time in the program. Three children received two full years of instruction, seven children received one full year of instruction, and three children received a total each of only a few months instruction in reading.

The children were taught by the Progressive Choice Method, devised by Dr. Myron Woolman and adapted for retarded children by the writer. Principles of invariance and discrimination of letters and their sounds were the basis of the carefully controlled and structured program. The results of testing before and after long vacations showed that the children generally retained a large percentage of learned material. Children who participated in the program for one year progressed from a non-reading level and achieved ability to recognize and write most of the letters in the alphabet and to read the letters in a few simple words. In two years, three more mature children, aged eleven to thirteen, with minimum help, progressed from no functional reading to the level of reading stories such as "Little Bow," and "Clown Peter," which are considered appropriate for normal children at approximately second-third grade reading level.

There was evidence throughout the two-year period that the reading achievement of the children was useful to them. Some children began reading simple books independently, as well as reading signs and labels. Parents reported that children who were learning mainly letter sounds would pick out familiar letters from their environment and give the appropriate sound.

Apparently, it was possible to make the reading lessons meaningful and interesting, because there was only very rarely evidence of loss of interest during lessons. The children seemed able to concentrate on their work for periods of twenty to twenty-five minutes daily.

After reviewing the few available reports of reading methods and achievement of other trainable children, and observing several classes in reading where the sight-say method was used, the writer can say that she has seen no evidence of as great or as rapid achievement in reading as that produced with the Progressive Choice Method.

It appears that the results of this study give evidence that a Progressive Choice approach to the teaching of reading may be more efficient and effective in teaching severely retarded children than methods commonly used.[34]

---

[34]Davy, Ruth Ann, Adaptation of Progressive-Choice Method for Teaching Reading to Retarded Children. Washington: Institute of Educational Research, Inc., Reprint.

Although the Davy study offers no definitive proof that the Progressive Choice Reading Method will necessarily be effective in teaching mentally retarded children to read, it offers strong encouragement in this direction. Further evidence on this score should be obtained through a carefully controlled study being performed by the Institute of Educational Research under a three-year grant from the National Institute of Mental Health.[35] This study, titled "A Programmed Reading Method for the Mentally Handicapped" is now in its initial phase. It has been designed with control groups, the use of standard tests, and will have a minimum sample of 500 retarded children assigned to the Progressive Choice Reading Method. On its completion, a more complete statement as to the functional value of the Progressive Choice Method will be available.

## THE STRUCTURE OF THE PROGRESSIVE CHOICE READING METHOD

### The Training Objectives

Factors controlling the design of the Progressive Choice Reading Method were dictated by the following major objective:

> To produce meaningful reading skills under conditions which minimize learner confusion, while optimizing rate of acquisition.

Obviously, problems of personality, background, capacity and the classroom learning situation are important factors limiting rate of acquisition. Within these limits, the sub-objectives were:

1. To require that the learner establish his ability to comprehend meaningful terms and expressions.
2. To provide situations for the learner which facilitate his ability to discriminate between the letter forms.
3. To present material to the learner under conditions of optimal stability.
4. To hold the learner responsible for material in gradual increments.
    a. Mastery of the body of material being learned is required before adding a new increment.
    b. Evaluations of objective performance are made periodically to insure that the learner has fully integrated each new element. Special emphasis is given to evaluating the learner's ability to incorporate the new element into word situations in which he must select and print the best word for a meaningful context.

### The Three Reading Cycles

In the initial stages of learning, the Progressive Choice Reading Method makes use of an artificial phonetically consistent language structure as a device to simulate a phonetically consistent language such

as Latin or Spanish. At this stage, a given letter form always relates to a recognizably similar (not identical) sound. We have found that subtle shades of sound difference can be disregarded safely; the learner's problems increase sharply when there is a premature requirement that he relate several distinctive sounds to the same letter-form. When a learner is able to read at a phonetically consistent level meaningfully, he can rapidly convert to the requirement for sound and letter variation at a later stage in the program. Once the learner has achieved his basic reading skills, the number of sounds associated with the critical vowels is increased under controlled conditions. The Progressive Choice Reading Method therefore operates in three learning cycles:

Cycle I: Phonetically Consistent Element Cycle.

Cycle II: Phonetically Consistent Compound Cycle.

Cycle III: Variant Cycle.

Cycle I: The Phonetically Consistent Element Cycle is characterized by the following:

1. Each form (letter) has only a single invariant sound (O-ah).
2. The various letter forms are presented in terms of relative sound-shape dissimilarity; i.e., an angular form, such as "M," is followed by a circular form, such as "O."
3. The pool of letters is presented to the learner sequentially, that is, one by one.

Cycle II. The Phonetically Consistent Compound Cycle

Once the learner has established that he can meet the criteria

for all twenty-six elemental forms, he moves into Cycle II. Here again he moves through a rigorously controlled Porgressive Choice Presentation sequence. His objectives in this cycle are to meet all four reading capability criteria for the following:

1. Invariant compound vowels: Diphthongs and other combinations such as, "oa," "eigh."

2. Invariant consonant compounds: These include the combinations "th," "ch," "ph," "kn," etc.

3. The operator "e": The transformation of an internal short vowel into a long vowel through the use of a final "e."

4. The lower case mode: At the beginning of the second cycle the learner can read and print in upper case. The first segment of Cycle II he learns to print in lower case as well. In addition he learns to use upper case for proper nouns, to begin sentences, etc.

Cycle III. The Variant Cycle: In this cycle the learner is given various idiosyncratic forms of the elements and compounds covered in Cycles I and II. Again, he is phased through the material using a Progressive Choice sequence and is required to establish comprehension at each criterion level before proceeding.

1. The variant elements: The various sounds associated with each of the vowels are presented. Thus, he progresses through families of words in which the same vowel form has alternative sounds (map, potato, baggage; empty, racket; really, identify, etc.)

2. The variant compounds: These include diphthongs such as "ow," "ou," and "ough."

   a. The learner is ultimately required to establish comprehension by selecting and constructing the most meaningful word from various alternatives.

   b. He is required to print and pronounce words which include elements and compounds which vary in sound for the same letters and have the same sound for different letters.

c. He is required to write complete sentences, from dictation, which include both variant and invariant elements and compounds.

3. Naming letter forms: He is required to learn the alphabet as a sequence of names for the sounds he can already use. He demonstrates his capability by placing groups of words into alphabetical sequence, spelling words he can read by sequencing of alphabetical names of the letters.

Learner Response Requirements

Throughout the program, learner responses were organized in accordance with the following criteria:

1. Multisensory Involvement: Wherever possible the learning experience is required to involve as many senses as possible; the learner prints the forms because this involves touch, sound, kinaesthetic and visual sensory inputs.

2. Independent Meaningful Interpretation and Selection: Learners are required to demonstrate comprehension of speech forms, select and match visual forms and show that they understand that the meaning of printed terms is the same as the same terms in speech. The learner must show that he can ultimately perform every task without help or guidance.

3. Evaluation of Proficiency: Throughout the program, the learner must demonstrate that he can perform the work by independently responding to items which require that he color-trace, print letters, print terms, etc., so that his performance level is on record and can be quickly evaluated.

The Progressive Choice Program has two classes of response: (1) voiced and (2) printed responses. A voiced response requires that the learner produce independently the sounds associated with a letter form or letter form sequence; he must also indicate meaning when the letter sequence forms a meaningful word. A printed response requires that the learner respond to a voiced sound or sound pattern by printing the

the associated letters. The printed response also requires that the learner demonstrate understanding of the meaning of those sounds which make up words in common speech. Each learner in the Progressive Choice Program responds with great frequency. At any time, he is responsible for demonstrating mastery of all sounds and letter forms previously learned by voicing and/or printing and he must also show that he comprehends the meaning of sounds or printed terms which convey meaning.

The teacher evaluates student proficiency through those printed responses which require the learner to construct choices amongst alternatives. Emphasis is given to maximizing the number of learner responses made. From the outset the learner is required to form the shapes (print) which he is learning and to relate the printed shapes to appropriate sounds; he learns to print and to spell as he is learning to read. The teacher reacts to student responses (oral or written) by actively supporting those which are correct. Examples or models are used to overcome learner errors; the learner is told what to do (rather than what not to do). Standardized exercises are used to establish the adequacy of the learner's capability to discriminate, identify, compound and obtain meaning.[36]

Progress Based on Proficiency:

The learner moves from one Reading Segment to another. Each RS consists of two or three learning elements to be learned: In the

---

[36]Sample sets of materials are available through The Institute of Educational Research, Inc., 2226 Wisconsin Avenue, N. W., Washington 7, D. C.

First Segment these are the letter forms M, O and P; in the Second Segment the learning elements are S and T. The evaluation materials given require the learner to construct written responses which permit an objective evaluation of his proficiency.

Therefore, the learner progresses from one level to another by demonstrating on paper:

1. Mastery at the level he is learning;
2. Ability to integrate the new learning materials with what he has already learned.

In each Reading Segment of the PC Reading Program there are five successive learning levels for <u>each</u> learning element. These reflect the five criteria for learning previously described:

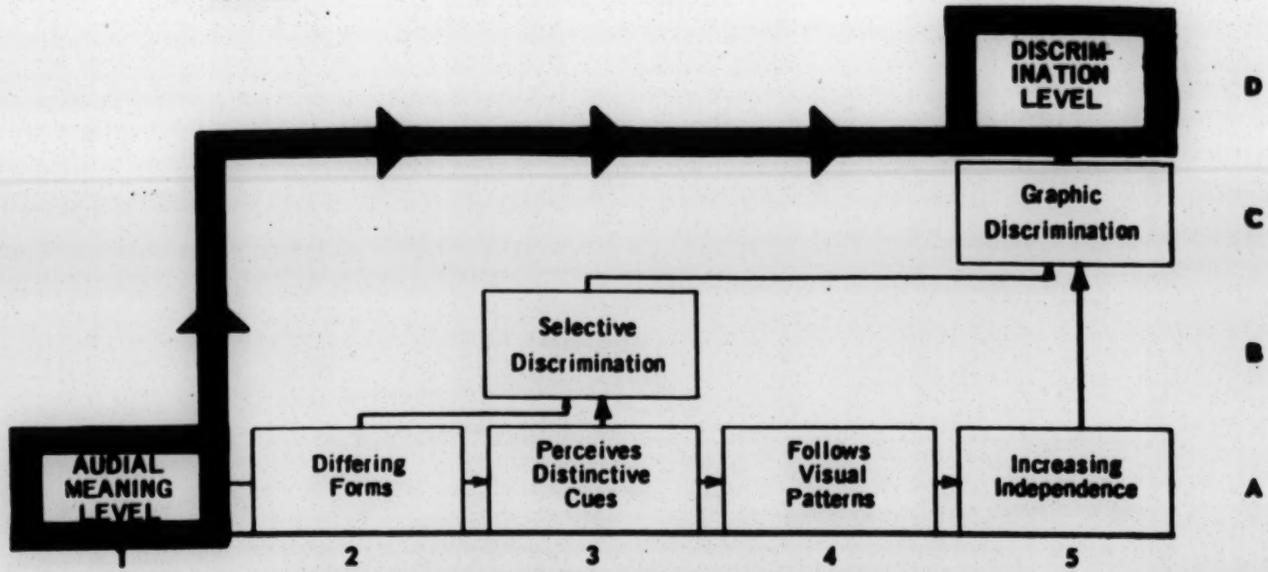
I. <u>The Audial Level</u> (Figure 1, Cell A-1): There the learner must demonstrate his ability to comprehend the words he will ultimately read in the Segment. He will be required to read the terms MOM, MOP, POM POM and POP. These are presented and he must show for example that he understands the word POP when used as (1) a synonym for father; (2) a sharp sound; (3) a carbonated drink in a bottle. Understanding is established through games, story telling, play activity, and various other devices including direct teacher questioning. See Figure 1 where the Audial Meaning requirement is shown as the lower left hand Cell A-1.

II. <u>The Discrimination Level (Figure 1 Cell D-5)</u>: At the Discrimination Level, the learner must prove that he is aware of the distinctive cues which differentiate one form from another. This is done, for example, by requiring the child to select from the forms "O" and "Q,"

Levels of Reading Development

Figure 1:

Graphic Illustration of the
Progressive Choice Reading Program
Cycle I



the one which has an extra line; from the forms "O" and "C," the one which has a piece missing, etc. This establishes the existence of discrimination between "O," "Q," and "C." The effort at this level is to fix the learner on the relevant distinctive feature of each letter, with particular emphasis on distinguishing between the letter being learned and similar forms (Cells A-2, A-3). When the learner has established, by making a sequence of correct choices, that he perceives the relevant differentiating feature of the new letter-form, he has completed the selective Discrimination Level (Cell B-3) for the new form. When he shows that he can print the form independently, he achieves the Graphic Discrimination Level (C-5).

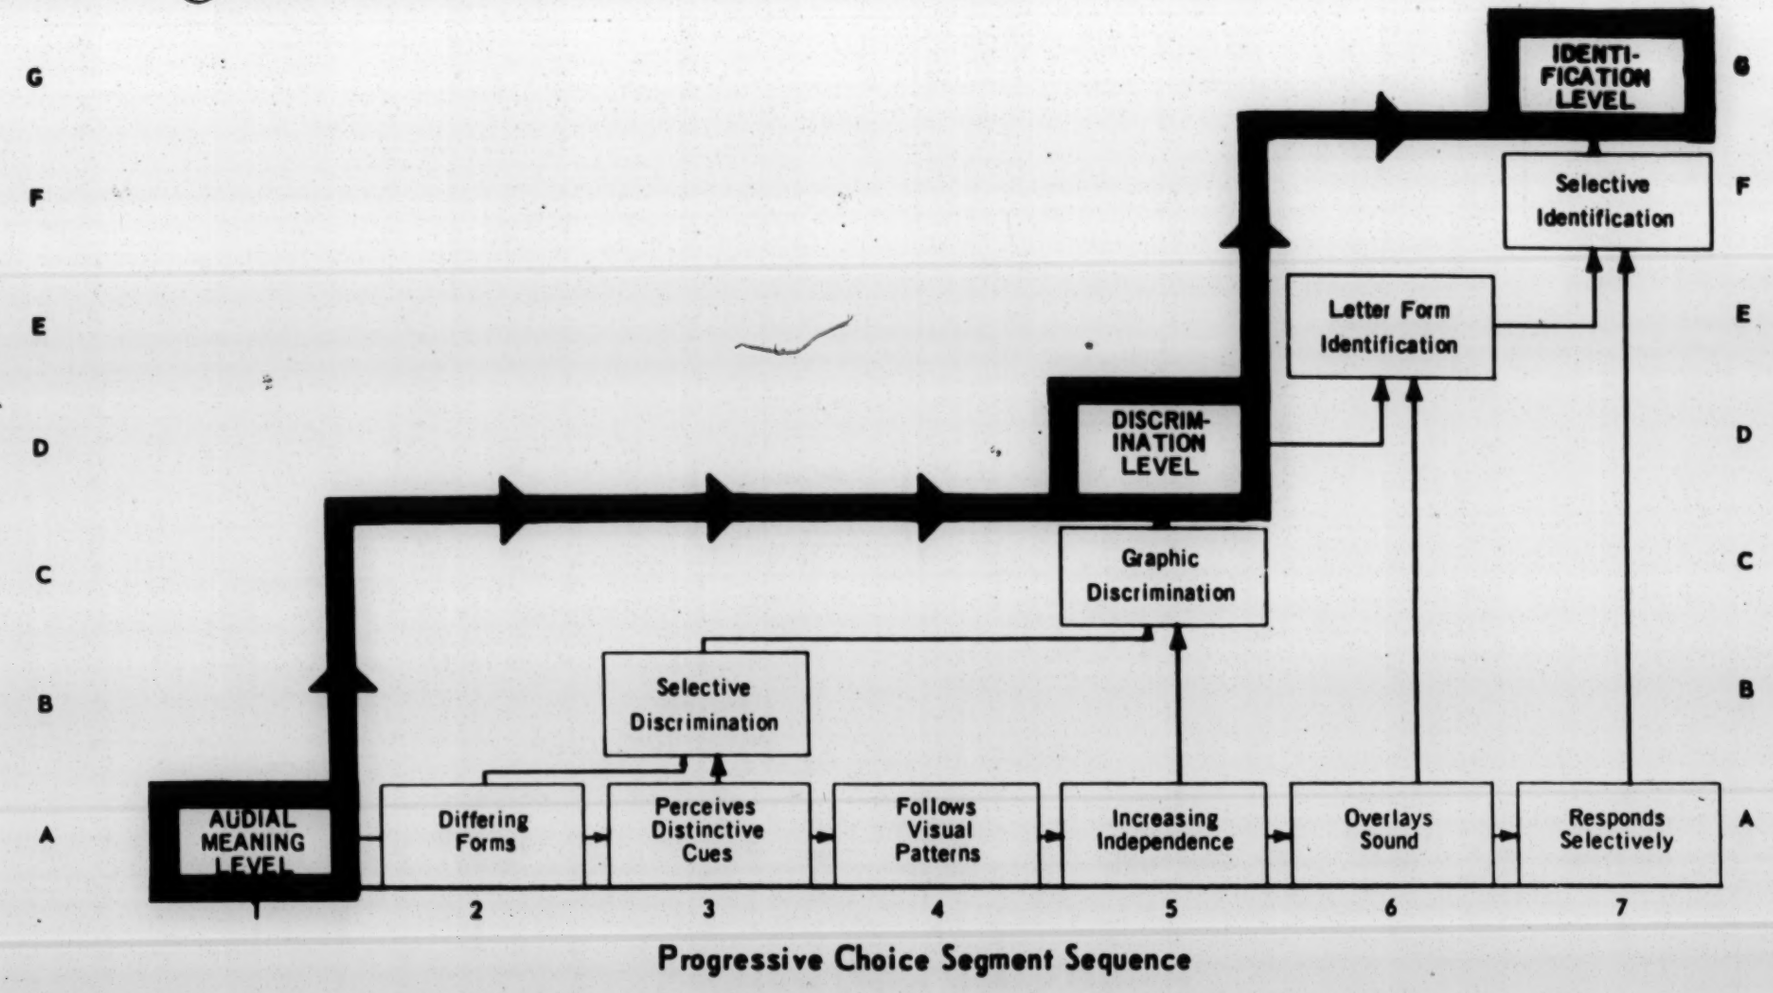
~~III~~. <u>The Identification Level (Figure 2, Level G-7)</u>: Discrimination requires the learner to tell the difference between objects and to print the form of the new letter. Identification makes the further requirement that he give the correct sound to the object (Figure 2, Cell E-6). We can discriminate between similar puppies by saying "This one is bigger" or "cuter." But when we name a specific chair and call it an armchair on the basis of distinctive characteristics, we identify it. Similarly, identification of a letter form requires the learner to discriminate it from other forms on the basis of shape differences which are sufficiently distinctive to provide the basis for morphological separation. In earlier work done by the writer, there is evidence that ease of identification is largely a matter of the discriminability of the objects being identified.[37] He must tell the O from the C and also supply

---

[37]Myron Woolman, "The Concept of the Program Lattice," The Institute of Educational Research, Inc., Washington. 1962

Figure 2:

Graphic Illustration of the
Progressive Choice Reading Program
Cycle I



the correct sound for each. The alphabetical name of a letter is also an identifier, but as mentioned earlier, the sound signalling characteristic of the letter is given primacy to reduce learning complexity in the initial stage.

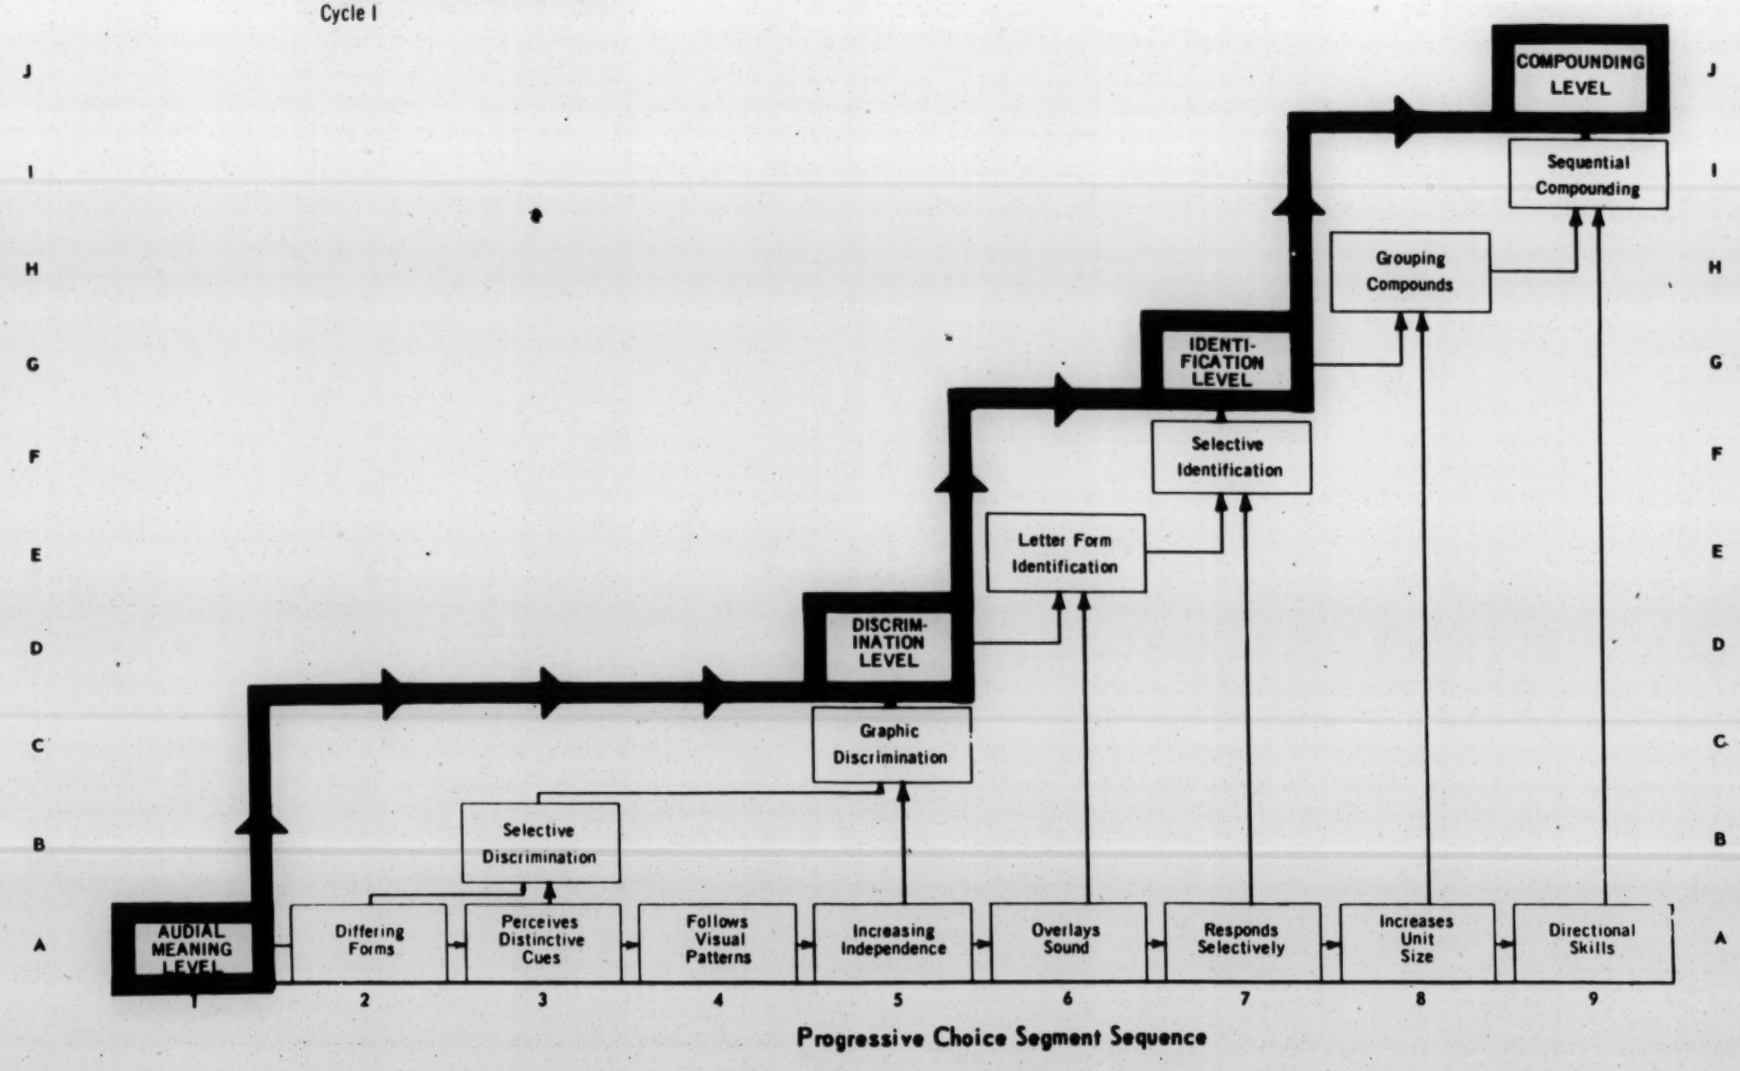
At the Identification Level, the learner must demonstrate that he can immediately produce the relevant sound for the new letter form (Cell E-6). He must then make correct choices amongst all letter forms covered to that point. For example, if he has already learned the three letter forms M, O, P, and is at the Identification Level on the fifth, "T", he must show that he can identify "T" correctly when presented with one or more of the previously learned forms; and can identify a succession of these forms in various combinations (including the new letter form) when presented successively or simultaneously (Cell F-7). He uses both modes of response (voiced and printed) and completes only when he prints and sounds a series correctly including the form he has just learned to identify. (Special training in sound discrimination is not given as learners are assumed to have already learned to discriminate sounds as a pre-requisite for speech).

IV. The Compounding Level (Figure 3, Level J-9): Once the learner has demonstrated that he can identify the letter forms correctly, he is required to: (1) produce properly blended sounds when faced with two or more forms and (2) print the appropriate letter forms in the proper sequence on hearing a blended sound. Thus, if the learner has already learned "M" and "O" with "P" being the letter form currently being programmed, he would be required to print "OP" on hearing the sound "OP" and "PO" on hearing the sound "PO". As he is learning the "P" form, the

Figure 2:

Figure 3:

Graphic Illustration of the
Progressive Choice Reading Program
Cycle I

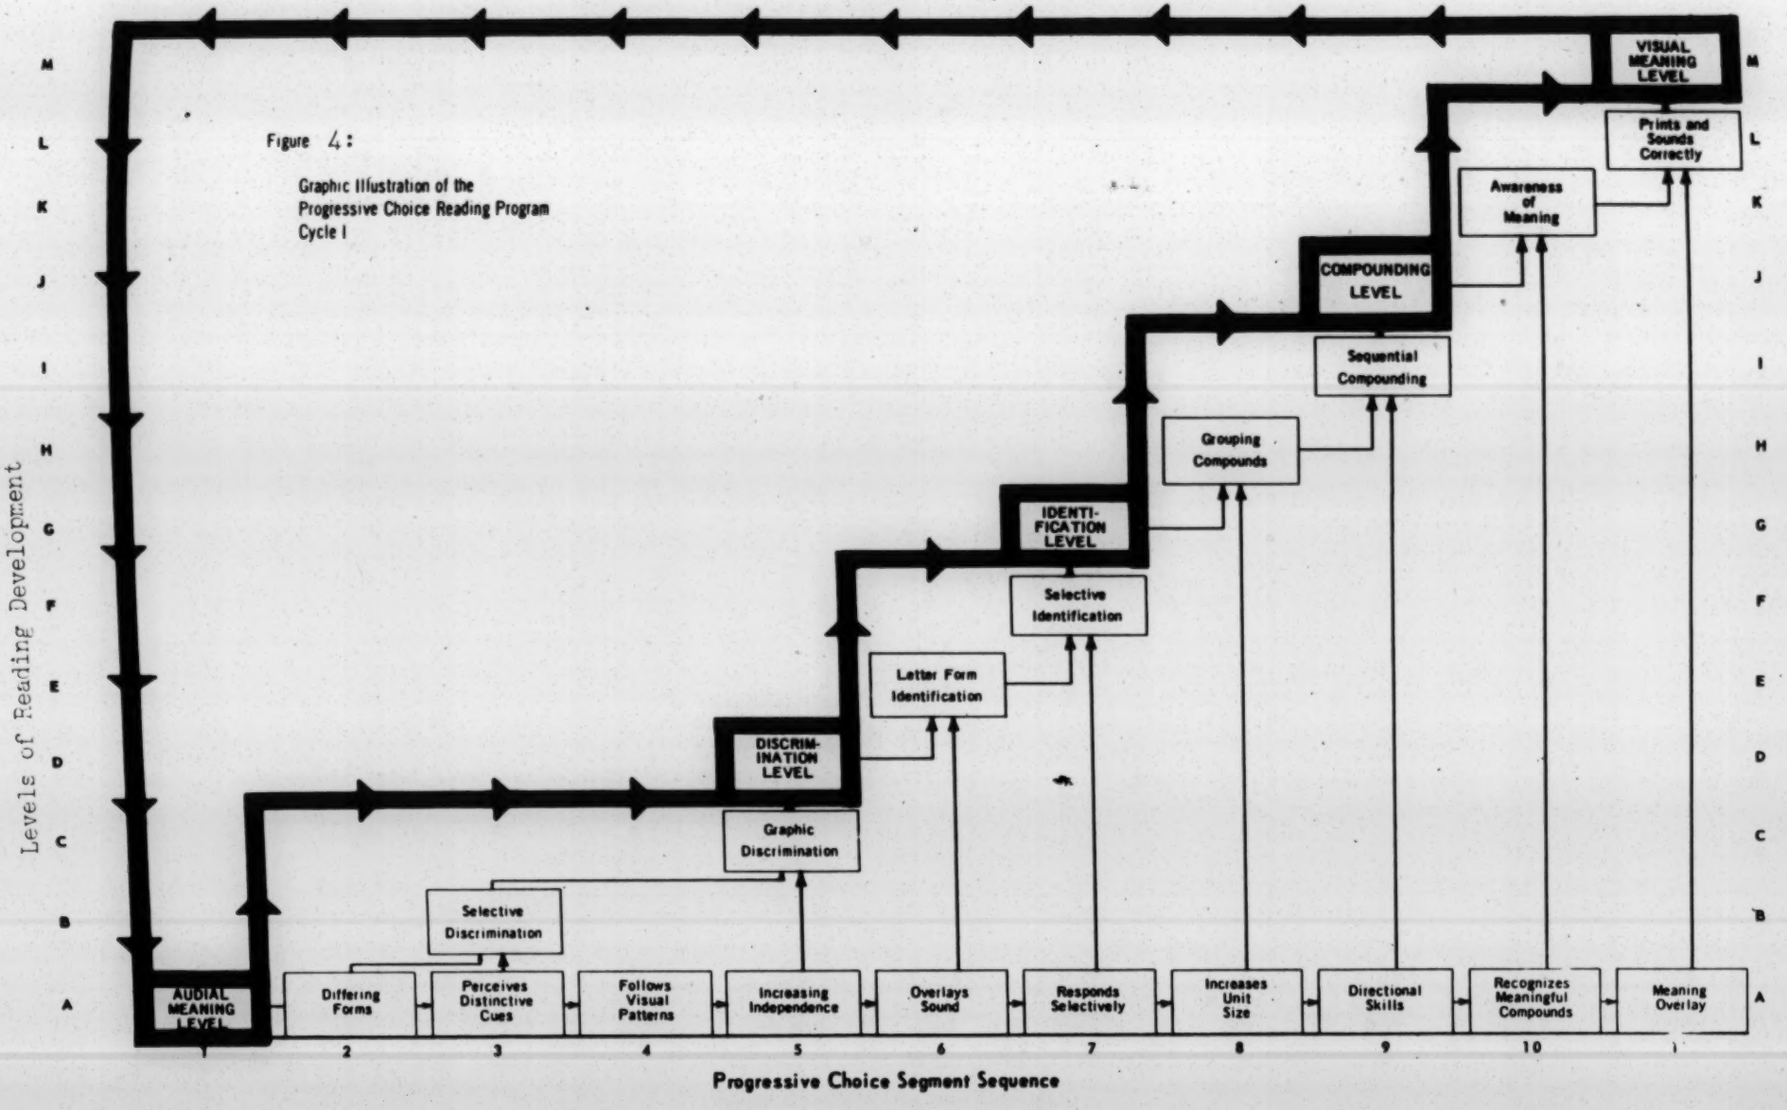


proportion of "OP" and "PO" compounds would be greater than the previously learned compounds (OM and MO). This proportionate advantage occurs throughout the program to provide greater practice for the new learning element (Figure 3, H-8). He must demonstrate that he can produce a correctly blended sound for each of the four meaningless compounds. He demonstrates that he can print the correct sequence of letters when the sound blend is varied for the same letters (Figure 3, Cell I-9). He continues to respond (by printing and sounding) until he demonstrates that he can make correct response choices repeatedly amongst the four alternatives in both response modes. The recorded (printed) response is decisive in establishing when he proceeds to the next higher level.

~~9~~. The Visual Meaning Level (Figure 4, M-11): Certain compounds of letters form the same sounds as words used in common speech. These printed words are used in newspapers, texts, and even primers. However, most compounds of letters result in meaningless sounds. For example, if the learner has mastered the M, O, P, and T letter forms, the compounds OMO, OPO, OTO, POM, OM, OP, etc., are meaningless. Whereas, MOM, POT, TOP, TOM, and POT are meaningful. One crucial aspect of the Progressive Choice Reading Program involves the requirement that the learner demonstrate that he can select and comprehend the meaningful terms when faced with a mixture of meaningless and meaningful terms (Figure 4, Cell K-10). He must, for instance, be able to select the word TOP from a group of compounds such as OP, MOT, TOP, OPO, etc.,

Figure 4:

Graphic Illustration of the
Progressive Choice Reading Program
Cycle I



and use it to complete a sentence or answer a question. For each of the words in the segment, the learner must show that he can obtain the same meanings from the printed form of the word (Figure 4, M-11) as from the speech form of the same word (Figure 4, A-1). When, in short, the same meanings are conveyed through visual stimulation as through audial stimulation, he is reading the word. Thus, if the learner knows TOP as a spinning toy and as the upper surface of an object when presented in speech, he must show that he can extract both meanings when presented in print. When this has been accomplished, the learner has completed "The Meaning Loop." (See heavy arrowed line from M-11 to A-1).

The PC Reading Method is largely devoted to the formation of Meaning Loops by moving from Audial Meaning to the Discrimination Level, to the Identification Level to the Compounding Level to the Visual Meaning Level. When the meaning equivalence between the first and last levels (A-1 and M-11) are clearly perceived, the Meaning Loop is formed.

The Meaning Loop words are fundamental to the program and form the basis for reading of Optional Words. Optional Words differ from Meaning Loop terms in that they are not presented at the Audial Level (Cell A-1) but appear in the Visual Meaning Level (M-11). Optional Words require the learner to generalize the letter-elements and compounds he has learned to words he has never seen. These Optional Words are normally quite simple and are of the same order of difficulty as the Meaning Loop words. In addition to the Optional Words, some

learners can generalize (if their existing vocabularies are extensive) to words such as carpenter, clarinet, disinfect, kindergarten even in Cycle I. Generalized words lack phonetic consistency and/or are polsyllabic. They do provide the more advanced learner with opportunities beyond those possible at the "looped" and "optional" levels. In Cycle I there are 212 words which can be used to form Meaning Loops with high phonetic consistency; there are 585 optional words which require little generalization from the looped words and 7471 terms which may be generalized.[38]

Looping Problems: At an early stage of the program, some children fail to see the relationship between the audial and visual patterns. The PC Reading Method provides a number of devices to fix the "loop"[39] For example, once compounds have been learned the teacher asks questions such as:

(1) "What is this for? Who uses it? When is it used?" etc., etc. If the learner still fails to perceive the meaningfulness of the compound "MOP," the teacher increases the amount of structure and asks other questions as:

(2) "What is used to clean a kitchen floor? What is made wet before cleaning a floor?" etc.

If the learner still fails to grasp the connection, the teacher moves back into the procedures used in the O-O (Audial Meaning) Cell (Figure 5) and asks questions which include the term, such as:

(3) "What is a mop used for? Who uses a mop? Why is a mop used?" etc. She then returns to the compound and asks the learner

---

[38] Thorndike-Barnhart Advanced Junior Dictionary. Garden City, N.Y.: Doubleday and Company, 1957.

[39] R. A. Davy, Closing the Meaning Loop Through Progressive Choice Structure. Institute of Educational Research, Inc., Washington, 1963.

questions similar to those shown in (1) and (2) above.

Only after exhausting these devices ( and others, such as shifting response mode), does the teacher actually provide the meaning of the term. It is vital that the learner himself obtain the critical insight; i.e., that some of the compounds he prints have the same meanings as the words he hears and speaks. To do this, he must obtain feedback from the original oral exercises and see their overlap when these terms again appear in printed form. Once he has succeeded in closing the "meaning loop" linking the spoken word to its printed equivalent, he usually proceeds without further difficulty.

A small but significant number of children have difficulty in closing the meaning loop. Great care must be taken to insure that the evaluation of reading proficiency is sufficiently sensitive to detect any learner who fails to differentiate between meaningful and meaningless terms. Therefore, before proceeding to the next letter, each learner is required to respond (by print) to insure mastery up to that point. The items at each level require the learner to demonstrate that he can make appropriate choices amongst alternatives. Successful completion of this check-out test has the additional advantage of providing a diagnostic tool for weak students in that it designates the level (s) at which a learner is weak.

Summary:

It may be useful to indicate the more important overlaps and differences between the Progressive Choice Reading Method and current-

ly popular phonetic techniques. The A and B Levels (Figure 5, Discrimination and Identification) focus on the form-sound relationship and, emphasis on sound and shape associations, is similar in objective to the approach. The Progressive Choice Method differs in: (1) the cumulative element by element organization, (2) the elimination of alphabetical names, (3) the emphasis on the development of a cumulative reading vocabulary, (4) the response made by the learner, (5) the constant requirement for the learner to select and construct the response (as opposed to rote learning).

The third and fourth levels (Compounding and Meaning) are comparable to the whole-word approach in their emphasis on the organization of phonic aggregates rather than phonic units. However, certain differences in approach are clearly evident:

1. Progressive Choice readers progress by steps to increase the size of reading units as opposed to the whole word method which requires readers to learn meaningful compounds as the fundamental reading unit at the outset of learning. This procedure should offer a learning advantage on the basis of recent experimental data.

   (a) Progressive Choice learners are required to perceive the internal letter elements to construct the compound pattern rather than the letter pattern itself as the crucial factor in recognition.

   (b) As a new letter-shape is learned, the number of meaningful compounds increases sharply. However, all but one letter of the new compound terms will have been used previously in forming meaningful terms.

2. Unlike whole word methods, the Progressive Choice reader must continually demonstrate that he can correctly select the proper meaningful term when faced with both meaningless and meaningful compounds, and demonstrate a high level of accuracy in using meaningful terms in context. However, he must construct <u>both</u> meaningless and meaningful compounds (words).

3. The Progressive Choice Reading Method makes a continuing requirement for the learner to demonstrate that he can perceive the equivalence between the visual and aural usage of the same meaningful term. As Brown points out, whole word approaches emphasize silent reading and offer no clearly defined method to insure that learners see these patterns as meaningful entities.[40]

Recapitulation of Figure 4:

Cell-A-1: This is the initial learning cell and indicates that the learner must demonstrate that he understands how to use certain words in an oral context. These programmatic words are crucial to the learning sequence as the learner must always demonstrate that he can understand these same terms when they are presented in print at a later point (Visual Meaning Cell) in the segment (Cell M-11).

Cell A-2: The learner must demonstrate that he can perceive differences in visually presented forms of different sorts including letters.

Cell B-3: The learner must demonstrate that he can recognize the distinctive cues which differentiate letters from each other. For example, he must be able to prove that he knows that the difference between "P" and "B" is determined by the lower loop on the "B". The objective of this cell is to force the learner to examine meticulously each form so that he focusses on differences rather than similarities.

---

[40]For a more detailed discussion of the lattice as a programming tool, see Chapter III, "Programming for Conceptual Understanding", A Self-Instructional Program in Basic Electricity, performed under contract to the Bell Telephone Laboratories by the writer (and available on request from the Communications Social Science Research Laboratory, BTL, Murray Hill, N. J.). Also, "An Exploratory Study of the Use of a Self-Instructional Program in Basic Electricity Instruction", by H. O. Holt, Bell Telephone Laboratories, Inc., and C. G. Valentine, Michigan Bell Telephone Company.

Cell C-5: When the learner is able to tell the difference between these similar forms on the basis of their distinctive elements, he attains the Level of Discrimination. The learner must then demonstrate that he can produce the distinctive form of the letter being learned without assistance.

Cell E-6: Each of the letter forms is assigned a sound. The learner must establish that he can label the new form with its relevant sound. At the outset of the program he learns one form-sound association at a time.

Cell G-7: When he demonstrates that he can correctly assign (1) the appropriate sound to the various letter forms he has learned and (2) print the correct letter form on hearing the different sound, he has attained the Identification Level.

Cell H-8: In this cell a number of letter elements are joined and the learner is required to blend the associated sounds. The goal is to have the learner respond vocally to several letters as a compound stimulus, and to make the blended sound as a compound response. Various combinations of letter elements are presented in this cell.

Cell J-9: When the learner establishes that he can make: (1) the correctly compounded sound for various letter groups and (2) print a correct sequence of letters for various compounded sounds, he has completed the requirements for this cell. Note that the learner compounds only letters he has learned to identify.

Cell K-10: A compound of a given set of letters may be meaningless or meaningful. Its meaning is a function of contingencies relating to occurence in the natural language. Thus the "P", "O", and "M" may be used to construct terms such as POP, POM POM, OMO, OPO, OMP, MOP and MOM. The third, fourth and fifth of these compounds are meaningless; these are presented to the learner also to provide practice in (1) blending sounds on seeing grouped letters, (2) printing letter sequences on hearing blended sounds, and (3) differentiating meaningful from meaningless terms.

Cell M-11: It is critical that the Progressive Choice learner perceive that, as he sounds certain compounds, he is forming words whose meaning he knows from common speech. Here he must demonstrate that he can differentiate between meaningful and meaningless compounds.

Further, he must select the most meaningful compound word which satisfies the given context of presentation. He shows this skill by (1) printing correct meaningful terms on hearing words, (2) selecting only the appropriate word(s) on seeing meaningless and meaningful compounds. The learner must connect the words used in Cell A-1 with those used in Cell M-11. In Cell A-1 he is only required to show understanding of a word. In Cell M-11, however, it is critical that he grasp the fact that the term he understood in speech also has a particular sequence of letters and, further, he must show that he can print the correct letter sequence when faced with many response options.

The Meaning Loop

The Progressive Choice learner is required to select and print meaningful words (Cell M-11); he must also show that he understands the equivalence of meaning in the aural and visual modes. This appreciation of equivalence is graphically indicated in the lattice by a line feeding from Cell M-11 back to Cell A-1. Note that the feeder lines from A-1 to M-11 form a second behavioral loop which describes the process by which the PC Reading Method to shift from the audial to the visual mode. A return feeder line may be visualized (from M-11 to A-1) to show that ultimately the learner augments his speech vocabulary. Thus, as reading skills develop, a reverse Meaning Loop is formed and the reader becomes independent of actual speech interactions for the extension of both his visual and audial meaning verbal pools.

## AN ILLUSTRATION OF THE PROGRESSIVE CHOICE METHOD IN THE CLASSROOM

The Progressive Choice Method lattice as used in the classroom is presented as Fig. 5 (p. 61). The pedagogical Progressive Choice Lattice, Fig. 5, is a graphic presentation of the first part of the first cycle as actually developed in the program.

Cell O-O (Audial Meaning): This cell illustrates the initial step of every segment of the Progressive Choice Reading Program (See Fig. 5). Cell O-O presents those words which the children ultimately learn to read in the first segment. As the teacher requires the children to read and print the words MOM, POP, MOP, and POM POM at the end of this segment, she initially ascertains that these words are understood when used in speech. This is done by obtaining responses to questions, voice completions, incomplete sentences, requirements for descriptions, names of pictures, games, etc. etc.

Cell A-1 (Learning Materials): A series of shapes are presented to the learner. These shapes contain various elements of the letter forms to be learned in the segment.[41] The shape "M" is included as it

---

[41]The letter forms may be readily categorized on the basis of shape. Letters such as "M", "N", and "K" are termed angular shapes; "O", "Q", and "C" are curvilinears; and letters such as "P", "B", and "R" are mixed shapes. The rule for presentation is that the successive letters will be dissimilar from each other to minimize stimulus generalization effects. This requirement is consistent with data obtained in many studies, including that of the author cited previously. This use of distinctively dissimilar forms appears to be especially valuable at the beginning of training, but seems to loose relative importance as training proceeds. The first three letters presented in the program are therefore M (angular ), O (curvilenear) and P (mixed). The rationale for the use of these particular letters was that their word combinations would provide strong, positive emotional overtones (MOM and POP) in addition to conforming to the dissimilarity principle.

is the first letter to be learned.

Cell B-1 (The Discrimination Level): The learners are required to show that they can tell the difference between shapes such as and , for example, by matching those with straight lines. In this cell emphasis is directed to focusing the learner on the significant "cues" which differentiate forms from each other. Their responses include independent printed production of the forms as well as evidence that the learners perceive the distinctive aspects. As they proceed, they respond to the letter form (in this instance "M") which they are to learn, and ultimately print it independently several times in recognizable form. Thus, at the Discrimination Level, the learner perceives various distinctive visual relationships in the form he is learning. He obtains kinaesthetic, tactile, and aural (pencil, paper, and sound pattern) inputs; and he demonstrates that he can print it in recognizable form. Ability to discriminate the structure of the letter form "M" is prerequisite to presentation of its "relevant" associated sound (mmh). See discussion of capping in Chapter II, "Programming for Conceptual Understanding", for an analoguous usage in the learning of conceptual materials.[42]

Identifying the Letter (Cells C-2, C-4, C-8): Now, the learner can discriminate the shape "M" from other shapes and print it on request. The Identification Level goal is to insure that the learner prints the form only on hearing the relevant sound "mmh", and makes the sound only on seeing the form "M". To accomplish this, the teacher informs the learner that the "M" shape always has the "mmh" sound (Cell C-2). She then requires the learner to print and sound the letter under various conditions. The students' printed responses are used to determine whether or not they have learned to identify the form. When

[42] Myron Woolman, Programming for Conceptual Understanding. A Self-Instructional Program in Basic Electricity. Report to the Communications Social Science Research Department of The Bell Telephone Laboratories. The Institute of Educational Research, Inc., 2226 Wisconsin Avenue, N. W., Washington 7, D. C.

the identification criterion is reached (several successive printed responses without error), the learner has completed Cell C-2

The first letter learned is the angular form M, the second is the curvilinear form O and the third is the mixed form P. These particular letters were selected because they not only conformed to the methodological requirements but could be combined to form MOM, POP, and MOP. These homey family terms were considered to provide (offer) a strong, positive emotional appeal by immediately providing a mother figure, a father figure and a familiar household object. Further, the learner obtains his first word when he can form the Meaning Loop for MOM which requires only two letters. When he adds the third letter he gets POP, MOP and even POM POM if the teacher wishes.

Cell B-3 (Discrimination of the Second Shape): When learners demonstrate that they identify the "M" shape correctly, discrimination training is begun on the "O" shape. The discrimination forms presented (Cell B-3) now include the "M" shape as well as the "O" shape; thus:  . Learners are required to discriminate the ovoid shape, "O", in much the same manner as they learned the "M" shape. When the "M" shape is presented, however, they are required to identify it as part of their review. The exercise continues until the criterion of repeated correct printed O and M responses is reached by the learner.

Cell C-4 (Identifying the "O" Shape): The students are informed that the "O" shape has the sound "ah" (Cell C-4), and are required to print the shape on hearing the sound, and make the sound on seeing the shape (as in identifying the "M" shape, Cell C-2). Once the criterion

has been reached in identifying the "O", both the "M" and "O" shapes are presented in random fashion. The learners are required to make the appropriate sound for each shape. Following presentation of the shapes, the two sounds are presented randomly, and the learner is required to immediately print the appropriate shape for each of the two sounds. Then the two sounds and shapes are presented in mixed fashion: The learners are required to shift response modes in accordance with the manner of presentation. When a learner has printed a number of successive correct responses under these conditions, he has reached the criterion for movement to the Compounding Level.

Cell D-5 (The Compounding Level): Once the learners can properly identify each of the two forms, they are required to make blended sounds when the paired forms ("OM" and "MO") are presented, and to pair the printed forms in proper sequence on hearing either of the two blended sounds ("o" and "mm").

In teaching to compound:

1. The teacher begins increasing the speed with which she prints the two shapes, and asks the learners to sound each as quickly as possible.
2. As her printing speed increases, she provides a model by blending the sounds into "o" and "mm," and requires the learners to sound them correctly as she reverses direction randomly.
3. When the learner has achieved a sounding capability, the process is reversed; the teacher sounds and requires the students to print. The learner must produce letter forms

which correctly reflect the direction of the sounds ("o" and "mm") the letter sequence is carefully noted to insure consistency with the sound pattern.

4. She now mixes the blended sounds and printed pairs, and requires the children to print on hearing the sounds, and make the blended sounds on seeing the letter pairs.

When the learner shifts response mode and makes a series of successive printed responses correctly, he has satisfied the criterion for compounding the first two letters "M and O" in the program.

Cell E-6 (Meaning Level): Once the learners can form the two-element compounds "OM" and "MO," in both response modes, the most critical aspect of the learning occurs. In this cell the teacher must insure:

1. That the learner appreciates the fact that the printed forms are equivalent to the sounded forms;
2. that MOM differs from "OM," "MO" and "OMO," in that it relates to a certain kind of human being; i.e., that it is an intra-family term for a woman who is a mother. Every effort must be made at this point to have the children themselves obtain the "loop" insight; the meaning is the same whether the term is heard or seen.

Procedure

1. The two shapes are printed to form the three element compound MOM.
2. The learners are asked to make the appropriate sound. Where

necessary, the teacher moves back into Cell D-5 and repeats the "OM" and "MO" compounding again, striving to obtain the blended meaningful term from the learners. (With some children, the generalization from the two-unit to the three-unit compound does not occur readily, and the teacher may be required to produce the sound herself.)

3. Once the three-unit sound has occurred, the teacher insures that each member of the class can produce the three-unit compound. The teacher then constructs a sentence, as in Cell O-O, and requires the learner to construct (by voice) the meaningful completion term (MOM). When he has voiced the proper fill-in term, he is required to complete several sentences by voice.

4. Once the learner has demonstrated that he can constructively complete a sentence by voice, he is required to print the MOM response as his constructed response. To insure that the learner is responding selectively, the teacher sounds OMO, OM and MO occasionally and checks to insure that the learner correctly prints these meaningless compounds and that he does not insert them into the sentences as his constructed response. When the criterion has been reached, the learner proceeds to the next letter.

   (a) If learners have difficulty in establishing the fact that the three- element compound "MOM" has meaning, various

cues are given:

(1) This is someone they know;

(2) She cooks food for the family;

(3) Some children call her mother, etc., etc.

5. Once the children are properly sounding and printing the term MOM only where it is relevant, they are informed that they have learned to read their first word.

6. Before the learner progresses to the third letter, "P," he must demonstrate mastery of the "O" and "M" combinations (OM, MO, OMO, MOM). He must sound each correctly and also show that he perceives MOM as a meaningful printed term. Finally, the various compounds are presented in both sensory modes and he correctly prints the required number of compounds.

Cells A-7 and B-7 (Discriminating the Third From): The learner sees an array of forms such as M P Y O Ø \ , etc. (Cell A-7.) His training proceeds in the following sequence:

1. He must demonstrate that he can properly identify the "O" and "M" shapes.

2. The "P" shape is designated as the new letter and he must specify how it differs from shapes such as:

3. The "M," "P," and "O" shapes are presented and the learner must print the "P" shape correctly four (4) times. (At this level it is still termed the "new letter.")

Cells A-8 and C-8 (Identification Level):

1. The "P" shape is shown and the "new sound" is revealed as "p" (Cell A-8).

2. The three shapes are presented in random fashion (probability equals .5 that the shape will be "P," and .25 that it will be "O" or "M").[43] The learners are required to make the appropriate sound for each presentation.
3. The three sounds are then presented randomly in the same proportions, and the learners are required to print the forms immediately following the emission of a sound.
4. Mixed sounds and shapes are presented (in the same proportions) to require shift in learner response modes. When four successive "P" responses are printed correctly, the learner has attained the Identification criterion and can proceed to the Compounding Level.

Cells A-9 and D-9 (The Compounding Level): Once the learners have demonstrated mastery of the three forms at the Identification Level, they proceed to compound them. The following steps are used:

1. The letters are printed quickly (Cell A-9 and the learners are required to blend the three sounds into "op," "po," "mo," and "om."
2. The four two-unit compound sounds are presented randomly, and the learners are required to print the two relevant forms in the correct sequence.

---

[43] Whenever a new shape is presented, its ratio is equal to the sum of all other shapes in the presentation sequence. As stated previously, this disproportion is done to provide greater practice on the new form.

3. The four compounds are presented in both the oral and visual modes (to require a shift in response mode).
4. When the learners correctly print the required number of successive responses correctly in the shifting response mode situation, they attain the criterion and move to the meaning level.

Cells A-10 and E-10 (The Meaning Level): In this cell, the learners are required to devlop three-unit compounds which are both meaningful (MOP, POP, POM-POM and MOM) and meaningless (OPO, OMP, OMO, etc.) They must indicate that they perceive the distinction between the meaningful and meaningless terms which they sound. Also they must demonstrate that they perceive the meaningfulness of terms in printed form by selecting the proper term to satisfy the context of a given sentence. The step by step procedure to accomplish these objectives follows:

1. The three shapes ("M," "O," and "P") are compounded into the term MOP and the learners are required to make the correct blended sound.
2. When the learners indicate that they perceive meaning in the blended sound ("mop"), they are required to draw a mop (to provide a concrete referent) and to describe its function.
3. The learners are then required to print the correct term to complete a sentence such as:

MOM cleans kitchen floors with a _____.

4. The learners now have two meaningful terms (MOM and MOP), and are required to print them selectively to complete such sentences as:

   a. A mop is used by _____.

   b. The dishes are washed by _____.

   c. If somebody spills milk, the floor is cleaned with a _____.

   d. Most kitchens are cleaned with a broom or a _____.

   e. Some children call their mothers _____.

   f. Kitchen floors are cleaned with a _____.

5. The term POP is next developed in similar fashion, and the learners are required to make both voiced and printed responses in the three choice (MOM, MOP and POP) situation, again using constructed sentences. The teacher checks printed responses to insure that the <u>most</u> meaningful term is used to satisfy the context of the given sentence (in responding with the word POP, which has three senses--father, soft drink and a sharp sound, as previously introduced in Cell O-O). The learner must make his voiced and printed responses provide the correct sense of the word.

6. When these three terms have been established, the children are required to construct the blended successive sounds POM POM, which is the fourth and final term of the segment.

   a. They may then be required to draw a hat decorated by pom poms and relate the drawings to the term orally.

b. They then establish that they can make a proper selection of the four terms, MOM, MOP, POP and POM POM in sentence-completion exercies, using both printed and sounded responses. In this connection, it should be remembered that 25 per cent of the responses will be correct by chance if the learner knows the word but not the meanings. It is critical, then, that the teacher insure that the learners not only print and sound their words correctly, but that they also are able to insert the words at those points where they are most meaningful.

The End of Segment Checkout Test: Before the learner can proceed to the next segment, he must establish that:

1. He can discriminate the three forms.
2. He can properly identify the sound associated with each form.
3. He can compound the forms into various combinations.
4. He can use meaningful terms to satisfy the specific context of given sentences.

A segment checkout test is given, using the printed response mode, with a sub-test devoted to each of the four levels. A learner must meet the criterion of several successive correct responses at each level. In the event that a learner fails the test, his responses are examined at each level to localize his area of difficulty. Those who pass will

progress to the next segment. Learners who fail must repeat the segment, with special emphasis given to those levels which were revealed to be weak in the diagnostic test.

## Figure 5: PEDAGOGICAL LATTICE FOR CYCLE I SEGMENT NO. 1

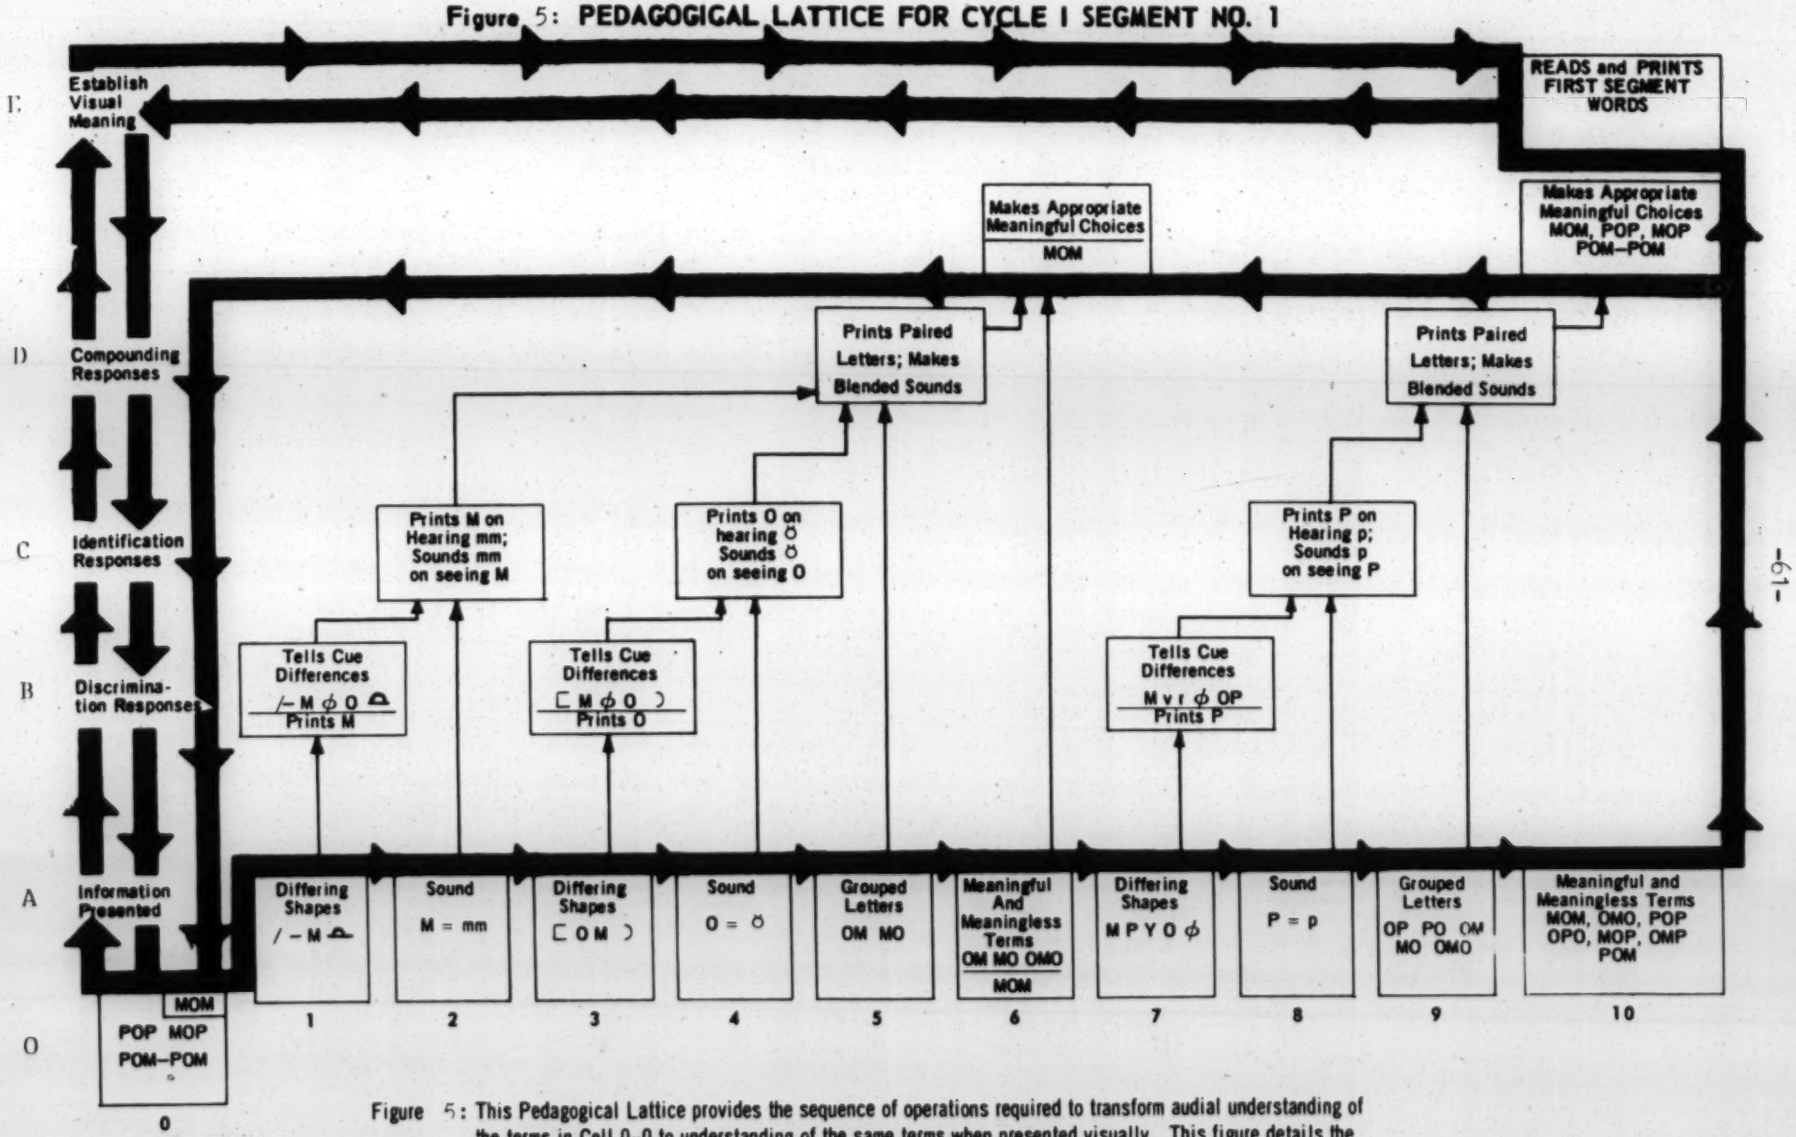

Figure 5: This Pedagogical Lattice provides the sequence of operations required to transform audial understanding of the terms in Cell 0–0 to understanding of the same terms when presented visually. This figure details the operations shown in Fig. 1 for the first segment of the Progressive Choice Reading Program.

## SUMMARY

The reading process is viewed as a system of decoding a set of visual forms used to represent speech. The dominating goal of the Progressive Choice Reading Method is to facilitate the development of those perceptual skills necessary to extract meaning from the printed page. The mechanisms which are used to obtain this objective are:

1. The organization of the body of reading material into graded levels of complexity, by means of three reading cycles:
   a. Cycle I: The learner is restricted to phonetically consistent letters.
   b. Cycle II: The learner is restricted to phonetically consistent compounds or letter groups.
   c. Cycle III: The learner is exposed to varying sounds for the same letters and varying letters for the same sound.

Within each cycle, the body of material to be learned is organized into segments consisting of two or three learning elements. The learner progresses through a series of controlled steps which are organized to permit him to shift his understanding of selected terms from spoken speech to the printed page. The steps are:

a. Audial Meaning Level: Words which the learner must

ultimately read in a given segment are used in spoken form and the learner must demonstrate understanding (context of usage) of each term.

b. Discrimination Level: The learner must show that he can discriminate the characteristic features of each new learning element among dissimilar and similar alternatives.

c. Identification Level: The learner must demonstrate that he can "label" (give the relevant sound for) each new learning element.

d. Compounding Level: The learner must demonstrate that he can blend sounds when shown printed letter compounds.

e. Visual Meaning Level: The learner must demonstrate (by printing and sounding completion terms in the relevant context) that he can use the aural and visual modes interchangeably for the same term.

Learning is cumulative and progressive. Each new learning element is used to form new letter combinations and words. Thus, the learner's meaningful vocabulary expands rapidly with each element and each segment. The learner must establish mastery of a given segment (and all combinations of words formed with elements in preceding segments) before proceeding to the next segment. This is accomplished through End-of-Segment Check-Out Tests which evaluate his level of mastery and also provide a diagnostic tool if the learner is experiencing difficulty.

The presentation to the learner is on an element-by-element basis. He is responsible for learning only one new item at a time. Several

additional techniques are employed to reduce the complexity of the learning task. These include:

1. Delaying learning of the alphabet until the names of the letters and their sequence can be used functionally for spelling, listing, and locating terms.
2. Delaying the presentation of lower case forms until upper case forms are correctly sounded and printed.

Thus, the learner maintains a one-to-one relationship between sounds and forms in the initial stages of learning, and is introduced to more complex relationships in stages after demonstrating his competency to read at a given level of complexity.

The Progressive Choice Reading Method has been tested repeatedly by Bloomer. Six experiments were conducted with normal first grade children as subjects. Available evidence is encouraging; subjects given the Progressive Choice Reading Method obtained higher test scores than subjects taught by conventional reading methods. This is doubly encouraging as Progressive Choice subjects were taught by relatively inexperienced teachers in the six Bloomer studies. Davy (1960) found that the Progressive Choice Method could be used to teach severely retarded children to read. A large scale experiment is now under way to make a more rigorous test of the value of the Progressive Choice Reading Method as a device for training retarded children.

# AFRICA—The Wonder and The Glory

"The Ancient civilisation of Egypt spread, as we know, from south to north and without venturing to accept or reject the assumption of some learned writers that it came originally by way of the Arabian Gulf from India, there is seemingly no doubt that the earliest seat of civilisation in Africa was the country watered by the upper Nile, which was known by the name of Ethiopia to the ancients. . . . The principal state of this Ethiopian country bore the well known name of Meroë. . . . The capital of Meroë was a city of the same name, which stood a little below the present Shendy, under 17° N. latitude and in 32° E. longitude.* . . . This is not the place nor am I competent to discuss the arguments which form the ground of belief that the civilisation of Meroë preceded that of Egypt. It is enough to say very briefly, that on the site of the city of Meroë there exist remains of temples and pyramids, from which archaeologists have drawn the conclusion that the pyramid was a form of architecture native to Meroë, and only afterwards brought to perfection in Egypt. It is evident from the decoration of the temples that they were dedicated to the worship of Ammon. It is believed that the remains of the temple of the most famous oracle of Jupiter Ammon are to be found in ruins at about eight hours' journey to the north-east of Shendy. This temple of the oracle was known to exist within a few hours of Meroë, and the priestly traditions of Ethiopia and Egypt assert that the worship of Ammon and Osiris, with its feasts and processions, was settled at the metropolis of Meroë. This remarkable spot is regarded by the ancients as the 'cradle of the arts and sciences, where hieroglyphic writing was discovered, and where temples and pyramids had already sprung up while Egypt still remained ignorant of their existence.' " . . .

"The carvings of the monuments of Meroë show a people in possession of the arts and luxuries of civilisation and having some knowledge of science. On the base of one of the monuments a zodiac has been found,

* Ethiopia did not mean Abyssinia only to the ancients, but included "British Egyptian Sudan" was synonymous with the Biblical Kush, and the capital of Meroë was approximately 100 miles further down the river (i.e. further north) than the site of Khartoum today.

and in the more northerly monuments of Nubia, which portray the conquest of Meroë by Rameses the Great of Egypt at a much later date, the conquered nation is shown as being not only rich, civilised and important, but also as possessing tributary states . . . whence came giraffes and other Central African products. We learn from these same monuments that the women of Meroë . . . . appeared to live on equal terms with men. They are constantly portrayed as queens. The Empire of Meroë had its settled constitution and laws. . . ."*

"The monuments though eloquent, are not the only grounds upon which this conclusion has been reached (the conclusion that the arts, sciences and religion descended from Nubia to the lower country of Egypt). The fame of the Ethiopians was widespread in ancient history. Herodotus describes them as 'the tallest, the most beautiful and long-lived of the human race,' and before Herodotus, Homer, in even more flattering language, described them as 'the most just of men; the favourites of the gods.' The annals of all the great nations in Asia Minor are full of them. The Mosaic records allude to them frequently; but while they are described as the most powerful, the most just and the most beautiful of the human race, they are constantly spoken of as black, and there seems to be no other conclusion to be drawn, than that at that remote period in history the leading race of the Western world was a black race."

The above quotations are from "A Tropical Dependency—An Outline of the Ancient History of the Western Sudan—with an Account of the Modern Settlement of Nigeria" by Lady Lugard (Flora L. Shaw). Since 1906 when "A Tropical Dependency" was published, although interrupted by one world war and now stopped by another, archeological research has given many more proofs of the very early date of civilization in Africa. Frobenius has found evidences as far south as the various provinces of the Union of South Africa and more particularly in Southern Rhodesia, but in the Sahara as well, of a civilization practically identical with that of the Magdalenian—glacial retreat,—period in Europe (roughly 10,000 B.C.) whose art preserved in the caves of southern France and northern Spain fills us with wonder and admiration. The African may have been contemporary, may have been even earlier, and may have been the source of the Southern European, for recent discoveries seem to indicate that the men who inhabited southern Europe before the last glacial period in lower Paleolithic times, retreated into Africa (roughly about 50,000 B.C.) when the glaciers made life in Europe impossible,

* These pyramids at Meroë are now considered by Reisner and some others to be of a later date than was thought by the authorities Lady Lugard quotes, but if not these special pyramids many other archeological discoveries prove the very early Nubian civilization.

for in the Sahara, where there was then sufficient moisture to make it a country of fertile prairies, flint instruments have been found which seem to indicate by the technique used in making them that they were made by the people whose civilization was that of the Chellean and Acheulean periods (the third inter-glacial period—roughly from 100,000 to 50,000 B.C.) of Europe. And later when the glacier began to retreat—about 25,000 B.C.—the people who had been living in northern, and in the Sahara region, of Africa during the glacial period—i.e. from about 50,000 B.C. to about 25,000 B.C. may have divided, some going north into Europe, some south into the more central and southern parts of Africa and only a comparative few remaining in the Atlas and Sahara regions, for as the glacier retreated the dryness began in the Sahara. But during those 25,000 years when all were in Africa (from 50,000 to 25,000 B.C.) it is possible that the art was born—the art common to peoples so widely separated geographically as those living in southern France and those living in Basouto Land. The only other explanation for this art, alike in technique and in subject and so separated in locale, is that the art developed in Europe in Aurignacian and Magdalenian times (25,000 to 10,000 B.C.) and that during that period there were emigrations from Europe into Africa, and that finally these emigrations became a veritable exodus, for in the next period in Europe—early Neolithic—the art is quite different and decidedly inferior, whereas the Aurignacian-Magdalenian type of art persisted in Africa until much later times and had a distinct influence on the proto-historic and historic art of Egypt, and has never really become extinct. Leo Frobenius (1873–1938) when he died in 1938 was called "The Father of Africanology." It is inexcusable (though perhaps significant) that his works have not been translated into English. He led eleven expeditions of archeological, anthropological, ethnological and sociological research into Africa, five being each two years in duration and the others a year or several months: the first in 1904 and the last in 1934; (and also one into southern India to examine Dravidian ruins, antedating the Aryan invasion of India, in order to compare the Indian ruins with those he had excavated at Zimbabwe in Mashona Land in Africa). He is the author of works on Africa published in more than fifty volumes. He was the founder of, and for years (until his death) the director of the African Institute at Frankfurt and of its museum where his wonderful collections are gathered. He never makes claims without numerous and substantiated proofs to back his claims. Ezra Pond says of him that he alone is a sufficient reason for learning to read German, and also that he has "given the Negro race its true charter of nobility and dug out of Africa tradition overlaid with tradition to set against the traditions of Europe and Asia". He has, besides, as Ezra Pond also says, "unusual perceptive aptitude" and I hope in these few

paragraphs, done into English, from the French version of his introduction to his "Civilisation Africaine," translations of a translation,—the fact that he writes delightfully will not be entirely hidden.

European navigators first reached the coasts of Negro Africa at the end of the Middle Ages. "When they arrived in the Gulf of Guinea and landed at Vaida the captains were greatly astonished to find streets well laid out, bordered on either side for several leagues with two rows of trees; for days they travelled through a country of magnificent fields, inhabited by men clad in richly coloured garments of their own weaving! Further south in the Kingdom of the Congo, a swarming crowd dressed in 'silk' and 'velvet', great States well-ordered, and down to the most minute details; powerful rulers; flourishing industries:—civilized to the marrow of their bones. And the condition of the countries on the eastern coast—Mozambique, for instance—was quite the same."

"The revelations of the navigators of the fifteenth to the seventeenth centuries give incontrovertible proofs that Negro Africa stretching south from the edge of the Saharan deserts was still in full flower—the full flower of harmonious and well-ordered civilizations. And this fine flowering the European conquistadors annihilated as far as they penetrated into the country. For the new country of America had need of slaves, and they were to be had in Africa: hundreds, thousands, whole cargoes of slaves. However the traffic in Negroes was never an affair of an entirely easy conscience. It demanded a justification, and so the Negro was made into a half-animal, an article of merchandize. And for this reason the notion of the fetich was invented, as the symbol of an African religion, (Portuguese—feticeiro). Mark of European manufacture! As for me I have not seen in any part whatsoever of Africa the natives worshiping fetiches."

"The idea of the 'barbarous Negro' is a European invention, which has, as a consequence, dominated Europe until the beginning of this century."*

"And what they told—those old captains, those chiefs of expeditions, the D'Elbées, the De Marchais, the Pigafettas, and all the others, what they told is true. It can be verified. In the old royal Kunstkammer of Dresden, in the Weydmann collection of Ulm, in many other European "curiosity cabinets" one still finds collections of objects from West Africa dating from that epoch: wonderful plush-velvets, of an extreme softness, made from the tenderest leaves of a certain banana tree; stuffs, soft and pliant, brilliant and delicate as silks, woven with well prepared raffia fibre, ceremonial javelins—their blades to the very points inlaid with the finest copper, bows so graceful, and ornamented so beautifully that they

* And, alas, still dominates the United States of America, in 1961, and more or less the majority of Anglo-Saxons everywhere. A. M. G.

would do honour to any museum of arms whatsoever; calabashes decorated with the most perfect taste; sculptures in ivory and wood, the workmanship of which reveals skill and style."

"And all this came from the countries of the African periphery, delivered up from then on to slave merchants, and in which the visitor of today finds only shoddy European trash. . . ."

"But when the pioneers of the last century pierced this zone of 'European Civilization' and the protecting wall, which for a time was raised behind it, the wall protecting the Negroes still 'intact,' they found everywhere these same marvels which the captains had found in the sixteenth century on the coasts."

"In 1906 when I penetrated into the territory of Kassaï-Sankuru, I found still there villages in which the principal streets were bordered, on each side, and for leagues, with four rows of palm trees; in which the huts, each ornamented in a charming fashion were as much works of art (as those described by the sixteenth century captains); no man who did not carry sumptuous arms of iron or copper, with inlaid blades, with handles covered with serpent skin. Each cup, each pipe, each spoon was an object of art quite worthy of being compared with the creations of the European Roman style. But all that was only the down particularly tender and shining which adorns a wonderful and ripe fruit: the gestures, the manners, the moral canon of the entire people, from the little child to the old man—although they remained within absolutely natural limits, were imprinted with dignity and grace, in the families of the princes and the rich as in those of the vassals and slaves. I do not know any people in the North who can be compared with these primitives in the unity of their civilization."

"Alas, these last 'Isles of the Blest', these also were submerged by the tidal wave of European civilization. And the peaceful beauty was swept away by the floods."

"And many have had this experience. The explorers who left the savage and martial plateaux of the East, of the South, and of the North, to descend into the valleys of the Congo, of Lake Victoria, of the Oubangui, men such as Speek and Grant, Livingstone, Cameron, Stanley, Schweinfurth, Junker, de Brazza, all of them made the same discoveries: they left countries dominated by the rigid laws of the African Ares and then penetrated into countries where peace reigned, joy in adornment and in beauty, countries of old civilizations, civilizations of ancient styles, of harmonious styles."

"And was it otherwise in the great Sudan? By no means. In the last century the legend still persisted which attributed to Islam the origin of all higher civilization. We have learnt much since then and we know

that the beautiful "tob" and the other garments of the Sudanese people were already in use in Africa before Mohammed was born, before a cultivated Arab could have penetrated into the centre of Africa; we know also that the particular organization of the State, in the states of the Sudan existed long before Islam, that the arts of field culture, and of good-breeding—which showed reflection—that the bourgeois orders and systems of corporation of Negro Africa, are thousands of years older than those of Europe. . . ."

"The Sudan, then also possessed an autochthonous civilization ancient and glowing. It is a fact that exploration has found in Africa only old and yet vigorous and fresh civilizations, everywhere where the preponderance of the Arabs, Hamitic blood or European civilization has not rubbed off from the wings of the black butterflies the down of their wings formerly so beautiful. *Everywhere*." Translated from "Histoire de la Civilisation Africaine" de Léo Frobenius, traduit de l'allemand par Dr. H. Back et D. Ermont 1933.

---

The age in which we live is, as we know, generally called "The Iron Age", because our civilization, so dependent on the machine and becoming more mechanized every day, would be impossible without the knowledge of iron and its derivative—steel. And even if our machines should become increasingly aluminum, or the equivalent of metals should be chemically evolved from peanuts or the air, the foundation of all that we have accomplished, or will accomplish, materially, would still have been built on the smelting of iron. And unprejudiced anthropologists and archeologists now believe that it was the African Negro who first smelted iron.

The following three quotations are taken from "Black Folk Then and Now" of W. E. B. DuBois.

"Boas says: 'It seems likely that at a time when the European was still satisfied with rude stone tools, the African had invented or adopted the art of smelting iron. Consider for a moment what this invention has meant for the advance of the human race. As long as the hammer, knife, saw, drill, the spade, and the hoe had to be chipped out of stone, or had to be made of shell or hard wood, effective industrial work was not impossible, but difficult. A great progress was made when copper found in large nuggets was hammered into tools and later on shaped by melting; and when bronze was introduced; but the true advancement of industrial life did not begin until the hard iron was discovered. It seems not unlikely

that the people who made the marvelous discovery of reducing iron ores by smelting were the African Negroes. Neither ancient Europe, nor ancient western Asia, nor ancient China knew iron; and everything points to its introduction from Africa. At the time of the great African discoveries toward the end of the past century, the trade of the blacksmiths was found all over Africa, from north to south and from east to west. With his simple bellows and a charcoal fire he reduced the ore that is found in many parts of the continent and forged implements of great usefulness and beauty.'"*

Torday says the same: "I feel convinced by certain arguments that seem to prove to my satisfaction that we are indebted to the Negro for the very key stone of our modern civilization, and that we owe to him the discovery of iron. That iron could be discovered by accident in Africa seems beyond doubt; if this is so in other parts of the world I am not competent to say. I will only remind you that Schweinfurth and Petherick record the fact that in the northern part of East Africa smelting furnaces are worked without artificial air currents; and on the other hand, Stuhlmann and Kollmann found near Victoria Nyanza that the natives simply mixed powered ore with charcoal and by introduction of air currents obtained the metal. These simple processes make it clear that iron could have been discovered in East or Central Africa. No bronze implements† have ever been discovered in Black Africa; had the (Black) Africans received iron from the Egyptians, bronze would have preceded this metal and all traces of it would not have disappeared. Black Africa was for a long time an exporter of iron, and even in the twelfth century exports to India and Java are recorded by (El) Idrisi."‡

Chamberlain says in "The Contribution of the Negro" (Journal of Race Development, April 1911): "The question of the origin of iron smelting is now being treated in detail by ethnologists, and while general agreement has not been reached, the mass of evidence so far disclosed

* Franz Boas, Professor of Anthropology, Columbia University, New York, in "Atlanta University Leaflet, No. 19."

† By "no bronze implements" Torday means, of course, no "implements" of bronze replacing the "implements" of stone for domestic use, the chase and war. In other words in Negro Africa the use of iron immediately followed the use of stone in the making of these "implements":—there was no "bronze age." Bronze, however, was used in the making of figures for ritual or ornamental purposes as soon as any of these were made, so bronze was not unknown. But it was never used in the making of "implements." Why should it have been when iron was already known and was more suitable, because harder?

‡ E. Torday—Member of the Council of the Royal Anthropological Institute of Great Britain. Corresponding Fellow of the Anthropological Society of Vienna, Author of "On the Trail of the Bushongo" etc. The above quotation from Journal of the Royal Anthropological Institute Vol. XLIII.

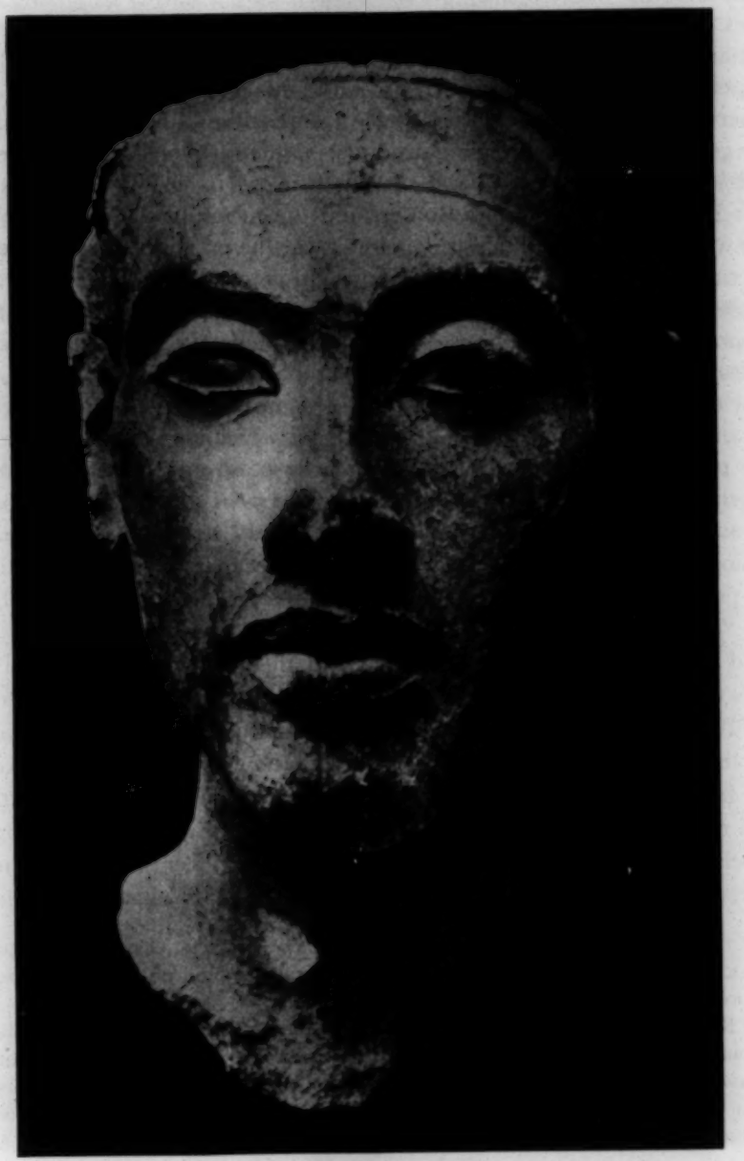
has convinced eminent men of science like Boas and Von Luschan that the smelting of iron was first discovered by the African Negroes, from whom, by way of Egypt and Asia Minor this art made its way into Europe and the rest of the Old World."

In 1938 when Leo Frobenius died "The Manchester Guardian" published a long account of his explorations and his deductions from his discoveries. It says: "Frobenius brought forward arguments to prove that the iron industry flourished in the interior of Africa before 3500 B.C., or 2500 years before the use of iron was known in Europe." (I cannot vouch for Frobenius's having given just those dates, for I have not seen that statement under his signature, and it is not quite safe to trust any newspaper's account of anything without verification; but at any rate Frobenius believed that iron was known in Africa long before it was known in Europe or western Asia.)

If Boas, Von Luschan, Torday and Frobenius are "convinced," the question may be considered settled; as far as any scientific question is ever settled, which, of course, no scientific question ever is. One cannot state categorically even that one will *never* find iron implements lying close to other implements showing neolithic stone polishing in some corner of the Antarctic continent in a strata lower than any yet examined by geologists; but humanly, and even scientifically, speaking this is more than improbable; so if we cannot state categorically that humanity owes its knowledge of the use of iron to the Black races of Africa, we can say that it is more than probable that this is true, and that there is no such probability in connection with any other people. There is such an evident hysterical parti-pris in the contentions of those scientists (?) who do not wish the Negroes to have this honour that their arguments may be disregarded. As may also the arguments of the scientists (?) who are anti-Semitic in regard to the contribution of the Jews and the arguments of the scientists (?) who are anti-German in regard to the contribution of the Germans.

---

We know that several of the Egyptian dynasties were mulatto, and that one, at any rate, was Negro, Amenophis—or Amenhotep—III (1411–1375 B.C.) was evidently what, south of Mason and Dixon, would be called a "colored man", and his chief queen—Tiy—must have had much more Negro blood than her husband. Indeed, judging from her portrait bust in the Berlin Gallery (about which more will be said later), she may have been very nearly pure Nubian. Amenophis—or Amenhotep—IV (1375–1358 B.C.), who later took the name Akhnaton, or Akhenaton,



BUST OF AKHNATON FOUND AT TEL EL AMARNA
Now in the Museum at Berlin

though less Negroid than his mother was more of a mulatto type than his father, and the portrait busts of his daughters show them all to be beautiful probable quadroons, though perhaps octaroons. And this Mulatto Pharaoh —Akhnaton—was not only the most interesting Pharaoh in all the long lines of the many dynasties; but he was, in many ways, one of the most remarkable human beings who ever lived. Weigall* says of him: "He was a personality of surprising vigour and amazing originality, and one deserving of careful study. In an age of superstition, and in a land where the grossest polytheism reigned supreme, Akhnaton evolved a monotheistic religion second only to Christianity itself in purity of tone. He was the first human being to rightly understand the meaning of divinity. When the world reverberated with the noise of war, he preached the first known doctrine of peace, when the glory of martial pomp swelled the hearts of his subjects, he deliberately turned his back on heroics. He was the first man to preach simplicity, honesty, frankness and sincerity, and he preached it from a throne. He was the first Pharaoh to be a humanitarian, the first man in whose heart there was no trace of barbarism. He has given us an example, three thousand years ago, which might be followed at the present day: an example of what a husband and father should be, of what an honest man should do, of what a poet should feel, of what a preacher should teach, of what an artist should strive for . . . of what a philosopher should think. Like other great teachers he sacrificed all to his principles and thus his life plainly shows—alas!—the impracticability" (?) "of his doctrines; yet there can be no question that his ideals will hold good 'till the swan turns black and the crow turns white, till the hills rise up to travel, and the deeps rush into the rivers." I have quoted in full Weigall's conclusions concerning Akhnaton's remarkable character for that Weigall—Weigall an imperialist to the very marrow of his bones, the friend and appointee of Lord Cromer (one of the most unscrupulous and ruthless imperialists who ever lived, who bled Egypt white), Weigall, a believer in militarism even an admirer of Kitchener, (one of the most brutal and most sullied of all military men)† that Weigall should have

* "Life and Times of Akhnaton" by Arthur Weigall, Inspector General of Antiquities for the Egyptian Government, Member of the Catalogue Staff of the Cairo Museum. Revised edition 1923.

† Kitchener's warfare against the Dervishes—the followers of the Mahdi in the Sudan—was so brutal, that even the British Tories were revolted. His own brother-in-law said to him: "Well, if you do not bring down a curse on the British Empire for what you have been doing there is no truth in Christianity." His desecration of the Mahdi's tomb even Winston Churchill called a "foul deed." And when Kitchener found that even the promoters of the inexcusable war could not swallow this last, he tried to put the blame of the desecration onto Gordon's nephew by making absolutely false accusations. See "My Diaries," Vol. I, Wilfred Scawen Blunt.

given, in spite of himself as it were, this glowing tribute to Akhnaton means more than if it had come from a Quaker or a Gandhist.

This Mulatto Pharaoh long before the Hebrews worshiped one God only, before the Hebrews existed as a people, insisted that there was but one God, that he must be worshiped with no image, that the rays of the sun might be his emblem; but that he was not the sun. He called this one God—*Aton*—a name already familiar as one of the titles of Ra, the sun-god of Heliopolis. But Akhnaton conceived of Aton as being far more than the sun. He was: "Aton—the Heat behind the Sun" and finally simply "The Effulgence—which is Aton". And to Aton must be sacrificed no animals, for Aton loved even the little chick within the shell; and the worship of Aton demanded no retinue of priests, and no darkness. There were many temples to Him in Akhnaton's city, but not walled, the altar being in the open court and in the full sun-light and the offerings were incense and perfumes and flowers and songs of praise. One hymn to Aton—one of the many composed by Akhnaton—is so very like the 104th Psalm, that the only explanation seems to be that the Hebrew, and later, version was derived from Akhnaton's.

"The world is in darkness like the dead,
Men sleep in their chambers . . .
Every lion cometh forth from his den
Serpents sting
Darkness reigns
The world is in silence
. . .

Bright is the earth when Thou risest in the horizon . . .
The darkness is banished . . .
Then in all the world they do their work
All cattle rest upon the herbage;
All trees and plants flourish;
The birds flutter in their marshes
Their wings uplifted in adoration to Thee.
All the sheep dance upon their feet,
All winged things fly
They live when Thou hast shone upon them . . .

When the chicken criest in the egg-shell
Thou givest him breath therein, to preserve him alive
When thou hast perfected him
That he may pierce the egg.
He cometh forth from the egg
To chirp with all his might
. . .

How manifold are all Thy Works!
They are hidden from before us,

Oh Thou sole God, whose powers no other possesseth
Thou didst create the earth according to Thy desire,
While Thou wast alone:
Men, all cattle large and small,
All that are upon the earth
That go about upon their feet;
All that are on high
That fly with their wings.
The countries of Syria and Nubia
The land of Egypt;
Thou settest every man in his place
Everyone has his possessions,
And his days are reckoned."*

All mankind, and all nature owed everything to the Goodness of Aton. But Aton was not anthropomorphic. Aton was Goodness, Aton was Love and Aton was Truth; so those worshiping Truth and serving a king who worshiped Truth must represent things as they really were. And this meant a revolution in Art. A tendency towards greater realism had begun in his father's reign, but to Akhnaton Truth in art was a part of his religion. Plants, animals and mankind he loved and evidently lovingly observed, and his artists were inspired to do the same. One of his artists definitely states: "the King taught me." Bartholomew de Ligt in writing of him in "La Paix Créatrice" says: "There is seen in the delicate poetry of this man a love for all that lives which recalls Pythagoras and Saint Francis. However his (Akhnaton's) conception of the world is more harmonious, more monist, wider and freer. Rarely has a man succeeded in identifying himself so intensely with the love of the sun for the earth." And the flowers and animals he loved were painted on the walls and ceilings and floors. Portions of the pavement of his palace are still to be seen with the paintings as he walked on them: "a young calf, frisking in the sunlight gallops through a field of red poppies; wild geese rise from the marshes and beat their way through the reeds, disturbing the butterflies, sinuous fish are seen to wander amidst the lotus-flowers resting on the rippling water."

"The winding tangled stems and leaves of vines were carefully studied; the rapid motions of animals correctly caught." "Sculpture in the round as well as in relief reached a pitch of excellence never before known." A portrait statue of Akhnaton now in the Louvre "is the work of one who may rank with Donatello", and the portrait bust of Akhnaton's Queen Nefertiti at present in the Berlin Gallery is one of the most beautiful and life-like portraits ever executed by any artist of any age. No earlier king had allowed an artist to represent him in any poses which did not

* These are only thirty-seven lines of the one hundred and thirty-three lines in Breasted's translation, quoted by Arthur Weigall in "The Life and Times of Akhnaton."

indicate divinity or at any rate the majesty of power, "but out of his love for truth and reality Akhnaton dispensed with this convention, and encouraged the regarding of himself as a mortal man," and so we know him as he really was. Even when illness came, death was approaching and he was nearly spent, the drawn look in his face, his thinness, his drooping shoulders, some swelling in his abdomen and thighs all were shown. And because of this insistence on realism in art we know his family life, which seems to have been singularly beautiful and happy. The oath he pronounced at the foundation ceremony of his city was: ". . . as my heart is happy in the Queen and her children". He seems to have been an absolute monogamist, and he had every excuse not to be, for no Pharaoh before him had ever been without at least two wives, and Akhnaton's queen gave him seven daughters and no sons. He spoke of her always as "Mistress of the King's happiness", as one "at hearing of whose voice the King rejoices". "Even on the most ceremonious occasions the queen sat beside her husband and held his hand, while their children frolicked around them. . . . It is seldom that the Pharaoh is represented in the reliefs without his family, and in opposition to all tradition the queen is shown upon the same scale of size and importance as that of her husband. In one of the frescoes Akhnaton and his queen are making a public appearance "to receive the tribute of Syria and Ethiopia and of the west and the east." The king and queen are shown seated in the gold covered state palanquin side by side; "and although Akhnaton holds the insignia of royalty and is evidently very much on his dignity, the queen's arm has found its way around his waist and there lovingly rests for all the world to see." In a later scene of the same series of frescoes "the king and queen in a gorgeous little pavilion sit on a double throne, their feet supported upon hassocks. The queen sits upon Akhnaton's left, and in the picture her figure is hidden by that of her husband, but her right arm is seen to encircle his waist and her left hand to hold his left hand . . . the little princesses cluster round the throne, one of them holding a young gazelle in her arms, while another stroked its head." In still another fresco the king, queen and the queen dowager (Akhnaton's mother) are all shown drinking from delicate bowls . . . there are three flower-decked tables piled high with fruit. From these the little princesses . . . help themselves liberally; and the small Ankhsenpaaton stands upon the footstool of her mother's chair, holding on to her skirts with one hand, while with the other she crams a plum or some similar fruit into her mouth. We also see Akhnaton as "he drives in a chariot with his wife and his eldest daughter Merytaton; and although the spirited horses would appear to be difficult to manage, the more so because the mischievous Merytaton is poking them with a stick, Akhnaton is a sufficiently good driver to be able to

BUSTS OF TWO OF AKHNATON'S DAUGHTERS FOUND AT TEL EL AMARNA
Now in Berlin

carry on a conversation with the queen, and to address a few words to Mahu who runs by the side of the chariot." Then as he becomes more feeble in a later fresco, "the king is seen leaning back upon the cushions of an arm chair, as though tired out and sick at heart. In the fingers of his left hand he idly dandles a few flowers, while with his right hand he languidly holds out a delicate bowl that the wine in it may be replenished. This is done by the queen, who is standing before him all solicitous for his comfort. She pours the wine from a vessel, causing it to pass through a strainer before passing into the bowl. Three little princesses stand near by; one of them laden with bouquets of flowers, another holding out some sweetmeat upon a dish, and a third talking to her father."

"It is strange to picture this lofty-minded preacher in his home, with his six little girls around him, as he is shown upon the monuments. No other Pharaoh thus portrayed himself surrounded by his family; but Akhnaton seems to have never been happy unless all his children were with him and his wife was by his side. A little statuette, now in Berlin, shows the king seated upon his throne, and nursing one of his little daughters upon his knees. He is in the act of kissing her, and their lips are in contact—an intimate attitude which is all the more amazing when one remembers the usual severity and restraint shown in Egyptian statuary of other periods. The charm of family life, and the sanctity of the relationship of husband and wife, parents and children, seems to have been an important point of doctrine to him."

But besides having time to give to his family, besides being himself a great poet, and a patron of the arts equal to the Medici, besides attending to the details of building a great city, besides very evidently spending hours in meditation, and in observation of the works of nature while conceiving and evolving and shaping his religion. (He once said: "Ye ask who are those that draw us to the kingdom, if the kingdom is in heaven? The fowls of the air, and all the beasts that are upon the earth, and the fishes in the sea, these are they which draw you, and the kindgom is within you.") Besides spending measureless times in preaching his religion and in trying to get his people to adopt it, he was an emperor and he had to have time to attend to the details of administering a great and fabulously rich empire. His father had been called "The Magnificent" and the life of his father and mother had been not unlike that of a king and queen of the Arabian Nights. In the twelfth year of his own reign the tribute from the conquered principalities reached an amount it had never reached before. He did not shirk any task connected with his imperial duties unless he felt that it was contrary to his religious principles, and when he found that he might neglect those administrative duties, if too engrossed in the details of spreading his religion, he appointed a high

ORVILLE BRIGHTFUL, A MEMBER OF THE CLASS OF 1943, ROBERT MOTON HIGH SCHOOL, WESTMINSTER, MARYLAND

priest to help him in the latter. But soon the two did clash. His religion necessitated pacifism—non-violence, and also the belief in the equality of peoples. In his hymn quoted above he speaks of Syria and Nubia, as if he thought they had a value equal to the value of Egypt in the sight of Aton. He could not send soldiers to hold any province in subjection. When Syria began to rebel, and the Egyptians holding "posts" in the conquered towns (like the British holding "posts" in India and Egypt until recently) and the "Native Princes", whose power to bleed their people was due to Egyptian support, began demanding Egyptian armies to keep the status quo, Akhnaton refused to send the armies. In one letter to one of the princes he makes it very plain that he had the power if he had wished to use it. But he could not slaughter his human brothers and lay waste their lands and at the same time be true to Aton. The letters from the Egyptian officials in Syria and the "native princes" are now in the museum at Cairo and translations have been published. When the demands were repeated and repeated and became very insistent, Akhnaton stopped sending replies. He had already given his answer. Syria was "lost". And it was from Syria that a great part of the tribute had come. It is even said that probably the Egyptian court faced bankruptcy. But even bankruptcy had no terrors which could make him use violence to exact the tribute. It is hardly possible that he did not see that the poverty of his court would mean the disaffection of many of his former adherents, and he knew the officers of the army were chafing and biding their time. The affection he personally inspired, however, was so great, that as long as he lived he probably received loving attention, and somehow, when he died gold was found to cover his coffin as the coffin of every Pharaoh was covered. But the last year of his life must have been a very sad one. He knew that there was really no one who could carry on his work. He chose a successor to whom he married his eldest daughter, and his third daughter (the second had died) was betrothed to, and afterwards married Tutankhaton (afterwards Tutankhamon). Yet he knew the weakness of his sons-in-law—the younger only a boy—and he knew that he had not converted his people. He knew that the priests of Ammon, whose power he had defied and broken, hated him, and that the priests of all the many gods whose shrines he had defaced also hated him, and that all the priests would curse him when they had the power, and that they would unite in bringing back the old religion of supersition and fear, he knew that the army would soon be led by the military class into neighboring lands, in order to hold "natives" in subjection and to extort tribute. He knew all this and he must have known that he was ill and dying, as the bas-reliefs and frescoes show he was; but he never compromised the least tiny bit.

One of the doctors who examined his skull after it was found in 1907, 3215 years after his death, said that Akhnaton may have had some form of epilepsy, which if true may have meant that he had "trances" with hallucinations. But if he had some form of the "falling sickness", it was probably not more serious than that which Julius Caesar had, and we do not know that he had it at all. He had such a passion for truthful representation that it is not likely that he would not have had some indication of these "trances" or "trance-like" states represented in one of the bas-reliefs, if they had been frequent or of any duration. He died when he was just thirty. The main inscription on a Pharraoh's tomb is usually completed some time before his death, and under his own supervision. Under the feet of Akhnaton's coffin was a little piece of gold foil the inscription on which was evidently written later than those on other parts of the coffin. It was certainly written by Akhnaton himself and probably just before he died, with the request that it be his epitaph. It reads:

> "I breathe the sweet breath which comes forth from Thy mouth. I behold Thy beauty every day. It is my desire that I may hear Thy sweet voice, even the north wind, that my limbs may be rejuvenated with life through love of Thee. Give me Thy hands holding Thy spirit, that I may receive it and live by it. Call Thou upon my name unto eternity, and it shall never fail."

If this man were living today in the United States south of the Potomac he would have to ride in a "Jim Crow" car. If he lived in Texas, Mississippi, Alabama or Georgia he would probably be lynched, for he married a woman presumably white.

It would be altogether ludicrous, if it were not responsible for such suffering and such injustice—that panicky fear of losing prestige which makes the majority of Englishmen (and Scotchmen) and Anglo-Saxon American shy off from giving the world any proofs of the outstanding superiority of a man or woman who has any Negro blood, even if the man was gathered to his fathers over three thousand years ago. And if the superiority cannot be hidden, the Negro blood must be hidden. The wonderful genius, and beautiful character of Akhnaton could not be hidden; but the British and Americans who have written of him seem to have made every effort to hide his very evident Negro blood. Weigall who is British has written a remarkably appreciative biography. It is true that as an imperialist he seems to think that it would have been much better for Syria to continue to send such fabulous amounts of tribute that she must have been bled as white as Egypt is today, and that it would have been much better for Syria to continue to support occupying Egyptian armies and functionaries than to be free, and since

he—seemingly—has such ideas it is not strange that he cannot quite appreciate Akhnaton's refusal to use violence in order to hold in subjection, it is not strange that he has great sympathy for the Egyptian "colonial officials" in Syria and for puppet "native princes" subservient to Egypt, but, as he shows, in his above quoted tribute, he recognizes all the wonder and beauty of Akhnaton's mind and spirit. Never once, though, does he mention Negro blood.

Did Akhnaton, then really have Negro blood? His father may have had no more than probably all Egyptians had—and have. (Herodotus spoke of the Egyptians as being "black and curly-haired", the Sphinx has Negroid features and excavations of the tombs of the nobles of this dynasty—the XVIIIth—reveal that one sixth, at least, of the higher class was Negro.) Akhnaton's mother, however was more pronouncedly Nubian than the average Egyptian. Engberg of the Chicago Oriental Institute says that she was of "obscure origin." But Weigall proves her parentage, at any rate, to be anything but obscure. She was married to Amenophis III a year after his becoming Pharaoh, when she was about eleven and he about thirteen "with ceremony and feasting," and though for state reasons, Amenophis later married also a Syrian princess, the Syrian consort seems to have been ignored, and it was Tiy, his first queen, who was always the "Great Queen", and who received honours no Egyptian Queen-consort had ever received before. Amenophis III reigned for thirty six years—but for the last four years of his reign Tiy was regent—and also regent for the first three years of her son's reign. Her father was a priest of the god Min, but both he and her mother, Tuau, held high positions at the court of Thutmosis IV, the father of Amenophis III. Weigall thinks, judging from the importance of their position, also from the fact that their daughter was the "Great Queen", and the fact that they were allowed to have a tomb in the Valley of the Tombs of the Kings, that one or the other was—and perhaps both were—of royal blood. He thinks that Yuaa may have been of some Syrian royal house—a relative, perhaps of Amenophis III's mother who was a Syrian princess, and that Tuau was perhaps a granddaughter of Thutmosis III. He says that he thinks the mummy of Yuaa shows some evidences of being Syrian and that Tuau's mummy appears Egyptian. But he acknowledges that his conjectures concerning the origins of Yuaa and Tuau are only conjectures. Could not one or the other have been of royal Nubian blood? There must have been in one or the other, probably in both, a good deal of Negro blood, or their daughter, Queen Tiy, could not have had features so markedly Negroid. The statuette found by Professor Petrie in Sinai, Weigall acknowledges to be Queen Tiy. The other portrait bust, now in the Berlin Gallery, in 1936 at any rate—thirteen years after Weigall's

biography was written—was still labeled "Queen Tiy, the mother of Akhnaton". Weigall, however thinks,—or thought in 1923—that this bust was not a portrait of Queen Tiy. But his reason for not accepting the Berlin archeologist's label does not seem a very good one, and certainly his suggestion that it might be a portrait of Akhnaton's eldest daughter, who became queen as the wife of Akhnaton's successor, was a most remarkable idea, and one which he must have known was impossible. The reason he gives for thinking it is not a portrait of Tiy is that it does not look like her other portraits. But it is not remarkable that a realistic portrait of anyone after middle age should not be like a portrait of the same person in earlier years, at a period when realism was not dominant in art. The statue is the portrait of a queen of Egypt, and was made, as Weigall acknowledges, during the period when Akhnaton's ideas of art were still observed. Akhnaton's eldest daughter, Merytaton was only about twelve when her father died and she became queen. By the time she could have become as old as the subject of this portrait is represented as being:—a woman of probably over fifty—Merytaton had long been replaced by first her sister, and then by the queens of two still later pharaohs, indeed she had probably been long dead; her father's name was being erased from all inscriptions, his name cursed and his canons of art discarded. It is therefore quite impossible that the portrait should have been one of Merytaton at fifty. There were only four queens of Egypt during the time when Akhnaton's ideas of art were en rigeur:—his mother, his wife, his eldest daughter Merytaton and his third daughter who became queen as the wife of Tutankhaton (Tutankhamon). If it is impossible that it should have been Merytaton it is still more impossible that is should have been her younger sister; and that it is not a portrait of Akhnaton's wife Nefertiti—of whom there are so many realistic portraits with which to compare it, it is hardly necessary to say. There is no one but Queen Tiy of whom it could be a portrait. And that the son of the subject of this portrait had Negro blood in his veins can hardly be gainsaid. Besides the portrait found by Petrie in Sinai, which Weigall does acknowledge is one of Tiy, is also Negroid.* In her youth Tiy was probably like Solomon's

* William L. Hansberry in "Sources for the Study of Ethiopian History" says of the "Great Stele" (the Stele of Amonrenas, discovered at Meroë in the winter of 1913–1914; now in the British Museum, where it has been carefully studied by Drs. Sayce and Griffith):—"Their tentative findings are that this monumental inscription was erected some time in the last quarter of the first century B.C., and that its major theme is a native version of the Romano-Ethiopian War of 24–22 B.C." (of which Strabo, Pliny and Dion Cassius give the Roman version). And Hansberry goes on to say: ". . . the inscription here under consideration also provides the modern historian with materials which are of pivotal importance in the study of the ancient history of both Ethiopia and Egypt. Though there was little documentary evidence available which definitely

Shulamite "black, but very comely" and evidently was a woman of very great charm, spiritual vision, ability and a strong will. She seems to have accompanied her husband in his visits to other parts of his empire, and according to Budge† they spent a great deal of time in Nubia, where Amenophis III built a temple to Ammon, but in which he himself was worshiped as a god, and another by it in which Tiy was worshiped as a goddess. In Thebes, their capital, they lived in a palace as magnificent as Versailles, where Tiy was always the "Great Queen", though not until twenty three years after their marriage did she bear her husband a son (daughters aplenty, but no son). It is supposed that perhaps after appealing in vain to Ammon and to other gods, she may have dedicated to Ra-Aton the son for whom she prayed, if Ra-Aton would graciously answer her prayers; for though the little boy was given his father's name of Amenophis (or Amenhotep) it seems to have been very definitely his mother who first gave him his love for Aton—the Sungod. (Her own pleasure boat on the lake in the palace gardens was called "Aton Gleams". If Akhnaton did not receive from Queen Tiy the full inspiration which enabled him to conceive his religion of the one God—the Effulgence which is Aton,—at any rate he received the initial impulse from her—his Negroid, if not Negro mother.

This may seem an altogether disproportionate number of pages to give to a man dead over three thousand years ago. But it is not unlikely that the fate of humanity hangs on man's attitude towards race. Unless barriers separating and segregating groups of humanity are broken, the brotherhood of man is impossible and democracy is impossible and I am sure that my not ungentle, readers cannot fail to feel humble before this man who was a mulatto.

But there were not only mulatto dynasties in Egypt there were also Negro dynasties. Centuries before Akhnaton's (the XVIIIth) there had

confirmed the fact, many scholars had long suspected, on the basis of archeological evidence, that powerful kingdoms ruled by great kings, had existed in Ethiopia" (Nubia) "hundreds of years before the Ethiopian" (Nubian) "conquest of Egypt in the eighth century B.C." (For this conquest see page 23.) "Information contained on the text of the Great Stele not only confirms the truth of this suspicion, but gives us the very names of the sovereigns of those more ancient times. In a similar way many students of Egyptian history have harbored the opinion that some of the most celebrated of the Egyptian pharaohs were the immediate descendants of the princely house of Ethiopia (Nubia) or of Ethiopian (Nubian) commoners living in Egypt. The "Great Stele" again come forward with information which seems to prove these opinions to be quite well founded. It indicates, for example, that the Eighteenth Dynasty—the greatest in the history of Egypt—had a pronounced Ethiopian (Nubian) background and *that Queen Tiy, the wife of Amenhotep III and the mother of Amenhotep IV (Akhnaton) was a native of Ethiopia (Nubia).*"

THE HEAD OF A STATUETTE OF AKHNATON'S MOTHER—QUEEN TIY—FOUND BY PROFESSOR PETRIE IN SINAI

TWO VIEWS OF BUST OF A QUEEN (PERIOD OF AKHNATON), SAID BY BERLIN MUSEUM ARCHEOLOGIST TO BE QUEEN TIY, AKHNATON'S MOTHER
Now in Berlin

been an Egyptian conquest of Nubia in the XIIth dynasty (before 2000 B.C.). These "conquests," for there were repetitions, do not seem however to have been complete subjugations (though tribute was demanded and the Egyptians seem to have controlled the mines in northern Nubia) or ever to have meant that the whole of Nubia was captured. (Even the conquest by Rameses II of the XIXth dynasty was only partial.) The civilizations, though, of the two countries (after the "conquest" by Pharaohs of the XIIth dynasty) do seem to have become increasingly identical, and the priests of Ammon had great power in both. The mutual infiltration—of Egyptians into Nubia and of Nubians into Egypt must have been very great, and the intermingling of the two peoples through intermarriage was constant, so that it is not surprising to find long before Akhnaton—when the Hyksos (the Pharaohs of the XVth and XVIth dynasties) were still nominally ruling, though their power was waning—a "Black" king establishing himself in the very Delta. "This king called himself 'King of the South and the North' and had his name written in a cartouche 'Nehsi Rā,' i.e. 'The Black of Rā.' He was certainly a foreigner, as is shown by the sign for foreigner in his cartouche. Whether he was the son of a king of Egypt by a black woman, or whether he was a pure 'Black', is uncertain; but there is no doubt that he came from Nubia and established himself at Tanis in the Eastern Delta."* And six centuries after Akhnaton a Nubian king, Piankhy who reigned from 744 to 710 B.C. completely conquered the whole of Egypt and started a Nubian dynasty. We know every detail of this conquest from the "stele" of this King. On the stele is "a long, detailed, and most interesting account of how Piankhy . . . sailed down the Nile with a vast Ethiopian fleet to Egypt, where he defeated army after army and captured city after city until finally the standards of Ethiopia were waving triumphantly over all Egypt from the first cataract northward to the Mediterranean, or 'The Great Green Sea.' Its wealth of historical detail, its picturesqueness and fervour of language, and above all in the incidental manner in which it reveals the ability, character and magnanimity of a great personality, have led scholars to place this celebrated inscription among the most valuable of primary historical documents that have come down to the present from the ancient world."† This Nubian—the XXVth—dynasty in Egypt came to an end when Egypt was conquered by the Assyrians and Thebes sacked, but though conquered in Egypt the Nubian dynasties persisted in their own country. Neither the Assyrians nor the Persians ever really captured their land and the Ptolomies also acknowledged

† William L. Hansberry in "Sources for the Study of Ethiopian History" in "Howard University Studies in History" Nov. 1930. Much fuller account of Piankhy's conquest and of the other pharaohs of the Nubian dynasty in Budge's "A History of Ethiopia."

their practical freedom. The Roman conquest, too, was only partial. And it was during this period, when the rest of the "civilized" world was being torn by the Assyrian, Persian, Alexandrine, and Roman conquests, that the Kingdom of Ethiopia (Nubia—modern British-Egyptian Sudan) with its capital first at Napata and then at Meroë had its "golden age." "Recent archeological and anthropological research in the Nilotic area of Africa, supplemented by renewed studies and new evaluations of the classical records relating to this region, has established the fact that Ancient Ethiopia (the Anglo-Egyptian Sudan) was the seat of one of the greatest civilizations of antiquity. On the strength of the now available evidence, (we know that) the hey-day or 'golden-age' of this civilization dates from the middle of the eighth century B.C. to the middle of the fourth century A.D. The beginnings, however, of this anciently famous, but now little remembered civilization go back, as archeological finds attest, to the very dawn of the historic era in Nilotic Africa; that is to say to the fourth and fifth millenniums B.C. In other words it may be said that the chronology of Ethiopian culture parallels roughly that of Ancient Egypt." And the invention of the script which gives us most of the records of this civilization, was Nubian—i.e. Negro. There was an attempt to prove that the script was the invention of a people who were "Hamitic," but archeologists, philologists and epigraphists have now, most of them, come to the conclusion that it was invented by a Nubian (a Negro) and not by a Beja (Hamitic) people. It has not yet (had not in 1930) been entirely deciphered, but there seems to be an alphabet of twenty three characters. No Aryan people (no European or Persian or Indian people of the Indo-European race) have ever, as far as we know, invented a system of writing, the alphabet we possess being Semitic in origin. But the Negroes of Africa have invented at least four different alphabets, with characters as phonetic symbols, characters completely different from, and owing nothing to, any other alphabet. One is still in use among the Vai people of Liberia and Sierre Leone.

---

Perhaps as an interlude in this attempt to give some glimpses of the history of the Negro Peoples, after having told of their inventing alphabets I may quote what Blaise Cendrars say in regard to the richness of their languages. In the introduction to his "Anthologie Nègre" quoting Cust he tells us that there are 591 languages and dialects in Africa of the Blacks and "they are excessively rich. Each knoll, hill, mountain, peak has a name, as in the same way each stream, each valley, each plain.

To discuss the meaning of these names would take a man's life time. It is not a dearth, but a superabundance of names which led travellers astray. The plenitude of the language is such that there are twenty or more words to mark the varieties of walking, of sauntering, of swaggering. Each manner of walking is expressed by a single word.". . . "Appleyard, Krapf and Steere are unanimous in praising the beauty and plastic power of these languages and Wilson remarks in particular that 'they are tractable, supple, flexible to an almost limitless degree, that their grammatical principles are built on a very systematic and philosophical foundation, and that the number of their words can be increased without end; they can express the most delicate shades of thought and sentiment and there are, perhaps, no languages in the world which have a more determined character and more precision in expression.' "

Frobenius, in the section of the introduction to his "Histoire de la Civilisation Africaine" which I have quoted above, speaks of "The Great Sudan" meaning not only Nubia, but the Sudan which stretched west from Nubia all the way to the Atlantic:—the land where the Negro inhabitants became, and still are, Mohammedans—the land south of the Sahara and the Libyan deserts, the land lying roughly between the 10th and 17th parallels of latitude (north of the equator), and more especially that part of it lying west of Lake Chad: the land known today as French Senegal, the greater part of that known as French Guinea, all of the French Sudan, the extreme northern parts of what today are the French Ivory Coast and French Dahomey, all of French Niger and the northern part of the British Colony of Nigeria. This was the "Great Sudan." And in calling it "great" Frobenius did not mean that it was great because of its vast area, but because of its wonderful history. He resented the fact that the ignorant attributed its greatness to Islam, for he believed that its remarkable civilization was autochthonous, indigenous.

There are many legends which seem to indicate that there were connections in the earliest times between the eastern Sudan (Nubia—which of course meant connections with Egypt) and the land of the upper Niger or the western Sudan. The Tarikh-es-Sudan says that there is a tradition that Kaougha the old capital of the Songhay Empire (now Gao, on the eastern Niger) existed in the times of the pharaohs and that from it came the magicians who challenged Moses. But there are more than traditions. When Felix Du Bois, author of "Timbuctoo the Mysterious" visited Jenné (about 200 miles from Timbuctoo, on a tributary of the Niger) he was amazed at the architecture and at first puzzled. He says it was "neither Arabic nor Byzantine, Greek nor Roman, still less Gothic

View from the Roof of Barth's House in Timbuctoo in 1853

Sketch Made by Felix DuBois in Jenné, 1895

or Western." "At last," he says "I recall these majestically solid forms, and the memory is wafted to me from the other extremity of Africa. . . . It is in the ruins of ancient Egypt. It is in the valley of the Nile, that I have seen this art before." He calls Jenné "A colony of ancient Egypt in the heart of the Sudan."

However we get most of our information concerning the history of "The Great Sudan" through her connection with northern Africa by means of the caravan routes across the Sahara. As soon as there was a civilization sufficiently advanced on the fertile belt of north Africa now known as Tripoli, Tunis, Algeria and Morocco, sufficiently advanced to mean markets for the products of the region of the summer rains south of the desert, the routes across the desert seem to have been found. Hannibal's elephants which he got across the Alps with so much trouble had probably already made the trip across the Sahara. And the desert was never quite empty. Many Berbers not killed, or subjugated, or assimilated by the Carthagenian, Roman, Vandal and later Arab conquerors were pressed south of the fertile belt and either led a nomadic life on the edges of the northern or southern belt of rains, or settled in the oases which became stations on the caravan routes and often towns; and the Sudanese also pressed up into the desert and built towns by salt mines or also as stations on the routes. Sometimes a town would be built by the white Berbers and conquered by the black Sudanese and a black king would rule a white population (Audoghast) and sometimes the reverse would happen. The people who conquered the coast, however, (that is until the Moors were expelled from Spain and came to the African shore in the 16th century) never made any attempt to conquer either the people of the desert or the people south of the desert. Apparently not even the Romans or the Arabs wished to attempt these conquests. They seemed to think that if they offered markets which ensured profits that the gold and ivory and elephants etc. would be forthcoming and the caravans would protect themselves. There seemed to be no idea that extraterritoriality was necessary; but in every large city of the Sudan there were apparently white traders—residents. However after the Arab conquest of Egypt, northern Africa and Spain, the Arabs, and probably also the converted Berbers, did send missionaries, or go as missionaries, of Islam, and a tribe of the Berbers ("the people of the desert") calling themselves "Morabites" did preach one Holy War; but in this war they did not press far into the Land of the Blacks, and soon we find them acknowledging the suzerainty of—and paying tribute to—the great Sudanese kings. The "conversion" to Islam of Sudanese Africa was evidently gradual and not violently accomplished as most Mohammedan conversions were. In 1067 A.D. (though his information was probably not

later than 1060) El Bekri, a great Arab geographer of Spain, in writing of Ghana, then the greatest of the Sudanese kingdoms, said that many of the inhabitants of the capital were already Moslems, but that the king was still pagan; and in 1153 A.D. when El Idrisi, another Arab geographer of Spain wrote, Ghana's king and apparently most of the Sudanese people had become Mohammedan. And from this date on many of the kings made the pilgrimage to Mecca and received the investiture of their office from the Caliph in Cairo.

From 750 A.D. until almost 1450 A.D. the comparison between the civilization of Christian Europe and that of the Moslem world was, as we know, all in favour of the Mohammedan. And Spain, with what is today Morocco, Algeria and Tunis—first the Caliphate of Cordova and then known as "The Kingdom of the Two Shores"—was for nearly four hundred years the fine flower of that civilization. When kings and nobles of Europe were most of them semi, or quite, illiterate, the princes and "upper-classes" of the towns of Spain and Morocco were poets and geographers and collected great libraries. The catalogue alone of the Library of Cordova filled forty four volumes. When neither the people nor the princes of Europe considered cleanliness anywhere near godliness (and godliness itself was not remarkably in evidence) and hogs roamed the streets of their capitals, the towns of Andalusia were cleaner than cities of the United States in 1961, Cordova had 300 public baths and in 1349 Ibn Batuta states that free hospitals were constructed and endowed in every town of the kingdom of Morocco. When all scientific research was considered trafficking with the Evil One and might lead to the stake, in Europe, it was encouraged in Mohammedan countries: nitric and sulphuric acid and phosphorus were all used. The Arabs of Spain and northern Africa were the only doctors of medicine of the time. When the people of Christian Europe—the most learned—still thought the world was flat, El Idrisi—the Arab of Spain who knew that the Negroes of Africa of Africa exported iron to India and Java, who wrote in 1153—three hundred years before Columbus (almost all of whose work is still extant and of which there is a French translation) said: ". . . the world is round as a sphere, of which the waters are adherent and maintained upon its surface by natural equilibrium. It is surrounded by air, and all created bodies are stable on its surface, the earth drawing to itself all that is heavy in the same way as a magnet attracts iron." This comparison in favour of the Moslem civilization during these years might be continued for pages, or, one should say, for volumes. And with this civilization—itself the highest at the time in the western world and in close contact with that of the East—the Negroes of the Sudan, especially

after they had become Moslems, were in close touch, whereas the people of Christian western Europe had shut themselves off from it.

And the knowledge the two peoples had of each other (the Arabs and the Negroes of Sudan) must have been reciprocal as the communication was so constant. Lady Lugard says of El Bekri "the country to the south of Morocco is evidently as well known (to him) as the provinces of Spain." We know that the caravan trade of the two western routes was much greater than that of the eastern, so the trade of the western may be imagined when we know that in 1353 Ibn Khaldun, the Berber historian, said that every year 12000 laden camels passed through Tekadda (an important Berber town in the desert), going from Egypt to Melle:—Melle being at that time the great Negro Empire of the Sudan. Ibn Khaldun, himself a Berber, also remarks that this important Berber town acknowledged the sovereignty of Melle "like all other towns of the Sahara." As the coming and going of caravans was constant the coming and going of individuals must also have been constant. We have detailed descriptions of the pilgrimages of several of the Sudanese kings to Mecca. We know that at the court in Seville the praises of the Almohade sovereign, El Mansur, (who reigned until 1218 A.D.) were sung by the "learned and celebrated poet, a black of Sudan, Abu Ishak Ibrahim al Kanemi." We also know that students from all over the Moslem world came to the University at Timbuctoo, which was especially famous under the Askia kings, when the Sudanese Empire of the Songhay was at the height of its glory.

Although it is evident that Frobenius is quite correct in asserting that the foundation of the civilization in the Sudan was autochthonous and that the foundation was carried up high enough to determine the character of the superstructure, yet it is because the topmost story of the superstructure happened to be Arabic Mohammedanism that we have such extensive, detailed and accurate information concerning the history of the three great Sudanese empires—Ghana, Melle and Songhay. Islam, granting its many blemishes (blemishes from my, perhaps biased, point of view) has, at all events one great virtue:—having no priestly hierarchy it has always been inclined to be less influenced by class and race prejudice, than has Christendom. If a man is free and a follower of the Prophet his "race, colour or previous condition of servitude" has really made, and still makes, very little difference. So El Bekri and El Idrisi, the two great geographers of Arabic Spain, who give us descriptions of the Sudan, as well as of the rest of the world, and Ibn Khaldun, the Berber historian, and Ibn Batuta the Arab traveller (a native of Fez) are neither supercilious nor condescending, but objective and understanding. And we have besides the Tarikh-es-Fettach and the Tarikh-es-Soudan, historical mis-

cellanies written in Arabic by the Songhays themselves, one in the 16th and the other in the 17th century. These last, have been translated into French. The latter—the Tarikh-es-Soudan, is a history of the Songhay people from their beginnings down to 1656, in which year it is probable the author—Es-Sadi—died. Es-Sadi quotes at great length Ahmed Baba, an older and better known author. When the Moors attacked and captured Timbuctoo in 1594 Ahmed Baba was taken a captive to Morocco. He was so much respected that he was given practical freedom and allowed to open a school, but not permitted to return to his country until 1607. He once said to the Sultan: "I had the smallest library of any of my friends, and your soldiers took from me 1600 volumes". (In the midst of all they had lost these Black exiles seemed chiefly concerned about the destruction of their libraries.) Ahmed Baba was the author of a Biographical Dictionary which M. Houdas (of the French School of Oriental Languages) says, in the preface to his translation of the Tarikh-es-Soudan, is extant, and of which he evidently had the Arabic copy, but it does not yet appear to have been translated into French except the quotations from it included in the Tarikh-es-Soudan.

I wish it were possible to quote chapters from these sources which I hope I have shown to be authoritative, but I must restrain myself and make only a few quotations about each of the empires: Ghana, Melle and Songhay.

Ghana or Ghanata was the westernmost one of the three, and never so large as the two which succeeded her. Her capital was probably where the town Walata is today between the Niger and the Senegal. It was sometimes called Ghana, but usually Aiwalatin. Lady Lugard says: "The town of Ghana . . . the royal residence of the kings was composed, according to El Bekri of two towns situated in a plain. One town was Mussulman and the other pagan. The king himself was pagan and lived in the pagan town. The Mussulman town was very large, and contained no less than twelve mosques. All these mosques had their *imams*, their *moweddins*, and their salaried readers. There were also schools and centres of learning. . . . El Bekri says that the king's residence in the pagan town consisted of a 'castle' surrounded by native huts. He mentions that the buildings generally were composed of stone and acacia wood. The native town was six miles distant from the Mussulman town, but the whole space was covered by suburbs consisting of stone houses standing in gardens. In the native town there was one mosque for the use of the Mohammedans occupied on duty round the king. The king's principal ministers and advisers were at this time Mohammedans, and he and his heir presumptive wore Mohammedan dress, but the religion of the country was still devoutly pagan, and all other persons of native

religion, except the king and his heir, wore robes of cotton, silk or brocade, according to their means." Tenkamenin, this king of Ghana who was still pagan but wore Mohammedan dress, "is described as the master of a vast empire, and of a power which rendered him very formidable. He could put in the field an army of 100,000 men." . . . "The wealth of the country was very great. The soil was fertile and gave generally two crops a year. Gold was abundant." "All nuggets found in the mines of the Empire belonged to the sovereign." "The king had further sources of wealth in a very large customs revenue raised on salt, copper, and foreign merchandize." "When he gave audience to the people Tenkamenin appeared in great state, seated under a pavilion round which were ranged ten horses caparisoned in gold. Behind him were ten pages bearing shields and swords mounted in gold. On his right stood 'the sons of the princes of the Empire, magnificently dressed.' The governor of the town and all the ministers sat upon the ground before the king," etc., etc. All this was written by El Bekri in 1067 (the year after the Battle of Hastings), but though he gives the date, it is supposed that he described the conditions of about 1060. As already told above in the account of the conversion of the Sudan to Mohammedanism, in 1153 another great geographer of Arabic Spain whose works are translated into French, said that at the time he wrote the king of Ghana was a Moslem.* This geographer was the El Idrisi who knew that Africa exported iron to India and Java and who knew that the world was a sphere. He said that the residence of the king of Ghana was a "well-built castle, thoroughly fortified, decorated inside with sculptures and pictures, and having glass windows." El Idrisi also says "Ghana . . . is the most considerable, the most thickly populated and the most commercial of the black countries. It is visited by rich merchants from all the surrounding countries, and from the extremities of the West." And he gives a long description of the king and of the customs of the country. Lady Lugard from El Bekri and El Idrisi as sources tells of the trade of Ghana—and fills a chapter.

Melle or The Mellestine, a kingdom to the south east of Ghana conquered the latter in about 1210. It is said that Ghana's independence lasted for about 1000 years, which Lady Lugard says means that it lasted almost as long as England's history from the end of the Heptarchy until today. It had had a long history before the Hegira.

Melle's history as an independent kingdom—and empire—was shorter, lasting only about 250 years, but Melle was more prosperous, very much larger and we know more about it. Its centre was also farther from the

* It is probable that this King was not a Sudanese but a Morabite Berber—one of those who had waged the Holy War—for, for a time Aiwalatin had Berber Kings—but it seems to have been a change of dynasty rather than a conquest.

edge of the desert and it never had a Berber dynasty as Ghana may have had immediately following the "holy war" of the Morabites (which occurred between the time El-Bekri wrote and the time El-Idrisi wrote). When Melle conquered Ghana in the early part of the thirteenth century her people and the reigning family were all blacks. This was true during all her subsequent history and, of course, from our point of view, makes her more interesting. Her kings seem to have taken very seriously the faithful Moslem's obligation to make the pilgrimage to Mecca. The son of the king who conquered Ghana made his pilgrimage in 1259, another king made his in 1310, and Mansa Musa the greatest of the sovereigns of Melle in 1324. Accounts were kept in Mecca of the impressions made by the most important pilgrims and so we have this added source of information. But we have many sources of information, for this empire of the Blacks stretched up to the very edge of the northern fertile strip of Africa. All the desert towns of the Berbers paid it tribute and acknowledged its sovereignty, (as we have already learned from Ibn Khaldun when he told of 12000 camels passing through Tekada every year on their way from Egypt to Melle). In the 14th century Fez was the capital of Morocco, and Morocco was, at this particular period the most enlightened and best governed country in the world according to the great traveller Ibn Batuta—at any rate enlightened enough to have an endowed free hospital in every town. The Sultan of Fez exchanged presents and messages with Mansa Musa of Melle as with an equal. Mansa Musa's pilgrimage to Mecca seems to have made a stir in the Moslem world. And well it might! He brought with him a caravan of sixty thousand persons, five hundred young slaves marched before him, dressed in brocade or Persian silk, each carrying a staff of gold weighing sixty two ounces. Gold dust to defray the expenses of the pilgrimage was carried by eighty camels, each carrying 300 lbs. But in every town at which he halted on a Friday Mansa Musa built a mosque, so the 24000 pounds of gold dust was not enough, and before he got home the king had to borrow; however since his credit was good he had no difficulty in borrowing, and what was lent him was promptly returned.

The Mellestine—as Melle seems to have been called after it became an empire—extended from the Atlantic to the left bank of the Niger at a point about 200 miles south of Gao. From this point southward the boundary line ran towards the southwest to what is now the northwest corner of the Gold Coast, from which it went due west to the Atlantic. From the point where the line crossed the Niger its eastern boundary line ran first to the north east, and then due north almost to Algeria and then turning at right angles followed the line of drifting sands just south of the Saharan Atlas and High Atlas until it reached the Atlantic at

Cape Bogador. Every town, every prince in this vast realm acknowledged the sovereignty of the Black Kings of Melle.

And we know in detail how Melle was governed and know the manner of living of its people and their culture, for one of the best "travel books" ever written was that by Ibn Batuta, the North-African Arab, and he tells about his visit to Negro Africa. When he was about twenty-one Ibn Batuta left Fez, and returned twenty-five years later in 1349, after having visited Egypt, Arabia, Western Asia, a little of eastern Europe, India, Thibet and China. When he reached home he intended to travel no more; but he had not seen Negro Africa. The Sultan was anxious to have him go to the Mellestine and add his description of that land to those travel stories he was writing of the lands he had already seen; and promised letters of introduction and help. Ibn Batuta was himself probably not unanxious to go and in 1352 he left for the south. He returned in 1354 and in December 1355 finished his book.* Ibn Batuta entered the Mellestine at Aiwalatin, the old capital of Ghana. He then went on to the capital of the Mellestine, a journey of about twenty days. He says that "it was hardly necessary to have a guide or companions as the road was perfectly safe." He also says "there was no need to make any provisions; food was plentiful, villages succeeded each other at short distances, and the inhabitants were always willing to sell anything that was required." He mentions a large town "principally inhabited by black merchants," for "it was the centre of a great corn country, whence millet was exported to the frontier"; of another town he says "its inhabitants were distinguished by their great zeal in the study of science." There seemed to be "white quarters" in every town of any size; but this congregating of the whites in one quarter, does not seem to have been anything like a real segregation, rather like the "colonies" of English or Americans or of any other people in Paris or Rome or Mexico City; for there seems to have been constant visiting between the Whites and the Blacks. He found on arrival that a white lawyer friend of his had rented a house for him opposite his own in the white part of the town. The next day "he received visits from distinguished persons, of whom he subjoins a list. Amongst these there were men of letters, lawyers, jurisconsults. One black judge is specially mentioned as a man of merit 'adorned with most noble qualities.' " He describes at length the King's

* This book also has not been translated into English, except in a very abbreviated version in the "Travellers' Library." The French translation is complete, but is out of print. Since a copy of this French translation from the original Arabic was not available, and Lady Lugard's "Tropical Dependency" was, I found it better to consult her quotations from the complete French version than to consult the abbreviated English version.

audiences, and describes ceremonies on other occasions. He thinks the music "most agreeable," and though he had seen dramatic performances in India and all the world he seems to have been pleased with those in Melle and called them "extremely good." Lady Lugard says: "The judicial system of the country, though not described in detail, would seem to have been carefully and fully organized. The frequent reference which is made . . . to judges, . . . to lawyers and jurisconsults, indicates that men of this profession occupied a very prominent position in the social organization. The fact that it was the custom of the Sultan to send cases in which he was appealed to for justice, to be tried at the 'proper tribunal' would seem also to indicate a severance of the executive and judicial powers which it is the habit of civilization to regard as one of the guarantees of justice." But as Lady Lugard says further on "the condition of the country itself" was the best proof of the well-founded confidence the people must have had in the lack of any reason to expect injustice. Quoting again from "A Tropical Dependency": "Amongst the admirable things which Ibn Batuta feels it to be his duty to praise, when at the end of his visit he summarizes his opinion of the people of Melle, is, he says, the rare occurrence of acts of injustice in the country. 'Of all people,' he thinks that 'the Blacks are those who most detest injustice. Their Sultan never forgives anyone who has been guilty of it.'* He also praises 'the complete and general safety which is enjoyed in the country. Neither those who travel nor those who remain at home have anything to fear from brigands, thieves, or violent persons.' 'The Blacks do not,' he says, 'confiscate the goods of white men who die in the country, even though it may be a question of immense treasure. On the contrary, their goods are always placed in charge of some white man, trusted by the community, until those who have a right to them can apply and take possession of them.' " (This respect for the property of a foreigner could not have been from fear of a "punitive expedition," for it was not for six hundred years after this that white armies really entered the Sudan. The people of Melle had had no experience of square miles of their country being taken because sacks of opium belonging to some Whites were confiscated. It must have been due to that fundamental hatred of injustice which Ibn Batuta praises.)

He speaks of every town having its mosque or mosques with salaried teachers and readers, and in the principal towns such as Melle, Timbuctoo and Gago (Gao) he mentions mosques of special importance,

* Compare this behavior—indicating an attitude towards,—the committing of acts of injustice, with other behavior—indicating quite another attitude—that of the Whites—by reading for instance "The Anatomy of African Misery" by Lord Olivier, or "Brown America" by Edwin Embree and later accounts of Colonial injustices and injustices in the Southern States in the U.S.A.

as if they were what might be called cathedral mosques. "Schools are mentioned in many towns, and some, as in Zaghan are specially spoken of as centres of distinguished learning." Somewhat later than the time of Ibn Batuta's visit, but not much later, the trade in "written books" sent from the north African kingdoms to the Soudan "was said to be one of the most profitable." Two more quotations from Lady Lugard's gleanings from Ibn Batuta and we must leave Melle though there is so much more to say. The Native African is one of the very cleanest persons in the world. "Ibn Batuta mentions amongst the good qualities which he ascribes to the Blacks of Melle, that they never failed to dress in fine white robes on Friday," and "Berbers and Blacks seemed to enjoy at the time a perfect equality throughout the kingdom—all being alike Mohammedan. The only class distinction seemed to be idolator or orthodox, slave or free."

And now Songhay, by far the most interesting of the three empires;—Songhay's capital was far to the east of Melle, as Melle's had been to the east of Ghana's. But Gago was so far east, though still on the Niger, that it had received its Mohammedanism earlier than the rest of the Sudan,—in 1007,—and from the Eastern Caliphate in Egypt and not from the north African and Spanish Caliphate of Cordova. It was Gago or Gao which claimed to have been a town in the time of the Pharaohs. It had had a long history before its conquest by Melle—Jenné was one of its colonies. (The Jenné called by Felix Du Bois "a colony of Ancient Egypt.") Two years after Iban Batuta's visit to Gao—or Gago—Songhay freed itself from Melle, but for more than a hundred years did not more than keep its independence. In 1464, however, Melle was growing weak and Songhay had as its king Sonni Ali, a very remarkable man,* if possessing military genius means being remarkable. He conquered and ruled over more territory than Napoleon did, and though his prime minister, not his son, succeeded him, his empire held together until 1591, longer than Napoleon's, or for that matter than Alexander's. Lady Lugard says of him, "He was one of the born soldiers of the world." This Songhay Empire at the time of its full extent, which it attained in the reign following Sonni Ali's, included all of what had been the Mellestine and much more. In the east it reached to Lake Chad and in the north east to the south east corner of what is Tripoli today. Its boundary also extended further to the south and included the Haussa land of what is now northern Nigeria, which had not been a part of the Mellestine. Sonni Ali was not only a great conqueror, but also an engineer, or a

* Not half Berber as W. E. B. DuBois says in "Black Folk Then and Now." His father (the King who preceded him) was a Songhay, pure Songhay, and his mother was a Haussa—both pure black.

conceiver of engineering projects, for "he conceived and put into partial execution the daring scheme of connecting Aiwalatin by water with Timbuctoo by means of a canal, which he proposed to construct across the desert." He devoted himself for two years to this, but was obliged to leave it in order to meet an attack on his southern borders. Like Henry IV of France who thought "Paris worth a mass," Sonni Ali thought it worth his while to pretend to a certain amount of religious faith, but he seems to have been privately a daring free-thinker. Instead of saying his prayers five times at the appointed hours each day, he would lump them all together until a convenient time, and sometimes would only call the name of each prayer and say: "There, you know my sentiments you can divide them between you." In other words he was not a "superstitious African." Neither was he a boor. Although he seems to have had fits of temper and was severe in punishing those he thought worthy of punishment he also was often magnanimous. Jenné held out for seven years and seven months. When the capitulation finally came Sonni Ali seems to have been struck by the coincidence of the two sevens, and so decreed that there should be seven days added in which there should be general feasting and intermarrying and he himself married the widow of the chief who had defended the town. There was no sacking of the conquered city. He did, however, order the sacking of Timbuctoo, rather of the parts where the "intellectuals" lived, for he considered that its resistance was due to these "Intellectuals," so although they were religious leaders of his supposed faith he ordered many killed and continued the persecution and a severe one for three years and then ordered it stopped short. Their punishment had been sufficient. He does not seem to have been at all illiterate (for at least three hundred years before his time there had been schools in all the larger towns of the Sudan) or at all uninterested in learning. He was heard once to say: "Without learning life would have neither pleasure nor savour." (Another translation of this latter word is "charm.") His chief fault—or crime—was that of these bursts of rage, but they do not seem to have been worse than those of Henry II of England who is supposed to have thrown himself on the floor and bitten the rushes, and even in the twentieth century among the "democrats" there are some who "let their angry passions rise." And he had a mother and a prime minister who were not afraid of him and they would often take and hide those whom he had ordered executed during one of his fits of temper, and so not infrequently he would be saved the remorse which Henry II felt, when, because he had let his rage get the better of him, Thomas à Becket's life was taken.

And this prime minister of Sonni Ali's who succeeded him was Askia

the Great and one of the few men who have deserved the title of "The Great." He was also pure black—but pure Songhay—not having Haussa blood. Unlike his predecessor, Sonni Ali, Askia the Great was a devout Moslem, and two years after becoming emperor made his pilgrimage to Mecca. He was, however, not interested in display, as perhaps Mansa Musa had been (and as Lord Mayors and Horse Guards and those whose uniforms consist of fur hats three feet high, still are, and not a few others), but interested in learning as much as he could. "The fame of Askia's pilgrimage consisted . . . in the distinction of the persons who accompanied him, of whom Ahmed Baba gives us some of the biographies, and in the great number of learned doctors and noble friends whom Askia had the opportunity of meeting in Cairo and in the Holy Cities. The friendships which were here formed lasted for the rest of his life, and correspondence with some of the most distinguished men of letters of the East, which was at this time entered into, was never dropped." "All who met the king were impressed with the keen interest which he displayed on many subjects, his readiness to listen to the best opinions, his diligent discussion with the learned, and his anxiety to acquire information on practical questions. Askia Mohammed* remained for two years in the East, during which period he devoted much time to study. Amongst subjects named as arresting his special attention we find: 'Everything that concerned the government and administration of peoples'; 'principles of taxation . . .'; 'verification and inspection of weights and measures, regulation of trade, laws of inheritance, laws for the suppression of fraud, customs duties.' " etc., etc. When he returned to reign for over thirty years, until he was well over eighty, he devoted himself to the defence, but chiefly to the organization and the administration of his vast empire. Lady Lugard says of him: "He appears to have been a man of liberal principles and large views, naturally humane, and disposed to temper justice with mercy, more than usually cultivated, active, wise, and firm."

And he was more successful in accomplishing his aims than many others who are called great.

"To cross the dominions of the Askia was, we are told, a six months journey. Yet so effective were the measures taken by him for its administration, that before the end of his reign, the result is thus summarized by his historian: 'He was obeyed with as much docility in the farthest limits of his empire as he was in his own palace, and there reigned everywhere great plenty and absolute peace.' "

This does not mean, of course, that the Sudan was paradise, any more than the Roman Empire was from "the time of the death of Domitian to the accession of Commodus" when Gibbon thinks that the lands

* His name was Mohammad Abou Bekri Et-Touri. Askia was the name of his dynasty.

Rome ruled were happier than those lands have ever been since. There were slaves in both the Sudan in Askia's time and in the Roman world when Antoninus Pious was Emperor. And where there are slaves, either chattel slaves or men torn by force from their homes and families under any pretext whatsoever, there is not great happiness. But the slavery in the Sudan in Askia's time did not mean millions dragged away in raids, as was true when England was the trader and America the market, nor was the forced labour anything to compare to that in the Sudan under France's dominion. Any honest traveller in Africa today has a very different story to tell from that told by Ibn Batuta. And could any traveller in Africa today find such lack of injustice except in some of the newly liberated colonies as Ibn Batuta found in Negro Melle in 1353?

Just a few more quotations from Lady Lugard which tell of the intellectual life in Timbuctoo.

"We are enabled to reconstruct from the writings of Ahmed Baba, who was himself born during the reign of Askia Daouad, the fourth and last reigning son of the great Askia, some picture of the intellectual and literary revival of Timbuctoo."

"The University of Sankore* would seem to have been a very active centre of civilization. It was attached to the mosque of the same name, and was in correspondence both by letter and by the frequent visits of its professors, with the universities of North Africa and Egypt. It was already in existence under the rule of Melle, and at that time" (i.e. before the Moors were driven from Grenada) "was in touch with the universities of Spain." . . . "The town swarmed with Sudanese students." . . . "The more distinguished professors would seem to have had schools in which they gave courses of lectures, attended by students, who afterwards received diplomas from the hands of their masters. In the biographical sketches of Ahmed Baba, the master from whom diplomas were received is mentioned as regularly as the school or university in which a man receives his education is mentioned in similar English works. A sketch which Ahmed Baba gives of one of the principal professors under whom he himself had studied, may serve to indicate the type of sage who was revered by the youth of Timbuctoo, and incidentally presents a picture of local scholastic life."

"Mohammed Abou Bekr of Wankore, his pupil tells us, writing himself as an old man forty or fifty years later, was 'one of the best of God's virtuous creatures. He was a working scholar, and a man instinct with goodness. His nature was as pure as it was upright. He was himself so strongly impelled towards virtue, and had so high an opinion of others, that he always considered them as being, so to speak, his equals, and as having no knowledge of evil. He did not believe in the bad faith of the

* The name of the University of Timbuctoo.

world, but always thought well of his fellow-creatures until they had committed a fault, and even after they had committed a fault. Calm and dignified, with a natural distinction and a modesty that rendered intercourse with him easy, he captured all hearts. Everyone who knew him loved him.' He taught during the whole of a long life, while at the same time he continued to take an active interest, and even some part, in public affairs. The Sultan, who shared the general respect for him, offered him the lucrative appointment of Governor of the Palace, but he refused it—'God having,' he said 'delivered him from such cares.' He was also offered the appointment of principal preacher to the great mosque, but that also he prayed the Sultan to excuse him from accepting. He was apparently wealthy, and possessed a fine library. 'His whole life was given,' says Ahmed Baba, 'to the service of others. He taught his pupils to love science, to follow its teachings, to devote their time to it, to associate with scholars, and to keep their minds in a state of docility. He lavishly lent his most precious books, rare copies, and the volumes he most valued, and never asked for them again, no matter what was the subject of which they treated.' Sometimes 'a student would present himself at the door and ask for a book, and he would give it without even knowing who the man was.' Ahmed Baba recalls with affection an instance when he himself wanted a rare work on grammar, and the master not only lent it, but spent a long time searching through his library for other works which might help elucidate his pupil's difficulties. 'It was astonishing to see him,' says Ahmed Baba; 'and he acted thus, notwithstanding the fact that he had a passion for books, and that he collected them with ardour, both buying and causing them to be copied.' It is not, alas! surprising to hear that 'in this way he lost a great quantity of his books.' "

"His industry in teaching was equalled only by his patience. No pupil was too stupid or too ignorant for him. He never allowed himself to be discouraged, or to despair of gaining an entrance into the understanding of his hearer. Sometimes, indeed, his patience with the stupid was so great, that the more intelligent members of the class were moved to wonder and impatience. 'He must have drunk of the water of Zem-Zem to be able to stand it,' was the comment of one of Ahmed Baba's fellow-pupils on such an occasion. But Ahmed Baba, in faithful remembrance, forgets the impatience of youth, and keeps only admiration. 'His like,' he says, 'will never be found again.' The mind of this teacher is described as 'subtle, sagacious, ready, swift to comprehend. His intelligence was broad and luminous. His usual manner was taciturn and grave, but he would occasionally break into sallies of wit. He occupied himself with what concerned him, listened to no gossip, and took part in

no frivolity, but wrapped himself in a magnificent mantle of discretion and reserve. His hand held fast the standard of continence.' "

What professors of Oxford or Harvard today can feel that they have the right to hope that their pupils will speak of them in such terms in 1985? Though Arabic was the literary language, and the ritual language, it was not the language spoken in Timbuctoo. That was Songhay. Mohammed Abou Bekr of Wankore had had to learn Arabic, so he was probably pure Songhay, with no Berber blood.

With Akhnaton, in the United States and in all Anglo-Saxon lands Abou Bekr would by the majority of the public be treated as beneath them, as "inferior."

Lady Lugard continues: "The study of law, literature, grammar and theology would seem to have been more general at Timbuctoo than that of the natural sciences. We hear, however, of at least one distinguished geographer, and allusions to surgical science show that the old maxim of the Arabian schools, 'He who studies anatomy pleases God,' was not forgotten. At a later date (1618) the author of the Tarikh-es-Soudan incidentally mentions that his brother came from Jenné to Timbuctoo to undergo an operation for cataract at the hands of a celebrated surgeon there—an operation which was wholly successful. The appearance of comets, so amazing to Europe of the Middle Ages, is noted calmly, as a matter of scientific interest, at Timbuctoo. Earthquakes and eclipses excite no surprise."

I hope that this booklet if read with minds in "the state of docility" in which Mohammed Abou Bekr of Wankore taught his pupils to try to keep theirs, will help a little to break down prejudices and to remove cataracts. And one does not really wish to be prejudiced or to have cataracts; does one?

TWO ASHANTI STOOLS BROUGHT BY ANNA MELISSA GRAVES FROM THE GOLD COAST

The lower similar in design to the Golden Stool. Each made of single block of wood. (Base 22 by 11 inches; height in center 15 inches)

*Note:* Since I have quoted Lady Lugard at such length and so frequently perhaps some account of her and of her book should be given. She was Flora L. Shaw. I can remember in my childhood how dear her books were to me: "Castle Blair", "Phyllis Browne", "Hector" and "A Sea Change". Of "Castle Blair" Ruskin said that it was "the best story he had ever read of a noble child and the next to the best he had ever read of a noble dog". At any rate it was delightful, and I think I am not over-praising Flora Shaw when I consider her an artist, in "Castle Blair" certainly; the others are not quite so good. Perhaps it was well that I had owed to her so many happy hours, for otherwise I might have been tempted to throw aside "A Tropical Dependency" without going on and gleaning from it the information which is available in it and so hard to get elsewhere. For there was another side to Flora Shaw. She was not only an artist as a woman of letters. She was one of the blindest worshippers at the shrine of British Imperialism that Britain has ever produced. She and Churchill might have been born in one egg. She became a writer for "The Times" and eventually the chief writer on colonial questions; and through "The Times" she moulded British opinion. This is an entry in Wilfred Scawen Blunt's "My Diaries" April 25th, 1896. "Dined with George Wyndham" (at that time editor of "The New Review") . . . "He says that there is no doubt in the world that Chamberlain was in with Rhodes and Jameson in their attack on the Transvaal, and he is angry with him for having backed out of it,—for having ruined the plot at the last moment to save his own bacon. He has been seeing much of Jameson, whom he likes, and of the gang that have been running the Transvaal business, about a dozen of them, with Buckle the 'Times Editor' and Miss Flora Shaw, who, he told me confidentially is really the prime mover in the whole thing, and who takes the lead in all their private meetings, a very clever middle-aged woman." In other words Flora L. Shaw was at the bottom of the Jameson Raid!! Then still a "middle-aged and a very clever woman" and an arch-imperialist, she married Sir Frederick Lugard (later Lord Lugard) as arch an imperialist as she, and went with him to Northern Nigeria, which he had just captured, beating the French in a race for it. The second paragraph of her book "A Tropical Dependency" from which I have been quoting so plentifully, and gratefully, is as follows: "The administration of this quarter of the Empire cannot be conducted on the principle of self-government as is understood by white men. It must be more or less in the nature of an autocracy which leaves with the rulers full responsibility for the prosperity of the ruled. The administration of India, where this aspect of the question has long been appreciated, is among the successes of which the British people is most justly proud. The work done by England in Egypt is another proof of our capacity for autocratic rule."!!! Knowing the awful agony of India and Egypt, for which England was directly responsible, the reading of such a paragraph was almost enough to make a real "democrat" (not a pseudo one, who is responsible for Jim-Crowism) throw the book out of the window. But something—perhaps "Castle Blair"—made me read on, and I was rewarded. I have the translation into French by Houdas of the Tarikh-es-Soudan, but I have not the translations into French of El-Bekri, El-Idrisi and Ibn Batuta, so her translations into English, from these French translations were invaluable to me. But besides she must have had access to other works in Arabic not easily attainable. I think she must have studied Arabic. She was a "very clever woman", or perhaps those in her husband's staff who knew both Arabic and English read to her from these sources not yet translated into any European language, translating as they read, so that she could take notes. At any rate there the information is which seems to have been gathered with great pains, and to be very accurate. The last three chapters of her book are as repulsive to a democrat as that paragraph quoted above, and they are not accurate, in so far as accurate description of English rule is concerned; but the part of the book concerned with the history of the Sudan from the earliest times until the British took possession

of the Emirates in Northern Nigeria, especially the part up until about 1650 does seem to show a scientific spirit in its search for truth, and it is all the more valuable, because in the facts which she presents she is—apparently without realizing it—denying her own thesis:—that all tropical, non-white people are incapable of self-government, and should be thankful for British autocracy, since she gives evidences of remarkable success in governing by these people of themselves. I think she sometimes must have had a suspicion that she was hurting the case for British Imperialism, but she had become so interested that she she could not stop, so she tried to make up for the good things she discovered and was forced to say about the Sudanese by damning all the coast people. All—even the people of Benin whose wonderful bronzes she must have seen—are "degenerate savages". However if one discards everything said about the British and everything said about the coast Africans her history of the Sudanese people is the very best I know, indeed I know of no other with which to compare it. And it is a great pity the book has been so long out of print but it is in almost all good public libraries.

## ERRATA

In the title page and in the title given with the record of the copyright, the belittling in the first instance, and the complete omission in the second instance, of the second part of the title—"Letters from West Africans" was a serious error. It was only of the Letters that I was the editor; the "Letters" took up considerably over half the book, and the reviewers praising the book were almost all especially interested in the "Letters."

A.M.G.

Following is the bottom half of the title page as it should have appeared:

---

Originally printed in 1942 as "Foreword" to

BENVENUTO CELLINI HAD NO PREJUDICE AGAINST BRONZE—
LETTERS FROM WEST AFRICANS

Edited by Anna Melissa Graves This should have been larger

WAVERLY PRESS, BALTIMORE, 1961 This should have been the most important

---

and also in the record of the copyright the omission of the important part of the title as copyrighted was a serious error

Spelling

Page 3, 5th line counting from the bottom, and also in the line at the bottom:—Ezra Pond should have been Ezra POUND.

Page 38, 24th line from the top of the page—the word incorrectly spelled as Grenada should have been Granada.

Pages 38 and 40, Sankore is probably the correct spelling of the University of Timbuctoo; but Lady Lugard also uses the two spellings in her "A Tropical Dependency." Perhaps Timbuctoo, like Oxford, had several colleges in the one University.

Date

On page 27 (on the 17th line counting from the bottom, or the 26th line counting from the top) the date should be the 15th Century —*not* the 16th.

Berkely, Cal

# PRESENTATION TO THE BERKELEY BOARD OF EDUCATION ON DE FACTO SEGREGATED SCHOOLS

By The Berkeley Chapter of the Congress of Racial Equality, CORE, May 1, 1962

CONGRESS OF RACIAL EQUALITY

Mr. Chairman, Superintendent Wennerberg, Members of the Board of Education and Ladies and Gentlemen: I am Wilfred T. Ussery, and I am here as a representative of the Berkeley Chapter of the Congress of Racial Equality, known as CORE.

CORE, in this our first appearance before this Board of Education, wishes to congratulate you for the many positive acts which have demonstrated amply your interest, sensitivity, and awareness to the problems that confront our school system as a result of racially exclusive residential areas in Berkeley.

We have great confidence and respect for this Board and its integrity.

This Board of Education's response to the NAACP appeal of 1958 led to The Staats Report. This report contained many good recommendations for improving and correcting many undesirable conditions disclosed for the first time.

This giant step forward not only solved and ameliorated some very pertinent and special educational problems in the Berkeley schools, but also earned respect for this Board of Education both locally and nationally.

We are cognizant of the fact that the sponsoring organization of the request that led to the Staats Report, the National Association for the Advancement of Colored People, was received by this Board when it requested its study, as a friendly organization with a constructive idea to present.

It is in that same spirit that I, as a representative of the Congress of Racial Equality address you tonight. We are moved to make this presentation out of sincere concern for the betterment of the Berkeley school system. We Also feel confident that a clear stand on the issue of de facto segregation on the part of the school board at this time would greatly increase the willingness of many Berkeley citizens to give financial support to the school system.

A study of the estimated enrollment of pupils in the Berkeley Public Day Schools issued by the Berkeley Unified School District, indicates the existense of de facto segregated schools. The results showed that eight Berkeley

schools have a caucasian enrollment of 94% or over, while two schools have an enrollment of 94% or more non-caucasian pupils.

The public schools are often referred to as the mortar of American beliefs and ideals -- the institution which serves to cement relationships among our people. Normal day-to-day contact with other ethnic groups is essential to the healthy development of children who, as adults, will be moving rapidly around a world which is two-thirds non-white. Lack of integration therefore, is just as detrimental to white children as it is to children of minority groups.

CORE does not believe that the problem of de facto segregated schools is a necessary by-product of Berkeley life. Various methods have been suggested, by their use in other communities, to reduce or eliminate the problem. Redistricting which takes into consideration the racial and ethnic composition of the neighborhood served is one. Another is the "Princeton Plan". If a school serving a predominantly white area is adjacent to a school serving a non-white area, children in both areas can be assigned to one of the schools for half of the grades, and to the other for the rest. Carefully worked out programs of permissive transfers may help. Judicious assignment of children from an overloaded school, to be transported to a less crowded one can help. Of great importance is the location of new schools.

We are not suggesting that any of these measures precisely fits the situation in Berkeley. But these plans do demonstrate that other communities have taken positive action to resolve the problem. We are confident that a study of the subject would lead to solutions applicable to the problem as it exists in Berkeley.

We believe that you, the Berkeley Board of Education, cannot refuse to assume responsibility for school segregation merely because you did not foster it. If de facto segregation means inferior education, school authorities have an educational and moral responsibility to take affirmative steps to eliminate such segregation.

CONGRESS OF RACIAL EQUALITY

We, therefore, ask you, the Berkeley Board of Education, to recognize officially the existence of de facto segregated schools in Berkeley as your first step in eliminating them, and to adopt as your primary guiding principle the idea that "de facto segregated schools are educationally undesirable and should be eliminated as soon as possible"

To achieve this end, we further recommend that you, the Berkeley Board of Education, create a committee on de facto schools and direct it to address itself to the following:

1. Establishment of criteria as to what is and what is not de facto segregation in Berkeley. A prerequisite for any redistricting proposals designed to achieve a more heterogenious student population within Berkeley's schools.
2. Determine where and to what extent de facto school segregation exists in the Berkeley Public School System. A prerequisite for any objectively approached solution.
3. Determine factors which create and perpetuate de facto school segregation in the Berkeley Public School System. A prerequisite for understanding and defining the role other Public Agencies, groups, and citizens of Berkeley can and should play in solving the problem.
4. Investigate the effects of such segregation on students as present and future creative citizens in our society, -- in relation to motivation, academic excellence, and delinqueny. A prerequisite for understanding the relationship of segregation to a potentially radical improvement in the quality of city life in Berkeley, increased income for our residents, decreased juvenile delinquency and crime, as well as lower relief costs.
5. Investigate and formulate additional proposals for raising the educational and vocational aspirations of able students from

economically and socially deprived groups, and in schools of low achievement levels. A prerequisite for logically supplementing the ideas in the Wells - Favors - Takeuchi plan into a motivational program, designed for Berkeley's needs, of the scope and magnitude of New York City's Demonstration Guidance Project and Higher Horizons Program and St. Louis' "Banneker Group" plan.

6. Finally and most important, formulate and put into operation a program for the elimination of de facto segregation in the Berkeley Public School System.

It is our suggestion that the committee to study this complex problem consist of:

A. All five members of the Board of Education.

B. Superintendent Wennerberg and four other officers of the school system

C. Several civic and educational leaders and representatives from the community at large.

We believe that a group of this composition could most advantageously conduct the specific study of this problem we are requesting, relate it to the community, and perhaps help the school board and administration administer it.

It is the position of CORE that segregated education in any form -- black, white, or yellow -- is educationally undesirable. Our position is corroborated by two important court decisions relative to this subject: Brown v Board of Education, 347 U.S. 483; Taylor v. Board of Education of City School District (commonly called the "New Rochelle Case"), 191 Fed. Supp. 181.

The Supreme Court in 1954, in the Brown case, unanimously speaking through Chief Justice Warren, declared that the segregation of Negro children, especially in their formative years, "generates a feeling of

inferiority as to their status in the community that may affect their hearts and minds in a way unlikely ever to be undone." The Court further emphasized the necessity of giving these minority-group children the opportunity for extensive contact with other children at an early stage in their educational experience, finding such contact to be indispensable if children of all races were to become inculcated with a meaningful understanding of the essentials of our democratic way of life.

With these principles clearly in mind, we see no basis to draw a distinction, legal or moral, between segregation established by the formality of a dual system of education, as in some Southern States, and school segregation resulting from fortuitous residential patterns.

Federal Judge Irving R Kaufman, Jr., in his historic New Rochelle Decision, states: "If school boards could satisfy their obligations under the Fourteenth Amendment merely by waiting complacently until an 'ideal' solution presented itself, the Brown decision, and the advances in the area of individual equality which it respresents, would be a virtual nullity Brown, if it meant anything, meant much more than this. Necessarily implied in its proscription of segregation was the positive obligation of eliminating it. This obligation requires both good faith, and action with dispatch." Judge Kaufman also states; "The neighborhood school policy is not sacrosanct. It is valid only insofar as it is operated within the confines established by the Constitution. It cannot be used as an instrument to confine Negroes within an area artificially delineated in the first instance by official acts If it is so used, the Constitution has been violated and the courts must intervene."

Judge Kaufman's decision was upheld upon appeal to the U.S. Supreme Court.

It should be expressly understood that CORE is not accusing the Berkeley Board of Education of purposeful conduct designed to perpetuate and maintain de facto segregated public schools. CORE does want the Board

of Education to realize however, that culpable inaction which leaves the Board morally inert on this matter, functions as a positive factor in Berkeley for the perpetuation of such segregated schools.

CORE does not believe that its request of the Board of Education is unreasonable or radical. Several school boards throughout the Country have studied this problem in their communities. The most notable examples are New York City, Pittsburgh, Philadelphia, St. Louis, and Kansas City, Kansas. In 1954, the New York City Board of Education took the affirmative position that its "racially homogeneous public schools are educationally undesirable" and that it intended to devise and put into operation a plan to "prevent the further development of such schools...and to integrate them as quickly as practicable". New York City made achievement of desegregation a cardinal principal in zoning. A similar declaration was adopted by the New York State Board of Regents which supervises all education in the State. New York City is now in its second year of its Board of Education program to eliminate the City's de facto segregated schools. Philadelphia and Pittsburgh, Pennsylvania have conducted extensive studies as to segregation, and are attempting to change the existing pattern.

There are several realities of this problem that are clearly delineated and indisputable.

1. Racially exclusive residential areas together with the neighborhood school concept, as practiced by our school system, axiomatically produces Berkeley's de facto segregated schools.
2. This is educationally debilitating to all Berkeley students and detrimental to the total community.
3. Although the causes are primarily beyond the province of this Board, this Board alone is in a position to immediately alleviate the problem of de facto segregation as it exists in Berkeley.
4. Berkeley, the seat of a truly great center of learning, the University of California, has the resources to impeccably study this problem

and evolve and administer a plan for the elimination of Berkeley's de facto segregated schools.

CORE does not presume to have a ready made plan for desegregation of Berkeley Schools. We regard the ideas presented here as a format for fully studying and recognizing the problem and arriving at a solution, one developed by the Board of Education.

We respectfully challenge the Berkeley Board of Education to meet its obligation and to take the leadership for developing its own plan for ending Berkeley Public School segregation.

Respectfully submitted

## Cross-Country Demonstrations Protest Inaction By Both Parties On Schools

New York, New York, May 17: May 17, 1962, the eighth anniversary of the historic Supreme Court decision outlawing school segregation, was observed by Congress of Racial Equality (CORE) groups across the country with protest demonstrations at both Republican and Democratic headquarters.

Picket signs and leaflets pointed out that only 7% of Negro children covered by the decision now attend desegregated schools and that over 2,800,000 Negro students are still segregated. They protested the fact that legislation calling upon all communities with segregated schools to submit a desegregation plan by 1963, has been stalled with little congressional support and no pressure from the President.

In Washington, James Farmer, national director of CORE headed picket lines at national headquarters of both major parties and served on delegations which went inside to present CORE's protest to Republican and Democratic officials. Sizeable CORE demonstrations were conducted at headquarters of the two parties in New York, Los Angeles and San Francisco, with smaller protest actions in other cities.

The leaflets emphasized the discrepancy between the inaction of both parties on this issue and the 1960 platform pledges. In that year the Democratic Party pledged "that every school district affected by the Supreme Court's decision should sumbit a plan providing for at least first step compliance by 1963." The Republican Party platform asserted: "We believe that each of the pending court actions should proceed as the Supreme Court has directed and that in no district should there be any such delay."

###

# THE RELATIONSHIP BETWEEN
# RACIAL BALANCE AND SOUND EDUCATION
# IN THE SAN FRANCISCO UNIFIED SCHOOL DISTRICT

Submitted September 1, 1962

The San Francisco Chapter of The Congress of Racial Equality
2085 Sutter Street JO 7-5929

**CONGRESS OF RACIAL EQUALITY**

CORE has asked this Board to officially recognize the existence of de facto school segregation in San Francisco. Dr. Spears, both in his report of June 19th and previously, has acknowledged that de facto segregation exists in areas where there is a segregated housing pattern.

CORE has further asked this Board to declare that such a pattern in the schools is educationally undesirable. Although Dr. Spears did not directly consider the inherent inadequacies of segregated education in his June 19th report, it is implicitly admitted by references to "inadequacies of outside community conditions", districting problems, and the like. Furthermore, it is the law of the land that segregated education is inferior education. That this Board did not affirmatively cause the segregation which exists here in San Francisco does not make such education any the less inferior.

Finally, CORE, along with other concerned groups, asked this Board to appoint a committee, consisting of members of the Board, administrative staff, and representatives of the community, to study means of solving the problem. Instead, the Board directed Dr. Spears to conduct this study. He has done so, and he concludes by saying, "I have no educationally sound program to suggest to the Board to eliminate the schools in which the children are predominantly of one race".

If this statement means anything at all, it most certainly means that further working, of the most intensive and extensive kind, must be done to find an educationally sound program; we must use all our community resources and talents to devise sound and creative methods to give all our children the best educational opportunity. Surely we will not give up merely because our superintendent, however diligently he has tried, has not been able to devise a solution.

CORE believes that these three factors alone-- the existence of schools of predominantly one race, their constitutionally interpreted inferiority, and the inability of Dr. Spears to recommend any programs to alleviate the situation, together with the widespread concern with the problem as expressed by responsible civic and public groups

and individuals-- should be sufficient to warrant the appointment by this Board of the kind of committee CORE and other groups have requested. And further, that this committee be directed to recommend a plan for school integration to the Board of Education, to be put into effect by September 1963, with a progress report to be made public by February 1963.

We believe that such a committee would find some reasonable and rational solutions to the problem, and as a result, maximum educational potentials of our students would be realized. Solutions to problems which have not occurred to Dr. Spears may evolve from the injection of other viewpoints. Pertinent information has been omitted from Dr. Spears' report, and many of his statements require further analysis. Let us look at some of the issues raised by Dr. Spears. For convenience, we will use the same categories and titles used in his report.

I

Dr. Spears has titled his report, "THE PROPER RECOGNITION OF A PUPIL'S RACIAL BACKGROUND IN THE SAN FRANCISCO UNIFIED SCHOOL DISTRICT".

This we believe to be erroneous and misleading.

Neither CORE, nor, as we see it, any of the other groups concerned or the Board, has ever suggested that there be any recognition of any particular pupil's racial background in the schools. We have asked for a recognition of the total racial composition of schools, the total racial composition of an area from which students are drawn, and a recognition of the total educational effects of large, predominantly mono-racial groupings. This is statistical, rather than individual. We do not want quotas, but rather realistic proportions. We do want a general, integrated distribution from statistically gathered sources which gives each school a racial balance approximately proportionate to that of the total school system. Dr. Spears himself recognizes this necessity later in his report when he says, "In addition to my own first-hand opinion of the pupil make-up of our schools, I have been provided a good working estimate of the

racial distribution of every one of the elementary, junior, and senior high schools. But neither a teacher nor a pupil has been approached in this, nor should they ever be".

## II - THE STUDY APPROACH

We recognize and commend Dr. Spears for the earnest and time-consuming efforts which he has made on the subject. We know of his fact-finding trip, his conferences and his undoubted researches in the field. However, we had hoped that he would have shared more of what he learned with the concerned public. We can only hope that he has shared more of it with the Board than shown in this June 19th report.

The results of his studies comprise the balance of his reports. But we wonder about the raw information. What were the experiences in the various cities he visited? What did the education editor of the New York Times say? What practices, that seemed promising in print, lost their glitter in practice? What were the teacher and administration reactions?

Particularly in the light of Dr. Spears' inability to make any recommendations, we feel it most important that the Board have the benefit of all the facts and experience that Dr. Spears has accumulated, so that it might find some way out of the present dilemma. And we feel that the community, too, should know more. CORE and others are working very hard on this problem; we do not consider that we and the Board and the superintendent are adversaries. We feel we share the same problem and want to help in the solution where we can. The Board and the committee might not draw exactly the same conclusion from the same information as Dr. Spears; and other points of view would help.

## III - A CHANGING SAN FRANCISCO

Dr. Spears states, and truly, that "the question of racial distribution of children within a school system cannot be neatly lifted out of its social setting.....". The converse is also true -- the social setting cannot be neatly lifted out of the question of racial distribution of children within a school system. It is also true that

> Wherever segretation occurs, one group, in this instance Negroes, always suffers from inferior social status. The damaging effects of this are reflected in unrealistic inferiority feelings, a sense of humiliation, and construction of potentialities for self-development....These attitudes seriously affect the levels of aspiration, the capacity to learn, and the capacity to relate in interpersonal situations.[1]

The statistics presented by Dr. Spears, showing an increasingly higher birth rate in San Francisco for minority and lower economic group families, are extremely important. They emphasize the necessity of doing something now about the problem of predominantly mono-racial schools, for unless we do, the situation can only worsen. Experts in the field state that

> incidental, involuntary, tension-laden contact is likely to increase prejudice....contacts that bring people of minority and majority groups together in functionally important activities reduce prejudice.[2]

Unless the problems of segregation are intelligently solved, the result will be an increased rejection of schooling, increased hostilities and tensions, and increased delinquent, anti-social behavior, for the segregated minority.

> For the segregated majority, in this case the whites, the reactions, though less obvious, are nonetheless serious. A feeling of superior personal worth may be gained.....This leads to an unrealistic and unadaptive kind of self-appraisal...socially sanctioned segregation...permits and even encourages the expression of hostile or agressive feelings against whole groups of people. It fosters a distortion of reality.[3]

How can a white child, in an all-white school, learn to respect, cooperate with and understand members of groups from which he is virtually separated during his formative years? How can a Negro child in an all-Negro school, learn to respect, cooperate with and understand members of groups from which he is virtually separated during his formative years? Both children suffer from the lack of contact. In San

3 Psychiatric Aspects, p. 6.

Francisco, the housing pattern may have created a part of this educational void, but the schools, if they are to fulfill their function, must help to fill this void.

And what cannot be overlooked is that the predominantly white neighborhood school is more than a barometric reading of the pressures of private housing discrimination. The white school is indeed one of the goals in the fostering of private discrimination. White schools are one of the causes as well as one of the products of discrimination in housing. When white families learn that attendance of Negro children will not lower the educational standards of their schools, a giant step will have been taken toward the elimination of housing segregation.

Present studies indicate that whenever a school contains an undue proportion of minority group students, there is a rapid exodus of white families, with the result that the school soon becomes predominantly mono-racial. A school system which ignores this, and fails to take preventive measures, is creating a virtually segregated school.

## IV - ADMINISTRATION OF ATTENDANCE POLICIES

a) Board of Education Policy and Districting

The Board policy of enrolling children in the school nearest or most convenient to their homes is executed administratively. Dr. Spears tells us that constant study of school districting is maintained, and changes are frequent. There is great hope in this statement, for it shows a fluidity in drawing boundary lines, an ability to adjust to changing circumstances. Although distance and convenience to the student's home are given, and rightfully so, important consideration, other factors are also taken into account, such as fluctuating population and living accommodations. It is apparent that a given residence may not always be in the same school district, although neither the residence nor the schools changes location. We ask that, in addition to the districting criteria now being used, another be added: the racial composition of the neighborhood. It may well be that if one of the goals, in addition to distance and convenience, were the elimination of predominantly mono-racial schools, the new goal could be accomplished without any sacrifice of the old one. San Francisco is, after all, geographically small.

In many areas, a distance of only a few blocks brings one out of a Negro or Oriental housing area into a white one. Shifting district lines from North and South to East and West might do a great deal. Since Dr. Spears tells us that neighborhood racial patterns are not taken into account in drawing boundaries, we must assume this has not been tried. Surely the constitutional requirement of non-segregated education should be at least considered.

CORE is not opposed to the neighborhood pattern. But even under our present districting policy it is not sacrosanct. An examination of the school district maps clearly reveals that distance and convenience to home are frequently secondary or tertiary factors, or not even considered, when boundaries are drawn. The neighborhood school concept is sometimes followed, and sometimes not. We now modify the neighborhood pattern where other factors require modification. A radius of one-half mile for elementary and one mile for junior high may be the goal, but careful examination of present boundaries indicates wide variance in practice. At present, some of our junior high school students travel as far as two and five-eighths miles from their homes, and some of our elementary school pupils as far as one and three-eighths miles.

Dr. Spears has not given us the specific reasons for this type of variation. We presume there are good reasons. We submit that the goal of well-integrated student-bodies is no less important than the factors now being considered.

Another factor in determining school lines is bus routes. This is important, but we must remember that bus routes are not inflexible. Only recently Municipal Railway officials announced that Hunters Point Bus routes have been changed specifically for the purpose of accommodating school children at Pelton Junior High School.

b) Building Utilization

One of the important factors requiring deviation from the ideals of the neighborhood school is building utilization. Dr. Spears' report indicates that twenty-three bus runs are planned for the elementary division this fall, in order to overcome the threat of an over-crowded school. We all agree that such bussing has many attendant problems, but must nevertheless be resorted to in some emergency situa-

tions. But Dr. Spears states that "the racial make-up of the receiving school and the sending school (are not ) a factor in the emergency move."

If integration of student population is an educationally desirable goal, racial composition should be a factor. Where the disadvantages of bussing must be resorted to in any event, surely we could turn this to an advantage in at least one area, that of alleviating the problem of the predominantly mono-racial school. To accomplish this end, we would need to know which schools are over-crowded and require bussing, which schools have room to receive these students, and their respective racial compositions. Utilization of plant may be what instigates the program, but integration could be more than an occasional accidental by-product.

Similarly, the "two hundred bungalow classrooms that are moved freely over the city as needed" could be assigned for use, with the goal of integration added to the factors presently considered in determining their location.

c) Procedures in Other Cities

Dr. Spears, under this heading, gives only minimal treatment to only one aspect of programs carried on in other cities -- the so-called open enrollment policy. In mentioning bussing under such a policy, he says "it has been difficult to distinguish the element of building utilization from racial integration". This emphasizes our contention that a program designed to fill one need can, in some cases, be readily adapted to help another, if the administration has both goals in mind.

No mention has been made of policies other than open-enrollment in other cities. But open-enrollment is probably one of the least effective methods to accomplish the goal of an integrated school system. There are, however, other methods which have been used in other areas of the country. These include redistricting, site selection, the Princeton plan, elimination of optional districts and elimination of the feeder school system, as well as abandonment of ghetto schools. The experiences of other cities in the use of these and other methods might prove helpful to us, if studied carefully and in detail.

d) Out of District Transfers

The policy of refusing individual transfers for racial reasons is a wise one. Recognition of race on an individual basis is certainly improper. But we need not close our eyes to the fact that parents who wish a transfer for a racial reason may state a different reason in order to effectuate this. What, for example, are the statistics on transfers from, for example, Anza School to Madison? What kind of investigation is made of stated reasons on transfer applications? Official policy, without careful scrutiny of practice, is valueless.

V. - THE INFLUENCE OF NEIGHBORHOOD PATTERNS

Although Dr. Spears indicates that he racial imbalance of our schools is the result of "neighborhood patterns", no consideration is given to the definition of a neighborhood. The drawing of district lines by the school department is an affirmative act which in itself creates a "neighborhood". And while the composition of a student body undoubtedly reflects the population within those district lines, redrawing of the lines would create an entirely different "neighborhood", with a concomitant change in school population.

Even were it true that our schools reflect the neighborhood racial pattern, we must remember that, as the court has stated in the case of Branche vs. Bd. of Hempstead, an educational system "cannot accept segregation on the ground that it is not coerced or planned but accepted". On the contrary, sound policy requires that the school systems do even more to overcome the adverse social situation which exists in its community. Dr. Spears shows clearly a recognition of this principle when he discusses some of the speech problems of many Negro and Chinese children, and some of the cultural differences. Such factors do not require concentration of these children in one school -- their educational needs can be met just as effectively in whatever school they attend. Speech problems are more easily handled where there is more contact with children not having this handicap. Studies by sociologists and psychologists clearly indicate that isolation results in the continuation of patterns. The isolated student has

no model for judging or patterning his behavior. This country was built on the sharing of cultural diversity. Cultural difference should be shared and understood by all children.

Special problems requiring specially trained teachers need not be limited to one school. We have special classes for mentally gifted and the mentally handicapped children throughout the city.

Dr. Spears states, "it is always the responsibility of a school system to recognize the factors that might mitigate against (the pupils') opportunity for a sound education". A predominantly mono-racial school is just such a factor. The constitutional requirement of no segregation in schools was not made in a vacuum. It was solidly based on proven facts that such an education is inherently inferior.

It is understandable that the neighborhood school pattern, as presently interpreted, finds favor with some parents, or many: white, Chinese and Negro alike. The legally enforced segregation in the South finds favor with the large majority of white parents there. A school board must, nevertheless, take a broader view, and fulfill its obligation to give each child the best education the school system can provide, including those facilities which some parents, not learned in the advantages of integration, have not recognized.

## VI - LEGAL ASPECTS OF THE QUESTION

CORE will not at this time present its analysis of the small but growing body of case law in the field of racial composition of the public schools. Our conclusion is that there is an increasing tendency on the part of the courts to favor racially balanced schools. Both the letter and the spirit of the law are bringing an end to the old patterns of segregation, in California as well as nationally. Court decisions have not been limited to situations involving intentional discrimination. And all of the cases are based on the fact that segregated education is harmful to children; since segregated education is harmful, it matters little to the child whether or not it is created by law, by administrative manipulation, or the ignoring of neighborhood populations. The courts are not merely enforcing

an empty civil right, nor taking sides in an administrative, legal or political maneuver. The courts are concerned, as are we, with the effect of racial segregation on the minds and hearts of our children. As our own Judge Zirpoli said, "The responsibility of reconciling the benefits of the neighborhood school policy with the constitutional requirements for integration rests with the school authorities and will require the whole-hearted cooperation of the community, the parents, students, and teachers".

We most earnestly hope that here in San Francisco, "The City That Knows How", our Board of Education will not wait for the force of a judicial decision. We hope that our citizens will not be required to seek court assistance to help them secure a truly integrated school system. For whether a lawsuit is filed now or later, and whether it is won now or later, the day will inevitably come when the constitutional rights of all our children to learn together will be established.

We urge the Board not to wait for a legal decision on narrow, technical grounds, ordering it to comply with technical legal requirements. We implore the Board to look beyond the technicalities, and into the heart of this city, to be farseeing, unafraid, and responsive to the just needs of our community.

Community leaders in our state, in increasing numbers, are expressing concern with the problems of de facto segregation, and asking that all school boards work on solutions to this problem.

We know that the Board is aware of the recent policy statement of the State Board of Education, made at its June meeting, but we believe it bears repeating:

> In its historic decisions of May 17, 1954, the Supreme Court of the United States declared that segregation of schopl children on account of race or color, even where physical facilities and other tangible factors are equal, inevitably results in unlawful discrimination. In California, ny law and custom, we have historically operated on the democratic principle of equality of educational opportunity for all children, without regard to race or color, and for this reason, it was easy for us to accept the underlying hypothesis of that decision and applaud its rendition. We now find, however, that primarily because of patterns of residential segregation, some of our schools are becoming racially segregated in fact,

> and that this challenge to equality of educational opportunity must be met with the full thrust of our legal authority and moral leadership.
>
> We fully realize that there are many social and economic forces at play which tend to facilitate de facto racial segregation, over which we have no control, but in all areas under our control or subject to our influence, the policy of elimination of existing segregation and curbing any tendency toward its growth must be fiven serious and thoughtful consideration by all persons involved at all levels. Wherever and whenever feasible, preference shall be given to those programs which will tend toward conformity with the views herein expressed.

We hope that San Francisco will lead the school systems of California in following these principles.

## VII - PROGRAMS IN THE SCHOOLS

Dr. Spears, in this section of his report, deals with the needs and problems of remedial or compensatory education. We are sincerely impressed with his understanding of this most important need, and recognize its place in any program involving racial problems in the schools. The subjects he discusses, and related ones, must be a part of our educational system if we are to solve our problems of racial understanding.

But such a program, operating in the confines of a predominantly mono-racial school, is operating against mammoth odds. We would be teaching equality, democracy, and dignity of all peoples, and at the same time denying our children the opportunity to experience these values. We would be preaching unity and practicing separation.

Racial balance in the schools and compensatory education are two separate, though sometimes related, problems; neither one is a substitute for the other, and both are desperately needed. CORE is, at present, addressing itself primarily to the subject of the predominantly mono-racial school. We believe racial balance to be a necessary condition precedent to an effective program of remedial and compensatory education.

Dr. Spears devoted a large part of his report to compensatory education, and this discussion, while valuable, is only incidentally pertinent to the problems of actual

integration.

Another essential program, and again one which requires a racially balanced school for maximum effectiveness, is intergroup education. By this we mean those educational devices which are concerned with the development of understanding and respect between various ethnic groups. Dr. Spears mentioned the very fine booklet entitled "Feelings are Facts". But are copies of this and similar materials routinely supplied to our teachers? What is being done to develop healthy, democratic attitudes on the part of all of our school staff, not just those few who elect to take a course in this field? Although there are outstanding teachers who are sensitive and aware of the needs in this area, many of our teachers and our students need help in overcoming the unfortunate biases and prejudices which many of us have inherited. Sound programs initiated by our schools to this end could be a vitally effective influence.

Where the first significant contact between white, Negro, and Oriental students does not occur until high school, attitudes of differentness, remoteness, dislike, and distrust have hardened, race consciousness flourishes, and each group tends to isolate itself from the others. Sociological studies are replete with evidences of this phenomenon.

The school system which allows segregation creates among its minority population feelings of rejection, frustration and hopelessness for success in the total community. It nurtures a "don't care" attitude, bitter despair and even violence directed both toward themselves and others. It fosters second class citizenship and rejection of the teacher, the school, and the program. It is a prime factor in the high drop-out rate of Negro students.

Segregated schools also enforce in the white student distorted and unrealistic appraisals of minority groups, and stereotypic attitudes which are harmful to themselves and to our nation. They are a breeding ground for hostility and prejudice.

Programs of compensatory education and of intergroup relations in a deteriorating

mono-racial environment will place us in a position where, like Alice in Wonderland, we have to keep running in order to stay in the same place.

## VIII - DANGERS IN THE PRESENT PERIOD

Dr. Spears states, "We are now faced with the movement to emphasize differences in the color and race of the pupils, with teacher, parent, and child. In some Eastern school systems, such records are now prepared annually. One asks for what purpose do we so label a child, and in turn, post a sign on his school, indicating the racial make-up of the student body at the moment?

"If we were preparing to ship these children to various schools, in predetermined racial allotments, then such brands would serve the purpose they have been put to in handling livestock."

We emphatically disagree that any such suggestion has ever been made. We respectfully suggest that this statement indicates how seriously Dr. Spears has misinterpreted or distorted the intentions, goals, and methods which CORE and other groups and individuals have asked the Board to consider. The attitude expressed in these few lines is perhaps a key to the reason Dr. Spears has been unable to make any recommendation to the Board, for no one can find a solution unless he understands the problem.

An emphasis on differences in color has, unhappily, been with us in America for a very long time. Only the blind or very naive could deny it, for it is all around us, in employment, in housing, in our churches and in our jails, in our social lives and in our schools. And positions of honor, when they come to men like Robert Weaver, the President's top housing official, or our own Jim Stratten, on the San Francisco Board of Education, are hailed in our press as having been awarded to a "Negro".

As long as Negro and white and other Americans know little of one another, as long as our ordinary, day-to-day experiences are separate rather than shared, we will see the color of each other's skin as an emphatic difference.

Most honest and reasonable Americans understand that this is wrong. Many react, despite their understanding, in the same old biased way, for varying reasons. Many are

working to help themselves and others overcome the unreasoned feelings of "different-ness".

We Americans have come a long way in recent years, and it is now public policy that skin color shall not be the mark of a man. And in San Francisco, open prejudice is scarcely respectable.

Our administrators and this Board are constantly seeking and finding ways to improve our educational standards. How can we, in the one area of race relations, sit back and say, "It's not our fault, and therefore it's none of our business"?

We are required legally and morally to place no emphasis on differences in color. This does not mean that we do not see color. On the contrary, where we find community pressures forcing our children to see this "difference", we are obligated to find ways to counteract these outside influences. Our school system can do this only by seeing the color that others see, and helping all children see the color, in realistic proportions, in day-to-day contact, and thereby de-emphasize the importance of color.

Dr. Spears, although he professes by implication that recognition of a child's color has no educational purpose, belies this when he states that during the 1961-62 school year, a course was provided in "Factors in the Education of the Negro Child".

No one asks this Board-- indeed we would strongly protest such a request-- to label an individual child by race. We ask the Board to recognize statistics, census figures, and ghettos, and to consider these when they make their school assignments.

Furthermore, no one dreams of asking this Board for racial quotas or allotments in the schools. We ask only for the devising of an educationally sound program to eliminate gross racial disproportions. We ask that there be a general recognition of racial groupings so that each school reflects as closely as possible the racial composition of the total student population.

Yes, there is a danger in the present period-- danger in being so enamored of the status quo that we cannot recognize our need to find new ways to handle old problems;

danger that we might not even try.

The misconception of the request of CORE and other groups began when, on January 23rd of this year, Dr. Spears publicly stated that elimination of de facto school segregation might mean the end of the neighborhood school policy, although CORE has repeatedly stated, publicly and privately, that it does not oppose neighborhood schools; it opposes only the manner in which school boundary lines are drawn, with the effect of excluding some neighbors, and has asked only that the goal of integration be added to the criteria now used in districting schools. Nevertheless, Dr. Spears' statement, and his subsequent report, have fostered the belief on the part of some segments of our community that they must choose between integration and neighbor hood schools. The cries of "Save our neighborhood schools"! while often made in the mistaken belief that this is in opposition to CORE's position, are not contrary to CORE's stand.

## IX - THE PURPOSE OF THE SCHOOL

Dr. Spears, in his report, says that state school codes speak only of subjects to be taught, and that this is the fundamental purpose of the schools.

Dr. Spears, in his book, Principles of Teaching, says: "The number-one purpose of the American school is to train for American citizenship", and "The wholesome development of the pupil cannot be considered aside from the school's obligation to train for American democracy".

Section 7851 of the California Education Code gives us a clear directive:

> Sec. 7851. Each teacher shall endeavor to impress upon the minds of the pupils the principles of morality, truth, justice, and patriotism, to teach them to avoid idleness, profanity, and falsehood, to instruct them in the principles of a free government, and to train them up to a true comprehension of the rights, duties, and dignity of American citizenship.

A resolution adopted by the California State Legislature on April 3, 1962, states:

> "One of the most essential lessons that American youth could learn is that we are a nation built upon the magnificent contributions of men and women of diverse racial, ethnic, and religious backgrounds".

Dr. Spears refers to the 1954 Brown case and the 1961 Taylor case as being concerned with civil rights, separate from a child's educational rights. Here, again, he has missed the point. Both cases are concerned primarily with the child's educational rights, and it was only upon persuasive proof that segregation per se was a denial of such educational rights that these cases were decided. A racially unbalanced school cannot function properly, and prevents us from achieving the prime purpose of the schools, the training for American citizenship. Further, segregation limits the effectiveness of our subject matter programs, and adversely affects our children's motivation and behavior. Segregated educational experiences are inadequate and inferior. If the purposes of the American public schools are to be realized, integration must be achieved.

We concur with Dr. Spears in his statement that "The school is an instrument through which society both preserves the culture and brings out social change". The most compelling social change of our time in this country is in the area of race relations. It is high time for our schools to take part in this historic development.

## CONCLUSION

Segregated schools are illegal and harmful to our children. We can have racially balanced neighborhood schools in San Francisco, reflecting the racial composition of our total student population, without resorting to quotas or labeling. Compensatory education and programs of intergroup relations cannot be effective within the confines of a predominantly mono-racial school. Where a school has an undue proportion of minority group students, the balance rapidly changes and it soon becomes predominantly mono-racial. Although outside forces contribute to a segregated school situation, inaction by the school board perpetuates and reinforces it. A sound educational system must be an integrated one.

**CONGRESS OF RACIAL EQUALITY**

CORE's request is eminently reasonable and moderate. We ask that the Board of Education declare at its September 18th meeting that its policy be to work toward achievement of a system of racially balanced public schools whose racial composition reflects as closely as possible that of the total student population. To that end, we ask that a study committee be appointed, to work with the administration, and that its primary function be to implement the Board policy no later than September 1963. This committee could also undertake to study the complex problems of intergroup relations and compensatory education.

Such a study should have Board participation; for what citizen is more aware of the school's total problems than a member of this Board? Such a study should have administrator and teacher participation, for they are so aware of the practical, detailed, and multi-faceted problems of the school and classroom operations. And such a study should have informed and concerned representatives of the community groups participating, such as CORE, NAACP, CCU, West of Twin Peaks Community, for we are dealing with problems that concern us all, problems that require communication among ourselves, and much goodwill.

Time is running out. People all over the country are asking, demanding, fighting for an end to second class citizenship. People in San Francisco are waiting, watching, listening, reading, learning. The many good things San Francisco has in the area of race relations make its remaining faults loom larger. The courage and strength of those fighting more dangerous battles in the South make those in the North and West who have been apathetic or indifferent feel even more ashamed of their own acceptance of even the smallest indignity. These are feelings which create bitterness and hostility.

The Board of Education has an opportunity to take the role of leadership at a crucial time, now. Our community has the need, this Board has the authority and the obligation; we hope that it also has the wisdom and the courage.

CONGRESS OF RACIAL EQUALITY

STATEMENT OF

NATIONAL LAWYERS GUILD
San Francisco Chapter

ON SCHOOL SEGREGATION IN SAN FRANCISCO

Presented by Francis J. McTernan

September 18, 1962.

---

To the Chairman and Members of the Board of Education of the San Francisco Unified School District:

This statement is presented to the Board in response to an invitation issued by the Board to interested organizations and individuals to comment upon the report of the Superintendent of Schools, dated June 19, 1962, on this problem.

The National Lawyers Guild is a bar association, with chapters throughout the United States. The San Francisco Chapter is certified as a bar association by the State Bar of California. The Guild has long been concerned with the problems of racial equality in our country and has participated as friend of the court in many of the leading cases in which the courts have enunciated and articulated the constitutional principles and theories applicable in this field. For instance, the Guild participated in the leading case in which the United States Supreme Court outlawed restrictive racial covenants on real property. Guild lawyers have represented clients in the well-known New Rochelle school segregation case and in similar cases in New Jersey, Detroit, and other places in the United States.

The Guild locally has been deeply concerned with de facto segregation in the San Francisco School System and more than a year ago communicated its concern to this Board. Our concern is most deeply felt

in connection with our schools because, as Judge Zirpoli said, in his remarks from the bench, in the Central Junior High School case,

> "The Negro problem is perhaps the most urgent piece of public business facing the United States today, and the social institution that touches this problem most directly is the public school."

My comments tonight on behalf of the Guild will be confined in the main to the area of our competence, namely, the legal and constitutional area. However, I hope to demonstrate to you, ladies and gentlemen, that perhaps the key to the solution of the very grave problems facing this Board is to be found in an understanding, appreciation and acceptance of the legal and constitutional principles which govern the problem, and that a proper appreciation, understanding and acceptance of these principles will provide the basis for the solutions.

When faced with broad problems of constitutional law and social significance, this Board, as a public body, has a duty to look to the decisions of the courts to determine the broad sweep of the decisions and the directions in which they point. Particularly do we believe this approach to be the proper one for a school board of this city, which prides itself on its tolerance and progressive attitude to problems of race relations. We are not here concerned with legal problems of a client in private litigation, where the lawyer or the judge determines, for instance, how far the client can go in taking tax deductions without violating the law. We are concerned with fundamental, broad constitutional issues and principles which touch the very heart of our democratic system. To deal with these problems as one would deal with the legal problems of a business or a client is to fail to recognize the great social forces that play a part in shaping the problems.

With all due respect to my friend Mr. Breyer, for whose personal integrity and legal ability I have the highest regard, I suggest to you that the legal analysis contained in the Superintendent's report is more the approach to the private litigant than the broad constitutional and social issues involved with us tonight. With finesse and legal acumen, the leading cases in the field are distinguished and set aside as if they were of no concern or relevance to the Board merely because the precise legal decisions were on slightly different facts.

One cannot read Brown vs. Board of Education, in which our great Chief Justice and native son of California enunciated the constitutional principles governing the situation, without recognizing that its underlying premise is that segregated education has a detrimental and deleterious effect on the educational and mental development of the minority group children.

The report presented to this Board concedes that there are segregated schools in San Francisco. It is the plain and unmistakable teaching of Brown vs. Board of Education that the very existence of racially segregated schools constitutes a violation of the constitutional rights of the minority group children. This is not only a constitutional problem, but an educational problem. The unanimous Supreme Court declared that the segregation of Negro children generates a feeling of inferiority as to their status in the community that may affect their hearts and minds in a way unlikely ever to be undone. The court points out further that opportunity for extensive contact with other children at an early stage in their educational experience is indispensable if children of all races and creeds are to become inculcated with an understanding of the essentials of our democratic way of life. Thus, it is not fair or correct to state, as does the report,

that the concern of these cases is with the civil rights of a few individuals. They are concerned with the civil rights of a substantial portion of our national population. And these civil rights involve the proper education of Negro children and, as Chief Justice Warren pointed out, the proper education of white children as well, who suffer equally from lack of contact with the minority group children.

Judge Kaufman, a learned and able judge, who now sits on the United States Court of Appeal, had no difficulty recognizing this essential learning of the Supreme Court's opinion in the New Rochelle case, where, although he found deliberate gerrymandering of school districts to force the minority group children into one school, he also found that the de facto existence of a segregated school in and of itself constituted a violation of the civil rights of the minority group children.

[Incidentally, it might be interesting, and perhaps significant, to point out at this time that one of the defendants in the New Rochelle case was Herbert C. Clish, the Superintendent of Schools in New Rochelle, who administered the school system found to have been deliberately segregated. He is the same Herbert C. Clish who was Superintendent of Schools in San Francisco up until a few years ago, and who, prior to his incumbency in San Francisco, was also Superintendent of Schools in New Rochelle.]

The approach to the problem in the report is to make a narrow construction of these cases and to conclude that there is no law being presently violated in San Francisco. One can't help but get the feeling from the report that it is not so important to find a way because what is happening here is legal anyhow and it is not necessary to find a way.

The real fault of the report, therefore, is in its negative attitude when it says that it cannot propose any educationally sound plan to eliminate seg-

regation. But the Supreme Court of the United States says that segregated education is not sound education and I submit that the failure to understand, appreciate and accept the constitutional doctrine enunciated by the highest court of our land is the reason why an educationally sound plan cannot be found to eliminate segregation in San Francisco schools. There is a trite, old, American saying, whose essential truth may be a little obscured by its over-use. But my mother, a schoolteacher deeply steeped in the American tradition, used to say, "Where there's a will, there's a way", and I submit that if there is a will to eliminate segregation in San Francisco schools, ways can be found. I do not think the Superintendent and his able and dedicated staff should underrate themselves by saying the job cannot be done. The job must be done for, as Judge Zirpoli said,

> "The responsibility of reconciling the benefits of a neighborhood school policy with the constitutional requirements for integration rests with the school authorities and will require the wholehearted cooperation of the community, the parents, students and teachers."

I say to you, ladies and gentlemen of the Board, that once this Board adopts a positive policy in opposition to racial segregation in San Francisco schools, with the help of the community organizations, interested individuals, parents and teachers, the administration of our school district can and will find means to lick this problem. It remains only for this Board to take its stand forthrightly and without equivocation that segregation in San Francisco schools must end. Pursuant to that thought, I have taken the liberty of preparing a simple resolution which I urge this Board to adopt:

RESOLVED, that the Board of Education of the San Francisco Unified School District, as a matter of policy, opposes racial segregation in its schools from whatever cause, and to implement this policy, the Superintendent of Schools is requested to take all practical steps to eliminate existing segregation in San Francisco schools and to prevent the rise of segregation whenever or wherever it may occur.

I am authorized, on behalf of my organization, to offer its full cooperation in working with the Superintendent, or any member of his staff, to assist in formulating and executing, if necessary, any such plans and programs. I am sure that dozens of other community organizations and hundreds of citizens also will offer their assistance as well.

Working together with a will to succeed, San Francisco can take the lead in eliminating segregation in the schools, and show the country and the world that we are, indeed, the city that knows how.

not be a policy making body, or in any way a substitute for the Board of Education which is the duly constituted and well qualified citizens body for guiding school matters. However, there are complex intergroup relations and community relations problems intersecting the educational problems in this particular program. There are resources in the community on which the Board could draw to assist it in this unusual task. The advisory committee could be made up of Board members, administrative personnel, intergroup relations experts from our institutions of higher learning, and knowledgeable individuals representing all segments of the community. Such a committee could help relieve the Board from some of the exorbitant time-burdens of preliminary work; could provide some regular and valuable expertise on the overall social problem, without cost; and could comprise an important bridge of communication between the Board and affected parts of the community in this sensitive situation.

## A SUMMARY NOTE

CCU's report has dealt with educational problems created by changing social conditions in San Francisco. The report contains recommendations to the Board of Education in three general areas of remedy - Maximum Integration, Compensatory Education, and Human Relations Education. The report contains recommendations for effective implementation of these remedies.

CCU believes that it is evident that programs of Compensatory Education and Human Relations Education will be effective only to the degree that Maximum Integration exists in the school system.

CCU believes that it is also evident that the programs of Compensatory Education and Human Relations Education can help to assure that the greatest benefits are realized from implementation of the policy of Maximum Integration.

# *Many Colleges Offer Extra Financial Aid To Recruit Negroes*

## Scholarship Picture Brightens In Houston; Princeton Calls Rivalry for Talent 'Intense'

By LAWRENCE LYNCH
*Staff Reporter of* THE WALL STREET JOURNAL

LOS ANGELES—Benny Robinson, a senior with a B plus average at Jordan High School here, figures he will need financial help to get through college. Since Benny's parents both work, the most he could ordinarily expect would be a scholarship paying half his tuition, room, board and other educational expenses.

Benny's school counselors have told him, however, that at least two California universities will probably offer to foot his entire higher education bill. Ironically, the reason for this special consideration is the same one that might have made it harder for Benny to get into college a few years ago: Benny is a Negro.

Prodded by the stepped-up pace of the drive for civil rights, and their own liberal traditions, a number of Northern and Western colleges are becoming increasingly concerned about their small Negro enrollments. As a result, they're making special efforts, including offering extra financial aid, to recruit qualified Negro students.

Qualified Negro applicants, however, are few and far between, educators say. "The annual pool of young Negroes who are prepared to meet the educational standards of universities like Princeton is depressingly small," says Princeton President Robert F. Goheen. "And because there are so few of them, the competition among universities to enroll them is nowadays intense."

### Talent Scout

Two years ago Princeton and the seven other Ivy League universities formed a "cooperative program for educational opportunity." They commissioned Charles E. McCarthy, Jr., a residence dean at Yale, to scout Eastern urban centers and Southern states for Negro high school seniors with academic ability. Last spring, seven Eastern women's colleges joined the program. Mr. McCarthy says a qualified Negro will get all the financial help he needs.

Mr. McCarthy's work and related efforts by individual schools seem to be paying off. Yale's freshman Negro enrollment increased to 12 last fall from six the year before; Princeton's jumped to 10 from "two or three" over the same period. Wellesley College, one of the women's schools participating in the program, last fall brought in nine Negro coeds from Southern Negro colleges to spend their junior year at its Massachusetts campus.

Interest in Negro students goes well beyond these 15 schools. The National Scholarship Service and Fund for Negro Students (NSSFNS) reports the number of colleges accepting its applicants increased to 353 from 319 in the last two years. NSSFNS helps Negro high school students decide where to go to college, passes along their records to interested schools and helps them win financial aid.

TO: SAN FRANCISCO BOARD OF EDUCATION

FROM: CONGRESS OF RACI AL EQUALITY (CORE) San Francisco Branch

It is with great pleasure that CORE appears before this board tonight. We congratulate the Ad Hoc Committee for a report which represents the first official recognition by San Francisco board members that racial concentration in the schools represents a barrier to effective education. We are pleased that the initial phase of "studying the problem" is finally over,and hope we can now all get to work on solving the problem, and implementing the committees recommendations.

Differing semantic interpretations often impede effective communication, and therefore we wish to make it clear that our remarks which follow are not intended to be carping or hypercritical, but rather to insure that we all understand the report to mean the same thing. We consider the report as a whole to be the most forward looking step yet taken in the area of racial problems in the San Francisco schools; it is important therefore, that we do not misunderstand each other.

For example, the committee defines "de facto segregation" - a term frequently used by CORE and other groups, as denoting an overt act not applicable to SF school disctricting. We did not intend it to convey such a meaning, and will willingly drop the term in favor of racial concentration or imbalance.

We direct your attention to the 3rd paragraph of page 8, which as we see it, represents one of the most important changes in policy recommended by the report. We feel certain the committee means that the factor of race always be a criterion in establishing attendance zones and drawing boundaries, and that changes be made for the purpose of imp roving racial balance wherever practicable and reasonable and consistent with a neighborhood school plan. The present wording is somewhat reversed, although we believe that the spirit of this report indicates this is the intent. Incidentally, the word "alleviate" in line 3 of this paragraph we presume to be a typographical error, and that it should be "eliminate", - otherwise the balance of the paragraph would have no meaning.

Implicit in this same recommendation by the ad hoc committee is that better racial integration of the schools is a desirable goal - for otherwise there would be no purpose in taking the racial

factor into account in districting. Since the report is primarily a philosophical guideline and a statement of recommended board policy, we believe it to be of utmost importance that this principle of the educational desirability of integrated schools be explicit rather than implicit. In line with this, we would urge the board to direct that this new ethnic factor be added to districting criteria and be considered of prime importance so that there can be no doubt of the board's intent.

One further comment on ths paragraph: the phrase "as the need arises". We would assume that this would apply immediately and is not intended to be limited to the future. Effective implementation of this report would necessarily require that the highest priority be given to a reexamination of the district lines as they now exist throughout the city. We now admittedly have schools of heavy monoracial composition, and the need in these schools is urgent

CORE agrees in principle with the committee's recommendations regarding pupil transportation on p. 14, but asks that the Board, in adopting this portion of the report, include a requirement that wherever bussing is required <u>for other purposes</u>, the racial factor be considered in determining the receiving school. Again, a total reading of the report would indicate that this is the committee's intent. We emphasize our agreement that bussing should not be used for the <u>sole</u> purpose of achieving integration.

CORE commends the committee for recognizing the need for an extensive human relations program. The report, of course, does not purport to go into details, but we hope that the Board will require all school personnel, both certified and non-certified, to participate in some phase of such a program, and that pupils' education in this subject will begin early in their school career.

CORE believes that the establishment of a position for a Human Relations director is a crucial part of the Committee's recommendations, and essential for effective implementation of the total program. Although the recommendation was made under the subheading of "Human Relations", it is apparent that the committee recognized the racial implications of all the topics discussed in its report. We are therefore confident that the person hired for this position would have responsibility for implementation of policy in all of these areas. If such a person is to be effective, it is necessary that he have high administrative status, second only

to the superintendent himself, and that the salary be commensurate with the importance of the job. We would hope that the Board would seek applicants with extensive and intensive experience in the field of human relations, and that it would attract a person of high reputation in this field.

Again, we congratulate the Ad Hoc Committee for its work, and commend them for their recognition of the need to solve the main facets of the racial problem as it relates to our schools. We hope we have not misinterpreted the meaning of the report, and we do ask to be corrected if this should be so.

CORE wants to cooperate with the Board and the staff wherever it can, both in implementing the recommendations and in interpreting the position of the school district to those segments of the community that look to CORE and similar groups for guidance. We look forward to a fruitful period of educational progress and mutual good will.

Respectfully submitted,

CONGRESS OF RACIAL EQUALITY
San Francisco Chapter (CORE)

## CONCLUSIONS AND RECOMMENDATIONS

*Statement by Commissioner C. L. Dellums to members of the board, Oakland Unified School District, at a conference in Oakland, June 16, 1964*

Our meeting today is for the purpose of discussing the report of the FEPC investigation of your district's practices, copies of which you have received.

Instructions to our investigator were to be fair and impartial in carrying out his fact-finding assignment. I believe you will agree with me that he followed those instructions to the letter. Now that the facts have been collected and analyzed, I am ready to place before you some positive steps that should be taken toward improving your practices.

It is a serious matter to violate the rights of people because of their race, religion, national origin, or ancestry. I believe that it is a mistake to treat such violations lightly. Our children, whose education is entrusted to the public schools, are this country's most important asset. Any teacher or school administrator who abuses his trust by limiting the education of children—because of preconceived notions of what they can or cannot learn, based on their race or ethnic origin—is doing a disservice to the community and is doing the children almost irreparable harm. This is an offense as serious as those written in our penal codes.

I believe that the Oakland Unified School District, and other school districts, should deal sternly with certificated personnel who act in a discriminatory way according to stereotyped ideas of what a child can achieve because of his race, color, religion, national origin, or ancestry. I recommend to you that hereafter if any principal, administrative head, counselor or teacher takes the position, either verbally or by his actions, that no Negro pupil in his school has the ability to qualify for a professional, technical or executive career, such a person is not fit to be entrusted with the education of Oakland's children, and should be dismissed.

## ATTITUDES OF ADMINISTRATORS

You have personnel of this kind who are dealing with children and are shaping or mis-shaping their lives. An example is the counselor whose interview with our investigator is described in Section II of my report. He turned the pages of a pamphlet which pictures such occupations as factory executive, pharmacist, salesman for an oil company, engineer, store manager, tool designer, accountant, doctor and lawyer, and repeated: "We have no Negroes in this school who could qualify for these positions." And this is only one of a number of cases indicating that some key school personnel are convinced that Negroes are limited in their possible attainments.

Our investigation reveals that the attitudes of some administrators, principals and teachers leave much to be desired by way of according equal respect to all human beings without regard to their race, creed, or ancestry. I am therefore recommending an intensive program of in-service training to educate the educators. They must come to realize the interpersonal and intergroup problems the children have to live with in this world. They must be trained to understand minority-group children better, to appreciate their true qualities, and to accord them the dignity to which all children and adults are entitled.

I emphasize this recommendation because I feel that the offense of prejudging a whole group of children is more destructive to the community than any other imaginable act. A training program in human relations is sound educationally and will benefit the entire Oakland community.

As to the hiring and assignment of teachers, it appears that until very recently you hired Negro teachers for jobs in predominantly Negro schools, and you rarely hired any teachers of the Spanish-surname group. On the basis of the information available to us, teachers of Oriental descent appear to have been hired in more representative numbers.

It seems to me that the placing of Negro teachers in predominantly Negro schools indicates some prejudices about Negro teachers as well as about Negro students. My report indicates that there are school personnel who believe that Negro children are capable of only limited achievement. If Negro teachers are hired exclusively to educate these children, it appears that a similar belief is held about Negro teachers. The result, if such attitudes govern the decisions of authorities in a predominantly Negro school, is to create a situation of inferior educational opportunities which will be reflected in low morale and a failure to motivate the children to become qualified for the more exacting and more rewarding types of employment careers.

Therefore it is my conclusion that it would benefit both the pupils and the teachers who are members of minority groups if teachers were hired on the basis of merit to fill vacancies wherever they exist. I submit that it is unsound educationally, as well as contrary to equal employment rights, to place Negro teachers mainly in schools which are predominantly Negro, and that an administrative head who persists in this practice is unfit to be employed by the school district and should be dismissed.

Now let me turn to some other points in my report.

## OPPORTUNITIES FOR PROMOTION

On the promotion of certificated personnel, it is all too clear that opportunities for minority-group teachers to obtain higher-level positions are slowed than for teachers of the majority group. I am aware that the school district recognizes this and has taken some positive steps to overcome it. I recommend that these steps be accelerated, as I believe that they will help to create an educational environment which will be healthy and will have a beneficial effect on human relations in the schools and in the community.

On substitute teachers, many people in the minority community believe that minority applicants for teaching positions are relegated to the substitute list before they are considered for hiring as regular faculty members. My report does not prove this, nor does it disprove it. I do contend, however, that 400 substitute teachers, of whom approximately 40 or 50 percent are members of minority groups, form a reservoir which should be tapped as a source of recruitment. I recommend that the school district make a conscientious effort to review the applications of these teachers at least once a year, to make certain that no well qualified applicant is bypassed.

On teachers in the Spanish-surname group, I am particularly distressed at their poor representation in the Oakland Unified School District. The report shows that there are only ten teachers of Spanish surname in all your elementary schools. The report also indicates that you have a substantial number of Spanish-surname pupils. You are now required to teach a foreign language in the elementary schools, and the selection of Spanish for this program would be wise for human relations reasons as well as because of California's Spanish and Mexican heritage and because the Spanish-surname group is the state's largest minority.

Nevertheless, we find that German or French is taught in some schools because there is no one capable of teaching conversational Spanish. The child who may speak only Spanish at home must struggle to learn English, which is foreign to him, as well as French or German, which also are foreign to him. Thus he is burdened with trying to learn and use two foreign languages. This is a very serious problem. To correct the situation, it seems to me that the district has an obligation to make certain that there are enough qualified teachers in each school to meet this special educational need. I recommend that you seek out teachers with ability in conversational Spanish for positions in every elementary school.

Finally, on non-teaching personnel, I do not believe that classified positions are as sensitive, in most instances, as the certificated positions. I do feel that employees who manifest racial or ethnic prejudice should not be placed in positions of authority. You will note from my report that your classified employment lags far behind your certificated employment in the representation of minority groups. Negroes have been limited almost entirely to janitorial and part-time school lunch positions. An awareness of this problem seems to have occurred, and it appears that corrective steps are being taken. I am asking you to pay serious attention to merit employment in your classified section. You should make certain that the people who do the hiring for these positions are free of prejudice and are committed to hire qualified persons without regard to race, color, religious creed, national origin, or ancestry.

## SUMMARY OF RECOMMENDATIONS

In summary, my present recommendations to you are the following:

1. Dismissal, if necessary, of any principal, administrative head, counselor or teacher whose educational approach to minority-group students is limited by prejudice as to their possible achievement;

2. An intensive program for all certificated personnel of in-service training in human relations;

3. Hiring of teachers on merit, without regard to their race, creed, or ancestry; and assignment of minority-group teachers to all schools, avoiding any concentration in particular areas;

4. Equal promotional opportunities for all teachers, without regard to race, creed, or ancestry;

5. Use of the list of substitute teachers as a recruitment source;

6. A conscientious effort to employ Spanish-surname teachers or others with a knowledge of conversational Spanish;

7. Closer surveillance by the Board of hiring practices with respect to classified personnel.

We shall follow the usual FEPC procedure of review in six months to learn what changes have taken place in your district's practices.

# REPORT OF OAKLAND UNIFIED SCHOOL DISTRICT INVESTIGATION

The Fair Employment Practice Commission authorized an investigation of the Oakland Unified School District June 4, 1962 under the provisions of Section 1421 of the California Labor Code, upon request made of the Commission by interested citizens and citizen groups. Chairman John Anson Ford of the Fair Employment Practice Commission assigned Commissioner C. L. Dellums to conduct the investigation. Mr. Donald K. Henry, Northern California Area Supervisor, assigned Consultant Hugh Taylor to assist Commissioner Dellums.

## SCOPE OF THE INVESTIGATION

The City of Oakland, California, located in Alameda County, had, according to the 1960 census figures, a total population of 367,548. The census further states 83,618 of its residents were Negroes; 13,407 were other non-whites; 23,729 had Spanish surnames; and that 246,794 were Caucasians without Spanish surnames.

The public school needs of the City of Oakland are supplied by the Oakland Unified School District. To meet these needs the District operates a junior college with two campuses, 6 high schools, 16 junior high schools, 64 elementary schools. These schools are the subject of this investigation.

The Fair Employment Practice Act of the State of California is concerned with the individual's right to "seek, obtain, and hold employment without discrimination because of race, religious creed, color, national origin, or ancestry. . . ." Under Section 1421 of the act the Commission is empowered ". . . to prevent unlawful practices."

This investigation treats the school district as an employer and tries to determine to what extent, if any, the individual's right to "seek, obtain, and hold" employment with the district is affected by unlawful considerations of race, religious creed, color, national origin or ancestry. This report is further concerned with the product of the school district, i.e., the students. The school prepares students to "seek, obtain, and hold employment" along with its other duties. It is perhaps the principal institution in our society for shaping the occupational and professional lives of our young people; in recognition of that fact this report attempts to get a glimpse of the attitude of the school district toward youngsters in preparing them for the work-a-day world, and particularly toward minority youngsters.

The purpose of this investigation is, then, two-fold. (1) To review the district's role as an employer; (2) To study the district's attitude toward the minority group student and his preparation for an employment career.

## SOME SPECIAL CONSIDERATIONS

Ordinarily, an investigation by the Fair Employment Practice Commission is not a public matter. The investigations are handled confi-

dentially and no information is imparted to the public. The names of respondents and complainants are not made public by Commission policy and the endeavors at conciliation are, by virtue of the Act itself, confidential. The Fair Employment Practice Act provides that a breach of this confidentiality as to endeavors at conciliation, is a misdemeanor and a cause for disciplinary action for civil service employees. The Commission may, however, permit revelation of certain aspects of a case to the public, when the case is of special public concern. Endeavors at conciliation, however, are never permitted to be revealed. In this case, the Oakland Unified School District matter has long been a public concern. This report is written with the understanding that it might be released in part or in full to the general public.

Another departure from the usual procedure in handling an investigation is worthy of mention. We are giving copies of this report to the School District at their request. The usual practice is not to give a copy of the report to the respondent but merely to discuss the investigation with the respondent.

## METHOD OF CONDUCTING INVESTIGATION

At the outset of the investigation, the office of the superintendent of the school district and the district's board of education either knew very little or would admit very little about the racial composition of its employees. The district professed color blindness in regard to its teaching staff and in regard to its classified personnel. Under these circumstances it was felt that the most effective manner of conducting the investigation was to visit each school within the district. The assigned Commissioner's assistant was instructed to ascertain the total number of teachers employed in each school including the number of teachers of the Negro race, the number of teachers of Mexican-American background, and the number of teachers of the Oriental race. The investigator was instructed to solicit the help of the principal and other members of the school faculty to determine the approximate percentage of Negro, Mexican-American, Oriental, and Caucasian students within the school population. This investigation is but one of several hundred cases that the Commission is presently investigating with the assistance of staff. Because of the size of this investigation, certain priorities had to be given to it. A method was devised during the investigation for getting at those things that the Commissioner wanted in a minimum amount of time. The investigator devoted each Tuesday for one school year to this investigation. At the outset the investigator spent three hours at each school he visited. During this three hour period probationary teachers were interviewed; the purpose of interviewing them was to gain knowledge of their experiences as new employees. The school district has a stated policy that it is supposed to follow in the hiring of certificated employees. Interviews with probationary teachers, all of whom came into the system within the last three years, afforded an opportunity to determine to what degree the district followed its own hiring policy. These teachers were interviewed without regard to race, and as a result an excellent opportunity was afforded the investigator to compare the experiences of the Caucasian certificated staff members in getting their jobs with the experiences of the minority certificated staff members.

After the initial stages of the personal visits made by the investigator to each school, the investigator, having refined his interviewing techniques, was later able to visit six schools in one day; however, in the latter stages no effort was made to speak with the individual probationary teachers. New emphasis was placed upon the type of contact with each principal or other key faculty member. The Commissioner wished to leave with each principal a feeling that his school should become more concerned with the problems of merit employment, and with the problems of preparing all of its students for employment careers. Part of the task was to erase the color blindness of the district and to replace it with color consciousness. To accomplish this, a direct attack on color blindness was made. Questions were asked about the number of Negro teachers and the percentage of Negro students in the school population. The same questions were asked about Mexican-Americans and Orientals.

One principal, when asked what was the percentage of Negro children in the school population, answered "I don't know. Color means nothing to me, I only see people, never colors." "Oh come now," the investigator replied, "we seldom see a person without seeing his color. You are not asked for anything more than an estimate. Surely you must have some idea?" He answered in this manner. "We have forty-three Negro students, twelve Mexican-Americans, fourteen Orientals, and one American Indian."

In another instance, the principal when asked if he had any Negro teachers on his staff, insisted that he did not know. He stated that the policy of the school district was one of color blindness, and that he was color blind by virtue of his upbringing.

The roster of teachers was used to enable this principal to reflect on each teacher to find out if he really knew who was and who was not a Negro. He was asked if each teacher was a Negro. For the first few names he replied, "I don't believe so." Later on he began to reply, "No this teacher is not a Negro." Finally at a name near the end of the list . . . he was asked the usual question. "Is this teacher a Negro?" "No," he replied, "but her husband has about one-eighth Negro blood. You see he is from Hawaii, and his paternal grandfather's father migrated from Jamaica to Hawaii and he was a Negro."

## ATTITUDE OF THE OAKLAND UNIFIED SCHOOL DISTRICT TOWARDS THE INVESTIGATION

When the Commission authorized the investigation under Section 1421 in June, 1962 the then Superintendent of the Oakland Schools, Mr. Selmer H. Berg, was retiring as of June 30, 1962, and a new Superintendent, Dr. Stuart S. Phillips, had been selected by the Oakland School Board to succeed him beginning July 1, 1962.

The changeover from one superintendent to another presented a problem to the assigned Commissioner and his investigator. Recognizing the need for a new superintendent to familiarize himself with the duties of his office, the Commissioner did not wish to impose upon him the additional burden of coping with the employment problems of minority groups until that superintendent had full control of his new office. To overcome this problem, the investigator had several conferences with Superintendent Phillips and members of his staff before any actual

work on the investigation was commenced. During these conferences, the ground rules for conducting the investigation were agreed upon. These agreements proved to be of assistance to the Fair Employment Practice Commission as well as to the Oakland Unified School District. The superintendent, acting upon the advice of the District Attorney of Alameda County, stated that he felt there should be no general survey of the personnel records. This was agreed to and followed. This report then is based entirely upon observation of the investigator, on material supplied by administration of the school district, and on information supplied by personnel from the various schools.

The attitude of the superintendent and his staff at the outset was one of general apprehension. There appeared to be distrust in some quarters, but as the investigation progressed any distrust that was noticed at first seemed to be dissipated. An atmosphere of cooperation, short in some cases of completeness, was created. The office of the superintendent itself became a significant ally in aiding the investigator to make his rounds of the various schools. Towards the end of the investigation it began to appear that there had occurred a complete relaxation of any tensions that might have existed. There was a noticeable desire, evidenced by almost all of the personnel contacted, to cooperate fully—to answer honestly—even when the answers were not favorable to the school district. In short, there appeared to be a desire on the part of the administration to face the problem squarely and honestly. There also appeared to be a desire to work towards improvement wherever it was determined that improvement was needed.

## PROBLEMS INHERENT IN THE INVESTIGATION

In an investigation of an entire school district in a large community such as Oakland, sides tend to be chosen; one side finding everything wrong and the other side finding nothing wrong. The findings of each of these sides are often based on honest belief, and sometimes based upon blindness, but seldom upon thorough knowledge of that thing that they are upholding or that they are condemning.

The investigator realized that only through objective and unbiased observation of the school district could the facts relevant to this investigation's two-fold purpose be obtained. No conscious effort has been made to select from among the relevant facts.

The problem of de facto segregation, although related to employment practices and certainly related to attitude towards the students, was not entered into of itself and is touched hereupon only as it is relevant to the purposes of the Fair Employment Practice Act. Any in-depth studies of de facto segregation are left to others.

## SECTION I

### METHOD OF HIRING NEW TEACHERS

The Superintendent of the Oakland Unified School District is the chief executive officer. Under him are four Assistant Superintendents, the Business Manager, and the Director of Personnel. The Director of Personnel is the person through whom all initial applications for certificated positions must pass. After the application has passed through the Director of Personnel's office and been approved by him, a personal interview is set up with the office of the Assistant Superintendent of Elementary Schools if the applicant is for Elementary Schools, or with the office of the Assistant Superintendent of Secondary Schools if the applicant is seeking a secondary teaching position.

The Director of Personnel checks the application for form and for any obvious shortcomings in preparation, then passes it on to the office of the Assistant Superintendent involved. In the office of the Assistant Superintendent an interview is arranged for each teacher applicant and in addition to checking the stated qualifications, a subjective evaluation is made without the knowledge of the teacher applicant. Evaluation is made concerning the applicant's (1) knowledge of subject matter, (2) personality, (3) interest and enthusiasm, (4) general appearance, (5) voice and speech qualities, and (6) professional attitude. (See Appendix A) The applicant, in each one of these areas, is rated as outstanding, above average, average, or below average. In addition, there is a general rating of the applicant. If the applicant receives a general rating of average or better, he is then in a position to stand in line with his fellow competitors to be referred to any school where a vacancy exists.

The new teacher is hired by the Assistant Superintendent's office, and assigned by this office to the school where the vacancy exists. In no case does the principal of the school participate in the hiring procedure. However, there are instances where either a student teacher or a long term substitute who has worked at a particular school is recommended for hire by the principal; such teachers may be reassigned to the school where they did their substitute or practice teaching.

After the new teacher has been hired and assigned to a particular school, it becomes the responsibility of the principal to supervise the new teacher and to note his professional development and growth. It is the principal's evaluation of the teacher during the three year probationary period that determines whether the new teacher will become a tenured member of the teaching staff.

It is the principal's responsibility to acquaint the probationary teacher with all aspects of the probationary period. It is also the principal's duty to render whatever assistance appears necessary and to familiarize the new teacher with the *Guide for Evaluation and Improvement of Professional Services.* This is a booklet developed by a group of teachers and administrators of the Oakland Unified School District. It is designed as an aid in analyzing the strength and weak-

ness of the teacher. It has been accepted by the Superintendent for use in all of the schools. The principal makes suggestions for improvement wherever they are needed. The new teacher is completely dependent upon the leadership provided by the principal; the principal in turn is governed by the *Guide for Evaluation and Improvement of Professional Services* prescribed by the Oakland School District. The new teacher must be evaluated by the second Thursday of each January; by the fourth Monday of each April, if unsatisfactory; and by the second Thursday of each May, if satisfactory. The school district has set definite and ascertainable minimum standards of attainment for the probationary teacher. The first year teacher is allowed to perform at a lower level than the second year teacher who in turn is allowed to perform at a lower level than a third year teacher. (See Appendix B) To gain tenure the probationary teacher at the end of the third year must perform at each level listed on the evaluation chart with a satisfactory rating. Above this rating there are ratings of very satisfactory and superior. The new teacher at the time that each evaluation of his performance is made is to have a conference with the principal. The rules regulating this conference as stated in the Guide require that "a principal's attitude should be constructive in his analysis of a teacher, frank and honest." The District further requires that "unsatisfactory teachers must not be given the impression on their probationary report that their teaching is of acceptable quality." Prior to the conference with the probationary teacher, the principal visits the teacher's classroom and observes the teacher in an actual classroom situation. Most principals state that they make several visits in order to observe the teacher over a period of time. They also report that the teacher is usually informed in advance of the visits, and of the purpose of the visits.

The principal is required to confer with the new teacher about the evaluation and to point out the meaning of the evaluation procedure. The new teacher is hired as probationary and must serve a satisfactory three year probationary period before obtaining permanent tenure. The principal's evaluation is submitted to the Assistant Superintendent in charge of his school and the Assistant Superintendent in turn presents it to the Superintendent with his recommendation as to whether the new teacher is to be retained after the completion of the three year probationary period. The final action is taken by the Board of Education of the School District. After the teacher has gained permanent status he is then rated by the school principal every five years or at such other times as warranted.

## RECRUITMENT OF TEACHERS

For the 1962-1963 school year with which this report is basically concerned, there were 318 new teachers hired by the Oakland Unified School District. These 318 were chosen from among 3,325 applicants. There are 119 elementary teachers, 128 secondary teachers, 22 city college teachers and 49 special field teachers. The ratio of applicants to hires is roughly 10 to 1. The Oakland School District, in order to have such a wide field to select from, has found it necessary to send recruitment teams from the Superintendent's office to a number of states and to a number of preferred schools within those states. In other instances the District makes only written contacts with certain out-of-state

schools. For the hiring in the fall of 1962, the School District sent its recruitment team to 23 universities located in 10 states and made written contact with 12 other schools. The District also received applications from 26 schools located in 18 states with which the District made no personal or written contact. In addition to the out-of-state recruitment, the major recruitment sources for the Oakland School District are the colleges located within the State of California. There are 22 colleges in the state that were a source of teacher recruitment in the fall of 1962. The California Teachers Association, and the Kemp Agency were still other sources of recruitment. From these sources, the district recruited 209 of the 318 new teachers employed. (In addition, 23 former Oakland teachers were rehired; 22 teachers who were contacted directly by the administrative staff and 64 of those who applied directly were hired.) (See Appendix C) The states that the teachers were recruited from were principally Western, Middle Western, and Eastern states. In no instance was there a personal contact with a school located in the Southern part of the United States, which would seem to indicate that teachers from this region are not as sought after as teachers from the other regions of the United States. There are, however, five Southern states, Florida, Georgia, Louisiana, Oklahoma, and Texas, which have schools that furnish applicants to the Oakland district and most of these schools in the southern states appear to be schools with predominantly Negro student bodies. The school district makes no personal or written contact with any of the southern schools but the schools serve as a source for new applications with the initiative being provided by each of the southern schools rather than by the Oakland School District itself.

## EVALUATION OF HIRING PROCEDURE

The experience of Commissioner Dellums and his assistant in investigating the hiring procedure indicates that the school district does follow its stated rules for hiring new teachers. Many probationary teachers were interviewed; all had similar experiences in getting hired. All appear to have gone through the same procedure with the Director of Personnel and later in the oral interview. Each new teacher had been informed of the probationary teacher evaluation procedures. Every teacher interviewed had been evaluated at least once or had held a conference with the principal prior to the evaluation. Each teacher seemed to have had a reasonable understanding of his performance and what was expected of him.

With 3,325 applicants for 318 positions, it would be difficult to sustain a charge of discrimination in hiring against the School District. This is true because there are roughly 10 applicants for each vacancy; several of these applicants could probably be defended as the best available applicant.

The Oakland Unified School District considers several factors in selecting staff members. One of the factors is age; others are sex, degrees held and years of teaching experience. (See Appendix D) The District consciously seeks diversification in these areas. While the Commissioner does not advocate that the school district hire teachers according to race, he certainly does advocate that some method be found to insure that minority group applicants are employed and assigned on the same basis as other teachers. The Commissioner is advocating a kind of color

consciousness which would make certain that teachers from all racial and national groups would be selected when qualified and for any position at any school.

## PLACEMENT OF MINORITY GROUP TEACHERS

There is some suspicion on the part of the Negro community and others that Negro teachers and other minority group teachers are assigned to predominately Negro schools. For the purpose of determining where the minority group teachers are assigned, this report will follow the practice of labeling schools enrolling 75% or more Negro students as predominantly Negro; and schools enrolling 75% or more Caucasian students as predominantly Caucasian; and schools enrolling less than 75% Negroes or Caucasians as racially mixed.

In Appendix E it can be seen that of 1,158 teachers in the elementary schools, 164 are Negro, 10 have Spanish surnames, and 54 are Oriental. At the elementary level, 78.1% of the Negro teachers are at predominantly Negro schools; 1.2% of the Negro teachers are at predominantly Caucasian schools; and 20.7% of the Negro teachers are teaching at racially mixed schools. According to the *Report on the Oakland School District to the U. S. Civil Rights Commission* by Ira Michael Heyman, there are 16 predominantly Negro schools, 21 mixed schools and 27 Caucasian schools. Of the 164 Negro teachers in elementary schools, 98.8% are teaching in 37 schools and are practically excluded from 27 schools. Of the Oriental teachers, 21, or 38.9% are at predominantly Negro schools; 9, or 16.7%, are at predominantly Caucasian schools; and 24, or 44.4% are at racially mixed schools. Of the Spanish surname teachers, 30% are located at predominantly Negro schools and 70% are at racially mixed schools.

Of the 105 Negro teachers in the junior high schools, 63, or 60%, are teaching at predominantly Negro schools; 3, or 2.8% are teaching at predominantly Caucasian schools; and 39, or 37%, are teaching at racially mixed schools.

In the senior high schools, 18 Negro teachers or 41% are assigned to predominantly Negro schools; 10, or 22.7%, are assigned to predominantly Caucasian schools; and 16, or 36.3%, are assigned to racially mixed schools.

Of the Spanish surname teachers at the high school level none are assigned to Negro schools; 6, or 75%, are assigned to Caucasian schools; and 2, or 25%, are assigned to racially mixed schools.

Of the Oriental teachers in high schools 1, or 9.1%, are assigned to Negro schools; 6, or 54.5%, are assigned to Caucasian schools; and 4, or 36.4%, are assigned to racially mixed schools.

Two hundred and nine or 66.8% of the Negro teachers are assigned to predominantly Negro schools; 15, or 4.8%, are assigned to predominantly Caucasian schools and 89, or 38.4%, are assigned to racially mixed schools.

It clearly appears that Negro teachers have heretofore been assigned to schools with a large number of Negroes in the student body and were not considered on an equal basis for schools without a significant number of Negroes in the student body. An inescapable conclusion, it seems, would be that Negro teachers are hired principally to fill vacancies in Negro schools. This practice would certainly not be in keep-

ing with the schools' stated policies of merit hiring and non-discriminatory assignment, not to mention the Fair Employment Practice Act.

The School District is engaged in the process of reevaluating this practice and apparently plans to do something about it. It appears that if the district ever thought that Negro teachers were more capable of teaching Negro students than they are of teaching Caucasian students, this notion has been dispelled by the experiences that the district has had with some of its Negro teachers. The investigator found some Negro teachers who resented teaching Negro children. The School Board has also had this experience. There are some Caucasian teachers who prefer teaching in predominant Negro schools. It also is apparent, among some Negro as well as some Caucasian teachers, that teaching in the hill schools is regarded as a status symbol.

As a general rule, however, the great majority of teachers, whatever their color or ethnic grouping, seem to become attached to the school where they are assigned. They develop emotional ties to its program, and to its children regardless of race or neighborhood. Most teachers state that they have no desire to be transferred to another school, even to one in the neighborhood in which they live.

One noticeable aspect of the racial and ethnic composition of the Oakland teaching staff is a very small number of Spanish surname teachers, there being but 35 in the entire school system. One result of this is that with the new foreign language teaching requirement for elementary schools, and with Oakland's 68 elementary schools having only 10 teachers with Spanish backgrounds, a ready made recruitment source for teachers of conversational Spanish is untapped. To fulfill the foreign language requirement, the principal determines the language that will be taught in his school not on the basis of which language is desirable but on the basis of the language knowledge of his faculty members. This leads, in some cases, to Spanish speaking children being required to struggle not only with English, but also with German or French, as well as their own Spanish language. A perhaps sadder result is that the non-Spanish speaking students are denied a chance to learn a language which might enable them to relate better to their often ostracized classmate—the Spanish speaking child.

## THE SUBSTITUTE TEACHER

The Oakland Unified School District has approximately 400 substitute teachers. A substitute teacher, like a regular teacher, is one who has received his credentials from the State Department of Education and is eligible to teach at the elementary or secondary level according to the nature of his credential. Every school district has a reservoir of credentialed teachers living in or near its area that can be called upon in an emergency to fill a classroom position in the absence of a regular teacher. Many substitute teachers are substitutes because they prefer this as a means of supplementing the family income and do not wish to be considered for full time teaching positions. Other substitute teachers are active applicants for regular teaching positions, but limit their applications to one or two school districts because of their desire to live in a certain community and thereby also limit their chances for regular employment. Still another group of substitute teachers are substitutes because in the judgment of the school districts where they apply they are marginal applicants.

The substitute teachers may be hired on a day-to-day basis or they may be given a long term substitute job filling in for a teacher who may be absent for several months or even an entire school year. The school district, in selecting a long term substitute, usually applies the same evaluation procedure to this type of substitute as the district would apply to a teacher for a regular appointment. The teacher who is hired on a day-to-day basis is very often a teacher who is not likely to receive long term substitute work and who is not likely to receive a permanent appointment with the district.

Not much factual information is known about the racial composition of these teachers. The school district itself would have a difficult time in determining the racial composition of this group. However, some insight can be gained as to who they are by determining how frequently teachers of different races turn up at a particular school during a given year on a substitute basis. Almost every school in Oakland, whether it has Negroes on the faculty or not, states that it has had some Negroes fill in as short term substitutes and a few schools report that the majority of their substitutes have been Negro. Almost all of the schools indicate that a good portion of their substitutes has been Negro. It seems a fair estimate that from 40 to 50% of the substitute teachers in the Oakland Unified School District is of the Negro race. This is a very rough estimate; it is believed to be accurate; but there is no statistical information to verify it.

One of the suspicions of the Negro substitutes and of many people interested in the employment of minority group teachers, is that most Negro applicants are relegated to the substitute work and must prove their classroom ability in this manner before they are eligible to be considered for hire on a regular basis. This belief is widespread.

There is no way to determine whether the suspicion is justified or not; questions put to the administration on this problem were met with a denial. In dealing with the suspicion regarding the placing of Negroes on the substitute list, another aspect is worthy of consideration. As previously stated, the school district, in recruiting teachers, has a preferred list of schools which are located in the West, the Middle West, and the Eastern part of the United States. The schools in the Southern part of the United States are for the most part not included on the preferred list of schools. It appears that many of the Negro teachers are graduates of predominantly Negro schools in the South. Most, if not all, of these schools are substandard by comparison with the schools on the district's preferred list. The administration will not admit that they regard the training of these teachers as inferior to that of teachers from the preferred schools but such a determination would seem inevitable and might even be justifiable. Further, these teachers whose training has been in the Southern schools that are predominantly Negro more often meet rejection on the subjective evaluation than the other teachers. In other words, during the oral interview where the teacher applicant is being subjectively evaluated without his knowledge, the item of "voice and speech qualities" is more likely to trip up the Negro applicant from Southern schools than it is an applicant from the preferred list of schools. Caucasian applicants from Southern schools would, of course, have the same problem. But the Caucasian applicant from the South constitutes a rather insignificant percentage of the total number of Caucasian appli-

cants. In the matter of "voice and speech qualities" the strong regional accent is regarded as disqualifying for the elementary school system. It then is apparent that some Negro applicants would be disqualified because of "voice and speech qualities" if they have attended a predominantly Negro school in the Southern part of the United States, and if they speak with a strong or noticeable regional accent. It is also apparent that even without the regional accent an applicant from one of these schools does not on the face of the application appear to have received as good a training as an applicant from the schools on the preferred list.

It is possible then for the Negro applicant to be unsuccessful more often than the Caucasian applicant without the element of discrimination being a factor. The teacher who is not qualified for regular employment because of "voice and speech qualities" may be used on a short term substitute basis and in some instances can overcome the "voice and speech" difficulties and be eligible for hire on a regular basis at some later date. This then would appear to indicate that an inordinate number of Negro applicants could become substitutes without the District consciously planning to make them prove their worth before being hired, or without the District practicing discrimination in hiring.

Another factor to be considered which might affect the Negro applicant more than the non-Negro applicant, is the choice of the community in which the applicant wishes to live. Most new teachers who are seeking employment will apply to many school districts located in rural as well as urban areas. Quite often the Negro applicant decides that he would like to live in a certain urban area and applies only to school districts near the community where he chooses to live. This choice is often made because of knowledge or belief that they will find more discrimination in some areas than in others. The chances of being hired when such a restriction is made are much less than when the teacher is willing to go wherever the job exists. It must be remembered that each teacher is roughly one of ten applicants seeking the same vacancy and if a teacher restricts his place of employment then that applicant is more likely to be unemployed or relegated to the substitute teaching list than the applicant who does not place restrictions on areas where he is willing to accept employment.

Another factor contributing to the higher percentage of Negroes on the substitute list than on the regular faculty is probably the issue of discrimination in hiring. Discrimination can be subtle and can be carried on without the administration consciously realizing that it *is* discriminating. The section of this report that deals with the assignment of Negro teachers indicates that 66.8% are assigned to predominantly Negro schools. This in effect leads to the inevitable conclusion that the Negro teachers have primarily been hired to teach Negro students and that the non-Negro teachers, especially the Caucasian ones, have been hired on the basis of merit to fill vacancies wherever they exist. This conclusion must follow, unless it could be demonstrated that each time a Negro teacher is hired the vacancy just happens to be in a predominantly Negro school, or perhaps in a racially mixed school. It does not seem that this could be true; therefore, discrimination in placement must be considered as one of the reasons

that Negroes constitute a larger percentage of the substitute teaching list than they constitute of the regular faculty.

## ADMINISTRATIVE PERSONNEL

This section will consider administrative personnel who are defined as Principals, Vice Principals, Guidance and Attendance Personnel, Special Education Personnel, Health Personnel and Counselors.

| Principals, Vice Principals and Acting Vice Principals | *Total Number of Employees (as of September 1962)* | *Negro Employees* |
|---|---|---|
| Elementary Schools | 83 | 3 |
| Junior High Schools | 34 | 2 |
| Senior High Schools | 17 | 0 |
| TOTAL | 134 | 5 |

| Special Education Personnel | *Total Number of Employees* | *Negro Employees* |
|---|---|---|
| Speech Therapists | 21 | 0 |
| Partially Seeing Teachers | 3 | 0 |
| Full-time Hospital, Home Inst. | 6 | 0 |
| Part-time Hospital, Home Inst. | 15 | 0 |
| Audiometricists | 3 | 0 |
| TOTAL | 48 | 0 |
| Health Personnel (Total) | 50 | 2 |
| Counselors | | |
| Senior High Schools | 33 | 4 |
| Junior High Schools | 52 | 11 |
| TOTAL | 85 | 15 |
| Guidance and Attendance | | |
| Guidance Teachers | 11 | 0 |
| Attendance | 7 | 0 |
| TOTAL | 18 | 0 |
| GRAND TOTAL | 335 | 22 |

The above table seems to indicate that promotion for Negro teachers occurs at a slower rate. Since this investigation has been underway there have been promotions made which are not reflected in the figures given in this report. The implication is not necessarily to be drawn that any changes that have occurred have been as a result of this investigation or any other pressures. It is true, however, that as the administration loses its "color blindness" and replaces it with a "color consciousness," increased efforts are made to make certain that promotions also are based on merit. The District's consciousness of color has developed noticeably during the period of this investigation.

The position of Principal is the position that most of the aspiring teachers who have received their administrative credentials seek. The method of selecting Principals in the past is not quite clear. More than one school Principal has stated that teachers of physical education and coaches of the athletic teams seem to have been the preferred candidates for administrative positions. There are enough ex-physical education teachers and coaches who are now Principals to lend credence, if not proof, to this belief.

Some of the Negro teachers who aspire to become administrators state that they have felt Negro teachers were sought for predominantly Negro schools, but that Negro Principals were not desired even in these schools. There appear to be many Negro teachers who are outstanding

or nearly outstanding in the performance of their duties, and who would make excellent administrators. In talking with some of these teachers, one gets the feeling that they have lost some of their defeatist attitude and now feel that with proper preparation and timely application, like any other teacher, they will have a chance to be promoted to administrative positions.

Some of the heretofore defeatist attitude of the Negro teachers may be due in some ways to their own thinking, but in a very significant sense the District is also responsible, for until June, 1963 there was but one Negro Principal. Even the Administration Building, which contains some 200 employees, had only two Negroes working there, and they were clerks. A situation like this was bound to encourage negative thinking on the part of Negro teachers.

## SECTION II

### RACIAL ATTITUDES

One of the Commissioner's prime concerns in looking at the Oakland Unified School District is to determine, where possible, what kinds of attitudes are held by the Principal and faculty members in each school toward the Negro, Mexican-American and Oriental students as well as towards the Caucasians—other than Mexican-Americans.

Most Principals who have had experience with Spanish-surname students, other Caucasians, Negroes, and Orientals, have stated that the Oriental students appear to be the top achievers scholastically. Oriental students are followed very closely by Caucasians (other than Spanish-surname). Spanish-surname and Negro students are said to be the lowest achievers. There are some who state that the male members of the Spanish surname group are absolutely the lowest achievers in the school. Some of the faculty members point out that Oriental students identify with Caucasian students (other than Spanish-surname), while the Negro students and Spanish-surname students were "loners" in most instances, but on occasion would identify with each other.

These observations have been made by many of the faculty members. It is taken that these are facts which are not subject to dispute. But in looking at the attitude of the school personnel towards the student body, it was noted that the attitudes toward the Negro student varied in accordance with the type of school, i.e., racially mixed, predominantly Negro, and predominantly Caucasian. They are therefore considered separately.

### PREDOMINANTLY NEGRO SCHOOLS

In one predominantly Negro elementary school the investigator spoke with the vice principal. There was general conversation about attitudes towards the Negroes until the vice principal felt free to give his views. He said: "We cannot have the students meet very often in assembly where all of the students are present, and we must limit the number of school activities that would require a large attendance by the student body, such as theatrical productions." The reason, he said, for this was that Negro students in assembly get "fever." He went on to inform the investigator that Negro students vent their feelings "in fearful ways." He explained that if they had a play and did not like it they would clap their hands or stomp their feet or hiss and boo. The investigator replied, "Just as white students do, is that correct?" His answer was, yes. He felt that his duty as a school administrator was in a large part discharged if he could maintain discipline among the student body. Discipline rated a high priority over educational achievement.

At another predominantly Negro school, a junior high, the investigator spoke with the vice principal. The investigator's notes are as follows: "One gets the impression from her that the concern for the children is very shallow." For example, she spoke of a play that was

being produced by the school. "What is the name of the play?" asked the investigator. "I don't know," she replied. The investigator asked her to ascertain the name of the play which she did. It was a play by the name of *Silver Secret*. The investigator asked who was the author. She replied, "I don't know." The investigator felt she did not care.

At a predominantly Negro junior high school, which the investigator visited during the time of the Birmingham civil rights demonstrations, the investigator asked the principal if he had any special concern about what the Negro students were thinking and feeling. The principal replied to the effect that he did have special concern but there was no special problem due to race. He felt that the Negro students were thinking and feeling the same as any other student in the school district. When it was pointed out that on the day prior to the visit to that school, Birmingham had become known throughout the world and that this might be of special concern to the Negro student, if not all the students, and that the Negro students were likely to feel different from white students about the situation, the principal defended his position by stating that the attitudes of the predominantly Negro sudent body at his school were the same as they had always been and that there was no concern for Birmingham. The investigator accompanied the principal to the cafeteria where they were joined by several faculty members of the school, some of whom were Negroes. The same question was asked of the faculty members that was asked of the principal. A Negro faculty member replied that feelings were running very high among the students. No effort was being made by the school to deal with their feelings or the problems of Birmingham or the race problem and the school was acting as though the problem did not exist. All of the teachers had strong feelings on this point; the principal nevertheless retained his position that the feeling was no different from any other day, and that race or the problem due to race was of no concern to the student body or to the school.

In a predominantly Negro high school, the principal was almost completely discipline oriented. There were student patrols on duty keeping order in the hallways. A large part of the concern of the principal and some of the faculty members was the type of dress that the students wore to school. In each of these instances the principal spoke with pride about the fact that his school had fewer broken windows than other schools and the wearing apparel of the students was, at least according to his standards, a little less outlandish than it was at other high schools. The concern about discipline being noted, it was asked if there was equal concern for the achievement of the students. The answer was positive. The achievement of the students was spoken of entirely in athletic terms. The principal spoke very glowingly of the athletes who have come from his school. When asked what percentage of the students went on to college he replied that the percentage was very small. The principal indicated that only two graduates of his high school at that time were in the University of California.

The principal went on to relate that this school, unlike the other high schools, did not have a drama group and they had staged no theatrical events. The reasons given for the lack of programming in this area were vague and finally came down to the fact that Negro students have a special accent and are not suited for stage work. However, it was

pointed out by the principal that dance meant much to the students and that their senior class prom dance was being conducted as a formal affair at a very good hotel.

At each predominantly Negro school that was visited, the investigator asked the principal to introduce him to any Negro teacher that the principal felt was doing a very good job. Almost invariably, this Negro teacher turned out to be a strict and harsh disciplinarian. Several Negro teachers in this category had such strong feelings about Negro students that their feelings amounted to hostility. In each instance, when asked, they would reply that keeping order in school was the prime job of the school. These were teachers who were very critical of the Negro students and who took it upon themselves to criticize dress and behavior as their prime role as a faculty member. In almost all of the predominantly Negro schools, the principals state that there is less destruction done to their physical plant or to the cars of the teachers than in the predominantly white schools.

Principals (at the predominantly Negro schools) tend to justify every condition that exists in their school as being the best possible condition for any school anywhere. They were never critical of anything concerning their school or its activities. At the racially mixed and predominantly Caucasian schools, on the other hand, the principals would talk about any inadequacies they had. And they talked of plans for making improvements. Not so at the predominantly Negro schools; everything, they insisted, was all right. For example, at one predominantly Negro elementary school which had no lunch facilities the principal stated that this was not a handicap. He was then asked if free lunches were provided for the needy children in his school. He answered that they were not. Did he have needy children? He did. What, if anything, was done for the children? The principal stated several of the teachers would bring an extra sandwich or piece of fruit for these children. The principal not only felt that this was adequate, but defended it as the best way of handling the problem. Hot lunch facilities and free lunch for needy children are provided for most schools, including the predominantly Caucasian schools in the higher socio-economic neighborhoods. Those principals who have this program state that the lunch program is almost a necessity for operating a school.

## RACIALLY MIXED SCHOOLS

At a racially mixed high school the investigator, in trying to determine the school's attitude towards the Negro student, asked the head counselor, "Do you feel that Negro students have a special problem that white students do not have in regard to employment?" The counselor answered he did not feel that Negroes had a different problem. The counselor was asked if he knew what the Kiwanis Club was and he answered, yes. The counselor was asked if he used the Kiwanis Club to assist students who had difficulties determining what they were going to do, he answered that he did. The counselor was asked if he knew what the Rotary Club was and if he used it, his answer was yes. He was also asked if he knew what the functions of the Fair Employment Practice Commission were; his answer was no. The counselor was not familiar with the Urban League. He stated that his duties, as he saw them, were to help students who had attendance problems, to help students who had a problem deciding

on occupation, and to help in the selection of a school program. He was then asked if the student felt that because of his race his employment opportunities were limited, would the knowledge of any agencies, private or public, that dealt with this problem assist the counselor in performing his duties? The counselor answered that it would not because he would not give any special consideration to Negroes or any other group; that he would give them the same consideration that he gave to the white student. He was asked if their problem was different from the white students, would he still give the Negro student the same advice that he gave the white student. He answered that he would, because he did not believe in singling out any special group and giving them any special treatment. The investigator asked if a student felt that there was no use for his acquiring a useful occupation because of his race, would the counselor feel it his duty to tell the student that the State, being interested in the welfare of all of its citizens, had enacted laws to prohibit discrimination in employment? The counselor answered that he did not see how he could do anything for a Negro student because of any special problems he had. The investigator placed before the counselor a booklet published by the Fair Employment Practice Commission entitled *Success Story*. The investigator asked if such a pamphlet would be of any assistance to the counselor. The pamphlet stresses the value of education, the value of school, encourages the student to make career plans while in school, and shows a number of minority group people in various jobs indicating the rewards of educational achievement and training. The counselor turned the pages himself and seeing a photograph of a Negro executive with the title of "Asst. Chief, Advance Projects," stated "We have no Negroes in this school who could ever do this job." He then looked at the picture of a group of pharmacists, one of whom was a Negro, and stated that: "We have no Negro students who could qualify for this type of position." Also pictured was a Negro girl operating a tabulator; he stated: "We probably have a girl or two who might be able to do this job." A picture of a salesman for an oil company was shown in the pamphlet; the counselor felt they had no Negroes in that school who could ever hold that position. Subsequently he eliminated engineering, store managers, tool designers, accountants, doctors and lawyers as occupations requiring skills which none of the Negro students in his school could acquire. He allowed that they might make clerk-typists, automobile salesmen, social workers and, perhaps, teachers.

This man was the head counselor at a racially mixed high school that had more than 1,000 Negro students at the time he made these statements.

The head counselor at another racially mixed high school was interviewed and asked about his knowledge of the Fair Employment Practice Act and the Urban League. He had no knowledge of either. He readily confessed that he had no knowledge of the Negro community or any of the resources available in the Negro community for aiding the Negro child. He was aware of the resources in the white community for aiding the children of the community and he was not certain that all of those resources were available to the Negro student in the same manner in which they were available to the white student. This again was a racially mixed school with a large number of Negro students.

The investigator found a completely different situation at another racially mixed high school. At this school, some of its personnel are so outstanding in the work they are doing that the Commissioner feels that he should identify the school and some of its personnel. At Oakland High School, which has about 20% Negro student population, 10% Oriental student population and 5% Mexican-American student population, the Commissioner found the Principal, Paul Pinckley, assisted by two outstanding teachers, Mr. Pete Lee and Mr. Heinz Gewing, squarely facing the race problem. The principal saw the value of having teachers of all racial and ethnic groups, specifically saw the need for more Negro teachers, and had sought them out. He had expressed his concern over the lack of Negro teachers in his school when he had none. The student body president of the school was a Negro at that time. The school personnel knew of the Fair Employment Practice Act; they knew of resources within the Negro community as well as within the white community; the two teachers, Messrs. Lee and Gewing, had started an interracial club among the student body. The club was encouraged to consider problems due to race; it was reported that they tackled these problems honestly and forthrightly, and that the club provided an outlet for pent up feelings within the student body. The problems of self-segregation that Negro students often impose upon themselves in the cafeteria, in the classroom, at school dances, and at other school functions was also a subject matter. The club would talk about the desirability of having an interracial school staff and would consider the matter of discrimination in employment and housing. They discussed the racial explosions that were taking place throughout the United States. This type of student activity contrasts significantly with the only form of student activity reported by another school. At another high school with a racially mixed student body, the principal states that most of the high schools have student fraternal organizations. He reports that these fraternities are sanctioned by the schools. They cannot hold meetings on school property. They only accept white students as members. The non-white and the poorer whites, who are also excluded, are labeled as "hondos," meaning they are inferior.

In the racially mixed elementary schools, the principals of the schools seemed to have been more aware of the Negro problem than they were in either the predominantly Negro schools or the predominantly Caucasian schools. Most racially mixed schools that are located in East Oakland are in a community that is in the process of transition from a predominantly Caucasian population to a racially mixed one. The school population in these neighborhoods is also changing from predominantly Caucasian to racially mixed, or perhaps in the near future, to a predominantly Negro student body. In most cases, the Negro enrollment in these schools has occurred within the last three to five years. Many of the principals expressed an awareness of the problem the Negro families were having in the area. Many principals were in contact with the whites in the community who were having adjustment problems of their own. One school principal had personally paid a visit to the home of each new Negro family in his area and had welcomed the families to the area and welcomed their children to his school. He had shown interest in their problems. He made himself available for assistance wherever needed and whenever possible. Almost all of the

principals in these types of schools expressed a desire to have Negroes as teachers on their faculty, and many stated that they had expressed this desire to the administration. Some of the school principals are rather fumbling in their logic. One stated that he felt he needed Negro teachers because the population was changing from predominantly Caucasian to now more than half Negro. He felt that the Negro teachers who came into the schools should be more outstanding than the Caucasian teachers. He felt that this was necessary so that they could pave the way for other teachers of their race. In the racially mixed schools there seemed to be more honest concern for the problems occasioned by race than in the predominantly Negro or predominantly white schools. There were those who felt that the problem did not need to be considered at all, at least from the Negroes' point of view. One principal stated that the colored people are happy and everything is going along just fine. This same principal stated that she had no idea how the heretofore predominantly white community was accepting Negroes into the community and whether there were any problems concerning the school in this respect.

In most of these racially mixed schools the principals, in talking about the achievement of the Negro and Mexican-American students, did not paint as dismal a picture of their achievements as was painted in the predominantly Negro schools.

## PREDOMINANTLY CAUCASIAN SCHOOLS

The predominantly Caucasian schools are for the most part located in the higher socio-economic neighborhoods in Oakland and generally these neighborhoods are in the hill sections of Oakland.

The attitudes in these schools towards the students is one of total concern, and every effort is made to involve the community in the school program wherever possible. The concern for the Negro students as Negroes is not much of a problem in that there is only a token number of Negro students at any one of these schools. At the predominantly Caucasian high school, the faculty is more racially mixed than in some of the racially mixed high schools. There are Negro, Spanish-surname and Oriental extraction teachers on the faculty. The principal reports that there has never been a complaint from the community about either the race of the teachers or the race of the students. It will be noted that even though this is a predominantly Caucasian school, there are approximately 12 Negro students out of a student body of almost 1,800. It is also of note that of 81 faculty members; 3 are Negroes. The students at this high school are the highest achievers in the city. 95% of the tenth grade is headed for college; 75% of the eleventh grade is headed for college; and 65% of the twelfth grade is headed for college. The students in this school, according to the principal, having a median I.Q. of 112 as opposed to the median I.Q. in the predominantly Negro high school of 82, according to the principal of that high school.

This school reaches out to the community perhaps more than any other high school in the city and in return the community responds more readily than any other community responds to its high school. The school's theatre is used for neighborhood theatrical productions and is used for theatrical productions of the school itself. The school has a boosters club which is composed of fathers of the students. This club sponsors fund raising events for the school. This club involves it-

self in lobbying for facilities such as swimming pools for the school, as well as for a swimming pool for the only other high school in the community without one on its grounds. The other school is a predominantly Negro high school. The principal of this school in speaking about the school's Negro students, states that their academic achievement level is the same as that of the white students.

A predominantly Caucasian junior high school that has about 12 Negro students of approximately 1,000 students, has a staff of 39 teachers; 2 are Negroes. There are no teachers who have Spanish-surnames or who are Orientals. This particular junior high is the highest achieving junior high in the city. It was established in 1959. It has a large number of high ability students and the school also reports that it had experienced no faculty or parent resistance to Negro faculty members or to Negro students.

In the elementary schools that are predominantly white, one does not readily find hostile expression against Negroes or any other minority group. The principals in these schools are concerned with teachers who are subject-matter oriented rather than teachers who are discipline oriented. Without exception, they state that they would have no objection to having Negroes or other minority group representatives on their faculty provided, of course, that they were competent. One gets the feeling that these statements are made honestly and also that the teachers in these schools, whatever their race, are perhaps a bit more competent in general than the teachers in a predominantly Negro school. This would be true if for no other reason than the totally discipline oriented teacher is not regarded as being needed in these schools. The child who dresses in an outlandish fashion is tolerated, if not accepted.

## SECTION III

### CLASSIFIED PERSONNEL

Classified personnel, generally speaking, are the non-teacher personnel employed by the school district. They would include the secretarial staff, the janitorial staff, and the many other skills needed to maintain this school district. The classified personnel are not hired through the office of the Director of Personnel as are the teachers who are certificated. Their hiring is the responsibility of the business manager of the school district and his staff. The school district has a stated policy that classified personnel are employed solely on the basis of merit. The stated policy does not contain any prohibitions against discrimination because of race, color, or national origin, but the "solely on the basis of merit" statement would certainly imply that the policy of the school district is against any discrimination based upon race, color, religion, or national origin.

In trying to determine whether or not discrimination is actually practiced in the hiring of personnel, the assigned Commissioner looks at the stated policy on hiring of new employees. He is always gratified to find a policy advocating hiring on merit only. However, the discrepancy between practices and policies can be so great that the Commissioner, in order to get a picture of what is actually done, must look at the people who are hired, rather than at a statement of policy only. In the case of the Oakland schools, a review by race of the classified personnel who had been hired does not indicate that the merit employment practice stated as policy is the controlling factor in the selection of new employees. The following table is a breakdown of the total number of people employed and the number of Negroes employed by employment categories.

| | *Total Number of Employees* | *Number of Negroes Employed* | |
|---|---|---|---|
| Clerical and Stenographic | 457 | 10 | (2.18%) |
| Administrative, Supervisory, and Technical | 57 | 1 | (1.75%) |
| Plumbers | 9 | 0 | |
| Steamfitters | 8 | 0 | |
| Electricians | 14 | 0 | |
| Painters | 22 | 0 | |
| Furniture Refinishers | 3 | 0 | |
| General Helpers | 15 | 0 | |
| Laborers | 8 | 1 | (12.50%) |
| Truck Drivers | 18 | 0 | |
| Carpenters | 42 | 0 | |
| Glaziers | 5 | 0 | |
| Roofers | 3 | 0 | |
| Locksmith | 1 | 0 | |
| Hodcarriers | 4 | 1 | (25.00%) |
| Millwrights | 2 | 0 | |
| Gardeners | 47 | 3 | (6.38%) |
| Stock Clerks | 13 | 1 | (7.69%) |
| Custodial | 320 | 80 | approx. (25.00%) |
| School Lunch Employees | 308 | 75 | approx. (25.00%) |
| TOTAL | 1356 | 172 | (12.68%) |

Most of the Negroes employed in the classified section except for the custodial and school lunch departments have been recently hired and some, such as the hodcarriers, are only temporary appointments. The indications are that few Negroes working here have been hired since the investigation commenced with the above stated exceptions. In the custodial department, the date of hiring the first Negro is generally fixed as being right after World War II. This is about twenty years after the first Negro teacher was hired in 1926. The school lunch employees are for the most part part-time employees. Their work day is two or at the most three hours. Conditions, therefore, make it difficult to be selective in hiring.

Color blindness in the classified personnel section, with the exception of the custodians and school lunch employees, can better be described as color exclusion. Now that the district is becoming more aware of color and problems that are based upon it, the classified section appears to be taking affirmative steps to make certain their merit employment policy will mean just that. The classified section now states that it expects to employ Negroes in more representative numbers from now on than it has employed in the past.

One attitude which turned up in this investigation was that expressed by a top administrator in the Oakland schools was that Negroes were very difficult to find for clerical and secretarial positions. This official challenged the Fair Employment Practice Commission to find qualified Negroes as clerks and secretaries. When it was pointed out to him in return that it is the duty of the school system itself to educate and train people for these positions, he replied that he noticed that Negroes didn't particularly have the talent for doing clerical and secretarial work. This statement of a high administrative official indicates that, even in the school system, the attitudes toward minority people and what they can do may not always represent an improvement over the general public's attitude.

In another instance, in the hiring of classified personnel that occurred *after* the school began to develop an awareness of color, an applicant for a widely advertised vacancy, submitted a résumé wherein he stated as part of his qualifications that he was of English-Scotch-Irish background. This statement went unnoticed even though it was retyped and placed before the Board of Education which acted upon it officially and hired the applicant without noticing that he had given information bearing upon his race, national origin and religion. The Commissioner, in handling this case, made a special effort to talk to the Board of Education concerning the hiring of this man. The Commissioner was convinced that his race, religion, or national origin were not critical in his appointment. The Commissioner feels, however, that the degree of dedication necessary to clearly establish a merit employment practice has not yet been attained by the Oakland Unified School District, certainly not in the hiring of classified personnel.

## GENERAL CONCLUSIONS

Mr. C. L. Dellums, the Fair Employment Practice Commissioner who has conducted this investigation with the assistance of the Fair Employment Practice Staff, draws some general conclusions which appear as a foreword to this report.

The first and perhaps foremost conclusion that must be drawn, is that the matter of race in the Oakland Unified School District is an important one, touching heavily upon community concern and must be reckoned with by the school board, the school administration, the schools and the teachers themselves.

Further, it must be generally concluded that the practices of the Oakland schools based upon the hiring of teachers, the promotion of teachers, the hiring of non-teacher personnel, the promotion of non-teacher personnel and the training of children for careers are of prime concern to the City of Oakland, to the State of California and to the nation.

*In general, it is the standard practice of the Oakland Public Schools in using the evaluation scale that a probationary teacher must receive marks to the left of the division lines as indicated for each year of service in the Oakland Public Schools. A teacher may still be recommended for further service or tenure, however, who has not more than two marks one step to the right of the division line which applies in his particular situation, i.e., first, second, or third-year probationary status.

RESORT TO HIRE NEGRO TEACHERS

Palm Springs, Calif., March 2--A newly-formed chapter of CORE in this famed resort town has negotiated with school authorities an agreement for hiring of Negro teachers.

"The Desert Pass chapter of CORE is pleased with the result of a meeting with Dr. Sellery (school superintendent) and Dr. James Runge (assistant superintendent) concerning hiring of Negro teachers," said Sidney Hagler, chairman of the CORE group.

"The administrators acknowledged the need for Negro teachers and are making a special effort to inform teacher placement centers from San Diego to the San Francisco bay area that Palm Springs is interested in qualified Negro applicants."

# THE WESTERN STUDENT MOVEMENT

## SUMMER TUTORIAL PROGRAMS IN LOS ANGELES

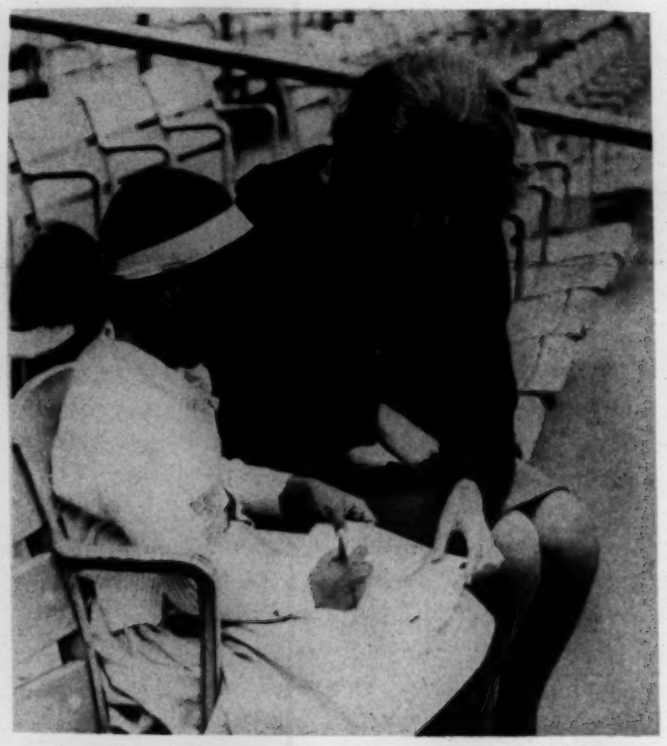
THE WESTERN STUDENT MOVEMENT is an experiment in community involvement. Its objective is to foster tutorial projects which involve not only elementary, junior-high and high school students, but the entire community in the process of education and community development; its means are the voluntary services of college students and citizens of the community of Avalon.

Avalon is a Negro ghetto --- just east of the Harbor Freeway in Los Angeles. Its high school --- Jefferson High --- ranks first in total dropouts for the Los Angeles High Schools. Only 56% of its children under age 18 are living with both parents. Approximately 15% of its labor force is unemployed. Many of its people are recent immigrants from the South.

Avalon is a community with social problems, but it is also a community with conscience and strength. For many years the citizens of Avalon have been working thru the Avalon Community Center to improve their neighborhoods and to create an atmosphere conducive to productive family and occupational life.

If you are a college student, the community of Avalon can use your help - however much you can give - this summer. The Western Student Movement will also sponsor projects during the summer in many other communities(i.e., Pasadena, East Los Angeles, Compton, Watts, Pacoima).

1) TUTOR A POTENTIAL DROPOUT. The Potential public school dropout is often intelligent, but is experiencing boredom or feelings of rejection. Often he finds his schoolwork difficult because it does not seem relevant to his environment or his experience. In most cases, his confidence in himself has been destroyed.



WSM is attempting to help solve some of these problems by working with young people to give them motivation and encouragement. Teaching experience is not necessary; it has been found that one warm person in a close relationship with another transmits the self-confidence and motivation necessary for improvement in school. Your contribution of two to four hours a week can mean the difference between a child dropping out of school and becoming a burden to himself and to his society, and that same child finishing high school and going on to better things.

2) TUTOR A POTENTIAL COLLEGE STUDENT. Many intelligent and highly motivated students from this area either do not go on to college or enter college ill prepared. Unused to rigorous academic requirements, they are often at a serious disadvantage in competition with the suburban high school graduate. Small group seminars or tutorials in literature, history, physics, chemistry and algebra will help these students prepare for college.

These groups will gather periodically for special programs: lectures in Negro history; discussions of current political, economic and social problems; workshops on college entrance and career opportunities; etc. Excursions to colleges, cultural events, museums, industries and other places of interest will be undertaken at their request to broaden experience.

3) PREPARE UNEMPLOYED MEN FOR CIVIL SERVICE AND APPRENTICESHIP EXAMS. On May 7, 1964, 1,000 of Avalon's 8,000 unemployed men and youth rallied in Wrigley Field for a "Conference of the Unemployed." They gathered to assert that they wanted jobs so they could provide a decent living for themselves and their families. 165 of those men indicated by petition to the Western Student Movement that they wanted help in preparing themselves for Civil Service and apprenticeship exams. By tutoring these men you could help them qualify for jobs and income.

4) WORK ON PROBLEM TEAMS. WSM will have three Problem Teams -- one to work with Children who need remedial instruction, another to work with youth on probation, and a third to develop reading material for children based upon their environment and experiences. Each of these teams will receive special training by experts at the beginning of the summer and will meet periodically during the summer for continued training.

If you wish to join the community of Avalon, or one of the other listed communities, in any of these programs of education and community development, please fill out the attached form and mail it to

THE WESTERN STUDENT MOVEMENT
4272 South Avalon Boulevard
Los Angeles, Calif. 90011

You will receive further information upon receipt of application.

## CORE AND I.S. 201

The dismal state of education in our nation's cities has been widely reported and analyzed. According to the observer, the source of the problem differs. There are those who argue that the home and the community from which the child comes are to blame for the situation; children are not adequately motivated, prepared nor equipped to learn and are constantly bombarded by negative community experiences. They conclude that in the face of these handicaps there is little that the school can do.

Opponents of this view argue, among them most prominently Dr. Kenneth Clark, that it is just this reaction by the school, the expectation of inferior school performance, that predetermines the outcome. To bolster their argument they cite a well-documented decline in I.Q. and school performance from the third to the sixth grade in Central Harlem schools. They insist that it is the school's responsibility, as an agent of a society which has fostered inequality, to play a forceful positive role in finding new ways to educate our children, no matter how disadvantaged.

It has long been argued by many of those who take the latter view that there is but one way in which schools can redress the inequities in public school education. Integration has been hailed as a means of insuring democratic experiences necessary to citizens of a multiracial nation. Integration is also a means of insuring the fact that black and white children, once having been educated in the same setting, would be able to be competitive in the job market.

This position has been expounded most recently in the U.S. Office of Education report to Congress, Equality of Educational Opportunity. The 737 page report has as its conclusion: "a really superior school for Negroes must indeed be racially integrated."

And yet, the Office of Education has itself been under attack by a so-called "liberal" Senate for going too fast. White America has demonstrated in countless ways -- in Chicago, Georgia, in

Congress -- that it has done all it intends to do in race relations in the forseeable future. Thus, the recommended racially integrated school would seem to be as unattainable as the cure for racism.

There is another view therefore, which challenges not only the feasibility but the validity of the assumption that the only key to educational quality is the integrated school. Those who take this position maintain:

1. Integrated schools cannot be stabilized in our rapidly changing urban centers in the face of white opposition and the white exodus to the suburbs. Integration is available to so few black children (and then often only temporarily) that it is no solution for the large majority of black children in public schools.
2. Integrated schools which provide equal education for black and white children do not enable black children to become truly competitive, particularly those from poverty neighborhoods, unless black students receive special compensatory attention to make up for the economic and social disadvantages of being raised in a ghetto community which is discriminated against, isolated and disrespected.
3. Integrated education alone does not develop in black children the sense of self-respect and identity so badly needed if they are to be motivated to learn. In fact, suddenly becoming part of an integrated school which is too often hostile and unsympathetic can reinforce feelings of inferiority and inadequacy.

The second view logically calls for a ghetto school which is in fact superior to schools elsewhere and which, because of the need for an improved self-image among ghetto children, consciously provides a sense of ethnic identity and racial pride for its pupils.

Nowhere have these issues been so starkly posed as in the case of I.S. 201. In 1958, 201 was proposed as a Junior High School to accommodate children who lived north of 125th Street and were going to overcrowded JHS 120 and JHS 45. In 1962, when parents were first given an opportunity to be heard concerning 201, there was great opposition to the school, for it was to be constructed as another segregated junior high school. After much community discussion,

plans for the school proceeded, with assurances from school officials that there would be provided an excellent curriculum and an integrated student body. However, I.S. 201 continued to be a sore issue in the community during the years that followed. Concern was expressed about the effects of air conditioning upon the health of the children. Parents began to press for details on the school's progress, the specifics of zoning, the selection of staff and where the white students could be coming from.

In February, 1966, the parents were informed for the first time that I.S. 201 would be an integrated school, meaning it would contain representative numbers of Negro and Puerto Rican children. In subsequent months it became clear that such "integration" could only be achieved through the gerrymandering of feeder patterns. This double insult to the Negro community was bitterly resented. Mass meetings, boycotts and demonstrations were staged to dramatize the intensity of community protest.

I.S. 201 had become a symbol of the bad faith of the Board of Education. It had also provided the testing ground of the efficacy of integrated education. Whether the reason was the failure of the Board of Education to recruit white children, the racist attitudes of their parents, or the realization that it takes more than a new building to provide a good education, no white children enrolled in I.S. 201.

It must be made clear that integrated quality education was desired by the parents at the very outset. They had put four years into the struggle to make I.S. 201 something more than another deadend ghetto school. And it appeared that they had failed. Integration was no longer a realistic alternative.

Yet the Negro parents were determined that their children were to be educated adequately <u>now</u>. They were not prepared to wait for the milennium when racist attitudes might be educated away or when ghetto neighborhoods would disappear.

A golden opportunity presented itself. Here were aroused parents, militantly vigilant, prepared to assume their part of the responsibility for educating their children, but determined also that the Board of Education should do its part in meeting their children's needs. And they saw new needs, not universally recog-

nized by professionals as relevant to the school performance of Negro children.

The parents were attuned to the newly awakened call for self-determination and self-assertion in the black community. They knew further that their community and individual feeling of powerlessness and the resulting lack of self-respect had a crippling effect upon their children. They therefore demanded:

1. Black authority figures (e.g. a black principal) with whom their children might be able to identify and to whose position they might aspire. This was particularly important in view of the fact that the students were adolescents, thus impressionable and in the process of making life decisions,
2. Sympathetic teachers who respected black children, were supportive and encouraging, who did not reinforce feelings of insecurity and who expected black children to learn.
3. Curriculum that reflected the Negro's contribution to world and American history and filled the knowledge gaps left by years of omission and neglect.
4. Increased participation in their children's educational lives. The parents knew that they, unlike middleclass parents, had no place in the power equation of the New York school system. They also probably sensed that by being vigilant and unintimidated, they would compel responsiveness and respect, not only from the school administration and teaching staff, but also from their own children.

In effect they were saying to educators that if a child of native intelligence is not achieving, the fault is not in the child, but in the system. One must assume the technique is wrong, the relationship is wrong, the measure of achievement is wrong, the perception of the child is wrong. They were saying further, as they would to a doctor with a sick patient, we will not tolerate your nursing the patient for not getting well. You have not attempted to change the medicine nor mode of treatment. If you do not accept our suggestions, we will get another doctor or we will treat our children ourselves.

And why not? Why not raise questions about the qualifications

of a Board of Education that so callously continued with "business as usual"? Was it so unexpected that parents would protest the location of a new ("windowless") school built in the heart of the ghetto when school integration had been a burning community issue? In 1966 there are only four Negro principals in the 840 New York public schools. And in spite of national discussion concerning the need for male authority images in the predominantly matriarchal Negro ghetto, all four are women. Was it so unanticipated that black parents would demand that there be "no taxation without representation"? If children were not learning at the schools from which many of the teachers came, was it so out of order to ask for the right to review the educators' qualifications?

It is possible that the cry for <u>total control</u> might not have arisen if the public, particularly the educational profession and the Board of Education, had chosen to understand the basic issues involved in the dispute. The fact is that total control by parents would never be necessary if educators understood and acted upon the thoughts and feelings of the community they were hired to serve. The cry once raised however, puts into sharp focus the feeling of alienation between parents and educators. It was useful if it has brought about a recognition of how strong is the determination of the parents to assume a new role in the educational process and how intense is their insistence upon change.

* * * * * *

Of all solutions proposed for the ultimate answer to the big city's educational dilemma, CORE would favor the building of centrally located well-equipped educational complexes offering superior education to all children and utilizing integrated curriculum and staff at all levels. The self-interest of white parents would insure the fact that such complexes would be integrated; their children would attend if the school were superior. In addition, we would want to see community freedom schools such as the one established by CORE and the Baltimore Teachers' Union in Baltimore, run by civil rights, church or civil groups, and offering black children supplementary education in their history and cultural accomplishments.

However, it is obvious that a nation that cannot bring itself to spend as much on an entire War on Poverty as it does in one month in Vietnam is not ready to spend the money necessary to change the lives of the present generation of school children. Even the six billion for education recently appropriated is only a token investment in our children's educational future.

We therefore applaud the parents of I.S. 201 for pointing out that a black community school that meets that community's human and educational needs represents a beginning solution to the dilemma of American education. We urge teachers and administrators to listen to the parents, to free themselves from the strictures of their traditional roles, to engage in honest diagnosis and see the black community as it is today. We welcome the recommendation that other institutions become partners in the search for new answers. And in total agreement with the parents of I.S. 201, we insist that the search begin now.

The public school system in America was first initiated by freed slaves in South Carolina, who, in possession of power for the first time, were determined to use it for the common good. The cry for community power at I.S. 201 must be recognized as the birth wail of a revitalized dream for school excellence. To ignore the cry, to fail to respond in kind to the hope of a people who have little hope left, is to insure frustration and to institutionalize chaos.

SUBJECT: CORE as a National Force in Developing Human Potential

DATE: September 27, 1964

## INTRODUCTION

As muscle is increasingly replaced by machinery, the illiterate and functionally illiterate member of our society faces a losing battle for personal survival. Urban and rural slums have become self-perpetuating cancers which corrode and reduce human potential. The slum dweller is limited to his ghetto because of limited language, limited literacy and limited skill levels. He is imbedded within a social capsule whose walls defy penetration and which places him farther behind with each successive generation, as the larger society advances. Social symptoms such as delinquency and crime, unemployment and illegitimacy are by-products of the limited preparation for adulthood possible within this pauperized environment. Further, available institutions, including the schools, have been inadequate to the task of producing the literacy level, skills and attitudinal equipment necessary for productive adaptation within the mainstream of the society.

Some federal recognition of this problem exists. The President's Committee for Juvenile Delinquency and Youth Crime has been the major agency involved in combatting the problem. Very recently, legislation has been enacted to form the Office of Economic Opportunity (OEO) which will step up the effort considerably. However: (1) The funds available are meagre, considering the scope of the problem; (2) federal decisions, appropriations and actions are developed through compromise amongst politically powerful factions, and CORE is only one of the forces involved; (3) producing an organization, facilities and a program demands an extraordinary amount of cooperative interaction amongst and between government agencies which would involve both delay and additional compromise;

(4) these federal programs are controlled largely by educators, and conventional educational approaches to this problem already have been demonstrated to be inadequate; (5) federal programs face barriers in terms of attitudinal and educational differences, legal and bureaucratic requirements, differences in the language used by outsiders (their only available personnel to carry out the programs). This brief list of difficulties is far from exhaustive.

The great power of the federal government faces the slum community with the helpless impotence of the outsider bringing flowers to the sick-room of a man he scarcely knows; he can be expected to be relatively ineffective regardless of the price of the bouquet. On the other hand, CORE can enter these same communities with the confidence and understanding born of mutual trust, hard-won over years of effort. The same forces which reduce and largely nullify federal efforts, act to sustain and heighten the impact of CORE in these same communities. In this connection, the recent surge of legislation directed to providing legal rights and economic opportunity has not reduced, but rather has increased the frustrations and conflicts inherent in social and economic subordination. The Hungarian revolution occurred following the promises by Malenkov and Kruschev that oppression would end and would be replaced by freedom and plenty. The promises of a better future inherent in present legislation, the mood of the country, and the very existence of organizations like CORE, demand that something tangible take place or they will only add to existing frustration and lead to explosive emotional reactions which can, under certain circumstances, spread across whole communities.

The fact is, that in this national crisis, rapid and efficient headway can be made in the slum community only by an organization such as CORE; to make a dent in this problem, if there were no CORE, the federal government would have had to invent one.

## I. CORE AS A COMMUNITY ACTION AGENCY

The key to the door which bars the way to productive participation in the greater society is, of course, to rapidly increase the level of literacy in the slum community. The fundamental position of this prospectus is that it is possible for CORE to act as a catalyst to enormously accelerate the attainment of social and economic equality, by itself acting as a major agency for producing the skills crucial to stable and productive employment and to more active and meaningful participation in our society. The Institute of Educational Research, Inc. has developed methods and techniques which permit non-teachers to develop literacy, arithmetic (and job skills) in the absence of traditional school buildings and traditionally trained teachers. These methods have been designed for use with drop-outs and other under-achieving adolescents and young adults. They have been tested and offer an immediate vehicle for use by CORE to rapidly increase literacy skills on a mass basis in each of the areas served by CORE Chapters.

The problem is to provide an escape route out of the ghetto into the mainstream of the society.

Once an adequate literacy level is reached, then, and only then can the individual progress up a job ladder. In our time, a man must be able to read sufficiently well to understand manuals and directions related to his job task. An 8th grade level of reading skill is now a minimum for economic survival.

CORE represents a national resource which can cope with the problem of community education and training from the "inside-out" rather than to attempt to affect these communities from the "outside-in". It possesses an intelligent, cohesive and energetic membership which has repeatedly demonstrated that it can achieve CORE objectives.

Each geographic area served by CORE has a system of supervisory control and a leadership structure which can carry through an action program. Further, space and facilities are already available for use by CORE members in most communities, and would be readily available in communities not now providing such facilities. In short, CORE already possesses the following resources for an educational and training program:

1. an organized administrative system capable of putting an action program into effect and supervising its use;

2. a membership capable of following out a detailed plan of action over a sustained period of time; and

3. available space and facilities within each community.

<u>The Required Ingredients</u>:

In addition to the resources previously mentioned (leadership and administration, an organized capable membership, space and facilities), an educational system requires:

1. an instructional capability,

2. educational and/or training materials, and

3. methods of evaluation and Quality Control.

For CORE's purposes, these materials should permit persons with no previous background as a teacher to provide systematic instruction in whatever facilities are available, including homes, churches, stores, or whatever well-lit, warm, dry space may be available.

Further, the programs must be designed to maintain the interest of those being trained and to insure (by means of suitable evaluations) that the learner is actually meeting the required performance standards.

The six major ingredients involved in mounting an effective program may be summarized:

1. an organized administrative structure, capable of imposing direction and guidance;

2. a body of personnel capable of meeting organizational goals;

3. available space and facilities;

4. methods of instruction which teach what is required;

5. an organized and systematized body of training materials;

6. a Quality Control and evaluation method which assures that learners meet the required standards.

## II. THE INSTITUTE OF EDUCATIONAL RESEARCH, INC.

Facilities:

The Institute of Educational Research, Inc., was established December, 1960, as a non-profit corporation operating under the laws of the District of Columbia. The statement of incorporation describing the major corporate objective reads: The more effective realization of the human resource potential...The major objectives are: the improvement of behavioral efficiency...

The Institute of Educational Research has approximately 2,000 square feet of office space and is fully equipped with office furniture including desks, typewriters, chairs, etc. In addition, it has a complete in-house printing capacity including copying and multilith equipment for reproduction. The staff consists of twenty-three administrative and research employees.

The Accelerated Progressive Choice Reading Program was developed through the support of the President's Committee on Juvenile Delinquency and Youth Crime, (Dr. Leonard S. Cottrell, Chairman), and is presently under test in the following locations:

| | Organization | Address | Title and Name of Responsible Officer |
|---|---|---|---|
| 1. | Washington Action for Youth | 1420 New York Avenue, N.W. | Dr. Hyman Frankel<br>Acting Director |
| 2. | Police Athletic League Work Training Center | 121 University Place, New York, N.Y. | Mr. High Salpeter<br>Director<br>or<br>Terry Schmidt<br>Instructor |

## III. THE READING PROGRAM

The Accelerated Progressive Choice Reading Program (APC) is based on methods initially developed in 1950. It has been tested experimentally six times with normal first graders and has been successfully shown to be able to teach reading skills to mentally retarded children. (See Appendices A-1 and A-2.) The Accelerated Progressive Choice Reading Program was first planned for use in Prince Edward County, (see Appendix B) but was shifted for use with adolescent drop-outs in coordination with the President's Committee for Juvenile Delinquency and Youth Crime. It has been pilot tested in a number of locations and the results so far indicate that it produces reading skills somewhat more efficiently than estimated. It was designed to provide an 8th grade reading level within 300 hours of instruction, using a non-certified person as a teacher and whatever facilities were available.

At Washington Action for Youth, the pilot group of eight students showed gains of more than 15 months (1.28 years) in a mean time of 40.3 hours. (See circled data in Appendix A-4.)

The Pitts-Payne study (see Appendix A-3 for their memo summarizing their results) showed a somewhat greater gain in a period of one month which officially provided 45 hours of instruction.

The method is designed for use with groups, and permits one instructor, lacking teaching experience, to teach at least ten learners simultaneously.

<u>The Criteria for the Experimental Reading Program</u>:

Economic Criteria:

a. The Literacy Program should be adapted to the use of existing community resources and facilities for training, obtaining subjects and teaching.

b. The Literacy Program should be able to be used by non-professional, unskilled persons in the role of instructor at the expense of some loss of efficiency.

c. The Literacy Program should not require the use of highly specialized buildings or other facilities, but rather be designed for use in any available space where one literate person can meet in some privacy with one or more illiterates.

d. The materials used for the instructor and illiterates should be relatively cheap to reproduce in quantity.

Functional Criteria:

a. The Literacy Program should be designed so that it can be used as the first phase in developing job skills.

b. The Literacy Program should be designed to provide a capability to participate actively and productively in the total society.

The Approach:

In a recent proposal to The Office of Education, The Adult Education Association of the U.S.A. suggested that the Accelerated Progressive Choice Reading Program be tested in a correctional setting. A statement from their proposal, relevant to the present study, follows:

> Since the above studies have been completed there have been improvements in methodology related to the development of reading skills. Woolman's Progressive Choice Reading Method now appears to take a greater role in the development of literacy skill. The Progressive Choice Reading Method has already demonstrated that it is able to be used to teach reading skills to mentally retarded children. Recently, Woolman developed a high speed version of this reading program (The Accelerated Progressive Choice Reading Program) to obtain a high rate of literacy skill development in functional illiterates and young adults under the auspices of the President's Committee for Juvenile Delinquency and Youth Crime (Leonard S. Cottrell, Chairman).

This program has been favorably reviewed by the Adult Education Branch of the U.S. Office of Education (Edward W. Brice, Director) and by various authorities.

The following descriptive analysis of the Accelerated Progressive Choice Reading Program was made by the staff of a well-known publisher of reading materials, (Science Research Associates, Inc., Chicago, Illinois).

The Progressive Choice Reading Approach

The materials are designed to increase the reading level of students, ranging in age from about 12 years through young adulthood, who read below the fourth grade level.

Woolman materials appear especially promising for the following reasons: (1) they meet the criteria recommended by the special Task Force of United States Office of Education, (2) the content of the stories is determined by a rationale designed to change attitudes of the learners, and (3) other basic skills and vocational training materials are being developed to coordinate with this basic reading program. Preliminary tryouts of the materials with several different groups of students have been encouraging.

Woolman adopts a linguistic approach to reading. His Progressive Choice Reading Method is designed to develop those perceptual skills necessary to extract meaning from printed words that are already known in speech. There are several distinctive features about the Progressive Choice Reading Method. Four of the major features are described by Woolman as follows:

Response Activation

> There will be a requirement for high rates of response as learning rate is largely a function of the activity of the learner.

Evidence of Achievement

> These children must perceive themselves as effective members of their own society....Here we are concerned with convincing evidence of achievement earned by effort and success.
>
> The (lessons) will be designed to provide clear-cut goals, indisputable evidence of goal attainment, and responsibilities, as well as privileges, as a consequence of goal attainment....

Frustration Tolerance

> The learner will be provided with learning tasks designed to produce increasing rates of response in the face of frustration, conflict, and uncertainty. This is of particular importance as the opportunity to achieve beyond the levels of their present limited environment requires an ability to maintain high response rates in the face of trying and difficult situations.

General Language Reservoir

> Finally, we are concerned with sharply increasing the verbal reservoir so that subjects can comprehend printed materials at various levels of abstraction, with sufficient precision to understand the intent of the writer....The subjects must understand, as fully as possible, language beyond the limits imposed by regions, color, or familial pattern.

Two principles of learning that particularly distinguish the Progressive Choice Reading Method are discrimination and invariance. The principle of discrimination states that any new learning factor (e.g., form of a letter) should be as highly discriminable as possible from previously learned factors. The principle of invariance states that after one learning factor (form of a letter) has been taught, then only one characteristic (e.g., its most useful sound) is taught at a time.

The combination of these principles and their application to the teaching of reading in the Progressive Choice Reading Method result in the following important characteristics.

1. Beginning readers are introduced to new letters in an order that is designed to make each letter as distinct as possible from the letter presented before it. Capital letters are presented initially, and discrimination is determined by line form.

   The letters are described in terms of straight and curved lines and classified accordingly as (a) angular -- all straight lines, (2) curved -- all curved lines, or (c) mixed -- straight and curved lines. The first letter presented is angular (M), the second is curved (O), the third is mixed (P), and so on.

2. During the initial part of the program, symbol-sound combinations are completely consistent. Beginning readers are introduced to (a) only one form of each letter -- they learn only capital letters at first, (b) only one sound for each letter -- its most useful sound, and (c) only one letter for each sound.

The Progressive Choice Reading Method is divided into three major cycles according to simplicity and consistency of sound-symbol combinations to be learned. The cycles are outlined on the following page.

Cycle I: Learning emphasizes words that contain phonetically consistent letters

Cycle II: Learning emphasizes words that contain vowel or consonant compounds

Cycle III: Learning emphasizes words that contain varying sounds for given letters and different letters for given sounds

Each cycle is divided into segments. For example, the first segment of Cycle I introduces the letters M, O, and P. Mastery of this segment means that the subject has learned to read and write all the words that can be formed by these letters: MOM, POP, MOP.

The second segment consists of T and S. Mastery of this segment means that the subject has learned to read and write all the words that can be formed by all of the letters he has learned: TOM, TOP, POT, TOT, STOP, SPOT, POPS, MOPS, and so on. Two or three letters are presented in each segment until all the letters of the alphabet have been learned except for the letter Q. The number of words the subject can read and write increases at an accelerating rate with the acquisition of each new letter.

The activities in each segment are divided into five levels of increasing complexity. Individual levels are planned so that a subject is initially presented with a very simple learning task, and as he demonstrates that he has mastered the task, he is presented with a more complex task. With each new task, the newly mastered information is thoroughly integrated with information mastered in previous levels. The five levels of complexity are outlined by Woolman below:

Audial Meaning Level:

Words which the learner must ultimately read in a given segment are used in spoken form and the learner must demonstrate understanding (content of usage) of each of these goal words.

Discrimination Level:

The learner must show that he can discriminate the characteristic features of each new learning element among dissimilar and similar alternatives using matching and printing responses.

Identification Level:

The learner must demonstrate that he can "label" (give the relevant sound for) each new learning element by printing and/or sounding responses.

Compounding Level:

The learner must demonstrate that he can blend sounds when shown printed letter compounds and vice versa.

Visual Meaning Level:

The learner must demonstrate, by printing and sounding, mastery of meaningful printed information. He must demonstrate that he can get the same meaning from speech and visual modes interchangeably for the goal words.

As students acquire vocabulary, they read stories using only the words they have learned to read. The content of the stories is crucial to the Progressive Choice Reading Method and the rationale and description of the content is presented below:

A primary initial requirement of this project is to produce a high rate of response. It will be assumed that the subjects will appear lethargic and relatively inert at the outset. These outward manifestations are seen as masking a relatively active fantasy life in which they obtain the material possessions, responsibilities and status which are in fact denied by their life circumstances. These "dreams of glory" will be the target of the initial inputs and our first effort will be to transform these covert activities into energies for overt responses.

The transformation programs will possess the following characteristics:

The Goal:

A hero or heroine with whom subjects can identify; a poor slum city dweller in extremely limited circumstances who has a goal which appears unachievable.

The Obstacles:

Lack of money, misunderstanding, time, circumstances, family, position, the law.

The Effort Made to Overcome Obstacles:

Specification of actions taken to overcome obstacles shown...above (performing extra work, resolution by discussion and explanation, awareness of unfairness by authority, unexpected support by others, assistance from a stranger, reconsideration of problem, substitution of sub-goals, persuasion of group members, unexpected support).

Goal Achievement:

Detailing of actual attainment of the initial goal or some aspect of the goal.

The Birth of New Goals:

The awareness that once the prize has been obtained that it sets up new goals. Goal achievement thus always becomes a signal for the emergence of new goals but now the hero or heroine knows that effort can produce rewards. Response is a prerequisite for success; failure in the process of goal attainment is merely a signal demanding the development of a new and better plan.

At the outset, stories will be constructed using culturally familiar terms; emphasis will be given to the values, needs and interests which already exist in the delinquent community. Thus, we begin with goals and situations which are identifiable and understandable in terms of the existing world in which these children live. The bridge is initially anchored on their side of the water. At later stages, as skills increase, vocabulary expands and confidence grows, the program gradually shifts in both attitude and content to provide a more useful language reservoir and increased awareness of the behavioral boundaries by the non-delinquenogenic community.

The Teacher's Manual is completely coordinated with the student materials, and it details specific objectives for each lesson, how to achieve the objectives, and how to determine student mastery.

## IV. PUTTING THE APC PROGRAM INTO THE FIELD

The Institute of Educational Research and CORE will be engaged in a joint enterprise in which there will be close coordination, but with a clear division of responsibilities:

<u>CORE is expected to provide</u>:

1. An administrative structure which will convey information, materials and directives to field personnel within a reasonable time.

2. Staff personnel who are literate, motivated and will follow the procedures in The Accelerated Progressive Choice Reading Program.

3. Supply the facilities to be used in those communities in which the programs are initiated.

4. A responsible CORE official to operate as a liason with IER to facilitate planning, to provide CORE policy positions and requests, and to make decisions for CORE actions when and where required.

IER will be responsible for carrying out the following tasks:

1. Provide necessary orientation workshops and instruction to initiate programs in various communities.

2. Monitor, evaluate, and critique CORE staff and supervisory personnel to maintain level of performance.

3. Establish and maintain a record-keeping Quality Control system which will provide rapid and up-to-date information on the program as a whole and the progress of individual units.

4. Develop special materials specific to the needs of the CORE learner population.

   It is expected that the average time in which students will complete Cycles I, II and III of the APC Reading Program will vary between 100 to 300 hours as students can move at their own pace. At the present time, Cycles I, II and III are complete and ready for use in the field.

   Although the development of a Vocabulary Expansion Program (VEP) was undertaken, this program has not been completed because of lack of funds. The special CORE-oriented material will be developed as part of the Vocabulary Expansion Program. The last 150 hours of literacy training will involve the use of this special CORE material agreed upon jointly. Part of the cost of the project will involve the development and testing of these special CORE-related programs.

   The Institute of Educational Research, Inc. has licensed Science Research Associates, Inc., Chicago, Ill., to publish and distribute the APC Reading Program (Cycles I, II and III). In accordance with IER policy, all property rights including copyright are to be held by IER in accordance with IER policy.

5. IER will collect, analyze and summarize data and write project reports of results obtained.

6. Consistent with IER's non-profit status, costs will be calculated to cover IER overhead, production, travel, etc. As the volume of CORE learners increases, IER cost per learner is expected to decrease and this reduction will be passed on to CORE as soon as it is known.

## V. THE EXPANDING WEDGE CONCEPT

The CORE Literacy Program is expected to resemble an ever-expanding wedge. All subjects participating in the Program will be tested (Pre-Test) prior to entering the Program and upon completion of the Literacy Training Program (Post-Test). IER will supply all test materials and procedures and will supervise all pre and post testing.

Progress of the Program is visualized in the following manner:

Step 1: (First four weeks) A single location will be obtained in a suitable New York City area (CORE Literacy Training Unit). Three persons from each of nine CORE units will be selected to be trained as CORE Literacy Training Teams. One week after the Teams have been established, three classes, each consisting of 15 functionally illiterate persons, will be tested and then, scheduled for two hours per day of APC instruction. The three CORE Literacy Training Teams will be trained, in part, working on each of the three classes. Each CORE Literacy Training Team will be tested on its class and when it satisfies the standards imposed by IER staff personnel, it will be released to instruct its own class using the APC Program.

In each succeeding step, the training of CORE Literacy Training Teams will involve essentially the same procedures as those employed in Step 1. IER will consider that the quality of the training given will remain its responsibility, although to the extent possible, the training itself will be shifted to CORE personnel.

## Tentative Pattern of CORE Literacy Program Expansion*

| Step | Approximate Time | Activities to be Performed | IER to Provide |
|---|---|---|---|
| One | Weeks 1,2,3,4 | Activation of first Literacy Training Unit in New York City. Assignment of nine Literacy Training Teams from New York City area. Training continued until each Team meets IER standards. | 1. Pre-tests and test supervision<br>2. APC Materials<br>3. Workships, monitoring and instruction |
| Two | Weeks 5,6,7 | Activation of nine CORE Literacy Teams from New Jersey, Penna. Maryland and upstate New York. Bring in nine additional units to same CORE Literacy Training Unit. Train CORE Teams and evaluate as in Step #1. | 4. Evaluation of CORE personnel<br>5. Planning of special CORE materials |
| Three | Weeks 8,9 | Set up second CORE Literacy Training Unit in city such as Philadelphia or Baltimore. Provide simultaneous instruction in both CORE Literacy Training Units, providing training for 18 CORE Literacy Teams (see Step 4). | |
| Four | Weeks 10,11 | Eighteen CORE Literacy Teams, drawn from Washington, D.C., North and South Carolina (and other Southern states - to be determined later) will be trained in the Training Unit set up in Step 3. | |
| Five | Weeks 12,13 | Set up third CORE Literacy Training Unit in city such as Chicago or St. Louis, and provide training for 27 Literacy Training Teams. | |
| Six | 16th Week | Set up fourth Literacy Training Unit on West Coast in city such as Los Angeles or San Francisco, making a total of 36 Literacy Training Teams which will be training simultaneously. | 6. Initiate field tests of CORE-related literacy materials and other special programs as mutually agreed upon. |

*These steps are illustrative only, and have been used to indicate the rapidity of growth possible. Actual step sequence will be worked out jointly with CORE.

In my judgment, this project offers an unparalleled opportunity to IER to carry out its function. There is no project on my horizon, past or present, which I would rather commit IER to do. I look forward to the reaction of CORE's Committee with both anticipation and the hope that we can together begin on the great task of providing more Americans with the tools needed for greater self-fulfillment.

Dr. Myron Woolman

Myron Woolman, Ph.D., Director
Institute of Educational Research, Inc.

UNIVERSITY OF FLORIDA
GAINESVILLE

REPLY TO:
READING LABORATORY AND CLINIC
310 ANDERSON HALL

April 19, 1963

Dear Dr. - - -:

I have received and read the materials you forwarded regarding the efforts to solve some of the problems inherent in the Prince Edward County situation.

I have been familiar with the experiments by Bloomer and the work of Myron Woolman almost since its beginnings. Dr. Woolman has permitted me to review the Progressive Choice Reading materials as they were prepared for each research trial.

Some reading authorities would object to the emphasis upon phonics or letter sounds in this material, arguing that there is more to the process of beginning reading than just this element. They would prefer an emphasis upon word form and the use of semi-narrative materials. Under normal classroom conditions, with children of average mental abilities and the usual school experiences, this argument is sound. But in dealing with children of limited intelligence, and a lack of schooling amounting almost to illiteracy, the usual arguments do not apply. A much more practical approach, involving training in reading and writing simultaneously, under learning conditions which progress in very small steps (with no assumptions regarding the supporting language experiences of a normal classroom) is appropriate here. This detailed, sequential training by very easy stages is the inherent rationale of the Progressive Choice Method. Furthermore, the experiences of the Laubach Foundation, the Tennessee TV programs and the current Florida "Operation Alphabet" confirm the values of this particular kind of approach to reading with illiterates or the culturally-deprived. These programs have shown that a step-by-step approach keyed to reading and writing letter sounds is highly effective.

A number of reading specialists both in this country and England have tried to devise reading programs of this type. Among these are Hunter Diack of the Institute of Education, University of Nottingham, Dr. I.A. Richards of Harvard University and the late American Linguist, Leonard Bloomfield. Despite intensive efforts, the programs produced by these authorities are far inferior to the Progressive Choice Method, in my opinion. In fact, Dr. Woolman's materials are the only completely consistent programed reading materials now available, and suitable for use with school-age children. For the abnormal conditions present in Prince Edward County, I know of no more appropriate approach.

Sincerely,

George D. Spache

George D. Spache, Head
Reading Laboratory and Clinic

## Appendix A-2

Director, National Institute of Mental Health July 17, 1963

Associate Director for Program Development
National Institute of Mental Health

Need for programs learning materials for non-reader, retarded children, and children who have suffered interruption of the educational process.

One of the major problems in the mental health field involves the determination of the factors associated with the outcome of child rearing practices up to adulthood. A great deal of work has been done, as you know, concerning the effects of maternal behavior in producing a variety of maladaptive results such as feeding problems, sleeping problems, enuresis, nail biting, anxiety, and other classical problems with which child guidance clinics have occupied themselves. On the other hand, we do not fully understand the causes for the recent rise in Juvenile Delinquency, and some of the disorganization shown by adolescents and late adolescent youth. The data on the increase of delinquency are now convincing, and disorganization is the sense of the lack of place in the social order upon the part of many other youth is becoming increasingly clear. It is imperative, therefore, that this Institute dedicate itself to a full and complete understanding of the factors associated with the non-fruitful outcome of elementary and secondary education and childhood experiences generally. It is only by an attack upon such problems that the Institute can, in good conscience, say that it is concerned with prevention as well as remediation.

The Program Development area of the Institute has been giving serious thought and attention to these problems for a long period of time. Considerable effort has been made to look for some gross relationships between early experiences during pre-school and early school years, and the ultimate outcome in terms of the nature of the young adult thus produced. While we have an equal interest in both favorable and unfavorable outcomes, a first order of importance must be attached to unfavorable outcomes, since they are the ones that cause public concern.

One of the interesting apparent relationships seems to be that which exists between the inability to learn to read and write during the first two elementary grades and the increased probability that such individuals will ultimately show a pattern of anti-social behavior and possibly delinquency. It would be naive and simple-minded for us to assume that the inability to learn to read during the first and second grade is itself a major determinant of later delinquent behavior. Undoubtedly the relationship is much more complex. It probably reflects the fact that the child in the first year or two of elementary school is under the pressure of adults, his teachers and his parents, to achieve a goal which for a variety of reasons such as basic inability, or disorganization of the home or both, is not really attainable by him. This pressure may well be applied either in a benign or damaging way. But during the first two years he is not disadvantaged in his relationships with his peers because they do not value him on the basis of his ability to read or write. By the time he reaches the third or fourth grade, however, these skills are more important in the daily economy of the child, and he may well become scape-goated as a dope or dummy or square, or

what ever the current jargon of childhood is, indicating a child is not quite one of the group. At this point, you will note he is disadvantaged with both adults and his peers, and he faces quite an insufferable situation. He becomes a devalued person. A moment's reflection shows that he has several possible ways available to overcome this devaluing experience. He may compensate by some area of other excellence, such as unusual ability in the field of physical prowess, athletics, or music. This he can do only if he has these other abilities. He might, if very mature, buckle down and overcome his problems directly. But this solution cannot be expected from many children. The most likely event is that he will become hostile toward the whole social circumstances of his time and that he will retaliate at first with minor peccadilloes and later with more serious anti-social behavior. These disturbed relationships really reflect his attempt to maintain his personal integrity and his sense of self. They will be associated with establishing relationships with similar disorganized children who face the same problems and therefore form quite naturally a small in-group that can well develop into delinquent gangs. This is one course of development which makes psychological sense out of the data we now have, namely that early reading disability may lead later to delinquent anti-social and possibly criminal behavior.

It is important as a consequence of these circumstances that this Institute make serious effort to understand these problems, and to explore to the fullest extent possible the development of remedial devices available including improved techniques of helping the child to overcome his reading disability.

It should also be made clear at this point that many children for a variety of reasons, such as illness, suffer an interruption of the educational process between the ages of 6 and 12 or 15. We are completely ignorant of the effect of such interruptions upon the ability of the child later to resume his normal, formal education. We do not know, for example, whether it is psychologically possible for a 10 year old child who has never been to school to dedicate himself fully to the tasks involved in the first grade learning experience. We do not know whether educational deprivation leads to peer group rejection which appears to be associated with the early reading disability of children continuously in the educational system. It is my guess that the results are as severe for the deprived child as for the one who could not originally learn to read, perhaps more severe.

In other words, these children, those unable to learn to read and those deprived of education because of bad health and other factors really represent a population in great risk of emotional and social maldevelopment.

Within recent years, the advent of programmed learning techniques has indicated that these methods have great potentiality for overcoming early learning disabilities and probably for overcoming disabilities associated with interruption of education.

It is therefore proposed that this Institute negotiate a contract with a competent group to develop programmed learning materials that can be used in testing some of the hypothesis outlined above. If the child's development can be improved by helping achieve literacy at or near the appropriate age, or at the earliest opportunity that is made available to him, we may be able to do more to prevent personal tragedy and the unfavorable outcomes of early life experience.

The staff of the Institute has surveyed the individuals and organizations in this country best able to produce these materials which could open a new chapter in preventing the development of emotional disorders. It is our considered conclusion that the Institute of Educational Research, Inc., in Washington, D. C. under the leadership of Dr. Myron Woolman is the best equipped of any available to produce these materials. It is proposed therefore, that a contract be negotiated with this organization as quickly as possible to permit it to proceed with the task. The estimate of costs at the moment are not precise, but it appears that the range will be from $55,000 to $100,000 to produce the materials of the kind needed. Presently, I strongly urge the larger amount since I feel the task ahead is a major one and that an adequate approach to the problems is a necessity. Given these materials, the Institute can plan a series of research approaches to the problems enumerated above with a high expectation that we can make a major contribution to some of the difficulties facing present day children and youth in terms of their emotional and social development. I strongly urge that you approve this proposal to enter into immediate negotiations with the Institute of Educational Research, Inc., in Washington, D. C., for the purposes here outlined.

Joseph M. Bobbitt, Ph.D.

## Appendix A-3

September 14, 1964

MEMORANDUM

TO: Dr. Carl F. Hansen, Superintendent of Schools

FROM: Anne W. Pitts, Reading Coordinator, District Junior High Schools
Frances C. Payne, Chairman, Basic Track, Macfarland Junior High School

SUBJECT: Report on "The Effectiveness of Programmed Instruction: An Adaptation of the Progressive Choice Reading Method."

In our recent study the data on 66 children from Basic Track classes in four representative junior high schools* made it evident that no real progress occurs using a conventional approach - the gain over twenty-three months for these children amounted to five months. This emphasizes the fact that under-achieving students, as you have stated, tend to continue to reduce in achievement level.

In this study results for students in the Progressive Choice program were highly encouraging.

1. Educable mentally retarded junior high school children (Mean IQ - 76) in Basal Progressive Choice and Accelerated Progressive Choice over a nine month period make a year and seven months gain.

2. Junior high school children considered typical under-achieving normals (Mean IQ - 95) gained a year and six months over a single summer period providing forty-five hours of instruction.

3. All children showed remarkable involvement in the program as attested by their comments, attendance, and completion of the entire six week summer program. Not one student dropped out. The most significant aspect of this finding relates to the Macfarland students who did not live in or near Garnet area and, therefore, were required to pay carfare every day for six weeks. Attendance was excellent.

---

*Paul - 8$^{303}$ ; Woodson - 8$^{201}$ and 8$^{203}$ ; Evans - 8$^{9}$ ; Macfarland - 8$^{11}$ .

THE NEXT STEP: We feel that Washington, D. C. could be the first system to put the Accelerated Progressive Choice Program to a large scale experimental test. This could be a part of the wide-scale experimentation planned for the model school system. If this were done, we are both convinced that the probability is high that Washington, D. C. will be the leader in pointing the way out of our present literacy crisis.

* Trainee attempted to take SAT pre–test but could not write name or begin responses to items and was terribly anxious in a test situation.

1. Scores show Reading Achievement Grade Level.
2. Scores show number of correct items on test.
3. Scores show IQ points on group test: Other trainees given SRA Non–Verbal Form Pre–Test, Post–Test not yet completed.
4. Scores show counselor ratings on Social Effectiveness Evaluation Form.

# Appendix B

STATEMENT SUBMITTED TO THE SENATE COMMITTEE

on

LABOR AND PUBLIC WELFARE

INSTITUTE OF EDUCATIONAL RESEARCH, INC.,
*Washington, D.C., March 8, 1963.*

Subject: Statement regarding bill on S. 1, Youth Employment Act, submitted to the Senate Committee on Labor and Public Welfare by the Institute of Educational Research, Inc., and the Occupational Training Center.

Mr. EDWARD FRIEDMAN,
*Counsel, Senate Committee on Labor and Public Welfare, U.S. Senate, Washington, D.C.*

DEAR MR. FRIEDMAN: Pursuant to our conversations of recent weeks, the undersigned are submitting herein a statement regarding bill S. 1, the Youth Employment Act.

The proposed Youth Employment Act has been analyzed and reviewed by the undersigned. We are in full agreement with its purposes and goals and consider that it could offer a powerful instrument for providing many young men with their only chance to become productive members of our society. The alternative to education and training will often be the greater cost of relief, institutionalization, and the transmission of squalor, crime, and dependency to the young.

In our judgment, the most important problem is to provide means to insure that these young men return to their home communities with greater employability than when they left. The development of modern job skills requires classification, specification of job training goals, efficient methods of training, and objective evaluation directed to continuous program improvement.

In addition, modern educational technology has advanced to the point where programed learning methods offer great advantages over conventional methods where large-scale training is required. The mass training demanded by the Youth Employment Act requires rapid and economical training and is ideally suited to these new methods. Appendix A ("Some Operational Recommendations") is an attempt to picture how these new methods could function to both simplify and accelerate this program.

Sincerely yours,

MYRON WOOLMAN, Ph. D.,
*Director, Institute of Educational Research, Inc.*
JEROME BERNSTEIN, M.A.,
*Director, Occupational Training Center.*

## APPENDIX A

### SOME OPERATIONAL RECOMMENDATIONS FOR S. 1 YOUTH EMPLOYMENT ACT

The following points have been discussed at some length with various specialists in the field of education with special emphasis on the use of new methods in development of literacy and job skills. The following individuals represent a cross section of those with whom this general problem area has been discussed:

Dr. Edward Brice, Director, Adult Education, Office of Education, Department of Health, Education, and Welfare; Mr. Raymond Larsen, Assistant to the Director, Automation and Manpower, Department of Labor; Dr. Harold Hildreth, Office of Program Development, National Institute of Mental Health; and Dr. Donald Stedman, Director of Research, Joseph P. Kennedy, Jr., Foundation.

1. Training methods should be economical, flexible, and provide for different rates of growth of proficiency, skill development, and understanding. Present classroom methods of vocational training tend to be inefficient.

(*a*) They force all students to move at relatively similar rates of speed.

(*b*) They require extensive physical plants, large numbers of trained instructors and large masses of specialized equipment.

(*c*) Teaching effectiveness of instructors varies widely, with many instructors having minimal instructor capabilities.

(*d*) Training is expensive, time consuming, and often limited to highly specific job skills which limit learner opportunity.

(*e*) Training tends to be artificial and reflects school methods rather than those in actual use.

(*f*) Industrial school methods tend to reflect industrial practices based on obsolete equipment.

2. The hard-core problem is one which focuses on men and women who have failed to obtain the necessary minimum of skills required for economic survival in technological age.

(*a*) The program should be directed to those persons who have been economically disenfranchised by reason of (1) literacy level, (2) dropouts from public school, (3) shifts in industrial characteristics of the community and (4) undertraining.

(*b*) Fundamental problems of motivation exist and methods must be incorporated into the training in order to overcome inertia and defeatism.

(*c*) The training must be designed to accommodate flexibly to persons of vastly differing intelligence, interests, and backgrounds; it must also be synchronous with existing and projected industrial requirements.

3. Programmatic training methods can provide mass training at relatively low cost. This training can be made practical, job related, and reflect current methods and practices. Programmatic methods can increase training efficiency by:

(*a*) Permitting enrollees to progress at their own rate based on experience, capacity, and motivation.

(*b*) Using nonprofessional teachers to provide instruction. This reduces costs and reduces the ratio of students to instructors.

(*c*) Training reflects actual practices; enrollees can be trained in the work setting. This reduces school cost while increasing the realism of the training provided.

(*d*) Training can be provided for:

(1) training of illiterates and functional illiterates in the development of reading skills necessary for job performance.

(2) training of job skills involving the use of names, procedures, and techniques.

(3) training for learning of concepts necessary for job performance (basic electricity, computer programing, drafting, etc.)

4. Enrollees should initially be evaluated with reference to their backgrounds, interests, and general level of capability. These factors should then be considered with relation to the job needs existing in the community to which the enrollee expects to return. The enrollee should then be assigned to a job area which—

(1) is expected to increase his employability on discharge, and

(2) is consistent with his own interests and capabilities as possible.

The enrollee should enter the program to achieve a job skill consistent with his general capabilities and existing job requirements. His work as a trainee should be systematically evaluated to determine the degree to which he progresses to the point of full employability on discharge. A quality control program should be performed by a nongovernmental agency.

The evaluation of programs under the Youth Employment Act should be objective, systematic, and thorough. The training methods, levels of proficiency attained by graduates, proportion of graduates employed, areas of skill deficiency in graduates, etc., should be made available to responsible Youth Conservation Corps personnel and other officials responsible for elimination of defects in the interest of systematic program improvement. It is necessary that these evaluations be performed by an objective nongovernmental agency to avoid confusing evaluation with justification of policy, or rationalizing the necessity for an existing state of affairs to avoid embarrassing a superior, etc., etc. Objective evaluation of the program should provide the basis for continuous program improvement and reduced program cost per enrollee.

5. All training should be directed to the enrollee's ultimate employment in his home community. During the period of enrollment the enrollee should learn a number of job tasks within a job area, such as carpentering. The enrollee must ultimately straddle the inner face between the Youth Conservation Corps and his ultimate responsibilities as a citizen. All training within the corps should be directed toward simplify this step across the inner face between these two discrete phases of the enrollee's career. Thus the Youth Conservation Corps objectives are specifiable in the requirement for simplifying this transition.

THE CENTER FOR VOCATIONAL TRAINING (PCVT)

The manor vehicle for carrying out the present plan is a facility designed to develop, test, and revise training programs. This facility, the Programmatic Center for Vocational Training (PCVT) would be responsible for:

1. Developing programs to produce reading skills.
2. Developing programs to produce academic certification (high school diploma).
3. Developing programs to produce job skills.
4. Developing methods of evaluating programs and enrollees.
5. Developing methods for overall program evaluation.

(*a*) *Level I, basic reading level.*—Illiterate persons can be taught to read by means of programs. The content should be related to adult interests and is focused on developing job-related reading skills. Enrollee change in reading skills will be evaluated frequently by methods intrinsic to the reading program. Various motivational devices would then be used to develop and maintain a reasonable rate of progress. Basic reading level materials will be written for adults. Enrollees will remain in the program until they attain approximately a fourth-grade reading level which it is estimated should require approximately 3 months for normally motivated learners. At this point, these enrollees become functionally literate and proceed to level II where reading skills function to increase their rate of progress toward developing job proficiency.

(*b*) *Level II, elementary vocational training.*—Reading: Low-skilled readers will be phased into vocational areas which require learning of (1) names of job-related objects, (2) job-rated actions and behaviors, and (3) critical supervisory worker relationships.

The reading materials in level II require the enrollee to master such materials as:

(1) The most important 100 terms (realistically and concretely defined) in the particular trade he is studying.

(2) Typical pieces of equipment, pictured and described along with functions and critical terminology.

(3) The steps involved in the process of manufacture (nontechnical presentation) of typical items produced in the trade.

(4) The typical supervisory structures which he would most likely find in the job situation along with titles, responsibilities, and critical aspects of various job descriptions.

(*c*) *Level III, operational context training.*—After the enrollee has mastered the basic terms and relationships involved in a job area such as fire protection, construction worker, carpenter, etc., steps should be taken to have him function in the more specific context. Enrollees would work in their job work situations for a minimum of 5 to 6 hours a day when they satisfied the level III criteria. For the remaining hours of each day they would (1) perform calisthenics and competitive sports, (2) work in other job areas, (3) discuss job-related problems such as how to get along on the job, and (4) contact home community for job opportunities, etc. In the work situation itself, trainees would be assigned to already skilled persons (two trainees to one skilled person). The skills they learn are specific to the needs of current industrial production methods. The object of the vocational training would be to assure enrollees at least a level II achievement (familiarization with names, objects, functions, and supervisory structures characteristic of a semiskilled vocational area). Men who attained level II or level III could be given certificates establishing the fact which could be used by USES to certify competency in the job area; they would also receive emphasis by USES for job placement. Where the evaluation indicated competency, efforts would be made to (1) obtain jobs in adjoining

job and geographic areas, or (2) extend the training to a related job skill to provide a dual jobholding capability, or (3) increase the depth of training in the area by additional programs with greater technical and informational scope. This would provide the enrollee with a specialized high-strength area within the job area as a whole.

(*d*) *Level IV, technical skill programs.*—Reading skills represent a necessary but not a sufficient ground for employment. Men who possess adequate reading skills may be unemployable for many reasons such as:

(1) Lack of specific area of specialized knowledge and/or skills.

(2) Possession of archaic and/or obsolete skills with lack of opportunity to learn new skills.

(3) Lack of motivation for seeking employment; feelings of apprehension and general uncertainty.

(4) Inability to cope with other workers and/or supervisors in the job environment.

Thus, there are large numbers of youth who possess the basic level of literacy necessary to absorb information rapidly who nevertheless remain unemployed because of factors related to training, personality, geography, and our rapidly changing technology. We can make rapid attack in these areas as the necessary reading skills would already be available; the enrollee can move into higher level technical training which takes advantage of his existing higher literacy level.

The basic area of emphasis in these programs should be related to the ever-increasing requirement for technologists. However, clearly, those who can learn technical materials can learn level II and level III materials and could be assigned to these training areas where appropriate. The effort, however, should be (within limits) to provide opportunities for learning consistent with learner capability. Several illustrative level IV type programs follow:

TECHNICAL ELECTRICITY

A series of programs would be developed to provide understanding and skills in areas requiring comprehension of practical electrical concepts necessary for skills in both title I and title II of this act. This training would be functional in both rural and urban areas, as modern industry on the farm, the field, and in the city is largely powered by electricity. These fundamental concepts are basic to modern technology at every level and should therefore be an important training area for the Youth Conservation Corps.

*Program A, basic electricity.*—This program would be modeled on program developed for industry. Certain features would differ: (*a*) it would be more concrete and provide more work-related illustrations; (*b*) certain areas would be eliminated as they are specific to the company rather than job relevant; (*c*) certain pedagogical changes would be made to reduce time and improve comprehension. However, the program would still provide (1) progress based on demonstrated proficiency, (2) continuous evaluation, (3) internal motivational devices, (4) continuing evaluation of performance, and (5) features to provide continuing revision and improvement.

*Program B, basic electronics.*—This program would be an extension of electronics (involving diodes, triodes) of program A and would be available only to students who satisfactorily completed program A.

*Program C, basic transistors.*—This program would involve recent changes in basic theroy connected with solid-state physics (transistors and dielectrics) which would make the trainee conversant with terminology, basic concepts, circuitry, and computations.

In programs A, B, and C, the learners would be required to work on actual materials as well as perform the abstract manipulations involved in the formulas and definitions. These materials should be economical, specially designed to illustrate the points covered in the course, should be sturdy enough to take continued abuse, should be reusable, and above all, should be typical of job-related skills in the field.

The use of programatic methods should permit very rapid training. It is estimated that literate motivated trainees could complete the three programs within a 6-month period. On completion, they should be familiar with current electrical concepts, basic computations, and useful methods for adjusting and correcting typical malfunctions.

Some areas would tend to emphasize program A only; some programs A and B; in some areas it might be necessary to provide all three levels to a large proportion of trainees. The employment situation in the home community must, of course, contribute to the training which would be given.

### COMPUTER INFORMATION AND SKILLS

*Program D.*—This program would provide basic information relating to the function of computers, including the rudiments of computer logic and an overview of computer programing methods and techniques.

*Program E.*—This program would provide computer information relative to computer board-diagrams, board-wiring techniques and associated technical language, definitions, etc. Programs A, B, and C could be presented also where appropriate and necessary for enriching computer training.

### KEYBOARD AND KEYBOARD-RELATED SKILLS

*Program F.*—This is a programatic method for teaching typing based on the use of a machine developed to teach typing skills programatically. This method should be rapid, economical, and self-pacing. Equipment is now being patented and should be available shortly.

*Program G, stenographic and shorthand programs.*—These materials are readily programed and could be taught with very few instructors through tape-recording techniques synchronized with written programs. Monitors could be used to insure proper operation of the equipment, standardization of testing procedures, classroom attendance, etc.

*Program H.*—This is training in areas such as IBM key punch, typing and coding, use in accounting machines, desk computers, etc.; can also be accomplished programatically. Cooperating of manufacturers in this area of the enterprise should be sought to reduce costs of equipment and to obtain resource personnel. However, the methods used for training should be developed rather than adapted from current techniques as training methods in these areas tend to be overly elaborate, very sketchy, or sales related.

### SUMMARY

The PCVT would of course provide an ever-expanding and ever-changing body of programs. Each of these programs would be continuously tested and revised. New programs would emerge and old programs dissipate in response to changes in the job requirements through continuous evaluation of the programs and the enrollees in their home communities. The programs would evolve in the direction of increased efficiency.

Programed method is economical, direct, and suited to large-scale mass training of the type required by this act.

MYRON WOOLMAN, Ph.D.,
*Director, Institute of Educational Research, Inc.*

## The First Federal Failure in Prince Edward County

by Ben A. Franklin and Stanley Meisler

# The First Federal Failure in Prince Edward County

by Ben A. Franklin and Stanley Meisler

Literacy brings jobs, jobs bring rights. That formula fits snugly into the Kennedy Administration's thinking about the plight of the Negro in America. "There is little value in a Negro's obtaining the right to be admitted to hotels and restaurants if he has no cash in his pocket and no job," The President said in his last civil rights message to Congress. "...A distressing number of unemployed Negroes are illiterate and unskilled,... unable to do simple computations or even to read a help-wanted advertisement." Yet, on the very day that these words filled the front pages of newspapers across the country, a decision was reached in Washington that strangled what some officials believe was one of the Administration's most exciting and promising projects to create literacy and jobs and rights. The brief life and quick death of the project is a case study of federal frustration in the field of civil rights.

The case study centers on a federal plan to do something about the 1,500 Negro children deprived of schooling in southside Virginia's Prince Edward County since 1959. That year the county's Board of Supervision, faced with a court order to desegregate its schools, decided to abolish them instead. A private school, paid for by state tuition grants, was set up for the white children, but the Negro children were left unschooled and illiterate. This action was upheld by the U.S. Circuit Count of Appeals in Richmond last August 12.

The lush, green tobacco country of Prince Edward County has become the shameful and pitiable symbol of successful Southern resistance to school integration. There are 10-year-old Negro children there who never have seen the inside of a classroom. There are Negro teen-agers who soon will be too old to leave their farms and enter a school again. Prince Edward County gnaws on the conscience of America.

In the legal wrangling over Prince Edward's abolition of the public schools, the federal government has fought at the side of the National Association for the Advancement of Colored People. The Justice Department has intervened in the case, asking for the opening of public schools, and it will join with the NAACP in appealing the latest decision of the Court of Appeals to the Supreme Court. But last February, President Kennedy decided far more must be done.

He and his aides were discussing the final draft of his first civil rights message to Congress when he came across a paragraph mentioning the Justice Department's intervention in the court suit. As the conference broke up, Kennedy beckoned to Burke Marshall, the Assistant Attorney General who heads the civil rights division at the Justice Department. Isn't there something else, the President asked, something direct, that the federal government can do in Prince Edward County?

Kennedy did not want a federal school system there --- almost any kind would provoke a storm in Congress. But he wanted some system of making up for lost years. He wanted a remedial instruction program that could go on even if the courts ordered the county to open its schools again. Kennedy appointed Marshall a committee of one to brainstorm the government and come up with ideas.

One memorandum, circulated among the agencies of the Health, Education and Welfare Department, explained, "The President said he did not want anything negative, only positive statements as to what can be done --- so long as it is remotely possible and legal." The memorandum said Kennedy was interested in ideas "no matter how far out they may seem. No deadline has been set," it continued, "but considering the source of the request, consider it URGENT." Similar circulars went through other departments.

The ideas flowed in. One government office suggested taking the country over as an army base and running a remedial school system for the Negro children on the post. Another proposal: build a television transmittor 80 miles south in the mountains of North Carolina and beam in a special intensified educational TV program, a sort of Radio Free Edward. The White House discarded these ideas as ingenious but impractical.

But a little more than two weeks after the White House meeting, an idea came in that seemed both ingenious and practical. Dr. Robert H. Felix, director of the Public Health Service's National Institute of Mental Health, put it forward. He proposed a federal grant to a research psychologist working with a quick, new method of teaching reading. The researcher would use the Negro children of Prince Edward County as his subjects. The grant could serve science and conscience at the same time.

Felix had Dr Myron Woolman in mind. Woolman, 46 year-old director of the Institute of Educational Research in Washington, is a pioneer in the use of programmed instruction for quick, mass and inexpensive education. He had demonstrated his methods in teaching soldiers to operate Nike missiles and in teaching basic concepts of electronics to new employees of Bell Telephone Laboratories. He is patenting a teaching machine for typists and pianists. And, for some time, he has been using a grant from the NIMH to teach mentally retarded children to read. His subjects in this project include pupils at the Joseph P. Kennedy Foundation School in

Washington, a school visited often by Mrs. Eunice Shriver, the President's sister.

Woolman's theories are couched in complex psychological concepts, but basically he simply believes that quick breakthroughs in education may be achieved by using programmed instruction. Programmed instruction takes the pupil out of the classroom-lecture situation and puts him in front of a workbook or a teaching machine that allows him to move forward at his own pace. He may not turn the page or flick the machine forward until he has mastered the lesson before him. When he understands point A, he is rewarded by seeing point B. Programmed instruction still is in its infancy, but, at the least, it seems to be successful in teaching the rudiments of reading, spelling, and arithmetic and in teaching a specific skill that must be learned by many students in a short time. In a society unwilling or unable to spend too much more money on education, programmed instruction has the advantage of seeming relatively inexpensive. A psychologist prepares the intricate program in the workbook or teaching machine; the program may be mass produced; an untrained person may be hired to supervise the students at the workbooks and machines. (see Spencer Klaw's "What Can We Learn From the Teaching Machines?", The Reporter, July 19, 1962)

On March 11, NIMH rushed an urgent invitation to Dr. Woolman to submit an application for a grant. In four days, he submitted a 26-page proposal. Woolman proposed a $2,500,000, 5-year exper-

iment, using his "progressive choice reading program" to teach 500 Negro illiterates in the first year. Although the proposal focused on the illiterates of Prince Edward County, Woolman actually was anxious to demonstrate that his method of programmed instruction could be used to raise the level of the hundreds of thousands, perhaps millions, of Negroes and others throughout the nation who need literacy and basic work skills. Just a few days before he submitted his proposal, Woolman had sent a statement to the Senate Labor and Public Welfare Committee on the Youth Employment Act. Woolman wrote the committee that programmed instruction could raise motivated illiterates to a fourth-grade reading level in three months in a concentrated program and that these new literates could ultimately learn basic electricity, electronics, and transistor. "Programmed method is economical, direct, and suited to large-scale mass training of the type required by this act, " Woolman said.

But the psychologist made no attempt to make this clear to the White House. He understood that his research was being used to fill a political need but had organized it to remain clear of political influences. Scientists face this kind of situation all the time in a nation where so much research is paid for by private industries and the Pentagon. Woolman has worked for both. "It is... quite possible, " he wrote in his proposal, "that the proposed project will be viewed as a disguised method of providing federal schools for Negro children..." Yet he sold his idea in just those terms that would appeal to the White House: an experiment designed to solve illiteracy in Prince Edward County. The fact that this would provide other

communities with the same capability was left to the reader.

At the same time, he felt that the psychiatrists, psychologists and other social scientists at NIMH would see a limited experiment as far more scientific than one attempting to deal with the problem of Negro job skills in America. This, too, made his stress the limited picture. Despite this, Woolman believed he had a scientific experiment that might yield results brimming with sensational implications for a government trying to deal with widespread Negro unemployment and anger.

NIMH Director Felix sent a memo to his boss, James M. Quigley, Assistant Secretary of Health, Education and Welfare. "The National Institute of Mental Health," Felix wrote, "is happy to propose at this time one step that might be taken to overcome some of the effects of the educational deprivation which has occurred in the last few years in Prince Edward County. Basically, the proposal is to conduct a study in the county of a greatly improved method of teaching reading which has already been developed, partly through support of an NIMH grant." Felix wrote that Woolman's programmed methods "could conceivably overcome" illiteracy in the county and "would be a perfectly legitimate research activity." He added that the research would have "considerable significance in the field of mental health, since non-reading is related to anti-social behavior and delinquency and since severe frustration phenomena during the middle years of childhood is known to occur upon the part of non-readers."

Felix obviously was enthusiastic. The enthusiasm soon caught Quigley, Commissioner of Education Francis Keppel, Burke Marshall, Attorney General Robert F. Kennedy, and the President. Woolman's project wouldn't solve the whole Prince Edward County problem, they believed, but it might help a large part of the Negro children catch up. On April 18, a Special Review Committee of eminent psychiatrists and psychologists and specialists from other related disciplines descended on Woolman's cluttered office in an old row house on the edge of Georgetown and grilled him for more than an hour. They discussed the project for almost three hours and then voted unanimously to recommend an NIMH grant to Woolman.

Eight days later, under pressure from Quigley, Felix mailed ballots to the 12 members of the National Advisory Mental Health Council, the group that has the final say about disbursing NIMH's $100,000,000 research fund each year. The Council was not scheduled to meet until June 20, too late to get Woolman and his proposed 21-man crew started during the summer. The ballots came in during May. Ten approved Woolman's project, one voted against it, and the twelfth member abstained.

On may 24, NIMH told Woolman to go ahead, hire his staff, and prepare to start work in Prince Edward County by August 1, But the final authorization letter from NIMH still was not in his hands. In early June, newspapers begain printing reports about Woolman's project, and a reaction quickly set in. It had a southern accent.

First, Senator Lister Hill, D-Ala., made a polite phone call to NIMH. Hill is chairman of both the Senate Labor and Public Welfare Committee and the Senate Appropriations Subcommittee on Health, and his generosity to medical research over the years has given him a paternal though near absolute influence over the National Institutes of Health. Hill did not say he objected to the project. He simply asked for information.

The evident objection came instead from Herman E. Downey, the flinty Tennessean who is staff director of Hill's appropriations subcommittee. Downey read the news accounts, immediately asked NIMH for the records, and then described the project as "a prostitution of medical research."

The seeming displeasure of the subcommitte that feeds money to the National Institutes of Health began to worry officials of the Department of Health, Education and Welfare. The enthusiasm of some officials began to wane. They also started to look nervously toward another southerner, Rep. L. H. Fountain, chairman of the House Subcommittee on Intergovernmental Operations. Fountain is preparing to hold hearings on how NIH grants funds to researchers. Ironically, Fountain never did make a query about the Woolman project. His staff, in fact, is first looking into the situation now. But the shadow of Fountain and his forthcoming hearings loomed large enough to shake some of the convictions in HEW.

The unease showed quickly. On June 6, just after the first news accounts appeared, one of Felix's staff members, was briefing a group of federal officials and Prince Edward County residents on the mechanics of Woolman's project. Then a messenger handed him a memo from Felix. It said that the office of Secretary of Health, Education and Welfare, Anthony Celebreeze, had ordered NIMH to hold back the project, at least until Congress adjourned for the year. Celebreeze's information officer, Harold Levy, has since denied that the Secretary himself issued the order. But, whoever was responsible, the order seemed to have Celebreeze working at cross purposes from the White House.

Some days later Mike Gorman, a member of the Advisory Council who had voted for Woolman's project, wrote a formal request for full reconsideration of the mail balloting. Gorman, a veteran of appropiration battling on mental health, is head of the National Committee Against Mental Illness. For years, he has been publicizing the crisis in mental health and promoting appropriations and donations of funds to meet it. The work has made him an intimate of the congressman who appropirate funds for mental health.

The Council met for its regular June 20 session in a conference room in "The Stone House," an aging cottage on the campus of NIH in Bethesda, Md. Ironically, it was the day after President Kennedy sent his last civil rights message to Congress, a message calling for the most sweeping civil rights bill since Reconstruction Days. The psychiatrists, psychologists and social scientists on the Council clearly had changed their earlier views.

It would be wrong, however, to assume that this change came only under the pressure of southern congressmen. Part of the change could be attributed to a growing resentment among the members toward another kind of pressure. Many of the Council members felt they had voted for Woolman's project originally under political pressure from the White House.

"We're a bunch of liberals, said one member. "We were for this thing as citizens. As scientists, we were not." There seemed to be a growing number of questions as to the strict scientific validity of the project. At the meeting, Gorman lashed a scathing attack against it. He said the project had been hastily and improperly drawn "under the gun" of the White House. He said it was not relevant to the mission of NIMH, and he expressed doubts about Woolman's experience and qualifications to run it. Two other members spoke out and supported Gorman. No one mentioned the appropriations subcommittee, but the name of Fountain was brought up. Oddly, in view of the earlier, almost breathless enthusiasm, no one from NIMH arose to defend Woolman

and the project. The Council, which had voted 10 to one with one abstention for the project by mail, decided to vote unanimously against in in person. Woolman and his programmed instruction would not be used in Prince Edward County.

"It's true that we were vulnerable," said a Kennedy Administration official who followed the episode closely, "and that makes it hard to argue with the contention that our scheme was non-scientific. But I think the moral of this mess is that some people, when the chips are down, have a greater loyalty to the appropriations committees than they do to the President of the United States." The moral of this mess, however, actually may be somewhat more complicated.

For one thing, the White House, while worrying about Prince Edward County, failed to see any of the broader implications of Woolman's research. No attempt was made to push the project as a real experiment that might help the problem of Negro unemployment throughout the nation. The White House saw the project as a disguised way of helping the county and pressured for it on these grounds. In doing so, the White House feel into a trap and found itself defeated by science, not segregation. This criticism, of course, is easy to make with hindsight. Woolman and NIMH actually sold the project as a cure for Prince Edward County. That's all the White House was looking for, and its search was sincere and commendable. It may be unfair --- though accurate --- to accuse the White House of not seeing the forest for the trees. At the

same time, it would seem that the White House was just as guilty as HEW in backing away from congressional pressure. The incident, at the least, shows a lack of coordination between the White House and Celebreeze.

One of the most troublesome questions is whether the episode actually resulted in setting back the whole cause of using programmed instruction to wipe out Negro illiteracy and unemployment. It is not easy to answer. Certainly the opportunity to demonstrate the method in a dramatic laboratory has been lost. But there still is some evidence that the publicity about the incident may have given programmed instruction a boost in some circles of the federal government.

The rejection of the project did not end the Administration's search for a way to help the Negroes in the county. In early August, William van den Heuvel, an assistant to Attorney General Kennedy, worked out a plan with Negro and Virginia officials for a privately-financed school system to open in Prince Edward County in September. Full details of the remedial program have not been announced, but the schools may be staffed with some psychologists. If so, a bit of programmed instruction surely may enter the curriculum.

Woolman does not believe he has suffered any crushing defeat. The Demonstration Review Panel of the President's Committee on Juvenile Delinquency has recommened that a grant be made to try out his methods with a few hundred children in the Washington school system. An expert in the programmed instruction field puts the Woolman situation this way: "He's probably a little punchy about what happened to him. But he really hasn't been hurt by it. His ideas have received a lot of exposure now. And he is a very talented fellow."

Nevertheless, the government has lost a unique chance to see if programmed instruction can be used to raise the work skills of culturally-deprived people. There are a few other experiments in progress. Woolman's work in the Washington schools will be one of them. Mobilization for Youth, another project of the President's Committee on Juvenile Delinquency, is using some programmed instruction in its project on the east side of Manhattan. Some work has been done in prisons and correctional institutions. A few other projects are ready to get going. But none have the advantage that Woolman would have had: a chance to work in the public spotlight with 500 Negro illiterates in one compact area.

All signs, however, show that federal job training has programmed instruction in its future, although officials don't see it as any panacea. Seymour Wolfbein, director of the Department of Labor's Office of Automation, Manpower and Training, says "We haven't used programmed instruction up to not, but we will very soon. There are oodles of companies in this field, and we

are asking HEW to check on them for us. I've been travelling about the country and looking at the material. Some of it looks pretty good. It looks like it can be used to raise the literacy and basic work skills of Negroes and others so they will be ready for technical training. Teachers are in such short supply that we have to look for something like this."

The need for these basic skills is increasing as the economy demands more and more skilled workers and the schools produce more and more dropouts. This foreshadows a mad, dangerous crisis of mass unemployment at the bottom of the economy and a critical need for skilled manpower at the top. "There are hundreds of thousands of Negroes without a fourth-grade education," Wolfbein says. "We find that we can't even train them to be gas station attendants. We worked with one company and found that 40 per cent of its business involved credit cards. Trainees have to know how to read and to add decimals. It takes more than just manning a pump. That's where programmed instruction could help, teaching the basic literacy and arithmetic."

These views are seconded by Dr. Hyman Frankel, the co-ordinator of training for the President's Committee on Juvenile Delinquency. "Unfortunately not much is being done right now," he says. "We really are at the very beginning. There has been a lot of thinking about programmed instruction. We don't believe it is the key to the problem of job skills, but it has tremendous possibilities. Of course, there has been a lot of resistance to it by traditional educators . But we are going to move with much more acceleration now."

The comments by Wolfbein and Frankel may be the key to the episode. No one knows whether programmed instruction really can do the job of uplifting the skills of illiterates. But its possibilities for literacy and job skills seem too attractive for the bureaucratic machinations over Woolman and Prince Edward County to hold it back very long, if at all.

Report No. L-16
February 26, 1960

Southern Regional Council
63 Auburn Avenue, N.E.
Atlanta 3, Georgia

ATLANTA and WASHINGTON

# RACIAL DIFFERENCES IN ACADEMIC ACHIEVEMENT

*By*
FRANK H. STALLINGS
Associate Professor of Education
University of Louisville

# Racial Differences in Academic Achievement

The problem of the differences in academic achievement between white and Negro pupils is one that is too important to leave to hearsay. Fortunately, there is a growing store of factual information that bears upon this question, and it is the purpose of this report to review the findings of two prominent school systems relative to the problem.

The first analysis concerns the Atlanta public schools and the second the Washington, D.C. system. Atlanta has made a notable attempt to get at the differences between the achievement of Negro and white pupils in a segregated system by using an outside agency to set up and carry out a comprehensive survey. The Washington school system has completed five years under an integrated set-up, and is in its sixth year under such a program; it, therefore, provides a good example of what may happen to scholastic standards with integration. The fact that in the District of Columbia schools there is an exceptionally large proportion of Negro pupils makes the findings of considerable interest.

# The Atlanta Study

In August of 1955 the Atlanta Board of Education adopted a resolution in response to petitions filed for desegregation of the schools. This resolution charged the Superintendent with the responsibility of finding out differences between white and Negro pupils in achievement.

At a subsequent meeting of the Board it was decided that the Educational Testing Service of Princeton, New Jersey, should be employed to conduct a survey of the schools. The resolution emphasized that the survey should be entirely one of fact finding, and was not to be one recommending procedure for desegregation.

The testing of pupils, and the scoring and processing of the test results were to be entirely in the hands of the Educational Testing Service. This testing was accomplished during the first three weeks of January, 1956. All pupils in the 4th and 6th grades of all regular elementary schools (66 white and 31 Negro schools) were given the Stanford Achievement Test in reading and arithmetic. All pupils in the 8th grade of the regular high schools (13 white and 4 Negro schools) were given the Iowa Every-Pupil Test in arithmetic. All pupils in the 12th grades of these same schools were given the Essential High School Content Battery.

The large numbers of pupils tested gives added significance to the test results from the Atlanta survey. There were, in round numbers, 6,500 4th graders, 6,000 pupils in grades 6 and 8 and 3,000 in grade 12.

Before summarizing the results, it is necessary to say a word about testing methods.

In measuring pupil achievement, "grade scores" are used. A grade score of 4.0 is the middle score made by a national sample of pupils at the time they enter the 4th grade and, similarly, a score of 5.0 or 6.0 represents the middle score of the national sample of pupils at the time of entering grades 5 and 6 respectively. A score of 4.5 represents the middle score of the national sample at the mid-point of the 4th grade and a change of one decimal unit in the score indicates approximately a month's change in achievement.

A word of caution, however, needs to be added whenever reference is made to a grade norm. Such a norm by definition is the point below which 50% fell and above which 50% of the scores rose. Another way of saying the same thing is that on any properly standardized test, half of all the pupils in the country would fall below the grade norm and half would be above it; half of the students tested will always score, in other words, "below average." It is therefore essential that any serious analysis of differences in academic accomplishment show not only comparisons in terms of grade score, but also show the spread of these scores and the degree of overlapping of the two groups being compared. This was done with admirable precision in the Atlanta survey. The spread of scores is expressed in terms of the percentage of pupils making scores above or below a particular point in the scale. Overlapping is also expressed in a percent. This percentage describes the portion of white pupils whose scores were equaled by Negro pupils or vice versa.

Now, what did the Atlanta survey show?

*First,* as the report states, the most significant fact revealed is that the achievement differences *within* the white and Negro groups were greater than the differences *between* the two racial groups. This was true at all levels; it showed up most sharply in 6th grade reading where white pupils were per-

forming anywhere from four grades *below* to five grades *above* their own grade; this meant a range of *nine grades*. Similarly, substantial numbers of Negro pupils were reading anywhere from five years below to two years above their grade level, a range of seven grades. This may appear startling to anyone not familiar with the results of testing, but actually it is typical.

As Walter W. Cook reported in his article, "Individual Differences and Curriculum Practice," *Journal of Educational Psychology* (1948) 39:141:

> "When the educational achievement of a typical 6th grade class is measured, we find a range of approximately 8 years in reading comprehension, vocabulary, arithmetic reasoning, arithmetic computation, the mechanics of English and other forms of achievement."

In a school by school comparison, similar differences are shown. Looking only at the white schools, the school with the highest average achievement in reading at the 6th grade level showed a median of 8.5, while the white school with the lowest average achievement had a median score of 3.8. Among Negro schools, the highest 6th grade median was 4.4 and the lowest 2.6.

These scores will have for professional educators implications for the future development and potential of a desegregated system. Interpreting them strictly on the surface, we see four apparent facts:

—if Atlanta is more or less typical, an integrated school system would have, at the start, a wider range of student achievement than is the case in either of the segregated systems;

—the achievement levels of an integrated system would, at the start, be weighted downward as compared with the present white system;

—the spread of achievement levels in an integrated system would, at the start, be greater than in the present white system, but not much greater: in 6th grade reading, for example, a range of ten grades instead of nine as at present;

—substantial numbers of Negro students would be *above* average.

*Second,* there were students of superior achievement of both races, although proportionately more were found among white pupils than among Negroes. At the various grade levels, from 40% to 60% of white pupils met the standard set by the top half of the national sample, while from 2% to 10% of Negro pupils did so. But it should not be overlooked that the figures show that on most tests less than half of Atlanta's white students in 1956 were up to the national medians.

*Third,* the overlap between white and Negro students was considerable. On the tests at all levels, the scores of approximately 35% to 65% of the white students were matched by those of 35% to 65% of the Negro students. This would indicate that roughly half of the white and Negro students are about equal in achievement.

*Fourth,* a few Negro elementary schools showed higher averages than did some white schools.

*Fifth,* the survey re-enforced earlier studies which showed that the farther one moves up the educational ladder in a segregated system, the greater are the achievement differences of white and Negro pupils. This progressively widening difference has probably a two-fold meaning. In the first place, it has been repeatedly shown that irrespective of race the range of individual differences in achievement gets broader as one ascends through the grade levels. Second, differences in academic achievement are related to socio-economic background regardless of race, and these differences would seem to have a progressively retarding effect on achievement. Since more Negro pupils are so handicapped in terms of background, they show up less favorably than the total white group.

These findings revealed in the Atlanta survey contribute concrete evidence as to the kinds of academic problems which need to be dealt with by any school system contemplating the possibility of school desegregation.

# The Washington Experience

Now let us turn our attention to a system which effected integration when faced with such problems.

Immediately after the May 17, 1954, ruling by the Supreme Court, the Washington schools entered the spotlight of national concern. With specific reference to the District of Columbia that decision flatly stated that, "Segregation in public education is not reasonably related to any proper governmental objective and thus it imposes on Negro children of the District of Columbia a burden that constitutes an arbitrary deprivation of their liberty in violation of the due process clause."

Had this ruling come at any time prior to the date of its issuance it would have posed a serious problem. But coming when it did, it found the Washington schools already engulfed in serious difficulties.

First, our nation's capital city had experienced a shift in racial population patterns which began many years prior to the segregation ruling. At the end of World War II the ratio of white pupils to Negroes in the Washington schools was 50,000 to 39,000. By 1950 the Negro pupils were in the majority and by 1958, 74% of the pupils enrolled in the schools were Negro.

Much of the enrollment increase was caused by migration of new families to the District. It might be of interest in passing to mention the origin of this influx. In a recent survey it was found that the 6,000 Negro pupils who had transferred to Washington schools in a given year came from 47 states; 45% were from the states of Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina and Virginia.

Second, the District of Columbia school system was attempting to meet the problem of an increased total pupil load and a mounting Negro majority with out-moded administrative machinery, a serious shortage of classrooms and teachers, and a glaringly unrealistic program for maintaining overall scholastic standards.

As far back as 1946 about 7,000 Washington pupils were on half-sessions in double-shift schools. Of this number more than 6,000 were Negroes. In 1948 a survey ordered by the Senate and House District Appropriations Subcommittees revealed that 18% of the classes in white grade schools and 40% of those in Negro schools had in excess of 40 pupils.

That there was unequal financing is attested by the survey made in 1954 by the Fund for the Advancement of Education. This survey revealed that the expenditure for each white pupil was $240.27, and that for each Negro pupil was $186.71.

Perhaps the greatest handicap of all to a system facing a rapidly changing racial population pattern was the dual system of administration and supervision. Under that system there were first-assistant superintendents, one Negro and one white.

In the case of the Negro schools, the first-assistant superintendent was by law in sole charge of their administration. This line of demarcation in administration and supervision was carried all the way down. For example, there were two city-wide heads of the Department of English, one for white and one for Negro schools.

Separate testing programs were maintained for Negro and white schools, and in general each organization operated as though there were no common obligations to be discharged.

It is not surprising that as a consequence separate academic standards obtained for Negro and white pupils. For example, in 1953, prior to integration, the median grade equivalent in reading for the 6th grade in the white schools was 7.2. In 1954 when test results for all 6th graders, Negro and white, were reported together, *for the first time,* the average was substantially lower at 4.9. This did not represent a loss by the whites but merely reflected the fact that the Negro pupils, who constituted over 60% of those tested, were considerably below the whites and thus brought the median score down.

How long such a cumbersome and unrealistic plan of organization would have continued in the face of the mounting needs is a matter of conjecture. The Supreme Court's ruling was taken as the occasion for making changes that were already past due.

The Superintendent's plan to implement the Board's policy was approved by that body on June 2, 1954. It provided for extensive desegregation by the following September. A subsequent plan provided for staff reorganization to unify the school system. One assistant superintendent assumed charge of all senior high schools, another of all junior high schools, still another of all elementary schools and a fourth was placed over all vocational high schools and adult education.

The Negro and white supervisory staffs were unified under the direction of a deputy superintendent. A uniform testing program was adopted, and in 1956 there was introduced into the 10th grade the track system of ability grouping. Each year thereafter another grade was added to the track plan until the three years of senior high school had been included.*

Further changes in the instructional program designed to raise academic standards included special summer remedial reading classes, a reading clinic, and increased pupil services to the physically, emotionally, and mentally handicapped. The teaching load at the elementary level was reduced, and there was a reemphasis on thorough teaching.

*This extensive revamping of the Washington schools, long advocated by the administrators of the system, came about through an aroused citizenry cooperating with the School Board and the staff in a determined effort to make sure that under integration not only would academic standards be main-*

*The track system has now been extended to the junior high and elementary grades.

*tained but actually raised. It was the added hope of all these people that juvenile delinquency and other social ills might be favorably affected through this extended cooperative community effort.*

What are the facts as to the academic standards in the schools of the District of Columbia, now that this program has been in effect over five full years?

The year 1955-56 was the first time that white and Negro pupils were included in the same testing program. With a school population composed of more than 60% Negro pupils, the median scores were below national norms. The gauge that is significant in measuring the effectiveness of the program undertaken is the amount of improvement that has taken place since 1955-56.

*From the time the first city-wide testing program became operative in 1955-56 to the time for the 1958-59 tests a gain was made in the median achievement of every subject tested at every grade level where the tests were given.*

The 1958-59 tests showed the 6th grade medians to be at or above national norms in five out of six sections of the test battery.

By this same year the 3rd graders were within either three or four months of the national norm in all subjects tested, and the average rise in these subjects over the 1955-56 figures was seven months.

During this period of improvement the percentage of Negro pupils increased sharply. In grade three, for example, it rose from 66.3% in 1955-56 to 79.1% in 1958-59, and at the 6th grade level the percentage rose from 63.9 to 75.6.

Thus, academic achievement rose at the same time as the proportion of Negro students rapidly increased.

Reading is usually considered the subject where the handicap of a meager background might show up most disadvantageously and particularly is this true in reading comprehension, often referred to as "paragraph meaning."

On this phase of the test there was at the 8th grade an improvement between 1955-56 and 1958-59 of eleven months, with the median rising to only two months below the national norm. For grades 3 and 6, the improvement was eight months. Fifth graders showed a six-month gain, and 9th graders scored a gain of five months.

Word-meaning, another phase of the reading test, showed gains ranging from three months for 5th graders to six months at grade levels 3 and 6.

In arithmetic reasoning, which is mostly problem solving and calls for considerable reading competence, a gain of eleven months was made at the 9th grade level with gains of nine, eight, five, and three months in grades 6, 3, 8, and 5 respectively.

Language, another background-related subject, showed a six-month gain at the 6th grade level, and a three-month gain at the 5th grade level. These were the only levels where comparable language tests were given.

One change made in the high schools was the adoption of a multiple-track system of ability grouping. Among other objectives it was believed that this would be a means of ensuring that the more capable pupils would not be neglected. A comparison was made of scores on the Iowa Tests of Educational Development by 275 top graduates in 1958 who were not in the Four-Track Program, and 275 top honors students in 1959 who were.

Results of these tests show that the median score in Natural Sciences rose from the 80th percentile to the 86th; in Correctness of Expression, from the 91st to the 96th percentile; and in Quantitative Thinking, from the 85th to the 90th percentile. Comparable improvement was shown in the verbal section of the College Entrance Board Examinations.

These figures furnish substantial evidence that these top students have profited by the opportunities provided them. They demonstrate further that integration has not reduced the capacity of Washington schools to produce students of the highest quality.

*The most encouraging trend in social improvement has been reduction in the delinquency rate of nonwhite children between the ages of five and seventeen. This dropped from 37.1 per thousand in 1954 to 21.2 in 1958. While it cannot be claimed that school integration brought this about, it can certainly be said that integration did not result in an increased delinquency rate among non-whites. Nor did it adversely affect the rate of white delinquency, which fell slightly from 15.3 to 15.2.*

Another more direct indication of a school system's effectiveness is the drop-out rate among students after they pass the compulsory school attendance age. The greatest loss usually occurs between grades 9 and 10, the point where youngsters enter senior high school. In 1956, 18% of the white and 35% of the Negro pupils left school at this point. In 1957, the percentages had dropped to 14 for whites and 27 for Negroes.

In summarizing the evidence as to what has taken place scholastically in the Washington schools, it is safe to state that during the five years completed under an integrated program, accompanied by an extensive reorganization and a reemphasis on adequate provision for instruction, steady progress in academic standards has been made.

# Conclusions

The following observations summarize the findings from the studies of the Atlanta and Washington school systems.

1. The Atlanta survey reasserted two well-known facts which are basic to all educational plans seeking to preserve and improve educational standards: that differences in individual achievement are very marked; and that differences *within* any racial group are greater than differences *between* groups.
2. Both the Atlanta study and that of the Washington schools revealed that under a segregated plan, proportionately more of the white pupils than Negro pupils met standards set by the top 50% of the national test group.
3. The Atlanta study showed that the overlap in the achievement of the white and Negro groups was very considerable; that between 35%-65% of the scores made by white pupils were matched by a corresponding percentage of the scores of Negro pupils. Overlap occurred not only with individual scores but there were some Negro schools whose median scores exceeded those of some white schools.
4. The Atlanta study showed that in a segregated system the racial differences in achievement were more pronounced in the higher grades than in the beginning grades. However, it should be remembered that in *any* kind of school set-up, it is typical that the *range* of scores increases as pupils advance from grade to grade.
5. The Washington study showed that during the five years following integration, marked progress has been made in academic achievement. From the time the first city-wide tests were given in 1955-56 to the time when the 1958-59 tests took place, a gain was made in the median score for every subject tested at every grade level where the tests were given. The tests results show pronounced gains in reading and such reading-related areas as arithmetic reasoning and language.
6. The Washington study shows that with the introduction of the Four-Track system, 275 top students under this program achieved percentile scores well ahead of a comparable group of students from the last class that was not under the Track program. This program was introduced as one means of raising standards for the top students.
7. Data collected by community agencies and by the school system itself show that integration was accompanied by a definite decrease in incidences of juvenile delinquency among the non-whites, and a reduction in drop-outs between the 9th and 10th grades for both racial groups.

Schools

## DESEGREGATION AND ACADEMIC ACHIEVEMENT

Several states have enacted pupil placement laws that are more or less copies of the Alabama law of 1955. These laws establish a series of criteria by which the assignment of students to their schools is to be made. The obvious and usually admitted purpose is to make difficult the entrance of a Negro into a white school.

In applying at least two of the criteria, school administrators can rely on something more than fears and guess-work. They can draw on the experience of Southern and border school districts which have desegregated in recent years.

These two criteria provide that, in assigning pupils, the school boards shall consider:

-the effect of admission of the pupil upon the academic progress of other students in a particular school or facility thereof;

-the effect of admission upon prevailing academic standards at a particular school.

These criteria are found in the placement laws of Alabama, Arkansas, Louisiana, Tennessee, and Texas. They are in the desegregation plan of the city of Atlanta, which has the approval of federal district court. Similar language is used in the placement law of Florida.

In March, 1959, administrators of 17 desegregated school systems participated in a conference held at Nashville before the U. S. Commission on Civil Rights. Twelve of them spoke to the question of the effect of desegregation on academic standards and on the white students; their remarks are reproduced below. The superintendents of Greensboro (N.C.), Clinton (Tenn.), Talbot County (Md.), San Angelo (Tex.), and Pinal County (Ariz.) did not comment specifically on the subject; the general tenor of the statements of the last two, however, clearly suggests that no adverse scholastic results have accompanied desegregation.

Not one of the twelve administrators who dealt with the question reported that desegregation had harmed the academic progress of white students, or had lowered academic standards.

1. From the testimony of Dr. Ward I. Miller, Superintendent of Schools, Wilmington, Del. (pages 77, 158*):

Question: ...do you have any observations with reference to the quality of the work done by the white pupils in the same schools? Are they doing less well than they did before the Negroes moved in in large numbers?

Dr. Miller: Well, we have, as I say, over the last 4 years developed our grouping program to a point where we classify our youngsters according to performance and scholastic achievement, and those standards are set for each particular track on which the youngsters run. The accomplishment of the average white student is better than it was. The accomplishment of the above average and the advanced placement and honor classes is truly remarkable...

Question: In other words, what you are saying is that there has been no diminution of quality resulting from this integration.

Dr. Miller: We feel it is better.

Later in the conference, Dr. Miller remarked:

Dr. Carmichael, your experience with reference to the improvement in academic achievement of the pupils since integration went into effect is similar to that we experienced in Wilmington. We would like to think that this had very little relation to integration but more to the beginning of results of a definite drive to improve instruction on all levels, of teacher workshops, of improvement in method, improved supervision, improved all along the line in our instructional program.

2. From the testimony of R. B. Piper, Superintendent of Schools, Logan County, Ky. (page 184):

Question: Have you noticed any decrease in the quality of the performance of white students since the--

Mr. Piper: No, sir. Our testing program doesn't indicate anything of that type.

---

* Page numbers refer to the Commission's printed transcript.

3. From the testimony of William Henry Oliver, Superintendent of Schools, Nashville, Tenn. (pages 88, 92):

> ...Our children are all in school, and are, we believe, achieving normal success in their studies...
>
> * * *
>
> ...I haven't noticed any effect one way or another on the educational success of the children, either white or colored, where they are together.

Mr. Oliver has permitted the quotation of the following, from a letter of January 8, 1960:

> Although my opinion is not based very largely on objective tests, I do not think that desegregation has affected the scholastic performance of white children in our schools, nor do I think that desegregation has required any lowering of our academic standards. This opinion is based on information secured by the various methods available to me as Superintendent.
>
> Please bear in mind that we have desegregated only the first three grades and that we have mixed with our white children at the present time only about forty-five Negro students altogether and that these are scattered among nine different schools.

4. From the written statement of Dr. John H. Fischer, the then Superintendent of Schools, Baltimore, Md. (pages 149, 150):

> We are frequently asked what effect integration has had upon academic standards. The answer is that academic standards are not changed in any school merely by the presence of a second race. The requirements for an honor's diploma or for a passing grade on an examination are not altered by integration. The tests of successful performance in courses in the skilled trades are the same whether the trade is being learned by a white boy or a colored boy. A child's standing on a nationally standardized reading test is determined not by his race but by his ability and background. Desegregation has no more effect on academic standards than it has on the yardstick by which a pupil's height is measured.
>
> What does happen, of course, is that as white and Negro children of poorer social, economic,

and cultural backgrounds enter a school the average achievement for the school as a whole has declined. But those individual children who are capable of outstanding work continue to perform at a high level...

As more and more of the families of stronger cultural background have moved to the suburbs and have been replaced in many cases by others that have known few advantages, the problems of the schools have naturally increased. This change in the schools reflects the change in the families now forming a growing fraction of our population. It is felt whether the children attend all white, all Negro, or integrated schools.

...There is no doubt at all that Negro children are receiving better educational opportunities in Baltimore now than they did under segregation. The opportunities of white children have been in no way diminished. Indeed, they have been increased, not as a result of desegregation, but by our general effort to improve our offerings for all children over the past 5 years.

5. From the testimony of Dr. Jack F. Parker, Principal of Webster Junior High School, Oklahoma City, Okla. (page 98):

Question: Do you have any observations with reference to the quality of the work being done by the Negro students that are now in white schools or on the other side, the quality of the work done by the white students in the schools where there are now Negro students as compared to before?

Dr. Parker: Yes...We have had the same experiences that have been indicated heretofore; that is, that the Negro pupils are more concentrated in the lower ability levels.

However, we feel that in our school in particular, where there has been a very great change in the student population during this 4-year period, that we adjusted rather well. We feel that we do maintain different ability groups, and we feel that the standards so far as achievement is concerned have been maintained.

6. From the testimony of the late Dr. Omer Carmichael, Superintendent of Schools, Louisville, Ky. (pages 154, 155-6, 158):

Question: ...Do you have any observations with reference to the average quality of performance of either the Negroes or the whites after they move from the separated into the desegregated schools?

Dr. Carmichael: ...Now, you asked, if I got your question, in the desegregation what, if any, changes we have observed. It happens that one of our principals on sabbatical leave last year wrote a doctor's thesis on what happens to scholarship or to achievement of pupils in a school system in the process of desegregating. His findings can be summarized in about this statement, that there was definite improvement in the 2-year period in the achievement of both races. The achievement of the Negro children increased markedly more than did the achievement of the white children. ...there was certainly improvement, and it is statistically significant for the Negro at all levels, and the white did not suffer. The white slightly improved, but not as much as the Negro.

* * *

Question: ...you speak of the improvement of achievement in the whites in those integrated schools. You do not attribute that to integration.

Dr. Carmichael: The improvement of the white is very slight. It is hardly--it is not statistically significant.

Question: Did the whites make similar improvement in their segregated school?

Dr. Carmichael: Yes.

Question: So you would not attribute this improvement to the integration.

Dr. Carmichael: I would not attribute the improvement in case of the white to it.

* * *

At a later point, Dr. Carmichael remarked: "...there was improvement in the schools that were biracial, there was improvement in the all-Negro schools, there was improvement in the all-white schools. We were concentrating on our problem, we were doing the job a little better than we had ever

done it before. It was all around improvement, but as far as we can tell, integration did not reduce it greatly, and it helped it for the Negro children who had the integrated experience, apparently."

7. From the written statement of David M. Green, Superintendent of Schools, Dover, Del. (page 166):

The scholastic standards of the Dover High School have not been lowered by the admission of Negro pupils.

8. From the testimony of Dr. Rex M. Smith, Assistant State Superintendent of Schools, West Virginia (pages 119-20):

Question: ...Do you have any comments or observations...as to whether or not there has been any reduction in the quality of the program for the white students...?

Dr. Smith: ...No; we haven't. That again goes back to the matter of keeping records in the various schools and the counties, and our records would not indicate--that is, grades of white youngsters versus grades of Negro youngsters--but in the overall program, that is, taking the records as a whole, there isn't any evidence that the record has gone down.

I would say it is a normal rise as we are hoping from year to year. I could not identify Negro versus white records. We just don't have them...

9. From the testimony of Dr. Carl F. Hansen, Superintendent of Schools, Washington, D. C. (pages 57,60,61):

In 1954, which was the first year of integration, all six grades made a median score of 4.9 in the paragraph meaning in the Stanford achievement test against a national norm of 6.6. This obviously is far below standard. In 1953 the white sixth grades made a median score of 7.2 on the progress reading test.

At once the charge was made that the desegregation lowered school standards. What really happened was that we began to report achievement record scores for the entire school system. The method of reporting had changed, not the facts.

* * *

Question: The integration of the Washington school system has had a good deal of publicity in the national press and the news magazines and so forth, and I think that a general impression has gained wide acceptance that there has been a substantial deterioration in the quality of the instruction in your schools. I take it you don't believe that is true.

Dr. Hansen: That is a conclusion that is founded, as I said in the first part of my presentation, upon misinterpretation of the facts. What we are showing is that we can improve overall standards, and this we have been able to do since 1954, and what we need to emphasize over and over again is that up to 1954 we were reporting achievement tests only in the white schools. For some reasons or another we neglected doing a similar type of survey testing in Negro schools.

* * *

Question: And it is your conviction that the quality of the education that you are now offering in the Washington school system to these bright youngsters at the top is at least equal to what you had prior to 1954.

Dr. Hansen: I think it is better...

10.* From the testimony of Charles L. Miller, Superintendent of Schools, Hobbs, N. Mex. (page 14):

Question: [There] is a common statement that is made, that it has the result of reducing the quality of the total program, so that the white children are disadvantaged somewhat, too. Do you have any comment on that?

Mr. Mills: I don't think the percentage in our situation has been large enough to have hurt the quality of the total program overall. I think that if it were larger, it would pull it down maybe, but in our case, no.

11. From the testimony of Claude C. Harris, Assistant Superintendent of Schools, Muskogee, Okla. (page 33):

---

* The last three statements indicate doubts about the future effects of desegregation; none of the three, however, reports any bad effects in experience to date.

Question: You have already commented that some of the Negroes have been very good students, and I take it that there are not enough Negroes in the schools so that you feel that they would in any way adversely affect the academic standards.

Mr. Harris: To say the /majority/* is so great that they are not affected.

12. From the testimony of Dr. Hugh Bryan, Superintendent of Schools, Leavenworth, Kans. (page 24):

Question: Do you have any feeling that the desegregation that you have now in effect has hampered or lowered the standards that you are able to maintain for your white students? Has it had any harmful effect on the quality of the programs being offered?

Dr. Bryan: No; I would say that it has not; possibly for several reasons. We have a small integration. According to my figures we have 140 in a student population--well, we have 140 Negro students attending integrated schools. One hundred of those are in the high school, which leaves only 40 of them which are distributed over the junior high and 4 rather large elementary schools. The largest number in any elementary school is 12.

* The transcript reads "minority," which would seem to be a typographical error.

# DESEGREGATION IN HIGHER EDUCATION*

Listed below are formerly all-white colleges and universities of 17 southern and border states and the District of Columbia which have desegregated since 1935 (when the University of Maryland admitted a Negro to its Law School). Most of these institutions did not desegregate until after 1948, and the majority of them have been added to this list within the past two years. A few of them still restrict Negro enrollment to the graduate and professional schools. At some of the schools no Negro student has yet been enrolled, but statements of their governing boards indicate an official policy of admission without regard to race.

# STATEMENT OF THE AMERICAN JEWISH CONGRESS ON SCHOOL SEGREGATION, NORTHERN STYLE

SUBMITTED TO THE HOUSE COMMITTEE ON EDUCATION AND LABOR

--

MARCH 29, 1962

--

STEPHEN WISE CONGRESS HOUSE
15 EAST 84TH STREET
NEW YORK 28, NEW YORK

My name is Will Maslow; I am Executive Director and General Counsel of the American Jewish Congress. The AJC, a national organization in existence since 1918, seeks, among other purposes, to combat racism and all forms of religious and racial prejudice.

In 1954, we, along with millions of our fellow-Americans, hailed the epochal decision of the United States Supreme Court in the School Segregation cases. We were particularly proud because in its historic footnote 11 the Court cited two AJC studies on the harmful psychological effects of segregation. We recognized at once that the Court had not only outlawed segregation created by state statute in 17 Southern and border states but had also simultaneously forbidden any segregation practices in Northern states consciously contrived by public educational authorities. Spurred by this decision, we began a study of school segregation in the North which resulted in the publication in 1959 of a report entitled "From Color Blind to Color Conscious" and one in 1961 entitled "De Facto Public School Segregation."

It is a common fallacy that school segregation is only a Southern problem. Almost half (48%) of the 18 million Negroes in this country now live outside the 11 states of the Confederacy. The largest concentrations of Negro population are now found in the metropolitan areas of the North, as the following 1960 census figures demonstrate (figures rounded off):

| Number of Negroes in Our Largest Cities 1/ | |
|---|---|
| 1. New York City | 1,087,000 |
| 2. Chicago | 812,000 |
| 3. Philadelphia | 529,000 |
| 4. Detroit | 482,000 |

1/ Source: New York Times, March 15, 1961.

| | | |
|---|---|---|
| 5. | WASHINGTON, D.C. | 411,000 |
| 6. | LOS ANGELES | 334,000 |
| 7. | BALTIMORE | 326,000 |
| 8. | CLEVELAND | 250,000 |
| 9. | NEW ORLEANS | 233,000 |
| 10. | HOUSTON | 215,000 |
| 11. | ST. LOUIS | 214,000 |
| 12. | ATLANTA | 186,000 |
| 13. | MEMPHIS | 184,000 |
| 14. | DALLAS | 129,000 |
| 15. | CINCINNATI | 108,000 |
| 16. | PITTSBURGH | 100,000 |

IT WILL BE OBSERVED THAT OUR FOUR LARGEST NORTHERN CITIES.-NEW YORK, CHICAGO, PHILADELPHIA AND DETROIT - EACH CONTAINS A LARGER NEGRO POPULATION THAN ANY OF THE LARGEST SOUTHERN CITIES - NEW ORLEANS, HOUSTON, ATLANTA, MEMPHIS OR DALLAS.

NEGROES IN OUR NORTHERN METROPOLISES ARE HERDED TOGETHER IN BLACK GHETTOES.[2/] NEGROES IN THESE GHETTOES ATTEND THE SCHOOLS LOCATED IN THEIR NEIGHBORHOODS. THE RESULT IS THAT SUCH SCHOOLS HAVE A PREDOMINANTLY NEGRO ENROLLMENT. FOR ALL PRACTICAL PURPOSES, THESE SCHOOLS MAY BE SAID TO BE SEGREGATED, ALTHOUGH THE SEGREGATION IS DE FACTO,[3/] RATHER THAN STEMMING FROM GOVERNMENT POLICY. IN ADDITION, SOME LOCAL SCHOOL BOARDS HAVE BY ONE DEVICE

3/ IN TAYLOR V. BD. OF EDUCATION OF NEW ROCHELLE, 191 F. SUPP. 181, 194, NOTE 12 (S.D. N.Y. 1961) THE COURT DEFINED "DE FACTO" SEGREGATION AS THAT "RESULTING FROM FORTUITOUS RESIDENTIAL PATTERNS" AND "DE JURE" SEGREGATION AS THAT "CREATED OR MAINTAINED BY OFFICIAL ACT, REGARDLESS OF ITS FORM."

OR ANOTHER CONTRIVED TO BRING ABOUT OR MAINTAIN A SEGREGATED SYSTEM. THESE DEVICES INCLUDE GERRYMANDERING, SELECTION OF SITES FOR NEW SCHOOL BUILDINGS, TRANSFER POLICIES, DELIBERATE UNDER-UTILIZATION OR OVER-UTILIZATION OF CERTAIN SCHOOLS AND ARBITRARY ASSIGNMENT OF GRADES TO PARTICULAR SCHOOLS. 4/

THE FOLLOWING TABLE BASED ON OFFICIAL AND UNOFFICIAL SOURCES LISTS THE NUMBER OF PREDOMINANTLY NEGRO PUBLIC ELEMENTARY SCHOOLS IN OUR LARGE NORTHERN CITIES:

NUMBER OF PREDOMINANTLY NEGRO PUBLIC ELEMENTARY SCHOOLS IN NORTHERN CITIES

| CITY | NUMBER | % OF NEGROES IN EACH SCHOOL |
|---|---|---|
| NEW YORK | 102 OUT OF 573 | 90 OR HIGHER 5/ |
| CHICAGO | 98 OUT OF 383 | 60 OR HIGHER 6/ |
| PHILADELPHIA | 38 OUT OF 271 | 99 OR HIGHER 7/ |
| DETROIT | 62 OUT OF 222 | 90 OR HIGHER 8/ |
| LOS ANGELES | 77 OUT OF 404 | 85 OR HIGHER 9/ |

4/ 1961 REPORT OF U.S. COMMISSION ON CIVIL RIGHTS, VOL. 2, "EDUCATION," PP. 101-110; MASLOW, DE FACTO PUBLIC SCHOOL SEGREGATION, 6 VILLANOVA LAW REV. 353,360 (1961).

5/ BOARD OF EDUCATION, CENTRAL ZONING UNIT, "ELEMENTARY SCHOOL AND PUBLIC ETHNIC DISTRIBUTION," JAN. 1962. PUERTO RICAN CHILDREN ARE CLASSIFIED WITH NEGROES FOR THIS PURPOSE.

6/ ESTIMATE OF THE CHICAGO URBAN LEAGUE, FEB. 28, 1962, WHICH CLASSIFIES AS A "NEGRO" SCHOOL ANY SCHOOL IN AN AREA WHERE NEGROES CONSTITUTE 60% OR MORE OF THE POPULATION, THE ASSUMPTION BEING THAT WHITE PERSONS IN SUCH AREAS TEND TO SEND THEIR CHILDREN TO PAROCHIAL OR PRIVATE SCHOOLS. SEE TESTIMONY OF CHICAGO URBAN LEAGUE SUBMITTED TO CHICAGO SCHOOL BUDGET HEARING, DEC. 19, 1964.

7/ PHILADELPHIA BD. OF EDUCATION, "FOR EVERY CHILD, THE STORY OF INTEGRATION IN PHILADELPHIA PUBLIC SCHOOLS," OCT. 1960, PP. 1-2.

8/ REPORT OF CITIZENS COMMITTEE ON EQUALITY OF EDUCATIONAL OPPORTUNITY, MAP, PAGE P6, N.Y.TIMES, MARCH 11, 1962, P. 58. THIS COMMITTEE WAS APPOINTED BY THE DETROIT BOARD OF EDUCATION.

9/ INCLUDES 34 MEXICAN-AMERICAN SCHOOLS. REPORT OF EDUCATION COMMITTEE OF THE COMMUNITY CONFERENCE OF SOUTHERN CALIFORNIA, P. 21, JAN. 1960. THIS REPORT WAS SUBMITTED TO THE U.S. COMMISSION ON CIVIL RIGHTS AT ITS CALIFORNIA PUBLIC HEARINGS.

NUMBER OF PREDOMINANTLY NEGRO PUBLIC ELEMENTARY SCHOOLS IN NORTHERN CITIES, CONT'D

| CITY | NUMBER | % OF NEGROES IN EACH SCHOOL |
|---|---|---|
| CLEVELAND | 40 OUT OF 130 | 60 OR HIGHER [10] |
| TOLEDO | 9 OUT OF 57 | 50 OR HIGHER [11] |
| SAN FRANCISCO | 7 OUT OF 101 | 60 OR HIGHER [12] |
| BOSTON | 14 OUT OF 154 | 90 OR HIGHER [13] |
| INDIANAPOLIS | 7 OUT OF 89 | ALMOST 100 [14] |
| YOUNGSTOWN, OHIO | 3 OUT OF 31 | 90 OR HIGHER [15] |
| JERSEY CITY | 8 OUT OF 28 | 50 OR HIGHER [16] |
| KANSAS CITY, KANS. | 7 OUT OF 38 | 100% [17] |

IN BROWN V. BOARD OF EDUCATION OF TOPEKA, THE SUPREME COURT CONCLUDED THAT COMPULSORY RACIAL SEGREGATION OF CHILDREN IN PUBLIC SCHOOLS "HAS A TENDENCY TO RETARD THE EDUCATIONAL AND MENTAL DEVELOPMENT OF NEGRO CHILDREN." DOES DE FACTO SEGREGATION HAVE A SIMILAR DETRIMENTAL EFFECT? THE NEW YORK

12/ INCLUDES TWO ASIAN SCHOOLS. ESTIMATE OF SAN FRANCISCO JEWISH COMMUNITY RELATIONS COUNCIL, MARCH 20, 1962.

13/ UNOFFICIAL ESTIMATE, 1961.

14/ INDIANAPOLIS HUMAN RELATIONS COUNCIL, REPORT, P. 2, JUNE 20, 1959.

15/ MAYOR'S COMMITTEE ON HUMAN RELATIONS, REPORT, PP. 1-2 (1959).

16/ ACCORDING TO A STUDY OF THE LOCAL SUPERINTENDENT OF SCHOOLS, NEW YORK TIMES, MARCH 10, 1962.

17/ ACCORDING TO THE LOCAL SUPERINTENDENT OF SCHOOLS, N.Y.TIMES, MARCH 20, 1962.

CITY BOARD OF EDUCATION CONCLUDED IN A FORMAL RESOLUTION ADOPTED UNANIMOUSLY ON DECEMBER 23, 1954:

> PUBLIC EDUCATION IN A RACIALLY HOMOGENEOUS SETTING IS SOCIALLY UNREALISTIC AND BLOCKS THE ATTAINMENT OF GOALS OF DEMOCRATIC EDUCATION, WHETHER THIS SEGREGATION OCCURS BY LAW OR BY FACT.

THE NEW YORK STATE BOARD OF REGENTS WHICH SUPERVISES ALL THE EDUCATIONAL INSTITUTIONS IN THE STATE, PUBLIC AND PRIVATE, CAME TO A SIMILAR CONCLUSION IN 1960. DECLARING THAT "SCHOOLS ENROLLING STUDENTS LARGELY OF HOMOGENEOUS ETHNIC ORIGIN MAY DAMAGE THE PERSONALITY OF MINORITY GROUP CHILDREN" AND "IMPAIR THE ABILITY TO LEARN," IT FOUND THAT SUCH SCHOOLS "BLOCK THE ATTAINMENT OF THE GOALS OF DEMOCRATIC EDUCATION."

SCHOOL BOARDS IN NORTHERN CITIES THUS HAD TWO ALTERNATIVES AFTER THE DECISION IN THE School Segregation cases. THEY COULD, LIKE THE CHICAGO BOARD OF EDUCATION, HIDE BEHIND THE STRIKING PHRASE USED BY JUSTICE HARLAN IN Plessy v. Ferguson AND BE "COLOR-BLIND" (163 U.S. 537, 599 (1896)), REFUSING TO ASSUME ANY RESPONSIBILITY FOR SCHOOL SEGREGATION ARISING FROM RESIDENTIAL PATTERNS. OR THEY COULD BE "COLOR-CONSCIOUS" RECOGNIZING WITH THE NEW YORK CITY BOARD THAT SUCH SEGREGATED SCHOOLS ARE "EDUCATIONALLY UNDESIRABLE." AS THE Detroit News EDITORIALIZED IN ITS COMMENT ON THE REPORT OF THE DETROIT COMMITTEE ON EQUAL EDUCATIONAL OPPORTUNITIES:

> THIS MEANS ABANDONMENT OF THE SCHOOLS' STUDIED NEUTRALITY ON RACE, THE EFFECT OF WHICH HAS BEEN TO BOLSTER DE FACTO SEGREGATION, IN FAVOR OF A POLICY WHICH ACCEPTS A RESPONSIBILITY TO FURTHER DESEGREGATION WHERE REASONABLE OPPORTUNITY OFFERS ITSELF. 18/

A DECLARATION OF POLICY IS, HOWEVER, ONLY THE FIRST STEP IN THE SUSTAINED EFFORT REQUIRED TO BREAK DOWN SEGREGATION IN A PUBLIC SCHOOL SYSTEM OR AT LEAST TO PREVENT ITS FURTHER SPREAD. WHILE CONDITIONS OF COURSE VARY FROM CITY TO CITY, EXPERIENCE IN NEW YORK CITY AND ELSEWHERE INDICATES THAT

---

18/ DETROIT NEWS, MARCH 11, 1962.

THE FOLLOWING ADDITIONAL STEPS ARE NECESSARY:

1. Racial Census

An ethnic and racial census of the pupil enrollment should be made. This should not be done by questioning the children but by the visual observation of the classroom teacher who would furnish the total for her class. (In no event should a school system record the race or religion of a particular child.) Such a census was conducted in New York State by direction of the State Commissioner of Education and in Detroit by the local board of education.

2. Zoning for Integration

In drawing school attendance lines, which now customarily take into account traffic hazards, distances from home to school, topographical barriers and the necessity of equalizing school capacity, the zoning officer should consider the necessity for achieving racial integration as a cardinal factor in zoning. It is not enough to review such lines to eliminate gerrymandered school districts. Such gerrymandering is now obviously illegal and has so been held by the Courts.[19/]

3. Site Selection

Whenever possible, new school buildings should be located not in the heart of black ghettoes but at their borders or in mixed neighborhoods. School boards must also anticipate population movements to prevent new schools from becoming all Negro or all white.

4. Permissive Transfers

Under the plan adopted by New York City in 1960, children in predominantly Negro and Puerto Rican schools were given the option of transferring to other schools in the borough with a much lower Negro-Puerto Rican population

---

19/ Clemons v. Bd. of Education of Hillsboro, Ohio, 228 F. 2d 853 (6th Cir. 1956), cert. denied, 350 U.S. 1006 (1956); Taylor v. Bd. of Education of New Rochelle, 294 F. 2d 36 (2d Cir. 1961), cert. denied, 82 Sup. Ct. 382 (1961).

AND WITH UNFILLED CLASSROOMS. CHILDREN EXERCISING THIS OPTION ARE PROVIDED FREE TRANSPORTATION TO THE RECEIVING SCHOOLS. THE NEW YORK CITY BOARD OF EDUCATION REPORTED RECENTLY THAT 4965 ELEMENTARY AND JUNIOR HIGH SCHOOL PUPILS WERE ATTENDING 127 SCHOOLS OUTSIDE THEIR HOME NEIGHBORHOOD UNDER THE OPEN ENROLLMENT PLAN.[20]

IT WILL BE NOTED THAT THE OPTION OF TRANSFERRING IS NOT GIVEN ONLY TO NEGRO OR PUERTO RICAN CHILDREN. ANY PUPIL OF A DESIGNATED "SENDING SCHOOL" IS ALLOWED TO TRANSFER. THIS PERMISSIVE TRANSFER POLICY WAS RECENTLY APPROVED BY FEDERAL JUDGE KAUFMAN AS THE FIRST STEP IN THE DESEGREGATION PLAN WHICH HE DIRECTED THE NEW ROCHELLE, N.Y. SCHOOL BOARD TO SUBMIT FOLLOWING LITIGATION IN WHICH HE HELD THE SCHOOL BOARD GUILTY OF CONTRIVING TO PERPETUATE SEGREGATION AT A SCHOOL IN THE TOWN WITH A NEGRO ENROLLMENT OF 94%. ON APPEAL, THE PERMISSIVE TRANSFER POLICY WAS APPROVED BY THE CIRCUIT COURT OF APPEALS AS A "MODERATE" BEGINNING.[21] AT PRESENT, THE ENROLLMENT AT LINCOLN SCHOOL, AS A RESULT OF THE OPTIONAL TRANSFERS OF 267 CHILDREN NOW CONSISTS OF 90% NEGROES.[22]

5. Reclassifying Schools

PERHAPS THE MOST EFFECTIVE METHOD OF REDUCING OR EVEN OF ELIMINATING SEGREGATION IS THE SO-CALLED PRINCETON PLAN, NAMED FOR THE CITY IN NEW JERSEY IN WHICH IT WAS ACCOMPLISHED. UNDER THIS PLAN, WHERE THERE ARE TWO ELEMENTARY SCHOOLS, NOT TOO FAR APART, ONE BEING PREDOMINANTLY NEGRO AND THE OTHER PREDOMINANTLY WHITE, ONE SCHOOL IS CLASSIFIED AS A KINDERGARTEN TO FOURTH GRADE SCHOOL AND THE OTHER AS A FIFTH TO EIGHTH GRADE SCHOOL. THIS RESHUFFLING OF CLASSES MAKES FOR COMPLETE INTEGRATION.

---

20/ Bd. of Education Press Release, Jan. 8, 1962.

21/ Taylor v. Bd. of Education of New Rochelle, 191 F. Supp. 181, Aff'd, 294 F. 2d 36 (1961), cert. denied, 82 Sup. Ct. 382 (1961).

22/ N.Y. Times, Dec. 12, 1961.

A VARIANT OF THIS PLAN WAS RECENTLY DEVELOPED IN MORRISTOWN, N.J. THERE A PREDOMINANTLY NEGRO SCHOOL IN THE CENTER OF TOWN WAS ABANDONED AND THE CHILDREN TRANSFERRED TO FOUR OTHER SCHOOLS IN THE CITY WITH PREDOMINANTLY WHITE ENROLLMENTS.[23] THE MORRISTOWN PLAN IS FEASIBLE, HOWEVER, ONLY WHEN THERE ARE "WHITE" SCHOOLS WITH EXCESS CAPACITY NOT TOO FAR FROM THE PREDOMINANTLY NEGRO SCHOOL.

WHERE THE PERCENTAGE OF NEGROES IN A SCHOOL SYSTEM IS HIGH, ALL OF THE MEASURES DESCRIBED ABOVE MAY BE INEFFECTIVE. IN NEW YORK CITY, IN 1960, THREE-QUARTERS OF THE CHILDREN IN THE PUBLIC ELEMENTARY SCHOOLS OF MANHATTAN WERE EITHER NEGRO OR PUERTO RICAN. IN THE CITY AS A WHOLE, 40% OF THE ELEMENTARY SCHOOL POPULATION WERE FROM THESE ETHNIC GROUPS.[24] BY JANUARY 1962, THE CITY-WIDE PERCENTAGE HAD INCREASED TO 44.8.[25] IN 1957, THERE WERE 64 ELEMENTARY SCHOOLS IN WHICH THE NEGRO-PUERTO RICAN ENROLLMENT EXCEEDED 90%. BY JANUARY 1962, DESPITE NEW YORK CITY'S NEW PERMISSIVE TRANSFER POLICY, THE NUMBER OF SUCH SCHOOLS HAD INCREASED TO 102, CONSTITUTING 17.8% OF ALL THE CITY'S PUBLIC ELEMENTARY SCHOOLS,[26] AS A RESULT OF THE CONTINUED DROP IN WHITE ENROLLMENTS. THE SCHOOL SYSTEM HAS BEEN ABLE, HOWEVER, TO REDUCE THE NUMBER OF ELEMENTARY SCHOOLS IN WHICH THE "CONTINENTAL WHITE" POPULATION EXCEEDED 90% FROM 290 IN 1957 TO 215 IN JANUARY 1962.[27]

DESEGREGATION IS ONLY ONE PART OF A SCHOOL BOARD'S TASK. INDEED, WERE IT TO STOP AT DESEGREGATION, IT WOULD NOT PERFORM ITS CONSTITUTIONAL DUTY OF EQUALIZING EDUCATIONAL OPPORTUNITY FOR ALL ITS PUPILS. NEGRO AND PUERTO RICAN CHIL-

23/ NEW YORK TIMES, FEB. 21, 1962.

24/ NEW YORK CITY BOARD OF EDUCATION, TOWARDS GREATER OPPORTUNITY, A PROGRESS REPORT FROM THE SUPERINTENDENT OF SCHOOLS DEALING WITH IMPLEMENTATION OF RECOMMENDATIONS OF THE COMMISSION ON INTEGRATION, JUNE 1960, P. 6, HEREAFTER CALLED THE THEOBALD REPORT.

25/ JAN. 1962 REPORT OF THE CENTRAL ZONING UNIT OF THE NEW YORK CITY BOARD OF EDUCATION.

26/ IBID.

27/ IBID.

DREN, LIVING IN SLUMS, WITH LITTLE OR NO PARENTAL SUPERVISION, MOVING FREQUENTLY IN THE MIDDLE OF SCHOOL TERMS,[28] WITH POOR MOTIVATION AND LOW EDUCATIONAL ASPIRATIONS AND OCCASIONALLY SPEAKING ENGLISH POORLY,[29] WILL REQUIRE MORE THAN ATTENDANCE AT A THEORETICALLY INTEGRATED SCHOOL TO OVERCOME SUCH HANDICAPS. PHYSICAL FACILITIES, EXPENDITURES PER PUPIL, SIZE OF CLASSES, OVERCROWDING, CALIBER AND EXPERIENCE OF TEACHERS AND CURRICULUM MUST ALSO BE EQUALIZED.

A DELIBERATE PROVISION OF INFERIOR FACILITIES FOR MINORITY GROUP CHILDREN IS OBVIOUSLY A VIOLATION OF THE FOURTEENTH AMENDMENT EVEN WHERE THE SCHOOL BOARD IS NOT RESPONSIBLE FOR SEGREGATION. BUT WHERE ONE GROUP IN A SCHOOL SYSTEM IS MARKEDLY HANDICAPPED IN COMPARISON WITH OTHERS, THE PROVISION OF EQUAL FACILITIES FOR EACH MAY BE INEQUITABLE. "EQUAL PROTECTION OF THE LAW," THE SUPREME COURT HAS TOLD US, "IS NOT ACHIEVED THROUGH INDISCRIMINATE IMPOSITION OF INEQUALITIES."[30] NEITHER IS IT ACHIEVED THROUGH THE MECHANICAL PROVISION OF EQUAL FACILITIES WHEN ONLY DISPROPORTIONS WILL REDRESS PRIOR INEQUALITIES AND CULTURAL DEPRIVATIONS. AS THE LOWER COURT STATED IN THE NEW ROCHELLE CASE: "THERE ARE INSTANCES WHERE IT IS NOT ONLY JUSTIFIED, BUT NECESSARY, TO PROVIDE FOR SUCH ALLEGEDLY 'UNEQUAL TREATMENT' IN ORDER TO ACHIEVE THE EQUALITY GUARANTEED BY THE CONSTITUTION." OR, AS THE NEW YORK CITY SUPERINTENDENT OF SCHOOLS PUT IT IN EXPLAINING THE SPECIAL SERVICES REQUIRED BY "DIFFICULT" OR "SPECIAL SERVICE" SCHOOLS, "THE NATURE OF THE EDUCATIONAL OPPORTUNITIES AVAILABLE OUGHT TO BE COM-

---

28/ IN AN ELEMENTARY SCHOOL IN MANHATTAN, THERE WERE 669 ADMISSIONS AND 456 DISCHARGES IN ONE SCHOOL YEAR OUT OF A TOTAL SCHOOL POPULATION OF 1550; IN A BROOKLYN JUNIOR HIGH SCHOOL, 610 ADMISSIONS AND DISCHARGES IN A SCHOOL POPULATION OF 1335; IN A BRONX SCHOOL 1077 ADMISSIONS AND DISCHARGES IN A STUDENT BODY OF 1450. PUBLIC EDUCATION ASSOCIATION, HOW DIFFICULT ARE THE DIFFICULT SCHOOLS?, P. 13 (1959). SEE ALSO THEOBALD REPORT, P. 43.

29/ ABOUT 80,000 CHILDREN IN THE NEW YORK CITY PUBLIC SCHOOL SYSTEM "DO NOT SPEAK THE ENGLISH LANGUAGE, OR SPEAK IT WITH SUCH LITTLE COMPETENCE AS TO REQUIRE SPECIAL TRAINING IN THE USE OF THE ENGLISH TONGUE." STATEMENT BY MAX J. RUBIN, PRESIDENT OF THE NEW YORK CITY BOARD OF EDUCATION, PRESENTED TO THE JOINT LEGISLATIVE COMMITTEE ON SCHOOL FINANCING, JAN. 19, 1962.

30/ SHELLEY V. KRAEMER, 334 U.S. 1, 22 (1948).

SISTENT WITH THE NEEDS OF THE CHILDREN.[31]

IT IS NOT SUFFICIENT TO ENSURE THAT THE SIZE OF CLASSES IN THE SEGREGATED INFERIOR SCHOOLS IS NO LARGER THAN IN OTHER SCHOOLS; THEY MUST BE SMALLER TO COMPENSATE FOR RACIAL AND ETHNIC HANDICAPS. SIMILARLY, A DISPROPORTIONATE NUMBER OF REMEDIAL READING AND ARITHMETIC TEACHERS, GUIDANCE COUNSELORS AND AUXILIARY PERSONNEL MUST BE DETAILED TO EDUCATIONALLY DEPRIVED CHILDREN. FINALLY, THERE MUST BE AN END TO THE PRACTICE UNDER WHICH THE WORST TEACHERS IN THE SYSTEM ARE ASSIGNED TO THE DIFFICULT SCHOOLS. EMPHASIS SHOULD BE ON THE NEEDS OF THE SCHOOLS RATHER THAN ON PREFERENCE OF TEACHERS AND PRINCIPALS.

THE FACILITIES OF PREDOMINANTLY NEGRO SCHOOLS ARE OFTEN FLAGRANTLY INFERIOR TO THOSE AVAILABLE AT PREDOMINANTLY WHITE SCHOOLS. USUALLY THIS INEQUALITY RESULTS FROM THE FACT THAT NEGRO RESIDENTIAL AREAS TEND TO COINCIDE WITH OLD BLIGHTED SLUM DISTRICTS IN WHICH ARE LOCATED THE OLDEST SCHOOL BUILDINGS OF A CITY CONTAINING OBSOLETE SCHOOL FACILITIES. BUT THE INDIFFERENCE OF SCHOOL BOARDS AND THE FAILURE TO ADOPT CORRECTIVE OR AMELIORATIVE MEASURES OFTEN COMPOUND THE DISCRIMINATION. THE CHICAGO URBAN LEAGUE CHARGED PUBLICLY IN FEBRUARY 1962[32] THAT

A. THE AVERAGE AGE OF NEGRO PUBLIC SCHOOL BUILDINGS IN CHICAGO WAS 5 YEARS MORE THAN THAT OF "WHITE" SCHOOLS.

B. NEGRO SCHOOLS HAD STRIKINGLY FEWER LIBRARIES, LUNCHROOMS, HOME MECHANICS ROOMS AND OTHER NON-CLASSROOM FACILITIES.

C. OF 24,700 STUDENTS ON DOUBLE-SHIFT, 90% WERE NEGROES, ALTHOUGH THEY CONSTITUTE ONLY 43% OF THE ELEMENTARY SCHOOL POPULATION.

D. THE APPROPRIATION FOR EACH ELEMENTARY SCHOOL CHILD WAS 20% LESS IN NEGRO SCHOOLS THAN IN WHITE SCHOOLS.

THAT THE EDUCATIONAL LEVEL OF CHILDREN IN SEGREGATED SCHOOLS IS MARKEDLY BELOW THAT OF THEIR WHITE PEERS IS A MATTER OF COMMON KNOWLEDGE VERIFIED BY MANY

---

STUDIES. AN INVESTIGATION IN 1955 BY THE PUBLIC EDUCATION ASSOCIATION OF NEW YORK CITY AT THE REQUEST, AND WITH THE COOPERATION, OF THE NEW YORK CITY BOARD OF EDUCATION REVEALED THAT THE AVERAGE READING TEST SCORES OF NEGRO AND PUERTO RICAN EIGHTH GRADE CHILDREN IN THE CITY'S PREDOMINANTLY NEGRO AND PUERTO RICAN ELEMENTARY SCHOOLS WERE TWO YEARS AND FOUR MONTHS BELOW THOSE OF A SAMPLE OF EIGHTH GRADE CHILDREN IN PREDOMINANTLY WHITE SCHOOLS. THE COMPARABLE AVERAGE ARITHMETIC TEST SCORES SHOWED A DIFFERENTIAL OF TWO YEARS AND SEVEN MONTHS.[33] IN 1962, THE PRESIDENT OF THE NEW YORK CITY BOARD OF EDUCATION ESTIMATED THAT 171,000 CHILDREN IN THE PUBLIC SCHOOL SYSTEM WERE "RETARDED TWO OR MORE YEARS IN READING."[34] SCHOOL SEGREGATION IN AND OF ITSELF IS OBVIOUSLY NOT THE ONLY FACTOR RESPONSIBLE FOR THIS EDUCATIONAL RETARDATION[35] BUT THAT IT PLAYS AN IMPORTANT ROLE SEEMS CLEAR.

NEW YORK CITY IS BY NO MEANS ATYPICAL. A RECENT REPORT SUBMITTED TO THE NEW YORK STATE COMMISSIONER OF EDUCATION BY DR. MARK SCHINNERER, ITS SPECIAL CONSULTANT, DECLARED:

> A 1960 PUBLIC SCHOOL STUDY OF 14 OF THE LARGEST CITIES OF THE UNITED STATES, INCLUDING NEW YORK, FOUND THAT APPROXIMATELY 1 OUT OF 3 OF THE PUPILS WAS SEVERELY CULTURALLY DEPRIVED. THE ESTIMATE FOR 1950 WAS THAT THE NUMBER HAD BEEN 1 IN 10. IT WAS ESTIMATED, FURTHER, THAT THE NUMBER WOULD BE 1 IN 2 BY 1970 IF A MASSIVE AND EFFECTIVE EFFORT WERE NOT MADE TO HALT AND REVERSE THE TREND.

THERE ARE INCREASING INDICATIONS THAT NORTHERN SCHOOL BOARDS OTHER THAN THE NEW YORK CITY BOARD OF EDUCATION ARE BECOMING "COLOR-CONSCIOUS" AND BEGINNING TO ASSUME THEIR EDUCATIONAL RESPONSIBILITIES. IN SAN FRANCISCO, THE BOARD

OF EDUCATION RECENTLY DIRECTED ITS SCHOOL SUPERINTENDENT TO FIND OUT HOW MANY OF ITS PUBLIC SCHOOLS WERE DE FACTO SEGREGATED AND TO RECOMMEND A CORRECTIVE PROGRAM.[35A] IN DETROIT, A CITIZEN'S ADVISORY COMMITTEE APPOINTED BY THE LOCAL BOARD OF EDUCATION COMPLETED A TWO YEAR STUDY AND SUBMITTED A 450 PAGE REPORT CONTAINING 150 RECOMMENDATIONS TO COPE WITH WIDESPREAD SEGREGATION AND DISCRIMINATION.[36]

LAST MONTH, MANY LOCAL SCHOOL BOARDS IN NEW JERSEY BEGAN INDEPENDENTLY TO DEVELOP SOLUTIONS. IN MORRISTOWN, AS HAS BEEN NOTED (P. 8), A PREDOMINANTLY NEGRO SCHOOL IN THE HEART OF A BLACK GHETTO WAS ABANDONED AND ITS PUPILS TRANSFERRED TO FOUR OTHER NEIGHBORING SCHOOLS WITH PREDOMINANTLY WHITE ENROLLMENTS.[37] IN JERSEY CITY, N.J., THE LOCAL SCHOOL BOARD, CONCEDING THE EXISTENCE OF DE FACTO SEGREGATION IN SOME OF ITS SCHOOLS, APPOINTED A TEN-MEMBER COMMITTEE, COMPRISED OF FIVE EDUCATORS AND FIVE REPRESENTATIVES OF THE LOCAL NAACP "TO WORK OUT THE PROBLEM."[38] IN NEWARK, THE SCHOOL BOARD ADOPTED A PLAN, EFFECTIVE IN SEPTEMBER 1962, UNDER WHICH PUPILS IN PREDOMINANTLY NEGRO SCHOOLS WILL HAVE THE RIGHT TO TRANSFER TO SCHOOLS IN OTHER NEIGHBORHOODS WHICH HAVE ROOM FOR THEM. TRANSPORTATION WILL NOT BE FURNISHED, HOWEVER.[39] IN MONTCLAIR, A CITIZENS COMMITTEE APPOINTED BY THE SCHOOL BOARD RECOMMENDED A PUPIL REASSIGNMENT PLAN TO FURTHER INTEGRATION IN THREE JUNIOR HIGH SCHOOLS.[40] IN PLAINFIELD, THE LOCAL SCHOOL RECOGNIZING A RACIAL IMBALANCE IN ITS ELEMENTARY SCHOOLS HIRED FIVE EDUCATORS TO STUDY THE PROBLEM.[42]

IN STAMFORD, CONN., A CITIZENS ADVISORY GROUP APPOINTED BY THE LOCAL SCHOOL BOARD RECOMMENDED A REVISION OF SCHOOL DISTRICT LINES TO PREVENT A NEW HIGH SCHOOL FROM BECOMING ALL WHITE.[43]

200,000 Negro and Puerto Rican children that need this intensive program and from 50 to 60 million dollars will therefore be needed if New York City is to provide such children with equal educational opportunity. The United States Commission on Civil Rights has accordingly concluded that the "per pupil cost of $200 a year places this program beyond the reach of most school systems."[56]

Apparently recognizing that the program is too expensive even for New York, the school officials of that city have now launched a modified version of the J.H.S. 43 experiment, at a cost of only $50 per pupil per year.[57] This "Higher Horizons Program" is now operating in 63 elementary and secondary schools in New York City involving about 40,000 children. Federal, state and municipal funds totaling about $1,500,000 are invested in the program. The Board of Regents which supervises public and private education in New York State has urged the extension of this program to every city in the state but the state legislature appropriated only $200,000 for this purpose.[58]

The 1961 report of the United States Commission on Civil Rights describes no less than 16 experimental programs conducted all over the country to improve the educational opportunities of minority group children. But their expansion to entire school systems will require immense sums which are not available to school boards desperately trying to replace antiquated buildings, reduce class size and hire new teachers with inadequate budgets. There is only one place from which such vast sums can be obtained and that is the Federal Government. The harmful combined effects of slum neighborhoods and school segregation can only be overcome by huge expenditures.

Precedents for such Federal assistance already exist. For example, Con-

GRESS PROVIDED IN 1958 FOR A PROGRAM OF FEDERAL ASSISTANCE TO STATE PLANS FOR GUIDANCE, COUNSELING AND TESTING OF SECONDARY SCHOOL CHILDREN.[59/] UNDER THESE PROVISIONS, PAYMENTS ARE MADE TO THE VARIOUS STATES TO AID THEM IN PROGRAMS DESIGNED TO IDENTIFY STUDENTS WITH OUTSTANDING APTITUDE, TO ADVISE STUDENTS OF COURSES BEST SUITED TO THEIR ABILITY AND TO ENCOURAGE STUDENTS WITH OUTSTANDING ABILITY TO COMPLETE THEIR SECONDARY SCHOOL EDUCATION AND TO TAKE THE COURSES NECESSARY FOR ADMISSION TO COLLEGE. A SIMILAR PROGRAM OF ASSISTANCE SHOULD BE LAUNCHED TO OVERCOME THE EDUCATIONAL RETARDATION RESULTING FROM SEGREGATION AND SLUM CONDITIONS.

PRESIDENT KENNEDY HAS RECOGNIZED THE PROBLEM. THE ADMINISTRATION'S PROPOSALS FOR FEDERAL AID TO EDUCATION REQUIRED IN THE 1961 BILL THAT 10% OF ALL SUMS ALLOTTED TO ANY STATE SHOULD BE EARMARKED TO IMPROVE THE LEVEL OF INSTRUCTION FOR UNDERPRIVILEGED CHILDREN. (S. 1021, SEC. 109). THE 1962 BILLS GO FURTHER. H.R. 10145, INTRODUCED BY REPRESENTATIVE FRANK THOMPSON, JR., OF NEW JERSEY IS ENTITLED "IMPROVEMENT OF QUALITY OF TEACHING IN ELEMENTARY AND SECONDARY SCHOOLS." SEC. 201 (A) OF THAT BILL AUTHORIZES THE APPROPRIATION OF $50,000,000 A YEAR FOR FIVE YEARS IN THE FORM OF GRANTS TO STATES "TO IMPROVE THE QUALITY OF INSTRUCTION IN PUBLIC ELEMENTARY AND SECONDARY SCHOOLS." ONLY WHEN SUCH A BILL BECOMES LAW AND FEDERAL FUNDS BECOME AVAILABLE TO ASSIST MUNICIPAL SCHOOL BOARDS CAN THEY BEGIN TO EQUALIZE EDUCATIONAL OPPORTUNITY FOR ALL THE CHILDREN ENTRUSTED TO THEIR CARE.

REMARKS OF STANLEY H. LOWELL, CHAIRMAN
NEW YORK CITY COMMISSION ON HUMAN RIGHTS
AT YESHIVA UNIVERSITY, SUNDAY, APRIL 29, 1962

I am privileged to chair the panel on "Northern School Desegregation" on this occasion of the 75th anniversary of the founding of Yeshiva University.

I will address myself briefly to four aspects of this timely subject: First, let us look at the dimensions of the problem of segregated schooling as it affects us in the North. . . Second, let us touch upon the relationship between the northern and southern aspects of this problem. . . Third, let us consider the moral value at the root of the problem. . . And, finally, let us examine the reason why it is especially fitting for such a discussion to take place at Yeshiva University.

The words of your great president, Dr. Samuel Belkin, suggest our point of departure. For it was he who said that, "Knowledge is important, not only for the continuance of our cultural heritage, but for the preservation of life itself. Recognition of the moral law is of paramount importance for the survival of life itself."

It was moral law, in great measure, that led to the founding on Bill of Rights Day in December, 1955 of the Commission on Human Rights (then known as COIR). With Mayor Robert F. Wagner's strong support, the City Council in that year enacted Local Law 55, possibly the nation's most comprehensive human rights statute. Briefly, the law

charged the Commission to eliminate discrimination whether it was practiced consciously or accidentally by public agencies, private corporations, groups or individuals.

The reasons for the passage of such a law in New York City are quite obvious. In many ways we lead the nation. . . and the world. But we also have our problems, among them intolerance, bigotry, discrimination and segregation. You might call ours "accidental segregation," or, as we in the legal profession refer to it, de facto segregation. It is against the law. . . against public policy, but it still lingers on.

The establishment of the Commission on Human Rights--throwing the full weight of policy and law behind anti-bias programs and policies--marked one turning point in our history. Now we are about to enter the next phase. It is quite possible that the time has come for a careful re-examination of our traditional concepts in the much-discussed areas of equality and integration--a reexamination which would carry us beyond theoretical promises to living realities.

In the City of New York, the Commission, other public agencies, many private organizations and such splendid educational institutions as yours have succeeded in reshaping the public's mind. Today bias is unfashionable. We should follow up on this advantage. We should use this time to plan and execute concrete action programs which would channel this new thinking in positive directions.

A look at the Census figures tells us that almost half (48 per cent actually) of the 18 million Negroes in this country now live outside the 11

states which once-formed... and sometimes act as if they are still a part of the Confederacy. According to the 1960 Census figures, New York City alone has 1,087,000 Negro citizens. Taking New York, Chicago, Philadelphia and Detroit, each contains a larger Negro population than any of the largest southern cities including New Orleans, Houston, Atlanta, Memphis or Dallas.

Like others who came to this country before them, Negroes came North seeking better opportunities. And, in many instances, they did improve their lot. But problems remained and other problems, mainly in the creation of ghetto housing, arose. In spite of the combined efforts of many men of goodwill and in spite of the heart-warming and striking instances of individual progress, the pace of integration in housing has been slow. There are many reasons.

High among them is the barrier to the Negro's economic progress, which prevents much real movement... and we at the Commission have confirmed this since passage of the historic Sharkey-Brown-Isaacs (Fair Housing Practices) Law some four years ago. Secondly, while many white persons are more than tolerant, most have not as yet reached the point where they work actively to create integrated housing situations. The result, we all know, is segregated schooling and it can be just as real whether it is de facto or de jure.

A report issued by the Central Zoning Unit of the Board of Education in January of this year points up the seriousness of this problem.

It showed that 102 out of 573 elementary schools in New York City were predominantly Negro or Puerto Rican. I won't belabor the point: facilities in these schools are often inferior to those available at predominantly white schools. As a part of the vicious circle, inequality is almost built-in...because Negro residential areas coincide with slum districts and old buildings can be expected to have obsolete facilities.

Segregated schools in our city were outlawed long before the United States Supreme Court's historic decision of May 17, 1954. We eliminated them, legally, in 1920. But many years later Negro parents still found it necessary to petition the Board of Education in an attempt to correct obvious injustices.

In December of 1954 the Board of Education officially recognized that something had to be done. It acknowledged that segregated, racially homogeneous schools damage the personalities of minority group children, decrease motivation and impair their ability to learn (whether they happen to live in the North or in the South). Significantly, the Board added, "white children are also damaged...public school education in a racially homogeneous setting is socially unrealistic and blocks the attainment of the goals of democratic education, whether this segregation occurs by law or by fact."

The New York State Board of Regents made a similar statement in 1960, so that both the City and State were unanimous in suggesting that education should be "color conscious" rather than "color blind."

But a declaration of policy is one thing, and actual achievement is another. And, this again, is where the Commission on Human Rights enters into the picture.

Reflecting enlightened educational attitudes as well as deep-seated community feelings, the Commission urged the Board of Education to adopt a seven-point program designed to translate policy statements into realities.

Very briefly, the Commission recommended high-level direction and staffing of a school integration program... the assignment of qualified teachers to schools with large minority group populations... in-service training programs... expanded efforts to build community understanding... the use of school site selection policies to advance integration. And the Commission made another recommendation. It urged the adoption of a policy that we have since come to know as "open enrollment."

Today open enrollment is one of the most tangible expressions of our city's official "open city" policy. On January 8th, the Board of Education reported that nearly 5,000 elementary and junior high school pupils were attending 127 schools outside their neighborhoods, under this program.

On April 5th of this month, the Board announced the further assignment of 3,591 pupils to open enrollment schools for next September. A total of 105 schools in all boroughs except Staten Island have been selected as receiving schools.

There is much more to the story of open enrollment. One aspect involves sheer numbers:

Some would ask whether New York City can really integrate its schools. Three-fourths of the children in public elementary schools in Manhattan are either Negro or Puerto Rican. In the city as a whole, 40 per cent are from these two groups. And the latest figures suggest that the percentages may be going up. In 1957, for example, there were 64 elementary schools in which the Negro-Puerto Rican enrollment exceeded 90 per cent. By January of this year, the number had increased to 102--constituting about 17.8 per cent of all the city's public elementary schools as a result of declining white enrollments.

On the other side of the ledger, all-white elementary schools decreased from 209 in 1957 to 217 in January of this year. But figures alone do not give us the full picture. We should know... all of us, that is... precisely where we are going and why. We should plan and act on the basis of understanding and objectives.

School desegregation under open enrollment has been positive and dynamic, but we must give serious thought to the next phase of the North's attack on school segregation. And we must clear away the cobwebs of misinformation and fuzzy thinking. How many people realize that:

1. School desegregation and integration are not indentical.

2. Integration should involve specific school administrative approaches (e. g., curriculum changes and new teaching methods) and it should rest firmly on a foundation which recognizes the dynamics of social and psycholigical classroom activity. In other words, it requires changes--geared to the most up-to-date thinking in both methods and approach.

3. And further that this total educational process should provide the tools, techniques and motivation for integrated extra-school, adult living.

Our actions here in New York...the situation recently spotlighted in New Rochelle...and the accelerated pace of activity in New Jersey, in Ohio, in Detroit, in Chicago and on the West Coast demolish the remnants of the myth that this is solely a southern problem. It is a national problem without doubt. But there are differences of degree. Progress in this field might be measured this way: First comes the elimination of legal segregation. Next there is movement toward desegregation. And, finally, there is the attainment of integration.

The South, in many instances, is at Step 1 on the way to Step 2...it is eliminating legal segregation and moving toward desegregation. The North, in many instances, is at Step 2 on the way to Step 3. In other words, it is moving...somewhat unsurely...from desegregation toward integration.

As I indicated earlier, we have found at the Commission on Human Rights that bias is becoming unfashionable in our city. And it would not be stretching a point to suggest that it was about time.

Men of vision have proclaimed for centuries that equality was or should be the base of man's relations with his fellows. This concept--social justice--is the keystone of the Judaic-Christian ethic.

The major social chord which the Hebrew prophets kept vibrating was justice. In its various usages, it meant order, law, right, legal right. The concept of social democracy developed hand in hand with the evolution of the idea of one God. And this principle, activated through love, is Christianity's major chord, its gift to social ethics.

Today, with the principles having been firmly established and with a degree of acceptance having been won, we must hold the warmth and dignity of this promise and move unfalteringly ahead a step or two. Now the time has come to make integration a cardinal principle in our modern democratic concept. We must strive to make integration one of the norms in our culture. And, having done so, we need not fear that whites as well as Negroes will be desirous of striving for it.

It is at this point in our development and in our thinking that the Commission needs understanding and assistance. Helpful suggestions will come from members of this panel, I am sure. Educators, generally, can play a vital role--and Yeshiva University symbolizes this new kind of educational mission. This, as Dr. Belkin has so aptly phrased it, is "the higher moral purpose of education..."

This kind of education will continue to point the way to action.

July 30, 1962

Dear Mr. Hill:

I wish to take this opportunity to express my personal appreciation, as well as that of the members and staff of the Ad Hoc Subcommittee on Integration in Federally Assisted Education, for your kindness in appearing in hearings conducted by the Subcommittee on June 15, 1962, in its investigation of the progress of compliance by our schools with the 1954 Supreme Court decision.

The hearings have just been printed, and I am happy to enclose a copy.

We feel that through the findings of this Subcommittee, compliance with the Supreme Court decision will be much more rapid.

Moreover, we believe the studies and hearings on this question will help our citizens to become more enlightened and better able to participate in the full process of integration of the schools.

Your interest in helping to alleviate this pressing problem is genuinely appreciated.

Sincerely,

DOMINICK V. DANIELS, M. C.

Statement of Norman Hill, Assistant to the Program Director, CORE - the Congress of Racial Equality before the Committee on Education and Labor of the U. S. House of Representatives, June 15, 1962, Washington, D. C.

MR. CHAIRMAN AND MEMBERS OF THE COMMITTEE:

My name is Norman Hill and I am the Assistant to the Program Director of the Congress of Racial Equality whose office is located in New York City, at 38 Park Row. I wish to thank the Committee for this opportunity to appear and to present testimony on the urgent need for the passage of a bill providing for the desegregation of public schools and requiring every school board which has failed to achieve desegregation in its schools to adopt and file a desegregation plan of first step compliance with the Secretary of Health, Education and Welfare.

The Supreme Court in 1954 in the case of Brown v. Board of Education of Topeka declared that enforced racial segregation in public education is a denial of equal protection under the 14th amendment.

Yet today, eight years after this historic decision, 2,800,000 Negro children in the South still attend segregated schools. In the states of Alabama, Mississippi and South Carolina, no effort has been made to comply with the Supreme Court ruling. According to the U.S. Commission on Civil Rights in 1960-61 only 7% of all Negroes in public schools in the 17 southern states attended school with white pupils. The public schools in Prince Edward County, Virginia have been closed since September of 1959 in defiance of a court order. Tuition grants involving state and local funds have been used to circumvent the Supreme Court decision. In Louisiana measures have been taken by the executive and legislative

branches of the government to maintain segregation despite a Federal court order. Accompanying the defiance on a state level were civic disorder and a boycott of the public schools serving as the foci of the controversy. A further indication of the breakdown of law and order were the harassment and economic reprisals directed against the few whites who attempted to comply with the Federal order.

Such evidence clearly manifests the urgent and immediate need for further steps on a federal level -- namely the enactment of a public school desegregation bill. The relevant and pressing question is: how to extinguish public school segregation. Open defiance continues. Progress is excruciatingly slow. Millions of minority group children are suffering under an inferior physical and psychological educational environment, are experiencing an incalculable harm which may never be undone.

Granting the existing widespread school segregation is in the South, it is in reality a national problem, a cancer of the North as well as the South. On May 17, 1954 the Supreme Court held that "separate educational facilities are inherently unequal," thus clearly encompassing segregation de facto as well as de jure. Examples of segregation in northern and western school systems occur by official action in the form of gerrymandering, zoning, selection of sites for schools and staffing and by culpable inaction, particularly in view of widespread residential segregation.

In reiterating support for a public school desegregation bill, I would cite Title II providing for grants to school boards and local

governments to facilitate desegregation and Title III authorizing technical assistance by the Secretary of Health, Education and Welfare for desegregation problems. These provisions are the means by which desegregation can occur and at the same time maintain and improve the quality of education. Concurrently the passage of a bill providing for the desegregation of public schools and requiring every school board which has failed to achieve desegregation in its schools to adopt and file a desegregation plan of first step compliance with the Secretary of Health, Education and Welfare is a recognition of the necessity and urgency of school desegregation, a realization of the importance of avoiding the compounding of existing inequalities in facilities, staffing and quality of education resulting from segregation.

Millions of minority group children, North and South, await fulfillment of the 1960 Democratic Party platform pledge, "that every school district affected by the Supreme Court's decision should submit a plan providing for at least first step compliance by 1963," and the Republican plank stating that, "We believe that each of the pending court actions should proceed as the Supreme Court has directed and that in no district should there be any such delay." The time is now!

******

# RACE AND THE SCHOOLS

-- a report on educational problems
with recommendations for remedial action.

Respectfully submitted to the Board of
Education of San Francisco by the
Council for Civic Unity.

Prepared by the CCU Education Commitee.
Adopted by the CCU Board of Directors on
September 5, 1962.

Council for Civic Unity
437 Market Street
San Francisco 5, California
(EXbrook 2-3877)

## Preamble

The function of the public school is to educate. Horace Mann said that education is "the greatest equalizer of the conditions of man - the balance wheel of the social machinery," but he did not mean that the school was to be used as a tool for social change or remedy, except within the framework of its educational function.

This Council for Civic Unity report concerns itself with the changing intergroup relations problems of the city only insofar as they affect the proper educational functions of the schools, and are in turn affected by the proper educational functions of the schools.

The CCU report is divided into two parts. Part I delineates briefly the educational problems that changing circumstances in San Francisco have created.

These problems of education fall into two broad and connected categories:

1) the disproportionate number of under-educated children among certain racial and ethnic groups;
2) the under-educated condition of all children with respect to living democratically and harmoniously in our heterogeneous community.

Part II suggests specific remedies which fall into three categories:

1) Maximum Integration;
2) Compensatory Education; and,
3) Education in Human Relations.

San Francisco can be justly proud of the role which the schools have played in preparing its children to be, in the words of Dr. Spears, "self-paying members of the economy and . . . active participants in the civic and cultural affairs of the community." However, the nature of the vast population changes of the past few decades have so altered the task of enlightening children that qualitative changes in education are now in order. Dr. Spears has also pointed with justifiable satisfaction to the role of the schools in aiding in the accomplishment of successful integration in certain of the city's neighborhoods - the presence of good schools has helped to hold older residents during racial changes in some districts. In the course of performing its basic educational task, the schools can continue to fulfill this social role, now for the entire city.

San Francisco has an unparalleled opportunity to learn from the experiences of other urban communities and to forestall some of the tragic developments that have taken place in those cities. The San Francisco School Board has evinced its good will and intentions in this matter, but the matter of time is critical. There can indeed be a "point of no return."

The Superintendent's report of June 19 addressed itself to only one aspect of the larger problem. His report did not - and perhaps was not intended to - offer to the Board of Education a choice of ways to deal with these urgent educational problems. It is the intent of CCU's report to do so within the limitations of being an "outside" agency.

## I - THE PROBLEMS

A goal of the public school in America has always been to develop each student to the extent of his ability, so that he can lead as productive a personal life as he is able, and so that he will fulfill as productive a role in the economic and social life of the community as he is able.

In order to accomplish this function, the schools have had to constantly adapt their endeavors to meet changing times and needs. For example, when the life of the nation became increasingly commercial, the school program shifted radically, as it did again when the nation's economy became increasingly urban and industrial. The school program was also changed drastically and deliberately with the development of universal school attendance, first in elementary schools and then in secondary schools. The "program changes" were not just changes in curriculum; they were also changes in methods of administration; in methods of pupil placement; in meeting special needs; in the very definition of immediate goals.

Educators have recognized that the schools could lose their educational function and become a stagnant weight on society and the individual child if they did not strive to keep in step with, and lead, significant social changes. The effort has often been difficult, there have never been an panaceas, the community has not always given the educators the support they needed - but the educators have persisted.

### Background Social Problems

The social changes taking place in San Francisco today which require significant educational changes, with an urgent time factor built in, are these:

1) The rapid change in the racial and ethnic composition of San Francisco.

The proportion of nonwhites in San Francisco has doubled in the past ten years and it has been conservatively estimated that it will increase by at least half again in the next ten years.

In 1950, 10 per cent of the population was non-white; today about 20 per cent is non-white; in 1970 at least 25 per cent will be non-white. In 1950 about 5 per cent was Negro; today over 10 per cent is Negro; in 1970, over 15 per cent will be Negro. In addition, the proportion of people who are ethically grouped as "Spanish-speaking," of Mexican, Latin American or Puerto Rican ancestry, has increased rapidly. In 1960 there were over 50 thousand San Franciscans with Spanish surnames.

Because of family sizes among these groups, the change in school population has been drastic, and will be even more drastic. (In 1960, 29 per cent of all births in San Francisco were non-white, 17 per cent being Negro). The population pattern in the public school is affected further by the fact that 25 per cent of all school age children in San Francisco attend private or parochial schools; most of these children are white. In 1960, according to the U. S. Census reports, there were 93,258 children enrolled in the public schools, of whom one-third, 30,554, were non-white.

2) The increasing growth of non-white ghettoes in San Francisco.

There has been some residential dispersion of non-white families throughout the community generally, but this scattering has lagged so severely behind the growth of the non-white population that the total effect has been a rapid build-up of concentrations and ghettoes.

In 1960 there were 8 census tracts which contained more than a 50 per cent Negro population, as against two such tracts in 1950. In 1960 seven census tracts were over 75 per cent nonwhite (Negro and other nonwhites), as against three such tracts in 1950; seventeen census tracts had over 50 per cent nonwhite populations as against eight in 1950. Nonwhite concentration in San Francisco has become, and in the next ten years will continue to become, more severe.

3) The accompanying growth of socio-economic and educational ghettoes in San Francisco.

These racial ghettoes, particularly the Negro ghettoes, are socio-economic islands.

Item: The median income of the Negro family in San Francisco is only about 70 per cent that of the white family.

Item: 44 per cent of all male workers (White plus nonwhite) in San Francisco in 1960 were engaged in "white collar" jobs, 22 per cent of male nonwhite workers were so employed - from these figures it is estimated that the proportion of Negro workers in "white collar" positions is only one third that of whites. 16 per cent of all workers were in the skilled "blue collar" positions as against 9 per cent of the nonwhite labor force. The proportion of unskilled workers among non-whites is far higher than among whites.

Item: The percentage of unemployed is twice as high among Negroes as among whites.

Item: 30 per cent of housing occupied by nonwhite renters is sub-standard, as against 15 per cent for whites.

Item: The proportion of white adults who have completed high school is 50 per cent higher than that of Negro adults.

Item: School achievement is dramatically lower in every racially ghettoized situation tested. In a community adjacent to San Francisco, a University of California study has just compared achievement in two different areas of the city with these results:

| | AREA A | AREA B |
|---|---|---|
| Per cent white | 97 | 22 |
| Reading Test Score (Mean) | 106 | 73 |
| Arithmetic Test (Mean) | 83 | 54 |
| Per cent reading at grade level | 97 | 40 |
| IQ Test (Mean) | 126 | 101 |

More than 15 per cent of San Francisco's schools have a racial imbalance approximately that of the "Area A" schools above, and more than 15 per cent of San Francisco's schools have a racial imbalance approximately that of "Area B" schools above.

Item: While Dr. Spears cannot furnish data for San Francisco, studies elsewhere show that Negro students drop out of school at a rate at least 50 per cent higher than that of white students.

4) There is a "vicious cycle" which traps persons in socio-economic ghettoes but which can be broken by positive action through the schools.

Speaking of the people who live in these metropolitan ghettoes around the country, a recent report of the National Education Association said: "While many are victims of prejudice, much of their difficulty in adapting to urban life . . . stems from the true inadequacy of their cultural background for the modern environment."

(It would be a serious mistake to underestimate the positive social traits of most people living in the ghettoes. Robert Weaver, Administrator of the Federal Housing and Home Finance Agency has observed "Slums in American cities tody house families which hold a wide range of values and evidence a variety of behavior patterns. Some are households with female heads and are stable none-the-less; others may be ungrammatical but adhere to high moral standards; still others evidence all the attributes of middle-class behavior and are dedicated to its values, if not recipients of its rewards. All three groups have ambition and talent, but fight an uphill battle in maintaining respectability and achievement for themselves and their children . . .")

In short, a vicious cycle is operating; low economic status to ghetto to low educational achievement to low economic status . . .

These ghettoes tend to become self-perpetuating traps, historically created and continually nourished by discrimination, but now regenerated constantly by something more

A central ingredient in this vicious trap of the racial ghetto is the sheer isolation of the non-white, particularly the Negro, who is walled in more effectively than America's ghettoized ethnic groups ever were fifty years ago - partly because of the difference in discrimination based on color, partly because of the difference in the American economy today. There is the danger, as there never was that these metropolitan Negro ghettoes - these cultural, educational and economic ghettoes - can become frozen. Fortune magazine's Charles Silberman wrote of this possibility:

"The danger is not violence but something much deeper and harder to combat: a sense of permanent alienation from American society. Unless the Negro position improves quickly, Negroes of whatever class may come to regard their separation from American society as permanent, and so

consider themselves permanently outside the constraints and allegiances of American society. The Negro district of every large city would come to constitute an American Casbah, with its own values and its own controls - and a deep hostility to the white community."

In his report, Dr. Spears rightly recognized that, "San Francisco, along with other great American cities, has always absorbed immigrants and moved them up the ladder to swell the bulging middle class that characterizes our society." But the situation of Negroes today has the elements of a separated and closed caste system containing its own limited middle-class and large lower class.

At what point can this vicious cycle be broken? What can society get off this causative merry-go-round? A break-down in housing discrimination is crucial, but it is no longer enough. The socio-economic, cultural and educational ghetto has grown too big and is too tough. A deliberate and strong remedy applied at the point of the schools in this vicious cycle is a sine qua non if this destructive cycle is to be broken soon enough or at all.

Educational Problems Related to the Social Problems

However, CCU is not raising the question of the schools being used as a general social instrument (although this may be indeed a valid question to raise), but is restricting itself to the successful educational function of the schools within the context of the above lightly-sketched conditions.

There would seem to be two different ways in which these conditions apply directly to the educational function of the schools:

1) As a result of a specific group situation a large number of individual students are being under-educated with respect to preparation for a productive economic and personal life.

Statistically speaking, at the point at which students leave school and enter the job market or college, a markedly disproportionate number of nonwhite students are: a) under-qualified in relation to other students; b) under-qualified in relation to their own natural capacities; c) resultantly in an inferior competitive position.

This ghettoized group has a school achievement of at least 25 per cent below that of the rest of the school community; it has a college entrance rate drastically below that of the rest of the community; it has a percentage of drop-outs drastically above that of the rest of the community. Yet, as a group its innate potential for intellectual and academic attainment is the same as that of the rest of the community.

In his new book, The Culturally Deprived Child, Dr. Frank Riessman has summarized a number of studies and school experiences which show the debilitating effect of the ghetto, with its lack of stimulation, upon achievement. He concludes, "School districting, which tends to segregate youths from different social strata, lessens the educational aspirations of underprivileged youngsters." A recent study made in the Bay Area showed that educationally disadvantaged children are much more likely to want to go to college and embark upon professional careers when they are in an integrated school

milieu. A report on de facto segregation by three prominent consultants at the request of the Englewood, New Jersey, Board of Education reads, "However, there is a growing array of research studies and of testimony of experienced educators leading to the conclusion that, because of the stigma attached to an all-Negro enrollment in the color-caste situations, children who are subjected to such a school environment generally fail to achieve up to the inherent talent which lies within them, regardless of the effort and talent put into the educational program. Professor Kenneth Clark, with others assisting presented an array of data as evidence in Brown v. Board of Education (347 U.S. 483, 1954) showing that a school which is all-Negro, because of this very fact, cannot secure the best possible achievement of its pupils. Dr. Carl F. Hansen, reporting as Superintendent of Schools of Washington, D.C., revealed that learning and school achievement in the Washington Schools had improved as a result of the removal of the stigma of segregation coupled with positive effort to attack the problem of under-achievement."

There is no question but that the ghettoized group, as a group, is under-educated and, that therefore the school - perhaps through no fault of its own commission - is failing to perform its educational function for a substantial number of students.

This situation is aggravated by the fact that in our modern economy with a lower need for an unskilled labor force every year, to be under-educated means to be more and more marginally employable. The vicious cycle is accelerated.

2) All children are being under-educated with respect to living democratically and harmoniously in our heterogeneous community.

To begin with, the most effective and indispensable education for intergroup living is contact. In one study of families in all-white public housing, 32 per cent who had had no personal contact with Negroes had favorable attitudes toward Negroes; but 74 per cent who had neighborly association with Negroes in a mixed project had a degree of esteem for Negroes. None of these families had been able to choose their public housing quarters' so it was the proximity and resulting neighborly relations alone which caused the differential in attitudes. There is no end of evidence on this point. Children who are racially isolated from each other are deprived of this important social education.

## II - SUGGESTED REMEDIES

The areas of remedy open to the schools in addressing the two educational problems are three-fold:

1) Maximum Integration

a) A significant goal if achievement is to reach its highest potential and if the prime educational function of the school system is to be fulfilled.

b) A significant goal in order for the educationally disadvantaged groups in the schools and in the community to feel that they have a stake in a society which really cares about them.

c) A significant goal if all of our youth is going to be educationally prepared to live in the community harmoniously and fruitfully.

2) Compensatory Education

a) This is a traditional educational concept already accepted by the San Francisco Board of Education, e.g., specialized education for children who are deaf, crippled, retarded, homebound, etc.

3) Education in Human Relations

a) The most effective education for harmonious intergroup relations is embodied in maximum integration. But, there is need also for deliberate programming within the schools and in the school curricula towards this end.

These three roads to remedy cross at many points and no one of them alone can achieve the goals. Programs of maximum integration and compensatory education both need to be applied to the problem of the generally under-educated and under-achieving youth in our schools. Programs of maximum integration and of compensatory education and of other forms of intergroup relations education all need to be applied to the problem of educating all of our youth to live together in San Francisco. A piecemeal approach cannot be effective; a comprehensive approach planned on all levels is needed.

1) Towards Maximum Integration

In his report to the Board of Education, Dr. Spears concludes,". . . any program to improve the situation would need to be educationally sound if established by official Board action."

"Educational soundness" consists of a balance of factors. As indicated in CCU's report*, integration in the schools is educationally sound and educationally advantageous.

CCU recommends that the Board adopt a policy statement that maximum integration is a goal of the San Francisco Unified School District. This need not be a threat to the policy of neighborhood school districts, which is also an educationally sound concept. School districting is now based on requirements relative to building utilization and the convenience and safety of the

* See pages 5, 6, 13, 15

children. CCU suggests that the principal of maximum integration be added to these criteria.

Recommendation:

The explicit policy which CCU recommends for adoption by the Board of Education is that:

1) Maximum integration in the public schools is educationally desirable and will be one factor of legitimate consideration in the placement of pupils, teachers and schools.
2) The definition of "maximum integration," upon which the above policy can be implemented, is an overall racial pattern in the schools which most nearly approximates the racial proportion of the total school population. This signifies a direction rather than a rigid proportion or quota in any given school.

Because of the social factors which influence neighborhood residential patterns, it is obvious that the goal of maximum integration cannot be absolutely attained by the schools alone. There may be some schools in which maximum integration could not be attained without transporting some children from School A to School B, and from School B to School A, simply to meet the goal exactly. CCU is not suggesting that this be done. CCU believes that the school's task is to do everything within its power, and in balance with its other educational goals, to approximate these proportions as nearly as possible, utilizing the remedies suggested below. Obviously, the goal is towards the best pattern of maximum integration for the school system, which means in effect that the movement shall be away from the worst single ratio in any given school.

There are several educationally sound remedies open to the Board of Education with which to implement the policy of maximum integration.

1) Districting: To achieve the above policy goal, the administration should determine school district lines with the factor of maximum integration included along with minimal requirements imposed by the other criteria of safety, distance, topographical barriers and school capacity. In other words, if these last four factors do not critically intervene, adjoining school district lines should be readjusted when they can help achieve an overall pattern of maximum integration.
2) Site selection: The selection of sites for new schools, or relinquishment of buildings for other uses, should take the factor of maximum integration into account along with other standard considerations.
3) Reclassification of Schools: When two schools are neighboring, it may be possible to achieve maximum integration by assigning lower grades to one building and upper grades to the other.
4) Secondary Feeder Patterns: The feeder pattern of junior high and high schools may be changed to obtain maximum integration.

5) School Utilization: In those cases as cited by Dr. Spears, where children are assigned from overcrowded to undercrowded schools the factor of maximum integration should be considered in the selection of schools.

6) Open Enrollment: When other remedies have not been fruitful in achieving maximum integration, children may be given the option of transferring to schools with unfilled classrooms as long as the transfer helps to achieve a pattern of maximum integration. This procedure has provided some relief from the situation and has at least visibly opened the jaws of the oppressive ghetto trap in other communities without imposing drastic burdens.

An impersonal racial head-count in the schools is required if the program above is to be implemented. A sharp distinction can be made at least between racial labeling in the records of an individual student and a simple head-count census conducted by the school staff. There is nothing objectionable about the latter, it does not involve embarassing the individual student or altering his records; it is now authorized for a number of official California state processes, and it is indispensable for the program of attaining maximum integration.

In reply to the argument that the schools should remain "color blind" in order to provide equal educational opportunities, the noted consultant, Dan W. Dodson has written, "The basic philosophy of intergroup relations in crashing through institutionalized segregation and apartheid policies was most clearly stated by Justice Harlan in the famous Plessy v. Ferguson decision. In his dissent he stated that any arm of government in dealing with people should be 'color blind.'

"Today however when it comes to integration as contrasted to desegregation, the shoe is on the other foot. The Supreme Court decision of May 1954 can be, and is, widely interpreted to mean that children reared in segregation are traumatized in their perception of self. This has injected a new value into the picture. This value indicates that when segregation, either enforced or de facto occurs, it is the responsibility of the government to break it up. This cannot be done by being color blind."

The Council is confident that if the Board of Education adopts the recommended policy of Maximum Integration, it will be implemented as soon as is possible from a practical consideration.

2) Compensatory Education

A recent report of the Educational Policies Commission of the National Education Association predicted, "If present trends are not reversed, half of the inhabitants of the large city of 1970 may be (educationally) disadvantaged - - persons unable to participate constructively in their society." The report stated that these are persons from "homes characterized by poverty, meager educational background, lack of privacy, emotional instability, shifting personal relationships, personal conflicts and mobility." These are people coming from rural backgrounds where they lived in isolation from the mainstream of American society. They are caught up in a new urban world which is difficult to join.

In his new book "The Culturally Deprived Child," Dr. Frank Riessman lists these "conventional reasons" usually given to explain why disadvantaged children do poorly in school:

"1. The lack of an 'educational tradition' at home, books, etc.
2. Insufficient language and reading skills.
3. Inadequate motivation to pursue long-range educational career, and poor estimate of self.
4. Antagonism towards the school, the teacher.
5. Poor health, improper diet, frequent moving, and noisy, TV-ridden homes."

Without dismissing the above, he adds some other causes connected with the school itself:

"1. The discrimination, frequently unintentional, seen in the classroom, Parent-Teacher Association, guidance office, psychological testing program, etc. which alienates Johnny and his family.
2. Johnny's ambivalence toward education - not simply rejection of it - his lack of school know-how, test-taking skills, information concerning college, and his anti-intellectualism.
3. The culture of the school which overlooks and underestimates his particular skills and mode of intellectual functioning that arise out of his culture and way of life.
4. The deficits in Johnny's background which necessitate special transitional techniques to bring him into the academic mainstream. These do not require a 'soft' approach, a lowering of standards, a capitulation to his deficiencies."

It should not be assumed that the ghetto family does not value education, often they perceive it as unattainable or nor directly related to the vocations open to them. In a study of educational and vocational aspirations conducted by Bernard C. Rosen, it was revealed that Negro respondents placed high value on education but had low vocational expectations.

Of course, not all Negro children are educationally disadvantaged, nor are all disadvantaged children Negroes - in some cities, it is the children of the Southern mountain white migrants who present educational problems to the schools, in others it is the children of Spanish-speaking families - but the factor of race is important in producing culturally deprived children as we have indicated.

The Concept of Compensatory Education

In his report of June 19, Dr. Spears gave attention to this problem and introduced the concept of "compensatory educational opportunity" through a quotation from a talk by Dr. John H. Fischer, Dean of Columbia University Teachers College.* To cope with the problems of the educationally deprived children, special school programs must be devised. It is to the credit of the San Francisco Board of Education that it long ago recognized the need for special school programs for the physically handicapped child and that more recently it took advantage of funds from the Ford Foundation to undertake a program in the Western Addition for the educationally handicapped pupil. The Board is to be further commended for its recent appropriation of a considerable sum to enable the expansion of this vital program and also for its efforts to seek further Federal and private monies to begin a similar program in Hunters Point.

It is to be hoped that these programs will produce the dramatic results in stimulating motivation, raising achievement levels, improving school - community relations, that have resulted from similar experiments in other cities. The way has been shown for the attack upon educational deprivation. There is nothing mysterious about the programs. They are based upon smaller teacher-counselor-pupil ratios, inservice training for school personnel, utilization of special materials and activities, and closer liaison with parents and community agencies including those concerned with employment. The operating cost for "compensatory educational opportunities" appears high when measured against the traditional school program, but this cost is low when placed in proper perspective by contrasting it with the expenses created by delinquency, welfare and the incalculable loss of human ability.

- - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - -

*" In the cases of some Americans, and that of the Negro American most dramatically, our traditional system has failed for a long time and in countless ways to provide that equality of opportunity that should be the condition of all our people.

Could it be that to achieve total equality of opportunity in America we may have to modify currently accepted ideas about equality of opportunity in education itself? Is it conceivable that some of our children are entitled to more and better educational opportunities than most of the others? In fact, of course, the question has already been answered. Thousands of mentally and physically handicapped children, regardless of race, regularly receive teaching service, physical facilities and supporting services more extensive and more costly than those furnished children who are considered physically or mentally normal. In the cases of many Negro children - and the generalization would apply also to certain other minority groups - we may need to substitute for our traditional concept of equal educational opportunity a new concept of compensatory opportunity.

I doubt that anyone is in a position now to say precisely what the concept of compensatory educational opportunity would mean in every case, but my purpose here is not so much to answer the question as to raise it for discussion. The concept of compensatory opportunity should certainly not be restricted to any one group and, as I have suggested, it has already been applied to other types of disability. But, to the degree that a child's race or cultural background handicap him, and especially where they are attributable, at least in part, to earlier governmental action, they should be taken into account in adjusting his educational program."

Recommendations:

The San Francisco Unified School System should expand its current programs both in scope and in goal. Full "Compensatory educational opportunity" should be available to every child who is in need - this is a great challenge to the school today. This challenge should not be met at the expense of the city's programs for other students for its very essence is to equalize opportunities so as to attain the highest levels of education for all of our children. To date, San Francisco's School Community Improvement Program has been limited in aim and application. There is need now for comprehensive central planning for an expanded effort; planning based upon full knowledge of achievement levels, school by school, upon the disabilities of children and of the erosive influences of the ghetto. CCU is confident that the citizens of San Francisco will give support, financial and otherwise, to expanded opportunities projects. To lessen the direct financial burden placed upon the cities whose populations require these intensive school ventures, CCU suggests that State and Federal resources be sought. There are ample precedents in the funding of programs for physically handicapped school children.

Further, the School Board might take the lead in suggesting and coordinating community projects that should enhance the school programs. There are now gaps between school and community which the Board can point out, suggest remedies, offer cooperation and assign liaison personnel. For example:

- - a corps of qualified community volunteers, properly screened and trained, who will take a child each "under their wing", not for behavior purposes but to educational ends - helping with the homework, encouraging effort, etc. For this program not to be offensive to parents, the schools or the community will probably have to provide neutral ground as has been done in the pilot program now being operated in the Western Addition by the LINKS and YWCA.

- - The school and community should work more closely with parents who are concerned about the advancement of their children. A report last June of the Subcommittee on Schools, Bayview-Hunters Point District Citiaens Committee asserted ". . . that our schools have had small success in their essential role of assisting family and community to transmit to our children the attitudes which build and sustain self-respect, individual dignity, and self-sufficiency and in achieving social and economic assimilation." Perhaps parent-teacher workshops, where each might participate on the level of common concern and mutual respect, may be begun by the Board of Education with the help of the Bay Area's excellent universities.

- - For another example, there are now school-employer-labor gaps which should be filled. Here again it would not be amiss for the schools to offer cooperation and make explicit suggestions, although the project

should be a community one not left entirely to the school district for implementation.

- - The role of the counselor is a vital one in guiding children along the educational paths, vocational or academic, suited to their interests and abilities. At present, counselors are overburdened to the point that they can allow but a short time during the school year for each pupil. There is need for more counselors, persons trained well with the best information available to them. The examples of possible programs suggested above could be very helpful as a supplement to the work of the counselor.

In summary, a program of "compensatory education," one with high educational standards, is needed today beyond the curricula and participant limitations of San Francisco's present pioneer project.

Integration As An Aid To Compensatory Education

Failure to implement the policy of maximum integration in schools would greatly impede the programs of compensatory education for ghettoized children. Studies and the experiences of desegregated school systems (cited above on page 5), indicate that ghettoized children are roused positively toward achievement in an integrated school situation where more emphasis is placed by other students upon educational attainments. Low achievement appears to be more a function of lack of stimulation of the cultural isolation which characterizes the ghetto, than lack of ability. It is also a generally accepted generalization that culture - - whether we mean values, expectations, or si mply the skills that go with urban living - - is learned through contact, preferably through participation in common tasks. Dr. Spears has cited the language difficulties faced by children coming from some groups in San Francisco. If these children were in a setting where correct English is the norm, it is likely that their language facility would be greatly enhanced and that their disabilities would not adversely affect other students whose backgrounds have given them correct language habits.

CCU wishes to emphasize that it is not suggesting that the educational standards of San Francisco's schools be diluted. Evidence from school systems which have desegregated indicates that educational standard levels need not fall and that children not educationally disadvantaged have not suffered in achievement.

Also, the point should be made that not all nonwhite children are educationally disadvantaged, nor are all disadvantaged children nonwhite. Many nonwhite parents have been able to provide excellent environments to prepare their children to take advantage of San Francisco's educational offering and some of these parents live within the confines of the ghetto. But the facts of the ghetto cannot be ignored. Dr. James Conant in his book, "Slums and Suburbs," has investigated these facts and concludes, "Social dynamite is building up in our large cities in the form of unemployed out-of-school youth, especially in the Negro slums. We need accurate and frank information neighborhood by

neighborhood . . . Leaving aside human tragedies, I submit that a continuation of this situation is a menace to the social and political health of the large cities."

3) Education About Human Relations

In his textbook, The Principles of Teaching, Dr. Spears has observed "The number one purpose of the American school is to train for American citizenship." Expanding upon this thesis, a Section of the Education Code of the state of California stipulates:

> "Each teacher shall endeavor to impress upon the minds of the pupils the principles of morality, truth, justice and patriotism, to teach them to avoid idleness, profanity and falsehood, to instruct them in the principles of a free government, and to train them to a true comprehension of the rights, duties, and dignity of American citizenship."

America has relied heavily upon its schools to propogate the basic values upon which the nation is predicated. The enormous task of Americanizing millions of immigrants was performed admirably by the public schools. This fundamental American educational goal remains today. "One of the greatest challenges facing the United States today is that of giving all Americans a basis for living constructively and independently in the modern age, " states a report of the National Educational Association. "The requirement is not for conformity but for compatibility. To make all people uniform would be as impracticable as it would be inconsistent with American ideals. To give all people a fair chance to meet the challenges of life is both practicable and American."

Events indicate daily that a prime problem facing American citizens is to cultivate the ability to live together in peace with peoples of all kinds in this most heterogeneous world. The child who does not understand the differences between racial and ethnic groups will be crippled as an adult. He will be unable to function effectively as a citizen, for his vision will be constricted by prejudice.

Americans as a people have been distinguished for their faith in education One continually hears the thought that education is the answer to the problems of race relations which also distinguish this country. Recognizing that education is but one answer among many, the question may be raised: What can be done by the schools to teach the facts of human relations systematically to our children? What can be done to help school personnel discover the facts about the intergroup differences among their students so as to develop a perspective to better deal with the educational needs of each child?

Guiding Principles for a Human Relations Education Program

Professor Charlotte Epstein of the University of Pennsylvania has written that an adequate educational program should deal with three aspects of human relations:

"1. Young people need the knowledge in the field; i.e. the facts about groups other than their own and how groups interact with each other in various social settings.

2. Young people need an awareness of and sensitivity to the needs and problems of groups other than their own.

3. Young people need opportunity to develop skills in interacting creatively with people of groups other than their own."

Successful programs of human relations have been carried on at all levels of education. Much has been written about these programs and it is not the purpose of CCU's report to set forth their content in detail here. However, in the lower grades it appears that this information is best imparted not as a separate subject but when incorporated in the reading and discussion materials of an academic subject such as English. In the secondary years, students are apparently able to deal with this information directly in specialized courses.

Inquiry reveals that San Francisco's public school children are not given the opportunity to learn about human relations systematically as they progress from kindergarten to high school gradua tion. In the elementary schools individual teachers may bring in pertinent materials as part of their regular instruction, but the student may move through the school without having had the advantage of such a teacher. Also, because teaching about human relations is left to the interests of individual teachers the result for the student is apt to be simply the cultivation of some insights which, while valuable, do not form into a related body of knowledge. At the secondary level, again individual teachers may teach about human relations within the context of other subjects - such as civics, history or English - but those courses dealing specifically with social problems are elective and are missed by many students.

Recommendation:

The San Francisco Board of Education should institute a program of human relations education to progress systematically through elementary and high school.

Integration and Human Relations Education

Judge Zirpoli recently reminded us of the changing relations between Negro and white people. If children are to learn about this, if they are to develop a comprehension of what is actually meant by the tenet, "All men are created equal," they must have the opportunity for face-to-face contact with children of the other race. "With the growin g segregation of residential living in America, the plaguing question which continuously arises is 'how can educators lead modern day youths out of their hiding into meaningful encounters with each other to the end that they learn the skills of citizenship commensurate with the demands of the times of which they are a part?", asks Dan Dodson of New York University, "I submit that it cannot be done adequately, with each little neighborhood school becoming a 'turf' whose primary purpose is to shut out life rather than to let in life."

This is why implementation of the principle of maximu m integration by the San Francisco Board of Education would be educationally sound for all children. Human relations education is of limited use when taught in a homogeneous racial setting. "All men are created equal . . . but . . . 'they' are not good enough to go to our school." "All men are created equal . . . but . . . we are not good enough for 'them'." The experience of children outside of

class can defeat the teacher's best efforts to follow the directions of California's Educational Code. The lack of personal contact, coupled with the stigma inherent to segregation, undermines the teaching of American values and leads to the cynicism of hypocrisy. Research has shown that attitudes can be influenced more by contact than by teaching. If, as some claim, education will eventually solve the problems of employment and housing integration, perhaps, if Negro and white children learn to get along during their most impressionable years, they will be more willing to accept one another as adults.

In-service Training

The fourth "R" in education - human relations - is a need of school personnel as well as of pupils. Dr. Spears' report indicated that some opportunity for this had been given to teachers last year through adult education courses. He also noted a pamphlet published by the school system ten years ago as well as special programs for some faculty members in selected secondary schools. Because these programs were profitable, Dr. Spears stated that he intends to intensify efforts along these lines.

Dean Fischer of Columbia has noted, "In dealing with a population which is racially and culturally integrated, the school must begin by encouraging teachers to understand the special factors in the backgrounds of all their children, to take these differences imaginatively into account, and to build curricula and teaching techniques that reflect not only idealism but realism as well." Teachers do not just teach, their daily interaction with students is a demonstration of human relations standards. The same may be said for administrators, counselors, and for non-professional personnel including custodians and clerical workers. All adults who have contact with children in a school setting are influential.

Research has shown, for example, that teachers from a middle-class background hoften have a difficult time teaching the child from a lower socio-economic group where there is a prevalance of behavior pattern so different as to be in conflict with middle-class values. Effective in-service courses can help teachers follow the counsel of psychiatrist Frank Riessman, "Understand the culture of the underprivileged, including the positives. This is not the same as recognizing the economic difficulties and general life conditions of the educationally deprived . . . But understanding of this culture must include a genuine appreciation of the positives that have arisen out of the effort, however insufficient at times, to cope with the difficult environment."

Recommendation:

The Board of Education should institute extensive, and on-going, in-service training programs in human relations for all school personnel.

Textbooks

Recently, the California Board of Education gave attention to the woefully inadequate treatment of the history and contributions of minorities in our textbooks. History texts present a Southern version of the Civil War because they are written to sell in the South as well as in the North. Texts should be factual not propogandistic. Minority children now learn little of the part which their

ancestors have played in the making of America. For example, the Negro child reads of the idyllic days of slavery and of a few individual Negroes who have gained prominence. He finds little in his school books to inspire him about Americans who are Negroes.

Teaching materials should reflect that heterogeneity which is peculiar to American life so that each child may find that of which he is a part. The books from which our children learn the basic academic subjects seldom contain pictures or examples with which minority children can identify. Primary readers are about small, white, middle-class families, complete with grandparents, silver table setting, and a dog. Our school materials should reflect the principles of maximum integration.

Recommendation:

The Board of Education should have textbooks and other teaching materials reviewed thoroughly for their accuracy, comprehensiveness, and balance in presenting the part played by all groups in the United States. Because of the system of textbook selection in California, the San Francisco Board of Education should support the State Board of Education's efforts to obtain more factual works.

Teacher Placement

There are other school problems related to human relations education which can be corrected. There appears to be some concentration of Negro teachers in schools of racial imbalance. While there is some value in this - it allows for easier identification of Negro children with successful people - it also is important that white children should have a similar opportunity for contact with Negro adults. A maximum pattern of integration for teachers should also be adopted. This means a policy of frankly "recognizing" the race of a teacher in an assignment. Under the circumstances, it is a casuistry to say that this is some kind of inverted discrimination. The burden of this document and of the action which the Board should take is the recogn ition that we are in a period where, for the purposes of educational achievement and indeed democratic achievement, a policy of constructive race-consciousness, rather than neutral race-blindness, is essential. This is not to say that the desires and seniority privileges of teachers who are Negroes should be ignored. It is merely to indicate what the attempt and thrust of the Board of Education should be in teacher placements.

Recommendation:

The Board of Education should adopt a policy of "permissive assignment" of teachers to implement the principle of maximum integration.

Intramural Integration

Another important question is that of intramural integration. It is common observation that while some schools may be integrated,there is little meaningful interaction between children across group lines. This has been called "voluntary"segregation, but it might better be termed "habitual." Schools should recognize the tendency toward habitual segregation and the resulting

racial tensions which are a product of the lives which children have led outside of the school setting.

Experience has shown that a positive program on the part of administrators and teachers can reduce habitual segregation. An experienced children's psychiatrist, Dr. Rutherford Stevens, has commented, "Some children will find it a problem initially to relate to other children with a greater diversity of socio-economic and cultural backgrounds than in their previous experience. They may be expected to develop sub-group loyalties, based on racial factors, in an effort to deal with this new stress. However, as soon as educators achieve a favorable school climate through resolution of their own conflicting attitudes and provision of strong objective leadership, the children's racial loyalties can be expected to give way to school, team and class identifications and loyalties." The faculty of a school should be helped to analyze this problem as it exists in their school and to develop coordinated efforts to counter it. For example, in a school in another city, no Negro children participated in the extra-curricular clubs, inquiry showed that they felt they were not wanted in clubs. This was a direct reflection of the isolation of Negroes not only in the larger community but in the teaching materials of the school itself.

Recommendation:

The Board of Education should encourage positive programs by school faculties to reduce habitual segregation where it exists in the schools.

4) Recommendations for Implementation of the Remedies

For the implementation of the above program - concerning Maximum Integration, Compensatory Education, and Human Relations Education - the Council for Civic Unity recommends:

1. The establishment of a central administrative division within the San Francisco Unified School District which can coordinate the programs and which can also serve as the center of contact and communication for interested parents and sections of the community (CCU is pleased to note that Dr. Spears has already appointed an assistant on race relations and hopes that this will lend to the adoption of CCU's recommendation for a central administrative division.);

2. Finally, the CCU reiterates its belief that the Board would find it helpful - as other Boards of Education have - to appoint an advisory committee for this comprehensive and specialized program. Such a committee would, of course, not be a policy-making body, or in any way a substitute for the Board of Education which is the duly constituted and well qualified citizens body for guiding school matters. However, there are complex intergroup relations and community relations problems intersecting the educational problems in this particular program. There are resources in the community on which the Board could draw to assist it in this unusual task. The advisory committee could be made up of Board members, administrative personnel, intergroup relations experts from our institutions of higher learning, and knowledgable individuals representing all segments of the community. Such

a committee could help relieve the Board from some of the exorbitant time-burdens of preliminary work; could provide some regular and valuable expertisse on the overall social problem, without cost;and could comprise an important bridge of communication between the Board and affected parts of the community in this sensitive situation.

## SUMMARY OF RECOMMENDATIONS

1) Towards Maximum Integration

CCU's primary recommendation is that the San Francisco Board of Education:

a) adopt a policy that maximum integration in the public schools is educationally desirable and will be one factor of legitimate consideration in the placement of pupils, teachers, and schools;

b) define maximum integration, upon which the above policy can be implemented, as an overall racial pattern in the schools which most nearly approximates the racial proportion of the total school population. This signifies a direction rather than a rigid proportion or quota in any given school;

c) adopt a policy that the following remedies will be used by the school administration to achieve a pattern of maximum integration:

1. Periodically redistricting towards that end, without abandoning other minimal requirements which enter into the determination of "neighborhood school" districts;
2. consideration of maximum integration, along with other standard factors, in the selection of new school sites or the relinquishment of existing buildings to other purposes;
3. splitting the grades between neighboring schools;
4. changing the feeder pattern of secondary schools;
5. achieving maximum integration in the current process of relieving overcrowding;
6. when the above procedures produce limited results, permitting transfers to unfilled schools if the policy of maximum integration is served.

2) Compensatory Education

A) The San Francisco Unified School System should expand its current programs of compensatory education both in scope and in goal.

B) The School Board might take the lead in suggesting and coordinating community projects that should enhance the school programs.

3) Education About Human Relations

a) The San Francisco Board of Education should institute a program of human relations education to progress systematically through elementary and high school.

b) The Board of Education should have textbooks and other teaching materials reviewed thoroughly for their accuracy, comprehensiveness, and balance in in presenting the part played by all groups in the United States. Because of the system of textbook selection in California, the San Francisco Board of Education should support the California Board of Education's efforts to obtain more factual works.

NATIONAL ASSOCIATION FOR THE ADVANCEMENT OF COLORED PEOPLE
TWENTY WEST FORTIETH STREET • NEW YORK 18, N. Y. • BRyant 9-1400

January, 1963

MEMORANDUM

RE: PUBLIC SCHOOL DESEGREGATION IN THE NORTH AND WEST

FROM: June Shagaloff
Special Assistant
for Education

The Association's attack on public schools segregated-in-fact in the North and West has been extended in the past year to more that sixty-nine cities in fifteen states. From California to Connecticut, the NAACP has examined school policies and practices and, based on the findings, has alerted communities to the existence of northern style segregation and its damaging educational effects. Increased demands for desegregation and mobilization of parent-community support have followed, together with demonstrations against discriminatory practices.

Twelve northern and western public school systems, at the beginning of the 1962-63 school year, desegregated completely or took steps to achieve greater desegregation as the direct result of NAACP activity. Vigorous community-action programs are underway in other communities to eliminate or reduce racial segregation in the schools and to raise educational standards. Continued evasion and inaction by school officials in some instances has resulted in litigation. Eighteen, of a total of twenty-one legal actions challenging existing public school segregation have been filed by the NAACP under the direction of its General Counsel, Robert L. Carter. In Rochester, New York and San Francisco, bi-racial school desegregation suits have been brought for the first time on behalf of white and Negro parents by the NAACP.

The accelerated attack of the NAACP, announced early in 1962, is in compliance with directives of the Annual Convention calling for intensified efforts "to insure the end of all segregated public education in fact or by law by all means available..."

Attached is a state-by-state report on the scope of NAACP activity and the status of public school desegregation in the North and West.

## Section I

DESEGREGATION, September, 1962

The plans of public school desegregation adopted in the following communities include re-zoning, The Princeton Plan (assignment of pupils by grade to two or three schools combined in a single attendance area), and re-organizing the use of schools. Where extensive segregated housing precluded more effective plans, open enrollment (transfer of students from overcrowded, segregated to under-utilized, predominantly white schools) was adopted. (See Section II for more detailed reports on these communities.)

Eloy, Arizona

The elementary schools were rezoned to eliminate segregation after the Pinal County NAACP Branch petitioned the school board to desegregate. The high schools were desegregated in 1954.

Mt. Vernon, Illinois

The segregated Washington Elementary School was closed, and students and teachers were reassigned to existing schools. (Until several years ago, all Negro pupils attended the segregated school regardless of where they lived. Subsequently, Negro students were permitted to attend the school in their zone, if they so desired.)

Danville, Illinois

Elementary school zone lines were redrawn and permissive transfers for white pupils were eliminated.

Jersey City, New Jersey

Following a report by the Jersey City Branch on the extent of segregation-in-fact, the Board of Education, in March, designated the segregated schools "improper" and established a school committee to meet with NAACP representation. The school board subsequently agreed to extend open enrollment and engaged a consultant to develop more extensive desegregation plans.

Montclair, New Jersey

After continued efforts by the Montclair NAACP Branch, including school picketing and other demonstrations, the Board of Education agreed to close the segregated Glenfield Junior High School and appointed a citizens committee to develop a permanent reorganization plan for the junior high schools. The NAACP subsequently opposed the school board's proposed desegregation plan on the basis that it would establish predominantly Negro schools while by-passing the assignment of Negro pupils to a virtually all-white junior high school. The school board rescinded this plan, rejected the proposals of the citizens committee, and adopted a plan calling for the assignment of Glenfield Junior High School students to each existing junior high school.

Morristown, New Jersey

The school board in 1962 agreed to re-examine the virtually all-Negro Lafayette Elementary School and to consider desegregation plans. The attorney for the school board advised, "no serious debate can challenge the self-evident conclusion that

the Lafayette School is racially segregated within the prohibition of the law." The school board subsequently considered six alternative plans and adopted a plan calling for reorganization of the schools. The segregated school was reorganized as an integrated junior high school, and elementary school pupils and teachers were reassigned to existing grade schools.

Newark, New Jersey

The school board initiated limited open enrollment after the Newark NAACP Branch filed a federal court school suit. The suit was subsequently withdrawn.

Portsmouth, Ohio

After the NAACP Branch charged discriminatory elementary school zoning, the school board announced that zone lines would be redrawn, applying without exception to white and Negro students. White parents vigorously objected to the new zoning and the school board subsequently recinded the plan. The NAACP and Negro parents picketed and successfully boycotted the segregated school until the Board announced the proposed rezoning would be put into effect. The board also agreed to rezone the entire school system to achieve greater desegregation, effective in 1963.

Xenia, Ohio

The Board of Education, responding to demands of the NAACP Branch for desegregation, adopted open enrollment for 1962 until the entire elementary school system could be rezoned in 1963 to desegregate completely.

Coatesville, Pennsylvania

Vigorious NAACP action resulted in the adoption of the Princeton Plan whereby students are assigned, by grade, to schools combined in a single zone. The school board assigned all students in the new zone to the formerly predominantly Negro school for grades one to three, and to the white school for grades four through six. White and Negro teachers at both schools were reassigned to assure faculty integration. Earlier, the school board attorney advised: "...the law is very clear as set down by the Supreme Court and the Brown decision...It is the duty of every board of school directors to proceed to integrate with all deliberate speed...A school system with segregated schools is in violation of the laws."

Twin Oaks, Pennsylvania

A successful parent boycott of the segregated elementary school, led by the Chester NAACP Branch, resulted in the elimination of discriminatory school practices.

## OTHER ACTIONS

The Washington, Pennsylvania Board of Education announced that the elementary schools would be desegregated at the beginning of the spring, 1963 term.

In Oakland, California, the NAACP rejected the limited plan of open enrollment adopted by the school board in December, 1962 as "completely inadequate" in eliminating racial gerrymandering and other discriminatory practices which extend racially segregated schools.

In Chicago, Illinois, an extremely restricted plan of open enrollment, initiated in the fall after years of inaction by school officials, was severely criticized by the NAACP and other groups as inadequate.

In Plainfield, New Jersey, the NAACP initiated legal action challenging open enrollment as "an evasion of the fact of desegregation."

In Detroit, Michigan, the Citizens Advisory Committee on Equal Educational Opportunity of the Board of Education completed a two-year study of public schools segregated-in-fact and related problems.

## STATE ACTION

California in 1962 became the second state to recognize the educational undesirability of public schools segregated-in-fact. The State Board of Education, at the urging of the NAACP, directed local school authorities to consider "the ethnic composition" of schools in establishing zone lines, consolidating school districts (required by the state), and selecting school sites.

In New York, the state policy adopted in 1960 by the Board of Regents of the University of the State of New York and in 1961 by the Commissioner of Education urging the elimination of segregation-in-fact was followed by a state-wide racial census of elementary schools students to determine the extent of existing segregation. The census, based on observation, was made by local Superintendents of Schools at the direction of the State Commissioner of Education.

A third state, New Jersey, has been urged by the NAACP in the Orange school complaint "to formulate and implement a state-wide policy requiring all local Boards of Education to take immediate steps...to eliminate racial segregation in the public school districts under their supervision and control." (Fisher et. al. v. The Board of Education of the City of Orange, New Jersey, et. al.)

## Section II

## STATUS OF PUBLIC SCHOOL DESEGREGATION

### ARIZONA

#### Eloy

The Board of Education announced June 6th that effective September, 1962, elementary schools would be rezoned to end segregated elementary schools. The Board acted in response to a petition calling for desegregation filed by the Pinal County NAACP on April 24th on behalf of 31 parents and 47 children following a conference of the NAACP, Negro parents, and the Special Assistant for Education.

The NAACP petition stated, "It is now April, 1962, eight years after the May 17th decision which placed a constitutional obligation on every school board in the United States to desegregate all public schools under its control. While partial desegregation has been ordered by this Board, there is no valid reason why complete desegregation should not have been long since accomplished."

#### Phoenix and Tucson

The Phoenix and Tucson NAACP Branches are examining the public schools to determine the extent of predominantly Negro-Mexican schools, zoning practices, and educational standards. The NAACP Branch in Tucson has urged school officials to change discriminatory policies which exclude Negro students from distributive education courses.

### CALIFORNIA

#### State-Wide

The General Counsel and Special Assistant for Education on April 12th appeared before the California State Board of Education urging the adoption and implementation of a state-wide policy to eliminate racially segregated public schools existing in fact.

The State Board, on May 10 - 11, called for affirmative steps to eliminate racial segregation and directed the State Superintendent of Schools to draft regulations requiring rezoning of school districts, governing site selection for new schools and prescribing racial and ethnic integration as a cardinal principle in school district unification. The State Board made it clear that desegregation will be an important factor in securing state approval of district unification and reorganization as required by the State Legislature.

The directive of the California State Board of Education was hailed by NAACP Executive Secretary as a "major breakthrough in the northern states, the impact of which will be felt not only in California, but throughout the North and West. California's newly adopted policy clearly recognizes the undesirability of segregated schools regardless of the causes and the responsibility of school authorities to eliminate all forms of segregation."

On June 14, the State Board adopted a basic policy statement reaffirming the United States Supreme Court decision of May 17, 1954 declaring that racial segregation per se in public education was discriminatory. The Board stated,

> "... We now find...some of our schools are becoming racially segregated in fact, and that this challenge to equality of educational opportunity must be met with the full thrust of our legal authority and moral leadership ....in all areas under our control or subject to our influence the policy of elimination of existing segregation and curbing any tendency toward its growth must be given serious and thoughtful consideration by all persons involved at all levels. Wherever and whenever feasible, preference shall be given to those programs which will tend toward conformity with the views herein expressed."

At the regular October meeting, the Board adopted the following three-point program implementing its policy statement of June 14th:

1. A regulation requiring local school boards to consider ethnic integration in establishing school zone lines (effective November 22, 1962);

2. A resolution of the Superintendent of Public Instruction amending a section of the California Administrative Code, requiring consideration of ethnic integration in the selection and improvement of school sites (effective November 22, 1962);

3. A directive to County Committees on School District Organization and County Superintendents of schools requiring consideration of ethnic integration in the reorganization of local school districts. (Reorganization and consolidation of school districts, required by the State, must be approved by the State Board of Education.)

Berkeley

On September 18th, the NAACP and other groups formally urged the Board of Education to eliminate existing school segregation. The NAACP asked the board to acknowledge the detrimental impact of racially homogeneous schools, to adopt the principle of integration as one of the cardinal principles of zoning, and to develop and implement a plan which will achieve maximum desegregation throughout the school system

The school board subsequently agreed to re-examine the public schools to eliminate racially homogeneous schools.

Los Angeles

Last spring, the Board of Education appointed a special committee to examine the extent of racially homogeneous schools and related educational problems, at the urging of the NAACP and other concerned groups.

The NAACP, in September, cancelled scheduled picketing of seven schools after the Board and the Superintendent of Schools made assurances that every effort would be made to find solutions to segregation problems. Subsequently, at a meeting of The Citizens Committee, the Association charged that racial considerations restricted the assignment of Negro teachers to Negro schools. Representatives of other groups, including Negro teachers and the Council of Mexican-American Affairs, reported it was "virtually impossible" for Negro teachers to receive transfers from segregated to white schools. Several groups called for a special study of teacher assignments. The Los Angeles American Civil Liberties Union urged the school board to assign Negro teachers to every school in the city.

Oakland

The NAACP, more than a year ago, urged the Board of Education to reconsider proposed zoning for a new high school (Skyline High School), charging that the zoning artificially excluded students on a racial, ethnic, and economic basis. The zone for the new school resulted in a virtually all-white attendance area that is ten miles long and two miles wide. Formerly, these students attended integrated high schools.

After months of continued efforts to persuade the Board to change The Skyline High School zoning, the Board of Education, in August 1962, simply refused to take any action or to study the problem. The Special Assistant for Education and the Oakland NAACP, after an intensive investigation of city-wide zoning practices, charged that arbitrary zoning on a racial and ethnic basis had resulted in extensive segregation-in-fact, unequal educational standards, and gross discrimination in the assignment of Negro teachers to Negro schools. The NAACP announced it would file a court suit challenging city-wide discriminatory practices affecting Negro students and teachers.

In December, the school board adopted a plan of open enrollment. The plan was severely criticized by the NAACP as "completely inadequate" and an evasion of meaningful efforts to achieve maximum desegregation or equalizing educational standards. The Association announced it would proceed to file court action.

Pasadena

Until 1954, the Board of Education maintained "neutral zones" in racially integrated residential areas thereby permitting white children to transfer from integrated schools to schools outside these zones. The NAACP charged that this policy intensified racial segregation and after the U. S. Supreme Court decision of May 17, 1954, the neutral zones were abandoned.

In 1960, the school board transferred approximately 140 white junior high school students from the peripheral Linda Vista district in an adjacent community to schools in Pasadena. They were assigned as a group to the predominantly white McKinley School after parents opposed assignment to the accessible, predominantly Negro Washington School. The NAACP vigorously protested the assignment policy.

An advisory committee appointed by the school board accepted the controversial assignment policy after the Board of Education announced plans for revising zone lines between the predominantly white and Negro junior high schools gradually over a six-year period.

The NAACP denounced the school board's action as "gradualism," and instituted court action. Jackson vs. Pasadena City School District, et al, filed September 9, 1961 in the Superior Court of the State of California, County of Los Angeles, now before the District Court of Appeal of the State of California. (Counsel: Samuel C. Sheats, Loren Miller, and A. L. Wirin.)

Sacramento

The NAACP Branch is currently examining school attendance areas and zone lines.

San Francisco

In January, 1962, after the NAACP, CORE, and the Council for Civic Unity had urged the Board of Education to recognize the undesirability of racially homogeneous schools, the Board directed the Superintendent of Schools to study the problem. On June 19th, at a regular school board meeting, Superintendent of Schools reported that after studying the problem of de facto segregation, he had no "educationally sound program to eliminate the schools in which the children are predominantly of one race." Responding to strong objections of the three civil rights groups, the Board agreed to reconsider the city-wide problem at its regular meeting on September 18th and requested recommendations from community groups.

At the same time, the Superintendent announced the zoning of a new junior high school (Central Jr. H. S. ) utilizing an abandoned school building. White and Negro parents, vigorously supported by the NAACP and other civil rights groups, protested the creation of a "racially imbalanced" school in an integrated residential area and urged rezoning to prevent any possibility of segregation-in-fact. Sit-ins, picketing, threat of a parents boycott and litigation followed. In late August, at a school board meeting attended by 1,200 people, the Board adopted the Superintendent's recommendation that the proposed junior high school not be opened. Students were then assigned to existing junior high schools.

At the regular meeting of the school board on September 18th, the NAACP, CORE, and the Council for Civic Unity urged the Board to adopt and implement a policy committed to the elimination of segregation.

The NAACP reported that its examination of the school system revealed 17 predominantly Negro elementary schools and one junior high school and charged discriminatory assignment of Negro teachers largely to the predominantly Negro schools.

The NAACP made six specific recommendations:

Recommendations

"In light of the May 17, 1954 decision of the United States Supreme Court and the policy of the California State Board of Education, the NAACP recommends the following in order to achieve student desegregation and faculty integration in the San Francisco public schools:

"1. That the Board of Education adopt a positive policy recognizing the educational undesirability of racially homogeneous schools segregated in fact;

"2. That the Board of Education establish the objective of racial integration as one of the cardinal principles in assignment of pupils to schools;

"3. That the Board of Education formulate and put into operation a plan to achieve maximum desegregation throughout the school system no later than September, 1963;

"4. That a permanent central division within the school system be established and directed to examine changing school population trends as related to zoning practices in order to maintain maximum desegregation;

"5. That the Board of Education re-examine, in consultation with appropriate state agencies, policies and practices affecting the employment and assignment of Negro teachers and administrators throughout the school system;

"6. That an advisory committee composed of representative community leaders and school officials be appointed by the Board to study the complex area of educational standards and to formulate appropriate recommendations."

After hearing forty speakers for six hours, the Board of Education deferred any action and recommended additional study. The Board appointed three of its members to study the problem and report back to the Board at the April, 1963 meeting. The NAACP, CORE, and the Council for Civic Unity criticized the Board for failing to adopt a general policy or directing that the study include recommendations.

A few days later, the NAACP announced that after seven months of intense community effort and fruitless negotiations with the school board, the NAACP could not accept another seven month delay without a clear cut statement of policy. The NAACP filed suit on October 2, 1962 in the U. S. District Court for the Northern District of California, Southern Division on behalf of 159 Negro and white children. (This is the second bi-racial school suit filed by the NAACP. The first was Rochester, N.Y.) Brock et. al. vs. Board of Education of the San Francisco Unified School District, et. al. (Counsel: Robert L. Carter, NAACP General Counsel, Terry A. Francois and Garfield Steward of San Francisco, and Loren Miller of Los Angeles.)

The NAACP suit asks for a preliminary and permanent injunction restraining the Board of Education and Superintendent of Schools from operating and providing racially segregated schools and for an order requiring a city-wide desegregation plan.

The NAACP also asks that the proposed Central Junior High School be rezoned in order to achieve maximum desegregation and reopened by February, 1963.

## COLORADO

### Denver

The NAACP and other concerned groups urged the Board of Education to consider the elimination of segregation-in-fact in drawing school zone lines and site locations for new schools. After several hearings, the Board, in November, announced the appointment of a thirty-two member Citizens Committee to study the problems of racially imbalanced schools and formulate recommendations. A preliminary report of the Committee is due before June 1, 1963.

## CONNECTICUT

### Norwalk

The Board of Education on October 27, 1962 announced a policy recognizing the detrimental educational impact of racially homogeneous public schools. The policy is intended to prevent the development of schools segregated in fact. The Board stated:

> "...the Negro population tends to be concentrated in several districts and as a result, the schools serving these districts have large Negro enrollments. Although the Board of Education is not responsible for this situation, it feels a need to formulate policies for dealing with it...If any schools presently or in the future should be populated largely by...[a] minority, we shall try to find ways that are educationally sound and economically feasible to obtain better racial distribution... In planning new school districts, we shall seek to avoid or reduce racial concentration as much as possible..."

### Stamford

The NAACP, in the spring of 1961, vigorously opposed zoning plans for the existing Stamford High School and the new Rippowam High School on the grounds that the proposed zoning would result in a high proportion of Negro, Puerto Rican, and low-income students at the Stamford School and a predominantly white and higher income student body at the new school. The NAACP also charged that the old school would become a "terminal" school while the Rippowam School would become an academic high school.

Early in 1962, the Citizens Advisory Committee appointed by the school board to consider the proposed zoning, recommended that the zones be redrawn to achieve a broad racial, ethnic, nationality, and income distribution of students at both schools. In May, the Board adopted the Princeton Plan: the assignment of two grades to each senior high school. Thus, all students in grades 9 and 10 will attend one school, and all grade 11 and 12 students will attend the other school. Implementation was delayed for one year for further study and consideration.

## ILLINOIS

### Centerville

Deliberate segregation of elementary school students existed prior to 1957, including the assignment of white students to classes one part of the day and Negro students attending the same school to classes the other part of the day. Subsequently, zone lines were drawn on a racial basis resulting in the segregated Chenot Elementary School.

The NAACP instituted liti ation after unsuccessful attempts to change school board policy. McNeese et al. vs. Board of Education for Community Unit School District No. 187, et al., Cahokia, Illinois, filed September 12, 1961 in the United States District Court for the Eastern District of Illinois. Appeal filed January 30, 1962, in the United States Court of Appeals for the 7th Circuit. (Counsel: Clayton R. Williams of Alton, Illinois and Rogers, Rogers, Stayhorn, and Harth, of Chicago.)

Chicago

In the late fall of 1961, the Chicago NAACP and Negro parents protested the discriminatory policy reassigning students from the over-crowded, predominantly Negro Burnside Elementary School to an under-utilized but segregated school. The NAACP charged that the reassignment by-passed a nearby under-utilized white school.

The NAACP and the Burnside School parents held "school sit-ins", classes taught in the school halls. The children affected by the transfer policy then withdrew from the school and were taught at home. The parents and the Executive Secretary of Chicago NAACP were arrested and charged with trespassing on public property and disorderly conduct. Charges were later dismissed on a preliminary hearing before Judge Joseph Butler, Municipal Court of Chicago.

The NAACP suit filed on January 19, 1962 to prevent discriminatory assignment policies was subsequently dismissed. Another NAACP suit, defending Negro parents charged with trespassing and disorderly conduct after investigating available classroom space at white schools, is on appeal. (Filed 1962 by William R. Ming of Chicago.) An independent parents' suit challenging school segregation is on appeal.

The Chicago NAACP, the Urban League, and other groups continued to attack discriminatory zoning, substandard educational standards, and the failure to relieve overcrowding, and to protest the use of mobile units at all-Negro schools. Superintendent of Schools Willis was charged with using these portable fixtures, dubbed "Willis Wagons," to maintain segregation instead of assigned pupils to nearby, under-utilized white schools.

In November, 1962, the school board initiated a severely restricted program of open enrollment which affected only thirty-four Negro pupils in the entire city.

Fairmont Park

The Joliet NAACP Branch and the Illinois State Conference of NAACP Branches during 1962 continued to meet with school officials urging (1) the elimination of a discriminatory administrative policy enabling white pupils to transfer from predominantly Negro school zones, and (2) a non-discriminatory policy in the employment and assignment of Negro teachers. As a result of these efforts, several Negro teachers have been employed.

Joliet

During 1961 and 1962 the Joliet NAACP Branch and the Illinois State Conference of NAACP Branches met with high school officials urging non-discriminatory policies affecting the employment of Negro teachers and the placement of Negro students in the distributive education program. As a result, Negro teachers have been employed and Negro students have been placed in the distributive education program.

The NAACP has also urged rezoning to achieve greater desegregation.

Haywood

As a result of efforts by the Haywood NAACP Branch, local school officials have agreed to employ additional Negro teachers and to assign them throughout the school system.

Mt. Vernon

The Board of Education announced early in 1962 that effective September, 1962 students attending the segregated Washington Elementary School would be assigned to the schools in their zone. Teachers will also be reassigned to existing schools.

Until several years ago, all Negro pupils attended the segregated elementary school regardless of where they lived. This policy subsequently was changed permitting Negro students to attend the school in their zone if they so desired. The segregated elementary school continued to exist although the enrollment decreased.

After the NAACP urged school officials to end elementary school segregation, the school board appointed a special school study committee to recommend a desegregation plan and subsequently adopted the committee's recommendations to close the segregated school.

Peoria

The NAACP vigorously protested discriminatory policies and practices affecting the employment of Negro teachers in the secondary schools and the assignment of Negro teachers in the elementary schools. After several meetings with school officials the NAACP initiated a weekly picket line in front of the administrative offices of the Board of Education "to dramatize the issues to the entire community."

Negro teachers were first employed in the Peoria school system in 1954 after continued urging by the NAACP. Seventeen Negro teachers, of a total of more than 750, are now assigned to the four elementary schools with the largest number of Negro children. No Negro teachers are employed in the secondary schools and the NAACP has charged that school officials reject Negro teachers by claiming no vacancies exist.

Robbins

The zone lines between the Horace Mann Elementary School in Robbins, an all-Negro community, and the integrated Nathan Hale School in a zone adjacent to Robbins were redrawn in September, 1960. As a result, Negro pupils were transferred from an integrated school to the all-Negro school in Robbins.

After continued protests by Negro parents and the Illinois State Conference of NAACP Branches, the school board changed the zones to the original lines and effective September, 1961 Negro students were transferred back to the integrated Nathan Hale School.

In addition, the school board assigned some Negro students from the Horace Mann School in Robbins to the predominantly white school in the adjacent zone of Blue Island. The school board also established a citizens committee to explore ways of extending integration of students and additional changes were made in 1962 to achieve maximum integration.

## INDIANA

### Gary

The Board of Education in April, 1962 rescinded plans to locate a new high school in the heart of a segregated residential area after the NAACP and parent groups vigorously protested that the proposed site would create a new segregated school. At the same time, however, the board withdrew plans to transfer Negro pupils from severely overcrowded schools to under-utilized white schools when white parents protested the transfers. The NAACP stated "We hope the Board....will firmly adopt its original plan ....and thereby demonstrate to the entire community that their policies are not determined by racial bigotry. But if the school board capitulates to the few dissident voices, we will seek appropriate steps, including court action."

A few weeks later, the NAACP successfully opposed a 28 classroom addition to an already segregated high school and continued to reject a proposed site for a new elementary school.

An investigation of school policies and practices by the Special Assistant for Education early in May, 1962 revealed a rigidly segregated and severely over-crowded school system. Thirty-two elementary schools, of a total of thirty-four, are either virtually all-white or all-Negro. Ten secondary schools, of a total of eleven, are segregated in fact, white or Negro.

The NAACP charged that existing segregation resulted from zone lines drawn to contain Negro students within the segregated Central District, optional areas and permissive transfers for white students, gerrymandering, a discriminatory feeder pattern of elementary to secondary schools, and the failure to utilize existing classroom space. The school building program, it was found, extended the containment of white and Negro students in separate schools.

When the school board failed to act on any of these problems, an NAACP sponsored suit was filed on behalf of 110 Negro pupils. Bell et al. vs. School Board of Trustees, City of Gary, et al, filed June 14, 1962 in the U.S. District Court for the Northern District of Indiana. (Counsel: Robert L. Carter, NAACP General Counsel, and Barbara A. Morris, both of New York; F. Lawrence Anderson, Jr., Hilbert L. Bradley, and Richard G. Hatcher, of Gary; and Charles Wills, of South Bend.)

The NAACP suit which seeks to restrain the Gary Board of Education from maintaining and operating the school system on a racially segregated basis was argued the week of September 10, 1962 in the U.S. District Court. Findings of a study on practices of racial containment and recommendations for changes were presented to the court by Dr. Max Wolff, an independent consultant on urban problems engaged by the NAACP to study the Gary school system.

## IOWA

### Waterloo

The NAACP is examining the zone lines of a predominantly Negro elementary school and a proposed elementary school, and teacher assignment practices.

## KANSAS

### State-Wide

The Kansas State Conference of NAACP Branches completed an examination of discriminatory teacher employment and assignment policies as the basis of a report to the Attorney General of Kansas.

### Coffeyville

The NAACP is currently meeting with the Board of Education to eliminate segregation of the Cleveland Elementary School pupils and teachers.

Although the school board in 1962 officially rescinded a permissive transfer policy permitting white children in the Cleveland School zone to attend other schools, these transfers continued to be allowed. The Cleveland School remained a segregated school with an all-Negro faculty.

After continued protests by the NAACP, the Superintendent of Schools announced early in June, 1962 that all kindergarten pupils would be required to attend the school in their zone. The NAACP immediately rejected the proposal as inadequate and announced that unless the board completely eliminated segregation of pupils and students, appropriate action, including litigation, would be taken.

### Kansas City

The NAACP in 1960-61 charged that after the Board of Education eliminated racial restrictions in compliance with the May 17, 1954 decision of the U. S. Supreme Court, school officials had deliberately moved zone lines in order to create an all-Negro elementary school.

Subsequently, the NAACP filed a suit challenging all discriminatory administrative policies resulting in segregated elementary and secondary schools. Downs et al. vs. the Board of Education of the City of Kansas City, et al. filed in the United States District Court for the District of Kansas. (Counsel: Robert L. Carter, NAACP General Counsel, of New York, James P. Davis and Benjamin E. Franklin, both of Kansas City, Kansas, and Samuel C. Jackson, of Topeka.)

The school suit was argued on September 18, 1962. The NAACP called for reorganization of the Kansas City public school system to eliminate the "containment" of Negro pupils in predominantly and all-Negro schools. The Court was asked "to order the school board to prepare and submit to this Court a realistic plan of desegregation for the entire Kansas City school district, pursuant to which, insofar as orderly administration will permit, all vestiges of segregation in the public school system will be eliminated."

### Wichita

The NAACP urged the Board of Education to re-examine school zone lines to achieve greater desegregation.

MICHIGAN

Detroit

The Detroit NAACP expanded efforts to eliminate deliberate segregation and minimize segregation existing in fact, and to raise educational standards of predominantly Negro schools. A city-wide NAACP Advisory Committee on School Desegregation began an evaluation of recommendations proposed by the Citizens Advisory Committee and urged that "every step be taken, within the scope of school board authority, to effect the highest measure of racial school desegregation possible."

The Citizens Advisory Committee on Equal Educational Opportunity appointed by the Detroit Board of Education completed a two-year analysis early in March, 1962 of segregated schools, including school boundary lines, apprenticeship and cooperative work programs, educational standards, curriculum and guidance opportunities, and personnel practices.

Highlights of the report by the Citizens Advisory Committee:

School Boundaries and Open Enrollment - "...it is a fact that in the past, school boundaries in Detroit have been used to further racial and social class segregation. Although some progress has been made, it has not been adequate...(The Committee) urges further review of all school boundaries and recommends that in the establishment of boundaries the ethnic composition of the school district be given equal importance with other factors...in addition, (to enable school desegregation) the opportunity of open transfer shall be available in any school that has the space."

Bus Transportation - "The Committee recommends that busing be done in such a way that segregation shall not be continued or augmented."

Apprenticeship and Cooperative Work Programs - "...The Committee found evidence of grave discrimination in training and employment opportunities. The Committee strongly recommends that immediate steps be taken to remedy this situation..."

Personnel Practices - "...The Committee found a clear-cut pattern of racial discrimination in the assignment of teachers and principals to schools throughout the city...We urge that immediate action be taken to remedy the situation."

The Committee also recommended additional personnel, resources, and smaller class size to raise educational standards.

MINNESOTA

Minneapolis

The NAACP together with several other organizations urged the Board of Education to consider the problems of racially homogeneous schools in its long range school building proposals.

St. Paul

The NAACP Branch is currently examining school attendance areas in relationship to residential patterns.

NEW JERSEY

State-Wide

The NAACP, on March 5, 1962, urged the State of New Jersey to eliminate existing public school segregation. In a petition filed before the New Jersey Commissioner of Education, the NAACP urged the Commissioner "to formulate and implement a state-wide policy requiring all local Boards of Education to take immediate steps...to eliminate racial segregation in the public school districts under their supervision and control." (Fisher et al. vs The Board of Education of the City of Orange, New Jersey.)

Officials of the NAACP National Office and the New Jersey State Conference of Branches met with Governor Richard J. Hughes several times during 1962 urging the Governor to formulate a state-wide policy on racially segregated public schools throughout the state.

Governor Hughes, on June 18, 1962 advised all New Jersey school officials that the traditional neighborhood school concept must be sufficiently flexible to prevent racial segregation and warned that failure to follow this directive would result in judicial action at the state and federal level. The Governor stated:

"/de facto segregation/ is equally harmful as though it were intended. While 'de facto segregation' may be no one's fault, its attempted correction must be everyone's business, if the American and New Jersey pledge of equality of educational opportunity is to be fulfilled.

"...While the preservation of this policy /neighborhood schools/ is essential, where it collides with the concept of equality in educational opportunity, its adaptation to circumstances to prevent 'de facto segregation' is not only necessary, but normally feasible. Lacking such adaptive quality, it could reach such a stage of inevitability in the fostering of 'de facto segregation' as to be struck down by a court forced to choose between it and the constitutional guarantee of equality in educational opportunity. I am unconvinced that the neighborhood school policy is so static, unyielding and inadaptive as to reach this result..."

Bridgeton

The NAACP early in 1962 opposed the proposed site for a new elementary school in an all-Negro residential area and strongly urged the Board of Education to select a new location that would be accessible to white and Negro pupils. The board was also urged to redraw elementary school zone lines to eliminate existing segregation. Three elementary schools are virtually all-Negro and six are predominantly or all-white.

When it became clear that local school officials would not reconsider the proposed site, the NAACP on August 15, 1962 filed a petition of appeal with the State Commissioner of Education calling for elimination of existing school segregation in Bridgeton. Byers et. al. vs. The Board of Education of the City of Bridgeton, New Jersey. (Counsel: Robert L. Carter, NAACP General Counsel, and Barbara A. Morris, of New York; and Robert Johnson of Camden.)

The NAACP petition protests the extension of the present pattern of school segregation by the construction of an addition to the all-Negro Buckshutem Elementary School. It further protests the construction of a new elementary school in the segregated school area. The Commissioner is urged to order that school zone lines and building plans be changed to prevent the continuation and extension of a segregated school system.

Englewood

In 1954, as the result of a complaint brought by the Bergen county NAACP before the New Jersey Division Against Discrimination, the New Jersey Commissioner of Education ordered that the segregated junior high school housed at the Lincoln School be closed and pupils assigned to the Englewood Junior High School. He also required the correction of gerrymandered zone lines excluding Negro students from the predominantly white Liberty School zone in which they lived and assigning them instead to the predominantly Negro Lincoln School outside their zone.

The Lincoln School remained virtually all-Negro while the Liberty School, formerly predominantly white, became predominantly Negro. Three elementary schools remained predominantly or all-white.

In June, 1961, the Bergen County NAACP Branch urged the Board of Education to end existing segregation at the Lincoln and Liberty Elementary Schools. The NAACP met with the Board of Education early in September, 1961, and again urged the school board to formulate a desegregation plan.

The board revealed that a study was being made of projected school enrollment needs for a ten year period, assisted by two consultants, Dr. Robert Wood of M.I.T. and Dr. Robert Gutman of Rutgers University. The school board agreed, as part of the study already under way, to determine the extent of segregation and formulate a desegregation plan and, at the recommendation of the NAACP, subsequently engaged as special consultant, Dr. Dan Dodson, Director of the Center for Human Relations and Community Studies, New York University.

It was understood that if the desegregation plan was unsatisfactory or if the Board of Education failed to adopt a satisfactory plan, the NAACP would file court action.

During November and December, 1961, the NAACP with other community groups held four public conferences on the schools and related problems to mobilize community support for action by the Board of Education.

In January, several parents privately engaged counsel and filed suit. Well publicized protests followed.

The desegregation study, undertaken at the urging of the NAACP, was submitted to the school board early in March, 1962. The study proposed six possible short and long range plans of desegregation.

The Englewood Board of Education on May 14, 1962, in effect rejected all of the proposed desegregation plans and instead adopted plans for "an experimental, demonstration elementary school" on a voluntary basis for white and Negro pupils. The National and local NAACP and Negro parents, publicly rejected the proposed plan as "completely unacceptable."

Governor, Richard J. Hughes, on September 7, 1962 called on the Englewood Board of Education to settle "without delay" the issue of racial imbalance in the Englewood public school system. He said that if the problem were not solved by local school officials, court action would undoubtedly result. The Governor stated, "I am sure that the courts would eventually rule that the present racial imbalance in Englewood schools was depriving Negro youngsters there of equality of education. There cannot be a perfect mathematical division between the two races but reasonable desegregation can be achieved." The Governor has repeatedly stressed that the state policy of neighborhood schools must be flexible enough to prevent, whenever possible, de facto school segregation.

The Governor's statement was prompted by a parent-student three-day boycott of the Lincoln Elementary School called by the NAACP and the Englewood Movement, protesting the failure of school and city authorities to end existing segregation. A one-day "sympathy" boycott was staged by white and Negro parents at the adjacent Liberty Elementary School!

On September 9, Englewood Mayor A. N. Volk stated publicly any change in the present school system probably would have to be instituted by the New Jersey Commissioner of Education. The Mayor made this statement after revealing the results of a city-wide mail poll. The poll - 3,577 out of a possible 7,800 replies were returned - indicated "a general feeling" that: segregation is not an issue in Englewood; strong support for neighborhood schools; and opposition to the school board's proposal for a central intermediate school for grades 5 and 6. (This proposal was, in effect, rejected when the School Committee of the Board of Estimate failed to appropriate necessary funds.)

On the same day, September 9, the National Office of the NAACP announced that a formal complaint would be filed with the State Commissioner of Education. (An independent parents' suit filed in the Spring of 1962 had been dismissed on grounds of failing to exhaust administrative remedies by first appealing to the Commissioner of Education.)

On September 10, the General Counsel of the National NAACP, Robert L. Carter, filed a complaint before the New Jersey Commissioner of Education. Deborah Spruill V. The Board of Education of the City of Englewood, New Jersey, Petition of Appeal before the Commissioner of Education of New Jersey. (Counsel: Robert L. Carter, NAACP General Counsel, Marie L. Marcus of New York City, and Herbert H. Tate of Newark, New Jersey.)

The NAACP complaint challenges "the maintenance of racially segregated schools" in Englewood and "the refusal of [school officials] to put into operation plans, rules, regulations, practices and procedures which would eliminate the presently existing and entrenched patterns of racial segregation in the public schools and the denial of equal educational opportunities ...even though plans were proposed, based upon a study made pursuant to the direction of the Board, which would eliminate segregation and the denial of equal educational opportunities..."

Contending that "segregated education is unequal education under the Constitution of the United States, and it is unequal whether de facto or de jure," the NAACP urged:

"(a) That a prompt and early hearing be set to dispose of this appeal. In view of the fact that a study of the school system has been made by responsible educators, employed by the School Board, appellant relies upon the findings, conclusions and recommendations resulting from this study to support her claims. The turbulence caused by the segregation involved further reason not to delay.

"(b) That after such hearing, study, evaluation of the law and data, that the Commissioner order the Board to take immediate steps to eliminate all aspects of segregation in the Englewood public school system."

Jersey City

After receiving an NAACP report on the extent of segregation existing in fact, the Board of Education, on March 8, 1962, designated segregated public schools "improper" and directed a committee of school officials to meet with representatives of the Jersey City NAACP.

The school board subsequently agreed to extend open enrollment in September, 1962, and engaged a consultant to formulate additional plans in order to achieve greater desegregation.

Montclair

The NAACP, in the summer of 1961, urged the school board to close the small, educationally inadequate, segregated Glenfield Junior High School. The NAACP and Glenfield parents picketed the junior high school and Board of Education office for five days when schools opened in September, 1961, protesting segregation. The Board of Education subsequently agreed to close the segregated junior high school and appointed a citizens committee to formulate a permanent reorganizational plan for the junior high schools.

Early in March, 1962, the Board of Education announced plans for assigning students at Glenfield Junior High School to two of the three junior high schools. The NAACP vigorously protested the plan on the basis that it would establish schools with a large proportion of Negro pupils while by-passing the assignment of Negro pupils to a virtually all-white junior high school. The NAACP also attacked the school board's plan as "premature" since the Citizens Committee's report had not yet been received. The Board of Education subsequently withdrew its plan.

The Citizens Committee a few weeks later recommended a plan reorganizing the junior high schools which would provide for complete desegregation at each junior high school.

The school board, however, adopted their own plan assigning Glenfield Junior High School students to each existing junior high school, including the all-white school, effective September, 1962.

Morristown

After repeated urging by the Morristown NAACP and other community groups, the Board of Education in the spring of 1961 agreed to examine the segregated Lafayette Elementary School and possible solutions. Asked for a report on the legal impli-

cations of the existing segregated school, the attorney for the Board of Education found that "no serious debate can challenge the self-evident conclusion that the Lafayette School is racially segregated within the prohibition of the law." The Board of Education, working with community groups, considered six possible desegregation plans and adopted the school reorganization plan.

In February, 1962, the Board of Education announced that effective September, 1962, the segregated elementary school would be reorganized as a junior high school for the entire school system, assigning Negro elementary school pupils and teachers to each of the three existing elementary schools.

New Brunswick

After meeting with the NAACP, the Urban League, the Puerto Rican Association, and civic and parent groups, the Board of Education directed the Superintendent of Schools to determine the extent of de facto segregation in the grade schools. The Board announced that if the findings revealed a serious racial imbalance, experts would be consulted to make recommendations to achieve greater integration. At the same time, the Board announced that efforts had been made through the redrawing of zone lines to prevent the development of de facto segregated schools.

On October 2nd, the Superintendent of Schools reported that of eight elementary schools, Negro pupils constituted less than 25% of the total enrollment at four schools, between 55-60% at three schools, and 69% at one school. The Board stated that the study would continue on the quality of teaching and class size at each school and other educational factors.

Newark

After many months of unsuccessful efforts by the Newark NAACP to end discriminatory pupil assignment policies, the NAACP filed court action, Beal et al. vs. The Board of Education of the City of Newark, County of Essex and State of New Jersey and Edward F. Kennelly, Superintendent of Schools, City of Newark, filed in the United States District Court, District of New Jersey on October 2, 1961. (Counsel: George D. Jeter and Abe Silverstein, both of Newark, and Paul Zuber of New York.)

Suit was dismissed in March, 1962 after the school board agreed to institute a limited open enrollment policy.

Orange

Racially gerrymandered zone lines of the segregated Oakwood Elementary School were corrected in 1948 after an investigation by the New Jersey Division Against Discrimination.

The problem now concerns deliberate and de facto segregation at the Oakwood and Central Elementary Schools. Oakwood School contains grades 1-4, with some fifth grade classes. Negro students then attend Central School, grades 5-8, in an adjacent zone which also has an integrated school (Park, grades 1-8).

The Oranges-Maplewood NAACP Branch met with the Board of Education in the late fall of 1961. The NAACP, with representatives of white and Negro organizations, urged the school board to adopt any of the four proposed desegregation plans submitted by the NAACP or any other plan which would accomplish desegregation. The NAACP urged the school board to announce their plan by February 15th, to be implemented in September, 1962.

On February 13, the school board announced a desegregation plan which was rejected by the NAACP on the basis that it did not provide for desegregation of the Oakwood School. On February 16, the NAACP Branch announced that suit would be filed on behalf of Negro parents and students.

The following NAACP actions were taken simultaneously on March 5, 1962.

Allen et al. vs. The Board of Education of Orange, New Jersey, et al. filed in the United States District Court for the District of New Jersey. (Counsel: Robert L. Carter, NAACP General Counsel, and Maria L. Marcus, both of New York; Herbert H. Tate and William Wright, Jr., both of Newark, New Jersey.) Suit was subsequently dismissed on grounds that administrative procedure of appeal to State Commissioner of Education must first be exhausted.

Fisher et al. vs. The Board of Education of the City of Orange, New Jersey filed with the Commissioner of Education of the State of New Jersey. (Counsel: Robert L. Carter, NAACP General Counsel, and Maria L. Marcus, both of New York; Herbert H. Tate and William Wright, Jr., both of Newark, New Jersey.)

The petition of appeal before the State Commissioner of Education was argued the week of November 19, 1962. Two consultants, engaged by the NAACP to study the Orange school system testified - Dr. Kenneth B. Clark and Dr. Dan Dodson.

Patterson

The NAACP Branch is currently examining school policies and practices which affect Negro students.

Plainfield

The NAACP in June, 1961, urged the Board of Education to eliminate existing segregation at the Washington Elementary School and to change the pattern resulting in other predominantly Negro schools. The NAACP stated that "unless affirmative action is taken, Plainfield would have three and possibly four segregated elementary schools within a few years." The NAACP asked for a change effective, September, 1962.

The Board of Education subsequently created a Lay Citizens Advisory Committee and engaged Dr. Max Wolff as consultant to examine existing segregation and formulate recommendations by the end of June, 1962.

On June 25, the school board received two alternative desegregation plans submitted by the special consultant to the Citizens Advisory Committee, and a Majority and Minority Report of the Citizens Advisory Committee.

The study recommended adoption of the Princeton Plan or "sister schools" whereby students are assigned by grade to two schools combined in a single attendance area. Three pairs of schools and some rezoning were proposed. (All pupils from kindergarten through grade 3 would attend one of the paired schools, and all pupils in grades 4-6 would attend the other sister school.) The alternate desegregation plan provides for complete rezoning of the elementary schools.

The Majority Report recommended that the Washington Elementary School be rezoned. A strong Minority Report urged the school board to implement the Princeton Plan or sister schools, as recommended by the study.

In July, the Board of Education rejected the two alternate desegregation plans of (1) rezoning and (2) The Princeton Plan

proposed by the school-sponsored study and rejected the recommendations of the Majority and Minority Reports of the Lay Advisory Committee to the Board of Education. Instead, the Board proposed a plan of open-enrollment. This plan had been specifically rejected by the study which found that "under this plan the goals of good racial balance throughout the school system and of ending segregation...could not be met."

The NAACP's Special Assistant for Education charged that the school board had chosen "to substitute the least effective desegregation plan...one which is no more than a carefully hedged, minimal transfer plan." - The NAACP announced that unless a meaningful desegregation plan was adopted, the NAACP would appeal to the Commissioner of Education.

National NAACP policy calls for rezoning, adoption of the Princeton Plan, changing the feeder pattern of elementary to secondary schools, and other administrative plans to achieve greater desegregation. Open-enrollment is urged only when more effective desegregation plans cannot be used effectively due to extensive segregated housing.

On September 4, 1962 the NAACP filed a formal complaint with the New Jersey State Commissioner of Education rejecting open-enrollment as a plan of desegregation.

The complaint states that "under the plan proposed by the Board, the present segregation and denial of equal educational opportunities will become more and more an entrenched pattern of the school system." The petition, filed on behalf of 54 Negro children, charges that the Board of Education has "insisted on perpetuating a system of school segregation which ....exists in violation of the legal and constitutional rights guaranteed under the Constitution of the United States." The NAACP urged that immediate steps be taken to eliminate all aspects of segregation in the Plainfield public schools. Booker et. al. v. The Board of Education of the City of Plainfield, New Jersey, Petition of Appeal, filed September 4, 1962 before the Commissioner of Education of New Jersey. (Counsel: Robert L. Carter, NAACP General Counsel, and Barbara A. Morris, of New York; Herbert H. Tate, of Newark, and William Wright, Jr. of Plainfield.)

## NEW YORK

### State-Wide

Representatives of the New York State Conference of NAACP Branches met with the New York State Commissioner of Education on November 13, 1956 urging the adoption and implementation of a state-wide policy on existing segregation in the public schools. The State Conference on December 6, 1956 submitted a memorandum to the Commissioner of Education reviewing existing problems and again urging that an official state policy be formulated. A second NAACP memorandum was later submitted to the Commissioner.

Early in 1957, The New York State Board of Regents established within the State Department of Education a Division of Intercultural Relations directed to the problems raised in the NAACP memorandum.

The Board of Regents of the University of New York, on January 28, 1960, adopted a state-wide policy declaring the psychological and educational undesirability of public schools segregated in fact and appointed a special Advisory Committee to formulate recommendations for action. Thus, New York became the first state to recognize the problems inherent in public schools segregated-in-fact.

The New York State Commissioner of Education on October 1, 1962 announced a similiar policy. The Commissioner stated:

> "A number of communities...have, in fact, some schools which are indeed segregated...This condition must be of great concern to all school administrators because of the growing body of evidence which points out that segregated schools are detrimental, psychologically and educationally, to the students in attendance ...Within the Department we will initiate a careful review of all policies and regulations which can have an effect in the elimination of de facto segregation and unequal educational opportunity. Where new policies or procedures are called for we will adopt them, when revisions of present ways are necessary we will change."

At the same time, the Commissioner announced that a state-wide racial census of Negro, Puerto Rican, and white elementary school pupils would be made, based on observation, to determine the extent of segregation-in-fact so that efforts "may be concentrated."

Findings of the racial census, which was carried out by local Superintendents of Schools, were released on July 31, 1962. The Census revealed that 103 elementary schools outside New York City had enrollments in which Negro pupils constitute 31% or more of the total. The census also revealed that 57 elementary schools of 36 state school districts were predominantly Negro, 25 having at least 90% Negro enrollment. All-white schools totalled 281 or 33% of those investigated.

The New York State Conference of NAACP Branches, meeting in New York City on October 5-6, 1962 strongly urged the Commissioner of Education and the Governor of New York to take immediate and concrete steps to assure that the policies and practices of local school officials and Boards of Education conform to the policy of the State of New York."

The resolution was adopted unanimously after NAACP Special Assistant for Education charged that although the State Board of Regents and the Commissioner of Education are committed to the elimination of all forms of school segregation, local school officials have failed to acknowledge the State's policy or take any steps toward desegregation. She called on the State Department of Education to direct local school boards to take immediate steps to eliminate existing segregation as revealed by the Department's state-wide racial census.

## Amityville

In 1954, the Board of Education announced the site selection for two new elementary schools, each located in adjacent, segregated residential areas. The Central Long Island NAACP Branch urged the school board to build a single elementary school serving both residential areas rather than creat two schools segregated in fact. The school board claimed that there was no site available large enough for a single elementary school although six years later a site in the same area was found for a central junior high school.

The New York State Commissioner of Education, acting on an NAACP appeal, kept the two original sites but changed the grades assigned to each school. Thus, the virtually all-Negro Northeast School houses grades 1-3, Students in grades 4 and 5 then attend the Northwest School, housing grades 1-5 in the adjacent white zone. The lower grades are segregated in fact while grades 4 and 5 are integrated.

The NAACP early in 1962 proposed redrawing zone lines or adopting the "Princeton Plan" whereby students in both zones attend each school on the basis of grade assignment. Either plan would result in full school utilization and complete school desegregation despite rigid residential segregation.

After school officials continued to contend that no problem existed, the NAACP instituted court action. Black et al. vs. The Board of Education of Amityville, New York, et al. filed March 21, 1962 in the United States District Court for the Eastern District of New York. (Counsel: Robert L. Carter, NAACP General Counsel, Maria L. Marcus, and Jawn A. Sandifer, all of New York; and Herman A. Austin, of Amityville.)

Buffalo

On October 24, 1962 at a regular school board meeting, the Board of Education was urged by the Buffalo Branch and National NAACP "to fulfill its educational and legal responsibilities by re-examining the entire school system in order to provide maximum desegregation in the elementary and secondary schools by September, 1963."

The NAACP Special Assistant for Education charged "extensive and rigid racial segregation in the elementary schools in direct violation of the May 17, 1954 decision of the United States Supreme Court and the official policy of the State of New York," and stated that "the Buffalo Board of Education maintained the largest number of segregated schools in any New York school system except New York City."

Referring to the findings of the State's racial census of elementary schools that Buffalo maintained 17 segregated schools, the NAACP stated "The extent of existing school segregation in Buffalo, however, is even more sharply focused after an examination of the racial composition of all the elementary schools..."

The NAACP reported these findings:

Schools

- Out of a total of 80 elementary schools, 64 schools or 80% are totally or virtually Negro or white; 17 schools or 21.3% are totally or virtually Negro and 47 or 58.7% are totally or virtually white.

- Only 16 elementary schools or 20% are racially integrated.

Pupils

- 82% of the total elementary school enrollment, or 28,158 Negro and white pupils, attend racially separate schools. Only 6,252 Negro and white pupils, or 18% of the total enrollment, attend integrated grade schools.

- 10,426 or 88% of a city-wide total of 11,869 Negro pupils attend totally or predominantly Negro schools. 210, or 2%, Negro pupils attend predominantly white schools. Only 1,233 Negro pupils or 10% attend integrated schools.

- 17,092 or 76% of a city-wide total of 22,541 white pupils attend totally or predominantly white schools. 430 white pupils or 2% attend predominantly Negro schools. Only 5,019 white pupils or 22% attend integrated schools.

In a comprehensive written report to the Board, the NAACP specifically urged the Board:

"(1) to adopt officially a policy which recognizes the educational undesirability of de facto segregated schools and is committed to eliminating segregation to the fullest extent possible;

"(2) to formulate and implement a plan to achieve maximum desegregation throughout the school system no later than September, 1963; and

"(3) to ensure that zoning and feeder patterns of the new junior high schools will provide maximum desegregation."

In its statement, the NAACP expressed support for the special educational programs initiated by school officials to raise educational standards of predominantly Negro schools but stated "these programs are not substitutes for eliminating segregation." Various desegregation plans were suggested to the Board, all but one adhering to the neighborhood school concept. The open enrollment plan, the NAACP stated, is the least effective where other alternatives are possible. The Special Assistant for Education stated, "we do not propose that every school in Buffalo include a fixed percentage of Negro and white pupils. But we do insist that discriminatory zone lines based on color and administrative misuses of segregated housing be ended."

Glen Cove

The NAACP in the spring of 1962 urged the Glen Cove Board of Education to eliminate racial gerrymandering of school zone lines in two instances resulting in the predominantly Negro South Elementary School. The NAACP charged that white and some Negro children gerrymandered out of the South School zone must travel a greater distance and cross ground level railroad crossings to attend the predominantly white Coles School. The NAACP also stated that the long-range reorganization of the Glen Cove school district, approved by the Board of Education, desegregated grades 5 and 6 by providing a central, intermediate school but would leave grades kindergarten through four still segregated.

After the school board refused to take any action, the NAACP filed a complaint with the New York State Commissioner of Education calling for the elimination of discriminatory gerrymandering. Davis et. al. v. The Board of Education of Glen Cove, filed September 5, 1962 before the Commissioner of Education on behalf of 37 Negro students. (Counsel: Robert L. Carter, NAACP General Counsel, and Jawn A. Sandifer of New York City.)

The NAACP complaint also calls for the dismissal of the Superintendent of Schools as being "unfit to carry out his duties". The NAACP charged that at a meeting of the NAACP with the Board of Education in July, he expressed a committment to a policy of segregated schools by asking for assistance in establishing a 100% Negro school and by explicitly expressing his disregard for the May 17, 1954 decision of the United States Supreme Court.

Arguments before the Commissioner of Education were held on November 7, 1962.

Hempstead

Prior to 1951, the zone lines of the all-Negro Prospect Elementary School were gerrymandered to exclude white pupils. The Hempstead NAACP Branch in 1951 charged deliberate segregation and subsequently filed a complaint with the New York State Commissioner of Education. The Commissioner ordered the school board to redraw school zone lines eliminating racial gerrymandering.

The following pattern now exists: one predominantly Negro school (Prospect); three schools becoming segregated schools (Franklin, Marshall, and Jackson); two virtually all-white schools (Ludlum and Fulton); and one integrated school (Washington).

There are three related problems:

1. The pattern of segregated elementary schools;

2. The proposed building program calling for additions to the predominantly Negro Jackson and Franklin-Marshall Schools which would firmly entrench the segregated pattern;

3. Proposed double sessions (in September, 1962) affecting some classes at the segregated schools although most, if not all, of these students could be absorbed at the two virtually all-white schools.

Repeated attempts were made by the Hempstead NAACP Branch and other community groups urging school officials to reconsider proposed building program. Subsequently, the following NAACP action was taken on behalf of 63 Negro students.

Barnett et al. vs. Board of Education of the Village of Hempstead, School District No. 1, et. al. Filed February 13, 1962 with the Commissioner of Education of the State of New York. (Counsel: Robert L. Carter, NAACP General Counsel, Maria L. Marcus and Jawn A. Sandifer, of New York.) Complaint was subsequently dismissed.

Branche et al. vs. The Board of Education of the Village of Hempstead, School District No. 1, Dr. William A. Kincaid, Superintendent of Schools, et al. Filed February 19, 1962 in the United States District Court for the Eastern-District of New York. (Counsel: Robert L. Carter, NAACP General Counsel, Maria L. Marcus and Jawn A. Sandifer, of New York.) Dr. Max Wolff was subsequently engaged by the NAACP to study the Hempstead school system.

(After the above actions were instituted, the Board of Education cancelled the proposed million dollar bond issue on school building program originally scheduled for March 13, 1962.)

On April 9, 1962, Judge John F. Dooling of the United States District Court, Eastern District of New York, in refusing to grant summary judgement dismissing the school suit, considered the responsibility of local school officials to eliminate segregation-in-fact.

Excerpts from Judge Dooling's opinion:

"The facts brought forward by the defendants do not authorize summary judgement in their favor. Defendants show facts compatible with an absence of responsibility on their part for the racial segregation that exists in the schools but these facts do not demonstrate that there has not been segregation because of race. Segregated education is inadequate and when that inadequacy is attributable to state action it is a deprivation of constitutional right.

"The central constitutional fact is the inadequacy of segregated education. That it is not coerced by direct action of an arm of the state cannot, alone, be decisive of the issue of deprivation of constitutional right...The educational system that is thus compulsory and publicly afforded must deal with the inadequacy arising from adventitious segregation, it cannot accept and indurate segregation on the grounds that it is not coerced or planned but accepted.

"Failure to deal with a condition as really inflicts it as does any grosser imposition of it...

"So here, it is not enough to show that residence accounts for the fact of segregation and to contend that therefore the segregation is ineluctable. The effort to mitigate the consequent educational inadequacy has not been made and to forego that effort to deal with the inadequacy is to impose it in the absence of a conclusive demonstration that no circumstantially possible effort can effect any significant mitigation. What is involved here is not convenience but constitutional interests..."

Malverne

Until 1959, two elementary schools were all-white while the third elementary school was predominantly Negro as a result of residential patterns and zoning. After the NAACP and Negro parents successfully defeated a bond issue in December, 1959 for a new school on the grounds that the proposed site would create a segregated school, the school board assigned 40 Negro pupils to one of the formerly all-white schools (Lindner Place School).

A year later, in 1960, the board rezoned elementary school attendance areas assigning an integrated residential area of the Woodfield Road School to the second formerly all-white school (Davison Avenue School) after the NAACP again successfully defeated a second bond issue to build a new elementary school.

As a result of these efforts, some Negro children were assigned to the two formerly all-white schools while the Woodfield Road School remained predominantly Negro.

The NAACP in May, 1962 urged the Board of Education to rezone or to adopt the Princeton Plan to desegregate the Woodfield Road School. The NAACP also opposed plans to house grade six classes in a central building now under construction as separate units from their original school.

After continued inaction by the Board of Education, the NAACP filed a petition of appeal with the New York State Commissioner of Education on September 5, 1962. Mitchell et. al. v. The Board of Education of the Union Free School District 12, Malverne - Lakeview, Town of Hempstead. (Counsel: Robert L. Carter, NAACP General Counsel, and Jawn A. Sandifer of New York City.)

The NAACP charged the Malverne Board of Education with maintaining de facto segregated and educationally unequal elementary schools, and arbitrarily refusing to change existing zone lines. The complaint acknowledges that limited rezoning to relieve overcrowding resulted in the assignment of some Negro children to the two, formerly all-white grade schools but states the zoning which results in the predominantly Negro Woodfield Road Elementary School has remained unchanged.

The NAACP complaint was argued before the Commissioner of Education on November 7, 1962.

Manhasset

There is one virtually all-Negro elementary school, Valley School, and two all-white elementary schools. The segregated school zone is very small while the zones of the two white schools are sufficiently large to require bus transportation for children in all grades.

The Great Neck NAACP met with school officials in early October, 1961 urging the Board of Education to end segregated public schools. In January, 1962, at a meeting with the school board, the NAACP proposed that the school board "abolish the policy, custom and usage whereby Negro children are segregated at the Manhasset Valley School and effectively excluded from ...other...schools, (and) institute a policy of non-segregation ..." The NAACP also suggested that the school board establish a committee to formulate desegregation plans.

The school board early in March, 1962 announced that a citizens committee would be appointed "to discuss the matters... raised" with the NAACP. The NAACP subsequently indicated dissatisfaction with the failure of the Board first to adopt a non-segregation policy on which specific desegregation plans could be based.

The NAACP suit, Blocker et al. vs. The Board of Education of Manhasset, New York, et al. was filed March 21, 1962 in the United States District Court for the Eastern District of New York. (Counsel: Robert L. Carter, NAACP General Counsel, Maria L. Marcus, and Jawn A. Sandifer, all of New York.)

New York City

NAACP Branches in New York City continued to press for greater desegregation (through rezoning, changes in the feeder pattern of elementary, junior, and senior high schools, and site selection), raising the educational standards of Negro schools, and, generally, for more effective implementation of the school board's desegregation program.

The New York City Board of Education was the first school board in the country to recognize the educational disadvantage of public schools segregated-in-fact and to implement an official policy. The Board, in December, 1954 declared:

> "We...interpret the May 17th decision...as a legal and moral reaffirmation of our fundamental educational principles. We recognize it as a decision which applies not only to those cases in litigation, but also as a challenge to Boards of Education throughout the nation, in northern as well as southern communities, to re-examine the racial composition of the schools within their respective systems in order to determine whether they conform to the standards stated clearly by that Court...Public education in a racially homogeneous setting is socially unrealistic and blocks the attainment of the goals of democratic education whether this segregation occurs

by law or by fact...the Board...is determined to accept the challenge implicit in the language and spirit of the [May 17th] decision...It is now the ...policy and program of the Board...to devise and put into operation a plan which will prevent the further development of [racially homogeneous] schools and would integrate the existing one as quickly as practicable."

The Board subsequently adopted recommendations of the Commission on Integration on zoning, educational standards, guidance, and teacher assignments. The Commission specifically recommended that greater desegregation be achieved through rezoning, the Princeton Plan, reorganizing the elementary-secondary feeder pattern, open enrollment, and site selection for new schools. The Commission also recommended specific proposals for improving the quality of education of those schools which could not be desegregated by virtue of extensive segregated housing.

Nyack

After urging the Board of Education to implement a non-discriminatory policy in the employment of Negro teachers, the Nyack NAACP in the spring of 1962, petitioned the New York State Commissioner of Education to investigate the problem.

The Commissioner of Education was requested (1) to order the Nyack Board of Education to cease the practice of racial discrimination positions, and (2) to investigate educational standards, curriculum, guidance and educational stimulation affecting Negro students in the Nyack public school system.

Rochester

In the first bi-racial attack on northern school segregation, the NAACP filed suit after negotiations with the Board of Education failed to change existing zones, permissive transfers, and discriminatory feeder patterns. The complaint charges the Board and school officials with "providing, affording, operating and maintaining" racially segregated public schools. The complaint further alleges that the plaintiffs, white and Negro children "have been and are now being greatly harmed, damaged, and injured" by segregation.

Aikens et al. vs. The Board of Education et al, filed May 25, 1962, in the United States District Court for the Western District of New York. (Counsel: Robert L. Carter, NAACP General Counsel, Barbara A. Morris, and Jawn A. Sandifer, all of New York.)

On May 26, the day after the suit was filed, the school board employed the first Negro school principal in Rochester.

Syracuse

After five months of fruitless negotiations by the NAACP, CORE, and community-parent groups, the NAACP in the fall of 1962 publicly charged the Board with refusing to take any steps to eliminate existing segregation in the public school system.

At a public meeting in Syracuse on October 14, the Special Assistant for Education stated that the Board of Education had "consistently rejected the simple proposal that it establish a committee to study the problem and find solutions." She charged that unless the Board immediately adopted a policy committed to the elimination of existing segregation, in accord with the policy of the State, further action would be taken by the NAACP in the nature of a formal complaint to the State Commissioner of Education.

According to the State's racial census of elementary schools, the Board maintains three predominantly Negro schools.

Westbury

Prior to 1961, all students attended the school in their zone. During 1960-61, two public referendums calling for a school building and reorganization were passed and, as a result, the predominantly Negro New Cassel Elementary School was converted to a K-3 school. Students in grades 4 and 5 attend schools outside their zone.

The NAACP and Negro parents early in 1962 urged school officials to change the proposed zoning necessitated by the opening of a new grade school, charging that the new zoning would leave New Cassel a completely segregated school. The NAACP also charged that the assignment of New Cassel pupils in grades 4 and 5 to other schools by-passed the nearest school after white parents objected to the transfers.

When the Board refused to change the proposed zoning or the assignment policy, the Superintendent of Schools stated,

> "The Negro child cannot be educated better in an integrated school...If a numerically Negro superiority in other schools is created, whites will move. There would be open rebellion in Westbury. The voters would not accept this... The Board has to be practical." (Westbury Times, March 22, 1962.)

The NAACP suit Bailey et. al. vs. The Board of Education of School District No. 1, Westbury, New York, et al., filed April 2, 1962 in the United States District Court for the Eastern District of New York. (Counsel: Robert L. Carter, NAACP General Counsel, Maria L. Marcus, and Jawn A. Sandifer, all of New York.)

## OHIO

### Cleveland

The Cleveland NAACP Branch is completing an examination of the extent of existing segregation, educational standards of predominantly Negro schools, and discriminatory practices affecting the assignment of Negro teachers. The findings and recommendations of the NAACP study will be submitted to the Cleveland Board of Education.

### Columbus

The Columbus NAACP is examining the public schools to determine the extent of existing segregation.

### Portsmouth

After an examination of the public schools in May, 1961, the NAACP urged the Board of Education to eliminate deliberate segregation of pupils and teachers at the Washington Elementary School. The NAACP and Negro parents urged desegregation of pupils and faculty integration effective September, 1962, stating that if the board failed to act, the NAACP would seek court action.

In August, the school board announced that zone lines would be redrawn and all students would attend the school in their zone. Subsequently, white parents vigorously objected and the school board rescinded its rezoning plan. The NAACP called for a student boycott for the first week of school. Negro parents and the NAACP picketed and successfully boycotted the all-Negro segregated school. Their children applied to and were enrolled at other elementary schools.

At the end of the week, the Board adopted their original plan, effective September, 1962, to rezone the segregated school, requiring all children, Negro and white, to attend the school in their zone. The Board also announced that the entire system would be rezoned to achieve maximum desegregation, effective September, 1963.

### Xenia

At the urging of the NAACP, the Board of Education, acknowledged that the all-Negro East Elementary School was segregated and took first steps to end segregation. The Board announced Negro parents would be permitted to enroll their children in other schools in the city, and the entire elementary school system would be examined and rezoned to eliminate existing segregation.

The school board's decision, effective September, 1962, which may set a precedent for other school districts throughout the Ohio Miami Valley, followed an opinion of the Board's legal advisors.

## OREGON

### Portland

On September 22, 1962 the Portland NAACP urged the Board of Education to take steps to achieve maximum desegregation affecting four predominantly Negro elementary schools. The Board indicated it would not examine or study the problem of de facto

segregation but would continue efforts to raise educational standards. The National NAACP had stated previously that special educational programs would not be accepted as a substitute for the elimination of segrogation-in-fact.

The NAACP General Counsel and Special Assistant for Education met with school officials in Portland last April as part of a West Coast trip to examine discriminatory school practices.

## PENNSYLVANIA

### Ardmore

The NAACP Branch is currently examining school attendance areas, residential patterns, and related problems. Recommendations for changes affecting the virtually all-Negro Ardmore Elementary School will be presented to the Board of Education when the study is completed.

### Chester

The Chester NAACP Branch in late 1961 urged the Board of Education to transfer students from the severely over-crowded, all-Negro Douglas Junior High School to the under-utilized, integrated Pulaski Junior High School in an adjacent zone. The Principal of the Douglas Junior High School also publicly urged the school board to relieve over-crowding by reassigning pupils.

To date, school officials have refused to take any action, or to make available certain factual data. The NAACP has announced appropriate steps would be taken after completion of a city-wide examination of school attendance areas.

### Coatesville

The Board of Education early in January, 1962, announced that the all-Negro Adams Elementary School would be desegregated, effective September, 1962. The NAACP earlier had urged the school board to desegregate and submitted four alternative desegregation plans for consideration.

On April 26, the board unanimously approved the Princeton Plan whereby two adjacent school zones are combined in a single zone and all students within the new zone are assigned to each school on the basis of grade. Thus, all students in grades one to three will attend the formerly segregated Adams School while all students in the fourth to sixth grades will attend the formerly predominantly white Terry School.

White and Negro teachers at each school will also be reassigned to achieve faculty integration.

The attorney for the school board reported, "the law is very clear as set down by the Supreme Court and the Brown decision...It is the duty of every board of school directors to proceed to integrate with all deliberate speed...A school system with segregated schools is in violation of the laws."

Philadelphia

The Philadelphia NAACP over a period of many months in 1960-1961 urged the Board of Education to discontinue certain discriminatory racial practices: assignment of students to schools on the basis of race through the use of changing boundary lines, controlling students transfers, changing the number of grades within certain schools, and the assignment of Negro teachers to predominantly Negro schools.

An NAACP suit was instituted: Chisholm et al. vs. The Board of Public Education, et al., filed June 7, 1961 in the United States District Court for the Eastern District of Pennsylvania. (Counsel: William L. Akers, James K. Baker, Oscar N. Gaskins, A. Leon Higginbotham, Jr., and Charles Moore, all of Philadelphia.)

WASHINGTON

Seattle and Tacoma

NAACP Branches in these two cities are making an examination of the public schools to determine the extent of segregation and other discriminatory educational practices affecting Negro students and teachers.

NATIONAL ASSOCIATION FOR THE ADVANCEMENT OF COLORED PEOPLE
TWENTY WEST FORTIETH STREET • NEW YORK 18, N. Y. • BRyant 9-1400

January, 1963

MEMORANDUM

RE: PUBLIC SCHOOL DESEGREGATION IN THE NORTH AND WEST

FROM: June Shagaloff
Special Assistant
for Education

The Association's attack on public schools segregated-in-fact in the North and West has been extended in the past year to more that sixty-nine cities in fifteen states. From California to Connecticut, the NAACP has examined school policies and practices and, based on the findings, has alerted communities to the existence of northern style segregation and its damaging educational effects. Increased demands for desegregation and mobilization of parent-community support have followed, together with demonstrations against discriminatory practices.

Twelve northern and western public school systems, at the beginning of the 1962-63 school year, desegregated completely or took steps to achieve greater desegregation as the direct result of NAACP activity. Vigorous community-action programs are underway in other communities to eliminate or reduce racial segregation in the schools and to raise educational standards. Continued evasion and inaction by school officials in some instances has resulted in litigation. Eighteen, of a total of twenty-one legal actions challenging existing public school segregation have been filed by the NAACP under the direction of its General Counsel, Robert L. Carter. In Rochester, New York and San Francisco, bi-racial school desegregation suits have been brought for the first time on behalf of white and Negro parents by the NAACP.

The accelerated attack of the NAACP, announced early in 1962, is in compliance with directives of the Annual Convention calling for intensified efforts "to insure the end of all segregated public education in fact or by law by all means available..."

Attached is a state-by-state report on the scope of NAACP activity and the status of public school desegregation in the North and West.

From

FEB 28 1963

M. Farmer

Report L-23B, Revised
February 13, 1963

Southern Regional Council
5 Forsyth Street, N. W.
Atlanta 3, Georgia

# DESEGREGATION IN HIGHER EDUCATION*

Listed below are formerly all-white colleges and universities of the 17 southern and border states and the District of Columbia which we know to be desegregated. This report updates L-Reports 23 and 23A which appeared in January 1961 and September 1961 respectively. In the past two years there has been an increase of approximately 30 percent in the number of desegregated colleges and universities throughout the areas covered in this report (see appendix), and today all southern states have at least one desegregated institution of higher learning. In the past two years, 89 colleges and universities have desegregated, most of them with neither fuss nor fanfare. A few still restrict Negro enrollment to the graduate and professional schools. At some of the schools no Negro students are enrolled, but either statements of their governing boards indicate an official policy of admission without regard to race, or they are under court order.

SCHOOL SEGREGATION

# THE NORTH AND WEST HAVE PROBLEMS, TOO

—*Arthur Leipzig.*

By G. W. FOSTER, JR., *Professor of Law at the University of Wisconsin.*

BY THE beginning of 1963, the attack on public school segregation had become nationwide. In more than sixty communities of the North and West there were active and organized pressures for desegregation programs.

The drive in the North and West differs in many respects from the efforts which continue in the South. The problems are different. So are the tactics, the demands, and—inevitably—the legal issues raised when conflict ripens into court action.

In the years after the 1954 Supreme Court decision in the school segregation cases national attention focused largely upon the South. There the attack was against a whole legal structure which compelled segregation. Negroes, insisting that state officials must be colorblind, sought removal of racial classifications and demanded reorganization of schools without regard to race.

By the 1960s a drive developed against what is called "de facto" segregation in the public schools of the North and West. De facto segregation does not result from any formal, legal classifications based on race. Rather, it arises from the effect of residential segregation upon patterns of neighborhood school attendance districts.

The problems raised by de facto segregation are more sophisticated and more subtle, and they stem from complex causes. The Negro fortunate enough to find housing in predominantly white neighborhoods usually has little difficulty in obtaining access to schools that serve those areas. Most Negroes in the North and West, however, live in crowded urban slum areas that racially are almost or entirely homogeneous. Even those with resources adequate to acquire housing elsewhere encounter private discrimination that discourages and often prevents their escape from segregated neighborhoods. Still more Negroes, caught by discrimination in employment and having few developed skills, simply lack the resources to escape.

School officials, accused of being responsible for de facto segregation in the schools, usually counter by insisting that residential patterns and not racial bias on their part produced the result. An attorney representing Negroes who commenced judicial action against Philadelphia school officials gave his answer to that position:

> The position of the board is that it does not consider race at all in the operation of the school system, either in setting boundaries or in administrative practices. This is not enough. The board cannot be color-blind. It is the affirmative responsibility of the board to work toward integration. Every choice which may arise in making decisions about school matters must be made in such a way as to accomplish results leading to the integration goal.

This concept of color-consciousness marks a sharp break, tactically and legally, with the thrust of school desegregation efforts in the South. It poses for many educators troublesome questions in attempting to provide adequate education for academically and culturally handicapped children in slum schools. And finally, the demand for color-consciousness raises some serious legal questions of Constitutional proportion.

Assignment by race was of course the historic basis for the dual school systems of the South. Outside the South, school assignment is typically based on geography. The school system is divided into a single set of zones and each child is initially assigned to the school in his zone of residence. Frequently some provision exists for attending school outside the zone of residence, either by permitting transfer under specified conditions or by allowing a free choice of any uncrowded school in the system. A few communities do little or no zoning and simply permit a choice among all or some of the schools in the district.

The predominant pattern, however, involves geographic zoning with rather stringent restrictions against transfer or attendance outside the zone of residence. Often this is referred to as a "neighborhood" school pattern, although there is much variation in defining the characteristics of a neighborhood. The school in a particular "neighborhood" may be large or small and it may be located near the center, or close to the edge, of the area it serves.

The neighborhood school is particularly characteristic of the organization of elementary schools in urban areas. There, with younger children involved, concern is felt for having the schools close at hand and available along safe routes which avoid major traffic problems. In more sparsely populated areas the neighborhood concept tends to break down. Buses are then provided to bring children in from greater distances, and convenience in fixing bus routes may be a major factor in determining the attendance area of a school.

At the level of secondary schools the neighborhood concept tends to be somewhat less important. These schools are generally larger and serve more extensive geographic areas. Where a high school does not offer a comprehensive curriculum, but instead is specialized and offers either a vocational or college preparatory curriculum, it may serve quite a large area of the community. In communities with two or more high schools the student populations in each are derived from a group of "feeder" elementary schools and thus a high school acquires the population characteristics of the "feeder" schools.

A neighborhood school—however defined—reflects the economic, social, cultural, and racial characteristics of the area served. Since most Negroes in the North and West live in densely popu-

lated, racially homogeneous slum areas, the schools available to them are largely or entirely segregated. Negro discontent, then, grows largely out of the problems of these slum schools.

Slum schools have traditionally had their problems. Poverty, squalid and congested housing, and social and economic discrimination combine to produce higher rates of adult crime, juvenile delinquency, general disorder, and disease. Yet the successive waves of white immigrants who once filled the slums in time found ways to escape into the white mainstream of America. The fact that escape was possible supplied motivation for many who finally succeeded in getting away.

A great fraction of the slum dwellers in the 1960s, however, are not white and they face additional handicaps which stem from their race and the peculiar problems of their cultural isolation from the whites. Oriental minorities, principally on the West Coast, with more stable family organization, higher levels of motivation, and tighter self-discipline, are steadily finding it easier to become assimilated into the community at large. But the Spanish-speaking Puerto Ricans and Mexicans and the English-speaking American Negroes, burdened after centuries of slavery and peonage with far greater rates of family disorganization and illegitimacy, and lower levels of motivation and discipline, are still finding it difficult to escape.

Many Negroes in the North and West are recent immigrants from the South and they bring with them the inherited educational and social handicaps of their rural Southern background. Hoped-for employment does not always materialize and the combination of job discrimination and their own limited skills relegate them generally to the lowest-paying jobs or, worse yet, to chronic unemployment.

Other school problems grow out of housing. Population densities in areas occupied by Negroes in the cities of the North and West rise sharply above the levels in the same neighborhoods when earlier occupied by whites. Schools become overcrowded and in many instances operate on double shifts, providing each child with only a half-day of education. Elsewhere in the community, school populations drop in older white neighborhoods because the children have grown up and left. The result is that there are often empty classrooms and smaller classes in many white sections of a city and overcrowded and sometimes double-shift classes in others which are all or largely Negro.

Still other difficulties grow out of employment barriers faced by minority groups. Racial discrimination, particularly by many of the skilled craft unions, seriously affects vocational training programs. Pupils, seeing few prospects for employment after being specially trained for it, shun vocational programs. And job discrimination generally contributes to higher rates of dropping school altogether since there is little incentive to acquire an education when it cannot be gainfully used.

The problem of obtaining an adequate supply of interested and competent teachers for the overcrowded slum schools also haunts school administrators. A Baltimore school official admitted the use of some 1,100 uncertified elementary teachers, largely in the slum schools, during the 1961-62 school year. On Manhattan in the same year more than one-third of the teachers newly appointed to the schools rejected their assignments and looked for jobs elsewhere.

The hesitation of many teachers to serve in slum schools grows out of a variety of causes. Most teachers, middle-class in aspiration if not in fact, are under many pressures which direct them away from teaching in culturally disadvantaged schools. Schools of education generally train teachers on the assumption that "a child is a child"—and use the middle-class white child as the model to be taught. As a result many teachers are but little equipped to deal with the distinctive problems of communication barriers, economic deprivation, and social and cultural disadvantages of children in depressed-area schools. This, and factors of teacher aspiration to work in the "better" schools close to where the teacher lives, create attitudes which minimize the desire or willingness to teach in the slum schools.

Physical facilities in the slum school, too, are often inferior. Many buildings tend to be old and the pressures from excessive enrollments add further burdens on the physical plant and the educational program. Major programs to rehabilitate and enlarge facilities in crowded slum areas are to be found in most large cities today. Too often, however, it has remained true that the demands for additional classrooms have continued to outrun the rising supply.

The slum schools, then, are handicapped in many serious ways and protests on behalf of those forced to attend them can commonly be grounded on objections that they furnish inadequate educational opportunities. Since the troubles are often linked with segregation as well, many of the protests take the form of demands for increased integration.

The demands for school integration in the North and West have taken a

## The President's Desegregation Plan

". . . PROGRESS TOWARD PRIMARY and secondary school desegregation has still been too slow, often painfully so. Those children who are being denied their Constitutional rights are suffering a loss which can never be regained, and which will leave scars which can never be fully healed. I have in the past expressed my belief that the full authority of the federal government should be placed behind the achievement of school desegregation, in accordance with the command of the Constitution. One obvious area of federal action is to help facilitate the transition to desegregation in those areas which are conforming or wish to conform their practices to the law.

"Many of these communities lack the resources necessary to eliminate segregation in their public schools while at the same time assuring that educational standards will be maintained and improved. The problem has been compounded by the fact that the climate of mistrust in many communities has left many school officials with no qualified source to turn to for information and advice.

"There is a need for technical assistance by the Office of Education to assist local communities in preparing and carrying out desegregation plans, including the supplying of information on means which have been employed to desegregate other schools successfully. There is also need for financial assistance to employ specialized personnel to cope with problems occasioned by desegregation and to train school personnel to facilitate the transition to desegregation. While some facilities for providing this kind of assistance are presently available in the Office of Education, they are not adequate to the task.

*"I recommend, therefore, a program of federal technical and financial assistance to aid school districts in the process of desegregation in compliance with the Constitution."*

*—President Kennedy in his special message to Congress on civil rights, February 28, 1963.*

variety of forms depending upon the particular situation on which attention focused. Understandably, some of the demands have been inconsistent with one another. At New Rochelle, for example, Negroes won a court order permitting free transfer from a largely Negro elementary school to predominantly white schools elsewhere in the city. A year later, groups at Philadelphia were opposing a free transfer policy on the ground that it permitted too many whites to run away from schools in which Negroes were enrolled.

Protests against segregation in schools around the periphery of Negro neighborhoods generally suggested one or more of three alternatives:

1) *Rezoning of attendance areas.* In some instances, it has been possible to show that school officials have apparently zoned schools to "contain" Negroes once they moved into a particular neighborhood. In other instances, zone lines remained unchanged from the days that whites occupied the entire area. In both these situations it is occasionally possible to show that existing zone lines may reasonably be changed to promote integration. Thus, it has been insisted that school authorities have a duty to rezone whether the resulting segregation has been the product of intentional board policy or merely a refusal to deal with the changing character of the neighborhoods involved.

2) *The Princeton Plan.* Another suggestion, taken from a plan installed at Princeton, New Jersey, in 1948, calls for reclassification of schools to handle fewer grades and thus serve larger geographic areas. This is accomplished by pairing two adjacent schools both of which cover grades from, say, kindergarten through the sixth. On reclassification, one of the "sister" schools handles all pupils in both attendance areas from kindergarten through third grade and the other school serves both areas for grades four through six. By doubling the geographic area of each school it is occasionally possible to promote integration around the edges of segregated neighborhoods.

3) *Location of new school facilities.* The location of new facilities, either to replace over-age buildings or to handle the needs of increased enrollments, has frequently provoked much controversy. Obviously, the location of facilities can have substantial short-run effects upon the racial composition of a school.

These suggestions for promoting integration along boundaries between segregated neighborhoods often have only temporary effect. Boundaries between racial groups tend to be unstable, holding only where freeways, rivers, or railroad tracks block expansion. Elsewhere the segregated areas expand, sometimes abetted by "blockbusting" techniques of unscrupulous realtors who panic whites into moving out as Negroes begin to move in. Integrated schools in these areas frequently become segregated again in relatively brief periods of time.

For schools deeper within segregated neighborhoods, other plans are suggested. Rezoning or reclassification of schools in these cases produces no change because of the homogeneous neighborhood patterns. In such situations the proposals involve moving some of the children out to uncrowded, predominantly white schools elsewhere in the city. Occasionally, protests have led to complete abandonment of a school, with resulting reassignment of all pupils to less segregated schools in other areas. The demands for transfers out of segregated areas are frequently coupled with insistence that bus service be provided without charge.

These open enrollment and free transfer policies merely scratch the surface. They provide means of escape for relatively small numbers of minority-group children who are strongly enough motivated to seek transfer. Most children, however, are left behind in congested, segregated schools.

To alleviate congestion, the urban school systems are busy with vast programs of new construction. Because of the high costs of acquiring additional land, much of this is going on at the sites of existing schools. Some systems —Chicago and Philadelphia are examples—are also using so-called mobile-unit classrooms, carried to a site on a trailer. These units are attractive and air-conditioned, but in Chicago particularly many Negroes regard them as symbols of a settled intent on the part of school officials to preserve segregation. And indeed, new school construction in segregated areas is increasingly coming under fire everywhere because of its failure to mitigate the effects of residential segregation.

There is broad agreement among educators that a policy of providing integrated experience for all children is a desirable objective if equality of educational opportunity is to be achieved. From this point on, however, there is real dispute among them over how much weight integration should be given in shaping school organization and educational practices.

Even in desegregated schools there are wide differences in classroom organization and teaching methods. These grow primarily out of the problem of dealing with differences in motivation, ability, and achievement among children at the same grade level. Most school systems make some efforts to group children according to one or more of these characteristics. In some instances, achievement grouping oc-

—*Photos from Wide World.*

**Should the schools be required to mitigate the effects of residential discrimination?**

curs within the classroom, with the teacher devoting attention to each group in turn. In other instances, achievement groups are isolated in separate classrooms. Less frequently, no achievement grouping is attempted and the entire class is considered as a heterogeneous unit.

The cultural deficiencies and poorer educational backgrounds among minority-group children tend to separate them at one end of the grouping scale. This means that many wind up in the "slow" group within the classroom or off in a separate classroom by themselves. There is much disagreement over the extent of damage which this kind of isolation does to social adjustment and ability to learn.

Some, placing greatest weight on the damage done by isolation, argue that properly trained teachers can handle heterogeneous classes without grouping. Others disagree, laying stress on the need to expand the horizons of the gifted child and to protect slow learners from situations in which the goals are beyond their reach.

The same sorts of differences grow out of discussing what to do about children in segregated schools. Those who strongly support policies of open enrollment and free transfer stress the value of an integrated education. They are met, however, by others who argue on behalf of strengthening the neighborhood school. The case for the neighborhood school is supported by a wide range of arguments.

Experimental programs in a number of school systems have produced striking results in upgrading the performance levels of disadvantaged children. A feature common to many of these is a concern for the child not only during the school day but in his neighborhood and his home. Social workers, school psychologists, and teachers deal with families and others with whom the child associates. Special efforts are made to enlist those around the child to encourage and support him in seeking an education. The child himself is placed in situations designed to expand his horizons and motivate him to set his own sights higher. The Banneker Group program at St. Louis and the Higher Horizons project in New York are notable examples of such endeavors. The "Great Cities" project sponsored by the Fund for the Advancement of Education has also launched experimental programs in a number of cities designed to improve educational opportunities for deprived children.

An interesting program at Hunter College in New York attacks the problems of segregated and culturally deprived schools on another front, that of training teachers for the job. This, a voluntary program open to education majors while still at the undergraduate level, places them in slum schools for their practice teaching.

Attacks are being made on still other fronts, among them on the kind of teaching materials furnished children in depressed-area schools. Beginning with the "Look, look, look. See, see, see" elementary readers, the conventional teaching materials describe a white, middle-class world which is as foreign to that of the slum child as the back of the moon. He never sees himself in that world except incidentally as a servant or some other distantly viewed figure. He does not understand that world and cannot see himself becoming part of it. In a few places, Detroit and New York among them, efforts are being made to create teaching materials that give the disadvantaged child a chance to identify himself and see a way to goals beyond anything he or his family ever experienced.

THE disagreements among educators suggest that there is much to be learned before any specific program can be imposed with much more than a hunch that it would be better than some competing alternative. Whether or not open enrollment or free transfer programs are adopted, most children will remain in their neighborhood schools. And the neighborhood schools in depressed areas will require much more understanding and attention before many of the children in them can acquire the skills, confidence, and motivation that will be needed to move into middle-class status.

"THE FIRST OBLIGATION of state authorities is to eradicate any remaining public school segregation created by sanction of state law or practice. . . . But executive responsibility does not end with the elimination of government-imposed segregation in public education. Executive officials aware of their Constitutional responsibilities must also be concerned with *de facto* public school segregation resulting from past discriminatory practices or prevailing restrictions in the availability of housing for minorities. They should likewise move affirmatively to eradicate educational disadvantages for minorities which flow from segregation in private educational institutions that derive benefits from the state." —*The Potomac Institute, "State Executive Authority to Promote Civil Rights."*

Indeed, programs to increase integration by siphoning off some small fraction of these children through open enrollment and free transfer mechanisms create other problems. Placing the child in a school far removed from his home environment makes it virtually impossible for the school to work closely with his family and neighborhood problems. Again, as happened in New Rochelle during the 1961-62 school year, if the child is too far out of step with the motivation and achievement of the other children in the school to which he transfers, the result can be a humiliating failure for the disadvantaged youngster and a hardening of attitudes against him among those who make the grade and see him fail.

There are questions, too, about the effects of open enrollment on the children who remain behind in the neighborhood schools. The children who transfer are likely to be the more strongly motivated, better achievers. Their absence only makes it more difficult to create good neighborhood schools with a wide range of goals to spur everyone along more rapidly.

The concept that public officials should become conscious of race—provided they do so benignly—represents a substantial departure from the position long asserted by and on behalf of Negroes in their fight against racial restrictions. They have fought for, and won in a number of states, legislation that prohibits keeping public records by race. They have insisted that colleges and universities not require photographs as a condition to admission and that job application forms contain no reference to race.

Indeed, the principal argument advanced in the Supreme Court in the cases which led to the school segregation decision of 1954 was that classifications based on race have no place in public education. "That the Constitution is color-blind is our dedicated belief," read a key sentence in the brief submitted to the court on behalf of the Negro plaintiffs in the school segregation cases.

Yet the basic issue before the Supreme Court in 1954 was quite different from the question whether state officials could take racial considerations benignly into account. The question at that time was whether states could require separation of public schools by race in view of the obligation under the Fourteenth Amendment to provide all persons "equal protection of the laws." The court's answer was that public school segregation could not be required. "Separate educational facilities are inherently unequal," the court held. Neither then nor later did the court

speak specifically to the question whether the Constitution required public officials to be color-blind, although the concept of color blindness was implied in a series of cryptic decisions which the court handed down thereafter that invalidated laws requiring segregation of parks, buses, restaurants, and the like.

Many questions remain to be decided in determining how far and in what manner state authority may—or perhaps must—constitutionally take race into account in shaping public policy.

It was abundantly clear by the beginning of 1963 that the process of doing away with the dual school systems in the South has endlessly taken racial considerations into account. Everyone involved in the process has done so—the community at large, school officials, even the courts. The patterns and practices of school operation have to be understood before solutions can be worked out. In this respect the actions of public authority are not color-blind.

It is also reasonably clear that, while racial considerations can be taken into account, they cannot be used invidiously against any racial group. Thus, school zone lines cannot be gerrymandered to contain Negroes. And even with racial considerations not in the picture, substantial questions of equal protection are raised by claims of serious overcrowding or that schools are badly deficient in physical plant, quality of teaching, or curricular offerings. Where any such questions develop, the Constitution probably affords a basis for judicial relief.

Other questions, however, are more difficult. As long as private discrimination produces residential segregation, it will affect the racial composition of the schools themselves. The state, whether it likes it or not, must take the community as it finds it. Since segregation cannot under the circumstances be erased, racial considerations must be taken into account. What is needed, it seems, is some flexibility of choice among reasonable educational alternatives to avoid placing any group at a disadvantage because of its race.

Where it can be shown that the practices of school authorities operate purposely to place Negroes at a racial disadvantage, judicial relief can be expected. There are, however, difficult and delicate problems in fixing the Constitutional line that measures the extent to which judicial relief may be forthcoming. Several illustrations suffice to make the point. San Francisco closed down a junior high school after protests that its student population would be 60 per cent Negro. Was this a "separate"—or "segregated"— and hence "unequal" school in the sense that the Constitution would require judicial action to put it out of business or to require alteration of its racial composition? Or was the action merely one which the political processes of the community are free to take—or not take? Again, it has been suggested that Negroes may be entitled to compensatory educational benefits because of damage done by past practices of racial segregation. It hardly seems constitutionally possible that the state can establish a compensatory program exclusively for Negroes and bar similarly handicapped whites who attend the same school.

YET the controversy over de facto segregation in the schools of the North and West is reaching the federal courts under a wide range of claimed Constitutional deprivations. The most celebrated case thus far came out of New Rochelle, New York, where the court found that school board practices more than a decade earlier caused the development of a segregated elementary school. This produced a court order permitting pupils in that school to transfer to any uncrowded school in the district. Cases like this one, which produce findings of intentional segregation practices, manifestly demonstrate a need for some corrective action. The far harder question is that of determining what kind of relief is appropriate; a number of Negro children in New Rochelle suffered serious setbacks when they transferred to classes maintaining higher academic standards.

For wholly understandable reasons, Negroes continue to insist that school authorities have the duty to mitigate the effects of residential segregation. The farthest reach of judicial language on this point came from the case in Hempstead, Long Island, in April 1962. The school board moved to dismiss the case before trial on the ground that residential patterns, not school board practices, produced the school segregation. The court denied the motion to dismiss, indicating the board had an obligation to mitigate the effects of segregation, whatever its cause. The board's obligation, the court said, could be discharged either by doing something to relieve segregation or by "a conclusive demonstration that no circumstantially possible effort can effect any significant mitigation." Thus, where the Hempstead case departed from earlier cases was in the court's insistence that the state, in operating its schools, has a Constitutional obligation to mitigate the effects of private discrimination.

So far as the drive against school segregation in the North and West insists that school authorities become benignly color-conscious, it raises many questions still to be resolved. In a great many situations public authority is not, and cannot be, color-blind. The earlier insistence by Negroes that the Constitution required the state to be color-blind seems clearly inconsistent with the minimum need of the state at least to be sufficiently color-conscious to make sure that invidious racial discrimination is not being practiced in its name.

The courts, too, in passing on claims of racial discrimination, have to take race into account. That the Fourteenth Amendment requires judicial relief against intentional segregation of public schools has been settled. Whether the courts are required by the Constitution to insist upon maximum integration where segregation is attributable to private discrimination is another question. Particularly is it another question in light of the deep differences among educators about methods for overcoming social, cultural, and educational disadvantages suffered by those isolated from the mainstream of American life.

Merely that judicial action may not be available to compel maximum integration, however, does not suggest that the state cannot experiment with such educational programs. Nor does it suggest any impropriety in having Negroes and others make political demands for these things. It does suggest that there are certain questions which must be addressed to the political processes of the community and state rather than to the courts. And where state legislation requires affirmative integration programs, courts could be looked to for enforcement of the statutes; but judicial action in such cases would flow from legislation rather than from the federal Constitution.

Manifestly, public education has a great burden to discharge in helping disadvantaged children develop their abilities to the fullest extent possible. But public education seems hardly equipped to carry the whole load of mitigating and ending all the disadvantages minority groups suffer from private discrimination. Other efforts, both public and private, must continue on many fronts if America is to make good on its Constitutional commitment to equality for all its people. Fortunately, more and more Americans are aware of this. And while much more effort is still required, significant changes are taking place in lessening job discrimination, in breaking up patterns of housing discrimination, and in generally providing more and more reasons for hope among the nation's minority groups that they can share our democratic ideals on equal terms.

# Speed, Not Deliberation

It is now more than nine years since this court held in the first Brown decision . . . that racial segregation in state public schools violates the equal protection clause of the 14th Amendment. . . .

. . . we cannot ignore the passage of a substantial period of time since the original declaration of the manifest unconstitutionality of racial practices . . . the repeated and numerous decisions giving notice of such illegality, and the many intervening opportunities heretofore available to attain the equality of treatment which the 14th Amendment commands the states to achieve. . . . Given the extended time which has elapsed, it is far from clear that the mandate of the second Brown decision requiring that desegregation proceed with "all deliberate speed" would today be fully satisfied by types of plans and programs for desegregation of public educational facilities, which eight years ago might have been deemed sufficient. Brown never contemplated that the concept of "deliberate speed" would countenance indefinite delay in elimination of racial barriers in schools, let alone other public facilities not involving the same physical problems or comparable conditions.

—Mr. Justice Goldberg, speaking for the Supreme Court in the case of *Watson v. Memphis,* decided May 27, 1963. The decision, which was unanimous, ruled that, public parks in Memphis, Tennessee, must be desegregated at once, not with "deliberate speed."

# Introduction

A NEW TERM—"token integration"—has emerged in the struggle for racial equality in public schools in the South. Although employed in more than one way, the term is generally used to describe deliberate efforts to keep racial integration at a minimum. It differs from "massive resistance," aimed at preventing any integration, for it allows for some breakdown of racial segregation. But token integration has essentially the same goal as massive resistance: it seeks to preserve, in effect, the established pattern of segregation. Thus it differs from gradual desegregation which urges a slow pace in the process of changing the segregated pattern, but which at the same time envisions the elimination of segregation eventually.

Authors and advocates of plans providing for token integration have made clear their hope that such plans can prevent sizable change. For example, consider the arguments used in support of North Carolina's Pupil Placement Act of 1955, which, including local option and transfer provisions, constitutes a plan for token integration. The report of the North Carolina Advisory Committee on Education, urging adoption of the plan, began describing the problem confronted by public schools in the state:[1] "The educational system of North Carolina has been built on the foundation stone of separation of the races in the schools. . . . The decisions of the Supreme Court have destroyed our foundation on segregation required by law. . . ." The report pointed out that defiance of the Supreme Court would be "foolhardy" because it would alienate those who might be won to the segregationist's way of thinking and it could mean "the closing of the public schools very quickly." To avoid such alienation and the closing of schools, it suggested that a child not be barred from a particular school solely because of color since this had become unconstitutional. Nevertheless, racially separate schools could be maintained, the framers of the report believed, through a form of natural and voluntary separation in the following way: ". . . an administrative body may well find . . . that under local conditions it may not be feasible or best for a particular child to go to a particular school with children of another race. *A color bar by law is one thing. A factual local condition bar, even if color is one of the causes of the condition, is a different thing.* . . . We believe that members of each race prefer to associate with other members of their race *and that they will do so naturally unless they are prodded and inflamed and controlled by outside pressure.*" The writers of the report concluded by saying that they were ". . . proposing the building of a new school system on a new foundation—a foundation of no racial segregation by law, but assignment according to natural racial preference and the administrative determination of what is best for the child."

In sum, token integration plans are designed to meet the demands of the

[1] The full text of the report is found in *Race Relations Law Reporter*, Vol. 1 (1956), pp. 581-586.

Supreme Court by allowing some integration while still keeping the number of Negroes in school with whites at such a low level as to maintain *de facto* segregation. Token integration, then, is an end in itself—an end in which the established patterns of segregation prevail.

What are the various plans of token integration, and how well have they fared in the courts? What have they accomplished, and at what price, financial and human? What is the rationale behind token integration, and how soundly based is such rationale? These are among the questions with which this report will deal.

# Methods of Keeping School Integration at Token Levels[2]

*Pupil Placement Plans*

A basic method for keeping desegregation in public schools at token levels has been through the adoption of public placement laws. The eleven former Confederate states[3] have passed such laws, which, in essence, authorize either a state or local board to assign pupils individually to different schools. The criteria for assignment range from a few broadly stated principles, such as "orderly and efficient administration of the school," to as many as 20 or more detailed considerations. Included in the latter may be the availability of teachers and transportation, the pupil's preparation and ability, the moral and health condition of the pupil, and the anticipated effect of the admission on other pupils and on the community itself. None of the plans mention race itself as a criterion of assignment; instead, they allow the operation of racially separate schools to shift to other grounds. Hartwell B. Lutz pointed this out in commenting on the Alabama Pupil Placement Law when he said that it was:

> . . . of common knowledge that the bill was passed with the intention of preventing, or, at least, delaying racial integration. The manner in which the bill might accomplish this is obvious; when a Negro child applies for admission to a white school, the Board of Education can simply assign him to a school that has only colored pupils on any one of approximately 20 grounds.[4]

In actual operation pupil placement laws have been used with the assumption that initial assignments could be by race. Negroes have been assigned to all-Negro schools and whites to all-white schools, even though ostensibly on criteria other than race. The limited amount of integration that has taken place has come through application for transfer from the school of initial assignment through provisions of the placement laws. If an individual wishes to contest his assignment, he is allowed to do so, but he must carry his request through an involved and cumbersome administrative route. Just how elaborate this procedure may be is illustrated by Section 4 of the North Carolina School Placement Law:

> Any person aggrieved by the final order of the county or city board of education may at any time within ten (10) days from the date of such order appeal therefrom to the superior court of the county. . . . Upon such appeal,

[4] Hartwell B. Lutz, "School Placement Bill—Its Practical and Legal Effect on Racial Segregation," *Alabama Law Review*, Fall, 1955, p. 229.

> the matter shall be heard *de novo* in the superior court before a jury. . . . The record on appeal to the superior court shall consist of a true copy of the application and decision of the board, duly certified by the secretary of such board. If the decision of the court be that the order of the county or city board of education shall be set aside, then the court shall enter its order so providing and adjudging that such child is entitled to attend the school as claimed by the appellant, or such other school as the court may find such child is entitled to attend, and in such case such child shall be admitted to such school by the county or city board of education concerned. From the judgment of the superior court an appeal may be taken by any interested party or by the board to the Supreme Court in the same manner as other appeals are taken from judgments of such court in civil actions.[5]

In practice, the children who have applied for transfers from schools to which members of their race have been assigned have almost always been Negroes. Thus, actual integration of schools has depended upon whether Negro parents and their children were willing to go through time-consuming, expensive steps to contest the initial assignment, as has been well pointed out by a law professor at the University of North Carolina: "A Negro parent seeking to assert his child's constitutional rights to attend a desegregated school in some sections of the South must have unlimited courage, resources, time, and energy to litigate with the massed power of the state. He must also be prepared to face economic, and, sometimes, physical sanctions."[6] The comparatively few Negro children who have successfully protested their assignment and who have been admitted to former all-white schools have constituted the "token" numbers of Negro pupils in school with whites. Because there have been so few, the pattern of racial segregation has, in fact, prevailed where placement laws are the only means for desegregation.

*School Closing, Tuition Grants*

A number of states with pupil placement laws have included "local option" provisions which allow communities to close schools ordered to desegregate. The arrangement has usually been to leave the decision of continuing or suspending the operation of schools up to the localities themselves, either through vote or through the action of the school board or board of supervisors. In order to make school closing legal, constitutional statutes requiring the state to maintain public schools have been amended. The North Carolina local option act gives the rationale for such a provision in the following way:

> It is . . . recognized that our public schools are so intimately related to the customs and feelings of the people of each community that their effective operation is impossible except in conformity with community attitudes. Our people in each community need to have a full and meaningful choice as to whether a public school, which may have some enforced mixing of the races, shall continue to be maintained and supported in that community. It

[6] Daniel H. Pollitt, "Equal Protection in Public Education: 1954-61," *American Association of University Professors Bulletin*, Vol. 47 (1961), p. 205.

> is the purpose of this Act to provide orderly procedures, consistent with law, for the effective expression of such choice.[7]

The act then spells out how a board of education may call for an election on the question of closing public schools. It was under a comparable Virginia provision that Prince Edward County closed its schools in 1959.

Another device for avoiding integrated schooling has been the offer of tuition grants to allow pupils to attend private, nonsectarian schools instead of public schools. Six states—Alabama, Arkansas, Georgia, Louisiana, North Carolina, and Virginia—have passed such legislation.

The Louisiana Act states:

> . . . it is the policy of this state to encourage the education of all of the children of Louisiana. In furtherance of this objective, and to afford each individual freedom in choosing public or private schooling, the Legislature finds that it is desirable and in the public interest that financial assistance should be provided from the public funds of the state for education of the children in private non-sectarian elementary or secondary schools in this state.

In order to allow children to withdraw entirely from public schools if they are integrated to any degree, several states have amended compulsory school attendance laws. The Virginia provision reads, in part: "Notwithstanding any other provision of law, no child shall be required to enroll in or attend any school wherein both white and colored children are enrolled."[9]

*Restrictive Transfer Provisions*

Still another way of keeping integration at low levels has been the grade-a-year or stair-step plan. Nashville was the first city to utilize such a plan. It began desegregation with the first grade in the fall of 1957 and reached the sixth grade in the 1962-63 session. Initial assignment in most plans has been made on geographical proximity, the child being assigned to the school nearest him. But Nashville and most of the other cities adopting such a plan have allowed those children assigned to a school in which they were in a racial minority to transfer to the nearest school in which their race is in a majority. Such a transfer provision has been aptly termed "restrictive," for it applies to certain children and not to others.[10] Whites in predominantly Negro schools may transfer under this provision while Negroes in that school may not; Negroes in predominantly white schools may transfer while whites in that school may not.

The effect of this restrictive transfer arrangement has been to resegregate the previously all-Negro school. As a rule, white children assigned to all-Negro schools seek and are automatically granted a transfer to the nearest school in which whites are in a majority. Some Negro children assigned to all-white schools ask for a transfer, and those remaining constitute the comparatively few in integrated schools.

# Extent of Integration in Public Schools

Just how effective have been these devices of pupil placement, school closing, tuition grants, stair-step plans and restrictive transfers in keeping integration at token levels? The figures on the number of desegregated school districts and the proportion of Negro pupils in schools with whites provide an answer to this question.

When the Supreme Court declared in 1954 that racial segregation in public schools was unconstitutional, 17 states and the District of Columbia required the separation of races in public education. Since the Supreme Court ruling, the District of Columbia and six of the states—Delaware, Kentucky, Maryland, Missouri, Oklahoma, and West Virginia—have moved more or less steadily toward compliance, and may therefore be called "compliant" states. The other eleven states—Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North and South Carolina, Tennessee, Texas, and Virginia—have passed legislation to prevent or to slow down desegregation. They may be called "resistant" states. In order to gain even a rough impression of the effectiveness of the plans for token integration, it is necessary to separate the extent of school integration in the "compliant" states from that in the "resistant" states.

We may look first at the number of school districts that have desegregated since 1954. A school district is regarded as desegregated when a single Negro child enters a school formerly attended only by whites, or when a single white child enters a school attended up to that time only by Negroes. Such desegregation is possible only in bi-racial school districts, that is, districts in which there are both white and Negro children residing. Table 1 shows how many bi-racial school districts had been desegregated as of November 1962.

It can be seen that little more than one out of ten of the bi-racial districts

*** Delaware, District of Columbia, Kentucky, Maryland, Missouri, Oklahoma, West Virginia.

in the eleven resistant states have been desegregated, while slightly more than nine out of ten have been desegregated in the compliant states. Moreover, it should be noted, of the 270 desegregated districts in the resistant states last fall, 176 were in Texas alone.

Because a district is desegregated, it does not follow that all Negroes and whites in the district go to school together, for, as previously noted, a single child in school with children of a different race makes an entire district desegregated. Table 2 summarizes the extent of actual integration in the desegregated districts, pointing out how many Negroes were in schools with white in those districts. *It can be seen that in the resistant states only 2% of all the Negro children in the desegregated school districts were actually attending school with whites.*[11] *Or, stated another way, 98% of the Negroes in desegregated districts in the resistant states went to segregated, all-Negro schools.*

TABLE 2

NEGRO PUPILS IN DESEGREGATED PUBLIC SCHOOL DISTRICTS IN SCHOOL WITH WHITES IN SOUTHERN AND BORDER STATES, NOVEMBER, 1962*

| | *Negro Pupils in Desegregated School Districts* | | |
|---|---|---|---|
| *States* | *Total Number* | *Number in School with Whites* | *Per Cent in School with Whites* |
| Resistant** | 624,825 | 12,217 | 2.0 |
| Compliant*** | 443,853 | 243,150 | 54.8 |
| Total | 1,068,678 | 255,367 | 23.9 |

* Source: *Statistical Summary of School Segregation-Desegregation in the Southern and Border States* (Nashville: Southern Education Reporting Service, November 1962), p. 3. See also Appendix.
** Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas, Virginia.
*** Delaware, District of Columbia, Kentucky, Maryland, Missouri, Oklahoma, West Virginia.

A final set of figures indicating the extent of integration in southern public schools shows how many Negroes in all districts, racial and bi-racial, segregated and desegregated, attend school with whites. Table 3 presents those figures for the fall of 1962.

This clearly illustrates how exceedingly limited the actual amount of racial integration is in the eleven resistant states. And the caption on the lead article of the December 1962 issue of SOUTHERN SCHOOL NEWS—"7.8 per cent of Negro Pupils in Classes with Whites"—is, therefore, exciting until one reads further to see that 95.2% of those Negroes in school with whites are from the compliant states (*i.e.*, 243,150 of the total of 255,367 Negroes in school with whites).

[11] It is of interest to note that in one school district, Nashville, of the 810 Negroes reported as being in schools with whites, 540 of them were in a school with two non-Negroes, a white and a Chinese-American child. U. S. Commission on Civil Rights, *Civil Rights USA: Public Schools, Southern States, 1962*, pp. 112, 115.

Thus racial integration in public schools is by any standard at token levels in resistant states, where 98% of the Negro pupils in desegregated districts and 99.6% of the Negroes in all school districts are in segregated schools. And thus the segregated pattern continues to prevail in the eleven resistant states.

TABLE 3

# Some Court Rulings on Token Integration Plans

How have the numerous plans to keep racial integration at token levels fared in federal courts?"[12] Court rulings on such plans will largely determine how long they may continue as effective instruments for maintaining *de facto* segregation. But it should be pointed out that there have been many and, at times, diverse court rulings, and that new rulings continue to be made. For this reason, only those cases which appear to be of major importance to this subject are selected. The reader should keep in mind that the situation is far more complex than the cases and rulings cited would indicate.

*Pupil Placement Plans*

When first adopted, the pupil placement plans proved to be generally acceptable to the courts as plans for desegregation. In a North Carolina case in November 1956, the U. S. Court of Appeals for the 4th Circuit stated: "It is argued that the Pupil Enrollment Act is unconstitutional; but we cannot hold that that statute is unconstitutional upon its face and the question as to whether it has been unconstitutionally applied is not before us, as the administrative remedy which it provides has not been invoked."[13]

Later, in May 1958, a three-judge U. S. District Court ruled that the Alabama placement law was not unconstitutional on its face.[14] The district court ruling was affirmed the same year by the U. S. Supreme Court. But again, as in the North Carolina case, the plaintiffs had not sought transfers under the law, and therefore there was no evidence that it was being used in a discriminatory manner.

Lately, however, the federal courts have become increasingly critical of pupil placement laws. This criticism has been directed at the laws in two ways: on their application and on their acceptability as plans for desegregation.

In regard to their application, federal courts have ruled that pupil placement laws are being used in an unconstitutional manner when Negro children are subjected to hurdles not encountered by whites. For example, the 4th Circuit Court of Appeals condemned the application of the assignment plan in Roanoke County, Virginia, in the following ruling:

> A Negro pupil who wishes to free himself from the segregated school in which he has been routinely assigned under the dual racial zoning system must apply for a transfer. Regardless of the applicant's place of residence, the county school officials habitually refer his application to the state board with the recommendation that he be assigned to the Negro school. By the

[12] Many references will be made in this section to federal courts. Since frequent mention is made of circuit courts by number, it might be helpful to know in which circuits the "resistant" states are located: in the 4th are Virginia, North and South Carolina; in the 5th are Florida, Georgia, Alabama, Mississippi, Louisiana, and Texas; in the 6th is Tennessee; and in the 8th is Arkansas.

[13] *Race Relations Law Reporter*, Vol. 2 (1957), p. 20 (*Carson* v. *Warlick*).

[14] *Race Relations Law Reporter*, Vol. 3 (1958), pp. 425-434, 867. (*Shuttlesworth* v. *Birmingham Board of Education.*)

established practice of the state board, a Negro, in order to be admitted to a white school, must not only live closer to that school than to the Negro school, but he must in addition, meet a requirement that is not imposed upon white students seeking transfers, namely, in aptitude and scholastic achievement he is required to be substantially above the median of the class in the white school. . . . The obvious function of these transfer criteria, which find application in respect to Negro children only, is to place next-to-impossible hurdles in their way so as to perpetuate segregation.[15]

In this same decision, the 4th Circuit Court also undermined the effectiveness of pupil placement plans which require Negro plaintiffs to present their case individually. For this court held that not only the plaintiffs but also "those similarly situated in Roanoke County are entitled to injunctive relief from a continuance of this unlawful discrimination."[16]

In a comparable ruling in North Carolina, the 4th Circuit Court ordered the City Board of Education of Durham to stop subjecting pupils seeking transfers to "futile, burdensome or discriminatory administrative procedures."[17] It ruled further, in the same case, that: "So long as the school board allows its practice of racial assignments, the injunctive order should require that it freely and readily grant all requests for transfer or initial assignment to a school attended solely or largely by pupils of the other race."

On the same day (October 12, 1962), this same court ruled that the Caswell County School Board violated the spirit of the North Carolina Pupil Assignment Law by refusing to transfer Negro children to white schools and by using the Assignment Law "only when dealing with interracial transfer requests."[18]

The courts have raised questions too about the acceptability of pupil placement laws as plans for desegregation when schools under these laws continue to be segregated. Late in 1959, both the 5th and 8th Circuits of the U. S. Court of Appeals questioned the validity of these laws as desegregation plans. In a Dade County, Florida case, the 5th Circuit said: ". . . there is nothing either in the Pupil Assignment Law or the Implementing Resolution clearly inconsistent with a continuing policy of compulsory racial segregation."[19] The 8th Circuit Court stated in a Jefferson County, Arkansas case that the superintendents and officers of the defendant school district and its Board of Directors throughout the three school years in which the pupil placement plan was in effect had:

. . . carried into effect, enforced and maintained a rigid, racial segregation policy in all of its schools which, without exception, permitted no entry of any colored child into its white schools. . . . It is established, too, that the Board intends a continuation of that policy, without any change or modifications and that its professing of the Pupil Enrollment Act of 1956, having

[15] *Race Relations Law Reporter*, Vol. 7 (1962), p. 416. (*Marsh* v. *County School Board of Roanoke County.*)
[16] *Idem.*

[18] Idem. (*Jeffers* v. *Whitley*).
[19] *Race Relations Law Reporter*, Vol. 4 (1959), p. 861. (*Gibson* v. *Board of Public Instruction of Dade County.*)

been applied and in operation during the years 1957, 1958, and 1959, is but a cover-up to conceal its anti-racial and pro-racial segregation attitude.[20]

The most direct challenge to pupil placement laws in meeting the legal requirements for school desegregation was made in Tennessee in March 1962. The 6th Circuit Court ruled in a Memphis case that "The Pupil Assignment Law might serve some purpose in the administration of a school system, but it will not serve as a plan to convert a bi-racial system into a non-racial one."[21] The Court went on to say that the burden for bringing about desegregation was on the shoulders of Negro children and their parents who requested transfers, and that something more was needed to establish non-racial schools.

In August 1962 the 5th Circuit Court in a New Orleans* case emphatically denounced the Louisiana Pupil Placement Law as a plan for desegregation:

> This Court, like the district court, condemns the Pupil Placement Act, when, with a fanfare of trumpets, it is hailed as the instrument for carrying out a desegregation plan while all the time the entire public knows that in fact it is being used to maintain segregation by allowing a little token desegregation. . . . The Act is not an adequate transitory substitute in keeping with the grandualism implicit in the 'deliberate speed' concept. It is not a plan for desegregation at all.[22]

*School Closing, Tuition Grants*

The legality of closing public schools in order to avoid desegregation has involved the question of whether or not a state is practicing equal treatment of its citizens if state money is provided for public schooling in some districts but not in others. Prince Edward County, Virginia, is the only school district that has closed its public schools; since the fall of 1959 white children have attended private schools in the county while Negro children have been without formal education. In July 1962 the U. S. District Court declared that such closing was contrary to law:

> The Court holds that the public schools of Prince Edward County may not be closed to avoid the effect of the law of the land as interpreted by the Supreme Court, while the Commonwealth of Virginia permits other public schools to remain open at the expense of the taxpayers. . . . The School Board of Prince Edward County is herewith directed to complete plans for the admission of pupils in the elementary and high schools of the county without regard to race or color and to receive and consider applications to this end at the earliest practical date.[23]

This ruling has been appealed to the 4th Circuit Court.

In a U. S. District Court ruling on January 3, 1963, Powhatan County,

* Single, nonracial attendance zones for the first and second grades of the Orleans Parish public schools were approved by a 3-1 vote of the Orleans Parish School Board this spring and will become effective for the next school year.

[20] *Race Relations Law Reporter*, Vol. 5 (1960), p. 54. (*Dove* v. *Parham.*)

[21] *Race Relations Law Reporter*, Vol. 7 (1962), p. 43. (*Northcross* v. *Board of Education of Memphis.*)

[22] *Race Relations Law Reporter*, Vol. 7 (1962), p. 700. (*Bush* v. *Orleans Parish School Board.*)

[23] *Race Relations Law Reporter*, Vol. 7 (1962), p. 409 (*Allen* v. *County School Board of Prince Edward County.*)

Virginia, not far from Prince Edward County, was ordered to take no action, "directly or indirectly," to close its public schools while other public schools were open in Virginia.[24] School officials were directed to refrain from closing schools either by withholding funds or by failing to appropriate funds.

These two decisions clearly indicate that federal courts will not permit a state to allocate funds to some public schools while others remain closed to avoid desegregation.

The legality of tuition grants, not explicitly tied to desegregation, has not yet been passed on by federal courts. In Virginia the original tuition grant laws provided for the availability of grants only in those areas where schools were desegregated. In 1959 "State and Local Scholarships," as they are officially called, were made available to any student to attend an accredited nonsectarian private school. But in August 1961 a U. S. District Court held that such scholarships could not be granted in Prince Edward County as long as public schools remained closed. In this ruling the judge stated that in granting scholarship stipends the state had contemplated a freedom of choice between public and private schooling. He cited the regulation of the State Board of Education to support the state's intention: " 'Scholarships will be available for pupils of legal school age who are eligible to attend the public schools in the county, city or town in which the parent, guardian or such other person standing in loco parentis is a bona fida resident.' . . . This rule is plain and unequivocal. State scholarships are not available to persons residing in counties that have abandoned public schools."[25]

*Grade-a-Year Plans*

Federal courts have usually accepted grade-a-year plans as valid desegregation procedures. However, several considerations have entered into their acceptance. The plan, for example, must be more than just a promise to desegregate. Thus, a proposal in December 1960 by the Chattanooga School Board to desegregate the first three grades of selected schools beginning in 1962-63, with desegregation also to be considered in special programs, was rejected by the U. S.. District Court as being too indefinite and not an adequate start.[26]

Another consideration involves the degree of desegregation in neighboring school systems. In some cases, the courts have required that desegregation levels in contiguous areas be made equal. This approach was evident in a case involving Davidson County, Tennessee, where the city of Nashville is located. The County Board of Education submitted a grade-a-year plan four years after the Nashville grade-a-year plan had gone into effect. The U. S. District Court accepted the plan but required that it be speeded up to include

the first four grades immediately in order to bring desegregation in line with that already in effect in Nashville.[27]

Still another factor conditioning the acceptance of grade-a-year plans has been evidence of the willingness of the school board to move with "good faith," toward compliance with the Supreme Court ruling. This factor can be seen in a decision of the 6th Circuit Court regarding a grade-a-year plan proposed by the Knoxville, Tennessee School Board. The Board had chosen to operate under Tennessee segregation statutes until compelled to do otherwise, and the Court criticized this position in these words:

> The position of the board that it would continue to operate under these unenforceable laws [*i.e.*, Tennessee statutes prohibiting the mixture of races in schools] until compelled by law to do otherwise, does not commend itself to the Court for the acceptance of a plan that provides for a minimum degree of desegregation. . . . We . . . believe . . . that more grades than contemplated by the board's plan should now be desegregated. In the light of the board's experience with the present plan, it should be enabled to submit an amended plan that will accelerate desegregation and more nearly comply with the mandate of the Supreme Court for 'good faith compliance at the earliest practicable date.'[28]

The courts have given different rulings on whether or not the grade-a-year plans may be used simultaneously with the transfer provisions made available under pupil placement laws. The 6th Circuit Court refused transfer requests by pupils in grades other than the ones desegregated by the grade-a-year procedure in both the Davidson County and Knoxville cases cited above.[29] The Court's reasoning was:

> . . . we think the Supreme Court contemplated that there would have to be plans for the transition and that some individual rights would have to be subordinated for the good of the many. The smooth working of a plan could be thwarted by a multiplicity of suits by individuals seeking admission to grades not yet reached in the desegregation plan.[30]

On the other hand, the 5th Circuit Court in the Pensacola, Florida, case added a grade-a-year plan to an existing plan permitting transfer of Negro pupils into formerly all-white schools. Both the grade-a-year plan and the transfer provisions were allowed to operate at the same time.[31] And in Virginia grade-a-year plans have been added to existing transfer arrangements under the pupil placement act with approval by the federal courts.[32]

### *Restrictive Transfer Provision*

Since grade-a-year plans involve a rezoning of school districts without

[30] *Race Relations Law Reporter*, Vol. 7 (1962), p. 39. *(Goss* v. *Board of Education of the City of Knoxville.)* In response to this decision, Knoxville desegregated one additional grade.

[31] *Race Relations Law Reporter*, Vol. 7 (1962), pp. 669-674. *(Augustus* v. *Board of Public Instruction of Escambia County, Florida.)*

[32] See, for example, *Jackson* v. *School Board of the City of Lynchburg, Race Relations Law Reporter*, Vol. 7 (1962), pp. 728-729.

regard to race, some white children are often included in the attendance zones of former Negro schools, and are therefore assigned to these schools. As was pointed out earlier, plans for grade-a-year desegregation usually include a provision granting the right to those children assigned to a school in which their race is in a minority to transfer to schools in which their race is in a majority.

The restrictive transfer provision in the Nashville grade-a-year plan was approved by the 6th Circuit Court in 1959,[33] and it was later approved by the same court in the Knoxville and Davidson County grade-a-year plans in these words:

> We do not think the transfer provision is in and of itself illegal or unconstitutional. It is the use and application of it that may become a violation of constitutional right. . . . We adhere to our former ruling with the admonition to the Board that it cannot use this as a means to perpetuate segregation.[34]

However, the 5th Circuit Court of Appeals took a different position on the constitutionality of restrictive transfer provisions in the Dallas County, Texas case in December 1960. It did so in the following way:

> . . . with deference to the views of the 6th Circuit it seems to us that classification according to race for purposes of transfer is hardly less unconstitutional than such classification for purposes of original assignment to a public school.[35]

In a later ruling (August 1962) the 5th Circuit Court made it possible for Negro children to transfer freely from schools in which their race is a majority if the transfer of white students leaves it an all-Negro school. The order stated:

> Negro children who attended formerly all-white schools in 1960-61 and 1961-62, and Negro children who have registered for attendance at formerly all-white schools in 1962-63 and subsequent years may not be transferred or assigned to an all-Negro school against their wishes. If the transfer of white students from schools would result in resegregation, the Negro children shall be afforded an opportunity to attend a nearby formerly all-white school without being subjected to tests for transfer under the Pupil Placement Act.[36]

Thus, this ruling removed, in effect, the restrictive aspect of the transfer provision.

A direct challenge to the constitutionality of the restrictive transfer provision came in September 1962, in a ruling by the 4th Circuit Court of Appeals in a Charlottesville, Virginia case. In declaring the assignment and transfer provisions of the Charlottesville plan invalid, the Court said:

> It is of no significance that all children, regardless of race are first assigned to the schools in their residential zone and all are permitted to transfer if the assignment requires the child to attend the school where his race is in the minority, if the purpose and effect of the arrangement is

[33] *Race Relations Law Reporter*, Vol. 4 (1959), pp. 584-603. *(Kelley* v. *Board of Education of the City of Nashville.)*

[36] *Race Relations Law Reporter*, Vol. 7 (1962), p. 702. *(Bush* v. *Orleans Parish School Board.)*

> to retard integration and retain the segregation of the races. That this purpose and this effect are inherent in the plan can hardly be denied. The School Board is well aware that most of the Negro pupils in Charlottesville reside in the Jefferson zone and that under the operation of the plan white children resident therein will be transferred as a matter of course to the schools in the other zones while the colored children in the Jefferson zone will be denied this privilege. The seeming equality of the language is delusive, the actual effect of the rule is unequal and discriminatory. It may well be as the evidence in this case indicates that some Negroes as well as whites prefer the schools in which their race predominates; but the wishes of both races can be given effect as far as is practicable not by restricting the right of transfer but by a system which eliminates restrictions on the right. . .[37]

It is now quite clear that restrictive transfer arrangements will have to be abandoned as a means of delaying and evading school desegregation; on June 3, 1963, the Supreme Court held unanimously that two pupil transfer plans—one in Knoxville and the other in Davidson County, the suburban area around Nashville—are unconstitutional.

Moreover, in a unanimous decision made just a week earlier in which the Court refused to allow the city of Memphis to desegregate public recreational facilities on a gradual basis, Mr. Justice Goldberg expressed the Court's growing impatience with the South's slow rate of school desegregation. He pointed out that when the Court allowed "all deliberate speed" for integrating schools, it did not mean "indefinite delay in elimination of racial barriers."

*Summary*

It is clear from the foregoing rulings that token integration plans are under strong attack in the federal courts. Pupil placement plans, initially accepted as constitutional on their face, are being declared unconstitutional as practiced in some school systems and are being rejected as valid plans for desegregation. School closing is being challenged if other public schools in the state remain open, and tuition grants have been stopped in the one county where public schools are closed. Grade-a-year plans are being speeded up, and restrictive transfer provisions that result in resegregation are being rejected. One by one the devices for keeping integration at token levels are being blunted and eliminated by the courts.

Throughout the complex of court rulings runs a clear and consistent thread, namely that school boards must proceed in *good faith* to develop a single school system, without regard to race, and that they must do this with all deliberate speed. These rulings, therefore, strike at the heart of token integration, which as noted, seeks to maintain a dual system of schools in which the races are, in effect, segregated. Ostensibly the plans for keeping integration at token levels have been devised to try to satisfy the courts. It is quite

[37] *Race Relations Law Reporter*, Vol. 7 (1962), p. 719. *(Dillard v. School Board of the City of Charlottesville.)*

obvious now that they are not doing so, and that the courts are becoming less and less patient with the bad faith implicit in them.

The courts have, however, largely deferred the question of teacher and staff desegregation, in order to permit pupil desegregation to reach a fairly advanced stage of development. For example, the 5th Circuit Court held in the Pensacola case (see p. 11) that "the district court may well decide to postpone the consideration and determination of [the teacher desegregation] question until the desegregation of the pupils has either been accomplished or has made substantial progress."

Desegregation as a reality still lies in the future, for it is to be remembered that 99% of the Negro children in the eleven former Confederate states continue to be in all-Negro schools. Just how soon desegregated, non-racial school systems will develop throughout the South depends on several factors. These include the determination of Negro plaintiffs to press for equal treatment, the vigor of the federal government in demanding the elimination of discrimination, and the willingness of school boards and communities to act in good faith in compliance with the Supreme Court decision. It is with this last-mentioned factor that we shall next deal, looking first at some of the costs that resistance to equal treatment has brought and can continue to bring.

# Cost of Keeping Integration at Token Levels

If school boards and communities in the eleven resistant states continue to try to maintain *de facto* racial segregation in their public schools, they can be assured of two things. It will be futile in the long run, and it will be costly. The preceding section has shown that federal courts are not going to permit the continuation of racial schools, and states may well be faced with either closing all of their public schools or extending integration beyond token levels.[38] Of course the closing of all schools in a state would be the ultimate in costs and one that no state has yet shown the willingness to pay. But to continue resistance to its dead end will also be costly—in money, in time, in effort, and in disruption of schools and communities. Apparently, some segregationists are willing for their states and communities to pay any price to try to keep a bi-racial school system. And some politicians and school officials believe that it is necessary to offer every possible resistance so that segregationists will be more willing to accept integration when it does come. Regardless of these feelings about resistance, however, it is well for all concerned to realize the enormous price that is exacted for such resistance.

While no precise cataloging of the costs of maintaining token integration can be made, illustrative costs can be cited. For one of these, we may look at estimates of the expenditures on litigation contesting desegregation. The Southern Educational Reporting Service has stated that a total of 293 court cases on school segregation, desegregation, and related issues had been filed in state and federal courts by November 1962.[39] If we take the estimate of Gordon M. Tiffany, first staff director of the United States Commission on Civil Rights, that such cases average in cost about $15,000 each, we reach the figure of $4,395,000 as a total cost. Such litigation has virtually ceased in the compliant states and the District of Columbia, which have had 70 of the cases. The eleven resistant states have had the remaining 223 cases, with the states of Arkansas, Texas, and Virginia accounting for over one half of them. States like Alabama, Georgia, Mississippi, and South Carolina have had comparatively few cases of litigation, but they are fast approaching the time when they will have many if they try to maintain *de facto* segregated school systems.[40]

Another cost is that involved in the drawing up and passing of legislation designed to avoid full compliance with the Supreme Court rulings. Legisla-

[38] It will be recalled that "massive resistance" in Virginia finally reached a point where to have followed it further would have resulted in the closing of schools throughout the state. (See Benjamin Muse, *Virginia's Massive Resistance* (Bloomington, Ind.: University of Indiana Press, 1961.] Most of the states have abandoned massive resistance and substituted token integration. It appears as though time is now running out on token integration.

[39] *Statistical Summary of School Segregation-Desegregation in the Southern and Border States* (Nashville: Southern Education Reporting Service, November 1962), p. 4.

[40] It is of interest to note that the Attorney General of Alabama has asked a legislative finance committee for money "to fight desegregation suits and other federal actions." (Reported in the Birmingham *Post-Herald*, January 30, 1963, p. 1.) Evidently, Alabama is anticipating heavy expense in court cases.

tures of the 16 states have passed a total of 379 new laws designed to prevent, restrict, or control school desegregation, according to a November 1962 report of the Southern Educational Reporting Service.[41] The drafting, debating, and passing of such legislation, much of which has been declared unconstitutional by federal courts, have taken an enormous amount of time, effort, talent, and money. While few of these costs can be measured directly, it can be noted, by way of illustration, that the state of Louisiana held five "Extraordinary Sessions" during 1960 and 1961 to deal with legislation designed to maintain segregation. Appropriations for these extra sessions amounted to $934,000.[42] In order to see just what sort of legislation was passed at these sessions and what the result was, we may refer to comments on the extra sessions by the U. S. Court of Appeals for the 5th Circuit. After observing that the Orleans School Board itself had attempted to act in good faith in complying with court orders to desegregating the schools, the Court had the following to say about the state legislature:

> The Louisiana legislature did not remain idle. The Governor of the state called five consecutive extra sessions of the legislature (unprecedented in Louisiana) for the purpose of preventing the Board from proceeding with the desegregation program. Among other actions, the legislature seized the funds of the Orleans Parish School Board, forbade banks to lend money to the Board, removed as fiscal agent for the state the Bank which had honored payroll checks issued by the School Board, ordered a school holiday on November 14, addressed out of office four of the five members of the Board, then on two occasions created a new School Board for Orleans Parish, still later addressed out of office the Superintendent of Schools in Orleans Parish, and dismissed the Board's attorney. The federal courts declared these and a large bundle of related acts unconstitutional.[43]

Another cost in the maintenance of token integration has been the awarding of tuition grants. Virginia has given more of these grants than any other state. During five years of operation, an estimated 38,000 grants have been made, totaling over seven and three quarter million dollars.[44] A newspaper survey has shown that, ironically, only a minority of students receiving grants have used them to avoid integrated schools.[45] Most of the grants have gone to children who were actually in segregated schools and who wished to attend private schools, or to children who were already in private schools.

Virginia's experience with tuition grants was repeated in Georgia, where the State School Board found that 1,457 of the 1,756 applicants for grants were already in private schools. According to Dr. Claude Purcell, Georgia Superintendent of Education, the total paid in 1962-63 for tuition grants amounted to $215,987. As a result of these disclosures, the Georgia legislature amended the tuition grant law during its 1963 session. Under terms of

[45] Richmond *Times-Dispatch*, September 2, 1962, p. 1.

the amendments, most recipients of tuition grants apparently will cease to receive them after this year.

Louisiana has also adopted a tuition grant law. Again, the cost to the state for such grants has been high: state officials reported in January 1963 that $850,216 was spent on grants-in aid to private school pupils during the first four months of the 1962-63 school year. School grants were expected to go to the parents of some 7,000 pupils in 42 private, nonsectarian schools after mid-year registrations.

Still other costs, less tangible but perhaps more significant, have to do with the handicapping of school administrators in improving the quality of education in the public schools. With so much time, energy, and money spent in keeping certain children out of certain schools, less time, effort, and money have been available for strengthening the educational program itself. Dr. Carl F. Hansen, Superintendent of the Washington, D. C. public schools, has pointed out how much more effectively the approach to the education of children as children (*not* as white and Negro children in separate schools) can be made when the issue of desegregation is settled. Hansen says:

> The design for instruction in American education deserves close examination. In the District of Columbia much has been done to overcome mistaken notions about methods of instruction and the relationship of curriculum to the learner. What has been done should not be directly related to desegregation, though . . . it seems clearer now than it did five years ago that desegregation prepared the ground for a total attack upon the improvement of instruction. In the changing design of organization for instruction here, the issues are drawn, not on who should be taught where, but on philosophical principles of education, methods, techniques, and choice of content.[46]

The resources spent by the resistant states in a vain attempt to keep segregation might have been used to improve the standards of their schools. For example, a number of their high schools remain unaccredited. Table 4 gives a comparison of the accreditation status of high schools in 1959 in six of the eleven resistant states, and it reveals that these states have a long way to go to bring all of their schools up to accredited status. The table also shows the great discrepancy existing between white and Negro high schools. When it is remembered that almost all the Negro pupils in the resistant states continue to attend all-Negro schools, it is clear that Negroes in the South are receiving inferior schooling opportunities.[47] Such a low quality of schooling means that the South is paying a great price in not developing its human resources to as full a degree as it might.

Another cost of token integration is the keeping of the race issue alive,

[46] Carl F. Hansen, *Addendum: A Five-Year Report on Desegregation in the Washington, D. C. Schools* (New York: Anti-Defamation League of B'nai B'rith, 1960), pp. 30-32.

[47] Other indications of unequal schooling are found in the report of the North Carolina advisory committee on civil rights that the investment per pupil in school facilities in the state showed that the average per white student was $60.36 above the all-student average, while that for the Negro student was $143.36 below the all-student average. (From the *Southern School News*, August 1960, p. 9) The Georgia Conference on Educational Opportunities reported that in the school year of 1958-59, the current expenditures per pupil in the state of Georgia were $228 for a white child and $191 for a Negro child. From *Georgia's Divided Education* (Atlanta: Ga. Conference on Educational Opportunities, 1960), p. 10.

## TABLE 4

### Negro and White High Schools Accredited by the Southern Association of Schools and Colleges in Five "Resistant" States in 1962 - 1963*

| State | *Per Cent of High Schools Accredited* | | *Proportion of White to Negro High Schools Accredited* |
|---|---|---|---|
| | *White* | *Negro* | |
| Alabama | 35.9 | 21.0 | 1.7 : 1 |
| Georgia | 66.0 | 43.2 | 1.5 : 1 |
| Louisiana | 67.7 | 27.4 | 2.5 : 1 |
| Mississippi | 31.3 | 7.6 | 3.8 : 1 |
| South Carolina | 40.4 | 14.3 | 2.9 : 1 |

* Sources: The 1962-63 educational directories of Alabama, Georgia, Louisiana, Mississippi, and South Carolina, and "Proceedings of the Sixty-Seventh Annual Meeting of the Southern Association of Schools and Colleges."

the catering to racial prejudice, the giving of false hope to segregationists who are led to believe that *de facto* segregation can be maintained. In moving from segregation to desegregation it has been demonstrated repeatedly that when state and local officials act in resolute firmness there has not been violence or serious opposition in carrying out the mandate of the courts—as in Atlanta, Nashville, Memphis, and Lynchburg, Virginia. But when state and local officials have repeatedly warned that there will be trouble and that people will not permit the change, there has been trouble—as in Little Rock and New Orleans.[48] This latter approach results in what sociologists term "self-fulfilling prophecies," for such an approach encourages extreme segregationists to cause trouble, thus making the prediction come true. There is no attempt here to minimize the difficulty of change in the area of race relations where so many people have been conditioned to accept segregation as the proper way of life. Movement toward the elimination of segregation in public education is difficult. The point is that it is made far more difficult and disruptive when officials try to avoid compliance with court orders, either by outright resistance or by more subtle token integration.

Closely related to this last point is the cost that comes from the damage done to the concept of justice in American Democracy. It was almost nine years ago that the highest court in the land concluded that ". . . in the field of public education the doctrine of 'separate but equal' has no place. Separate educational facilities are inherently unequal." Yet, after this long a time segregation in public schools in the resistant states holds for 99.6% of the Negro children. And a large factor in keeping schools segregated has been the determination of white leaders, first through massive resistance and now through token integration, to thwart the ruling of the Supreme Court. Just what the

[48] The sharp contrast between the acceptance of the first Negro at Clemson College in South Carolina and the resistance accorded James Meredith at the University of Mississippi highlights the part that attitudes of state and school officials play in whether or not violence or peaceful transition takes place.

effect of this blocking of justice has on Negroes seeking to assert their constitutional rights can be easily imagined. Carl T. Rowan, Deputy Assistant Secretary of State for Public Affairs, has expressed the frustrations felt by many Americans. Rowan writes:

> When one considers the heart of the court's argument in outlawing segregated schools and then considers how little really has been done to eradicate the fundamental injustice, it becomes obvious that these token integration schemes are affronts to our concept of justice.
>
> Anyone who has lived in the South, as I have, or has even visited there for a reasonable time, has seen the great mass of Negro youngsters who are handicapped because their parents have been ill-fed, ill-clothed, ill-educated, and ill-treated. It is obvious that without the great liberating force of education, these youngsters will be also-rans in the great American game called the Pursuit of Happiness. . . .
>
> After almost nine years it seems to me that Americans should ask themselves whether we intend to retain a judicial system of undoubted integrity, or whether we are prepared to accept change only as it comes under the pressure of sit-ins and protest demonstrations — only as it flows out of violence and near anarchy. . . .
>
> But we will get no genuine movement until the leaders of our 'token integration' communities realize the price they shall have to pay, in self-esteem and civic development, for their perpetuation of an injustice and sham.[49]

[49] Carl T. Rowan, "The Travesty of Integration: Halfhearted Compliance Frustrates the Law of the Land," *Saturday Evening Post*, January 19, 1963, pp. 6, 8.

# Fears Associated with School Integration

Objections to school integration are fundamentally based on emotion, conditioned in large measure by living in racially segregated communities. Yet, these emotions are, from time to time, backed by "reasons" founded on beliefs of what will happen if schools desegregate. While one does not change an emotion by questioning the accuracy of the beliefs asserted in support of it, factual data can weaken the arguments or can, at least, make them shift to other grounds. And, it is to be noted, that the constitutional rights of Americans do not depend on what people think may happen if situations denying those rights are changed. The courts have not allowed unconstitutional practices to continue, no matter how long they have been followed or how much people fear changing them. At the same time it might be helpful to point out fallacies in the assumptions of those who fear the desegregation of schools. We shall look at fallacies in two of those assumptions.

*Academic Standards*

One has to do with the effect on academic standards and on the performance of white students in integrated schools. Dire consequences have been predicted for the quality of education under desegregation. However, there is no factual support for this prediction. One source of direct challenge comes from superintendents of school systems in which desegregation has taken place. These superintendents have consistently testified that academic standards have not suffered following desegregation, and some have said that they have actually improved. For example, in March 1959, the U. S. Commission on Civil Rights held a conference on education in Nashville, Tennessee. Of the twelve administrators who dealt with the question of the effect of desegregation on academic standards in their school systems not one said that the standards had been lowered or the progress of students harmed.[50] Let us look at the testimony from this conference both from a superintendent whose system had had very little integration and from one where extensive integration had taken place. Mr. W. H. Oliver, Superintendent of the Nashville schools, which at that time had desegregated only its first two grades, stated, ". . . I haven't noticed any effect one way or another on the educational success of the children, either white or colored, where they are together."[51] Dr. John H. Fischer, Superintendent of the Baltimore, Maryland public schools in which 57% of the pupils were attending integrated schools at the time, testified:

> We are frequently asked what effect integration has had upon academic standards. The answer is that academic standards are not changed in any school merely by the presence of a second race. The requirements for an honor's diploma or for a passing grade on an examination are not altered by integration. The tests of successful performance in courses in the skilled

[50] U. S. Commission on Civil Rights, *Conference on Education, Nashville, Tennessee, March 1959* (Washington, D. C.: U. S. Government Printing Office, 1959). [Summarized in *Desegregation and Academic Achievement*, Report No. L-17, March 14, 1960, Southern Regional Council.]

[51] *Ibid.*, p. 92.

> trades are the same whether the trade is being learned by a white boy or a colored boy. A child's standing on a nationally standardized reading test is determined not by his race but by his ability and background. . . . There is no doubt at all that Negro children are receiving better educational opportunities in Baltimore now than they did under segregation. The opportunities of white children have been in no way diminished. Indeed, they have been increased, not as a result of desegregation, but by our general effort to improve our offerings for all children over the past 5 years.[52]

Besides testimony of those best in a position to observe the effect of racial integration on academic study, there are statistical reports on academic achievement under desegregation. Again, we find general consensus that integration has not lowered the academic achievement of either white or Negro students. As examples, let us see the reports on a system with little integration and ones with a high amount of integration. In the Austin (Texas) Independent School District, Negroes composed fewer than 7% of the pupils in the two ninth grades compared in Table 5. It can be seen that no significant changes occurred in the median scores on reading and arithmetic achievement tests following integration.

In Louisville achievement tests were given to pupils in the second, sixth, and eighth grades for the year prior to integration (1955-56), and the results of these tests were compared with those given in the same grades the year following integration (1957-58), when 78.2% of all pupils were in integrated schools. Even with such rapid integration, it was found that academic standards were not hurt; indeed, substantial gains were shown in scholastic achieve-

TABLE 5

[52] *Ibid.*, p. 149.

ment, with Negroes making greater gains than whites. The following is a conclusion of the study:

> Perhaps the safest generalization that can be drawn from the study is that for the period of time considered, integration need not adversely affect the scholastic achievement of white pupils and it can favorably affect that of the Negro pupil. The study, therefore, offers re-assurance to those who fear that the immediate effect of integration must automatically lower the level of achievement.[53]

A follow-up study of achievement in the third year of integration in the Louisville schools (1959-60), when the percentage of children in integrated schools had risen to 85.6 per cent, reached the following conclusion:

> At the end of the three-year period following integration results were even more encouraging. Louisville pupils at the third, fourth and fifth grade levels were exactly on the national norms. At the 6th grade level they were 2 months ahead of the national norms. While the eighth grade pupils were still behind national norms the figures show that progress was being made."[54]

A comparison of median achievements in the Washington, D. C. schools made during the second year of integration (1955-56) with those made during the fifth year of integration (1958-59) shows that a gain was made in every subject tested at every grade level where the tests were given.[55] Furthermore, academic achievement rose at the same time as the proportion of Negro students rapidly increased in the nation's capital. Not only were the median scores increased, but the test scores of the honors group and college preparatory group were increased as well. The study comments: "This clarifies two points: Integration has not retarded the advancement of high ability students, Negro or white, and educational standards in the District public schools when examined in relation to students' preparation and ability for learning, are high."[56]

It is safe, therefore, to conclude that academic achievement levels need not be lowered when schools are integrated. Testimony of school superintendents and comparisons of test scores before and after desegregation reveal that integration has not had an adverse effect on the average achievement of white or Negro pupils, nor has it had an adverse effect on the achievement of the most gifted of either race.

### *Social Adjustment*

Another type of fear has to do with the social adjustment of pupils in integrated schools. Concern has been expressed that Negroes and whites will be unable to get along in the same school, that the strains of integrated schooling will be too great for many Negro and white children, and that moral standards will be lowered by interracial contact. Again, we find no evidence to support such fears.

[53] Frank H. Stallings, "Changes in Academic Achievement since Integration in the Louisville Public Schools," in *Second Annual Conference on Education, Gatlinburg, Tennessee*, March 1960, by the U. S. Commission on Civil Rights (Washington, D. C.: U. S. Government Printing Office, 1960), p. 149.
[54] *Ibid.*, p. 150.
[55] Hansen, *op. cit.*, p. 21.
[56] *Idem.*

That there have been problems of adjustment to integrated schooling by white and Negro pupils is not denied. The change in a segregated system practiced for such a long time, particularly when parental reactions are carried over into their children, cannot help but make for strain. But there is clear evidence that school children have been able to accommodate themselves to the new situation.

The conduct of extracurricular school activities within integrated schools has been reported on from time to time by school officials. These reports have revealed little basis for belief that integration necessarily disrupts these activities. While different schools have handled these activities differently, the following statement in 1959 by Dr. John H. Fischer, who was then the Superintendent of Baltimore public schools, shows how an adjustment by an interracial student body can be made in a city which has most of its children in integrated schools. Dr. Fischer has stated, in regard to school activities:

> In our senior high schools Negro students now participate in all sports. Although in the early years there was some apprehension about the advisability of interracial competition, particularly in contact sports, the problem no longer causes any concern. . . . All our traditional social activities have continued in the newly integrated schools just as they were carried on prior to 1954. The conduct of the boys and girls usually reflects the pattern of the community as a whole. Students dance with their own dates or with the members of the small parties in which they come to the dances. This means that boys and girls ordinarily associate socially with others of their own race.
>
> In school clubs and other similar activities racial differences create no problems. In voluntary activities outside the school, their is relatively little integration. Most children choose their personal friends from among members of their own race, as is true in the community generally, not many close friendships involving home visiting are formed across racial lines.[57]

In his five-year report on desegregation in the Washington, D. C. Schools, Dr. Carl F. Hansen, Superintendent, reveals an actual decrease in the juvenile delinquency rate for the District. He cites the District of Columbia Commissioners' 1959 report on the state of the nation's capital to the Congress of the United States which gives the following delinquency rates for children 5 to 17: "For non-white children a decline from 37.1 cases per thousand in 1954 to 21.2 cases in 1958. For white children, 15.3 cases per thousand in 1954, to 15.2 cases in 1958." The Superintendent adds, "The schools do not claim credit for this development. But one conclusion is clear: Desegregation has not resulted in an increase in the rate of juvenile delinquency."[58]

Problems of adjustment are involved when segregated schools become integrated, and one would be naive to think otherwise. However, we have illustrated that these problems can be met without undue disruption. The fears usually expressed by those opposed to integration have been found to be unwarranted.

[58] Hansen, *op. cit.*, p. 26.

# Racism: The Heart of the Problem

Underlying the fears of integration and the consequent attempt to keep it at token levels are attitudes and beliefs that can be designated as "racism." Racism revolves around the conviction that a person's race is a very important, if not the most important, thing about him. A person is, first of all, a member of a race, and only after this categorization is made clear does he become a separate and unique individual. Furthermore, this categorization by race becomes the basis for differential treatment, for a part of racism is the belief in the inferiority of some races and the superiority of others.[59] Racism is the cornerstone of compulsory racial segregation—its rationale and its justification. And racial segregation, in turn, nourishes and promotes racism, for it provides the conditions for unequal treatment and educates that racial differentiation is of paramount importance.

Those who are convinced of the fundamental importance of a person's race as a determinant of his character, intelligence, and behavior may well be sincere in their belief and consequent support of the pattern of forced segregation. But sincerity is not necessarily related to accuracy, and the beliefs that make up racism are not supported by scientific investigation of race.

Scientists agree that all members of mankind belong to the same species. There is less agreement, however, on many races or divisions the species is composed of, although many recognize three major ones. Granted that biological designations of race are possible, although difficult, the question follows as to whether the genes which determine racial characteristics (color of skin, form of hair, shape of nose, etc.) determine anything else about the person or are invariably found in combination with other genes that do. In the opinion of the great majority of scientists there is no conclusive evidence to suggest that behavior, character, or the capacity to learn have anything to do with race directly. Among the statements and conclusions by scientists on race differences, we shall cite only two.[60] One group of 14 internationally known geneticists and physical anthropologists from six nations has drafted a statement saying that their studies provide no basis for assuming that intellectual, emotional, and cultural differences among men are a function of race.[61] In part, their statement reads: "Available scientific knowledge provides no basis for believing that the groups of mankind differ in their innate capacity for intellectual and emotional development. . . . Vast social changes have occurred that have not been connected in any way with changes in racial type. Historical and sociological studies thus support the view that

[59] There are Negro racist groups in America, just as there are white. Of course these groups differ as to which race is considered inferior. For the white supremacists it is the Negro; for the black supremacists (e.g., the Black Muslims) it is the white.

[60] Other summaries and reference can be found in: "Intelligence of the American Negro," *Research Reports*, Vol. 3, November 1956 (published by the Anti-Defamation League of B'nai B'rith); R. M. Dreger and K. S. Miller, "Comparative Psychological Studies of Negroes and Whites in the United States," *Psychological Bulletin*, 57 (1960), pp. 361-402; any reliable anthropological text, e.g., Ralph Beals and Harry Hoijer, *An Introduction to Anthropology*, Second Edition, (New York: Macmillan, 1959).

[61] *Unesco, Race and Science* (New York: Columbia University Press, 1961), pp. 502-506.

genetic differences are of little significance in determining the social and cultural differences between different groups of men."[62]

The Council of the American Anthropological Association, composed of 192 Fellows of the Association, unanimously adopted the following resolution in November 1961:

> The American Anthropological Association repudiates statements now appearing in the United States that Negroes are biologically and in innate mental ability inferior to whites, and reaffirms the fact that there is no scientifically established evidence to justify the exclusion of any race from the rights guaranteed by the Constitution of the United States. The basic principles of equality of opportunity and equality before the law are compatible with all that is known about human biology. All races possess the abilities needed to participate fully in the democratic way of life and in modern technological civilization.[63]

The statements of the scientists cited above do not imply that races are "equal" in innate ability, for such a view would mean that race, *per se,* in some way determines the "equality" The implication is that race, as such, is not relevant to innate capacities of the individual for the development of character and intelligence. Likewise, these statements do not mean that those adhering to them are "environmentalists," as is sometimes charged. Anthropologists, genetists, and others who are students of race recognize, of course, the fundamental role of heredity in behavior. The point is that there is no basis for believing that race itself determines inheritance beyond those physical characteristics that themselves are used to categorize races.

Racists admit that wide range of difference appear among members of the same race and that members of both the Negro and white races fall into the highest and lowest percentiles in achievement and ability tests But the racists claim that a member of a race must be judged by the "average" of the race to which he has been assigned, again reflecting belief in the all-important place of race. Such a claim does not make sense to the person following the views of the scientists quoted above, namely that one's race does not determine innate capacities to learn and to act. Thus, one may deal with an individual in terms of his own abilities and character and not in terms of an abstract "average" of a category of mankind. There is no soundly supported basis for prejudging individuals, lumping them into categories, and artificially curtailing their opportunity. Americans can be treated as individuals rather than as members of races, and they can be given equal opportunity as individuals to develop their abilities, without fear of any consequences known to science.

# Toward True Democracy in Public Schools

The democratic ideal of the worth of the individual cannot be realized while racism is nourished and enforced through compulsory segregation, in outright form or through token integration. Since racism is an emotionally conditioned set of attitudes and beliefs, it is difficult to challenge through scientific findings that question its logic. A necessary condition for overcoming it to any great extent is to eliminate the pattern of compulsory segregation itself.

The Supreme Court, in support of its 1954 ruling, stated that to separate Negro children in grade and high schools from others of similar age because of race alone ". . . generates a feeling of inferiority as to their status in the community that may affect their hearts and minds in a way unlikely ever to be undone." It might be added that such separation also affects white children by making it difficult for them to accept Negro children as persons like themselves. Token integration perpetuates separation of the great majority of white and Negro children so that they have difficulty in getting to know each other as persons. Yet, experience with genuine desegregation in public schools where children are treated as children (not as Negro or white children) shows that one need not be afraid of implementing the democratic ideal. Again, we refer to Dr. Fischer's report on the outcome of desegregation in the Baltimore public schools as an indication of what can happen:

> In general, our experience in Baltimore has demonstrated conclusively that children of both races can attend school together, can learn together, and can develop positive, friendly, effective relationships.
>
> We have found that children can be taught quite well by teachers who are not members of their own race. Teaching competence is not related to race, but to the teacher's personality, his own education and cultural background, and his ability to understand young people.
>
> We have learned that, after a period of adjustment to an unaccustomed situation, children, teachers, and parents have found that having representatives of both races in the student body and in the faculty in no way diminishes the effectiveness of the school.
>
> We believe that our experience supports the generalization that school integration can be successful if the policies and procedures by which it is carried forward are simple, firm, fair, flexible, clearly stated, consistently applied.
>
> After five years, it appears that no small part of the success of the effort in Baltimore was due to the determination of the school board to move promptly and to act, as the board once said, 'without fear and without subterfuge'.[64]

Token integration operates on the bases of fear and subterfuge, fear of integration itself and subterfuge in complying with the Supreme Court directive. While difficult problems can arise as communities change a bi-racial

[64] U. S. Commission on Civil Rights, *Conference on Education, Nashville, Tennessee, March 1959*, p. 150.

school system into a non-racial one, compliant states have demonstrated that this change can be made creatively and successfully. On the other hand, to act in fear and duplicity leads to clashes with the federal courts, disruption of schools, encouragement of prejudiced reactions, and the waste of energy, talent, and money. Communities can proceed to develop a single school system in which race is not a criterion of assignment with confidence that both education and democracy will be strengthened by such a move.

## SPECIALIZED SERVICES TO INDIVIDUALS AND FAMILIES

Mobilization for Youth

One of our major guidelines to action entails intervention to arrest self-defeating modes of adaptation. The program of specialized services to individuals and families has been designed to achieve that end. Our proposal calls for the provision of social casework services of the highest quality to people who are enmeshed in self-defeating adaptations. It is an attempt to extend and to expand the programs of personal service pioneered by local casework agencies and the settlements in the area.

There are a variety of reasons that a program to modify self-defeating adaptations among low-income people should be based upon social casework services. Principal among these is the fact that the field of social casework has, since its inception, directed attention to the relationship between people and their social environment. It has insisted that the origin of many social categories of human problems cannot simply be attributed to defects in the social environment or to defects in individual patterns of response to the social environment; many of these problems must be understood as the product of <u>both</u> sets of influences. Accordingly, social casework has constructed a helping strategy which takes account of these interacting influences. It has emphasized that the helping relationship must consist of two analytically distinct but otherwise inseparable elements: the controlled use of worker-client interaction as a way of understanding and dealing with the client's pattern of response, and the controlled use of concrete social services as a way of reorganizing the client's social circumstances. Indeed, the fundamental contribution of social casework has been to demonstrate that the helping relationship achieves maximal effectiveness when it combines <u>in a single process</u> devices to remedy defects in both the patterns of response and

the social circumstances of people. The uniqueness of social casework stems primarily from its success in generating a technology which blends these two elements.

The importance of approaching the problem of self-defeating adaptations among low-income people with such a strategy cannot be overemphasized. A breakdown in the relationship between people and their social environment may result from the absence of adequate environmental resources, from inadequate modes of responding to the environment, or, most commonly, from a combination of these factors. To remedy defects in the social environment by providing concrete social services may be enough in some instances to produce a more adequate level of functioning; to remedy defects in the way in which people respond to and make use of their environment may be enough in other instances to produce better functioning. In some cases, however, low-income people will require assistance of both kinds.

The remedies for self-defeating responses which can be offered through social casework services are as many and varied as the roots of those responses. Some of these may be noted as follows:

First, some people may engage in self-defeating adaptations simply because they do not possess <u>information</u> about the possibility of behaving in an alternate way. There are services in the community, for example, about which many people know nothing. Furthermore, certain administrative arrangements prevent the development of a sense of community integrity and also thwart residents' efforts to understand and gain access to these services. Thus city departments which perform many basic services define widely variant boundaries. For example, the Department of Welfare unit which includes the project area

also includes the rest of lower Manhattan; two school districts serve the project area and include other areas as well. A service that simply provides people with information on where help of various kinds can be found may thus open to them the possibility of making a different adjustment to life circumstances.

Second, self-defeating patterns often develop and persist because people lack the simple skills necessary for making an alternative adjustment. For example, in lower-income families a variety of financial problems arise which are related to inadequate skills in budgeting, purchasing, and the like. If these skills can be acquired through informal education services (e.g., home-economics programs), more satisfactory adjustments can be made.

Third, self-defeating modes of adjustment sometimes result because people do not have access to persons who possess the power to change circumstances that prevent them from behaving otherwise. What is needed is the help of persons who can intervene in their behalf with, for example, representatives of powerful and centralized bureaucratic systems (e.g., employers, schools, law-enforcement agencies, housing administrators, departments of public welfare, etc.).

Fourth, self-defeating adaptations often develop because people lack what we shall call enabling social resources. A mother cannot maintain contact with her child's school and interest in his progress if there is no money to pay for the care of smaller children while she visits the school. What may pass for a lack of interest in important out-of-home activities may thus be in part a consequence of overwhelming burdens and responsibilities in the home which leave parents with neither time nor energy to invest elsewhere.

A service program which is organized to provide strategic enabling social resources will go a long way toward arresting self-defeating adaptations.

Finally, self-defeating patterns frequently result from emotional or psychological disturbances. Indeed, considering the deprivations which many people in urban slums are forced to endure, it is remarkable that so many manage to maintain an adequate level of mental health. In work with the low-income person, therefore, it is especially important to realize the fact that efforts to reorganize the individual's personality system are useless if the environmental system of which he is a part continues to evoke from him the same debilitating psychological responses. In general, therefore, efforts to involve the individual in therapeutic processes must be preceded or accompanied by attempts to improve his social conditions.

Our proposed program, while based on traditional patterns of social casework service, will have two special emphases. These may be identified as follows:

In work with families from extremely deprived economic groups, concrete social services will be strongly emphasized. There are a number of reasons for this emphasis. Groups cannot be helped if they cannot be reached. It is generally conceded that lower-class persons are drawn to agencies which have concrete services to offer. Their social and economic problems are both concrete and overwhelming, and they are quite naturally in search of equally concrete ways of solving these problems. For another thing, they tend to define these problems as the consequence of external, arbitrary, capricious, and malevolent forces. One detects in these groups powerful if subtle emphases upon fate, upon the evil and immutable nature of man, upon man as the victim of superordinate natural and social forces. For these and other reasons,

members of these groups regard as alien and impractical the notion that a person in trouble can improve his circumstances through a better understanding of himself and the way in which he contributes to creating his own problems. Furthermore, the personality attributes and skills required to implement such a definition -- introspection, insight, verbal facility, and the conduct of formalized, professional relationships -- are, for the most part, not valued or possessed by lower-class groups; they are more likely to be associated with middle-class socialization. To reach these groups, then, concrete services are essential.

A further reason for our emphasis upon concrete services is our conviction that such services, if imaginatively employed in the context of a case-work relationship, can be a powerful force for change in human behavior. For one thing, services which relieve environmental pressures may thus release blocked energies for investment in areas of family and occupational activity which were previously neglected. Strains between parents and children, for example, can often be relieved by overcoming superficially unrelated problems in the areas of health, income-maintenance, and the like. Secondly, some persons who experience overwhelming environmental pressures may become capable of making use of specialized therapeutic relationships once the external pressures are reduced. Although we believe that many low-income persons cannot benefit greatly from traditional therapeutic services, some do possess the values and skills that are required for success in such relationships. For these persons, the relief of environmental pressures can be the crucial first step in making a therapeutic service inviting and effective.[1]

---

1. Although extensive studies have been conducted by Community Research Associates, they report that "little is known about treatment goals and methods suitable to this (unsocial) family's particular problems...." It has been argued -- in our opinion, with some justification -- that traditional treatment agencies have not been willing to invest the time or resources necessary to provide intensive psychological help to low-income families. See Alice L. Voiland and Bradley Buell, "A Classification of Disordered Family Types," Social Work, Vol. 6, No. 4 (Oct. 1961), pp. 10-11.

Finally, and most significantly, we believe that much is yet to be learned about the way in which changes in human behavior can be forcefully induced by deliberately reordering the social environment of the individual. What we wish to stress is the reconstruction of the individual's social conditions through a casework process so that he then experiences new pressures which exert a direct influence on him for change in a preconceived direction. We assume that significant problem-solving and social and psychological growth take place as one becomes enmeshed in and is forced to grapple with changed social circumstances. Such an approach is particularly appropriate in dealing with large segments of the lower class, given their distinctive economic circumstances, cultural characteristics, and reluctance to become engaged in direct psychological activities. We suggest, in short, a strategy of social casework which employs social services and community resources generally as instruments of positive social and psychological change.

To refine and extend this traditional emphasis in social casework calls for professional activity of the highest quality. What is required is careful assessment of the client's difficulties and appraisal of the kinds of social structure in which he ought to participate if changes are to take place. The question we must answer is: What types of person can be expected to be influenced in what ways by what types of program? The task is to make a differential diagnosis of the client's difficulties, to classify the influences which will be exerted by one or another program, and to bring the two together in a meaningful fashion. Such an approach -- stressing the possibilities of altering behavior and personality through the imaginative reconstruction of social circumstances buttressed by appropriate supportive casework relationships will, we believe, yield greater rewards in work with many low-income people.

We have spoken thus far of the need for emphasis on concrete services in working with low-income clientele. We wish also to emphasize the need to structure the service system itself in such a way as to maximize its congeniality to the group whom it is intended to engage.

All that we have said thus far leads us to deplore the unfortunate but nevertheless widespread tendency to separate agencies which provide primarily social services from those which provide service primarily through professional relationships. This split is exemplified, for example, in the division between government agencies which disburse funds for income maintenance and private agencies which make professional relationships available. The failure to integrate these two components of the helping relationship and thus to make them mutually reinforcing may be a significant impediment to the provision of effective aid. Our proposals stress the integration of these services in the same system.

A plan of services for low-income people must also take into account the bewildering consequences which ensue if these services are mediated through huge, centralized agency systems. For reasons arising from differences in socialization and life experiences, lower-class people are less skilled in dealing with and using the services of such systems than are their middle-class counterparts. In particular, they are less able to manage bureaucratic inequities when they arise; since low-income people require the concrete services of these systems for sheer survival, the inability to redress grievances effectively can be an important source of frustration, a sense of impotence, and self-defeating behavior. To engage people effectively, we submit, services must be informally organized. This requirement arises in part from the person-oriented character of low-income socialization, as distinct from the task- or

function- or rule-orientations which are major components of socialization elsewhere in the social structure. Furthermore, we submit that services must be decentralized, for "the people who need you most need you near."[2] Although the costs of such a plan may superficially appear greater, the effectiveness of services will be disproportionately increased by such a strategy.

Thirdly, the increased use of sociocultural knowledge in approaches to these groups is important. Such knowledge is crucial whatever the clientele to be served, but it assumes particular importance in work with low-income groups. For one thing, the general life conditions of lower-class people tend to produce ways of life -- modes of family structure, sex-role differentiation, values, language forms, ways of relating to one another, etc. -- which differ significantly from the more familiar and widely diffused patterns of middle-class life. For another thing, the ethnic heterogeneity of our society is especially pronounced in the lower class. No program of services which fails to identify these variant sociocultural patterns of life and their psychological concomitants can hope to involve the people whom it seeks to help. To help them, by whatever method, we must construct a strategy of service which grows out of their patterned ways of understanding, perceiving, and grappling with reality. A not inconsiderable literature now exists which describes the life-styles of low-income groups of various ethnic, nationality, and racial origins. What is needed is systematic use of these materials in both the revision of diagnostic classifications and the modification of service strategies.

---

2. Helen Hall, as quoted in Neighborhood Goals in a Rapidly Changing World, New York: National Federation of Settlements and Neighborhood Centers, 1958, p. 13.

## Neighborhood Service Centers

The principal means of providing specialized services to individuals and families will be the establishment of four Service Centers, or "helping stations," throughout the project area. These Centers will be informally organized and will offer a wide range of services, both practical and technical.

### Objectives

The Neighborhood Service Centers will attempt to arrest self-defeating modes of adaptation by helping adults to deal with the complexities of, and acquire competence in, urban social life; encouraging the non-deviant adaptations of children and youth who have shown signs of incipient deviant behavior or have committed delinquent acts; and easing the dislocating aspects of migration into the community. The Centers will, furthermore, provide training for students of social work and other helping professions. To meet these objectives, the intermediate goals of the Centers will be:

1. To provide information about a wide range of community recources -- from the school system to the subway system.

2. To teach skills in such matters as budget management, purchasing, home management, and child care.

3. To act as intermediaries in dealings with bureaucratized services and inequities.

4. To establish closer connections between area, district, and city-wide resources; to ensure the coordination of Mobilization-sponsored and other institutional services which affect a particular child or family.

5. To offer such direct services as nurses, baby sitters, homemakers, and escorts, in order that the burdens of lower-income living may be eased

and educational, vocational, medical, and other community services may be used more fully.

6. To offer enabling social resources with professional sensitivity and psychological insight -- so that they may be most effectively used.

7. To offer immediate help in time of trouble or emotional distress -- i.e., "emergency psychological first aid."

8. To make available intensive diagnosis and treatment services to selected low-income persons.

Services

The Neighborhood Centers will provide an inquiry service, a liaison-resources service, "under-the-roof" services, social planning, referral, and reintegration services.

Inquiry service: This service is designed to provide immediate practical information in response to inquiries about housing, education, public welfare, legal problems, consumer problems, and the like. People who speak a foreign language and who are interested in service careers will be sought as case aides. A professional caseworker will train and supervise these aides. Staff will be acquainted with community resources and procedures for gaining access to them and will thus be prepared to answer questions. The service will have on hand city maps, guidebooks, application forms for public housing, and the like. Where available material is too complex, simplified booklets, particularly of a visual nature, or Spanish translations of existing literature will be prepared. Staff will make introductions (by telephone or letter) in behalf of the client and will accompany the client to clinic, court, or community center, as required (e.g., when he is particularly wary or, as in

the case of immigrants, unfamiliar with the city and the intricacies of its various bureaucratic structures).

Applicants, particularly youth and parents inquiring about youth, will not be required to give their names upon first contact.[3] It is assumed, of course, that the inquiry service will provide entry to the other services offered. For example, a person who is having "trouble" with his welfare investigator, who has waited "too long" for response to his public-housing application, or whose landlord will not heat his flat may be referred by the case aide to the liaison-resources service (see below). When there is confusion about a request, obvious anxiety on the part of the client, or dissatisfaction regarding the information or proposed solution, a caseworker will handle the contact and either resolve the problem or offer the client other services of the Center.

It is likely that persons needing emergency help with emotional problems will also use the information service. For example, a mother desiring that her youngster be "put away" may inquire about immediate commitment. In such instances, significant help will be provided by the high level of casework personnel available at the Center.

---

3. A delinquency-prevention proposal quotes one human-relations expert as follows: "You have little idea what an attraction it would be -- as an introduction to sincerity on your part -- to offer to advise without asking name, address, mother's nationality, place of birth of grandfather, etc. The burden of making the inverview work, of getting the person to return again and of finally getting the data you need several interviews later should be on the shoulders of the worker... who interviews the person -- not on the shoulders of the person coming in.... An agency that was willing to make contact -- the first time -- by saying you need not give your name or particulars would be half way there before it ever began." A Proposal for a Community-Centered Demonstration and Research Project Aimed at the Control of Maladaptive Behavior among Juveniles: Research Center for Human Relations, New York University, Jan. 1957.

Liaison-resources service: A liaison-resources service will be established, composed of representatives of various municipal departments (Housing and Building, Welfare, Health, etc.) as well as employment services. In addition, explorations will be made with the Legal Aid Society for the provision of legal services, and caseworkers will be assigned on a full-time basis for liaison work with the courts. The liaison personnel will be of sufficient status in their respective agencies to function effectively as intermediaries, handling bottlenecks and red tape and carrying forward the resolution of problems brought to their attention. As intermediaries, they will explain the function of their agencies to complainants as well as redress justified grievances.

A team of liaison personnel will appear in each Neighborhood Center on a different day and will also be available to any Center in case of emergency. The rotation of the liaison team will permit attention to diverse needs and problems which overlap functional areas. The strain of dealing with many offices in connection with a single problem often results in frustration for those who need help. The integration of many services in one team can have the psychological effect of stimulating clients' efforts in their own behalf.

The administrator of the Neighborhood Services Center project will be responsible for working with liaison personnel. He will need a working knowledge of the various agencies and access to higher-echelon personnel in them. He will encourage staff to develop respect and understanding of ethnic minorities and newcomers and will interpret to them the way in which their agencies are perceived by disadvantaged persons. (It is hoped that this interaction in part will change the response of the welfare worker to the

client. This, in turn, ought to influence positively the client's perception of the welfare worker's role.)

It is anticipated that liaison-resources services may ultimately be expanded to include full agency units. For example, a Department of Welfare unit of five workers might be requested to assist specific families on Welfare whose children have shown educational difficulties which appear to be home-related. Particular attention might be provided to such matters as medical care, tutorial aides, nutritional needs, and liberalized youth allowances.

"Under-the-roof" services: Enabling social resources, we have noted, are often of central importance in relieving environmental pressures and making it possible for deprived and overburdened people to make a better social and psychological adjustment. "Under-the-roof" services will seek to organize and provide these resources.

A Social Caseworker will be responsible for making assignments, basing the selection upon the validity of the need itself, with no requirement for continuing casework relationship. Casework help will be necessary, however, to determine whether the service is most suitable for the family, to help parents and children make best use of the service, and to assist with problems emerging from the use of the service. In addition, the social caseworker will train and supervise personnel.

A Public Health Nurse will visit the homebound, make appropriate medical referrals, follow up on appointments, and confer with other Center staff on the health problems of clients. The location of a nurse in each Center will help her to collaborate effectively with caseworkers and will make possible

an immediate, uncumbersome referral system.

A Visiting Homemaker (see below) will offer assistance to new migrant families who need help in becoming adjusted to urban life. Homemakers will receive in-service training and then will be assigned to homes in their immediate area. Conceived of as an "amicus familiae," neither a professional homemaker nor a domestic but simply a more experienced, kindly neighbor, the homemaker will help with the daily chores of shopping, meal preparation, sewing, etc. In addition, she will share neighborhood "know how," give general advice, and encourage the use of community resources.

Escorts and Baby-sitters will be members of the Urban Youth Service Corps. In pre-service instruction, youngsters will be familiarized with community resources and taught how to assist a client in making an application or arriving at an appropriate office. With baby-sitters, child behavior and what to do in case of emergency will be discussed.

Social-planning service: This service will integrate the other services offered by the Centers. It will be offered initially for a limited number of clients on an exploratory basis. The social-planning service will be responsible for identifying and diagnosing problems of especially troubled families, developing a social plan, implementing and following through the plan, and deciding when to terminate services.

The service must determine to what degree "problem" behavior stems from emotional disturbance, socio-cultural factors, or situational frustration. In current practice, socio-cultural material is used essentially to amend psychological schema. For example, a hospitalized Jewish male who demands a great deal of attention from his nurses is less likely to be termed passive-dependent than a man of "old American" stock who reacts similarly, since such

behavior during illness is sanctioned by Jewish culture. Diagnosis must in addition give appropriate weight to the psychological and social determinants of problems. Is the person a victim of a bad reality situation? Or is he responsible for the problem although the reality situation itself is bad?[4] Diagnosis must also assess the amenability of the social situation to casework intervention, in addition to the client's accessibility to help. Perhaps the client is too often viewed as the exclusive target for change attempts. If a set of housing policies, for example, triggers aberrant behavior, the behavior often becomes the exclusive object of intervention efforts, rather than the policies themselves.

Treatment of problems which are primarily social in nature must provide social opportunities, just as psychological treatment offers a restorative relationship. Many lower-income clients must be convinced that the objective reality warrants their abandonment of self-defeating behavior. If, for example, ethnic or racial discrimination makes it impossible to improve the social situation, alienation must not be augmented by deprecating client dissatisfaction or encouraging concentration upon "inner" problems.

Wherever possible, intake and sustained service of the social-planning unit ought to be the responsibility of the same worker. Differential diagnoses will, of course, lead to a specific plan for each individual or family, to be developed with the family. Teacher, guidance counselor, settlement worker, public-health nurse, homemaker, welfare worker, psychiatrist will then be called upon as required. The caseworker, viewed here as a "general practitioner," will coordinate the effort.

---

4. Lillian Ripple and Ernestina Alexander, "Motivation, Capacity, and Opportunity as Related to Casework Services," Social Service Review, Vol. 30, No. 1 (March 1956), pp. 38-54

One worker should be responsible for seeing that the plan is carried out. It has been reported that 50 percent of the clients who were referred to a second department within the same agency did not make the transfer.[5] Making a single worker accountable for implementing the social plan ensures that such persons will be worked with until transfer is effected or the plan changed.[6]

Referral service: The social-planning service will refer clients who require protracted diagnostic or treatment effort to appropriate local agencies -- for example, the mental-hygiene clinics of Henry Street and University Settlements. A service unit will be established in each clinic, which will have two major objectives: (1) to test classical casework treatment services with lower-class clients and (2) to experiment with newer casework methods, such as family-centered treatment. The Mobilization Chief of Individual Services will work closely with these contracted units in order to ensure their experimental nature, as well as their coordination with the Neighborhood Service Centers. Close coordination with other existent casework services within the community will, of course, also be necessary.

Social-reintegration service: To help newly released offenders to locate needed social resources and increase their capacity to exploit these resources, an experimental unit of trained parole officers will operate in the Service Centers. The reintegration experiment is described later in this

6. "A basic deficiency in community programs appears to be in responsibility and accountability. This lack is a central one and transcends the practices of individual agencies.... We have not yet established the principle that the child who is in trouble and who is 'found' must not be 'lost'." Alfred J. Kahn, For Children in Trouble, New York: Citizens' Committee for Children, 1957.

appendix.

Facilities and Staff

The Neighborhood Service Centers will be so situated that they will be readily accessible to the residents. They will be located either in frequently used buildings, such as settlement houses, or in tenement storefronts. If the latter, the quarters will be made highly visible as a "walk-in" service. An informal and cordial atmosphere will prevail. Newcomers will not be required to make initial appointments but will be seen on a "drop-in" basis.

The Neighborhood Services Center project will be directly administered by Mobilization's Assistant Chief of Individual Services, a caseworker with a community-organization and administration background. In addition to the requisite training and experience, he will need to be an innovating person, congenial to the testing of new methodology and organization of services. He will be responsible for the ideological and professional direction of the program, will work directly with the liaison-resources and reintegration services, and will, with others, represent the Center with public and private agencies. Three Caseworkers with sufficient experience to supervise social-work students and others will work with two Case Aides in each of the Centers. One of the caseworkers in each Center will be responsible for the field education of units of five or six students. In addition to the liaison and other personnel resources described above (homemaker, nurse, escort, etc.), a Psychiatrist and a Sociologist, each working half time, will provide primarily consultation services. A caseworker with supervisory experience and a second trained caseworker will form the experimental service unit in each of the mental-hygiene clinics.

The various services offered by the Centers will not be established as separate units within the agencies. In line with the "general practitioner" model of the caseworker's role, casework staff will perform all the functions required of the agency. The decentralization of the program, permitting each Center to be relatively small, will lessen the need for specialization within the offered services and will permit the informal give and take that mitigates overlapping effort and prevents confusion.

Intake

Working arrangements will be established with the local community institutions to encourage referrals to the Neighborhood Service Centers. It is anticipated that teachers doing home visiting will call upon the Centers, as will guidance personnel, attendance officers, and principals. Local police will be asked to refer youngsters in trouble before carrying through discretionary police action. Court, settlement, church, and housing personnel will also be encouraged to send families to the Center.

Center staff will visit especially troubled persons referred by reliable community sources. These visits will proceed on an exploratory basis to avoid being defined as "meddling" and to determine whether the service can indeed be offered in a way which is acceptable to the individuals and families reached even when they do not request help. For some alienated families, this "reaching out" may be a necessary means to the desired solution of a problem.

Most important, it is expected that the design and location of the Centers, plus informal word of mouth, will stimulate self-referral. The close relationship of the indigenous community organizers to the Centers will further facilitate their use by persons who might otherwise shun professionalized

services. It is, in fact, these very clients whom the Centers hope most to attract. Special emphasis will also be placed upon services to families with children, particularly those between 10 and 15 years of age.

Relationship to the Community

A major facet of the Neighborhood Service Center proposal is the plan to offer coordinated social and psychological services. In addition to gathering personnel of varying expertise, this plan makes it necessary to ensure the participation of a gamut of community agencies. Many of these agencies will, of course, be involved directly through their provision of services, such as those represented in the liaison-resources unit. Others will become involved as a result of cooperative efforts with other Lower East Side agencies. Participation in the Youth Services teams of LENA will materially aid this effort.

The Centers will be closely integrated with the other programs offered by Mobilization and by the local settlements, churches, and other institutions. For example, social workers participating in the School-Community Relations course, who assist teachers in home visiting and perform guidance functions at the schools, will maintain close connection with the casework staff of the Centers. Youngsters from the Urban Youth Service Corps will supply some of the manpower needs of Centers. Community organizers working with unaffiliated lower-class groups will maintain their offices at the Centers and will thus be able to provide a ready channel of communication between the casework staff and the disadvantaged members of those groups.

The administration of the Neighborhood Service Centers will be the responsibility of Mobilization for Youth in cooperation with the Interdepartmental

Committee of Commissioners. This plan is proposed in order to ensure the integration of social services which are ordinarily offered under public auspices with professional and psychological services more often provided in the private sector. Furthermore, public involvement will encourage continued city support when the Mobilization experiment has ended.

In addition, a Neighborhood Advisory Committee will be formed. Leaders who reside in the area will be recruited, in order to maximize use of the service and community identification with it. Some of these leaders might be drawn from the indigenous influentials who are to be identified and involved in the community program of Organizing the Unaffiliated (see Appendix A-3). The Advisory Committee will not differ markedly from the boards of those voluntary agencies which do not have fund-raising functions, as, for example, in the foster-care field. Although its composition will, of course, be different, it will serve primarily a community-relations role. The Committee will publicize and interpret Center services. It will inform staff of local community perceptions of the program and advise them about meeting the needs of lower-income persons. Most important, however, it is hoped that the involvement of local community leaders in the decision-making process will increase the feeling of neighborhood people that, to some degree, the Centers are "theirs."[7]

---

7. In describing the wartime social services of the National Maritime Union, Bertha Reynolds states that consumers of services ideally should own them. She maintains that the sense of belonging lessens resistance to help. Bertha Reynolds, Social Work and Social Living, New York: Citadel Press, 1951, esp. Chaps. 2 and 3.

## Visiting Homemaker Service

In a previous era, the Visiting Nurse Service was instituted to meet the health needs of a low socioeconomic population. Today many families in congested areas similarly require the assistance of skilled personnel to negotiate the complexities of urban living.

It is anticipated that the Visiting Homemaker Service will facilitate the acculturation of newcomers to the project area and intervene in families in which self-defeating life-styles have been perpetuated for generations. It will provide a corps of practical home-service workers who will offer adults both training and direct assistance, as needed. The objectives of the service are:

1. To assist parents in achieving a more adequate home and family life by providing information about and demonstrating day-to-day routines basic to social living.

2. To relieve some of the burdens and tensions of harassed families and ease some of the dislocating aspects of immigration into the community.

3. To encourage participation in community programs, thus bringing individuals and families otherwise alienated from the community into constructive interaction with others.

The visiting homemaker will assume the role of the long-time resident who introduces the community to the newcomer. The homemaker will not be a domestic or visiting housekeeper with the sole purpose of lightening burdens temporarily, nor will she assume a superior or supervisory relation to the client because of her instructional function.

The visiting homemaker's frequent presence in the home will give her a unique picture of the family in its total interactions and its problems of child welfare, physical and mental health, etc. Because of her close, informal contact with the family in concrete, tangible matters, she will be able to elicit discussion and encourage the use of the resources and services of the Neighborhood Services Center and other community resources. Where parents and families are reluctant to take initial steps, she may gain their permission to make overtures for them. Her knowledge of the family can be of invaluable help to the caseworker.

The homemaker's services will encompass the following:

1. Protecting the health of family members by encouraging periodic medical and dental check-ups.

2. Improving the housewife's competence as a consumer; in marketing, shopping, installment buying, etc.

3. Teaching the housewife to manage her budget so as to derive maximal use of limited finances (getting value received for expenditures, learning where to obtain wanted items and what to avoid).

4. Giving assistance in organizing the home and household routines so as to provide the optimal environment in support of educational and vocational goals for youth.

5. Helping to arrange for escort services, baby sitters, etc., so that the housewife can keep health, education, welfare, and social agency appointments; attend parent-education and consumer-education meetings; and participate in community-improvement projects.

6. Giving information and encouragement to parents and youth participating in community organizations.

Problems common to all residents in the vicinity will emerge in the course of work with individual families and youth. Small groups should be formed for group-demonstration programs in home improvement. These groups might also be asked to discuss the value of visiting-homemaker services, to suggest changes, and to offer suggestions for additional services. Problems which center around such concerns as school, sanitation, street conditions, municipal departments, services, etc. will be linked closely to the community-organization aspects of the Mobilization for Youth and LENA programs.

Intake and Case Loads

Interest in the service will be stimulated by ministers, public-health nurses, home-visiting teachers, social-agency personnel, settlement-house workers, housing managers, etc. As the service establishes an image among the local population, self-referrals will increase through word-of-mouth.

Intake will be handled through the Neighborhood Service Centers. A staff member will assess the level of family living, the nature and depth of problems, and the type and extent of service required. Other needs revealed during the intake interview may call for other services or may be held for future activity. Eligibility for the Visiting Homemaker Service will not be contingent upon the acceptance of a casework plan or other stipulations. Case-work screening will distinguish between homes requiring the instruction-demon-stration type of program for improving family competences and those requiring homemaker services of a type offered by other agencies (i.e., to prevent family break-up, to place children away from home, for emergency and crisis situations in the home.)

It is assumed that one to four hours will be spent in each visit, with the frequency of visits varying from daily to monthly. As work progresses, the frequency and duration of visits to each family will diminish, permitting acceleration of the program and augmented coverage.

Recruitment and Training of Staff

Personnel will be recruited from a cultural, socioeconomic, and ethnic background similar to that of the resident population, with a high-school degree or equivalent education. To the extent possible, staff will be drawn from the Lower East Side, to permit better coverage and to draw on a greater knowledge of conditions in the area.

A one-year work-study plan will be instituted, with courses offered either in conjunction with the adult-education program at a high school or as extension courses by a college. The program of formal training will encompass the subjects of preventive family health; nutrition; family and community hygiene; organization of household tasks and routines; low-cost meal planning, preparation, and serving; fundamentals of parent-child relationships; adolescent behavior; budget management; care of appliances and household equipment; and knowledge of the resources of the community and the city.

Completion of the course will carry increases in salary. In the middle phase of the project, a municipal civil-service category might be established for such personnel. (Precedent for such a category exists for homemakers employed by the Department of Public Welfare.)

In-service training of visiting homemakers will be conducted by two professional casework supervisors. It will be designed to develop skills in offering services so that the self-esteem and competences of family members

are elevated; to increase alertness to family problems, child-welfare needs, parent-child relationships, etc., for referral to the Neighborhood Service Centers; to deepen and extend knowledge of community resources which can be useful to family members; to develop alertness to common needs and interests for which special group programs may be helpful and community action required.

Phases of Operation

This program should be instituted in the Lillian Wald and Jacob Riis Housing Projects, where housing conditions, room space, and assistance from the managerial staff in a structured setting can support experimentation. In addition to upgrading household maintenance in the housing project, it is anticipated that the presence of homemakers will aid in integrating project residents with the broader community. As experience is gained with administrative and organizational aspects of the program, the community bordering on the projects can be the next target. (This is a desirable next step, since this area is scheduled as a Neighborhood Conservation Area.) Ultimately, the program will be extended through the Mobilization area.

## The Social Reintegration of Released Juvenile Offenders

Despite the corrective experience of institutionalization, the rate of recidivism for released offenders is discouragingly high. Considering various omissions and inaccuracies, some authorities estimate recidivism in such low-income areas as the Lower East Side as 70 to 80 percent. Approximately 100 released young offenders re-enter the Mobilization area during a one-year period.

The high rate of recidivism for released offenders is often cited to discredit a rehabilitative approach in correctional institutions and to justify a reversion to purely punitive practices. We assert, to the contrary, that the poor record of success suggests a need for expansion of rehabilitative services to delinquents who have been institutionalized.

Current treatment both during and after incarceration largely ignores the role of social conditions in the post-institutional period. For the most part, aftercare has been a matter of surveillance to determine whether the ex-inmate is complying with the stipulations of his release. The approach both during and after imprisonment is based on the assumption that if an inmate is properly motivated he will succeed. The situation contains a bitter paradox, however: to the extent that the correctional institution is able to induce an inmate to strive for success, it may increase the likelihood that he will recidivate, for few legitimate resources are open to the released offender. There is no question that appropriate motivation and psychological capacity are essential to conformity. Nor is it fair to assert that current institutions fail to instill motivation. In fact, our evidence on adolescent inmates suggests that most of them want to "make good" when they are released.

The social deprivations of a released offender are the result of a negative social and, in turn, self-image. His handicaps are intensifications of the invidious definitions attached to all lower-status slum youth. The ceremonial degradations which accompany institutionalization stigmatize the young inmate. His public identity becomes that of delinquent or social incompetent. Positive institutional response and early release do not mitigate this reputation. The pejorative public image accompanies him into conventional society

and serves as a formidable barrier to conformity. The stigma attached to ex-inmates sometimes causes persons who control access to social resources (employment, education) to look upon him with suspicion and mistrust. These persons in effect may bar his efforts to adjust by withholding the social, educational, and vocational opportunities requisite for positive adjustment.

The ceremonial degradation and public censure affect the attitudes of the offender's parents or legal guardians, who fear that he will repeat his violations and once again expose them to shame. In order to protect themselves from further humiliation, they may resort to rather extreme defenses. They may proscribe him or "let him go his own way"; they may become overly restrictive and demanding, thereby denying him any role in stabilizing himself. In either case, they communicate to the youngster their lack of confidence in him.

Parents of peers may also complicate his readjustment. They may exert pressure on their offspring, particularly daughters, to avoid him. He is prohibited from dating "nice girls" and from going to parties with the "good kids." He is thus prevented from establishing meaningful relationships with those contemporaries who could buttress his motivation for conformity.

The reaction of employers to ex-inmates, whether adult or juvenile, is well documented. Most of them consider the group an inordinate risk, undependable and unreliable. As a consequence, the released offender may be refused employment or peremptorily dismissed, regardless of performance, once his institutional record is discovered. Even when he does get work, he often experiences handicaps not imposed on other workers, for surveillance is more exacting and chances for advancement are less likely.

The impact of the bad reputation is also bitterly experienced in school. In low-income areas, where schools face a control problem anyway, personnel may be particularly wary of taking on released offenders. They recognize that ex-inmates may be unmanageable and spark disturbances.

The destructive impact of the invidious definition derives not only from others' responses but from the offender's own response to degradation as well. Although he hopes not to be stigmatized, he nonetheless anticipates that "some people will look down on you because you've been up here." He is unable to specify just who those people are, but he knows that they exist. Consequently he tends to be suspicious of others' reactions to him. An employer's normal criticism for defective work or a school teacher's rebuke for noisy behavior in class is interpreted as proof of rejection. Thus society's definition of the ex-inmate often contributes to his self-defeating behavior and his inability to exploit the few opportunities that do turn up.

## The Program

Our program for the reintegration of offenders will have a three-dimensional approach in contrast to the primarily motivational emphasis of many current programs. We shall include:

1. Personalized guidance to buttress institutionally acquired motivation for conformity.

2. Direct intervention in the client's social situation to provide access to resources essential for conventional adjustment.

3. Individualized training and guidance to impart specific knowledge, skills, and attitudes requisite for optimal use of these resources.

Although limited advantages and self-defeating behavior are, to a certain extent, problems of many lower-class youth, they are exacerbated by confinement and require intensive individualized attention in rehabilitative programs. Educational and vocational opportunities, which are the principal routes to conforming statuses for all youngsters, will, of course, be the major resources offered to released offenders. Estrangement from parents and peers as a result of public degradation will also be a target of reintegrative services.

A small unit of specially trained probation officers will conduct an experimental program for released adolescent offenders on the Lower East Side. The State Department of Welfare, as well as the private correctional institutions, will be requested to relinquish authority for aftercare of released offenders to Mobilization Neighborhood Service Centers. The majority of youth will be from public institutions since these serve the largest number of offenders and the most difficult youth.

The unit will consist of three officers at the outset. In addition to the guidance skills required of all staff performing advanced probation and parole duties, these officers will need to acquire, through pre-service training, the knowledge and techniques for affecting changes in the post-institutional situations of offenders and for enabling them to exploit expanded opportunities. The officers' ready access to the Neighborhoood Service Centers, to other Mobilization resources such as the Youth Jobs Center, and to personnel in the Mobilization-area schools will facilitate their task. Because of the considerably broadened role of probationary services in this unit, the caseload will be significantly smaller than the staff-client ratio in current programs. Since the service is experimental, the number of youth to be served by each officer will be determined by trial and error.

Through communication with the juvenile courts as well as with the other relevant agencies, the unit will keep informed of all young offenders who reside in and expect to return to the area as soon as a formal decision for commitment has been made. The caseload will consist of youngsters undergoing initial institutionalization and will include a number of those defined by the unit as "difficult." Criteria for intake will have to be developed by the officers themselves.

The program will consist of two continuous, interrelated phases. The Confinement Phase will start at the earliest feasible date after institutional commitment. The Aftercare Phase will begin at the time of release and will continue until the client's readjustment is assured or his failure has been definitely established. Casework in this experimental probationary setting will consist mainly of four functions: planning, social intervention, training, and community interpretation.

Planning: Once a client is assigned, his officer will compile a comprehensive case record giving special attention to school, work, and leisure-time patterns as well as to family relationships. As soon as institutional officials declare the youngster adapted to incarceration, the officer will begin to develop a plan for his reintegration, aided by a committee consisting of appropriate institutional and neighborhood personnel. The inmate and his parents or guardians will be consistently consulted and involved in this process. The committee will deal with the desirability of work or school release, the type of educational and employment training required by the youth, the most suitable residential facilities for him after release, and the ways in which he can be assisted in re-establishing associations with conforming peers and

adults when he leaves the institution. Once agreement is reached, the officer will assume responsibility for implementation of the plan. Whenever changes or adaptations of the scheme are necessary, they will be handled through the original planning committee.

Social intervention: The officer will represent or intervene in behalf of his client with persons who command access to resources vital to conformity. Using the reintegration plan as a guide, he will establish contact with school, employment, and settlement personnel as well as with parents; solicit their interest in the youth; and prepare them to assume a positive role in his post-institutional adjustment. As reintegration progresses, the officer will continue to induce additional persons to assist the youngster. For the purpose of social intervention, all Mobilization personnel will be at the disposal of the officer.

Training: The training role will consist of efforts to enable the youth to use the opportunities provided through social intervention. In his frequent, regular contacts with the youngster throughout institutionalization and parole, the officer will perform primarily a guidance and training function. He may also supplement the therapeutic orientation of the institution if necessary.

The officer will enable the youngster to carry through his reintegration plan by providing him with simple educational, vocational, or social know-how. Special efforts will also be made to handle overly suspicious attitudes that inhibit the youngster's readjustment. Content of the session will vary from simple instruction in how to conduct oneself in a job interview, fill out an application for employment, or organize study procedures to clarifying the

problems facing a released offender in the outside world. If the youngster is planning to acquire a delivery job, he will be taught how to read city maps and directories. If his work involves small money transactions, he will be shown how to make change and keep financial records. In some cases youngsters may be enabled by the individual efforts of the probation officer to enter the Urban Youth Service Corps or to make use of other employment resources of Mobilization for Youth. The training sessions will also serve to alert the officer to the difficulties encountered by the client.

Community interpretation: In a general sense, the officer will serve as interpreter of the problems of institutional returnees, thereby mitigating some of the effects of stigmatization. Through channels provided by Mobilization and LENA, he will convey to key neighborhood organizations and associations, as well as to the general public, an understanding of the plight of the ex-inmate. He will seek their cooperation in easing the returnee's path to conformity. In particular, he will try to enlist the support of school personnel and employers. By gaining the help of settlement workers, who are already experienced in these functions, he will facilitate his client's participation in social and community activities with conventional youngsters. In these ways a youngster will come to be defined by others and by himself as an "acceptable member of the community." As probation officers, the staff of this experimental unit do, however, have a responsibility for the protection and welfare of the community. If an inmate persists in deviant behavior despite probationary assistance, the officers will take the necessary legal steps to curb socially destructive behavior.

## Experimental Narcotics Programs

### Specialized Services to Addicts

Preliminary research and investigation suggest that drug addiction is one of the most serious forms of deviant behavior on the Lower East Side, if not the most serious. According to Police Department records, there are today more than 23,000 drug addicts in New York City. In the year 1959, of approximately 500 addicts admitted to Riverside Hospital, 43 were from the Lower East Side. In the decade of the 1950's, of 1,076 deaths diagnosed as due to an overdose of narcotics, 57 had been residents of lower Manhattan. During the last two years the Lower East Side Information and Service Center for Narcotics Addiction, Inc., which is open only 10 hours a week at most, has interviewed 145 drug addicts from the Lower East Side. These statistics bear out the contention that the problem of drug addiction is acute in the Lower East Side, as it is elsewhere in New York City.

Drug addiction is one of the most obvious examples of retreat from social and emotional problems. Although it is basically the result of psychological disorder, it often emerges under the pressures of unemployment, discrimination, family troubles, and the impersonality of urban society.[8] These are difficult problems for the normal person; for a person who is psychologically prone to addictive drug use they may be insurmountable. It is the purpose of this proposal to demonstrate that a dual focus on the social and underlying emotional problems of the addict will facilitate his reintegration into the community. Concentrated therapeutic attacks on his employment and family problems are essential aspects of the program.

---

8. Isidor Chein and Eva Rosenfeld, "Juvenile Narcotics Use," Law and Contemporary Problems, Vol. 22, No. 1 (1957).

In recent years, local, state, and federal agencies have begun to approach the drug addict with increasing understanding of his complex problems. However, except for hospital beds and minimal institutional aftercare, there are very limited resources available to the local community. On the Lower East Side, the only institution expressly established to provide outpatient services for the addict and his family is the Lower East Side Information and Service Center for Narcotics Addiction, Inc. Begun as a demonstration program by LENA, it has enlisted the resources of neighborhood agencies and churches in an effort to supply needed services. The dissemination of information about detoxification facilities, community education and work with the family unit have been the three foci of the Center's program.

Experience indicates that addicts make the most progress when the whole family constellation is involved in a treatment program. The literature on drug addiction also emphasizes the need for involvement of the addict's family in his treatment.[9] It is proposed, therefore, to establish, under the auspices of the Lower East Side Information and Service Center for Narcotics Addiction, Inc., a pilot demonstration project which will work with 50 randomly selected teen-age and young adult addicts residing in an area yet to be defined. The program will provide community based psychiatric and social services for the addict and his family. The detoxification services of Manhattan General Hospital, which are city-supported, will be used. The hospital has about 90 beds available for addicts but provides no aftercare service.

A team of six experienced social workers and a supervisor will be responsible for supplying the addicts with supporting services from the time of their admission to the project. It is imperative that there be a

---

9. Percy Mason, "The Mother of an Addict," Psychiatric Quarterly Supplement, Part 2, Utica, New York: State Hospital Press, 1958.

continuity of contact between addict and worker, and each worker will have a smaller than usual caseload.

Services to addicts may include activities in the following areas:

1. Reception and Intake
2. Hospital referral and detoxification from narcotics
3. Specialized medical and dental care
4. Psychotherapy
5. Family involvement and strengthening
6. After-care following incarceration
7. Economic assistance including housing as needed
8. Job counselling and job finding
9. Educational and vocational guidance
10. Social programming for leisure time and recreation
11. Police, courts and probation follow-up

The drama of rehabilitation will be played out fundamentally in the family and vocational life of the addict under treatment. Addicts who are capable of working will be referred for job placement to the Vocational programs of Mobilization for Youth. Counseling by the caseworker will precede placement. A sheltered workshop (see below) is also proposed for addicts who are unable to face a competitive job situation. The same caseworker will deal with all the family and institutional representatives who enter the life of the addict.[10] In order to perform these many functions, the caseworkers will need to possess skills in group work as well as in casework and will require the occasional services of an interdisciplinary team of specialists.

---

10. Report of the State of New York Joint Legislative Committee on Narcotics Study, Legislative Document, No. 7, 1959.

A part-time psychiatrist will serve as medical director of the project. He will screen and diagnose addicts, as well as provide consultative help to other staff. A part-time psychologist will provide psychological testing and clinical consultations. A public health nurse will serve as liaison with the Health Department, provide nursing service for medical problems, and supervise outpatient detoxification. A physician will provide medical service for health problems secondary to the addiction and be responsible for outpatient detoxification. The project director will spend one fourth of his time working with the present program of the Lower East Side Information and Service Center for Narcotics Addiction, Inc., and the remaining three fourths with this project.

Although the addict's interaction with his family will be a constant focus in the treatment, there may be times when it is not therapeutically advisable for him to be living at home. A halfway house may be needed in which to maintain the addict during such periods.

A voluntary agency is attempting to finance a similar project using a control group of 50 addicts, randomly chosen. The tentative plan is to make available to the control group the same battery of services plus an intensive medical program involving the controlled use of sustaining doses of drugs.

Sheltered Workshop

Professionals experienced in working with drug users -- psychiatrists, sociologists, clergymen, social group workers, and others -- have indicated the need for a sheltered workshop for addicts. A sheltered workshop can provide an opportunity to test the value of work in the resocialization of addicted youth. It may also provide an opportunity for such youth to learn

elementary skills and work habits which may be useful to them in later years. A specific proposal for a sheltered workshop for narcotics addicts will by detailed in a subsequent submission.

Other Services to Individuals and Families

Services to individuals and families will not, of course, be limited to the programs outlined in this discussion. Indeed, there is no Mobilization program which will not give attention to individual functioning. We have asserted the importance of giving individualized assistance to persons who might otherwise not use available resources effectively. The advantage of closely integrating such help within the structure of each service is obvious. Thus group workers and work-experience counselors will need the time, training, and sensitivity to focus upon mitigating the personal difficulties of participants as these affect their use of the program. Guidance people will serve this function in the public schools.

Individuals with behavioral difficulties too severe for such treatment will be referred for casework and psychiatric services. Caseworkers will therefore need to have a knowledge of the full gamut of community programs. For example, if a youngster is unable to use the Youth Corps experience meaningfully, he may be seen by a worker at a Neighborhood Service Center. In order to understand the youngster's reactions and help him to renounce the behavior that prevents his effective participation, the worker will need to be familiar with the activities and peer-group demands of the Corps. This is particularly important since the focus of the contact will be the boy's effective utilization of the Corps experience.

Caseworkers will aid and advise other professionals as well. For example, teachers making home visits will be accompanied initially by social caseworkers who are skilled in interviewing and accustomed to entering the homes of strangers. As a parent shares his problems in the course of the interview, the worker may be able to direct him to other appropriate community programs.

LENA's efforts in the Lower East Side and the multi-faceted nature of the Mobilization program permit close coordination of programs and specialties throughout the area. The aim of integrating specialized services to individuals with other community resources may thus be served.

SPRING TERM 1964

DATES OF CLASS MEETINGS

Classes begin on the first Tuesday, Wednesday and Thursday (respectively) in February, and run for 10 consecutive nights. Classes will not operate during Easter week.

Remember classes start Feb. 4, 5, or 6!

Address all communication to:
MADISON TOWNSHIP ADULT SCHOOL
MADISON TOWNSHIP HIGH SCHOOL
Old Bridge, New Jersey
Telephone Number: Days - PArkway 1-5500
Evenings - PArkway 1-5501

Any Madison Township resident 65 years of age or older may take courses free of charge, excepting the cost of course materials, if required.

HOW TO REGISTER - The rolls of some classes are limited - register early; Mail registration will be accepted if post marked no later than midnight January 15. Register in person from 7:00 until 9:00 p.m. on Friday, January 31 in the High School Department Heads Office. Registrations are accepted unless you are notified to the contrary.

MADISON TOWNSHIP ADULT SCHOOL

PRESENTS

"WEDNESDAY WINDOWS ON THE WORLD"

A continuing program of lectures and discussion sessions centered on contemporary world problems.

In our first semester we are happy to present two outstanding guest speakers.

Fee for both lectures (in advance) $2.50
Fee for individual lectures 1.50

TUESDAY

ACTION COURSE IN PRACTICAL POLITICS

8 - 10 p.m.
$2.00 registration fee
2.50 material
$4.50 Total

The object of this discussion course, developed by the U.S. Chamber of Commerce, is to enable individuals in local groups to learn more about how they can become active and effective in the political party of their choice in their own communities. Consists of 9 - 2 hour workshops concluding with a meeting with prominent politicians and government office-holders. Typical workshop topics include Political Party Organization, The Political Campaign, and The Political Leader's Problems. Course materials, provided at their cost of $2.50, include a set of 8 pamphlets covering each workshop topic plus a series of case problems. The Discussion Leader is a graduate of the same course given within the Madison Township Junior Chamber of Commerce in 1963.

Instructors supplied by the Madison Township Junior Chamber of Commerce.

TUESDAY

SEWING I 8 - 10 p.m. Fee $11.00

A practical course for beginners.

Minimum of 10 students. Maximum of 15 students.

Instructor: Mary Dudley, B.A.
Home Economics instructor, Madison Township High School.

TUESDAY

ADVANCED DANCING 8 - 9:30 p.m. Fee $16.00 couple

This is a course for people with some experience in the basic dance steps - people who have been doing some dancing. If you are in doubt as to how much of a "beginner" you are, call Mr. Agolia at CL 4-5046 for information.

Minimum of 5 couples - maximum of 15 couples.

Instructor: Michael Agolia.

I. "LATIN AMERICA'S REVOLUTION"

An investigation of some of the hemisphere trouble - spots.

SPEAKER: Dr. Robert J. Alexander
Rutgers University

Wednesday evening, February 12, 1964 in the High School Auditorium

8:00 P.M.

Admission at door $1.50 ( or series admission of $2.50 in advance )

II."CIVIL RIGHTS Admission at door $1.50

AMERICA'S NUMBER ONE DOMESTIC PROBLEM"

The struggle for social justice for Negroes is the fight for democracy for all Americans requiring an immediate application of the best of this nation's resources -- moral, economic, social and political.

Wednesday evening, March 18, 1964 in the High School Auditorium

8:00 P.M.

SPEAKER: Norman Hill
Assistant to the Director
C.O.R.E. ( Congress of Racial Equality )

(Admission for series $2.50 in advance)

TUESDAY

WORKSHOP IN SUBSTITUTE TEACHING
8 - 10 p.m. Fee $11.00

Serve your school system! Earn money! Designed for those interested in part-time or student teaching. Two years college required. Classroom management, homeroom procedures, planning, etc. will be covered.

Instructor: Arnold Fineberg, B.A.
Instructor at Central School, Marlboro Township

TUESDAY

OIL PAINTING 8 - 10 p.m. Fee $11.00

A basic course for beginners

Instructor: John J. R. Resh, M.A.
Art instructor, War Memorial High School, Sayerville

TUESDAY

AMATEUR RADIO II - GENERAL CLASS LICENSE
8 - 10 p.m. Fee $11.00

Instructor: Marvin Stern, W2AOC
Prerequisite Novice class license
Minimum of 10 students required

TUESDAY

BEGINNERS TYPING 8 - 10 p.m. Fee $11.00

A practical course for beginners.

Minimum of 10 students required.

Instructor: Mrs. Anne Marie Healy, M.S.

TUESDAY

CREATIVE WRITING 8 - 10 p.m. Fee $11.00

For people with little or no experience.

Instructor: Mrs. R. Giancristofaro, A.B.

TUESDAY

SLIMNASTICS 8 - 9:30 p.m. Fee $16.00

Housewives and career women - here is the course tailored to you! Tone up your muscles, stay healthy and improve your posture through a program of rhythmic slimnastics. You'll look and feel better! Bring sneakers and appropriate clothing. This course includes slimnastic exercises and modern dance movements.

Minimum of 15 students required.

Instructor: Gloria Knudsen, B.S. Ed.

WEDNESDAY

HIGH SCHOOL EQUIVALENCY
8 - 10 p.m. Fee $20.00

The High School Equivalency program of Madison Township Adult School goes into its second semester of its second year, in February. The program originally started in answer to a community request, has been outstandingly successful. One hundred and twenty adults over 20 years of age, from throughout the township have gone through the ten week program.

The program is especially designed to help adults identify their academic strengths and weaknesses through diagnostic testing and counseling in preparation for the five part state examination.

Each student meets with his counselor to discuss test results and plan an individually tailored study program. He is assigned to an English and Mathematics class for eight weeks; however, he may choose to spend more time in one class than the other.

The success of this program can be evaluated in part by the number of students who have contacted us to say they have a better position, or have started college or night school.

Miss Ruth Samsel, M.A. Ed.
Irvin Knudson, M.A. Ed.
Guidance Counselors, M.T.H.S.

Raymond Singley, B.S.
Douglas Auburn, B.S.
M.T.H.S. instructors

WEDNESDAY

ENGLISH GRAMMAR REFRESHER
8 - 10 p.m. Fee $11.00

A continuation of Mr. Stiteler's successful Fall offering. New Students are welcome.

A minimum of 10 students required.

Instructor: Terry Stiteler, B.S.
Madison Township High School English teacher.

WEDNESDAY

SEWING II 8 - 10 p.m. Fee $11.00

A continuation of Mrs. Smith's Fall course offering. Students may call the instructor at LO 6-5814 for information.

A Minimum of 10 students and a maximum of 15.

Instructor: Joann Smith,
Instructor at Woodbridge Vocational Tech. High School.

WEDNESDAY

ELEMENTARY GREGG SHORTHAND, SECOND HALF
8 - 10 p.m. Fee $11.00

A continuation of Mrs. Healy's Fall course offering including a review of materials covered plus dictation.

Instructor: Mrs. Anne Marie Healy, M. ED.

THURSDAY

THE EVOLUTION OF WORLD COMMUNISM
8 - 10 p.m. Fee $11.00

The new course by the popular instructor in Philosophy during the Fall season.

Instructor: George Goetz, M.A.
History Instructor, Columbia High School, So. Orange - Maplewood, N.J.

THURSDAY

CHESS 8 - 10 p.m. Fee $11.00

Instructor: Irvin Rubin, M.A.
Senior High School teacher
City of New York

THURSDAY

PUBLIC SPEAKING 8 - 10 p.m. Fee $11.00

A basic course for absolute beginners.

Instructor: Mrs. Charles Walling, B.A.

THURSDAY

SEWING I 8 - 10 p.m. Fee $11.00

A basic course for beginners.

Instructor: Mrs. Mary Dudley, B.S.
Instructor at M.T.H.S.

THURSDAY

TYPING II 8 - 10 p.m. Fee $11.00

A continuation of Mrs. Healy's Fall course offering.

A minimum of 10 students required.

Instructor: Anne Marie Healy, M. Ed.

THURSDAY

RADIO AND T.V.-BASIC THEORY AND PRACTICE
8 - 10 p.m. Fee $11.00

A basic course for beginners.

Instructor: Louis Rainone
Bell Labs, Holmdel

THURSDAY

SOCIAL DANCING FOR BEGINNERS
8 - 9:30 p.m. Fee $16.00 per couple

This is a class for absolute beginners. Dances to be taught are Fox Trot, Waltz, Cha Cha, Peabody, etc.

Minimum of 5 couples and a maximum of 15 couples.

Instructor: Michael Agolia

## INTEGRATION IN ACTION

### Dixie Teachers Report Their Pupils Learn Well In Mixed-Race Schools

### Negro Students Lag at First But Study Hard to Catch Up with Whites, They Say

### After Snubs, 15 Autographs

By James C. Tanner - Staff Reporter
of The Wall Street Journal

Nashville - Lesa Gibson and Cynthia Thornton, nine-year-old girls at Buena Vista Elementary School, consistently score high marks in fourth grade reading, writing and arithmetic. A few blocks away at North Nashville Junior-Senior High School, Geneva Ware, 12, is speedily stepping into the ranks of honor students in the seventh grade, and also is president of her home room class.

The experience of these youngsters is significant for three reasons. They're Negroes attending school with mostly white classmates. Their academic and social gains are being made in an Old South city where classroom integration began with racist bombing of an elementary school seven years ago. And, say many Southern educators, their progress is not at all untypical of Negro children studying under such circumstances.

A large number of Southern whites refuse to believe this - and, their stubborn conviction that school desegregation lowers academic and moral standards for both Negro and white children is a major reason why classroom integration is still the South's most explosive racial issue. Nor is this view confined to extreme segregationists. "Education suffers" from integration, insists a white businessman in St. Augustine, Fla., who's regarded by many as a moderate on the race question. "Regardless of merit, the fact remains that when you integrate classes you dilute the level of education."

"Normal or Nearly Normal"

But Southern schoolmen who have had actual experience with desegregation tell a different story. W. H. Oliver, Nashville school superintendent, readily concedes that Lesa, Cynthia and Geneva are outstanding among the 800 Negro youth now attending Nashville schools with whites. But, he says, the Negro students generally "are achieving normal (levels) or nearly normal from a social, emotional and scholastic standpoint, and the achievement of white students has not been adversely affected to an appreciable degree."

Other educators concede that the first Negro children to enter formerly white schools often lag behind their white classmates scholastically, because of their environment and the poor education many had been receiving in Negro schools. But once in school with whites, teachers say, the Negroes usually study hard to close the gap - and the white children often study hard to prevent having the Negroes pass them. Typical result: Tests made the year before and the year after integration in Louisville, Ky., show substantial gains in scholastic achievement for both Negro and white second, sixth and eighth graders, with the Negroes making proportionately the largest gains.

Socially too, teachers report, the Negro children usually win gradual, if grudging, acceptance from their white classmates. It's true many draw jeers and rebuffs at first, and some drop out. But educators relate many such incidents as that of a Negro high school girl in Atlanta who was snubbed all during her senior year. On the last day she was approached by more than 15 white students who asked

to autograph her yearbook.

Easing Other Race Tensions?

Altogether, despite some remaining problems, many Southern educators think classroom integration is working well enough to prepare the way for eventual Dixie harmony on other race issues, too. "Students are making more rapid progress toward race acceptance than are parents," assert Southern college teachers Herbert Wey and John Corey in Action Patterns in School Desegregation, a guide-book for Southern schools that expect to integrate. "When the students now in school become parents, many of the problems that seem insurmountable will decrease in importance."

This, of course, would be far in the future. For the time being school desegregation seems rather to be inflarning Southern racial tensions, as can be gauged from some of the incidents that attended the reopening of Southern schools last fall. In Birmingham, classroom integration and white resistance to it stirred passions that led to a church bombing in which four Negro children were killed. In Tuskegee, Ala., white students have boycotted the previously all-white high school following admittance of 13 Negroes, Surry County, Va., closed its only white public school this year when seven Negroes were assigned to it by the state's pupil placement board.

Nevertheless, desegregation is making continual Southern gains. In the 17 Southern and border states which had compulsory school segregation prior to the 1954 Supreme Court ruling against it, more than one-third of the 3,053 biracial districts now have some desegregation, according to the Southern Education Reporting Service. Mississippi is now the only U.S. state with no mixed schools. In all, 318,039 of the South's 3,412,799 Negro students, or 9.3%, now attend classes with whites, and the number grows almost daily.

What Happens

As a result, Southern teachers are gaining more experience with the results of desegregation, and many Northern educators have been studying their progress and problems. Here, in some detail, is what they say usually happens when a Southern white school begins admitting Negroes:

The first Negroes to attend a formerly white school are often one to two years behind their new classmates in scholastic achievement, educators say. That's partly because their social and economic environment had given them little incentive to learn, and partly because many of them had received inferior teaching in Negro schools. Many of the children have had "traumatic experiences in learning" in poor Negro schools, and feel hopelessly behind their white classmates at first, says a school psychiatric consultant who has studied the effects of desegregation.

However, schoolmen say, once they do begin attending school with whites the Negro children usually develop a burning desire to learn enough to catch up with their new classmates. This "motivation factor compensates for deficiencies of past academic records in many cases," says R.W. Stephens, deputy superintendent of Atlanta schools. "Although we have found that Negro high school students generally are about two years behind white students, they are highly motivated, and they tend to be over-achievers in desegregated schools. The Negro student does better actually than his tests might indicate."

As a result, most teachers report, the Negroes learn more rapidly than they did in segregated schools, and soon begin closing the gap with their white classmates. When Negroes were first admitted to San Angelo, Texas, high school, says Superintendent G. B. Wadseck, those who had received A marks in Negro schools usually dropped to B, those who had been getting B dropped to C, and so on. "Then they began to pull up," he reports.

In Nashville, Glenn Hale, principal of the Buena Vista Elementary School, finds many Negro pupils entering the second and third grades about a year behind their white classmates in learning. But, he says, by the time they leave his school at the end of the seventh grade, they "knock three or four months off" that deficiency. After one class of Negroes has gone through all 12 years of elementary and high school with whites, he believes, the gap will disappear.

Studies of the Washington, D.C., school system, which began integrating immediately after the 1954 Supreme Court decision, give strong support for Mr. Hale's belief. In the early months of integration in 1954, achievement tests showed Washington students generally far below national standards. In progress reading tests, for example, the typical Washington sixth grader scored 4.9 - the level he should have reached the ninth month of the fourth grade - against a national norm of 6.6.

In the most recent comparable tests, however, Washington sixth graders - a larger proportion of them now Negro - fell only two to four months below the national norm in reading, world knowledge and social study skills. And they surpassed the norm by two months in arithmetic, by three months in language usage, and by five months in spelling and language study skills. Some 34% of the students in Washington public schools now are Negro.

While Negro students thus learn rapidly in desegregated schools, the achievement of white pupils doesn't seem to suffer. "Even the strongly segregationist (white) children we have followed for two years have continued their studies without impairment," reports Dr. Robert Coles, a Boston child psychiatrist who spent two years in extensive research on how desegregation affects Southern students. He tells of one white student who worked much harder after integration because of the fear that several of his Negro classmates might get better grades.

The end result, says Dr. Coles: "We have yet to hear a Southern teacher complain of any drop in intellectual or moral climate in a desegregated room or school."

These happy results, of course, are not uniform from child to child. Some mediocre and poor Negro students have turned up in classes with whites. And, says Dr. Coles, "if the younger (Negro children beginning to attend class with whites) manage well, the older ones sometimes have the burden of their former years" of limited educational opportunity and incentive.

On the other hand, some Negro students have made outstanding records in desegregated classes. A Negro girl who was graduated recently from Oklahoma City's desegregated Central High School made the National Honor Society and won a scholarship to the University of Oklahoma, where she's now studying for a medical degree. In Little Rock, where Federal troops first had to be used to end violent resistance to integration, two Central High Negro Seniors last tern won college scholarships.

In general, J. Kenneth Morland, professor of sociology at Randolph-Macon Women's College, Lynchburg, Va., concluded in a study of classroom race-mixing that desegregated classes seem to accept each other better than the older ones. Negro and white youngsters can be seen playing together on the slides and swings of almost any desegregated Southern elementary school's playground. At Nashville's Buena Vista Elementary School, Negro boys have won two of the three positions of captain on the school's safety patrol. And in Birmingham, often called the most segregated U.S. city, a Negro boy was chosen vice president of a sixth grade class that was desegregated last fall.

Even in desegregated high schools, some Negroes win quick social acceptance. When a lone Negro was admitted to the 10th grade of one high school in a small Texas town, he was elected vice president of the class his first day. A Negro also has become president of Oklahoma City's integrated Central High School student council.

Educators concede, however, that desegregation poses some other social problems for Southern schools. At North Nashville Junior-Senior High, where Negroes now are in the seventh grade, school authorities worry over whether they should permit school dances to be held this year. "We might have to curtail some of these things," says W. J. Mullins, principal. But he's enthusiastic about the reception 20 Negro parents got the other night from white parents at a school chili supper, the school's first biracial social affair.

Mr. Mullins and other school officials who know desegregation first-hand dispute segregationist arguments that race mixing brings new problems in discipline, delinquency, morals and health. They do not deny, however, that it accentuates those problems already present in the schools. It brings about some teaching changes, too.

Incoming Negro children, for example, often are grouped with whites according to their academic abilities. The ones who lag far behind scholastically are taught alongside whites of comparable academic achievements, even if these white children are younger. The brighter Negroes go into more advanced groups. This permits a speedier education pace for the fast learners.

And one Nashville teacher is making her new Negro pupils feel at home by "integrating" the bulletin board. She clips pictures of Negro children from magazines and pastes them on the board.

*Minutes of*

JAN 22 1964

*EXPLORATORY CONFERENCE OF PERSONS INTERESTED IN NATIONAL SCHOOL BOYCOTT, FEBRUARY 3, 1964*

*Manhattan Hotel*
*44th Street & 8th Avenue*
*New York City, N.Y.*
*Sunday, January 12, 1964*
*12:00 Noon*

*Thirty-two individuals representing civil rights and civic groups in Chicago, Illinois; Atlanta, Georgia; Cleveland, Ohio; Boston, Massachusetts; Chester, Pennsylvania and the various communities of New York met together to explore essentially the possibility of a multi-city boycott of schools in February, 1964, one of the methods advocated to demonstrate Negro discontent with segregated unequal education throughout the nation.*

*The Acting Chairman, Dr. Milton A. Galamison, opened the meeting at approximately 12:30 P.M. The participants were asked to introduce themselves and to identify the organizations they represented. Mr. John Lewis, National Chairman of the Student Nonviolent Coordinating Committee (SNCC), read his organization's statement of support for the proposed multi-city boycott of schools, and stated that SNCC will call upon people in communities throughout the country to make February "stay away from school month." SNCC will act in a supporting role and will call on local protest groups to become very much involved in the effort.*

*During the course of the meeting delegates described local school conditions and it was learned that the educational problems among Negroes in the various urban areas are as similar as they are grotesque:*

*Chicago*

*The delegation from Chicago stated that 87% of the public schools of that city are segregated. Negotiations with the School Board have been fruitless. "Open Enrollment" or the like has not been granted in Chicago; the school system has not acknowledged segregation as a problem; it is on record as opposing segregation, but has no positive policy for integration.*

*A successful boycott was launched - 224,000 Negro and 10,000 to 15,000 white students stayed out of school - for one day in protest against segregation. Very little to nothing concrete was accomplished by the boycott, except for the fact that it created more awareness of the problems and an opportunity to tie up some organizations to support the struggle. The School Board omitted several of the thirteen demands made by civil rights groups. As a result, the Chicago "Freedom Day Committee" was organized and an effort made to contact civil rights groups in other cities to see*

*what could be done about the school issue nationwide. It was felt that national pressure is needed in local communities - national pressure against school boards and for the whole issue of integrated education and what it means; pressure on civil rights legislation in Congress; need for mutual support and giving local problems the national scope they need.*

*Chester, Pa.*

*Delegates claimed Chester to be the most segregated northern city in the country. In 1963 twelve hundred Negro children attended a school built to hold five hundred children over fifty years ago; classes were held in the basement coal bin; three classes held in a nearby housing project in an area next to the boiler room. The school had only two toilets - one for the boys and one for the girls - to which children were allowed fifty at a time. In the boys' restroom there were only three commodes until the night before a Human Relations Committee was to visit. The school board installed (apparently in the middle of the night) four additional commodes to give a better appearance. Direct action in Chester brought promises to fulfill all demands. The School Board was to transfer 200 children out, which they did (transferred them out into another Negro school that was already overcrowded). The School Board built two new junior high schools and renovated three elementary schools. Not one Negro school was physically repaired! District lines have been gerrymandered each year to keep Negro children contained. There is no promise whatsoever from school authorities for future integration of the system.*

*Cleveland, Ohio*

*Ninety-three per cent of the elementary school children attend de facto segregated schools; a similar situation exists in junior high and high schools. Many prominent people picketed, used pressure on the white power structure, and presented a seven-point program for schools. The opposition, however, got the school board to promote the "neighborhood school concept."*

*There is currently some action on a seven-point program of demands, namely: integration of apprenticeship training programs; integrating transported classes; contracting on a non-discriminatory policy; school participation in the Federal Lunch Program; integrated teaching materials; use of Negro real estate brokers in acquiring property; the establishment of a human relations committee.*

*The problem in Cleveland has been the real radical difference in philosophy among civil rights groups about how far to go and methods used. There has been a bigger fight within than outside the groups. It was noted that only two Negro Ministers are involved in the Cleveland Movement. None of the "ghetto" ministers has become a part of the Movement.*

*Boston, Mass.*

*Negro apathy prevails - the black bourgeoisie is unaware a problem exists. The Boston Movement uncovered some of the problems and the NAACP negotiated fourteen points with the School Committee. Seven out of eight school districts made promises on thirteen of the fourteen points; i.e., matter of substitute teachers under consideration; guidance counselors; Negro representation in text books; less expenditures being made in Negro schools, etc. It was stated that out of 3,000 teachers, there are only thirty-nine Negro teachers.*

*The School Committee refused to admit the existence of de facto segregation; actively discouraged the boycott by implying violence would erupt; got a judge to come out with the statement that organizers of the boycott were contributing to juvenile delinquency and breaking the law; Negro ministers' association voted against the boycott and urged students to go to school. The ministers did, however, allow "Freedom Schools" to be set up in churches.*

*The School Committee declared that de facto segregation is not an educational matter and would not discuss it. The Chairman of the Boston School Committee, thought to be the biggest bigot in the city, was elected by a larger majority vote than the Mayor. Spokesmen for the Committee have stated there are no inferior schools - only inferior students.*

*New York*

*The "Open Enrollment" program brought about by a threat to boycott. The Board of Education of the City of New York has admitted since 1954 that de facto segregated schools exist and has issued reports saying something should be done about it. A threat of a boycott last year, sponsored by the City-wide Committee for School Integration, brought promise of a plan and time table by December 1, 1963 for desegregation of the public school system. The Board came up with nothing but a proposal for "separate but equal;" a crash program for making schools in ghetto areas somewhat more endurable. The school authorities completely reneged on its commitment to produce a plan and time table by the specified date.*

*Harlem*

*Negroes feel a part of the power structure and tend to be against the movement. The Harlem organizers feel inclined to shift pressure from the school board to City Hall and the Governor. It was learned that: the school board is using its administrative personnel to speak to people against the proposed boycott; the Black Muslim philosophy has divided the people; and the ministers in Harlem are not active in the school issue.*

*Brooklyn Ministers*

*A group of 72 ministers who are completely committed to the school boycott and whose churches will be available for use as "Freedom Schools" in February. An effort will be made by this group to enlist Manhattan ministers in the movement.*

*Rochdale, Queens*

*This direct action group is moving into educational militancy and completely endorses a multi-city boycott and/or extended boycott.*

*The following information was received through indirect representation:*

*Gary, Indiana*

*Advised Chicago delegates they could not send a representative but are very interested in the problem and share many of the same ills. It was stated that the majority of the people in Gary are Negro and are behind this conference group.*

*Philadelphia, Pa. & Wilmington, Dela.*

*The delegate from Chester, Pa. assured all that Philadelphia and Wilmington will participate in the effort.*

*Hartford, Conn.*

*The delegate from Boston indicated that Hartford would support the effort and that this area is already planning something for February.*

*Indianapolis, Ind.*

*A delegate from Chicago indicated that the Social Action Council of Indianapolis would participate.*

*Cambridge, Md.*

*It was felt that Mrs. Richardson's group would support a multi-city boycott.*

*The meeting was recessed at 4:00 P.M. for supper.*

*The second part of the meeting addressed itself to the possibility of unifying as a multi-city group interested in educational and/or other problems whether or not a boycott could be organized in February. There followed lengthy discussion around this point. Some persons felt that those in attendance should not consider more than schools at this point. The representative of the Cleveland United Freedom Movement indicated that the power structure in that particular area is conservative and it is doubtful that his group would even participate in the boycott in February and less likelihood that they would be inclined to join a national organization. The Cleveland delegate is fully comitted to the effort personally, but was instructed before coming to this New York conference that he could not by any means commit the Cleveland people.*

*Individuals representing existing national groups were asked how they felt about the proposed permanent organization. The national CORE representative felt such an organization to be unnecessary; that what is needed at this point is to exchange ideas, plans, and in particular more concern for and work with people in the ghettoes. It was stated that the proposal would, however, be taken back to the CORE chapters for reaction.*

*Others present felt a permanent committee should be formed to coordinate all equal rights activities, structured only to do action and give mutual and community support. It was the feeling that the Negro people are discontented and want the job done. The delegate from Boston was for the idea of a permanent committee, and Chicago endorsed the idea of the formation of a permanent organization for direct action to end segregation in the public schools. Cleveland CORE indicated its support; SNCC appeared ready for formal or informal involvement. The representative of the National Lawyers Guild was certain his organization would commit itself to the proposed permanent group.*

*The prevailing opinion seemed to be that an informal organization could not do the job and that many things point to the need for a permanent group to transform some of the boycott activities into civic activities; that the power structure is so well organized and only through a formal coordinated effort can these people be confronted. It was then recommended that consideration be given to the formation of a permanent organization (representative of grass roots people) at the next meeting, for the purpose of communicating quickly, getting the facts, giving support and direct action to local communities altogether when possible. It was suggested that any name picked for the present group not be limited to the school issue and it was agreed that any title be left open to move as an organizational piece in the future.*

*Following the discussion it was moved that:*

*1) The members in this room support a multi-city boycott of public schools in February.*
*AMENDED to READ: a multi-city boycott to take place in the month of February with each city trying to choose a date as close as possible to the other city.*
*The amendment was seconded and voted.*

*2) A motion was made and seconded that a call be sent to everyone present and others over the signature of one individual for each organization represented.*

*It was suggested some thought be given to a February 11th national boycott: Chester, Boston and Chicago committed themselves to February 11; New York to February 3 (and/or February 11 - or a sympathy demonstration of support for the multi-city boycott); Boycotts in Philadelphia and Wilmington will take place sometime during the month of February; Cleveland undecided about boycott; CORE chapters will be asked whether they will support national boycott on February 11.*

It was proposed that the conference participants should establish themselves as a "Temporary Freedom Day Committee;" issue a call for another meeting in Chicago on January 25; take for the call something along the lines of the support statement written by the Student Nonviolent Coordinating Committee for multi-city boycott; and that the call be sent to everyone present with an invitation to bring others to the next meeting:-

"The Student Nonviolent Coordinating Committee announces its support of a planned multi-city boycott of schools. This boycott, like the "Freedom Day" Boycott in Chicago last year, should serve to remind the nation as well as local school boards across the country that conditions in Negro schools North and South are still separate and unequal, as they have been since and before the Supreme Court's 1954 Decision, ten long years ago.

"Decent education is basic to our struggle. We are jim crowed first in the classroom in the first and second grades where overcrowding and poor facilities conspire to rob us of jobs and other opportunities in later life.

"Whether racial imbalance, the polite term for segregation, or simply the reluctance of school officials to admit and correct the deplorable conditions that exist in this nation's schools is at fault this situation must be remedied. We call upon all Americans and all groups working to improve America to join us and other sponsoring organizations to make the multi-city boycott a successful demonstration of Negro discontent."

A motion to adopt and edit the call was seconded and voted.

It was agreed that the conference participants constitute a loosely-knit organization in which each group is maintaining its own soverignty; that each one has committed himself individually to a boycott of schools in February, and agreed to meet in Chicago on January 25 to further plan things.

Appreciation was expressed for the fine work of the Acting Chairman. The meeting adjourned at approximately 6:00 P.M. with the singing of "We Shall Overcome" and prayer by the Chairman.

Respectfully Submitted

Mildred Roach

# Many Colleges Offer Extra Financial Aid To Recruit Negroes

• • •

## Scholarship Picture Brightens In Houston; Princeton Calls Rivalry for Talent 'Intense'

WSJ ——— 1/29/64

By LAWRENCE LYNCH
*Staff Reporter of* THE WALL STREET JOURNAL

LOS ANGELES—Benny Robinson, a senior with a B plus average at Jordan High School here, figures he will need financial help to get through college. Since Benny's parents both work, the most he could ordinarily expect would be a scholarship paying half his tuition, room, board and other educational expenses.

Benny's school counselors have told him, however, that at least two California universities will probably offer to foot his entire higher education bill. Ironically, the reason for this special consideration is the same one that might have made it harder for Benny to get into college a few years ago: Benny is a Negro.

Prodded by the stepped-up pace of the drive for civil rights, and their own liberal traditions, a number of Northern and Western colleges are becoming increasingly concerned about their small Negro enrollments. As a result, they're making special efforts, including offering extra financial aid, to recruit qualified Negro students.

Qualified Negro applicants, however, are few and far between, educators say. "The annual pool of young Negroes who are prepared to meet the educational standards of universities like Princeton is depressingly small," says Princeton President Robert F. Goheen. "And because there are so few of them, the competition among universities to enroll them is nowadays intense."

**Talent Scout**

Two years ago Princeton and the seven other Ivy League universities formed a "cooperative program for educational opportunity." They commissioned Charles E. McCarthy, Jr., a residence dean at Yale, to scout Eastern urban centers and Southern states for Negro high school seniors with academic ability. Last spring, seven Eastern women's colleges joined the program. Mr. McCarthy says a qualified Negro will get all the financial help he needs.

Mr. McCarthy's work and related efforts by individual schools seem to be paying off. Yale's freshman Negro enrollment increased to 12 last fall from six the year before; Princeton's jumped to 10 from "two or three" over the same period. Wellesley College, one of the women's schools participating in the program, last fall brought in nine Negro coeds from Southern Negro colleges to spend their junior year at its Massachusetts campus.

Interest in Negro students goes well beyond these 15 schools. The National Scholarship Service and Fund for Negro Students (NSSFNS) reports the number of colleges accepting its applicants increased to 353 from 319 in the last two years. NSSFNS helps Negro high school students decide where to go to college, passes along their records to interested schools and helps them win financial aid.

Richard L. Plaut, president of the services, says such Southern schools as Davidson College, Duke University and Tulane University have asked for NSSFNS applicants for the first time within the last year. He adds that the number of schools awarding scholarships to the service's applicants climbed to 214 from 186 over the last two years.

**Pick and Choose**

Many top-ranking Negro high school seniors this spring will be able to pick and choose among scholarship offers. John E. Codwell, principal of all-Negro Jack Yates Senior High School in Houston, expects that most students in the top 10% of the present senior class will get scholarship offers from at least two colleges and all students in the top 5% will get offers from at least three schools.

Some colleges are trying to develop more qualified Negro applicants by encouraging them early in their high school careers. Admissions officers from seven Southern California colleges will visit four predominantly Negro Los Angeles high schools this spring, mainly to try convincing Negro 9th and 10th graders that scholarship money is plentiful for students with high marks.

Princeton, Dartmouth College and Oberlin College are setting up summer sessions for selected students in the early stages of secondary education; the students are from low income families and most will be Negroes. The programs, operating under $150,000 Rockefeller Foundation grants, will test whether intensive study can help students overcome inadequate educational backgrounds and prepare for college.

# INTEGRATION SUIT WON IN MISSISSIPPI

## 3 School Boards Told to Plan Fall Desegregation

Special to The New York Times

JACKSON, Miss., March 4—United States District Judge Sidney Mize told three Mississippi school boards today to submit school-desegregation plans for the term beginning next September.

It was the first integration order for schools below the college level in Mississippi, the only state that has not complied in some degree with the Supreme Court's desegregation ruling was considered a signif-

Derrick A. Bell Jr., attorney for 64 Negro plaintiffs, said the ruling was considered a significant breakthrough in efforts by civil rights organizations to dissolve the rigid segregation that exists in this state.

"We still have a long way to go, even in this case," Mr. Bell said. "But this opinion appears to be designed to bring the school boards into compliance with the law of the land on a peaceful and orderly basis."

There were indications, too, that state officials may be planning to submit to the order rather than close the schools concerned or put up a show of resistance, as was done in 1962 when the University of Mississippi was ordered integrated.

Judge Mize called for integration of at least one grade a year, beginning next September, in Jackson, Biloxi and rural Leake County, the former home of ex-Gov. Ross R. Barnett. Judge Mize acted after the United States Court of Appeals for the Fifth Circuit overruled his earlier decision that the cases should be dismissed until remedies were sought in the state courts.

His order today calls for the three boards involved to submit integration plans by July 15. The order, however, is temporary. Judge Mize will hear the case on its merits beginning May 18.

But the Court of Appeals made a clear decision on Feb. 13 that the state cannot continue to argue that segregation is purely voluntary.

"The Mississippi Constitution requires the maintenance of separate schools for white and colored people," the court said. It continued:

"Moveover, (state law) forbids the attendance of any member of the white race with Negro children in any public school of high school level or below on the pain of fine, imprisonment or both. And it is precisely because of this state-enforced segregation of schools under Mississippi law that the District Court erred in dismissing the complaint."

In view of this decision, state officials were reported to be quietly agreeable to an integration plan consistent with today's order.

"It is felt that integrating a grade a year under the supervision of Judge Mize is better than throwing it back to the Fifth Circuit," an informed source said.

For several years Mississippi has been prepared to close any public school faced with integration. Gov. Paul B. Johnson Jr., who succeeded Mr. Barnett two months ago, is authorized under law to close schools individually or collectively.

Mr. Johnson has surprised the state with his moderation on the race issue since he took office.

Governor Johnson is expected to be put under strong pressure of white Citizens Council dealers to close schools and set up a private system rather than submit to integration.

THE WALL STREET JOURNAL, Monday, March 16, 1964

# U.S. Requests School Desegregation Order Against State Rather Than Local Officials

By JOSEPH D. MATHEWSON
*Staff Reporter of* THE WALL STREET JOURNAL

WASHINGTON — The Justice Department for the first time asked a Federal court to require a state to take positive steps to desegregate all its public schools. Although the request concerned only Alabama, there were indications in the Government brief that the same legal approach, if accepted by the courts, could be used in most other states.

The principal reason for requesting a desegregation order aimed at Alabama state officials rather than local ones, the Justice Department said, was that Gov. Wallace and the state school board last fall took control of individual local schools in an effort to head off court-ordered desegregation. And the department went on to contend that even without this intervention Alabama law gives state officials "sufficient authority over each school district to make them proper subjects to a decree that is state-wide in its scope," and "the supervisory hierarchy of Alabama's educational system is not significantly different from that of most states."

The brief asserted specifically that Louisiana, Virginia and Delaware, where Federal courts have decided school desegregation suits, have school systems much like Alabama's, controlled primarily from the state level. In the Delaware case, it was noted, the court not only held the state responsible for local segregation but actually ordered state officials to take steps toward state-wide desegregation. This judgment was upheld by the U.S. Court of Appeals in Philadelphia. So the state-wide approach has already been applied once, although in that instance it wasn't requested by the Justice Department.

**Supreme Court Opinion**

In its Alabama brief, the Justice Department also relied on a 1958 opinion of the Supreme Court. It said that, as a result of the 1954 decision that separate-but-equal schools are unconstitutional, "state officials were thus duty bound to devote every effort toward initiating desegregation and bringing about the elimination of racial discrimination in the public school system. . . . State support of segregated schools through any arrangement, management, funds, or property cannot be squared with the (14th) Amendment's command that no state shall deny to any person within its jurisdiction the equal protection of the laws."

The Supreme Court may well be asked to make the final decision in the Alabama case if state-wide desegregation is ordered by the three-judge district court in Montgomery. Such a ruling probably wouldn't be accepted as final by Alabama officials without a Supreme Court appeal, which could be sought directly from the district court.

Even if the courts order desegregation of all Alabama schools, there's no indication yet that the Justice Department would press for similar requirements in other states. Department officials noted that the idea of a state-wide desegregation order was suggested by the district court, which asked the state, the National Association for the Advancement of Colored People, representing Negro children in the suit, and the Federal Government, as a friend of the court, to file briefs stating their views on whether such a directive should be issued.

One official commented further that even the court "really didn't have any choice. The state-wide question came up because Gov. Wallace directly interfered with the assignment of pupils in the local school district."

However, even if the Justice Department maintains this cautious view, state-wide desegregation ordered in Alabama would encourage Negroes and civil rights groups to ask for similar broad action in other states. School desegregation suits are brought by individuals, although the pending civil rights bill would also give the Government limited authority to sue.

The schools involved in the Alabama case are those in Macon County. Last summer, the Federal court ordered 12 Negroes admitted to the all-white high school in Tuskegee, and the county superintendent of education, C. A. Pruitt, carefully prepared students, teachers and parents for peaceful desegregation. But unexpectedly on the first school day in September Gov. Wallace surrounded the building with state troopers and kept out all students and teachers. Federal judges forbad the use of state troopers, so Mr. Wallace called out National Guardsmen. They were quickly nationalized and ordered away by President Kennedy.

This took a week, producing bitterness and destroying Superintendent Pruitt's preparation. When the Negroes finally entered the school, all the white students boycotted it. In January, the state board of education, of which the governor is president, closed the school. The Federal court then ordered the Negroes admitted to the all-white high schools in nearby Shorter and Notasulga, and these were promptly boycotted by all their white students. Many of the white students transferred to an all-white private school, Macon Academy, newly established with Gov. Wallace's blessing.

The Justice Department contended in its brief that the state's officials, by these and other acts designed to maintain segregated education, asserted "plenary authority over the Macon County School Board" and "demonstrated their plenary authority over all local school boards." Therefore, the department asserted, "the court may order them to exercise that authority to abolish Alabama's segregated school system."

**'Authorized Involvement'**

But even without these recent acts, the department asserted, a state-wide desegregation order is legally proper in this case because of the "state board's authorized involvement in practically every aspect of local public school education and the state board's continuous participation in the operation of segregated schools through Alabama."

According to the Government brief, the state provides most of the funds for operation and construction of the public schools, prescribes "minimum contents of courses of study," adopts rules and regulations covering school construction, school sanitation and students' physical examinations, trains and certifies teachers, exercises "a broad power of review over actions of local boards and officers" and is authorized to make rules "to meet emergencies."

These powers have been used to maintain school segregation, the Justice Department argued, and thus "the state-level defendants are the appropriate officials to at least initiate and then supervise its undoing." The department didn't propose specific steps or any time schedule but suggested that the state might be required to draw up desegregation plans, withhold funds for school construction or other programs designed for one race only and transfer some state school funds from segregated institutions to those that are desegregating.

In addition to requesting the state-wide desegregation order, the Justice Department asked the court to declare unconstitutional the state's payment of tuition grants to private segregated schools and the present application of the state's pupil placement law, which the department contended is being used to perpetuate segregation.

The tuition-grant law was attacked on the ground that it provides aid only when public school education is "unavailable." If public schools are closed to avoid integration, the Justice Department argued, the state cannot legally substitute a system of private schools that also are segregated. A similar legal attack was made by the Government on Virginia's tuition grants to private segregated schools in Prince Edward County, where public schools were closed to avoid court-ordered desegregation. That case is before the Supreme Court.

# City Schools

By Patricia Cayo Sexton

Abstract: Though other issues exist, the basic issues and problems in city schools arise from a conflict of interests between haves and have-nots. Race appears as a subdimension of the larger problem. The major contours of this engagement are seen at the federal level where the power exists to make governing decisions about school financing and in state government where conservative and usually anticity interests dominate. It is seen in a dimmer but far more explosive form in the city itself where have-nots, mainly Negroes, are pressing demands for school equity. Class lines are somewhat redrawn within liberal city governments and school systems. Negro demands give the illusion that the issue is strictly racial although, in fact, the educational and political interests of other have-not and liberal leadership groups run parallel and converge more often than they diverge.

---

*Patricia Cayo Sexton, Ph.D., New York City, New York, is Associate Professor of Educational Sociology, New York University. She is director of research evaluation of the All Day Neighborhood School, a New York City project in disadvantaged schools, on a grant from the United States Office of Education. Previously, she worked in an auto plant and with the United Auto Workers Union and was a public school teacher. She is author of Education and Income: Inequalities of Opportunity in the Public Schools (1961) and of articles for sociological, educational, and general journals. She currently is writing a book about East Harlem, scheduled for 1964 publication.*

TO talk about urban education is to talk about an old fallen phrase in such disrepute during two postwar decades that it has hidden out from scholarly journals like a furtive sex criminal. The phrase "class struggle" now appears in black tie and softened aliases as "slum and suburb," "inequalities," problems of the "disadvantaged," of the "culturally deprived," of "integration." However Americanized or blurred the new image may appear, the basic fact seems simple enough: a remarkable "class struggle" now rattles our nation's schools and the scene of sharpest conflict is the city. Southern cities—and New York—were the scenes of first eruptions, but now almost every northern city, and many suburbs, are feeling the new tremors.

A high-ranking official in New Rochelle, New York put it in these words: "It's not just race in our schools . . . it's class warfare!" Class conflict, of course, is not the only issue in city schools. There is ethnic conflict and the special status of Negroes—and of Puerto Ricans and other identifiable groups—at the bottom end of the ladder and the special Rickover pressure-cooked conformism and prestige-college frenzy at the upper end.[1] Nor are the sides in the conflict always clearly formed. But, usually, when the chaff and wheat are separated, what is left is the "haves" in one pile and "have-nots" in another, with some impurities in each—middle-class white "liberals," for example, who support some Negro demands and white have-nots who oppose them. Banfield and Wilson claim four important cleavages in city politics: (1) haves and have-nots, (2) suburbanites and the central city, (3) ethnic and racial groups, (4) political parties.[2] A reduction to more basic outlines might show that the first category would, with some slippage, cover the other three. Indeed, the authors acknowledge as much when they say: "These tend to cut across each other and, in general, to become one fundamental cleavage separating two opposed conceptions of the public interest."[3] When they refer to ". . . The fundamental cleavage between the public-regarding Anglo-Saxon Protestant, middle-class ethos and the private-regarding lower-class, immigrant ethos," they seem to refer, though the phrase is unspoken, to one aspect of the class struggle.[4]

Other major urban school issues exist—finances, bureaucracy, and the unionization of teachers, among others—and may seem, on the surface, unrelated to class conflict. At second glance, the shortage of school funds can be seen as a product of the antitax ideology of haves. The behemoth bureaucracies may be seen everywhere as more accessible to and influenced by haves, and the decentralization of administration—to which New York's Superintendent Gross and others have devoted themselves—may be seen as a partial response to the growing arousal of have-not groups. The unionization of city

[1] Rickover supporters in the Council on Basic Education voice some misgivings about the Admiral's program to restrict higher education to an elite.

[2] Edward C. Banfield and James Q. Wilson, *City Politics* (Cambridge, Mass.: Harvard University Press and MIT Press, 1963).

[3] *Ibid.*, p. 35.

[4] *Ibid.*, p. 329. Their ascription of a "public-regarding" ethos to the middle class and a "private-regarding" one to the "lower class" seems an extraordinary and questionable reversal of the usual association of the middle class with private efforts and the lower class with public efforts. It is most puzzling when contrasted with their summary statement: "If in the old days [of lower class ward politics] specific material inducements were illegally given as bribes to favored individuals, now much bigger ones are legally given to a different class of favored individuals . . ." (p. 340).

teachers may be seen as a response to the hitherto rather rigid conservative control of school systems and the new thrust of liberalism in the cities and the schools, released by have-not votes and agitation, as well as a defense against the difficult conditions in have-not schools.[8]

### LEVELS OF CONFLICT

The class struggle in the schools and the struggle for power which is part of it are carried on at many levels. In some cases, it seems least visible under the spotlight—on the school boards. Through liberal and have-not activity, some city school boards are now composed of middle-class moderates who are more inclined to represent the educational interests of have-nots than were their more conservative predecessors. Some big-city boards, as New York's, seem exemplary public servants, superior in purpose and competence to higher political bodies. Their efforts on behalf of have-nots are limited by several personal as well as external characteristics: they are haves, a quality that usually though not invariably limits zeal and identity with have-nots; they are moderates in contrast to those leading the more militant have-not groups. Among the limits set by school systems are: (1) the traditional conservative reluctance of boards to interfere in the operations of the bureaucracy: (2) the inertia and resistance of the bureaucracy to pressure from the board; (3) the usual tendency to become defensive of "their system" and to take criticisms of the system as personal affronts; (4) influences from middle-class interests which are usually more insistent and weighty than have-not pressure; (5) interference from outside groups—such as the unprecedented threat of the Northcentral Association to withdraw accreditation from the Chicago schools if the school board insisted on a step which forced Superintendent Willis into further desegregation. The external limits on the situation, however, seem more determining: (1) the difficulty of the job to be done, (2) the lack of sufficient money to do the job.

Services to have-nots within the city system, therefore, are limited by these conservative factors: (1) the moderate position of most liberal board members and the insufficiency of zeal or identification to drive home the grievances of have-nots: (2) conservatism and resistance within the bureaucracy: (3) conservative influence which acts to shut off funds to the schools.

In the movement of the class struggle from one end of the continuum, where a small elite holds total power, to the other extreme, where have-nots share proportionate influence, there are many points of compromise, and public officials tend to pursue ever more liberal ends and means. The white liberals who sit on some city boards may begin to push for more rapid change or may be replaced soon by representatives who will.

The claim that the city and its school system are so constrained by outside conservatism, especially at the state level, that they can do little seems largely true, though partially exaggerated. Too often outside interference is made an excuse for inertia. City schools have not given adequate service to have-nots largely because the have-

[8] In New York and Chicago especially, the popular political issues of "bossism" and "machine politics" have been referred to the school arena. In New York, 110 Livingston Street (the Board of Education headquarters) has appeared to many as the school equivalent of "city hall," the one place you "can't beat" and with which you often cannot even communicate. Now a proposal is being considered to divide the city schools into several fairly autonomous geographic units in order to scatter the shots at "city hall" and provide easier access.

nots were underrepresented in decision-making positions. As cities go, New York's school board seems unusually enlightened, appointed as it is by a relatively responsive mayor and served by two unusually alert citizen groups—the Public Education Association and the United Parents Association. Yet a nine-member board includes only one Negro and no Puerto Rican, although these groups together compose 40 per cent of the city's public school enrollment. Nor is there any blue-collar worker or person of modest means or position on the board, but, then, such individuals are rare specimens on city boards. One trade unionist, himself a university graduate and member of a professional union, sits on the board. Of some 777 top officials in the system—board members, superintendents, and principals—it appears that only six are Negroes, 0.8 per cent of the total.[6]

Although it is sometimes asserted that the interest-group identity of board members does not affect their decision-making, what may be more nearly the case, given present knowledge of group dynamics, is that the group interests of the lone have-not representative may be submerged in a board's moderate consensus.

Perhaps the "equality lag" within city systems may be more directly attributable to deficiencies in have-not organization than to lack of good faith among liberals and board members. Many cities could nearly be "possessed" by Negroes who approach a majority in some cases, but Negroes do not vote their numerical strength and may be evicted from the city limits by urban renewal before they catch up with their potential. Nor do labor unions use their full authority in school affairs. A major weakness of have-nots is their limited understanding of power, who has it and how to get it; they also lack the time, money, and organization often needed to purchase it.[7]

[6] Daniel Griffiths and Others, *Teacher Mobility in New York City* (New York, 1963).

### BEYOND THE CITY LIMITS

Local class conflict seems only a dim reflection of a larger conflict. The main drama of class conflict and thrust of conservatism are seen in full dimension in a larger arena—at the federal and state levels. The national scene cannot be ignored in any consideration of the city school situation. Only at this level does there appear a possibility of releasing the funds needed to support high-quality education and the high-level job opportunity that goes with it. The claim that federal aid to education is the *only* school issue and that other concerns are simply distractions is given substantial support by any cursory study of city school budgets and revenue limitations.[8]

Nationally, the conflict seems shaped by at least two major factors:

(1) The congressional system is biased against have-nots and their representatives. The bias results from at

[7] Banfield and Wilson, *op. cit.*, p. 282: "Organized labor—even if it includes in its ranks the majority of all the adult citizens in the community—is generally regarded as a 'special interest' which must be 'represented'; businessmen, on the other hand, are often regarded, not as 'representing business' as a 'special interest,' but as serving the community as a whole. Businessmen, in Peter Clark's term, often are viewed as 'symbols of civic legitimacy.' Labor leaders rarely have this symbolic quality, but must contend with whatever stigma attaches to being from a lower-class background and associated with a special-interest group. . . . Labor is handicapped not only by having imputed to it less civic virtue but also by a shortage of money and organizational skills."

[8] This seems to suggest that social scientists could much more profitably study the political mechanisms by which such aid could be released rather than the often esoteric and "academic" studies of culture, personality, and the like which now tend overly to occupy many who are concerned with have-nots.

least two forms of conservative manipulation: (a) manipulation of rural and small-town interests, North and South, and, through them, congressional apportionment and votes; (b) the additional manipulation of southern rural conservatism—which is given unusual congressional power by the committee seniority system—through the exchange of votes on the race issue.

The superior effective power of haves at this top level serves to block federal legislation in general but specifically those measures that might ensure rapid economic growth through federal expenditures, full employment, and the extension of power to have-nots—measures that would give significant relief to the city's distress. More directly revelant, it has blocked any substantial aid to urban areas and held up the transfer of political power from rural to urban areas.[9]

Moreover, largely by the manipulation of conflicting religious interests, this coalition has prevented the passage of the federal aid that seems indispensable to urban schools. At the same time, it has continued, through extension programs, copious aid to rural education.

(2) Seriously deprived have-nots have failed to enter their full power into the political arena.

## THE STATE

If direct federal aid seems distant and the aid formula unlikely to provide much assistance to the cities, fiscal aid from the state may be closer at hand, depending upon how quickly reapportionment will be enforced in the states. New York City received $197 in school aid for each student in its public schools in 1961–1962, while the average in the rest of the state was $314. Miami, Florida paid $47 million in state taxes in one recent year and got back only $1.5 million in grants-in-aid. With sympathetic legislatures, cities may be able to call on other revenues, including an income tax on suburbanites working in the city such as has been adopted in Philadelphia and Detroit.

## INEQUALITIES

The consequences of local, state, and national class conflict are seen in the school inequalities and class-biased training given to children even within the most liberal city systems. Only in the past few years has the concern of some unionists, academicians, liberals, and many Negroes brought the full range of inequities to public attention. The "spoils" of the city school, limited as they are by outside controls, are usually divided according to the crude formula "them as has gets." Only now in some cities is there any insistence on the more radical "compensatory" formula—"to each according to need."

Documentary evidence about class inequalities, past and present, is now weighty. My own study of one large city school system, *Education and Income*, describes the various forms of class inequities within one system.[10] I will refer here only to a few facts about Chicago and New York (not the cities of my study). In 1955, following Dr. Kenneth Clark's demand for attention to Negro schools, an "outside" study found that Negro and Puerto Rican schools in New York City were generally inferior to "Other" schools.[11] In a group of Negro and Puerto Rican schools (the *X* Group), 50.3 per cent of teach-

[9] The assumption that a proper apportioning of representatives, giving a proper share to the city's suburban areas, will result in an accretion of power to haves may not be warranted inasmuch as have-nots are also being rapidly suburbanized yet, contrary to expectation, seem to be maintaining their political identity.

[10] Patricia Cayo Sexton, *Education and Income* (New York: Viking Press, 1961).

[11] *The Status of the Public School Education of Negro and Puerto Rican Children in New York City*, October, 1953.

ers were on tenure, compared to 78.2 per cent in the "Other" group (the *Y* Group); 18.1 per cent in the *X* group and only 8.3 per cent in the *Y* group were "permanent substitutes." On the average, facilities in Group *X* schools were older, less adequate, and more poorly maintained than *Y* schools. The costs of operating *Y* schools were higher than costs in *X* schools. Though the New York Board of Education now claims that Negro and Puerto Rican schools are equal or superior to "Other" schools, Dr. Kenneth Clark still says Harlem schools reflect "a consistent pattern of criminal neglect."

In the absence of cost-accounting, comparative expenditures in have and have-not schools in New York cannot be checked. Certainly efforts are being made by New York schools to provide better education for deprived minorities, especially in "certain" schools where extra services tend to be overconcentrated, but the schools still do not seem to approach full equality, and the cost estimates do not measure the *full* cost of education—the differences in nursery and kindergarten education, the last two years of high school missed by the low-income dropout, and the costs of higher education—not to mention the low-quality and segregated "ability" tracks into which have-not children are often placed.

Though New York permitted an outside study of school inequalities in 1954, the Chicago Superintendent of Schools, Benjamin Willis, has only in the past year agreed to a three-man study committee of which he will be a member. In 1962 John E. Coons, Northwestern University law professor, prepared for the United States Commission on Civil Rights a report on segregated schools in Chicago.[12] Ten schools in each of three groups were selected—white, integrated, Negro—and the findings were as follows:

| 1961–1962 | White | Integrated | Negro |
|---|---|---|---|
| Number of pupils per classrooms | 30.95 | 34.95 | 46.8 |
| Appropriation per pupil | $342 | $320 | $269 |
| Number of uncertified teachers | 12% | 23% | 27% |
| Average number of books per pupil | 5.0 | 3.5 | 2.5 |

In 1963 a *Handbook of Chicago School Segregation* claimed that 1961 appropriations for school operating expenses were almost 25 per cent greater per pupil in white than in Negro schools, that teacher salaries were 18 per cent higher, that nonteaching operating expenses—clerical and maintenance, salaries, supplies, textbooks—were 50 per cent higher, and that only 3 per cent of Chicago's Negro population finishes college.[13]

The reluctance of Chicago schools to move as far as New York on the race issue seems to derive from at least these sources: (1) the centralization of power in the Chicago system, parallel to the centralization of civic power in the person of the mayor; (2) the praise of Dr. Conant—probably the most influential person in American education—for Mr. Willis and the Chicago method and his concurrent criticism of the New York method; (3) the presence in New York of large numbers of unusually concerned and articulate white middle-class liberals; (4) the inordinate influence in Chicago schools and civic affairs of State Street, tax-conscious financial interests; (5) the past failures of have-not organization in Chicago.

[12] John E. Coons, *Civil Rights USA, Chicago, 1962*, A Report to the United States Commission on Civil Rights.

[13] *Handbook of Chicago School Segregation, 1963*, compiled and edited by the Education Committee, Coordinating Council of Community Organizations, August 1963.

An example of influential conservatism in relation to have-nots and the schools is seen in this passage from the Chicago *Tribune:* "Let's Throw the Slobs out of School":[14]

> The ignoramuses have had their chance. It is time to make them responsible for their actions. . . . Sweep through the school house with a fiery broom. Remove the deadwood, the troublemakers, the no-goods, the thugs. . . .
>
> [The teacher can tell on the first day] which students are the dissatisfied, the misfits, the illitearate [*sic*], undeserving, *non compos* nincompoops.
>
> We have become the victims of the great transcendental fraud, a deceit put upon us by a generation of psychiatrists, guidance counselors, and psychologists, none of whom spends any more time in the classroom dealing with these apes than he has to.

Despite the fact that median income in Chicago is higher than in New York, Chicago in one recent year spent $410 per pupil while New York spent $761.52.[15]

Inequalities and the compensatory formula now being advocated—reverse inequality—produce only one kind of conflict, one which may be more easily resolved than other disputes because it involves simply the redistribution of money. The "concept" of equality itself seems far less susceptible to change—the notion that, with proper attention, the abilities of have-not children may prove roughly equal to those of haves and that, therefore, they should not be separated, sent off at an early age on different tracks, or given disproportionate access to higher education.

In New York City, fiscal inequality, segregation, and the "concept" of inequality resulted in the following racial distribution of recent graduating classes in New York's special high schools for "gifted children" drawn from the whole city:

| | Negroes | Puerto Ricans | Others |
|---|---|---|---|
| Bronx High School of Science | 14 | 2 | 863 |
| Stuyvesant High School | 23 | 2 | 629 |
| High School of Music and Art | 45 | 12 | 638 |
| Brooklyn Technical School | 22 | 6 | 907 |

In one recent year, Negroes and Puerto Ricans were about 14 per cent of the graduating class in the city's academic high schools and about 50 per cent in the city's vocational high schools. In the vocational schools, Negroes and Puerto Ricans tend to be heavily concentrated in inferior manual trade schools and seriously underrepresented in the technical schools. For example, in a class of 361 in the aviation school (a high-level technical schools), 26 were Negroes, 51 were Puerto Ricans, 284 were "Others." In the class at the New York printing school, 4 were Negroes, 16 were Puerto Ricans, and 183 were "Others." At the Clara Barton school for hospital workers, Negroes were a clear majority. Vocational schools have been "tightening standards" recently and sending minorities to "academic" schools where, if neglected, they may be no better off.

### Higher Education

A developing conflict centers on higher education. Though ethnic records are not kept, one expert estimate is that

[14] Reprint from *Chicago Tribune Magazine,* "Let's Throw the Slobs out of School," as it appears in *Human Events,* September 21, 1963, a weekly magazine distributed to social-studies classes in schools throughout the nation.

[15] While 21.3 per cent of Chicago's population have incomes over $10,000 annually, only 18.5 per cent of New Yorkers are in this category. In Chicago, 26.3 per cent of whites are in this bracket and only 8.7 per cent of Negroes; at the same time, 9.9 per cent of whites and 28.4 per cent of Negroes have incomes less than $3,000 per year.

about 2 per cent of students at the University of the City of New York (formerly the city's free colleges) are Negro. One branch of the University is located at the edge of Harlem and is more integrated and accessible to Negroes than other branches, yet less than 5 per cent Negro enrollment is reported there.

In New York, Negroes tend to fall between the free city colleges and the dominant and expensive private universities (New York University, Columbia, and their like). They can neither qualify for the former nor afford the latter. Needs tests are not applied to city-college admissions, and free tuition is extended to the affluent with an 85 high school average and denied the impoverished with an 84 average; enrollments are reported to be now predominantly middle class.[16]

Some critics now say that the only equitable system of tuition charges, in all types of institutions, is a sliding scale based on ability to pay. New York does not have a single state university; what is called the University of the State of New York is simply a scattered collection, mainly in nonurban areas, of teachers colleges, agricultural schools, a few technical schools.[17] Recently, the state gave a 40 per cent subsidy to New York's city colleges, converted by some graduate offerings into the University of the City of New York. The importance of federal funds to education is seen in federal research and development investments in California and the pervading effect such funds have had in underwriting and stimulating growth of educational institutions there.

New York City's effort through the years to provide free college education and to compensate for the void at the state level has been extraordinary. No other city appears to have made any comparable effort. Still the city seems not to have deployed its college resources equitably, and the gathering debate over the city colleges suggests a conflict of view—or interest—between the city's have-nots and its numerous liberal middle class.[18]

The compilation and release of information about ethnic and social class enrollments in institutions of higher education, as well as the postsecondary experiences of students, appear to be the first step out of the college inequities which have, in turn, imposed inequities on lower educational levels. Equality of opportunity in higher education will probably come only through a national network of community colleges—low in cost and located within easy commuting distance—and available to all "average"-or-above students who want further education.[19] Perhaps

[16] A recent admissions change at the city university from sole reliance on high school averages to inclusion of college boards scores is expected further to lighten the skin of enrollees. The Board of Higher Education, however, is now discussing a change of admissions standards to accommodate more Negroes.

[17] California spent $33 million on community and junior colleges in 1961–1962 and $214 million on other types of higher education. New York State spent $5.7 million on community and junior colleges and $111 million on other types of higher education. M. M. Chambers, Joint Office of Institutional Research, "Appropriations of State Funds for Operating Expenses of Higher Education, 1961–62." Washington, D. C., January 1962.

[18] None of the New York Board of Education's three community colleges (where admissions standards are such that Negroes can, and often do, qualify) are located in Negro areas. One is now scheduled for Manhattan, but the tentative location is between 23rd and 42nd streets, a white area—one of the few in Manhattan. One high ranking public-school official is quoted as saying "the municipal colleges are not equipped to operate vestibule courses for students who have to be civilized."

[19] The so-called "Russell Report" (Columbia Teachers College) to the Michigan legislature reported that the college enrollments by area rose and fell in proportion to the distance from the state's colleges.

Britain's proposed experiment with televised university instruction will provide an alternative, or supplementary model, to the community college.

## CLASS AND ETHNIC ROLES

Within the city itself, at least these elements seem to have some separate, though often overlapping, identity: (1) Negroes; (2) labor unions; (3) white have-nots; (4) white liberals; (5) the Jewish community; (6) the Catholic community; (7) business organizations and their allies in city silk-stocking areas.

The roles and activities of these groups in relation to the schools have never been adequately defined, but impressionistic observation seems to indicate the following outlines: The main white support for civil rights in the past several decades has unquestionably come from the leadership within the labor and Jewish communities—with some major assists from middle-class liberal and church groups, particularly in the last several years. The rank-and-file within the labor-union and Jewish communities, more personally threatened by Negroes, have tended to lag some distance behind on civil rights.[20]

In the schools, the class and ethnic lines are distinct, even though less clearly drawn than in the larger community. Some political allies of Negroes have been largely outside the school conflict: unions and large numbers of white have-nots, notably the Poles, Italians, and Irish who have tended to use parochial schools. Some feel it is fortunate that these have-not groups have tended to be outside the public school controversy; others feel that the parochial-public school separation has worked hardships on the public schools and delayed a crisis that would, in the long run, be beneficial to the public schools. Union leaders have been less involved in the schools than in other political affairs because of what seems to be a rather basic alienation from the schools and frequently because of their own parochial background. They have, however, supported school expansion, improvement, financing, and their organized political power, as in New York, has given important direct assistance to the schools and to the claims of Negroes on the schools.

The organized business community has traditionally opposed tax increases for public education, the leadership in these groups usually residing in the suburbs where they have provided ample funds for good schools. Powerful real-estate groups have opposed property taxes as well as school and housing integration. The "swing" group has been the Jewish community and, to some extent, the white liberal. The Jewish community, even middle and upper income, has consistently given solid support to the public schools,[21] but its own heavy stress on education and the fact that it is one of the largest remaining white middle-class groups within many cities have produced some ambivalence in its role and some conflict in unexpected places. The con-

[20] On general political and economic issues, class lines seem quite clearly drawn: Negroes, unions, white have-nots, and a preponderance of the Jewish community appear on the have-not side, and the organized business, middle-class, and upper-class groups on the have side. Strangely, perhaps, and to some large extent understandably, Negroes chose two groups closest to them politically for their first-line offense: unions and the Jewish community. Both were vulnerable, having made continuing proclamations, accompanied by considerable effort, on behalf of equality and brotherhood, yet having done much less than their best to provide equality for Negroes within their own jurisdictions.

[21] In Detroit, a recent school-tax election was won, informed observers report, by majorities rolled up in the Negro and Jewish precincts.

frontation of these two allies in the city public schools is a source of growing distress to both groups. Because the Jewish community has tended to remain in the city and to use the public schools, it is generally contiguous, geographically and empathically, with the Negro community and located in the middle of the integration cross fire.[22] Negroes point to Jewish predominance in the "better" high schools, the top "ability" groups, the free city colleges, and in public school administration. In many of the "integrating" areas of the city, the two groups have joined in open conflict, though in other areas they have integrated without friction. Thus, the Jewish community, because it has not fled like others from the city, often finds itself in the same situation as the labor movement with regard to Negroes: competition within a family of mutual interest for a scarcity of opportunities—in the schools in one case and in the job market in the other.[23] Perhaps for this reason, among others, the International Ladies Garment Workers Union has been a particularly sensitive target.[24]

[22] If the Jewish community is represented in the schools in proportion to its numbers in the population (one quarter of the New York population), then together with Negroes and Puerto Ricans (40 per cent) it would represent at least 65 per cent of public school enrollments.

[23] On the nine-man New York City school board, three representatives are traditionally selected for each of the three religious communities: Catholic, Protestant, Jewish. Though the Jewish community is represented by three board members, plus a Jewish-Unitarian superintendent of schools, the Negro and Puerto Rican communities, who constitute 40 per cent of the public school population, have only one representative (a Negro) on the board.

[24] The Negro struggle seems to have an interacting effect on other have-not groups. In Detroit, the civil-rights movement is supported by the auto workers' union. In battle-torn Chicago, where the class struggle appears in its more primitive form, unembellished by

### ACCULTURATION AND INTEGRATION

The urban schools now confront the most difficult task they have attempted. Never before has a major *racial* minority been integrated into a nation's school or society. In fact, such integration within a dominantly non-Latin European population is unprecedented in history, the Soviets having settled their racial affairs by geographic separation.

The urban school, whose heavy job has always been the acculturation of immigrant and foreign-speaking ethnic groups, is now taking its first large bite of racial acculturation, as a giant reptile tries to swallow a whole animal. The city is accustomed to educating the immigrant: In New York City in 1960, 48.6 per cent of the population was either foreign-born or had at least one foreign-born parent; in Chicago, the figure was 35.9; in Detroit, 32.2; in San Francisco, 43.5. But the Negro group is unique in these respects: (1) it is the largest "immigrant" group of low-income, public-school-using Protestants (many other recent immigrations having skirted the public schools); (2) it is the first large racial minority to come to the city schools and the first large group with non-Western origins; (3) it has had a unique history of educational and social deprivation.

The active demand of Negro parents for integration perhaps cannot be fully appeased. Negro—and Puerto Rican—

righteous platitudes, the school board seems to have had two lone dissenters on equality and class issues: a steelworker representative (the only unionist on the board) and a Negro (another Negro member has consistently voted with the more conservative majority). The civil-rights drive, however, comes at a time when white workers feel insecure about jobs and their place in society and fear Negro competition in an already glutted job market. In areas of the nation where white have-nots are not organized (as in the South) and therefore do not have this broad view, racial conflict among have-nots is maximum.

students are approaching a majority in many city public schools and any demand for total, one-for-one integration —which few would make—may be impossible in view of the increasing shortage of white public school students. Rather large-scale integration seems possible, however, as New York City is now beginning to demonstrate. Perhaps the issue will finally be settled by integrated urban renewal, or by setting up superschools and superservices in Negro areas—such as the Amidon school in Washington, D. C.—that will attract white students into Negro areas. Mainly, the urban school integration movement has served the latent function of calling attention to Negro education and arousing concern over the quality of Negro schools. The hope is held by many that, if Negro schools are improved, Negroes will not be so eager to integrate.

Among the newer racial demands in urban schools are: (1) compensatory treatment to balance past inequities; (2) "reverse" integration of schools and the busing of whites into Negro schools in order to "equalize" sacrifice (in New York, the demand has been for compulsory busing of both groups; on this most controversial point, Dr. Kenneth Clark has objected that Harlem schools are not fit either for Negroes or for whites and that busing should be "out" only); (3) heterogeneous grouping to scatter Negroes throughout the school population in any given school, rather than segregating them into slow-moving, homogeneous "ability" groups. In New York City and elsewhere, homogeneous grouping has proceeded so far that children in some places are "ability grouped" in kindergarten, based on whether or not they have been to nursery school; these groups, starting almost in the cradle, tend to perpetuate themselves throughout the child's school life.

## SOME WAYS OUT

In this author's view, major breakthroughs in urban education may come via any or all of the numerous possible routes.

Outside the school, the possibilities include: (1) a political break-through of have-nots at the congressional and state legislative levels; (2) increasing civil-rights activity and pressure; (3) organization of have-nots at the following levels: political community, ethnic (civil rights), on the job (union), out of a job (unemployed); (4) federal aid programs—either through direct federal aid or around this bottleneck and through special funds, job retraining, Health, Education, and Welfare funds, urban-renewal domestic peace corps, vocational education; (5) massive infusions of voluntary aid to the schools and assistance from private foundations.

Inside the schools, the break-through might come from such sources as: (1) massive enlargement of college opportunities through the introduction of new funds or new methods of teaching; (2) technological innovation in public school, especially educational television; (3) the unionization of teachers and the arousal of the professional group with the greatest stake in improved schools (organized teachers, it has been demonstrated in New York City, can have an electric effect on the schools, attracting qualified teachers through improved salaries and working conditions, reduced class size, improved curriculum, and quality of school administration and instruction); (4) decentralization of city school systems to encourage greater participation of have-nots and clearer and closer channels of communication.[25]

[25] In New York, the new community school boards, serving as advisory groups, have already geometrically increased the flow of new ideas, spirit, and activity into the schools

Recent months have seen a spectacular burst of citizen interest in the schools, perhaps unparalleled by anything in the history of public education. Women's clubs, youth groups, civil-rights organizations, settlement houses, churches, local government, private funds, and foundations have taken up "tutorials" in deprived areas, and the more imaginative and energetic groups have moved out from there into community organization. The intrusion of nonschool groups into the learning process has injected some new excited spirit into the institutional drabness.

Accompanying this new citizen concern with the "disadvantaged" is a new wave of interest among educators, writers, and scholars in the problems of poverty and equality, a current that has in recent months washed over previous concentration on the "gifted" and almost swept the word out of the educator's vocabulary.

Another source of backdoor assistance to the schools will be the decongestion of cities—a desperate need of New York especially—by: (1) the natural attrition of a suburban-bound, affluent population, and a Negro population pushing ever outward; (2) the forced decentralization of urban renewal, thinning out populations and bringing back into central areas a more taxable balance of middle and lower income groups. Renewal, intelligently, humanely, and artfully carried on, has the potential, of course, to remake urban life—by decentralizing, rebuilding, rehabilitating, and creating a truly heterogeneous class and ethnic community.

from the local communities and cleared the clogged lines of communication.

A problem with a past

# The Negro Child and Our Schools

by

**Marvin Rich**

MANY white people in northern urban communities, from New York to Los Angeles, are obviously distressed by the new pressure being put on their schools by the civil rights movement. Many tend to regard this pressure as ill-considered and unfair. "This isn't the South," they say. "We have never barred anyone from our schools because of color. To the extent that segregation exists here, it is the result of housing patterns. Why ask our children to solve a problem that is the responsibility of the adult community?"

This attitude seems reasonable enough. The situation in the North cannot sensibly be equated with the situation in the South. In Louisiana, for example, many parishes did not establish Negro high schools until the 1940s. During the 1930s, the General Education Fund provided over $100 million to enable southern states to build schools for Negroes. But even with this sizeable subsidy, most southern states fell significantly short of what could have been expected of them. The denial of an adequate education to Negroes prejudiced their position in other important areas. Many were unable to pass literacy tests for voter registration, even where these were honestly applied, and it imposed limits on jobs and housing as well.

But what about the North? How much better has it really been? New York State ended separate schools for Negroes in 1898. In practice, some segregated schools lingered on into the 1930s. However, this is by no means the only standard to be applied. The fact is that many members of the white community are now "surprised" by the discontent with the quality of education available to Negroes only because, subconsciously or not, they shut their eyes and ears to earlier evidence.

Early in 1935, after a spectacular riot in Harlem, a Mayor's Committee on conditions in that ghetto community asked E. Franklin Frazier, a well-known sociologist, now dead, to make a comprehensive study of it. His study resulted in severe criticism of the Board of Education and 45 general recommendations for the improvement of Harlem schools. They included many of the proposals being made now—29 years later—by civil rights organizations. In 1935, little or nothing was done about them.

The Frazier report was only one of a number that have gone largely unheeded. In 1939, a committee of principals under the chairmanship of Dr. Jacob Greenberg asked for better physical plants, smaller classes, more regularly licensed teachers and additional staff for Harlem schools. In 1943, after another shocking race riot in Harlem, a City Wide Citizens Committee was appointed to conduct an investigation. Its report made in 1944, explains a good deal of the unrest that exists today.

"The low socio-economic status of the large portion of the population in Harlem inevitably occasions a carry over of serious environmental problems into the schools of that area," it noted. "These problems are an adjunct of the basic unrest of the population. There is a background of bitterness and rebellion, keenly felt by many of the children which has been engendered by unfair discrimination against the adults in the family. Lack of employment, poorly paid employment of the mothers instead of the fathers and sons, unsatisfactory housing, exploitation by liquor and vice groups, form the background of the lives of the pupils." The committee urged, among other reforms, the building of additional schools, a reduction in class size, courses in intercultural relations for teachers stressing the achievements of Negroes and other minority groups, more vocational schools, all-day neighborhood schools and nursery schools. That was 20 years ago. A whole new generation has grown to maturity. Yet the old evils remain almost untouched. Is it any wonder the Negro community is now boiling over with impatience?

THE recommendations of these committees and commissions, it should be noted, were not aimed at building an integrated society. They had the far more limited goal of improving the Harlem schools, largely as a means of decreasing crime and delinquency. Yet Harlem schools have continued to lag behind white schools, and it is abundantly clear that Negro youngsters in New York, as in many other northern cities, attend schools that are not only separate but unequal.

Let us look at the more recent history. In 1954, prodded by Dr. Kenneth Clark and the Supreme Court decision in Brown vs. the Board of Education, the N.Y.C. Board of Education announced that its policy was to "devise and put into operation a plan that would prevent the further development of racially homogeneous schools, and to integrate existing ones only as quickly as practicable." The Board of Education established a Commission on Integration, and approved a report which concluded that "segregated education is inferior education."

Now, in 1964, many people are expressing surprise and dismay over the school boycott and other measures impatiently advocated to end the long-festering school situation in Harlem

and other Negro ghettoes. The reaction is honest enough, in most instances, but only because for so long, for 30 years in New York, the facts have been ignored even when published on newspaper front pages. For 30 years in New York, Negro parents have been told that the education of their children will be improved to meet white standards. But the performance has never approached the promise. Now they are groping for new solutions and for new people to put those solutions into practice. Is that really so hard to understand?

SOME of the proposals now being advocated to correct old and painful wrongs fly in the face of established norms. But it would be wrong to reject them out of hand. After all, the old norms have not done so very well for either white or Negro children.Itwould be much wiser to examine carefully each proposal to see whether it would really do what it purports to do. For example, the open enrollment plan advanced by the Parents' Workshop for Equality in New York City four years ago now reaches some 15,000 students. One gathers that it represents a real improvement for these youngsters. But they represent only a very small fraction of the one million students now enrolled in our schools. We have several other programs to assist children with backgrounds of social and cultural deprivation. Perhaps the most important of these is the Higher Horizons Program. However, there is no question that all of these are by themselves hopelessly inadequate. On analysis, it seems impossible significantly to increase the quality of education received by Negro students without integration. On the other hand, it is equally true, and equally important to recognize, that there will be no meaningful kind of integration unless the quality of education is significantly raised. White parents simply will not allow the integration of their children into inferior schools.

Where does this leave us?

It is obvious that certain devices, such as the Princeton Plan, can work more effectively in suburban and smaller communities than in the great urban sprawls of New York, Chicago and Los Angeles. There is no excuse at all for the failure to integrate in the suburbs and in the smaller communities. There are real difficulties involved in integrating schools in the large cities. But difficulties should not be excuses. We must remember that de facto segregated class rooms say to Negro children "You are black. You belong apart. You are inferior." To white children they say, "You are superior. You are important. You are somebody because you are white." When children have learned to feel this way about themselves and others, when the unspoken lesson taught by segregation has distorted their minds and dulled their spirits, the efforts of our most dedicated teachers cannot be expected to undo the damage. This is what we must avoid.

I, for one, believe that the fuss and furor of the past few months have been helpful. Extreme statements have been made and tensions raised, but for the first time the white population of New York City is beginning to sense the depth of Negro resentment and the urgency of the need for change. We must go beyond the recognition of past inadequacies. Now that we understand how badly we have failed, we must begin to fight for a meaningful program at every level. This will cost millions and millions of dollars. We must reduce class sizes—not by one or two pupils per class—but in half, from 35 to 15 or 20. This may cause double sessions for a while until the new schools we so desperately need are built. But it must be done. We must get the thousands of new teachers that this will require, and place them where they are needed, not where they would like to go. Somehow, also, the Board of Examiners must learn that Negroes and Puerto Ricans are qualified for promotion to become principals and administrators of the school system.

There seem to be some misgivings about the wisdom of continuing events which may cause disaffection and even animosity toward the Negro minority among the members of the white community. Yet if the old apathy turns into antipathy, the Negro cause will not really be damaged. So little that is beneficial to the Negro community can come out of apathy—little worse than the present state of the Negro can be inflicted on him. At least the claims have been heard—for the first time—and if the first white reaction to them is antagonistic, the second white reaction may be a reluctant willingness to make concessions in order that the troublesome challenges may end.

Perhaps it is part of an educational process we must all undergo, we and our children alike.

Promises but no action

# Genocide Convention

by

**Betty Kaye Taylor**

THE simple and inexplicable fact is that our government has not yet ratified the United Nations Genocide Convention. Here is the story so far.

In the early part of February, 1963 a delegation of American Jewish leaders met with officers of the Treaty Division of the State Department to discuss the Administration's plans for securing early ratification of the Genocide Convention. The eight-member delegation represented six national Jewish organizations. Jacob Clayman, Administrative Director, IUD, AFL-CIO, attended for the Jewish Labor Committee.

The State Dept. representatives felt confident that Administration support for the measure would receive speedy approval in the Senate. But this approval has not been forthcoming.

The Jewish community, together with the AFL-CIO and others, has been energetically seeking support for this measure. As a result, resolutions have been adopted

## Some Unemployed Youths Rendered Virtually "Untrainable" Becuase of Lack of Schooling

Secretary of Labor W. Willard Wirtz in his report to Congress on the first full year of operations under the Manpower Development and Training Act, noted that the effects of lack of schooling are so drastic in the case of some youths, that not only are they unable to find any employment for which they are qualified, but they are virtually incapable of being trained for a vocation and job.

The Secretary called attention to the fact that nearly one-fourth of the manpower program trainees at the present time are nonwhite -- about the same proportion as this group represented among all unemployed persons in 1963. More than 40 percent of all trainees were women.

(MORE)

The typical trainee in 1963 was a young adult with family responsibilities. Two-thirds of the male trainees were heads of households. Six out of ten were primary wage earners. Most of the trainees were high school graduates.

"The characteristics of MDTA trainees point up two facts", Mr. Wirtz said, "--that the program has worked well for those equipped to take advantage of it, and has provided a step up the skill ladder for workers with deep and permanent attachment to the labor force. At the same time, because of limitations that were removed in December 1963, by the Congress, the MDTA program has not reached deeply enough into the areas where much of our unemployment has its roots -- into the young age brackets where lack of schooling disqualified a young man or woman not only from jobs, but for training for jobs. During 1964 the training program will begin to bring effective help to these young people."

. More than 500 different occupations have been approved for training projects since the inception of MDTA involving more than 166,000 persons to date. More than 103,000 persons were approved for such training in 1963 alone. Of this total, about 8,100 trainees were approved for on-the-job training, primarily in employer's establishments in 1963.

. About 70 percent of MDTA trainees found jobs, most of them in occupations related to their training, through the local State employment services.

. More than 38,000 individuals received a variety of special counseling, testing, and placement services from the inception of the program (30,000 in 1963) in so-called experimental and demonstration projects designed to meet individual needs.

(MORE)

## Low Income Families Hardest Hit by Higher Transit Fares

Negro families, elderly families, and families with annual incomes under $3000 are less likely to own an automobile and are thus more dependent upon public transportation, it is pointed out in an article in the March 1964 Issue of the Department of Labor's Monthly Labor Review.

Public transit fares have been a major contributor to rising consumer prices over the last decade. Average prices of public transit in American cities has almost doubled since 1950.

At the same time, the demand for transit -- outside of rush hours -- has fallen.

Those most affected by rising transit fares are the low income populations of the central cities.

A limited number of reprints of the article --"Demand and Trends in Prices in Urban Transit" -- will be available at the Department of Labor.

## Check Before Seeking an Earthquake Damage Repair Job in Alaska

Americans who plan to seek jobs in Alaska to help repair the earthquake devastation should stay home unless they have definite assurance of a job, Secretary of Labor W. Willard Wirtz said recently.

"The task of rebuilding the State's coastal communities will undoubtedly require many workers," he said. "But, I have been advised that Alaska had heavy unemployment in all skills prior to the disaster and that local residents will be employed first.

(MORE)

"We have not had enough time to determine if extra manpower will be needed or when. Housing accommodations are also very limited."

The Secretary pointed out that requests for any additional workers for Alaska will be channeled through local offices of each State employment service affiliated with the United States Employment Service.

# Give Slum Children a Chance

## *a radical proposal*

By Charles E. Silberman

*Can the nation afford a public-school system which is failing to educate between 50 and 80 per cent of its Negro and white slum children?*

Horace Mann called education "the great equalizer of the conditions of men . . . the balance wheel of the social machinery."

The wheel is out of balance. As the one institution with which every Negro and white slum child comes into intensive and prolonged contact, the public school offers the greatest opportunity to dissolve the cultural barrier that helps block their advance. But the opportunity is being muffed: no city in the United States has even begun to face up to the problem involved in educating the Negro or white slum youngster.

The root of the problem educationally is that the slum child does not learn to read properly in the first two grades. Whether because of this reading disability alone, or because of difficulty in handling abstract concepts that stem from independent causes, the slum child falls further and further behind after the third grade; the gap widens, and his IQ actually declines. His failure to read properly affects a lot more than his school work. It has a profound impact on how he regards himself and consequently on how he regards school. Poor reading skill at the start is the major cause of school dropouts and subsequent unemployment.

No informed person can believe any longer that the poor—or the Negroes specifically—are congenitally slow or illiterate. Yet we have had almost no success in combating this most crippling of a child's handicaps. Even the most well-intentioned and well-financed special program for the "culturally deprived child" serves to help only a small upper crust. New York City, for example, spends some $200 a year *more* per child in slum schools than in white middle-class schools. Yet with it all, third-grade pupils in the schools of central Harlem are one year behind grade level in academic performance; by the sixth grade, they have fallen nearly two years behind, and by eighth grade, two and a half years. And some cities aren't even making an

© *Copyright 1964 by Random House, Inc. From the forthcoming book,* Crisis in Black and White, *to be published by Random House.*

effort. Chicago, for example, appropriates 20 per cent *less* per child in Negro schools than in white middle-class schools.

The reason we have failed is that we start much too late, after the damage is already done. Instruction in the first grade of our public schools takes it for granted that a child has completed a reading-readiness program in the kindergarten year. Yet only a small fraction of Negro or lower-class white youngsters attend kindergarten. Compulsory kindergarten undoubtedly would improve matters, but the basic problem would remain. That problem, stated simply, is that the environment in which lower-class Negro and white children grow up does not provide the intellectual and sensory stimulus they so desperately need. The result is that youngsters from impoverished backgrounds enter school lacking a great many skills which the teachers and the curriculum take for granted, and which most middle-class children have acquired as a matter of course.

## A Child's World of Poverty

The slum youngsters, for example, may lack the sense of auditory discrimination—the ability to distinguish very subtle differences and nuances in sound—that is essential to reading. The noise level in a household in which a half-dozen people are living in two rooms tends to be so high that the child is forced to learn how *not* to listen; he develops the ability to wall himself off from his surroundings. Hence he fails to develop an ability to distinguish between relevant and irrelevant sounds, and to screen out the irrelevant. If, for instance, a truck rumbles by while the teacher is talking, the lower-class pupil hears only one big jumble of sound; the middle-class pupil has the ability to screen out the irrelevant noise of the truck and listen only to the teacher.

More important, the lower-class child has not had the experience of having adults correct his pronunciation; correction of baby speech and of mistakes in syntax or grammar is one crucial way in which the middle-class child learns the ability to distinguish subtle nuances of sound and language—"b" as opposed to "p," for example. In the case of the lower-class Negro youngster, particularly in families recently moved from the South, the problem is compounded several times over by the fact that the phonic system of the language he speaks is quite different from the system of the language which the teacher speaks and which the reading primers use.

The lower-class child, moreover, tends to have a poor attention span and to have great difficulty following the teacher's orders. The reason is that he generally comes from a nonverbal household: adults speak in short sentences, if indeed they speak at all, and when they give orders to the child, it is usually in monosyllables—"get this," "bring that." The child has never been obliged to listen to several lengthy sentences spoken consecutively. And the speech he does hear tends to be of a very simple sort from the standpoint of grammar and syntax. In school, the middle-class teacher who rambles on for several sentences might just as well be talking another language. The nonverbal atmosphere of the home also means that lower-class children have a limited perception of the world about them: they do not know that objects have names (table, wall, book), or that the same object may have several names (an apple is fruit, red, round, juicy). They also have very little concept of size or time.

The lower-class youngsters are poorly motivated, because they have had little experience in receiving approval for success in a task or disapproval for failure; but school is organized on the assumption that children expect approval for success. And since the parents, because of their general nonverbal orientation, do not ask the youngsters about school, the children have no way of knowing that the parents *do* very much want and expect success. For much the same reason, these children do not conceive of an adult as a person of whom you ask questions and from whom you get answers—yet school is based on the assumption that children who don't understand will ask. The middle-class mother, by contrast, is engaged in almost constant dialogue with her child. The slum child's home is characterized by a general sparsity of objects: there are few toys, few pictures, few books, few magazines, few of anything except people and noise. In one group of Negro children whom Dr. Martin Deutsch, director of the Institute of Developmental Studies of New York Medical College, has studied, 50 per cent said they did not have a pencil or pen at home, and about as many said there were no books or magazines. Their experiences outside the home are equally narrow; 65 per cent had never gone beyond a twenty-five block radius.

---

*Charles E. Silberman is a member of the Board of Editors of "Fortune" Magazine and a lecturer in economics at Columbia University. He was educated in the New York City public schools and at Columbia University, and was co-author of "America in the Sixties." His forthcoming book, "Crisis in Black and White" will be a study of the Negro in American society.*

Given this poverty of experience, it is almost inevitable that the slum child will fail when he enters school. He simply has not been prepared to produce what the school demands, and by and large the school makes no attempt to adjust its curriculum to the realities of what its children actually know, as opposed to what they are *assumed* to know.

## "The Child Is Father"

So far, I have stressed the slum youngsters' failure to acquire a specific set of skills—auditory discrimination, sense of timing, etc.—which are prerequisite to learning how to read. The problem cuts far deeper than that. An impressive body of research in the psychology of cognition and perception as well as in the neurophysiology of the brain has made it clear that exercise of the mind early in life is essential for its later development. The human being is born with less than one third of the adult brain capacity, and there is tremendous growth of the cortex after birth. The way in which the cortex and, indeed, the whole nervous system develop is directly affected by the environment. Hence, mental alertness and in particular the ability to handle abstractions depend physiologically on a broad diversity of experience in the environment of early childhood.

"We know now," says Professor Jerome Bruner, director of Harvard's Center for Cognitive Studies, "that the early challenges of problems to be mastered, of stresses to be overcome, are the preconditions of attaining some measure of our full potentiality as human beings. The child is father to the man in a manner that may be irreversibly one-directional, for to make up for a bland impoverishment of experience early in life may be too great an obstacle for most organisms." As Bruner puts it, "supply creates its own demand"; in the phrase of the great Swiss child psychologist Jean Piaget, "the more a child has seen and heard, the more he wants to see and hear."

The problems Negro and other slum youngsters have in learning are no different in kind, therefore, and hardly different in degree, from those of any children coming from a culture of poverty. Thus, the analysis that Deutsch, J. McV. Hunt, and others have made of the reasons for the failure of lower-class children in school are virtually identical with the diagnoses Israeli educators have made of the reasons for the academic failures of the so-called "Oriental Jews"—children of immigrants to Israel from Arabic countries in North Africa (Morocco, Algeria, Egypt) and the Middle East (Iraq, Yemen, Kurdestan). A sizable gap is evident when these youngsters start school: they score, on average, sixteen points lower on IQ tests than children coming from a Western European background. And the gap widens as they go through school; by age thirteen, the IQ differential is twenty-two points. Until remedial measures were taken, few went to high school, which is not compulsory, and hardly any to the university. Yet there could be no conclusion drawn about inherent inferiority; for a thousand years, the flowering of Jewish culture and learning was in Arabic countries. Studies by Israeli educators have pointed to the same reasons for these youngsters' poor academic performance: an impoverishment of environment —a lack of stimulation, particularly of the verbal sort, in the early years—which must be compensated for in some way if it is to be overcome.

## Starting in Nursery School

Nothing less than a radical reorganization of American elementary education is necessary, therefore, if the schools are to begin to discharge their obligation to teach the Negro and white slum youngsters. To reverse the effects of a starved environment, the schools must begin admitting children at the age of three or four, instead of at five or six. The nursery school holds the key to the future—but a very different kind of nursery school from the one most Americans are familiar with.

It is between the ages of three and six that the battle is won or lost. "The two-and-a-half and three-year-olds are almost universally curious and friendly," says Dr. Ronald Koegler, a neuropsychiatrist at UCLA who is experimenting with a Montessori nursery program for culturally deprived children, "but by the age of six, the children are already different. The culturally deprived have already been deadened by their environment and are already so far behind the middle-class child that all the best elementary education will not be sufficient for them to catch up." Dr. Koegler may be exaggerating somewhat, but the point he is making is basic: the schools which wait until kindergarten or first grade will need to employ many, many more resources to do what they might do with comparative ease for children at age three and four.

By all odds the most important experiment in nursery education for Negro and white slum children is a research and demonstration project

directed by Martin Deutsch in ten New York City public schools and five day-care centers. Deutsch's ultimate objective is to develop a standardized curriculum and a set of teaching techniques that can be used in similar programs anywhere in the country. (Some thirty cities are setting up, or talking about setting up, nursery programs for the culturally deprived, more or less modeled on the Deutsch experiment.) The curriculum is designed to teach the youngsters the verbal and perceptual skills they need in order to learn to read, and also to bolster their sense of self. There is a great deal of emphasis on teaching labeling—getting across the notion, first, that every object has a name, and, second, the more sophisticated concept that objects may have a number of different labels, each referring to different attributes. A teacher may use puppets or other replicas of people, animals, and objects to illustrate the story she is reading, to drive home the relation between people and things. Much use is made, also, of toys: stuffed animals, dolls, peg boards, color cones, to teach color, shape, and size. Auditory discrimination is taught through a tape recorder, in which background noise is used to mask a relevant sound; the level of the background noise is gradually stepped up, to enhance the child's discrimination. To help develop a sense of self, the rooms contain a great many mirrors; many children have never seen themselves in one. One of Deutsch's most successful techniques has been to take a photograph of each child and give a copy to the child and to the parent; 85 per cent of the youngsters had never seen a picture of themselves. The pictures were then used to construct a book about the class.

The physical arrangements of the classroom are planned carefully. The emphasis is on order, beauty, and clarity—on balancing color, physical objects, and space. This is important, Deutsch feels, because there is so little beauty and so little structure in the children's own lives. They respond amazingly to beauty. (Children will typically comment, "I wish I could live in this classroom," and older brothers or sisters in the same school will express envy at the younger child being in such an attractive room.) Each room is divided into a number of self-contained sections: a reading section with books, as well as tape recorders children can use on their own to play back a favorite story; a music section, with phonograph and records; an activity section with blocks and other toys involving motor skills and coordination. The sections are quite distinct—clarity is necessary, in Deutsch's view—but not rigid; they can be rearranged whenever desired. Each child has his own cubby to provide a sense of privacy and personal possession, both of which are difficult to find in a slum home.

## The Israeli Example

It is not enough just to work with the children. Deutsch tries to work with the parents too—to win their trust, which is essential if the program is to succeed, and to give them some instruction in how to help their children. Once the former is done, the latter is relatively easy: once they have been persuaded that this is a genuine attempt to help their children, not a venture in brainwashing, the parents (or rather, the mothers—55 per cent of the youngsters come from broken homes) are eager to get instruction. Deutsch and his staff suggest that the parents encourage the child to talk at the dinner table, especially about school, a completely novel experience to a great many parents; that they give him toys, praise his success—in short, let the child know that the parent wants him to succeed in school and is interested in what he does. This has enormous impact on the children's verbal ability, for they begin talking about school when they get home, instead of remaining mute; and it has profound effect on increasing motivation.

The youngsters in Deutsch's experimental classes show significant improvements in IQ test scores. The more profound effects may be less measurable, but they are striking to anyone who spends even a few weeks in one of the classrooms observing the children; they change under the observer's eye. Kindergarten teachers who receive youngsters exposed to even as little as six months of Deutsch's experimental program are almost speechless with enthusiasm. In all their years of teaching, they say, they have never had slum youngsters enter as well-equipped intellectually, as alert, as interested, or as well-behaved.

My proposal to extend public education down to the nursery level is not nearly as extreme as it sounds. Israel, with a standard of living only about one third that of the United States, has already adopted such a policy, and is in the process of establishing nurseries for the Oriental Jews as the means of acculturating its new immigrants in a single generation. The government has formally adopted a policy of preferential treatment, called "state protection." Compensatory education begins at the prenatal level, when amateur social workers visit the pregnant mother and the father; among other things, they teach the parents how to play with the children,

and leave a set of toys which the government lends the family for a period of a year or so. The government is rapidly establishing free nursery schools so that the Oriental youngsters can begin school at three; the curriculum closely resembles the one Martin Deutsch is developing.

Help does not stop at that point, however. The Israeli educators have tried to isolate the critical points in intellectual development. The first is the nursery-school years; the second is the first and second grades, when the children learn to read. The Israelis are convinced that anyone, even the mentally retarded, can be taught to read. The problem, as Dr. Moshe Smilansky, Pedagogical Adviser to the Minister of Education puts it, is simply one of adapting the method of instruction to the state of development in which the child comes to school. Three years of intensive work have convinced the Israelis that 80 to 85 per cent of the Oriental youngsters can be brought up to the expected reading level.

The third critical point at which Israel's Oriental youngsters need help is the junior-high period (ages twelve to fourteen); they receive up to eleven hours of additional instruction a week, in order to help them adjust to the more complex curriculum they begin to receive, and to help them prepare for high school. In addition to the extra instruction given to all the Oriental youngsters, the government has adopted a separate program for the most academically talented: the top 25 per cent. The object, quite explicitly, is to encourage the development of an intellectual elite among the Oriental students—to create a group that will go through high school and the university without difficulty and then move into positions of responsibility in government, in business management, and in the army, thereby demonstrating to the rest of the Oriental community as well as to the Western Jewish community that Orientals *do* have the capacity to move to the top of Israeli society.

## An Older Experiment

One reason the Israelis have been so successful is that they have far greater administrative flexibility than we do in America; the director of research operates out of the office of the Minister of Education, so his research results can be immediately translated into administrative policy. The main reason for success, however, is the commitment to the program of "state protection" at all levels of government. The officials in charge of the program (though needless to say, not all the teachers in the field) really believe that there is no inherent difference in intelligence between Oriental and Western youngsters—and that in any case IQ scores are meaningless as a guide to a child's potential.

This notion is crucial if any program is to succeed in the United States. The traditional American approach has been to see the child as a more or less fixed, static entity that has been determined by genetic environment. Hence the emphasis on IQ: you have to measure what the child is before you can decide what to teach him, and how. The Israeli educators—and people like Deutsch, Bruner, Professor O. K. Moore of Rutgers, and Professor J. McV. Hunt of the University of Illinois, in the United States, as well as Montessori before them—see the child instead as an "open system." They are interested less in what the child *is* than in what he can *become*, and their goal is to provide whatever materials and techniques are needed to develop his intellectual abilities to the fullest. This is a far cry from the so-called "life adjustment" approach so popular in the United States a while ago; indeed, it is its very opposite, since life adjustment assumed irreversibility of a child's nature. The Israelis reject the idea that there is a point at which it is too late to help a child, though they agree that help is far more effective if begun in the nursery years. And they assume that intellectual development is a major source of mental health; children who receive an infusion of competence from the very beginning—who learn "I can" at the start of school—will tend to be stable, well-adjusted individuals as adults.

The Israeli example is by no means the only one. The first demonstration of the value of early childhood education in reversing the effects of poverty occurred nearly sixty years ago, when the Casa dei Bambini was established in a Roman tenement by Dr. Maria Montessori, one of the towering figures in the history of education, and one who is just beginning to be appreciated. Something of a Montessori revival has occurred in the United States in recent years, and several experiments using her methods are in process.

The Montessori approach may be particularly relevant to our own time for a number of reasons. It emphasizes what psychologists call *intrinsic* motivation—harnessing the child's innate curiosity and delight in discovery. Each child is free, therefore, to examine and work with whatever interests him, for as long as it interests him, from the materials that are available. What is available is determined by the Montessori concept of "prepared environment," which places

great stress on training the sensory processes: cognition is enhanced by providing appropriate stimuli to *all* the senses.

The chief advantage of the Montessori approach, in the opinion of J. McV. Hunt, is that "it gives the individual child an opportunity to find the circumstances which match his own particular stage of development." It has the corollary advantage of making learning fun, whereas the conventional American approach to kindergarten and elementary education manages to establish remarkably early the notion that learning is unpleasant. ("Let's stop playing with the blocks now, children; it's time to learn our letters.")

As in Israel, help for our underprivileged cannot stop with creation of a nursery program, though such a program is crucial. The cultural distance between the school and the community, and the disorganization of Negro and slum life, mean that a great many lower-class youngsters will need extra help all the way through school, and especially in the early grades. It may be useful, for example, to provide them with texts that offer a better bridge between their own lives and the rich world of Western civilization than, say, the almost universal "Dick, Jane, and Sally" series of reading primers. Unfortunately the first experiment in creating an "integrated" series of reading primers—*Play with Jimmy, Fun with David,* and *Laugh with Larry,* written by staff members of the Detroit Public Schools, moves in precisely the wrong direction. The books show a well-scrubbed Negro family in the same sort of antiseptic suburban environment that Dick, Jane, and Sally play in, and the level of prose almost makes the Dick, Jane, and Sally readers sound like poetry. (The Detroit readers use a much smaller vocabulary; the Detroit experts made tape recordings of Negro children's speech, and discovered that their vocabulary contains only about half as many words as white children's.) There is some reason to assume, however, that what these youngsters need is stimulus to the imagination—some evidence that reading is a means of escaping the confines of the slum for something more exciting than a backyard barbecue or a trip to the supermarket.

## Implementing the Imperative

Current dogma, of course, condemns any program of compensatory education, no matter how massive, as a return to "separate but equal," hence an expression of prejudice. But one group of Negro leaders, headed by Professor Kenneth Clark and the Reverend Eugene Callender, has already had the courage to face up to the realities of the education problem in central Harlem. Their views are expressed in a report issued by Harlem Youth Opportunities Unlimited, Inc. (HARYOU), a group set up with funds from the President's Committee on Juvenile Delinquency and Youth Crime.

The authors mince no words about their belief in integration and their distrust of many of the measures taken so far. But their main proposition is "that this vicious cycle of educational inefficiency and social pathology can be broken only by instituting an educational program of excellence in the schools of deprived communities," and their most important recommendation is a proposal to establish compensatory nursery programs for all Harlem children. In the long run, they argue, excellence requires an end to segregation. But in the short run—"during that period required to obtain more adaptive, democratic, nonsegregated schools for all children"—compensatory education is necessary, for 50 per cent of the junior-high-school students need massive remedial work if they are to be brought up to grade level.

Integration is a moral imperative—the greatest moral imperative of our time. It is essential not so much for Negroes as for whites, who must learn to live in the great world in which they are the minority. But merely throwing white and black students into the same classroom without regard to differences in knowledge and academic performance does not constitute integration in any meaningful sense. How are we to achieve meaningful integration—which leads to genuine contact, to real communication, and to understanding of each group by the other?

The only honest answer is that genuine integration will not be possible until the schools in Negro neighborhoods, and the schools in white slum areas as well, are brought up to the level of the very best in the city—until the schools do their job so well that children's educational performance will no longer reflect their income, or their social status, or their ethnic group, or their color.

To say this is not to suggest indefinite postponement, but to demand that the public schools stop dithering with projects and demonstrations and turn immediately to the most pressing task. Neither the large cities nor the nation as a whole can afford a public-school system which fails to educate between 50 and 80 per cent of its Negro and white slum students.

# Whose Values Should Be Taught?

—Bettmann Archive.

Schoolroom on the Lower East Side New York, about 1886. Photo by Jacob Riis.

By MAX BIRNBAUM, *Education Consultant of the American Jewish Committee and a staff member of the Boston University Laboratory of Human Relations.*

IN A society in which there is general agreement on what constitutes the good, the true, and the beautiful, the task of teaching values is a simple one. The consensus is clear and, even if minority views exist, they do not challenge the majority judgment effectively. But in a pluralist society, in which no general agreement has been reached, the problem becomes infinitely more difficult.

Teaching values in American classrooms today, therefore, is an awesome assignment. For, as a nation, we are caught between the myths of a rural past that has all but disappeared, and the new urban present that has not yet achieved its final form. While our backs were turned, profound changes took place not only in our values, but in the very sources from which they come. While our sights were focused on older, simpler patterns of thought and conduct, far more complex problems and issues were beginning to challenge our society. No longer, for instance, can we teach the principle of equality for all without recognizing its unique meaning for the American Negro; nor can we discuss traditional concepts of religious liberty without taking into account the recent Supreme Court decisions on Bible reading and prayer in the classroom, and the role played by the new assertiveness of Catholics and Jews in many areas of our national life.

(Some teachers who live and work in areas of the country where religious, racial, and ethnic differences are not acute will insist that such problems are alien to the American Way. But many others have experienced the problems of emerging difference at first hand and are aware of the vast changes that have taken place.)

Yet the dramatic changes that have marked the development of contemporary attitudes did not come without warning. If we take even a brief backward look at our nation's history, we can see that they evolved over a period of several decades.

The American colonies were settled originally by Protestant, English-speaking people of Anglo-Saxon origin. Almost from the beginning this group was joined by those who were non-Protestant, non-Anglo-Saxon, and even non-English-speaking. But the names of the signers of the Declaration of Independence and the membership of the Constitutional Convention, almost 150 years after the earliest settlements, still reflected the continued dominance of the first group. This persistence of control is most remarkable in view of fairly sound historical evidence that almost 40 per cent of the inhabitants of the United States in 1790 were of non-English-speaking origin.

American culture, its values, institutions, and mores are primarily, although not exclusively, the creation of that remarkable group of men whose origins, immediate and remote, were the British Isles. To be sure, the group absorbed innumerable sons and daughters from other religions and cultures, but its Protestant Anglo-Saxon imprint continued to be highly visible.

THE Civil War and the rise of industrial America contributed directly to changes in the religious and ethnic composition of the nation. Most new immigrants in the years immediately after the Civil War were German and Irish. These were followed by people from Southern and Eastern Europe, of Slavic and Italian origin and Jews from the Austro-Hungarian empire, Poland, and Russia. Part of the native American's horror-stricken reaction to the city of the late nineteenth century came from the fact that it was crowded by people with strange tongues and stranger behavior. By the turn of the century, when immigrants of English origin were fast becoming a minority, voices were saying that unless something were done to stem the tide, the character of our civilization would change drastically.

Just as the Civil War was in many ways the "Second American Revolution" in its impact on our society, so 1914 marked the end not only of our isolation from world involvement, but also of our unitary society. The values and mores derived from our historically dominant religious and ethnic groups were being challenged. As a result, in the years following 1914, we witnessed the imposition of immigration quotas based upon a philosophy of Nordic Supremacy, the Great Depression and the fundamental changes it brought in the relations of the state to our citizenry, and the successive challenges to the old order by Catholic, Jew, and now the Negro. In the light of these swift and truly revolutionary changes, it is not remarkable that our schools have had difficulty in promulgating a common set of values. What is amazing is

*This article is based on a background paper prepared for the annual convention of the Association for Supervision and Curriculum Development, Miami Beach, April 1964.*

that they have done as well as they have.

Of the half century since 1914, perhaps the most significant years were the 1920's. For they marked a climactic period during which those conflicts that had raged sporadically just beneath the surface of public awareness were revealed publicly. The fears of those who felt that this country was theirs by right of birth and ancestral domain were intensified by the 1919 steel strike and rumors of Bolshevik infiltration. The American Legion had been organized in Paris in response to similar fears, when all of Europe appeared to be going communist. The United States, with its polyglot population, seemed a natural target for such subversion. But the most significant impact on America came from the immigration debates that raged for almost a decade in Congress and throughout the nation, in which terms such as the "alien flood," the "barbarian hordes," and the "foreign tide" were freely used.

The debates when stripped to their essentials reveal that: 1) the dominant voices in our society used basically racist arguments to stigmatize those who had immigrated from Southern and Eastern Europe; 2) descent from English-speaking ancestors from the British Isles was deemed sufficient guarantee of superior capacity to assume the responsibilities and privileges of American citizenship; 3) American labor, despite its origins, was willing to be swayed by economic need to shut the doors of the nation even against its own kin; 4) the new American patriotic coalition, which emerged at this time, spearheaded the drive for restriction of immigration as an expression of nationalism and a fear of socialism and communism.

ALTHOUGH minority peoples formed protective organizations in response to a variety of special needs, the defensive character of these groups was intensified by the use of ethnic group classifications in the National Origins Act that determined all future quotas for immigration into the United States. From that point on, the right to enter America and become a citizen was defined not in individual but in group terms. The Irish had already learned the uses of ethnic group politics; other immigrant groups were now to follow in their footsteps, and group pressures soon became common in all areas of national life, including the schools.

The end of unrestricted immigration created a condition quite different from that which had been intended by the architects of the restrictive immigration policy. In two generations, all citizens of Eastern European descent had become native, rather than foreign-born Americans. But for many the group consciousness stimulated by the National Origins Act helped to strengthen rather than lessen their adherence to the values of the groups from which they sprang. Aided by awareness of service on behalf of country in two World Wars, the minority religious and ethnic groups began increasingly to assert their rights. Subsequently, the American Negro returned from the Allies' victory over German Nazism, determined to destroy racism here as well.

THE decade of the Thirties witnessed two events of overwhelming importance to all Americans that had special poignancy for Catholics and Jews—and that also demonstrate the complexity of group loyalties in American society. The first was the Spanish Civil War. The nation, with the exception of the Catholics, was largely sympathetic to the Republican cause. The fact that Germany and Italy were aiding Franco, and Soviet Russia was aiding the Loyalists, created disastrous divisions among religious, ethnic, and political groupings. The issue was in large measure, for the Catholics and Jews, a matter of opposing the ally who was most threatening to them at the time. For the Jews it was obviously Hitler; for the Catholics it was Stalin; Protestants, and the unchurched generally, except for those who feared and hated the Soviet more than anything else, were either neutral or pro-Republican.

Then came the war against the Axis powers. A significant number of Americans, reflecting predominantly Catholic and Protestant groups, some of whom were of German ancestry, felt that we were fighting the wrong enemy. When Stalin and the Soviet Union became our major antagonists in the period after the Second World War, those groups that had opposed our fighting as an ally of Russia came into their own. Their passionate opposition to American foreign policy had been long pent-up and the beginning of the Cold War provided them with final justification for their feelings.

Senator McCarthy was in many respects a charismatic champion of this submerged cause. A Midwestern Irish Catholic, elected from a state with a very large German ethnic population, he provided precisely the kind of ruthless hostility toward Communism that would satisfy the loose coalition of those who had always felt that Russia was the true threat to America. A Gallup Poll during the period of McCarthy's greatest influence showed Jews overwhelmingly opposed to him, the Catholics strongly in his favor, and Protestants divided. The strongly Protestant hinterlands of the Middle West and Southwest supported him, and the urban, Northwestern, and Far Western Protestants strongly opposed him. The endurance of attitudes based on religious and ethnic considerations has rarely been more clearly demonstrated than during this conflict. And, as we shall see, recent problems in the teaching about communism and patriotism are still intertwined with this legacy of the past.

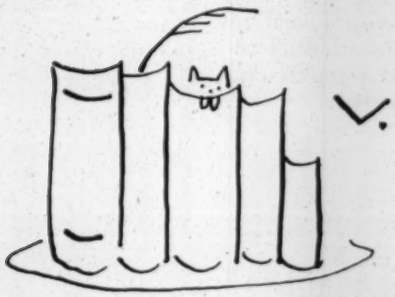
At this point it should be revealing to analyze three basic issues that have presented serious problems for teachers, in terms of the group forces operating in our contemporary society. Obviously, the most significant value-laden issues for public schools have been the place of religion and religious values in the curriculum, the teaching of patriotism, and the closely related issue of teaching about communism. The impact of race on our schools is also of prime importance, but this will be treated separately because of the unusual character of the group forces reflected in the racial crisis.

BEFORE applying a group relations theory to explain these complicated issues, however, certain qualifications should be stated. No one theory can explain complex group behavior. Few observers after the election of 1960 would deny the persistence of religious, ethnic, and racial loyalties. The significant shift of Democratic Protestants to Nixon and a similar shift of Republican Catholics to Kennedy is evidence enough. What is not explained by any simple cause and effect analysis is why so many Protestants, for example, voted for Kennedy, and why so many Catholics voted for Nixon. Economic factors, ethnic backgrounds, regional biases, personal preferences largely free of group loyalties or pressures, would have to be investigated. Jews and Negroes, on the other hand, voted in overwhelming numbers for Kennedy. The Democratic Party, especially in the Northern cities, still retains the loyalty of these and other minority religious and racial groups. The appointment of two Jews to Kennedy's Cabinet, and the subsequent appointment to that powerful and symbolic body of an Italo-American and a Polish-American, with a tacit commitment to include a Negro eventually as well, makes very plain indeed that the old Protestant, Anglo-Saxon order has changed.

With this *caveat* stated, let us consider the two major problem areas that have both openly and subtly affected the teaching of values and value-laden subjects during the past two decades—religion and patriotism. Both problems differ markedly from region to region and stubbornly refuse to respond to simple analysis. But after saying this,

we are also reasonably certain that on both issues Catholics and Jews have been overwhelmingly on opposite sides, and that Protestants, once again, have split down the middle, in a pattern very similar to that which prevailed during the 1930s and through the McCarthy period.

THE growing agreement between the politically and theologically liberal Protestants and the Jews with similar views has been an important factor in Protestant sensitivity to Jewish hostility toward religious influences in the public schools. Prayer, Bible reading, and excessively Christological observance of Christmas and Easter are cases in point. And most of the leaders of the larger Protestant denominations, together with a few Catholics, have gone along with the recent Supreme Court decisions on prayer and Bible reading. (To be sure, the awareness of Protestant leaders that the more important issue is public support of parochial education undoubtedly influenced many to make what is a comparatively small sacrifice in order to build additional legal bulwarks against the potential diversion of public funds.) Common commitment to public education, similar attitudes on censorship, birth control, and a host of other religiously value-laden issues make for easy communication and accommodation between these Protestants and most Jewish groups.



Most Catholic spokesmen, on the other hand, originally opposed the Supreme Court decisions in terms that were surprisingly similar in tone to the declarations of the Protestant South and Middle West. Increased secularization of the public schools is seen as a direct threat to conservative Protestants, and as an attack on religion in public life by Catholics.

Beyond this point, however, the two groups differ. And unless the essentially unstable character of this coalition is comprehended, it is virtually impossible to understand the unpredictable strengths and weaknesses of its pressures on the schools. The largest segment of Protestants opposed to the elimination of prayer and other religious observances in the classroom also opposes with the greatest vigor any grant of public funds to Catholic parochial schools or any move that would increase Catholic influence. Fundamentally, the purely religious loyalties of the two parties to the coalition are directly opposed to each other. For instance, consider the Catholic opposition to public school baccalaureate services throughout the Middle West and the opposition of Protestants to an ambassador to the Vatican.

When the topics of divorce, family relationships, and the nature of authority arise, members of each of the two coalitions again find themselves in agreement. The question of school discipline is a revealing touchstone, for here, too, with some exceptions, the Jews and liberal Protestants tend to be more child-centered and less concerned with traditional forms of authority and discipline. The fundamentalist Protestants and most Catholics tend in the opposite direction. Attitudes toward the subject of mental health divide similarly. What we have in essence is a serious culture conflict, with powerful groups arrayed against each other along fairly distinct religious lines.

THE issue of patriotism and the related problem of communism are directly associated with this culture conflict. Reliance on familiar religious forms, hostility to anti-religious forces, zealous support for traditional forms of authority, a highly developed sense of individual property rights, plus a strong nationalist bias would immediately predispose the conservative coalition to react to the serious threat of the cold war with traditional solutions. Their support for a program of indoctrination in the schools, the feeling that there should be no compromise with evil, and a strong sense of what is right and what is wrong, the insistence that there is good only on our side and nothing but evil "out there" are but a public restatement in pedagogical terms of the manner in which members of the coalition were reared—or believe they were reared.

The opposite approach is also easy to comprehend if we interpret the religious, ethnic, and regional influences on those who support it. The coalition of liberal Protestants and Jews reflects basically a yearning for peace, an effort to achieve possible accommodation with the cold war enemy, and a recognition that authoritarian solutions are difficult if not impossible to achieve. (To be sure, the liberal coalition has at times seemed to be so unaware of the harsher realities of peace and power politics as to cause their opponents to question both their patriotism and their competence to administer affairs of state.) This group also displays a considerably smaller degree of nationalism, and their support of the U.N. is, therefore, firm. In direct contrast, the conservative religious coalition reflects strong suspicion and outright hostility to the U.N. and its affiliated agencies, especially UNESCO. And finally, the liberal coalition's memory of Hitler predisposes its members to be especially vigilant in opposing any excessive anti-communism that tends to bracket communism with liberalism.

WHAT impact the recent shift in emphasis and viewpoint within the Roman Catholic Church will have on issues that concern the public schools is a matter for speculation. Very likely, leading Catholic spokesmen will join with the liberal coalition on selected issues at first, but ultimately the full import of the Catholic Church's ecumenical effort to reorient itself for participation in a religiously and racially pluralist society will make itself felt—and with profound effects on the American public school scene. This realignment will not only have profound influence on the atmosphere in which values are taught—possibly making the job easier—but it may also lead to further experiments in closer cooperation between public and parochial schools such as shared-time programs.

The racial problem has been reserved for separate treatment for several reasons. Race in our culture has been an infinitely more difficult barrier to surmount than religious or ethnic background, and the Negro has been compelled to condense into a few short years what for other groups has been decades of organization and effort. The violence of the Negro thrust can only be understood when we remember what happens when a coiled spring, compressed to its utmost, is suddenly released. The election of 1960 was won with the strong surge of Negro votes in the major Northern city strongholds of the Democratic Party. What has happened since has been the presentation of a bill for payment for services rendered. This process is as old as the political realities of American elections.

The Negroes, who are primarily Protestant, although there is a sizable Catholic minority, have hardly engaged in "religious politics;" their overriding concern has been the question of race. So basic is the issue of color that increasingly the Negroes have become a separate entity, considered as a third force

in addition to the two religious coalitions. This condition will undoubtedly continue for some time to come. Ironically, in the last few years the cause of equality for the Negro has become the first occasion for a remarkable degree of cooperation and collaboration among the three major religious faiths. Short of war, this has not happened before. (There are other signs that cooperation on behalf of the cause of the Negro may be the first of a series of collaborations on crucial issues, such as U.N. support and world peace.)

The Negro, with the help of his white allies, has turned to the schools with a host of demands that have upset public education as seldom before. This is true not only in the South, where the issue has been a matter of constitutional right, but also in the North, where the school has become the major instrumentality for the symbolic—if not actual —end of racial segregation. Balked at ending residential segregation immediately, and unable to secure the kinds of jobs that satisfy their rising expectations, the Negroes have turned on the schools with a series of demands. Almost overnight the problems of the education of deprived children and the school drop-out have become predominantly the problems of Negro children. They have also become the two most discussed educational problems since the post-Sputnik overhaul of science and mathematics teaching. The reverberation of this onslaught will affect the teaching of history and social problems, textbook revision, the nature of teaching, the organization of schools, and practically every other facet of education. But what is perhaps most meaningful for the teaching of social values is that the militancy of the civil rights movement has heightened our awareness of the fact that so many of our values reflect a white culture with unconscious as well as conscious biases. These will be repeatedly challenged from now on. Excessive sensitivity that has led to attacks on *Huckleberry Finn* and other classics will undoubtedly abate in the future, but the period immediately ahead promises to be a very stormy one for schools and teachers.

The gradual dissolution of a homogeneous, Anglo-Saxon, Protestant society, the appearance of the conservative and liberal religious coalitions, and the emergence of the racial crisis will necessarily lead either to a truly pluralist society or to chaos. The problem for the public schools, of course, is especially acute. Caught for the past two decades in a religio-ethnic crossfire, they are suddenly also beset by racial conflicts. Their only salvation is to begin immediately to bring to bear all our present knowledge and experience to develop ground rules for teaching and learning in a diverse society that will conserve our basic values and still accommodate the emerging social order. Fortunately, such a pluralist solution is in harmony with the spirit of our democratic ideal and the reality of our constitutional tradition. But the task will be a difficult one —far more difficult and complex than most of us have yet admitted.

# THE REGION

### Elementary and High Schools

6,141 Districts: 3,028 With Negroes and Whites; 1,140 Desegregated

| | White | Negro | Total |
|---|---|---|---|
| Enrollment | 10,909,919 | 3,412,799 | 14,322,718 |
| Teachers* | 406,473 | 110,607 | 545,847 |

*Maryland not included in racial breakdowns.

### Colleges and Universities

195 Desegregated

| | Predominantly White | Predominantly Negro | Total |
|---|---|---|---|
| Institutions | 240 | 52 | 292 |
| Enrollment | 774,237 | 73,391 | 847,628 |

## Status of Segregation-Desegregation

### PUBLIC SCHOOLS

The region has 6,141 public school districts—3,113 are either all-white or all-Negro districts, and 3,028 have both Negro and white students enrolled. Of those districts having both races, 1,049 have Negroes attending the same schools with whites, and the other 91 are desegregated in policy but have no biracial schools. About 985 of the desegregated districts acted voluntarily, and the remaining 155 acted only after a court order. (See table "Analysis of Desegregation") The table below shows that 23.9 per cent of the region's total enrollment is Negro, 42.9 per cent of the Negroes are in desegregated districts, and 9.3 per cent of the Negroes are in desegregated schools. Of the Negroes in desegregated districts, 21.7 per cent actually attend schools with whites. The table also provides separate statistical breakdowns for the 11 Southern states and for the border area. The South has a public school enrollment that is 26.8 per cent Negro, 33.5 per cent of the South's Negro students are in desegregated districts, and 1.06 of the Negroes actually attend schools with whites. Of the Negroes in the South's desegregated districts, 3.2 per cent actually attend schools with whites. The border area has a public school enrollment that is 14.6 per cent Negro, 96.6 per cent of the border area's Negro students are in desegregated districts, and 56.2 per cent of the Negroes actually attend schools with whites. Of the Negroes in the border area's desegregated districts, 58.2 per cent actually attend schools with whites. Comparing the two areas, the South has 85 per cent of the region's total Negro enrollment, and the border area has the other 15 per cent. But of the region's 318,039 Negroes in desegregated schools, only 9.7 per cent of these are in the South, and the other 90.3 per cent are in the border area schools. Mississippi remains the only state with no initial desegregation at the level of grades one through 12. The increase in desegregated districts this year represented the largest since 1956, and the increase in the percentage of Negroes in schools with whites was the greatest since SERS first began reporting this figure in 1960. (See tables "Statistical Developments from 1954"). A few districts quietly admitted Negroes to schools with whites before the 1954 Supreme Court decision, the first believed to have been Baltimore, Md., which accepted 12 Negroes at an advanced high school in 1952-53, before the district began its regular desegregation program in 1954-55. Several districts already have announced plans or been ordered to desegregate in 1964-65. (See table "Desegregation Planned or Ordered")

| State | School Districts: Total | With Negroes & Whites | Deseg. | Enrollment: White | Negroes | In Desegregated Districts: White | Negro | Negroes In Schools With Whites: No. | % † |

### TEACHERS

Public school teachers remain completely segregated in seven Southern states—Alabama, Arkansas, Georgia, Louisiana, Mississippi, North Carolina and South Carolina. Some teacher desegregation has begun in four Southern states—Florida, Tennessee, Texas and Virginia—plus all the border states and the District of Columbia. In four states—Missouri, Oklahoma, Texas and West Virginia—a sizeable number of Negro teachers lost their jobs in the early stages of the change to desegregation. Teacher desegregation is an issue in many of the school desegregation cases now pending in the courts, and federal judges in Kentucky and Florida have ordered districts there to begin desegregating at this level.

## HIGHER EDUCATION

Every state in the region has begun desegregation at the college level, although Mississippi at present has no Negroes enrolled at the state's only school to have desegregated, the University of Mississippi. The region has 292 tax-supported institutions of higher learning, and 195 of these are desegregated. Of the 240 schools with all-white or predominantly white enrollments, 171 will accept Negroes; of the 52 with all-Negro or predominantly Negro enrollments, 24 will accept whites. The region has at least an estimated 35,877 Negroes attending public colleges and universities with whites, including at several predominantly Negro institutions. About 10,000 of the Negroes are in predominantly white, public colleges.

The exact number of white and Negro students involved in college-level desegregation is unknown since many states report they no longer keep records by race. The available figures are listed below and in the individual state reports. Of the 195 desegregated schools, 169 actually have Negroes and whites attending together, and the other 26 are desegregated in policy only; 25 of the schools have desegregated only after a court order, and 170 acted voluntarily. (See table "Analysis of Desegregation") A predominantly Negro school in Maryland, Morgan State College, has had no racial restrictions since its founding in 1867 and it had white students before 1936, when the University of Maryland was the first all-white public college to be ordered by a court to admit Negroes.

## FACULTIES

Faculty desegregation has been started at the college level in four Southern states—Florida, North Carolina, Tennessee and Texas — and in all the border states, plus the District of Columbia. Faculties remain completely segregated in the seven Southern states of Alabama, Arkansas, Georgia, Louisiana, Mississippi, South Carolina and Virginia.

## SPECIAL SCHOOLS

Seven Southern states—Georgia, Louisiana, North Carolina, South Carolina, Tennessee, Texas and Virginia—and all the border states, plus the District of Columbia, have initiated desegregation in their trade and special schools—ones for the blind, deaf, dumb, orphan, exceptional, retarded or delinquent children. A Maryland judge has ruled that the 1954-55 decisions of the U.S. Supreme Court included schools for juvenile delinquents and all educational institutions.

## ETHNIC GROUPS

Separate schools or desegregation involving such mixed blood or ethnic groups as Moors, Indians, Turks, and others are reported in the individual state reports for Arkansas, Delaware, Florida, Louisiana, North Carolina, Oklahoma, South Carolina, Tennessee, Texas and Virginia. Federal court rulings involving such groups generally have followed the legal precedents of school desegregation suits involving Negroes. One North Carolina county, Robeson, operates separate schools for whites, Negroes, Indians and a mixed blood group known as "Smilings." A formerly all-Indian college in North Carolina, Pembroke, now has a predominantly white enrollment.

## LITIGATION

The summary lists 351 court cases filed in state and federal courts on school segregation, desegregation and related issues. Every state in the region has had litigation on the school issue. (See "Race Relations Law Reporter" for texts of court decisions.)

## LEGISLATION

Legislatures of all 17 states have adopted 409 new laws and resolutions concerning school desegregation. Most of the legislation has been added to the statute books since 1954, although a few laws were enacted in anticipation of the U. S. Supreme Court's 1954 decision. Oklahoma has passed legislation to encourage desegregation. The Missouri, North Carolina and West Virginia legislatures removed racial designations from their school laws. In 1959, Maryland ratified the 14th Amendment to the U. S. Constitution, giving approval to the amendment on which the desegregation decisions were based. Alabama, Arkansas, Georgia, Louisiana, Mississippi, North Carolina, South Carolina and Virginia have adopted tuition grant laws. Legislatures in Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas and Virginia set up pupil placement plans. Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, South Carolina, Tennessee and Virginia legislators approved interposition resolutions. Provisions for closing schools are on the law books in Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, Texas and Virginia. Compulsory school attendance laws have been amended or repealed in Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas and Virginia. Alabama, Florida, Louisiana and Virginia have laws to encourage or facilitate private schools. Legislation mentioned above has been adopted, but in some cases it has become invalid by court rulings, later legislation, or failure to receive approval in constitutional referendums. (See "Race Relations Law Reporter" for text of laws.)

## Status of Segregation-Desegregation

### PUBLIC SCHOOLS

The first desegregation at this level in Alabama occurred with the opening of the 1963-64 term in Birmingham, Huntsville, Macon County (Tuskegee) and Mobile, all by federal court orders. Huntsville actually began desegregated classes on Sept. 9, 1963, a day before the other three districts. The admission of Negroes to the formerly all-white schools in all four districts had been blocked by state troopers acting under the orders of Gov. George Wallace. President John F. Kennedy federalized the Alabama National Guard on Sept. 10 and all five U.S. district judges in Alabama issued an order restraining further interference by the governor. When the biracial classes began in Macon County, all the white students withdrew voluntarily from the one desegregated school, leaving only the 13 Negroes in the boycotted high school. One of the original 13 Negroes later was expelled for disciplinary reasons. The desegregated districts are:

| Districts | Enrollment* White | Enrollment* Negro | Negroes w/Whites | Brcl. Schls. | Date Deseg. |
|---|---|---|---|---|---|
| Birmingham | 38,447 | 34,541 | 5 | 3 | 1963-C |
| Huntsville | 19,226 | 2,309 | 4 | 4 | 1963-C |
| Macon Co.† | 970 | 5,317 | 0 | 0 | 1963-C |
| Mobile** | 47,556 | 28,729 | 2 | 1 | 1963-C |
| TOTALS | 106,199 | 70,896 | 11 | 8 | |

*1962-63.
**District includes Mobile city and county, but rural schools were not affected by the court order this year.
†Although 13 Negroes entered one formerly all-white high school, all the white students voluntarily withdrew to other public schools or the newly established private school.

### TEACHERS

Segregation is maintained at all levels.

### HIGHER EDUCATION

Two of the state's seven predominantly white institutions of higher learning are desegregated by court order, and one of the two predominantly Negro schools voluntarily accepted a white student for a 1963 summer session. The University of Alabama first desegregated in February, 1956, when Autherine Lucy attended for several days by order of a federal court in *Lucy v. Adams*. She was driven from the campus by rioting and the Board of Trustees later expelled her for accusing university officials of conspiring in the disorders. The federal court upheld the expulsion but the school remained under permanent injunction to admit qualified Negroes. When three Negroes sought admission to the school in 1963, their suit, *Malone v. Mate*, was combined with the *Lucy* case and they were admitted in June, 1963, under the original order. Gov. George Wallace, who had campaigned on a pledge to "stand in the schoolhouse door" and to block any desegregation efforts, attempted to stop the admission on the main campus June 11, but he withdrew when President John F. Kennedy federalized the Alabama National Guard. Two of the Negroes were accepted by the school and the third enrolled without incident two days later at the Huntsville extension center. One of the two Negroes attending at the main campus withdrew on Aug. 11, 1963, when faced with charges that he had accused university officials of conspiring to get him expelled. Auburn University is under court order to desegregate and admit a Negro graduate student in January, 1964. The college enrollments are:

| Predominantly White | Enrollment* White | Enrollment* Negro | Date Deseg. |
|---|---|---|---|
| Alabama College | 2,114 | 0 | |
| Auburn University | 16,025 | 0 | |
| University of Alabama** | 26,404 | 2 | 1963-C |
| Medical-Dental | 802 | 0 | |
| Florence State | 3,154 | 1 | 1963-C |
| Jacksonville State | 4,075 | 0 | |
| Livingston State | 979 | 0 | |
| Troy State | 3,737 | 0 | |
| TOTALS | 57,290 | 3 | |
| **Predominantly Negro** | | | |
| Alabama A & M† | 0 | 1,784 | 1963-V |
| Alabama State | 0 | 3,018 | |
| TOTALS | 0 | 4,802 | |

*1961-62, except for Negroes in predominantly white schools.
**Includes Birmingham, Dothan, Gadsden, Huntsville, Mobile, Montgomery and Selma extension centers.
†One white, summer, 1963.

### FACULTIES

Segregation is maintained. The seven predominantly white schools had 2,830 faculty members; the two predominantly Negro schools, 192.

### SPECIAL SCHOOLS

All the state's 11 vocational technical schools are segregated. The eight schools for whites had a total enrollment in 1961-62 of 4,025; the three for Negroes, 435. A desegregation suit (*Koen v. Knight*) is pending against the all-white trade school in Mobile. The eight white trade schools had 361 instructors in 1961-62; the three Negro schools, 60.

### LITIGATION (14)

*Alabama ex rel Patterson v. NAACP*

Montgomery Circuit Court Judge Walter B. Jones issued temporary injunction in June, 1956, restraining organization from operation in state. Jones fined NAACP $100,000 for refusing to produce membership records. Fine set aside by U.S. Supreme Court in 1958, reinstated by Alabama Supreme Court in 1959, again set aside in 1959 by U.S. Supreme Court. On Oct. 23, 1961, the U.S. Supreme Court directed Alabama courts to hear the case on its merits—thus permitting the NAACP a chance to free itself of the temporary injunction—or forfeit jurisdiction to the U.S. District Court in Montgomery. Jones made the injunction permanent Dec. 29, 1961. The U.S. Supreme Court agreed Oct. 14, 1963, to hear the case for the fourth time.

*Armstrong et al v. Birmingham Board of Education*

Filed in U.S. District Court June 17, 1960, to enjoin Birmingham Board of Education from "operating a biracial school system." *Armstrong* and *Nelson* cases combined. On May 28, 1963, U.S. District Judge Seybourn Lynne refused to order desegregation of

Birmingham schools because plaintiffs had not exhausted administrative remedies. But he warned that the court would not tolerate discrimination under the School Placement Law, which had been held valid "upon its face" Nov. 24, 1958, in *Shuttlesworth v. Birmingham Board of Education*. The U.S. Fifth Circuit Court of Appeals ruled July 12, 1963, that the board must submit a plan for September, 1963, and apply the placement law without discrimination "to all grades . . . including the admission of new pupils entering the first grade, or coming into the city for the first time." On Aug. 19, 1963, the District Court approved a grade-a-year plan beginning with the 12th grade. After attempts by Gov. George Wallace to block admission of five Negroes to three previously all-white schools, schools were desegregated on Sept. 10, 1963, when President Kennedy federalized the state Guard. All five of Alabama's federal district judges had issued an order against the governor's interference.

*Davis et al v. Mobile Board of Education*

Filed March 27, 1963, in U.S. District Court on behalf of 20 Negro children seeking admission to white schools. U.S. District Judge Daniel H. Thomas refused on April 24, 1963, to grant a temporary injunction against the board, and the U.S. Fifth Circuit Court of Appeals upheld him on May 24, although it directed a "prompt and reasonable start" in desegregation. Judge Thomas on June 24 ordered the board to present by Nov. 14 a desegregation plan for 1964-65. The circuit court on July 9 overruled Thomas and directed that a grade-a-year plan begin with the first grade in September, 1963. The circuit court later revised the order to coincide with the order in the Birmingham case, allowing the school board to submit a plan. On Aug. 16, U.S. Supreme Court Justice Hugo L. Black refused a stay order. Gov. George Wallace attempted to block the admission of two Negroes to the 12th grade at Murphy High but President John F. Kennedy federalized the Alabama National Guard and all five of the U.S. district judges in Alabama issued preliminary injunctions forbidding the governor to interfere. Negroes entered the classes on Sept. 10. On Oct. 28, 1963, the U.S. Supreme Court refused to review the circuit court order. Judge Thomas on Nov. 15, 1963, took under advisement a request for a permanent desegregation order.

*Franklin v. Parker*

Filed Aug. 27, 1963, in U.S. District Court by Harold A Franklin, graduate of Alabama State College (for Negroes), for admission to Auburn University's graduate school. U.S. District Judge Frank M. Johnson on Nov. 5, 1963, rejected Auburn's contention that Franklin was not qualified because he had not graduated from an accredited college. Johnson held that it was the state's fault, since neither of the state-operated colleges for Negroes is accredited. Johnson directed Auburn to enroll Franklin on Jan. 2, 1964. The university filed notice of appeal.

*Gunn v. Norton*

Filed Aug. 20, 1963, and on Aug. 29 U.S. District Judge H. Hobart Grooms ordered Florence State College to admit Wendell Willkie Gunn, a Negro, Sept. 11. Gunn entered the college without incident.

*Hereford et al v. Huntsville Board of Education*

Filed March 11, 1963, by five Negro parents in behalf of their children. On Aug. 12, 1963, U.S. District Judge Hobart Grooms ordered Huntsville to accept four Negro students in four schools and directed the board to submit plan of future desegregation no later than Jan. 1, 1964. Negroes entered peacefully Sept. 9, 1963, after being blocked earlier by state troopers under the orders of Gov. George Wallace.

*Koen v. Knight*

Filed in Mobile District Court in August, 1960, by Ernest Koen and Frank E. Lee, Negroes, against H. Clay Knight, director of state trade school at Mobile, seeking admission to school. Also named as defendants: State Superintendent of Education Frank R. Stewart and members of State Board of Education. The court has motions under advisement; no hearing date has been set on the merits.

*Lee v. Macon County Board of Education*

Filed Jan. 28, 1963, in U.S. District Court in behalf of 16 Negro children seeking to attend previously all-white Tuskegee High School, U.S. District Judge Frank M. Johnson Jr. on Aug. 12, 1963, ordered desegregation of Macon County schools, directing the board to apply the state placement law without discrimination and to submit further plans by January, 1964. On Aug. 29, the board approved transfer of 13 Negroes to Tuskegee High. Gov. Wallace attempted to block admission of Negroes, using state troopers. President John F. Kennedy federalized the Alabama National Guard Sept. 10 and all five of Alabama's U.S. District Court judges joined in a restraining order and a preliminary injunction directed at the governor. Negroes entered the school Sept. 10 but all white students withdrew, leaving only 12 Negroes attending the high school (one of the original 13 was expelled). White students began attending other white schools nearby and a newly organized Tuskegee private school.

*Lucy v. Adams*

U.S. District Judge H. Hobart Grooms ordered Autherine Lucy admitted to the University of Alabama on Feb. 3, 1956, but Grooms upheld her expulsion after brief attendance for accusing school officials of conspiracy in the riots that drove her from the campus in February. Order opening university to all qualified Negroes remains in effect. (See *Malone v. Mate*)

*Malone v. Mate*

Filed April 15, 1963, in U.S. District Court by Vivian J. Malone and James Hood, seeking admission to the University of Alabama main campus in Tuscaloosa, and by Dave M. McGlathery, seeking admission to the university's Huntsville extension center. On May 21, 1963, Judge H. Hobart Grooms ruled that the July 1, 1955, permanent injunction ordering the university to accept qualified Negroes remained in effect *(Lucy v. Adams)*. Grooms directed admission of the Negro students. On June 11, Gov. George Wallace turned back Asst. U.S. Attorney General Nicholas Katzenbach who arrived on the main campus with Miss Malone and Hood. President John F. Kennedy federalized the Alabama National Guard, and ordered Wallace to desist. Wallace stepped aside and the students were enrolled. On June 13, McGlathery entered the Huntsville center without incident. The university filed notice of appeal June 19. Hood withdrew from the university in August, 1963, under doctor's orders, he said, while faced with charges he had attacked the administration in a July speech in Gadsden.

*Nelson et al v. Birmingham Board of Education*

Filed June 13, 1962, in U.S. District Court, seeking substantially same relief as Armstrong case. Combined with Armstrong case for hearings, and dismissed on May 28, 1963, because Nelson children no longer lived in Birmingham.

*Reed v. Pearson et al*

Willie Reed attended Reeds Chapel School in Washington County for three days in January, 1961, but was dismissed after other parents protested his presence. Suit filed in U.S. District Court was dismissed on Aug. 21, 1961. Appeal to U.S. Fifth Circuit Court of Appeals charged he was "not discriminated against by the white race, but by people of his own race, color, mixed blood group and by his own relatives." Appellate court upheld District Court that no federal question was raised and that the case was "nothing more than a family squabble among Negroes of mixed blood."

***Shuttlesworth v. Birmingham Board of Education***

The U.S. Supreme Court on Nov. 24, 1958, held *Act 201 of 1955* (amended in 1957) valid "upon its face," affirming finding of three-judge district court May 9, 1958, which denied a Negro request for an order admitting Negroes to Birmingham white schools.

***United States v. Mobile, Huntsville and Madison County Boards of Education***

Filed Jan. 18, 1963, by the U.S. Department of Justice seeking desegregation of schools attended by children of servicemen in the three areas. The Huntsville and Madison suits were joined. On May 29, 1963, U.S. District Court Judge H. Hobart Grooms ruled in Birmingham that the justice department was "without authority" in bringing suits against Huntsville and Madison County. Grooms said individuals must show discrimination, otherwise the pupil placement law remained valid. "Except in the field of voting rights," Grooms found, "the Congress has granted no authority to bring such a suit as this. In fact, it has refused to grant such permission." On June 27, 1963, the justice department filed notice of appeal.

## LEGISLATION (32)

### 1955

*SJR 23*—Asked Congress to limit appellate jurisdiction of federal courts.

*Act 187*—Allowed "freedom of choice" in school segregation for Wilcox County.

*Act 201*—Established pupil assignment criteria. Amended by *Act 367* of 1957. Upheld in 1958 in *Shuttlesworth v. Birmingham Board of Education*.

### 1956

### (Special Session)

*HJR 10*—Requested U.S. Supreme Court modify its decree.

*Act 40*—Modified teacher tenure in Macon County to permit firing of teachers who advocate desegregation.

*Act 41*—Modified teacher tenure in Marengo County to permit firing of teachers who advocate desegregation.

*Act 42*—Interposition and nullification.

*Act 43*—Required registration of organizations soliciting memberships in Marengo County.

*Act 82*—Proposed amendment for "freedom of choice" in school segregation and provided for disposal of property to private schools. Approved in referendum in August, 1956.

*Act 117*—Authorized separate schools for children whose parents "voluntarily elect" them.

### 1957

*HJR 13*—Interposition. Also protested school and other Supreme Court decisions.

*HJR 33*—Urged Supreme Court to "reverse . . . tendency" and "restore rule of law."

*HJR 122*—Urged president to respect states' rights.

*SJR 16*—Condemned "Black Monday" school decision.

*SJR 46*—Proposed constitutional amendment to limit federal court terms to definite periods.

*SJR 47*—Requested convention to implement proposal to *SJR 46*.

*Act 119*—Established Legislative Coordinating Committee.

*Act 239*—Modified teacher tenure in Bullock County to permit firing of teachers who advocate desegregation.

*Act 361*—Modified teacher tenure in Lowndes County to permit firing of teachers who advocate desegregation.

*Act 367*—Amended pupil assignment act (*Act 201* of 1955) to make school officials judicial officers in fact as well as name.

*Act 528*—Allowed boards of education to close schools, to sell or lease buildings, and provided tuition grants for private schooling. Amended by *Act 210* of 1961.

*Act 532*—Protected teacher retirement benefits in case of public school closing or conversion to private schools.

### 1959

*Act 39*—Provided for secession of individual schools from local and state systems and for their organization into independent districts.

*Act 127*—Provided state aid at college level for instruction not available at public colleges.

*Act 652*—Permitted allocation of education funds to private schools where public school facilities not available.

### 1961

### (Special Session)

*Act 210*—Amended 1957 school closing law ( *Act 528*) to permit boards of education to close desegregation-threatened schools "in the public interest," without waiting for violence or threat of it.

*Act 249* (Special Session)—Modified teacher tenure in Dallas County to permit firing of teachers who advocate desegregation.

*Act 383*—Modified teacher tenure in Sumter County to permit firing of teachers who advocate desegregation.

*Act 443*—Modified teacher tenure in Perry County to permit firing of teachers who advocate desegregation.

### 1962

*HJR 35*—Established 15-man Commission on Constitutional Government and provided $25,000 to "promulgate information concerning the dual system of government," with emphasis on the "effect of integration" of schools and other public institutions. Gov. John Patterson killed by pocket veto on the ground that "the responsibility of maintaining segregation in the public schools rests primarily with the governor."

### 1963

*Acts 460, 522*—Permitted local boards to separate students on basis of "disparate ability, background and achievement," and to provide special classes, instruction, and whatever grouping considered necessary "in the best interest of the students and the entire student body of the school". The acts' sponsor, Rep. Alton Turner, said the legislation provided for segregation by sex and race within a school ordered desegregated.

# ARKANSAS

## Status of Segregation-Desegregation

### PUBLIC SCHOOLS

Arkansas has 13 desegregated school districts, with 66,752 whites and 18,643 Negroes enrolled. The state's first desegregation was at Charleston and Fayetteville, both in 1954, both voluntary. Texarkana's Board of Education has voted to desegregate in September, 1964. Statistics on desegregated districts follow:

| District | Enrollment White | Enrollment Negro | Negroes w/Whites | Grades | Brcl. Schls. | Date Deseg. |
|---|---|---|---|---|---|---|
| Bentonville | 1,678 | 3 | 3 | 1-12 | 2 | 1955-V |
| Charleston | 488 | 18* | 18* | 1-12 | 2 | 1954-V |
| Dollarway | 1,413 | 1,482 | 2 | 1,2,10,11 | 1 | 1960-C |
| Fayetteville | 4,275 | 120* | 56* | 7-12 | 3 | 1954-V |
| Fort Smith | 12,002 | 1,222 | 31 | 1-7 | 3 | 1957-V |

*Estimated.
**Plus one high school vocational class.
†Includes one white child in a school with 718 Negroes.

### TEACHERS

Complete segregation is maintained.

### HIGHER EDUCATION

All eight state, tax-supported colleges and universities consider applicants without regard to race. About 46 Negroes attend the seven predominantly white schools. The University of Arkansas desegregated voluntarily in January, 1948. The seven other colleges adopted desegregation in principle in the summer of 1955 on the advice of the state attorney general, who said the U.S. Supreme Court decisions would apply to them. Enrollment figures, all estimated, are:

| Predominantly White | Total | Negroes | Date Deseg. |
|---|---|---|---|
| Arkansas A&M | 1,178 | 0 | 1955-V |
| Ark. Polytechnic | 1,755 | 3 | 1955-V |
| Ark. State | 3,679 | 15 | 1955-V |
| Ark. State Teachers | 2,394 | 0 | 1955-V |
| Henderson State Teachers | 1,853 | 4 | 1955-V |
| Southern State | 1,500 | 4 | 1955-V |
| Univ. of Ark. | 8,415 | 20 | 1948-V |
| TOTALS | 20,774 | 46 | |
| **Predominantly Negro** | | | **Date** |
| Ark. AM&N | 2,175 | 2,175 | 1955-V |
| STATE TOTALS | 22,949 | 2,221 | |

### FACULTIES

No college has a desegregated faculty. No Negro teachers have lost jobs due to desegregation.

### SPECIAL SCHOOLS

The state maintains separate schools by race for the blind, the deaf, the retarded and the handicapped, and for the incorrigible or the delinquents. The state also maintains a vocational trade school for whites at the high school level but none for the Negroes.

### ETHNIC GROUPS

The 1960 census showed Arkansas had 580 Indians, 237 Japanese, 676 Chinese, 83 Filipino and 206 "Other." As far as known, all children in these groups attend regular public schools with whites. During cotton chopping (spring) and cotton picking (fall) seasons, Arkansas imports Mexican workers, whose children also attend regular white public schools

### LITIGATION (33)

*Abernathy v. Izard*

Filed Oct. 28, 1955, in U.S. District Court, seeking desegregation of Van Buren public schools. Desegregation ordered by the court in January, 1956. School board presented plan Aug. 21, 1956, and began desegregation September, 1957.

*Bates v. City of Little Rock*

Appeal by Mrs. L. C. Bates from her conviction under the Little Rock "Bennett" ordinance, which required disclosure of NAACP membership list. U.S. Supreme Court overturned conviction Feb. 23, 1960.

*Carr v. Young*

Filed June 17, 1959, in Pulaski County Chancery Court, Little Rock. Contested *Act 10 of 1958*. Chancery Court upheld the act and State Supreme Court affirmed on Feb. 8, 1960. Carr, Gephardt and Shelton cases consolidated on appeal to U.S. Supreme Court, which held act invalid Dec. 12, 1960.

*Dove v. Parham*

Filed Feb. 6, 1959, in U.S. District Court. Sought to end segregation in the Dollarway School District at Pine Bluff. Principal rulings and events:

Aug. 4, 1959—Federal district judge ordered three Negroes admitted to the white high school but upheld validity of the pupil placement law (*Act 461* of 1959).

Sept. 21, 1959—U.S. Eighth Circuit Court of Appeals affirmed ruling on placement law and ordered the plaintiffs to complete the appeal procedure under the law, instead of being admitted immediately to the white high school.

Feb. 19, 1960—On supplementary complaint by the Negro plaintiffs that they had completed the procedure but still were denied admission to the white school, a federal district judge refused to order them admitted but ordered the school board to file a statement of "affirmative policy" by which it would eliminate segregation.

April 30, 1960—District judge approved the board's statement, which provided that starting in 1960, first grade students would be assigned to schools according to the preference of their parents "insofar as possible" and that transfers at higher grades would be opposed.

Aug. 30, 1960—U.S. Eighth Circuit Court of Appeals ruled that the statement did not constitute an adequate start toward desegregation.

September, 1960—One Negro girl entered the first grade of the white school under the plan.

Oct. 12, 1960—District judge ordered the board to present a new "more adequate, objective and definite" plan.

Nov. 19, 1960—Board filed restatement of original plan, assuring that no student would be denied admission to a school solely on racial grounds, and argued that the Negro's admission was an objective and definite action.

Dec. 20, 1960—District judge said the new plan was

not enough, ordered the board to "beef it up."

March 13, 1961—Board filed another—the third—version of its desegregation plan. It said first graders would be admitted to schools of their choice subject to meeting the criteria of the assignment law and making at least average scores on pre-school tests.

May 12, 1961—District judge authorized board to proceed with plan and after the board assigned only two Negro pupils to the white school, the judge on Aug. 25 ordered two more admitted.

Nov. 6, 1961—The district judge refused to allow the board to assign a Negro second grader back to the Negro school, even though that might be more advantageous for him educationally, because there was no reason for the transfer under the pupil assignment law.

Oct. 24, 1962—The court ordered a Negro girl admitted to the 10th grade at the start of the second semester, in January, unless the board could find, by Jan. 1, 1963, a valid reason for not admitting her under the assignment law.

Jan. 21, 1963—Over the board's objection, the girl was admitted to the 10th grade.

*Duncan v. Kirby*

Vernon H. Duncan, a civilian arrested by an Army officer at Little Rock Central High School on Oct. 3, 1957, was fined $50 in Municipal Court. In March, 1958, State Supreme Court granted Duncan's motion to dismiss the case.

*Ex Parte Rector*

Filed Aug. 17, 1957, in Pulaski County Chancery Court, Little Rock. Sought to determine the validity of four 1957 segregation laws, *Acts 83, 84, 85* and *86*. No hearing was ever held.

*Fitzhugh v. Ford*

Filed Sept. 16, 1958, in Pulaski County Chancery Court, Little Rock. Contested validity of *Act 5*, of 1958, which provided for state tuition payments to the schools attended by pupils displaced by schools closed under *Act 4* of 1958. Upheld Oct. 1, 1958, by Chancery Court, and on May 4, 1959, by State Supreme Court, but ruled invalid June 18, 1959, by U.S. District Court, in *Norwood v. Tucker* (then *Aaron v. Cooper*).

*Garrett v. Faubus*

Filed Sept. 12, 1958, in Pulaski County Chancery Court, Little Rock. Contested validity of the school-closing law, *Act 4* of 1958. Act upheld Oct. 1, 1958, by Chancery Court, and April 27, 1959, by State Supreme Court, but ruled invalid in June, 1959, by Federal District Court in *Norwood v. Tucker* (then *Aaron v. Tucker*).

*Gephardt v. Tucker*

Filed June 19, 1959, in Pulaski County Chancery Court, Little Rock. Contested *Act 10* of 1958. Chancery Court upheld act and State Supreme Court affirmed on Feb. 8, 1960. U.S. Supreme Court held act invalid Dec. 12, 1960, in Shelton, Gephardt and Carr cases consolidated on appeal.

*Glover v. McKinley*

Filed May 22, 1959, in Pulaski County Circuit Court, Little Rock. Libel suit by 39 white teachers asked $3.9 million against former school board president and his campaign manager. Plaintiffs withdrew their complaint March 19, 1962, without explanation.

*Hoxie School District v. Brewer*

Filed Oct. 14, 1955, in U.S. District Court, seeking to enjoin interference with school board's desegregation plan and asked for declaration of the board's duty under the 1954-55 Supreme Court decisions. On Jan. 9, 1956, District Court enjoined interference, held all state segregation laws invalid and ruled that board had duty to desegregate or be liable to lawsuit. Justice department intervened on side of school board (first desegregation suit the department entered). On Oct. 25, 1956, U.S. Eighth Circuit Court of Appeals affirmed District Court.

*Jackson v. Kuhn*

Filed Oct. 2, 1957, in U.S. District Court. Sought removal of federal troops from Little Rock Central High School. Dismissed Oct. 15, 1957, by the court. U.S. Eighth Circuit Court of Appeals upheld District Court on April 28, 1958.

*King v. Little Rock School District*

Filed Nov. 13, 1958, in Pulaski County Chancery Court. Sought to keep school board from buying up contract of former Supt. Virgil T. Blossom at face value. Dismissed April, 1959, after Blossom declined the board's offer and accepted lesser amount.

*Matthews v. Lanius*

Filed June 20, 1952, in U.S. District Court by Negro plaintiffs who sought equal facilities in Bearden public schools and also requested, as matter of form, desegregation of schools. U.S. Supreme Court ruling of 1954 brought the desegregation request into play. District Judge John E. Miller on Oct. 4, 1955, ordered Bearden school board to start changing to non-discriminatory school system within a year. School board and Negro plaintiffs worked out plan of equalization that satisfied both sides. Board presented desegregation plan March 19, 1957, but Judge Miller issued no order and held case in abeyance. There have been no more proceedings.

*NAACP v. Bennett*

Filed Dec. 4, 1958, in U.S. District Court. Contested validity of *Acts 12, 13, 14* and *16* of 1958. Court ruled Feb. 17, 1959, that state courts should rule first. U.S. Supreme Court on June 22, 1959, ordered District Court to reconsider. After hearing Sept. 12, 1959, District Court again stayed proceedings pending action by state courts. Plaintiffs refiled February 1960, in Pulaski County Chancery Court. On May 13, 1961, Chancellor Murray O. Reed voided *Acts 12, 14* and *16* but upheld *Act 13*. Both sides appealed to the State Supreme Court, which voided all four acts on June 3, 1963. Bennett asked for a rehearing, which was refused Sept. 9, 1963.

*NAACP v. Faubus*

Filed Oct. 26, 1957, in U.S. District Court. Contested validity of *Act 85* of 1957, which required certain organizations to register with the State Sovereignty Commission. Federal court stayed proceedings until law had been tested in state courts. State Supreme Court ruled *Act 85* invalid in September, 1959, in the case *Smith v. Faubus*. Petition in federal court dismissed Feb. 12, 1962, by request of the judge and with consent of the plaintiffs.

*Norwood v. Tucker*

Filed Feb. 8, 1956, in U.S. District Court, Little Rock, as *Aaron v. Cooper*. Attacked Little Rock school plan of gradual desegregation as inadequate. Main rulings and events:

Aug. 28, 1956—District Court upheld plan.

April 29, 1957—U.S. Eighth Circuit Court of Appeals upheld plan.

Aug. 30, 1957—District Court overruled Chancery Court injunction against desegregation plan and ordered board to proceed.

Sept. 3, 1957—Admission of Negroes to Central High blocked by Arkansas National Guard.

Sept. 20, 1957—Federal court enjoined Gov. Faubus and others against interfering with court-ordered desegregation; injunction upheld April 28, 1958, by Eighth Circuit Court and by U.S. Supreme Court in October, 1958.

Sept. 25, 1957—Negro students entered Central High under protection of federal paratroopers.

June 20, 1958—District Court delayed plan 2½ years to January, 1961; Eighth Circuit Court reversed delay; and appeals court upheld on Sept. 12,

1958, by U.S. Supreme Court, which ordered board to proceed with desegregation plan.

Sept. 12, 1958—Gov. Faubus closed Little Rock high schools and ordered referendum Sept. 27 on whether to close high schools or desegregate every school in district immediately. Vote was 19,470 to 7,561 for closing.

Sept. 29, 1958—School board enjoined by appeals court from leasing public school property to Little Rock Private School Corp.

Nov. 4, 1958—Dale Alford, school board member who opposed any desegregation, defeated Brooks Hays for Congress. Nov. 12, other five board members resigned en masse. Dec. 6, new six-man board elected and Ed I. McKinley Jr., became president (making style of case *Aaron v. McKinley*). May 25, 1959, McKinley and two others recalled from board, three new members appointed and Everett Tucker Jr. became president (making style of case *Aaron v. Tucker*).

June 18, 1959—*Acts 4* and 5 of 1958 held unconstitutional by District Court; affirmed Dec. 14, 1959, by U.S. Supreme Court.

Aug. 12, 1959—Little Rock high schools reopened with Negroes assigned to both Central and Hall High Schools.

August, 1959—Negro plaintiffs in *Aaron v. Tucker* filed supplemental complaint that school board was using placement law to limit desegregation.

Sept. 20, 1960—District Court upheld board's use of placement law (*Act 461* of 1959), declared this terminated case and ruled that Negro plaintiffs in future would have to file individually. (In appealing this ruling, attorney for plaintiffs changed style of case to *Norwood v. Tucker*).

March 2, 1961—Eighth Circuit Court reversed District Court, ruled that board was using assignment law illegally and must begin applying it objectively to all students, and ordered board to speed up desegregation plan.

June 13, 1961—After board assigned 48 Negro pupils to white schools for 1961-62, plaintiffs asked that assignments be done over and district judge refused.

Sept. 9, 1961—Plaintiffs protested 1961-62 assignments but district judge overruled protests.

*Parker v. Blossom*

Filed Mar. 7, 1958, in Pulaski County Circuit Court, Little Rock. Sought reinstatement of Sammie Dean Parker, white student expelled from Central High School because of incidents with Negro students. Dismissed March 11, 1958, when she was reinstated.

*Rogers v. Paul*

Filed Sept. 12, 1963, in U.S. District Court by Mr. and Mrs. William Rogers, Negro parents who sought the admission of their two daughters to Northside High School, a white school in Fort Smith.

*Safferstone v. Tucker*

Filed July 21, 1961, in Pulaski County Chancery Court. Safferstone and other white property owners sued to stop the Little Rock school board from converting Rightsell Elementary School from white to Negro use. The court upheld the school board, and the State Supreme Court affirmed the decision on May 4, 1962.

*Shelton v. Tucker*

Filed April 21, 1959, in U.S. District Court. Contested validity of *Act 10* of 1958 and *Act 115* of 1959. In June, 1959, District Court upheld *Act 10* but held *Act 115* invalid. *Act 10* held invalid Dec. 12, 1960, by U.S. Supreme Court.

*Smith v. Faubus and State Sovereignty Commission*

Filed Aug. 16, 1957, in U.S. District Court, then refiled Nov. 8, 1957, in Pulaski County Chancery Court, Little Rock. Attacked validity of 1957 legislation establishing State Sovereignty Commission. State Supreme Court in Sept. 14, 1959, crippled *Act 83* of 1957, which established the commmission, by ruling that six of its 12 members could not legally serve because they were members of the legislature; this left the commission without a quorum and thus powerless to act. At same time the State Supreme Court invalidated *Act 85* of 1957, which required certain organizations to register with the commission, on the ground that the state had no authority to control lobbying, which is regulated by federal law. The federal court suit was dismissed Feb. 26, 1962, at the request of the judge and with consent of the plaintiffs.

*State v. NAACP*

Case No. 108,363 filed Aug. 26, 1957, in Pulaski County Chancery Court, Little Rock. Contended NAACP was foreign corporation, which had failed to register with state and owed $350, and sought to examine NAACP records. Default judgment for penalty and interest of $437.50 entered and paid by NAACP, November, 1957, but NAACP stood firm on claim that its records were privileged. State Supreme Court affirmed ruling Dec. 23, 1958, and U.S. Supreme Court refused to hear appeal, June 15, 1959. On Aug. 18, 1961, the $437.50 was transferred to State Revenue Department and from there to Secretary of State, who then issued notice that the NAACP was in good standing.

*State v. NAACP Legal Defense and Education Fund*

Case No. 44,679 filed Aug. 26, 1957, in Pulaski County Circuit Court, Little Rock. Sought $5,000 penalty for alleged failure to file with state as foreign corporation. No ruling has been made.

*State v. NAACP*

Case No. 44,851 filed Oct. 10, 1957, in Pulaski County Circuit Court, Little Rock. Sought $5,000 penalty for alleged failure to register as foreign corporation. No ruling has been made.

*State v. NAACP*

Case No. 45,182 filed Dec. 23, 1957, in Pulaski County Circuit Court, Little Rock. Sought injunction to prevent alleged illegal practice of law. Circuit Judge Guy Amsler held on May 30, 1961, that he did not have the authority to issue the requested injunction and dismissed the lawsuit.

*State v. NAACP Legal Defense and Education Fund*

Case No. 45,183 filed Dec. 23, 1957, in Pulaski County Circuit Court, Little Rock. Sought injunction to prevent alleged illegal practice of law. No ruling has been made.

*Stephens v. Laster*

Filed Dec. 24, 1958, in Pulaski Circuit Court, Little Rock. Contested Laster's victory over Stephens in school election Dec. 6, 1958, for position on Little Rock school board. Laster was recalled from board in special election and suit became moot.

*Taylor v. University of Arkansas*

Filed Oct. 16, 1958, in Pulaski County Chancery Court, Little Rock. Sought to cure any legal defect in purchase of a school site from university by Little Rock Private School Corp. Court ruled that any defect had been cured by *Act 223* of 1959.

*Thomason v. Cooper*

Filed Aug. 28, 1957, in Pulaski County Chancery Court, Little Rock. Sought injunction to prevent Little Rock school board from proceeding with its desegregation plan. Chancery Court granted injunction Aug. 29, 1957. U.S. District Court overruled injunction Aug. 30, 1957. U.S. Eighth Circuit Court of Appeals upheld District Court, April 28, 1958.

*Wilbern v. Little Rock School Board*

Filed Aug. 14, 1957, in Pulaski County Chancery Court, Little Rock. Sought transfer of white students from desegregated schools. Hearing never held.

*Williams v. City of North Little Rock*

Appeal by Mrs. Birdie Williams from her conviction under the North Little Rock "Bennett" ordinance, which required disclosure of NAACP membership list. U.S. Supreme Court overturned conviction Feb. 23, 1960.

*Wise v. Gasaway*

Filed Sept. 19, 1955, in U.S. District Court by Negro teachers who protested their pay was lower than white teachers' in Gould (Lincoln County) School District. Dismissed December, 1957, at request of plaintiffs, who said pay had been equalized.

## LEGISLATION (43)

### 1956

*Initiated Act 2*—Enacted pupil placement law by initiative petition and referendum. Approved 214,712 to 121,129 in general election Nov. 6, 1956.

*Constitutional Amendment 47*—Required legislature to adopt interposition. Enacted by initiative petition and referendum. Approved 185,374 to 146,064 in general election Nov. 6, 1956.

*Resolution of Interposition*—Declared state policy. Enacted by initiative petition and referendum. Approved 199,511 to 127,360 in general election Nov. 6, 1956.

### 1957

*Act 83*—Created State Sovereignty Commission with duty to protect Arkansas and other states from encroachment by federal government and to provide advice and legal assistance to school districts on matters relating to commingling of the races. Had power to examine books, records, investigate, hold hearings and to subpoena persons and things. Law rendered ineffective Sept. 14, 1959, by State Supreme Court ruling, in *Smith v. Faubus*, that six of the 12 commission members could not legally serve because they were members of the legislature, thus leaving commission without a quorum to act.

*Act 84*—Modified compulsory school attendance law to provide that no child would be required to attend a desegregated school.

*Act 85*—Required racial lobbyists and promoters to register with the Sovereignty Commission. Rendered ineffective by State Supreme Court, Sept. 14, 1959, in *Smith v. Faubus*, by ruling that law could not apply to lobbyists.

*Act 86*—Authorized schools boards to hire legal counsel to defend board or any board member in desegregation suits.

### 1958

(Special Session)

*Act 4*—Permitted governor to close schools. Declared invalid June 18, 1959, by U.S. District Court, in *Norwood v. Tucker* (formerly *Aaron v. Tucker*).

*Act 5*—Provided that state aid be withheld from schools closed under *Act 4* and be paid to schools attended by students transferring from the closed school. Declared unconstitutional June 18, 1959, by U.S. District Court in *Norwood v. Tucker* (formerly *Aaron v. Tucker*).

*Act 6*—Permitted student transfers from desegregated school to any segregated school.

*Act 7*—Permitted segregated classes within desegregated school.

*Act 8*—Appropriated $100,000 for governor's expense in school crisis.

*Act 9*—Authorized recall of school board members on petition of 15 per cent of qualified electors (*Act 19 of 1959* made it 25 per cent.) Repealed by *Act 61 of 1961*.

*Act 10*—Required teachers to list, as condition of employment, memberships in and contributions to organizations in last five years. Upheld June, 1959, by U.S. District Court but held unconstitutional Dec. 12, 1960, by U.S. Supreme Court in consolidated appeal of *Shelton v. Tucker*, *Gephardt v. Tucker* and *Carr v. Young*.

*Act 11*—Made law prohibiting practice of law by corporations apply to benevolent and charitable organizations.

*Act 12*—Required any organization deemed to be "interfering with operation of public schools" to file membership lists and other records with county judge. Voided May 13, 1961, in *NAACP v. Bennett*, and State Supreme Court on June 3, 1963, also held the law unconstitutional.

*Act 13*—Authorized state attorney general to get court order to search office and copy records of organization suspected of evading state taxes. Voided June 3, 1963, by State Supreme Court in *NAACP v. Bennett*.

*Act 14*—Defined barratry, set penalties for conviction. Voided May 13, 1961, in *NAACP v. Bennett*, and the State Supreme Court on June 3, 1963, also held the law unconstitutional.

*Act 15*—Appropriated $19,200 to state attorney general for expenses of school desegregation suits.

*Act 16*—Made it unlawful to promise or to give anything of value as an inducement to commence a lawsuit. Voided May 13, 1961, in *NAACP v. Bennett*, and the State Supreme Court on June 3, 1963, also held the law unconstitutional.

*Act 17*—Made it a misdemeanor to enter public school property or public place of business and create disturbance.

### 1959

*SJR 5*—Proposed *Constitutional Amendment 52* on tuition grants, local option on school closing, other matters. Rejected at general election Nov. 8, 1960, by 247,804 to 83,900.

*Act 19*—Required 25 per cent (instead of 15 per cent) of electors to petition for school board recall election. Repealed by *Act 61* of 1961.

*Act 46*—Provided for tuition grants to students themselves if schools closed.

*Act 55*—Protected retirement benefits of teachers switching to private schools.

*Act 115*—Made it unlawful for any NAACP member to be employed by state, county, municipality or school district. Declared unconstitutional June, 1959, by U.S. District Court in *Shelton v. Tucker*.

*Act 151*—Provided tuition grants to students who decline to attended desegregated school.

*Act 181*—Authorized school boards to meet in jail if any member jailed for defying desegregation court order.

*Act 208*—Allowed schools closed during desegregation to use average daily attendance of previous year in applying for state aid.

*Act 223*—Cleared title to land for T. J. Raney High School (private).

*Act 224*—Allowed sale or lease of public recreation facilities to avoid desegregation.

*Act 225*—Permitted county judges to require certain records and information from any organization deemed to be interfering in school operations.

*Act 226*—Made creating disturbance in public place a misdemeanor.

*Act 236*—Provided tuition grants to white students whose "welfare would be served by attending segregated instead of desegregated school."

*Act 337*—Appropriated $65,000 to Pulaski County (rural) School District and $3,000 to Hazen School District for expense of taking in displaced Little Rock high school students during 1958-59.

*Act 358*—Appropriated $100,000 to State Board of Education for use by needy school districts in desegregation litigation.

*Act 461*—Pupil assignment law. Included all assignment criteria of *Initiated Act 2* of 1956 except one (the location of pupil's residence in relation to schools) and omitted the injunction in *Act 2* that race may not be considered.

*Act 466*—Provided that money withheld under *Act 5* of 1958 and unused would be returned to school district from which withheld.

**1961**

*HCR 14*—Requested Congress to propose a constitutional amendment providing that Supreme Court decisions be invalidated on application within three years of decision by one-fourth of state legislatures until decision subsequently approved by three-fourths of legislatures.

*SJR 1*—Proposed to amend state constitution to provide that no child would be denied free public school education because of refusal to attend school with student of different race if school board were satisfied that attendance would be inimical to child's welfare. Defeated in general election Nov. 6, 1962.

*Act 45*—Increased penalties for bombing or dynamiting public or private property.

*Act 61*—Repealed *Act 9* of 1958 and *Act 19* of 1959, which provided for school board recall elections.

*Act 265*—Required State Board of Education to reimburse local school districts for 50 per cent or more of cost of desegregation, appropriated $100,000 for that purpose and outlined procedure for checking claims.

## Status of Segregation-Desegregation

### PUBLIC SCHOOLS

All 86 school districts operate under a State Board of Education policy of desegregation; only 40 districts actually have Negroes attending classes with whites, and the other 46 are desegregated in policy only. A federal court ordered the state's grade-a-year plan ended and complete desegregation started in all grades and all schools with the 1961-62 year. Arden and Claymont were the first districts to desegregate, voluntarily admitting Negroes in 1953. The districts with biracial schools are:

| | Enrollment White | Enrollment Negro | Negroes w/Whites | Brcl. Schls. | Date Deseg. |
|---|---|---|---|---|---|
| Arden #3 | 68 | 2 | 3 | 1 | 1953-V |
| Gunning Bedford | 890 | 91 | 91 | 3 | 1954-V |

| Wilmington | 6,315 | 7,579 | 7,055 | 20 | 1954-C |
| STATE TOTALS | 68,321 | 13,976 | 10,209 | 106 | |

### TEACHERS

The NAACP has launched a drive for teacher desegregation in New Castle County, which already had some at Wilmington and Newark. The extent has not been disclosed.

### HIGHER EDUCATION

Both state schools are desegregated. The University af Delaware, only formerly all-white, tax-supported school in the state, announced in 1948 that it would accept Negroes for graduate courses not offered at Delaware State College. The university admitted Negro undergraduates under order from the Court of Chancery in 1950. The enrollments are:

| | White | Negro | Date Deseg. |
|---|---|---|---|
| Delaware State | 25* | 633 | 1953-V |
| Univ. of Delaware | 3,975 | 20* | 1948-V |
| TOTALS | 4,000 | 653 | |

*Estimated

**FACULTIES**

The University of Delaware has over 325 faculty members but does not keep race statistics. One Negro reportedly taught in the 1963 summer school after a charge that the university did not have a single Negro faculty member. The predominantly Negro college, Delaware State College in Dover, has 55 faculty members, some of whom are white. Delaware State does not keep race statistics, either.

**SPECIAL SCHOOLS**

Delaware does not maintain any special schools, as such, for the blind, deaf, dumb, etc. Instead, schools themselves operate such units in rooms inside the regular school buildings. The majority of this type school is located in New Castle County, but one also has been built in Caesar Rodney Special School District in Kent County. Such classes are open to members of all races.

**ETHNIC GROUPS**

Delaware's Constitution still calls for separate schools for Indians, Moors, Negroes, and whites, although all schools are under federal court order to admit pupils of all races. In practice, the small schools for separate ethnic groups are being dissolved. In 1962, for instance, the Nanticoke Indian school in Sussex County closed as the pupils enrolled at white schools.

**LITIGATION (5)**

*Belton v. Gebhart*
*Bulah v. Gebhart*

Filed in the Court of Chancery on July 13, 1951, to desegregate public schools in Claymont and Hockessin. On April 1, 1952, Chancellor Seitz ordered the Negro plaintiffs admitted to the schools. The Delaware Supreme Court affirmed the decision on Aug. 28, 1952. On appeal to the U.S. Supreme Court, the cases were joined with the other school segregation suits pending before the court. The Delaware cases were decided with the other cases on May 17, 1954.

*Buchanan v. Evans et al*

Negro pupils sought admission in seven white school districts in Kent and Sussex counties in a suit filed in U.S. District Court in Wilmington in May, 1956. The U.S. Third Circuit Court of Appeals in Philadelphia on Aug. 29, 1960, ordered the state board to end its grade-a-year plan and to desegregate all schools, beginning with the 1961-62 school year. The Supreme Court in January, 1961, refused to review the circuit court order. U.S. District Judge Caleb Wright on Aug. 29, 1962, ordered Rose Hill-Minquadale district to admit nine more Negroes. U.S. District Judge Caleb R. Layton III on Oct. 15, 1962, signed an order forbidding Lincoln School to deny admission of certain Negro children.

*Dennis et al v. Baker et al*

Sought admission of Negro pupils to elementary grades in the Dover district, which in 1954 admitted Negro pupils to high school academic courses. Filed in U.S. District Court in Wilmington in August, 1957. The court has not ruled in the case, perhaps because *Buchanan v. Evans et al* was viewed as a class action.

*Parker v. University of Delaware*

Delaware State Court of Chancery in 1950 reaffirmed principal that segregation per se did not violate the 14th Amendment if equal facilities were provided, but found that such a disparity between the facilities of Delaware State College for Negroes and the University of Delaware warranted an order for admission of Negroes to the university.

**LEGISLATION (1)**

*HB 420*—Established State Human Rights Commission.

# DISTRICT OF COLUMBIA

## Elementary and High Schools

**Constitutes a single desegregated school district**

| | White | Negro | Total |
|---|---|---|---|

|---|---|---|---|
| D.C. Teachers College* | | | |
| Enrollment | 153 | 1,285 | 1,438 |

*District's only strictly public college.

## Status of Segregation-Desegregation

### PUBLIC SCHOOLS

Complete desegregation was inaugurated in 1954, after the U.S. Supreme Court's ruling in *Bolling v. Sharpe*. The District has 24 schools with an all-Negro enrollment of 19,102, and four all-white schools with 1,074 students. This leaves 98,813 Negroes in schools with whites. Enrollment by schools follows:

### TEACHERS

All faculties in the District school system are desegregated. No racial distinctions are made in either hiring or assigning teachers to schools. This includes Teachers College faculty.

### HIGHER EDUCATION

D.C. Teachers College is the only strictly public college in the District. The school resulted from the merger of the district's two uniracial colleges in 1954.

### LITIGATION (2)

*Bolling v. Sharpe*

Filed in 1950 to desegregate Washington, D.C., schools and included in the U.S. Supreme Court's school segregation decision in 1954. The case was settled in 1954 under the Fifth Amendment.

*Sabine v. Sharpe*

Sought an injunction against the school desegregation plan. Federal District Court for the District of Columbia awarded the defendant school board a summary judgment in 1954.

### LEGISLATION

None.

## Status of Segregation-Desegregation

### PUBLIC SCHOOLS

Florida has 16 counties with desegregated schools, and Negroes attend 116 schools with whites. Six counties were under court orders to desegregate at the start of the 1963 term, four of them having begun some desegregation in 1962. All counties with some desegregation, with one exception, assigned additional Negroes to white schools in 1963. Resegregation due to residential factors reduced desegregation in Broward County by almost one half. The first school district to desegregate in the state, Dade County (Miami), acted voluntarily in 1959 in advance of a court order. Estimated enrollments in desegregated districts for 1963–64 are:

| County | Enrollment* White | Negro | Negroes w/Whites | Biracial Schools | Date Deseg. |
|---|---|---|---|---|---|
| Broward | 69,574 | 10,916 | 50 | 6 | 1961-V |
| Charlotte | 1,208 | 176 | 6 | 1 | 1963-V |
| Dade | 163,720 | 38,220 | 3,012 | 41 | 1959-V |
| Duval | 90,225 | 19,814 | 12 | 5 | 1963-C |
| Escambia | 39,139 | 7,049 | 50 | 11 | 1962-C |
| Hillsborough | 82,323 | 12,904 | 94 | 7 | 1961-V |
| Leon | 12,198 | 2,284 | 4 | 2 | 1963-C |
| Monroe | 8,439 | 1,030 | 100 | 5 | 1962-V |

| Sarasota | 7,225 | 985 | 39 | 2 | 1962-V |
| Volusia | 26,343 | 4,172 | 33 | 2 | 1961-V |
| TOTALS | 669,375 | 130,667 | 3,650 | 116 | |

*Estimated

### TEACHERS

Two counties, Dade and Sarasota have desegregated teaching staffs—Sarasota at one school and Dade at "several." Dade has formally notified all teaching and administrative staff that they will be assigned without regard to race. Desegregation orders by a federal court for Volusia and Duval counties included instructions to begin teacher desegregation.

### HIGHER EDUCATION

The first Negro to attend the University of Florida, George H. Starke, enrolled in the Law School in September, 1958, by a court order in *Hawkins v. Board of Control*. The university enrolled its first Negro undergraduates for 1962–63. Negroes have been attending summer classes at the University of Florida and Florida State University. The University of South Florida has had some Negro students since it was opened in 1960. The 29 junior colleges are operated under the county school boards and most have separate campuses for white and Negro students. Dade Junior College is completely desegregated. Three others have some Negro students. The 1963–64 college enrollments are:

| | Enrollment White | Negro | Date Deseg. |
|---|---|---|---|
| **Predominantly White Senior Colleges** | | | |
| Fla. State Univ. | 11,102 | 5 | 1962-V |
| Univ. of Fla. | 14,624 | 2 | 1958-C |
| Univ. of S. Fla. | 4,584 | 6 | 1960-V |
| TOTALS | 30,310 | 13 | |
| **Predominantly Negro Senior Colleges** | | | |
| Florida A&M Univ.* | 0 | 2,884 | 1963-V |
| 29 Junior Colleges | 38,721 | 7,110 | |
| STATE TOTALS | 69,031 | 10,007 | |

*Desegregated in policy although no whites have attended.

Individual enrollment figures for the junior colleges this year were unavailable and the following figures are for 1962–63:

| Junior Colleges | White | Negro | |

**Negroes reported attending in 1963–64.

### FACULTIES

Dade County Junior College has about 10 Negro faculty members and Gibbs County Junior College in Pinellas County, which is all-Negro, has had some white faculty members.

### SPECIAL SCHOOLS

Two state industrial schools for boys and two for girls are segregated. The two schools for boys have duplicated facilities separated by a street. The girls institutions have two duplicated facilities in the same towns. The Florida School for Deaf and Blind at St. Augustine has no duplicated facilities but keeps the races separate. The segregation is contested in *Singleton et al v. Board of Commissioners of Public Welfare et al.*

### ETHNIC GROUPS

All Indians go to regular white schools except those attending two federally operated schools on federal reservations at Dania and Brighton.

### LITIGATION (24)

*Anderson et al v. Board of Public Instruction of Polk County*

Filed in U.S District Court in August, 1963, for complete desegregation of Polk County schools. Pending.

*Augustus et al v. Board of Public Instruction*

U.S. District Judge Harrold Carswell on March 17, 1961, ordered Escambia County to produce a desegregation plan for September, 1961. With court approval, the school board began the desegregation in Pensacola and county schools in September, 1962. On July 24, 1962, the U.S. Fifth Circuit Court of Appeals ordered elimination of dual districts for grades one and two in September, 1963, and for a grade a year thereafter. The court ordered the District Court to consider the request for teacher desegregation. In December, 1962, Judge Carswell ordered a speedup of Escambia desegregation, beginning in September, 1963.

*Braxton et al v. Board of Public Instruction of Duval County*

Class suit filed in 1960 in U.S. District Court seeking desegregation at all school levels. The court rejected a petition by a group of whites who wanted to intervene as defendants. On Aug. 12, 1962, U.S. District Judge Bryan Simpson ordered the county to submit a complete desegregation plan, including teachers. The county board has proposed to begin with the first grade in September, 1963, but requested more time to plan teacher desegregation. On May 8, 1963, the court approved a grade-a-year plan, which began in September.

*Ellis v. Kipp*

Filed in U.S. District Court on April 6, 1962, for complete school desegregation of Orange County schools. Preliminary arguments and motions have been heard. County desegregated voluntarily in September, 1962.

*Florida v. Special School Tax District No. 1 of Dade County*

Florida Supreme Court validated school bonds in 1955 case with racial aspect.

*Gibson et al v. Board of Public Instruction of Dade County*

U.S. Fifth Circuit Court of Appeals in 1959 ruled pupil assignment was not good faith compliance, ordered Dade County to proceed with desegregation. County school board already had ordered Negroes admitted to one school and since has assigned Negroes to others. U.S. District Court refused to reopen case on appeal of Negro group in 1962. U.S. Fifth Circuit Court of Appeals on Dec. 11, 1962, denied the Negro petition for a writ of mandamus.

*Gibson et al v. Florida Legislative Investigating Committee*

Florida Supreme Court upheld committee power to subpoena NAACP membership lists in 1960. Rev. Theodore Gibson sentenced to jail for contempt for failure to comply with order. U.S. Supreme Court vacated the sentence in June, 1962.

*Hall et al v. Board of Public Instruction of Broward County.*

Suit filed in August, 1961, in U.S. District Court to desegregate school system. School board voted to assign Negro children to white schools.

*Hammond v. University of Tampa*

Two Negroes filed suit in U.S. District Court in March, 1963, requesting a desegregation on the basis that the private school received tax funds.

*Hawkins v. Board of Control*

Five Negroes sought admission to the University of Florida in a suit filed in 1949 in a state court. The U.S. Supreme Court ruled in 1956 that Hawkins should be admitted forthwith but the Florida Supreme Court refused to accept the mandate. In 1957, by a consent decree, the Board of Control agreed to accept all qualified students regardless of race while plaintiff Virgil O. Hawkins agreed not to contest further the board's finding that he was ineligible because of a low score on admission tests. Negro students have been admitted to the University of Florida, the first in 1958.

*Hendrix v. Florida State Cabinet*

William Hendrix, long-time Ku Klux Klan leader, filed suit in 1960 in Leon Circuit Court to compel the governor and members of his cabinet to hold a statewide referendum on maintaining segregated schools. The court granted a motion to dismiss on grounds that such a referendum, even if held, would be of no force or effect.

*Holland et al v. Board of Public Instruction of Palm Beach County*

Filed in 1955 to compel acceptance of one Negro boy in a white school. U.S. Fifth Circuit Court of Appeals ordered the board to proceed with desegregation. Compliance delayed by Holland's appeals to local and state school boards and a dispute over school district lines. Under a consent decree in September, 1961, Palm Beach desegregated the high schools. In May, 1962, U.S. District Judge Emmett C. Choate ordered all students admitted to high school nearest their home, without regard to race or academic achievement. Children of Negro lawyer, W. M. Holland, on June 16, 1963, were ordered admitted to schools with whites.

*Manatee County Board of Public Instruction v. State*

Florida Supreme Court validated school bonds in 1957 case with racial aspect.

*Mannings et al v. Board of Public Instruction of Hillsborough County*

Filed in U.S. District Court in 1959 for complete desegregation of county schools. The county desegregated its first school in the fall, 1961. On Aug. 21, 1962, U.S. District Judge Bryan Simpson ordered the county to submit a complete desegregation plan. The county proposed to desegregate the first grade in 1963, and grade a year thereafter. The District Court approved the plan May 25, 1963.

*Mays et al v. Board of Public Instruction of Sarasota County*

Filed in U.S. District Court on Oct. 12, 1961, on behalf of seven Negroes seeking to desegregate schools. Two schools desegregated voluntarily in 1962. District Court in 1963 ordered grade-a-year to begin in the junior high grades, since elementary grades already had desegregated. Issue of teacher desegregation held in abeyance.

*Milledge et al v. State Board of Control*

Filed in 1963 in Leon County Circuit Court to enjoin state from financial support of graduate law school at Florida A&M University as an excessive burden on taxpayers to support segregated school. Petition denied in August, 1963, on grounds that segregation was not proven. Appeals pending.

*Scott et al v. Board of Public Instruction of St. Johns County*

Filed in U.S. District Court in April 6, 1962, to desegregate schools. District voluntarily began desegregation in September, 1963, while suit in progress.

*Sears et al v. Board of Public Instruction of Lee County*

Filed in Lee County Circuit Court in October, 1962, opposing construction of new Negro school, contending white schools have facilities for Negroes. Petition denied.

*Singleton et al v. Board of Commissioners of State Institutions et al*

Filed in U.S District Court on Nov. 12, 1963, by the NAACP on behalf of four juveniles arrested in St. Augustine sit-in demonstrations, the suit asked desegregation of Florida's training schools for juvenile delinquents.

*State v. Lake County Board of Public Instruction*

State Circuit Judge T. G. Futch refused to validate $5.6 million county bond issue for seven Negro schools, holding desegregation was ignored. Florida Supreme Court reversed the ruling, which State School Supt. Bailey had said would jeopardize entire state school building program.

*Steele et al v. Board of Public Instruction of Leon County*

Filed in U.S. District Court on March 2, 1962, for complete desegregation of students and teachers. U.S. District Judge denied motion to strike that portion of the suit relating to teachers, but said no testimony would be heard on this point when the trial began. District Judge G. Harrold Carswell in March, 1963, ordered desegregation, beginning in September, 1963, and on April 22, 1963, he approved a grade-a-year pupil-assignment plan. Schools in the county, seat of the state capital, began desegregation as scheduled.

*Tillman et al v. Board of Public Instruction of Volusia County*

Filed in U.S. District Court in 1960 for complete desegregation. County voluntarily desegregated in 1961. U.S. District Judge Bryan Simpson on Aug. 21, 1962, ordered plan of complete desegregation, including teachers. County proposed desegregating first grade in 1963, with one grade a year thereafter, but asked more time on teacher desegregation. Judge Simpson approved the school desegregation plan on May 8, 1963.

*U.S. v. Bay County Board of Public Instruction*

Filed in U.S. District Court in November, 1963, by U.S. Department of Justice to force desegregation of public schools on grounds that federal authorities had received written assurances there would be no discrimination against children of federal employes covered by federal grants-in-aid.

*Weaver et al v. Board of Public Instruction of Brevard County*

Filed in U.S. District Court on Oct. 13, 1961, on behalf of 59 Negroes to desegregate schools. Motions and arguments heard; pending.

**LEGISLATION (25)**

**1955**

*Ch. 29746*—Granted county school boards authority for pupil assignment and authorized counsel in litigation.

**1956**

**(Extra Session)**

*SCR17XX*—Evoked doctrine of interposition.

*Ch. 31380*—Established pupil assignment criteria. Amended by *Ch. 428* of 1959 to include wording taken from similar Alabama law, approved "on its face" by federal courts.

*Ch. 31389*—Conferred additional powers on governor to quell public disturbances.

*Ch. 31390*—Conferred additional powers on governor to prevent and subdue violence.

*Ch. 31391*—Provided for selection and dismissal of teachers without regard to prior contractual agreements, on basis of educational, sociological and psychological criteria.

*Ch. 31498*—Created committee to investigate organizations advocating violence or violation of state laws.

**1957**

*HCR 61*—Commended special Fabisinski committee studying ways to preserve public schools.

*HCR 174*—Invoked doctrine of interposition.

*SCR 116*—Proposed constitutional amendment to vest U.S. Senate with appellate jurisdiction in U.S. Supreme Court decisions in cases involving jurisdiction of states.

*S. Mem. 19X*—Urged Congress to censure President's use of troops at Little Rock, Ark.

*S. Mem. 530*—Proposed amending 10th Amendment to state that maintenance of "harmonious race relations" be included in state's police powers.

*Ch. 125*—Extended committee created by *Ch. 31498* of 1956.

*Ch. 1975*—Authorized closing schools when troops used.

**1959**

*Ch. 113*—Regulated establishment of private schools.

*Ch. 138*—Provided separation of students by sex.

*Ch. 428*—Amended pupil assignment law *(Ch. 31380* of Negro children as part of state plan for public education.

*Ch. 230*—Provided automatic closing and suspension of schools in event national guard or federal troops used on state property.

*Ch. 247*—Created State Board of Private Education.

*Ch. 412*—Amended compulsory attendance law to prevent forced attendance at biracial schools.

*Ch. 428*—Amended pupil assignment law *(Ch. 31380* of 1956) to incorporate wording taken from similar Alabama law, approved by federal courts.

*Ch. 623*—Established private school corporation law.

*Ch. 822*—Provided maximum 20 years imprisonment for malicious injury to buildings and structures by gunpowder.

*Ch. 876*—Made it unlawful to wear hoods or conceal face in public.

*Ch. 955*—Included requirement that white and Negro inmates at Florida School for Boys be in "separate buildings, not nearer than one-fourth mile to each other."

# GEORGIA

## Elementary and High Schools

197 Districts: 181 With Negroes and Whites; Four Desegregated

| | White | Negro | Total |
|---|---|---|---|
| Enrollment | 689,323 | 337,534 | 1,026,857 |
| Teachers | 24,432 | 10,899 | 35,331 |

## Colleges and Universities

Eight Desegregated

| Enrollment | 40,804 | 3,488 | 44,292 |

## Status of Segregation-Desegregation

### PUBLIC SCHOOLS

Georgia has four desegrated school districts, with 95,731 whites and 77,599 Negroes enrolled. Atlanta, the first to desegregate, admitted Negroes to the 11th and 12th grades in four formerly all-white high schools on Aug. 30, 1961, under a U.S. District Court order in *Calhoun v. Latimer*. Dougherty County (Albany) is under order in *Gaines et al v. Dougherty County Board of Education et al* to desegregate and the U.S. District Court has approved a grade-a-year plan to begin with the first grade in September, 1964, but the case is on appeal. Muscogee County (Columbus) Board of Education has a committee to formulate plans to desegregate the public schools, but no date has been announced. The desegregated districts are:

| District | Enrollment White | Enrollment Negro | Negroes w/Whites | Brcl. Schls. | Grades | Date Deseg. |
|---|---|---|---|---|---|---|
| Atlanta | 58,041* | 55,764* | 145 | 12 | 9-12 | 1961-C |
| Chatham Co. | 24,013 | 15,336 | 21 | 2 | High | 1963-C |
| Clarke Co | 5,927 | 3,194 | 5 | 3 | 3,7,11 | 1963-V |
| Glynn Co. | 7,750 | 3,305 | 6 | 1 | High | 1963-V |
| TOTALS | 95,731 | 77,599 | 177 | 18 | | |

### TEACHERS

Segregation is maintained.

### HIGHER EDUCATION

Georgia has eight desegregated, eight all-white and three all-Negro public colleges and universities. The University of Georgia was the first to desegregate. In January, 1961, the school admitted two Negroes under court order in *Holmes v. Danner*, briefly suspended them because of disorders on the campus, then readmitted them under court order. In 1959, a U.S. District Court had prohibited consideration on the basis of race for admission to Georgia State College, although the plaintiffs in the case (*Hunt v. Arnold*) were not ordered admitted. Georgia State voluntarily accepted its first Negro student in the summer, 1962. Although West Georgia College desegregated voluntarily in the summer, 1963, no Negroes enrolled for the following fall quarter. The college enrollments are:

| | White | Negro | Date Deseg. |
|---|---|---|---|
| **Predominantly White** | | | |
| Abraham Baldwin Agri. | 835 | 0 | |
| Armstrong | 783 | 1 | 1963-V |
| Augusta | 1,204 | 0 | |
| Columbus | 786 | 1 | 1963-V |
| Georgia Southern | 2,381 | 0 | |
| Georgia Southwestern | 593 | 0 | |
| Georgia State | 4,503 | 6 | 1962-V |
| Georgia Inst. of Tech. | 6,299 | 10 | 1961-V |
| Southern Tech. Inst. | 992 | 0 | |
| Evening School | 1,371 | 0 | |
| Medical College of Ga. | 371 | 0 | |
| Allied Medical Sciences | 61 | 0 | |
| School of Nursing | 103 | 0 | |
| Middle Georgia | 771 | 0 | |
| North Georgia | 960 | 0 | |

| TOTALS | 1 | 3,487 | |
| STATE TOTALS | 40,770 | 3,522 | |

### FACULTIES

In higher education, all white college and university units have white teachers and Negro units have Negro teachers.

### SPECIAL SCHOOLS

Complete segregation is maintained in the state's special schools for blind, deaf, mute, mentally retarded and delinquent children. Four Negroes were admitted to the former all-white Dekalb Area Technical School near Atlanta in October, 1963. One Negro was accepted at the Bibb County Vocational School in Macon in June, 1963. The Coosa Valley Vocational School near Rome has announced a desegregation policy for September, 1964.

### LITIGATION (16)

*Aiken v. O'Callahan*

Filed on Oct. 17, 1961, seeking a tuition grant for a private school student. Fulton Superior Court ordered the grant paid, Dec. 22, 1961.

*Bivins et al. v. Board of Public Education of Bibb County et al*

Filed Aug. 14, 1963, in Middle Georgia District U.S. Court by 44 Negro children and parents seeking desegregation of Bibb County schools. Board of Education has asked court for permission to present desegregation plan.

*Board of Public Education for Bibb County v. Evans et al*

Board sought in 1963 to obtain from Bibb County Superior Court ruling on whether board charter would be valid if schools were desegregated. Court ruled that charter section requiring separate schools was unconstitutional, but other sections of charter remained valid.

*Calhoun v. Latimer*

Filed Jan. 11, 1958, in U.S. District Court. U.S. District Court ordered desegregation of Atlanta schools May 1, 1961. Court order declaring segregation unconstitutional in Atlanta school system entered July 9, 1958. Final approval of defendants' proposed plan of desegregation given Jan. 20, 1960, with effective date of plan set for May 1, 1961. Desegregation began Sept., 1961. On a separate issue, a white girl, Sandra Melkild, applied for a transfer from a desegregated to a segregated school, and the request was refused by the Atlanta school board but granted on appeal to the State Board of Education. The U.S. District Court on Dec. 12, 1961, enjoined the state board from granting the transfer and the U.S. Fifth Circuit Court of Appeals affirmed on Nov. 16, 1962. On the main issue of Atlanta's desegregation, a group of Negro parents on April 30, 1962, asked the court to stop use of the pupil placement plan and to order complete desegregation. On Nov. 15, 1962, the District Court disapproved the two requests. On Oct. 2, 1963, the U.S. Fifth Circuit Court of Appeals upheld the plan and the pace at which it was proceeding.

*Emory University et al v. Nash et al*

Filed in DeKalb County Superior Court in 1962. The court held that Emory would lose its tax exemption if it admitted Negroes. The Georgia Supreme Court decided on Sept. 14, 1962, that Emory could desegregate without losing its tax-exempt status.

*Gaines et al v. Dougherty County Board of Education et al*

Filed in U.S. District Court on April 5, 1963, by 19 Negro children seeking desegregation of Dougherty County (Albany) schools. U.S. District Judge J. Robert Elliott on July 13, 1963, ordered a desegregation plan, and on August 28, 1963 approved a plan for desegregation by September, 1964. Appealed to U.S. Fifth Circuit Court of Appeals.

*Gibson et al v. Glynn County Board of Education et al*

Filed by seven white students and five parents on August 27, 1963, asking temporary injunction against voluntary desegregation of Glynn County (Brunswick) schools. U.S. District Judge Frank Scarlett granted the injunction, but the U.S. Fifth Circuit Court of Appeals on September 22, 1963, reversed his action and the district desegregated.

*Harris et al v. Glynn County Board of Education et al*

Filed by six Negro students on Aug. 31, 1963, asking U.S. District Court intervention in *Gibson* injunction suit (above). Court ordered board to submit desegregation plan. On September 12, 1963, U.S. Fifth Circuit Court of Appeals reversed district court's injunction and district desegregated.

*Holmes v. Danner*

Initial complaint filed August, 1960. U.S. District Court ordered desegregation of University of Georgia Jan. 6, 1961.

*Hunt v. Arnold*

Filed in U.S. District Court on Sept. 28, 1956. U.S. District Court issued an order against further discrimination on basis of race for admission at Georgia State College of Business Administration in 1959, although plaintiffs in this particular case were not ordered admitted.

*Johnson et al v. Georgia State Board for Vocational Education et al*

Filed on October 2, 1963, by two Negroes seeking desegregation of Coosa Valley Vocational School near Rome. On same day, school director announced desegregation would be in effect at beginning of next enrollment term (September, 1964).

*NAACP v. Pye*

Sought to appeal contempt citation against organization. Pending.

*Peters v. Boggs*

Filed in state court in the summer, 1961, seeking to prohibit the use of public funds by four desegregated Atlanta high schools. State Supreme Court threw out the case on Nov. 21, 1961.

*Stell v. McCormac*

Filed Jan. 18, 1962, in U.S. District Court to desegregate the schools in Chatham County (Savannah). Parents of 36 Negro children sought to enjoin the board from operating a compulsory dual school system, assigning teachers and pupils by race, and approving budgets designed to perpetuate separate schools. On March 29, 1963, U.S. District Judge Frank M. Scarlett permitted intervention in the suit by a group of white parents who questioned the U.S. Supreme Court's 1954 decision and contended that desegregation would cause psychological damage to white students forced to attend schools with Negroes. On May 13, 1963, Judge Scarlett refused the desegregation injunction. The U.S. Fifth Circuit Court of Appeal on May 24, 1963, rebuked Scarlett and ordered a desegregation plan by July to begin in September. The District Court approved a grade-a-year plan starting with the 12th grade.

*Ward v. University System Board of Regents*

Filed June 23, 1952, in U.S. District Court. Admission to University of Georgia denied by U.S. District Court in 1957 on grounds that plaintiff did not pursue all administrative remedies.

*Williams v. NAACP*

Fulton Superior Court in 1957 cited NAACP for contempt for denying access to records. Georgia Court of Appeals in 1957 ruled against NAACP bill of exceptions.

**LEGISLATION (44)**

**1953**

*Act 156*—Proposed state amendment authorizing tuition grants. Adopted in 1954 general election.

**1955**

*Act 82*—Forbade state or local funds for schools expecting to desegregate. Repealed in 1961.

*HR 23-54A*—Urged constitutional amendment giving states sole power over schools.

*HR 31-84A*—Urged constitutional amendment denying federal authority over schools.

**1956**

*SR 32*—Defined duties and authority of Georgia Education Commission. Georgia Education Commission replaced by Georgia Commission on Constitutional Government in 1959.

*HR 37*—Urged other states to oppose federal aid.

*HR 185*—Interposition.

*Act 11*—Provided tuition grants and allowed closing of schools. Repealed in 1961.

*Act 12*—Forbade trespassing on closed school property.

*Act 13*—Permitted lease of school property for private schools.

*Act 14*—Authorized School Building Authority to sublease facilities for private schools.

*Act 15*—Extended retirement benefits to teachers in non-public schools.

*Act 16*—Required fire inspection of private schools.

*Act 197*—Forfeited retirement benefits of officers failing to enforce school segregation. Not specifically repealed by 1961 legislature but considered made invalid.

*Act 383*—Defined duties of state law officers regarding school segregation laws. Not specifically repealed by 1961 legislature but considered made invalid.

*Act 454*—Included in General Appropriations Act a provision withholding funds from desegregated schools.

**1957**

*HR 8-7A*—Permitted Georgia Education Commission to hold hearings, subpoena witnesses, etc. Commission deactivated 1959.

*HR 11-7D*—Authorized Georgia Education Commission to air pro-segregation views. Commission deactivated 1959.

*HR 174-554D*—Asked impeachment of six U.S. justices.

*HR 179*—Commended Atlanta Teachers Association for rejecting desegregation demand.

*Act 7*—Protected retirement benefits of teachers transferring to private schools. Not specifically repealed by 1961 legislature but considered made invalid.

*Act 60*—Gave governor extraordinary powers to suppress violence.

*Act 139*—Authorized governor to suspend compulsory school attendance laws. Modified in 1958 by *Act 289*.

*Act 514*—Redefined barratry law. Amended by *Act 910*, 1960.

**1958**

*HR 305*—Censured President's use of troops at Little Rock.

*Act 289*—Empowered governor to suspend compulsory school attendance law. Amended *Act 139* of 1957.

**1959**

*Act 2*—Created Governor's Commission on Constitutional Government.

*Act 3*—Allowed state income tax credits for private schools under certain conditions.

*Act 7*—Permitted governor to close single school in a system ordered to desegregate. Repealed in 1961.

*Act 9*—Allowed special legal counsel for state expenses in school cases.

*Act 10*—Set age limit of 21 years for initial enrollment for undergraduate studies at state colleges and universities, and 25 years for graduate work. Legislature repealed in 1961 but Gov. Ernest Vandiver vetoed the repeal. In 1962, the legislature passed *Act 847* to repeal the law and Gov. Vandiver signed the bill.

*Act 212*—Banned ad valorem taxes for desegregated schools. Repealed in 1961.

*Act 382*—Assured pay of teachers if public schools closed.

**1960**

*HR 360*—Created school study (Sibley) commission to test public sentiment on desegregation and report back to legislature.

*Act 504*—Prohibited levying taxes for desegregated schools and authorized taxes for payment of debts contracted prior to change. Repealed in 1961.

*Act 910*—Stiffened penalties for barratry (*Act 514 of 1957*).

**1961**

*SR 51*—Established an Educational Rights Commission.

*HR 69-174*—Proposed a constitutional amendment to preserve freedom from compulsory association at all levels of public education. Adopted in November, 1962, general election.

*Act 13*—Set up local option procedures for closing and reopening public schools in desegregation crises.

*Act 14*—Provided grants of state and local funds for children from 6 to 19 years of age who choose private rather than public schools. Amended by *Act 870*, 1962, and *Act 418*, 1963.

*Act 15*—Revised procedures on appeals from local boards on pupil placement.

**1962**

*Act 847*—Repealed *Act 10* of 1959.

*Act 870*—Amended *Act 14* of 1961, specifically describing the procedure for requesting and receiving grants of state and local tuition grants. Provided that the State Board of Education prescribe regulations for implementation of the act.

**1963**

*Act 418*—Amended tuition grant law (*Act 14, 1961*) to place burden on local officials for determining need of grants and provided that part of grant must be from local funds.

## Status of Segregation-Desegregation

### PUBLIC SCHOOLS

Desegregation began June 6, 1955, when a Negro girl entered a summer school in Fayette County. On July 18, 1955, six Negro children entered Wayne County's Griffin School. By October, 1955, 30 other districts had voluntarily desegregated. The voluntary and peaceful desegregation of all grades in the Louisville public schools in September, 1956, won national and international recognition. Desegregation in the state has continued to the present, spurred in some cases by lawsuits and in the past two years by pressure and persuasion from the State Department of Education. Data available in the fall of 1963 indicated that of 165 districts with Negroes and white pupils enrolled, 163 were desegregated in practice or policy. Another biracial district, Shelby County, has announced that a free-choice policy of desegregation will take effect in the fall of 1964. This left Graves County as apparently the only biracial district lacking any known policy of desegregation. Several all-white districts have experienced desegregation in the past when enrollment was biracial. Of the 163 desegregated districts, 10 had policies only and 153 had actual biracial classes at 620 schools. About 29,855 Negroes attend biracial schools with about 288,360 whites; this indicated that about 54.4 percent of Negro pupils were in biracial schools. Total enrollment in the desegregated districts is estimated at 492,701 whites and 54,874 Negroes. Enrollment figures in the listing below are from the 1963-64 state survey:

| County Districts (120) | Biracial School Enrollment White | Negro | Brcl. Schls. | Date Deseg. |
|---|---|---|---|---|
| Adair | 1,871 | 140 | 5 | 1956-C |

*Desegregated in policy.
**Desegregation scheduled for 1964-65.
†No school-age population.

## TEACHERS

In 1954-5, there were 1,279 teachers in the 312 Negro-only schools, putting the proportion of Negro teachers at about 6.4 percent of a total professional staff of about 20,000. By 1963-64 the total staff had grown to 26,523. The number of Negro teachers increased less proportionately, to 1,502 or 5.7 percent of the total. Of the Negro teachers, 507 were in desegregated schools and about 995 in some 129 remaining Negro-only schools. The State Commission on Human Rights reported in 1962 that biracial faculties were increasing and were said to be working well. However, the commission concluded that the employment outlook for Negro teachers was not bright because many superintendents, even those expressing satisfaction with Negroes serving on biracial faculties, did not plan to hire more Negroes. In 1957, the Kentucky Teachers Association, a Negro group, merged with the Kentucky Education Association.

## HIGHER EDUCATION

All eight tax-supported colleges and universities are desegregated in practice. Only the University of Kentucky and Paducah Junior College desegregated under court order. The university first admitted Negroes to the graduate schools in June, 1949. The school's undergraduate divisions were opened to Negroes voluntarily in 1954. All the university community colleges have biracial enrollments. In April and May, 1963, the university Board of Athletics made Negroes eligible to play on intercollegiate teams. (The school is a Southeastern Conference member.) Paducah Junior College accepted Negroes under court order in June, 1953. The following table includes 1963-64 enrollments. Racial breakdowns were estimated by school officials except for Murray State, where the estimate of Negroes was based on a 1960-61 figure of 75 given by school officials.

| | Enrollment | | Date |
|---|---|---|---|
| Predominantly White | White | Negro | Deseg. |
| Eastern Ky. State | 4,675 | 40 | 1956-V |
| Morehead State | 3,209 | 29 | 1956-V |
| Murray State | 3,829 | 100 | 1955-V |

| TOTALS | 35,973 | 729 | |
| Predominantly Negro | | | |
| Ky. State | 110* | 814 | 1954-V |
| STATE TOTALS | 36,083 | 1,543 | |

*Many, but not all, white students at Kentucky State attend the evening school operated jointly by the school and the University of Kentucky.

## FACULTIES

Among tax-supported institutions, only the University of Louisville and the predominantly Negro Kentucky State College report having both white and Negro faculty members. The university reported three Negroes on a total faculty of 935; Kentucky State reported four whites on a total faculty of 55. Morehead State College said it has tried without success to find a qualified Negro woman to work in the library.

## SPECIAL SCHOOLS

Thirteen state-supported vocational schools are open to Negroes. On March 6, 1963, the State Board of Business Schools adopted an anti-discrimination regulation aimed at opening all business schools in the state to Negroes. In September, 1961, the state accepted five Negroes at the previously all-white Kentucky Children's Home at Lyndon. In the past, the state had provided care for dependent Negro children in foster homes.

## LITIGATION (19)

*Cunningham v. House*

Filed on July 26, 1962, in U.S. District Court. Court ordered 11 Negro children admitted to a Madison County grade school in 1962 and gave the Board of Education one year to complete grade-school desegregation. (High-school level already was desegregated.)

*Dishman v. Archer*

Filed in U.S. District Court in 1956. Court ordered Scott County schools desegregated.

*Garnett et al v. Oakley*

Filed in U.S. District Court in 1956. Court ordered Union County schools desegregated, rejecting plan of gradual desegregation.

*Gordon et al v. Collins et al*

Filed in U.S. District Court in 1956. Court ordered Webster County schools desegregated.

*Grimes et al v. Smith*

Filed in U.S. District Court in 1957. Court ordered Owen County schools desegregated.

*Grubbs v. Chandler*

Failed to get mandamus to enforce school segregation laws.

*Johnson v. Board of Trustees*

The University of Kentucky was ordered by U.S. District Court on April 27, 1949, to open its graduate schools to Negroes.

*Lawrence v. Bowling Green Board of Education*

Filed in U.S. District Court on Jan. 9, 1963, to desegregate students, staff and teachers. District Judge Max Swinford on April 8, 1963, ordered desegregation of all grade levels in September, 1963, and ordered staff and teacher desegregation.

*Mack v. Frankfort Board of Education*

Filed in U.S. District Court on Sept. 21, 1962, seeking to speedup desegregation. District Judge H. Church Ford ordered board to submit plan for desegregation of elementary schools and of faculty. On July 3, 1963, after rejecting two plans in June, the court approved one calling for immediate desegregation at all levels without transfer options.

*Mason v. Jessamine County Board of Education*

Filed in U.S. District Court on Sept. 19, 1962, seeking desegregation of students and personnel. District Judge H. Church Ford on Jan. 29, 1963, ordered board to submit plan for intial desegregation of all grades and faculty. On July 16, 1963, after having rejected a plan containing an optional transfer provision, the court approved a revised plan, which began in September, 1963.

*Mitchell et al v. Pollock*

Filed in U.S. District Court in 1956. Court ordered desegregation of Hopkins County schools, overruling plan of gradual desegregation.

*Ray v. Matheson*

Filed in U.S. District Court in 1950. Court ordered desegregation of Paducah Junior College.

*Rimbert v. Knott County Board of Education*

Filed in U.S. District Court on Aug. 6, 1963, seeking further desegregation. On Sept. 11, 1963, District Judge Mac Swinford ordered an immediate end to all segregation.

*Senters et al v. Mayfield Board of Education*

Filed in U.S. District Court in September, 1962, by four Negro couples asking desegregation of elementary grades. (The high school already was desegregated.) On Oct. 31, 1962, Judge Roy M. Shelbourne ordered the board to submit a plan for elementary school desegregation. The plan was accepted and the board was permanently enjoined from maintaining segregated schools.

*Walker v. Richmond Board of Education*

Filed in U.S. District Court on May 17, 1962, for elementary and junior-high student desegregation. (High school already was desegregated.) The suit also asked faculty desegregation. District Judge H. Church Ford on June 13, 1963, ordered the board to submit a plan for student and faculty desegregation. One plan was rejected and on July 23, 1963, another plan was given only tentative approval because the plaintiffs said a transfer option, even though avowedly non-racial, might perpetuate segregation.

*White et al v. Singleton et al*

Filed in U.S. District Court in 1960. Court in 1961 ordered all Knox County schools desegregated.

*Wilburn v. Holland*

Filed in U.S. District Court in 1956. Court ordered McCracken County schools desegregated.

*Willis v. Walker*

Filed in U.S. District Court in 1955. Court ordered Adair County schools desegregated.

*Wilson v. Matheson*

Filed in U.S. District Court in 1949. Resulted in declaratory judgment that qualified Negroes had right to attend Paducah Junior College.

## LEGISLATION (2)

**1960**

*KRS 19.010*—Established State Commission on Human Rights to serve as research and study agency.

**1962**

*KRS 82.210-82.250*—Authorized cities to establish local human rights commissions and to forbid by ordinance any discrimination in places of public accommodation.

## EXECUTIVE ACTION

Gov. Bert T. Combs on June 26, 1963, issued an executive order banning racial discrimination by firms and professions licensed by the state. He speculated that the order might be used against school districts practicing racial segregation. No attempt was made to enforce the order pending a court determination of its legality.

## Status of Segregation-Desegregation

### PUBLIC SCHOOLS

Louisiana has two desegregated school districts, Orleans Parish (New Orleans) and East Baton Rouge Parish (Baton Rouge), operating under grade-a-year plans. The two desegregated districts have enrollments totalling 68,700 whites and 79,077 Negroes. Orleans Parish was the first to desegregate, complying on Nov. 14, 1960, with a court order. Of the 64 regular public schools in Orleans Parish, 28 have biracial enrollments totalling 10,901 whites and 1,786 Negroes this year: 26 formerly all-white elementary schools have 10,461 whites and 333 Negroes in grade 1-4; one predominantly white special high school for superior students, 439 whites and 14 Negroes; and one predominantly Negro elementary school, one white and 1,439 Negroes. The 53 East Baton Rouge Parish schools include four desegregated high schools with 5,380 whites and 28 Negro seniors. St. Helena Parish is under federal court order to desegregate "with all deliberate speed." Terrebonne Parish is under order to desegregate all white and Indian schools by Aug. 1, 1964. The desegregated districts are:

| Parish | Enrollment White | Enrollment Negro | Negroes w/Whites | Brel. Schls. | Date Deseg. |
|---|---|---|---|---|---|
| E. Baton Rouge | 31,600 | 21,000 | 28 | 4 | 1963-C |
| Orleans | 37,100 | 58,077 | 1,786* | 28 | 1960-C |
| TOTALS | 68,700 | 79,077 | 1,814 | 32 | |

*Includes 1,439 Negroes in school attended by one white.

### TEACHERS

Teaching staffs remain completely segregated.

### HIGHER EDUCATION

Six of Louisiana's 10 predominantly white colleges and universities have desegregated under court order, and include 31,365 whites and 848 Negroes in their enrollments. The state's three Negro institutions remain segregated. Louisiana State University at Baton Rouge began admitting Negro graduate students in 1950 by a court order in *Wilson v. LSU Board of Supervisors*, but enrolls no Negro undergraduates on the main campus. The colleges and universities are:

| Predominantly White | Enrollment White | Enrollment Negro | Date Deseg. |
|---|---|---|---|
| Louisiana State University | | | |
| Main Campus | 13,098 | 60* | 1950-C |
| Medical & Nursing Schools | 606 | 0 | |
| LSU, Alexandria | 451 | 0 | |
| LSU, New Orleans | 4,149 | 339 | 1958-C |
| La. Polytechnic Institute | 4,379 | 0 | |
| McNeese State | 2,664 | 163 | 1954-C |
| Nicholls State | 1,564 | 21 | 1963-C |
| Northeast La. State | 3,639 | 0 | |
| Northwestern State | 3,709 | 0 | |
| Southeastern La. | 3,500 | 29 | 1954-C |
| Univ. of Southwestern La. | 5,784 | 236 | 1954-C |
| TOTALS | 43,543 | 848 | |
| **Predominantly Negro** | | | |
| Grambling | 0 | 3,225 | |
| Southern Univ., Baton Rouge | 0 | 5,224 | |
| Southern Univ., New Orleans | 0 | 1,079 | |
| TOTALS | 0 | 9,528 | |
| STATE TOTALS | 43,543 | 10,376 | |

*Estimated.

### FACULTIES

Teaching staffs remain segregated.

### SPECIAL SCHOOLS

Louisiana operates 23 trade and vocational schools for whites and four for Negroes. Another trade school, largely supported by the state, is operated by an independent board. Federal district courts have ordered desegregation of six of the all-white schools, and in response to court orders the State Board of Education on Sept. 18, 1962, directed that applications be processed without regard to race. Several Negroes have attended certain classes at the Sowela Technical Institute in Lake Charles.

### ETHNIC GROUPS

In Terrebonne Parish, certain schools (four elementary, one high school) have been designated for children of Indian descent. U.S. District Court, on Aug. 28, 1963, enjoined the school board from denying the Indian children admission to all white schools and ordered enrollment of Indian children immediately in the 11th and 12th grades. (See *Naguin v. Terrebonne Parish School Board.*)

### LITIGATION (30)

*Allen et al v. State Board of Education*

Shreveport trade school, state-supported, ordered to desegregate "with all deliberate speed" by U.S. District Court in 1960. U.S. Fifth Circuit Court of Appeals upheld decision in February, 1961. U.S. Supreme Court declined to review. No date set for desegregation.

*Angel et al v. State Board of Education*

Five state trade schools ordered to desegregate "with all deliberate speed" by U.S. District Court in 1960. U.S. Fifth Circuit Court of Appeals upheld decision in February, 1961. U.S. Supreme Court declined to review. Schools affected are at Crowley, Natchitoches, Opelousas, Greenburg and Lake Charles. Ten state education officials were relieved of threatened contempt citations Sept. 19, 1962, after the State Board of Education announced a policy of non-discrimination in processing applications. In June, 1963, U.S. Department of Justice again asked that Rex Smelser, director of Sowela Technical Institute at Lake Charles, be cited for contempt. U.S. District Court jury on Nov. 22, 1963, acquitted Smelser of contempt charges.

*Baker v. Nicholls State College*

Filed Sept. 9, 1963, on behalf of eight Negro plaintiffs. U.S. District Judge Robert Ainsworth Jr. on Sept. 17, enjoined college from discriminating and ordered plaintiffs admitted. School complied but filed notice of appeal.

*Bailey v. State Board of Education**

Louisiana law requiring certificates of good moral character for admission to University of Southwestern Louisiana (formerly SLI) declared invalid by U.S. District Court in 1956.

*Barthe v. City of New Orleans*

Three-judge U.S. District Court in July, 1963, ordered desegregation of recreational facilities operated by New Orleans Recreation Department, some of which are used in school athletic programs. Appeal taken to U.S. Fifth Circuit Court of Appeals to determine jurisdiction of the constitutional court and to the U.S. Supreme Court on the facts of the case.

*Bush v. Orleans Parish School Board*
*U.S. v. Louisiana*
*Williams v. Davis*

Desegregation of New Orleans public schools begun in November, 1960, after three-judge U.S. District Court declared as unconstitutional *Act* 555 of 1954; *319* of 1956; *256* of 1958; and *333, 495, 496,* and *542* of 1960, and after three-judge U.S. District Court restrained or enjoined the state from use of all segregation acts of the 1960 first extraordinary session. On April 3, 1962, U.S. District Judge J. Skelly Wright ordered all elementary grades desegregated and stopped use of the pupil placement program as long as a dual school system existed. Judge Frank Ellis, Wright's successor, on May 23, 1962, modified the order and directed a full grade-a-year desegregation program to begin in September, 1962, but Ellis affirmed the ban on pupil placement provisions. On Aug. 6, 1962, the U.S. Fifth Circuit Court of Appeals ordered a compromise between the two District Court rulings: Desegregation of the first three grades in 1962; abolition of dual districts in grades one and two in 1963, and through the fifth grade in 1964; application of the pupil placement law only without regard to race. On April 26, 1963, District Judge Ellis ordered the school board to register first and second grade pupils for 1963-64 on basis of single, non-racial zones. On May 17, 1963, the court approved the re-zoning plan offered by the board and ordered desegregation of a high school for superior students.

*Combre et al v. McNeese State College*

McNeese ordered to admit Negroes in September, 1954, by U.S. District Court.

*Constantine et al v. Southwestern Louisiana Institute*

SLI, now the University of Southwestern Louisiana, was ordered to admit Negroes in September, 1954, by U.S. District Court.

*Davis v. East Baton Rouge Parish School Board*

U.S. District Court in 1960 ordered desegregation "with all deliberate speed." U.S. Fifth Circuit Court of Appeals affirmed decision in February, 1961, and U.S. Supreme Court refused to review. On March 1, 1963, District Court ordered school board to present a plan of desegregation by July 5. On July 17, 1963, the court approved the grade-a-year desegregation plan offered by the parish school board, and it began in September, 1963.

*Dorsey v. Louisiana State Athletic Commission*

U.S. Supreme Court, in 1959 upheld U.S. District Court decision that declared invalid the sports segregation law (*Act 579* of 1956) prohibiting whites and Negroes from competing with one another in athletic contests.

*Guillory et al v. Administrators, Tulane Education Fund*

Filed in U.S. District Court by two Negro women seeking to enter graduate division. Judge J. Skelly Wright on March 28, 1962, in a summary judgment, ordered Tulane desegregated on the grounds that the private institution received state tax benefits. Wright's successor, Judge Frank Ellis, on May 7, 1962, set aside the order and scheduled the case for trial. The U.S. Fifth Circuit Court of Appeals affirmed Ellis' ruling on July 21, 1962. On Dec. 5, 1963, Judge Ellis ruled that Tulane is a private institution without sufficient governmental involvement to bring it under the scope of the 14th Amendment. But, he said, the restrictive clauses in the university's endowments were unenforceable in law and the institution could desegregate voluntarily. An appeal by the plaintiffs was dismissed and Tulane voluntarily accepted them in February, 1963.

*Hall v. St. Helena Parish School Board*

U.S. District Court in 1960 ordered schools to desegregate "with all deliberate speed" and the U.S. Fifth Circuit Court of Appeals upheld ruling in February, 1961. The U.S. Supreme Court declined to review. No date for desegregation has been set. On Aug. 30, 1961, three-judge federal court invalidated *Act 2* of the second extraordinary legislative session, 1961, which permitted local option school closings. U.S. Supreme Court declined to review on Feb. 19, 1962.

*Harris v. St. John the Baptist Parish School Board*

Filed March 1, 1963, in U.S. District Court, on behalf of 277 Negro plaintiffs.

*Henley v. LSU Board of Supervisors*

U.S. District Court ordered Louisiana State University in New Orleans, a branch of LSU of Baton Rouge, to admit Negroes in September, 1958, when it opened.

*Klein v. Louisiana Financial Assistance Commission*

Filed in March, 1963, in U.S. District Court, attacking the constitutionality of the state grant-in-aid program. Withdrawn by the plaintiff on April 10, 1963.

*Lark v. State Board of Education**

Louisiana law requiring certificates of good moral character for admission to Southeastern Louisiana College declared invalid by U.S. District Court in 1956.

*Louisiana ex rel LeBlanc v. Lewis*

Nineteenth Judicial District Court of Louisiana in April, 1956, enjoined NAACP operations in the state. The decision was upheld by the U.S. Supreme Court in April, 1961.

*Ludley v. LSU Board of Supervisors**

Louisiana law requiring certificates of good moral character for admission to LSU declared invalid by U.S. District Court in 1956.

*Morial v. Orleans Parish School Board*

Filed, Aug. 30, 1963, in U.S. District Court to attack the constitutionality of *Act 252* of 1956, which prohibits New Orleans public school teachers from advocating desegregation or belonging to organizations that advocate desegregation. Request for a three-judge court to hear the case has been denied. (See *Ludley v. LSU Board of Supervisors).*

*Naguin et al v. Terrebonne Parish School Board*

Filed in U.S. District Court March 29, 1963, on behalf of 56 Indian children. District Judge Herbert W. Christenberry on Aug. 28, 1963, enjoined school board from denying plaintiffs equal access to white schools, ordered them admitted immediately to 11th and 12th grades, ordered a study of feasibility of admitting them to the 10th grade within a month, and ordered school board to prepare a plan to desegregate white and Indian schools in all remaining grades by Aug. 1, 1964.

*Nweze v. LSU Board of Supervisors*

U.S. District Court at New Orleans on June 12, 1963, ordered a Nigerian exchange student admitted to summer session at LSU in New Orleans.

*Singlemann v. Davis*

A friendly suit filed in December, 1960, to test validity of Act 2 of Second Special Session of Louisiana Legislature of 1960, an act which created a new school board for Orleans Parish. Three judge federal court nullified the act even as the Legislature passed a new act in third special session doing the same thing.

*Tureaud v. LSU Board of Supervisors*

U.S. District Court in 1952 ordered desegregation of Louisiana State University, Baton Rouge, at the undergraduate level but the Negro admitted stayed only eight weeks.

*U.S. v. Bossier Parish School Board*

Filed Jan. 18, 1963, in U.S. District Court by U.S. Department of Justice asking desegregation of public schools receiving federal aid to "impacted" areas. Case dismissed Aug. 20, 1963, by District Judge Ben C. Dawkins.

*U. S. v. St. Bernard Parish School Board*

Filed in U. S. District Court at New Orleans in the fall, 1961, by the U. S. attorney general to enjoin the board from conducting a segregated school in the parish for students from adjacent Orleans Parish, who boycotted desegregated facilities. The suit became moot when the students transferred to a private school in Orleans Parish.

*Wagner v. Redmond*

Emile F. Wagner Jr., a member of the Orleans Parish school board, asked the parish civil district court in the fall, 1960, for a writ of mandamus ordering the superintendent, James F. Redmond, to furnish names and addresses of students enrolled in the two desegregated schools. On Dec. 2, 1960, the court issued the writ. On appeal, the State Fourth Circuit Court of Appeal affirmed on March 13, 1961.

*Williams et al v. Northwestern Louisiana College at Natchitoches*

Sought desegregation of state-supported Northwestern College but died in court when Negroes failed to press the case.

*Wilson v. LSU Board of Supervisors*

Louisiana State University ordered to admit its first Negro (to the law school) in September, 1950, by U.S. District Court.

*(The Bailey, Lark and Ludley cases all involved court rulings of invalidity of *Acts 15* and *249* of the 1956 Legislature, which required certificates of good character from educators for students to attend state colleges but at the same time ordered removal of teachers doing anything to promote desegregation.)

**LEGISLATION (99)**

**1954**

*Act 555*—Required separate schools under state police powers. U.S. District Court of three judges declared unconstitutional in 1960, *Bush v. Orleans Parish School Board* and *Williams v. Davis*. Repealed by *Act 9*, First Extraordinary Session, 1960.

*Act 556*—Gave broad powers to local superintendents in pupil assignments.

*Act 752*—Constitutional amendment required segregation. Ruled unconstitutional in *Bush v. Orleans Parish.*

**1956**

*HCR 10*—Interposition. Subsequently, legislature in first special session of 1960 passed act of Interposition, ruled unconstitutional by U.S. District Court in *Bush v. Orleans Parish School Board* on Nov. 30, 1960.

*Act 15*—Required that pupils entering public-supported colleges and universities be certified as to good moral character by principal and superintendent, who would be removed if aiding desegregation. Ruled unconstitutional by U.S. District Court, *Ludley v. Louisiana State University Board of Supervisors*, 1956.

*Act 28*—Lifted compulsory attendance in desegregated districts. This act amended by *Act 27*, first special session of 1960, and ruled unconstitutional in 1960 by three-judge U.S. District Court in *Bush v. Orleans Parish School Board, Williams v. Davis*, and *U.S. v. State of Louisiana.*

*Act 248*—Provided dismissal of pro-integration school bus operators.

*Act 249*—Provided dismissal of teachers advocating integration. Ruled unconstitutional in 1956 in *Bailey, Lark* and *Ludley* cases.

*Act 250*—Provided dismissal of any state employe advocating integration.

*Act 252*—Provided dismissal of permanent teachers in Orleans Parish advocating integration.

*Act 319*—Classified schools as white or Negro in Orleans Parish. Three-judge U.S. District Court in 1960 declared unconstitutional in *Bush v. Orleans Parish School Board* and *Williams v. Davis*. Repealed by *Act 3*, First Extraordinary Session, 1960.

*Act 579*—Banned interracial sports, social activities. U.S. District Court in 1959 ruled unconstitutional in *Dorsey v. Louisiana State Athletic Commission.*

*Act 613*—Proposed constitutional amendment to withdraw state consent for state or local school officials to be sued. Approved in Nov. 6, 1956, referendum.

**1958**

*Act 187*—Ensured teacher salaries for time lost as a result of desegregation.

*Act 256*—Authorized closing of desegregated schools and transferring property to private, nonsectarian schools. U.S. District Court of three-judges in 1960 declared unconstitutional in *Bush v. Orleans Parish School Board* and *Williams v. Davis*. Repealed by *Act 7*, First Extraordinary Session, 1960.

*Act 257*—Authorized private schools under educational cooperatives.

*Act 258*—Authorized tuition grants for private education.

*Act 259*—Provided system of pupil placement. Amended by *Act 492* of 1960.

*Act 557*—Proposed amendment for state control of public, private schools. Incorporated into *Art. 12* of Louisiana Constitution. (Regular Session)

**1960**

*Act 18*—Created State Sovereignty Commission.

*Act 333*—Prohibited granting of school funds to desegregated schools. U.S. District Court of three judges in 1960 declared unconstitutional in *Bush v. Orleans Parish School Board* and *Williams v. Davis*. Repealed by *Act 8*, First Extraordinary Session, 1960.

*Act 492*—Revised pupil placement. Louisiana *Act 259* of 1958 revised and refined to coincide with Alabama law ruled constitutional.

*Act 495*—Authorized school closing by governor and sale of school property to private interests. U.S. District Court of three judges ruled unconstitutional in *Bush v. Orleans Parish School Board* and *Williams v. Davis*. Repealed by *Act. 6*, First Extraordinary Session, 1960.

*Act 496*—Permitted racial classification of schools. U.S. District Court of three judges ruled unconstitutional in 1960 in *Bush v. Orleans Parish School Board* and *Williams v. Davis*. Repealed by *Act 5*, First Extraordinary Session, 1960.

*Act 542*—Authorized governor to close schools in event of disorder. U.S. District Court of three judges ruled unconstitutional in 1960 in *Bush v. Orleans Parish School Board* and *Williams v. Davis*. Repealed by *Act 4*, First Extraordinary Session, 1960.

*Act 579*—Provided for closing trade schools in the event of disorder.

*Act 580*—Classified trade schools as to race.

*Act 581*—Prohibited free textbooks, supplies or funds to any desegregated trade school.

*Act 582*—Provided for the closing of any trade school in the interest of the people and selling them to private interests.

**1960**

**(First Extraordinary Session)**

The following acts and concurrent resolutions of the 1960 First Extraordinary Session were declared unconstitutional by a three-judge U.S. District Court at New Orleans on Nov. 30, 1960, in the combined *Bush v. Orleans Parish School Board, Williams v. Davis*, and *U.S. v. State of Louisiana.*

*HCR 10*—Provided creation of an eight member legislative committee to run the Orleans Parish public schools under *Act 17* below.

*HCR 17*—Changed powers of committee created by *HCR 10* so as to limit committee to investigative duties.

*HCR 19*—Appointed sergeants at arms to enforce in New Orleans the provisions of the interposition act and other acts and resolutions of the first special session.

*HCR 23*—Removed from office the four members of the Orleans Parish school board who complied Nov. 14 with desegregation order of federal court.

*Act 2*—Interposed the powers of the state, declaring the state alone had jurisdiction in public schools.

*Act 10*—Provided governor could close schools where disorder occurred or was threatened.

*Act 11*—Provided governor could close desegregated schools.

*Act 12*—Provided governor could close schools permanently.

*Act 13*—Prohibited state aid to any desegregated school.

*Act 14*—Provided schools could be operated under state police powers.

*Act 16*—Provided additional powers for state police officers.

*Act 17*—Permitted legislature to assume power of Orleans Parish school board. Removed powers and duties of the Orleans Parish school board.

*Act 18*—Named three member board of trustees to handle funds of any school board abolished.

*Act 19*—Repealed law designating Orleans Parish superintendent as treasurer of the school board.

*Act 20*—Permitted accrediting of all schools except those not operated in accordance with state laws. Prohibited State Board of Education approval or accreditation of desegregated schools.

*Act 21*—Prohibited school boards from carrying on any functions after being ordered to desegregate.

*Act 22*—Provided that any desegregated school would be closed as unfit.

*Act 23*—Revoked teaching certificates of public school teachers who instructed in desegregated classrooms.

*Act 24*—Required pupils be denied promotion and graduation if they attended desegregated classrooms.

*Act 25*—Repealed law under which Orleans Parish school board was elected.

*Act 26*—Forbade transfers of pupils from one school to another after the 21st day of the 1960-61 school term.

*Act 27*—Repealed the compulsory state school attendance law.

Several acts and resolutions of the 1960 First Extraordinary Session were not included in the litigation, which knocked out the above acts and resolutions. Among the acts passed and unaffected by the litigation were:

*Act 28*—Provided for revocation of teacher certificates of teachers in desegregated trade schools.

*Act 29*—Provided for closing desegregated trade schools.

**1960**

**(Second Extraordinary Session)**

*SCR 1*—Commended parents who took their children out of desegregated schools. (Same resolution passed by House as *HCR 1.*)

*HCR 2*—Warned banks and businesses not to do business with the Orleans Parish school board.

*HCR 3*—Accused U.S. District Judge J. Skelly Wright of bias and prejudice in the handling of school desegregation cases.

*HCR 6*—Requested Judge Wright to remove himself from desegregation cases.

*HCR 10*—Condemned the U.S. contempt citation against State Education Supt. Shelby M. Jackson.

*Act 2*—Provided for the creation of a new school board for Orleans Parish; subsequently repealed by another such bill voided by U.S. District Court.

*Act 3*—Provided for a system of education expense grants for children attending non-profit, non-secretarian, non-public schools. Amended by *Act 147*, 1962.

*Act 4*—Required officers of educational cooperatives to furnish bonds when handling or controlling funds.

*Act 5*—Provided that the attorney general shall be the counsel for school boards within the state and for other subdivisions of government.

*Act 6*—Made it a misdemeanor to obstruct court orders or judicial process.

*Act 7*—Provided that property of school boards may be disposed of in cases where public schools have been closed. Redefined by *Act 11* of second 1961 session.

**1960**

**(Third Extraordinary Session)**

*SCR 7*—Addressed Dr. James F. Redmond out of office as superintendent of Orleans Parish public schools. State enjoined by U.S. District Court from carrying out Dr. Redmond's removal. U.S. Supreme Court declined to review.

*HCR 8*—Praised Lt. Gov. C. C. Aycock, House Speaker J. Thomas Jewell, and State Education Supt. Shelby M. Jackson for their actions in refusing to make money available to desegregated Orleans Parish schools. Condemned the U.S. District Court at New Orleans for citing the three officials for contempt.

*HCR 9*—Declared intent of the legislature to pay operating cost of Orleans schools.

*HCR 15*—Authorized pay for employes of Orleans public schools except those at desegregated William Frantz and McDonogh No. 19 schools.

*HCR 21*—Asked the Louisiana School Boards Association not to recognize the memberships in the association of the four Orleans school board members who complied with federal desegregation order Nov. 14. The four Orleans members were dropped from the association roles.

*Act 2*—Amended and re-enacted *Act 18*, Regular Session, 1960.

*Act 3*—Provided penalties for persons usurping public office and directed at school officials who hold office despite actions of legislature to remove them.

*Act 4*—Created appointed school board to replace the Orleans Parish elected board of five members. State enjoined by U.S. District Court from use of act. U.S. Supreme Court upheld the action. Still in litigation in state courts on question of elected board's power to expend tax funds.

**1961**

**(First Extraordinary Session)**

*Senate Concurrent Resolution No. 4*—Commended the Louisiana School Boards Association for refusing to recognize the association memberships of Orleans Parish school board members who complied with federal desegregation order.

**1961**

**(Second Extraordinary Session)**

*HCR 22*—Condemned contempt proceedings against state officials by U.S. government.

*HCR 28*—Created committee for investigation of the operation of parish school boards.

*Act 2*—Provided that Louisiana school boards may call elections to determine whether voters would rather close public schools than have them desegregated. Ruled unconstitutional in *Hall v. St. Helena Parish School Board*.

*Act 3*—Made it a bribery offense to offer anything to parents of school children to get them to attend schools in violation of state laws. Three-judge federal court on May 4, 1961, held the law unconstitutional. U.S. Supreme Court upheld ruling in October, 1961.

*Act 4*—Permitted educational cooperatives to enter into contracts of employment with teachers and restricted cooperatives to paying school personnel what they were paid under public school program.

*Act 5*—Prohibited persons from encouraging child to attend desegregated schools and provided that fines imposed on violators of the act be paid to informers who pinpoint the violation. Three-judge federal court on May 4, 1961, held the law unconstitutional. U.S. Supreme Court upheld the decision in October, 1961.

*Act 7*—Added four members to the seven member East Baton Rouge Parish school board. Amended by *Act 14*. 1962.

*Act 9*—Transferred $2.5 million from the welfare department to the grant-in-aid school fund.

*Act 10*—Provided $200,000 a month from sales tax be placed in the grant-in-aid school fund.

*Act 11*—Provided for the sale or lease of school properties no longer needed by public school system. A redefinition of *Act 7* of the Second Extraordinary Session of 1960.

1962

*HCR 113*—Authorized Rep. Risley Triche to issue warrants and checks against the Louisiana Legislature School Account No. One for payment of "any and all valid obligations of the Orleans Parish School System and reimbursement payments to said system."

*HCR 114*—Authorized Supt. of Education Shelby Jackson to draw on the Louisiana Legislature School Account No. 1 for "funds which may be available, due and payable for the benefit of the Orleans Parish public school system for the fiscal year July 1, 1962, to June 30, 1963."

*Act 6*—Transferred $4 million from the educational expense grant fund to the general fund.

*Act 14*—Clarified *Act 7*, Second Extraordinary Session, 1961, enlarging the East Baton Rouge Parish School Board from seven to 11 members and setting six-year terms.

*Act 67*—Amended Section 51 of Title 17, LRS, 1950, to authorize parish school boards to sue and be sued to enforce contracts without the necessity of further legislative authorization, and prohibited any other suits against parish school boards without prior legislative authorization.

*Act 128*—Repealed Section 221 of Title 17, LRS, 1950, the compulsory attendance law, which required parents and guardians of children between ages 7 and 16 to send child to public or private school.

*Act 147*—Amended *Act 31*, Second Extraordinary Session, 1960 pertaining to financial assistance for pupils attending private, non-sectarian schools; vested this function in the Louisiana Financial Assistance Commission, set qualifications for assistance, established hearing procedures, transfered $200,000 per month to educational expense grant fund, and set a penalty for fraudulent application for grants.

*Act 148*—Amended Section 318 of Title 47, LRS, 1950, to provide for payment by the collector of revenue of the first $200,000 from collection of state sales tax each month to the Louisiana Financial Assistance Fund, which replaced the education expense grant fund.

*Act 196*—Provided that no child shall be compelled to attend any school in which his race constitutes less than half of the total registration.

*Act. 206*—Amended Section 416 of Title 17, LRS, 1950, relative to discipline in the public schools and specified causes therefor: wilful disobedience; intentional disrespect; unfounded charges; immoral or vicious practices; use of tobacco or alcohol; defacing property; obscene language, writing or drawing; carrying weapons.

*Act 342*—Appropriated $100,000 from the general fund to reimburse St. Bernard Parish school board for expense of providing educational facilities for pupils not residents of the parish.

*Act 543*—Proposed to amend Section One of Article XXI of the state constitution to authorize the legislature to designate and provide for special elections at which propositions to amend Article XII (dealing with public education) may be submitted to the electorate. This is to be in addition to provisions already on the books designating congressional and legislative elections for amendment referendums. Approved in November, 1962, general election.

*Act 544*—Proposed to amend Section 13, Article XII of the state constitution, prohibiting appropriation of public funds to private or sectarian schools; continued authority of the legislature to authorize state-supported institutions of higher learning to engage in interstate and intrastate education agreements with other states. Approved in November, 1962, general election.

*Act 545*—Proposed to amend Article VI of the state constitution, ratifying and confirming creation of Louisiana Financial Assistance Commission, authorizing the commission to borrow money to provide assistance and to issue bonds secured by a pledge of two per cent of the present sales tax. Rejected in November, 1962, general election.

*Act 546*—Proposed to amend Section One of Article XII of the state constitution, providing for financial assistance directly to pupils for attendance at private non-sectarian schools. Approved in November, 1962, general election.

1963

*Act 27*—Amended Sec. 318 of Title 47 of Louisiana Revised Statutes of 1950 to provide that $300,000 per month from the state sales tax be deposited in the Louisiana Financial Assistance Fund for distribution in grants-in-aid tuition program for children attending private, non-sectarian schools.

## Status of Segregation-Desegregation

### PUBLIC SCHOOLS

All of Maryland's 23 biracial school districts are desegregated, but three are desegregated in policy only. One of the three in 1962-63 had a Negro who graduated from a predominantly white school. The 23 desegregated districts have a combined enrollment of 535,691 whites and 160,946 Negroes. Baltimore was the first district to desegregate: In 1952-53 a small number of Negroes were permitted to attend an advanced high school, but the district did not officially begin desegration until September, 1954, when 1,376 Negroes entered 50 formerly all-white schools. All districts were desegregated in principle by 1957-58. Desegregation was voluntary in all instances but court cases were a factor in three districts. On Jan. 30, 1962, the Maryland Board of Education re-emphasized its state desegregation policy with a statement calling upon local school boards to guarantee transfers, transportation, and assignments "without regard to race." The school districts are:

| District | Enrollment White | Enrollment Negro | Negroes w/Whites | Brcl. Schs. | Date Deseg.** |
|---|---|---|---|---|---|
| Allegany | 16,635 | 289 | 289 | 18 | 1955 |

*Enrollment and desegregation data supplied in October, 1963, by individual districts.

**Desegregation date is first year Negroes attended schools with whites.

†Previously had a Negro in a biracial school but none this year.

††132 Negroes remain in four all-Negro classes at one desegregated school pending conversion of former Negro structure to biracial use.

### TEACHERS

No teachers have been discharged because of desegregation, but complaints have arisen in a few districts that qualified Negro applicants are not hired as readily as white teachers. The following districts in October, 1963, reported Negro teachers in desegregated positions: Allegany, 5; Baltimore City, about 1,337; Baltimore County, 65; Calvert, 1 (a supervisor); Carroll, 2; Cecil, 1; Frederick, 34; Howard, 3; Montgomery, 160; Prince George's, 17; and Washington, 11 (including one supervisor). Anne Arundel in 1962 reported 19. Total: about 1,655.

### HIGHER EDUCATION

All eight public senior colleges (four predominantly white; four predominantly Negro) and 12 public junior colleges are desegregated. All currently have biracial enrollments except one, which previously has had both white and Negro students. The University of Maryland was the first of the white colleges to become desegregated, admitting a Negro to its School of Law in 1936 by court order. All others have desegregated voluntarily. Two of the Negro institutions have been desegregated in policy since their founding but only recently have been consistently biracial. The state's colleges are:

| Predominantly White Senior Colleges | Enrollment Total | Enrollment Negroes* | Date Deseg. |
|---|---|---|---|
| Frostburg State | 1,834 | 4 | 1955-V |
| Salisbury State | 564 | 1 | 1955-V |

| Morgan State | 2,819 | 180** | 1867-V† |
| TOTAL | 4,224 | 290 | |

*Estimated; race not part of college records.

**Non-Negro population at Morgan includes many foreign students.

†Year of founding.

††Previously has had a Negro student.

### FACULTIES

Negroes serve as faculty members at the University of Maryland and three of the two-year colleges: Baltimore, Essex and Frederick. Towson State College had two Negroes on its 1963 summer faculty but none currently. All four predominantly Negro colleges have some white faculty members.

### SPECIAL SCHOOLS

The four state training schools for delinquent youths (two for boys and two for girls) were desegregated in 1961 following a state court ruling that continued segregation would be unconstitutional. The Maryland School for the Blind desegregated voluntarily in 1954, as did the Maryland School for the Deaf. The Rosewood Training School for mentally retarded children admitted Negroes voluntarily (a court suit to stop desegregation failed) in 1954. The

Esther Loring Richards Children's Center for emotionally disturbed children opened in 1958 as a desegregated institution, as did the Jacob E. Finesinger Unit, also for disturbed children, in 1961. Racial statistics are not available.

**LITIGATION (14)**

*Burr v. Board of School Commissioners of Baltimore*

Filed in the Superior Court of Baltimore in September, 1954, to halt desegregation of city schools. Demurrer of defendants sustained in October, 1954, in finding that school commissioners "exercised their discretion legally and in accordance with a final and enforceable holding and decision of the Supreme Court."

*Ex parte Howard*

Baltimore County Board of Education in October, 1955, filed petition in county Juvenile Court advising that Howards were keeping their two daughters out of desegregated school. Howards sought jury trial, which juvenile courts in Maryland do not provide. Case turned over to state's attorney's office, which presented a criminal information to county grand jury. Grand jury in March, 1956, declined to indict.

*Groves v. Board of Education of St. Mary's County*

Filed in U.S. District Court in April, 1958, to obtain desegregation of grades above those opened to Negro transfers under county plan. While approving the general plans, District Court ruled in August, 1958, that exception should be made for one child in absence of administrative problems. Ruling affirmed by U.S. Fourth Circuit Court of Appeals in November, 1958.

*Hart v. Board of Education of St. Mary's County*

Filed in U.S. District Court in June, 1958, to permit Negro boy enrolled at desegregated school to ride the white school bus. Declared moot in August, 1958, when county school officials provided the desired transportation.

*Heintz v. Howard County Board of Education*

Filed in Circuit Court for Howard County in August, 1956, along with identical petitions in Carroll, Anne Arundel and Talbot county courts, to have school desegregation declared unconstitutional. All were dismissed in September, 1956, on ground that lower courts could not overrule the Supreme Court.

*Mitchell v. Connellee*

Filed in January, 1955, in U.S. District Court to desegregate school on military base operated by Cecil County Board of Education. Declared moot in December, 1955, following the opening of new school off the base on a desegregated basis.

*Moore v. Board of Education of Harford County* (Civil Action No. 8615)

Filed in U.S. District Court in November, 1955, to desegregate Harford County schools. Suit dropped in March, 1956, following adoption of desegregation resolution by County Board of Education.

*Moore v. Board of Education of Harford County* (Civil Action No. 9105)

Filed in U.S. District Court in August, 1956, on behalf of pupils whose transfer requests had been denied under county desegregation plan. After several hearings, a new plan to desegregate all schools by 1963 was approved by a District Court judgment in June, 1957.

*Myers v. State Board of Public Welfare*

A Negro boy adjudged delinquent by the juvenile division of a state circuit court in Baltimore filed a class action in the same court in February, 1960, to have declared unconstitutional the state law requiring racial segregation in the state's four training schools. On July 6, 1960, the court held that the statutes violated the 14th Amendment. On appeal by the state board, the Court of Appeals of Maryland on Feb. 7, 1961, upheld the earlier decision, ruling that the Supreme Court's school desegregation decisions applied to all educational facilities offered by the state "without regard to the type of school."

*Pearson v. Murray*

The Maryland Court of Appeals in 1936 held that the state must afford equal educational opportunities in its own institutions. Donald Murray, a Negro, enrolled at the University of Maryland law school under court order.

*Pettit v. Board of Education of Harford County*

Filed in U.S. District Court in February, 1960, to obtain Negro transfer to white high school. Court ruled in May, 1960, that Negro boy, despite county screening process, had prior right under separate-but-equal doctrine to be admitted to academic course offered white students.

*Robinson v. St. Mary's County Board of Education*

Filed in U.S. District Court in March, 1956, to desegregate schools of St. Mary's County. Petition dismissed in July, 1956, on ground that administrative remedies had not been exhausted.

*Slade v. Board of Education of Harford County*

Filed in U.S. Fourth Circuit Court of Appeals in July, 1957, to obtain speedier desegregation than the schedule approved in the Moore case above. Appellate judges upheld District Court judgment in February, 1958. The Supreme Court declined to review in June, 1958.

*West v. Prince George's County Board of Education*

First filed in U.S. District Court in January, 1956, to collect damages for alleged discrimination in salaries of white and Negro teachers. Dismissed on technicality in March, 1956; refiled and heard in September, 1958. Court ruled in latter month that suit came too late under applicable Maryland statutes and that "there is no evidence of any present discrimination against Negro teachers" in county.

**LEGISLATION (2)**

The Maryland General Assembly in 1959 ratified the Fourteenth Amendment to the U.S. Constitution under which the School Segregation decisions of 1954 were made. The 1951 Assembly established a Commission on Interracial Problems and Relations.

### PUBLIC SCHOOLS

**Segregation is maintained at all grade levels.**

### TEACHERS

**Complete segregation is maintained.**

### HIGHER EDUCATION

**The University of Mississippi at Oxford was desegregated on Oct. 1, 1962, when a Negro transfer student, James Meredith, enrolled by court order in *Meredith v. Fair*. Riots occurred on the campus when Meredith arrived on the campus a day earlier, accompanied by a force of federal marshals. President Kennedy sent in regular troops and called part of the Mississippi National Guard to active duty to restore order. Meredith was graduated in June, 1963, still under protection of federal marshals. In June, 1963, Cleve McDowell became the second known Negro to enroll in the University of Mississippi, under a federal court order in *McDowell* admitting him to the School of Law. On September 24, 1963, he was expelled after found guilty by the Student Judicial Council of carrying a concealed weapon on the campus in violation of an administrative order. McDowell's expulsion returned the University of Mississippi to its former all-white status. Recently, Meredith announced he would seek admission next June to the university School of Law. No official action has been taken on his petition. Enrollments at the state schools are:**

### FACULTIES

**Complete segregation is maintained.**

### SPECIAL SCHOOLS

**Complete segregation is maintained.**

### ETHNIC GROUPS

**The state has no separate schools for Indians or other such groups, but the federal government has a school for Indians in Neshoba County.**

### LITIGATION (7)

***Evers et al v. Jackson Municipal Separate School District Board et al.***

**Filed in U.S. District Court on March 4, 1963, to desegregate public schools of city of Jackson. U.S. District Judge Sidney Mize dismissed the suit on June 24, 1963, on grounds appellants had not exhausted all administrative remedies. Appealed to U.S. Fifth Circuit Court of Appeals.**

***Hudson v. Leake County School Board et al.***

**Filed in U.S. District Court on March 7, 1963, to desegregate public schools of Leake County. District Judge Sidney Mize dismissed the suit June 24, 1963, on grounds appellants had not exhausted all administrative remedies. Appealed to U.S. Fifth Circuit Court of Appeals.**

***Mason et al v. Biloxi Municipal Separate School District Board et al***

**Filed in U.S. District Court in June, 1963, to desegregate public schools in Biloxi. District Judge Sidney Mize dismissed the suit on July 5, 1963, on grounds appellants had not exhausted all administrative remedies. Appealed to U.S. Fifth Circuit Court of Appeals.**

***Meredith v. Fair et al***

**Filed in U.S. District Court on May 31, 1961, to desegregate the University of Mississippi. U.S. District Judge Sidney Mize on Dec. 13, 1961, ruled that the university's rejection was not based on race or color. The U.S. Fifth Circuit Court of Appeals on Jan. 12, 1962, upheld Mize but ordered a hearing without delay. On Feb. 3, Judge Mize refused to order Meredith's admission, holding that the school was "not a racially segregated institution." The circuit court on Feb. 12, 1962, refused to order an injunction for immediate admission, but on June 25, 1962, the court held that university officials had rejected Meredith "solely because he was a Negro." On July 17, 1962, the circuit court directed Judge Mize to issue an order for admission. In July and August, the circuit court set aside three decrees by U.S. Circuit Judge Ben F. Cameron to stay the admission order. After Cameron's fourth stay, U.S. Supreme Court Justice Hugo Black set aside the stay. Meredith entered the school on Oct. 1, accompanied by federal marshals, after Gov. Ross Barnett and Lt. Gov. Paul B. Johnson personally intervened to stop the admission attempt. Contempt proceedings against the two officials are in the federal courts. Meredith graduated in June, 1963, and the last of the federal marshals withdrew.**

***McDowell v. Board of Trustees of State Institutions of Higher Learning***

Filed in U.S. District Court in May, 1963, for admission to Law School of the University of Mississippi. U.S. District Judge Sidney Mize on May 27, 1963, ordered McDowell's admission, which was accomplished June 5 without incident. University of Mississippi School of Law officials had issued McDowell a certificate of admission before the case was called and it was the basis of Judge Mize's order since it showed that he had met all requirements and was acceptable. McDowell was expelled in September, 1963, when he violated an administrative order against carrying concealed weapons on the university campus. Charles Evers, NAACP field secretary, said McDowell received a fair hearing by the Student Judicial Council. McDowell has appealed to the Dean of Admissions and also to the Board of Trustees of State Institutions of Higher Learning. No hearing date set.

***U.S. v. Biloxi Municipal Separate School District Board et al***

***U.S. v. Gulfport Municipal Separate School District Board et al***

Filed in U.S. District Court, January 18, 1963, as one suit seeking desegregation of schools for children of federal government personnel in both "impacted" areas. District Judge Sidney Mize separated the suits on April 22. On May 16, 1963, he dismissed the Gulfport suit on grounds that the United States had no contract with the school district and also that the government lacked authority to bring such a suit. Mize dismissed the Biloxi suit on June 17, 1963, on the same grounds.

**LEGISLATION (38)**

**1954**

*Ch. 260*—Established pupil assignment.

*Ch. 420*—Created Mississippi Legal Educational Advisory Committee.

**1954**
**(Extra Session)**

*Ch. 5*—Appropriated $50,000 for MLEAC operations.

*Ch. 39*—Proposed amendment to state constitution of 1890 to permit abolishing public schools and disposal of the property. Ratified in 1954 special election.

*Ch. 44*—Extended activities of MLEAC.

**1955**
**(Extra Session)**

*Ch. 43*—Banned white and Negro attendance at same school.

*Ch. 132*—Expanded school closing amendment.

*Ch. 134*—Enlarged MLEAC activities.

*Ch. 139*—Asked Congress to limit courts' jurisdiction.

*Ch. 155*—Banned speeches at state institutions by advocates of anti-state action.

**1956**

*Ch. 253*—Prohibited fomenting litigation or soliciting funds for filing suits.

*Ch. 254*—Directed officials to follow interposition doctrine of *Ch. 465*, and prohibited compliance with desegregation rulings.

*Ch. 255*—Named state bar requirements.

*Ch. 256*—Banned public disturbances.

*Ch. 261*—Banned telephone threats.

*Ch. 265*—Required school personnel to list memberships.

*Ch. 288*—Repealed compulsory attendance.

*Ch. 289*—Required pre-school-age census.

*Ch. 365*—Created State Sovereignty Commission.

*Ch. 439*—Created committee to draft interposition resolution.

*Ch. 466*—Stated doctrine of interposition.

*Ch. 468*—Sought federal constitutional admendment granting state control of schools.

*Ch. 475*—Commended Judge T. P. Brady for prosegregation efforts and his book, "Black Monday."

**1958**

*Ch. 311*—Authorized governor to close public schools and colleges.

**1960**

*SCR 115*—Commended William J. Simmons, editor of the Citizens Council newspaper and officer of the state and national council.

*SCR 143*—Proposed constitutional amendment to remove mandatory provision that legislature provide for free public schools. Ratified in 1960 general election.

*HB 1019*—Increase biennial appropriation for State Sovereignty Commission from $150,000 to $350,000.

*SB 1923*—Authorized local school trustees to close public schools.

**1962**

*SCR 158*—Memorialized State Board of Education to include in state course of study the book "Race and Reason" by Carleton Putnam.

*HB 124*—Eliminated word "Negro" from statute authorizing Board of Trustees of State Institutions of Higher Learning to provide qualified students instruction in graduate and professional schools outside the state.

*HB 530*—Defined legal residence of persons enrolling for colleges.

*HB 907*—Authorized attorney general to employ three additional full-time assistants to defend any suit against the state, any of its agencies or officials.

*HB 1117*—Appropriated $250,000 for the State Sovereignty Commission for 1962-64 (reduced from previous $350,000).

*SB 1710*—Authorized campus police to enforce all laws on university or college grounds.

*SB 1712*—Modernized business corporation act to provide that no foreign nonprofit nonshare, or nonprofit or nonshare corporation can do business in the state until it has been domesticated. Violators of the law face injunction in Hinds County Chancery Court. Provision was designed to force the NAACP to qualify in the state.

**1962**
**(Extraordinary Session)**

*HCR 18*—Called for redress of grievances, including the removal of James H. Meredith, a Negro student, from the University of Mississippi, and the removal of all federal marshals and troops.

*SB 1501*—Provided that no person shall be eligible for admission to any state institution of higher learning if he has a criminal charge of moral turpitude pending against him in any Mississippi state or federal court. A U.S. Fifth Circuit Court of Appeals, ruling in *Meredith v. Fair*, said that the effect of the bill was "to punish James Howard Meredith should he seek enrollment in the University of Mississippi."

*HB 2*—Provided that all acts, words and conduct performed by any state officer in keeping Mississippi institutions of higher learning segregated were adopted as acts of the state and not the individuals.

## Status of Segregation-Desegregation

### PUBLIC SCHOOLS

Of the estimated 212 school districts having both whites and Negroes within their boundaries, 203 with an estimated 90,000 Negro pupils are believed to be desegregated. An estimated 40,000 Negroes attend school with whites. Official figures are not available since the Missouri Department of Education keeps no data on race and this policy is reflected in local school districts. Most of Missouri's Negroes are concentrated in the two major urban areas—St. Louis and Kansas City. In 1962 the St. Louis public schools had 49,154 white and 60,109 Negro students. In October, 1963, the Kansas City public schools had 50,163 white and 26,442 Negro students. These two urban systems account for 86,123 of the approximately 95,000 Negroes estimated to be attending Missouri public schools. The estimate as to the number of Negro children attending school with white children is based in part on information from the St. Louis and Kansas City school systems. In 1962 St. Louis had 74 elementary and 10 high schools with both white and Negro children. Kansas City in autumn, 1963, had 46 elementary and 15 high schools with white and Negro enrollees. Most Missouri school districts having biracial enrollments desegregated voluntarily, starting first in 1954 in Kansas City. In the so-called "Bootheel" area of southeast Missouri, a cotton-growing agricultural area with strong cultural ties with the South, desegregation has tended to lag. In 1962 the NAACP began court action to bring about full desegregation of southeast Missouri schools. On June 4, 1963, U.S. District Court approved a desegregation plan for all public schools at Charleston, in Mississippi County, in September, 1963. On June 26, 1963, federal court actions against two Pemiscot County districts—Wardell R-VI and Deering C-6—were settled by consent judgment. In both Pemiscot cases, the court ordered that high schools desegregated immediately, grades 7-8 in July, 1963, grades 4-6 in January, 1964, and grades 1-3 in July, 1964. Districts definitely known to have ended desegregation are listed below by counties for convenience in locating them, although the counties themselves do not constitute school districts. High school and elementary districts have not been distinguished.

Adair County
- Kirksville

Audrain County
- Mexico
- Vandalia

Bates County
- Butler

Boone County
- Centralia
- Columbia
- Sturgeon

Buchanan County
- St. Joseph

Butler County
- Neelyville
- Poplar Bluff

Callaway County
- Fulton

Cape Girardeau County
- Cape Girardeau
- Jackson

Carroll County
- Carrollton

- Sikeston

Shelby County
- Clarence
- Hunnewell
- Shelbina

Stoddard County
- Bell City

Warren County
- Warrenton

Washington County
- Potosi

Wright County
- R-II Hartville

## TEACHERS

In September, 1961, the Missouri Advisory Committee to the U.S. Commission on Civil Rights estimated that 125 to 150 Negro teachers in Missouri had lost their employment as teachers as a result of initial desegregation. Most of the loss was in smaller or rural communities. The major urban systems, St. Louis and Kansas City, have been hiring an increasing number of Negro teachers and have hired some Negro teachers dismissed in other localities. In May, 1954, the St. Louis public schools had an instruction staff totaling 2,585—1,738 whites and 847 Negroes. By 1962 the total of professional (i.e. certificated) employes was 4,041—2,245 whites and 1,796 Negroes. The Negro proportion of teachers in St. Louis increased from about 33 per cent to 44 per cent in the eight years. The Kansas City public schools in January, 1959, had a total of 2,153 teachers—1,744 whites and 409 Negroes. Kansas City's 1959 total represented an increase of 123 teachers since desegregation, and 45 of these were Negroes. By October, 1962, Kansas City had 2,856 teachers—2,193 whites and 663 Negroes. Thus from 1959 to 1962 the Negro teacher proportion in Kansas City increased from about 18 per cent to 24 per cent. And in 1962 St. Louis and Kansas City were employing a total of nearly 2,500 Negro teachers in their public schools, reflecting the steady increase in Negro urban enrollment.

## HIGHER EDUCATION

A state court opened the University of Missouri to Negroes in 1950. Except for the university, all 15 tax-supported colleges and universities desegregated voluntarily. A survey was made in autumn, 1963, to determine racial composition of faculties and student populations at Missouri institutions of higher learning. In many instances the responding institutions—particularly the five state colleges—said they kept no records on race and declined to attempt even rough estimates as to number of Negro teachers and students. Listed below are the June, 1962, enrollments (except where more recent figures are indicated), and the most recent available estimate as to number of Negro students enrolled.

| Predominantly White State Schools | Enrollment Total | Negroes | Date Deseg. |
|---|---|---|---|
| Central Mo. State | 4,867 | 2 or more | 1954-V |
| Northeast Mo. State | 4,171 | 38 | 1953-V |
| Northwest Mo. State | 3,043 | 2 or more | 1954-V |
| Southeast Mo. State | 3,565 | 2 or more | 1954-V |
| Southwest Mo. State | 4,829 | 6 or 7 | 1954-V |
| Univ. of Missouri† | | | |
| Columbia | 15,090 | 200-300 | 1950-C |
| Rolla | 3,621 | 15-20 | 1950-C |
| Kansas City | 4,398 | some | 1958-V†† |
| St. Louis | 673 | some | 1963-V |
| TOTAL | 44,257 | 265** | |
| **Predominantly White District Colleges** | | | |
| Harris Teachers | 924 | 427 | 1954-V |
| Joplin Jr. | 692 | unknown | 1954-V |
| Jr. Coll. of Kansas City | 3,953* | 428 | 1954-V |
| Jr. Coll. of Flat River | 325* | 1 | 1957-V |
| Moberly Jr. | 176* | 3 | 1955-V |
| St. Joseph Jr. | 609* | 10 | 1955-V |
| St. Louis-St. Louis Co. Jr. | 2,386* | 300 | 1963-V |
| Trenton Jr. | 97* | 1 | 1954-V |
| TOTAL | 9,162 | 1,170** | |
| **Predominantly Negro State Schools** | | | |
| Lincoln Univ. | 1,582 | 1,028 | 1954-V |
| STATE TOTAL | 55,001 | 2,463** | |

*1963-64.
**Represents minimum.
†1963-64 total enrollment 23,050.
††Desegregated as private institution. University of Kansas City became part of state university in July, 1963.

## FACULTIES

Available information indicates that four of Missouri's 14, predominantly white, tax-supported universities and colleges have Negro faculty members: University of Missouri branch at Kansas City; St. Louis-St. Louis County Junior College (11); Harris Teachers College (15); and, the Junior College of Kansas City. Lincoln University, formerly all-Negro, has 64 Negro faculty members. The state's 15 public colleges and universities have a total faculty of about 3,132, including an estimated 92 Negroes.

## SPECIAL SCHOOLS

Trade schools, adult education programs and special schools in Missouri are officially desegregated in most instances. In St. Louis the apprenticeship programs operated under auspices of organized labor in public school facilities have given rise to complaints of discrimination against Negroes, although some Negroes are enrolled.

## LITIGATION (9)

*Arnold et al v. Kirkwood School District R-7*

Suit for injunction brought on behalf of 39 Negro children alleging they were deprived of equal educational opportunities. Filed in U.S. District Court at St. Louis on Dec. 13, 1950. Dismissed by District Judge George H. Moore Dec. 12, 1952, on the grounds that the plaintiffs had not established that their rights had been denied them because of race or color. Case held by U.S. Eighth Circuit Court of Appeals until after 1954 U.S. Supreme Court decision and returned to lower court for complying decree.

*Board of Education City of St. Louis v. St. Louis Branch NAACP*

St. Louis board filed suit in U.S. District Court Aug. 7, 1963, seeking judgment upholding legality of its bus transportation program for school children, chiefly Negroes, from crowded schools to those having classroom space. Court heard arguments Nov. 15 and took under advisement.

*Brooks et al v. The School District of the City of Moberly, Mo., et al.*

Group of Negro teachers brought action in U.S. District Court, Eastern District of Missouri (St. Louis), Nov. 21, 1955, charging that failure to renew their teaching contracts resulted from racial discrimination. Court found for defendants on June 27, 1958. On Appeal, U.S. Eighth Circuit Court of Appeals (St. Louis) affirmed lower court June 17, 1959, and found plaintiffs had failed to prove school board's action resulted from racial discrimination.

*Davis et al v. Board of Education of School District of Charleston et al.*

Negro parents brought action in U.S. District Court at St. Louis on Aug. 25, 1962, seeking desegregation of all public schools in the Charleston school district in southeast Missouri's "Bootheel." Temporary injunction granted on Oct. 8, 1962, admitted seven Negroes to Charleston High School. On April 11, 1963, Judge James H. Meredith ordered a desegregation plan for all Charleston public schools in September, 1963; he approved the plan June 4, 1963.

*Gaines v. Canada*

U.S. Supreme Court ruled in 1938 that the state was bound to furnish equal facilities within its borders. It ordered Leroy Gaines admitted to the University of Missouri law school since no Negro school existed. Gaines never enrolled.

*Layne v. St. Louis Board of Education*

Filed under NAACP auspices Aug. 20, 1963, in U.S. District Court, accusing St. Louis Board of Education of operating a segregated school system. Court heard arguments on motions Nov. 15, 1963, and took under advisement.

*Lewis v. Board of Education, Consolidated School District C-6, Deering*

Filed in U.S. District Court May 6, 1963, to desegregate Deering Consolidated School District, Pemiscot County, in southeast Missouri. Suit filed on behalf of eight Negro children by their parents, under NAACP auspices. On June 26, 1963, case was settled by con-

sent judgment: high school to desegregate immediately; grades 7-8, July, 1963; grades 4-6, January,

*Russell v. Board of Education of School District of Maplewood-Richmond Heights.*

Negro physician, Dr. Harold G. Russell, resident of suburban St. Louis, brought action for writ of mandamus in St. Louis County Circuit Court No. 7 at Clayton on Oct. 7, 1959, seeking admission of two Russell children to all-white public school near his home. On Feb. 24, 1961, Judge John J. Kelly Jr. granted petitioner 30 days to file amended petition, and on March 24, 1961, amended petition was filed. On April 29, 1961, the Board of Education announced it had voted to rezone the school district to permit entry of Negro children in the all-white school in September, 1961. This brought an end to litigation.

*Walls et al v. Board of Education, District R-VI, Pemiscot County*

Filed April 24, 1963, in U.S. District Court to desegregate schools. Suit brought under NAACP auspices by parents of 12 Negro children. On June 26, 1963, case was settled by consent judgement: high school to desegregate immediately; grades 7-8, July, 1963; grades 4-6, January, 1964; and grades 1-3, July, 1964.

**LEGISLATION (1)**

The Missouri General Assembly in 1957 repealed pre-1954 laws requiring school segregation, which already had been declared unenforceable by the state attorney general.

# Definition of Terms

**Desegregation**—Change from segregated to biracial or multiracial status, either in practice or principle.

**Integration**—Absence of all racial distinctions.

**Biracial Schools**—Ones attended by more than one race. Abbreviated in tables as "Brel. Schls."

**Districts With Negroes and Whites**—A district having both Negro and white students, whether the district is segregated or desegregated.

**Date Deseg.**—Abbreviation used in tables to indicate the date a school or district first desegregated in practice or policy.

**"C" and "V"**—Following dates of desegregation indicates whether the action was Voluntary or Court-ordered.

**Negroes w/Whites**—Used in tables for number of Negroes attending schools with whites.

**Predominantly White/Predominantly Negro** — Both terms used in tables on colleges and universities, to designate those schools either all-white or predominantly white/ all-Negro or predominantly Negro.

# NORTH CAROLINA

| Institutions | 11 | 6 | 17 |
| Enrollment | 38,675 | 8,892 | 47,567 |

## Status of Segregation-Desegregation

### PUBLIC SCHOOLS

The first public school desegregation in North Carolina took place in September, 1957, after Charlotte (now Charlotte-Mecklenburg), Greensboro and Winston-Salem, by prior agreement, simultaneously announced voluntary desegregation plans. Carburrus County, which faces a desegregation suit, has announced it will begin admitting Negroes to schools with whites in September, 1964.

The desegregated districts are:

| District | Enrollment* White | Enrollment* Negro | Negroes w/Whites | Brcl. Schls. | Date Deseg. |
|---|---|---|---|---|---|
| Alamance Co. | 9,200 | 3,070 | 1 | 1 | 1963-V |
| Asheville | 7,570 | 2,940 | 120* | 4 | 1961-V |
| Buncombe Co. | 18,390 | 400 | 12 | 1 | 1963-V |
| Burlington | 8,390 | 2,020 | 13 | 3 | 1963-V |
| Caswell Co. | 2,520 | 3,070 | 23 | 4 | 1963-C |
| Chapel Hill | 3,080 | 1,180 | 200* | 4 | 1960-V |

| Winston-Salem-Forsyth | 34,000 | 11,500 | 26 | 3 | 1957-V |
| Yancey Co. | 3,520 | 30 | 10 | 2 | 1960-C |
| TOTALS | 367,764 | 133,164 | 1,865 | 119 | |

*Estimated.
†Includes 372 Negroes at Bethune School with 12 whites.

### TEACHERS

Faculties remain segregated.

### HIGHER EDUCATION

Six desegregated public colleges have Negroes enrolled with whites. All three branches of the Consolidated University of North Carolina have been desegregated in policy since five Negro students enrolled in the university law school under a 1951 court order in *McKissick v. Carmichael*. These three, the University at Chapel Hill, North Carolina State College at Raleigh and the Woman's College of the University of North Carolina at Greensboro, are still the principal state colleges that are desegregated. West Carolina College, East Carolina College and A&T College have had desegregated summer classes. The 1963 enrollments were:

| Predominantly White Senior Colleges | Enrollment Total | Enrollment Negro | Date Deseg. |
|---|---|---|---|
| Appalachian State Teachers | 3,186 | 8* | 1963-V |
| East Carolina | 5,930 | 22 | 1962-V |
| N.C. State | 8,207 | 25* | 1953-V |
| Pembroke** | 934 | 0 | 1963-V |
| Univ. of N.C. | | | |
| Chapel Hill | 11,297 | 60* | 1951-C |
| Greensboro | 3,737 | 80* | 1956-V |

| **Predominantly Negro Junior Colleges** | | | |
| Mecklenburg | 220 | 220 | 1961-V |
| TOTALS | 8,892 | 8,879 | |
| STATE TOTALS | 47,567 | 9,133 | |

*Estimated, racial records not kept.
**Formerly all-Indian.
†In process of gradual conversion to senior college.
††Had some Negroes previously.

### FACULTIES

Winston-Salem State College, which is all-Negro, began its second year of faculty desegregation with three full-time white instructors. The college also has several white faculty members on a part-time basis. A second Negro college, North Carolina College, has employed two white professors for several years. All other college faculties are segregated.

### SPECIAL SCHOOLS

The state operates industrial education centers throughout the state for students beyond the high school level, although some do include high school students. By policy, all are operated on a desegregated basis. Race is not a factor for entry. No exact figures are available in this area. It may be noted that in the Winston-Salem-Forsyth County area, a branch of the Industrial Education Center operated in close conjunction with the Negro Atkins High School, is run on a reverse desegregation basis with one white faculty member and several white students. The branch does not offer the same subjects as the main IEC. The Governor's School, a state summer school for advanced high school students, had a biracial student body and staff at its first session in 1963.

### ETHNIC GROUPS

A case *(Chance et al v. Harnett County Board of Education)* involving 50 Indians of the Maple Grove Indian Schools and Harnett County is now under consideration by U.S. District Court Judge Wilson Warlick. The action involves a charge by Indians that their school is not equal to schools for whites. Harnett County began desegregation of Indians in 1961 when 18 were assigned to a high school with whites. This action followed Indian protests a year earlier. Robeson County desegregated Indians in September, 1962, by enrolling seven Lumbee Indians at Lumberton Junior High. Robeson County operates separate schools for whites, Negroes, Indians and Smilings, a mixed blood group. Halifax County, Va., and Person County, N.C.,

closed a jointly operated school for Indians in September, 1962, to save money for both systems. The 85 Indians involved were assigned to schools in North Carolina. A suit filed by Sampson County Indians in 1963 in U.S. Eastern District Court was settled Sept. 8, 1963, when Sampson County and Clinton city schools accepted 14 Indians in high schools. Both systems agreed to enroll 22 Indian children in white schools in the 1964-65 school year.

**LITIGATION (31)**

*Becton v. Green County Board of Education*

Class action filed July 1, 1960, seeking to commit the board to formulate a school desegregation plan. Pending.

*Belo v. Randolph County Board of Education*

Parents of 11 Negro children filed suit Oct. 22, 1962, in U.S. District Court, charging the board with maintaining segregation in the county schools. The suit also seeks teacher desegregation. Schools desegregated Sept. 11, 1963 as result of pretrial conference Sept. 6, 1963, called by District Judge Edwin M. Stanley. School board is to submit desegregation to court Jan. 31, 1964. A pretrial conference is set for March 20, 1964.

*Cabaniss v. Shelby Board of Education*

Parents of Rayfield Cabaniss filed suit in U.S. District Court on March 16, 1963, against Shelby school board, claiming a class action and seeking son's transfer from a Negro school to a white school. On Aug. 27, 1963, the school board assigned Cabaniss and three other Negroes to previously white Shelby High School. This was also date of pretrial hearing by District Judge Wilson Warlick, who ruled the case was not a class action.

*Carson v. Warlick*
*Carson v. Board of Education of McDowell County*
*Joyner v. McDowell County Board of Education*

Of the three related cases, *Carson v. Warlick* was the deciding action. The series of cases began with *Carson v. Board of Education of McDowell County*, filed before the 1954 segregation cases were decided. Plaintiffs sought equal facilities and the right to attend school without regard to race. After the segregation cases were decided, the Western District Federal Court dismissed the suit on the ground that relief sought was then available. On appeal, the U.S. Fourth Circuit Court of Appeals reversed and ordered the district court to reconsider the case in the light of North Carolina's School Placement Law. Action was subsequently brought in North Carolina State Court, *Joyner v. McDowell County Board of Education*. This action involved some of the same plaintiffs as did the original case. The North Carolina Supreme Court held in 1956 that the action was improperly brought because more than one person was party to it and the North Carolina Placement Law dealt only with an individual student's assignment. Thereafter, the plaintiff's returned to Western District Federal Court, filed a supplemental complaint and sought a declaratory judgment on the right to attend school without regard to race. District Court Judge Wilson Warlick refused to grant the relief sought on the ground that state administrative remedies had not been exhausted. Then, in *Carson v. Warlick*, the plaintiffs went to U.S. Fourth Circuit Court of Appeals for writ of mandamus to require the district court to vacate the proceedings and to permit the plaintiffs to file supplemental proceedings "as though the Pupil Enrollment Act had never been enacted." The Fourth Circuit, on Nov. 14, 1956, refused the writ and held that exhaustion by the plaintiffs of administrative remedies provided by the state was a necessary prerequisite to securing federal court action on their cases. The court held that the act was not unconstitutional on its face.

*Chance et al v. Harnett County Board of Education*

Filed in U.S. District Court on Oct. 17, 1960, after Harnett County Indians refused to return to Sampson County all-Indian school. The case became moot when Harnett County granted the Indians' request for assignment to Dunn High School. Indian elementary students applied for reassignment to white schools but their request was denied. They filed suit in August, 1961. Case is now being considered by Judge Wilson Warlick of U.S. Eastern District Court.

*Conley v. Transylvania County Board of Education*

Filed Aug. 17, 1962, in U.S. District Court, seeking admission of 36 Negro children to junior and senior high schools with whites. District Judge Wilson Warlick advised both sides on March 11, 1963, to draw up a plan for desegregation and ordered desegregation of high schools during 1963-64 school year. Board complied.

*Constantian v. Anson County*

North Carolina Supreme Court on June 6, 1956, held that school bonds approved prior to 1954 and ostensibly for the purpose of maintaining segregated schools could be used for public schools nevertheless. The court held North Carolina's school segregation laws to have been invalidated by the 1954 U.S. Supreme Court decision, but held the segregation provisions severable and ruled that the provisions for state-supported public schools were still valid.

*Covington v. Edwards*

U.S. District Court in 1956 held that no constitutional issue was presented. The court held Sept. 12, 1958, that class action, brought in 1955 against Montgomery County school officials, should be dismissed for failure to allege the exhaustion of administrative remedies. Plaintiffs had contended that passage of time since 1954 had made exhaustion of administrative remedy unnecessary in view of lack of desegregation plan by Montgomery Board of Education. Court held integration not required by 1954 School Segregation Cases.

*Du Vissette v. Cabarrus County Board of Education*

Parents of 108 Negro children filed suit Oct. 25, 1963, in U.S. District Court, seeking desegregation of Cabarrus County schools in both student body and faculty. The school board answer noted that it has set a new policy, effective during 1964-65 school year, that parents of any child may request and receive a transfer "without cause or reason." Pending.

*Felder et al v. Harnett County Board of Education*

Filed in U.S. District Court Oct. 9, 1963, as class action, in behalf of 19 Negro children seeking permanent injunction against Harnett County Board of Education. Suit requests county set up a plan for school desegregation.

*Ford v. Cumberland County Board of Education*

Filed in July, 1963, in U.S. District Court. Horace Ford claimed his two daughters were denied constitutional rights because Cumberland County officials operated segregated school system, and asked board to set up complete desegregation plan.

*Frasier v. Board of Trustees of the University of North Carolina*

Negro youths sought and obtained from a three-judge court, sitting in U.S. Middle District Court, Sept. 16, 1955, a ruling that the School Segregation Cases rule was applicable to colleges as well as primary schools.

*Gilmore et al v. High Point City Board of Education*

Filed March 13, 1963, in U.S. District Court in behalf of eight Negro children, seeking to extend desegregation of High Point school system in assignment of students, teachers and school personnel. Judge Edwin M. Stanley in a pretrial conference Sept. 6, 1963, suggested that both sides work out their differences in conference. He will hold pretrial conference March 20, 1964.

*Griffith v. Robinson et al*

Filed on Nov. 11, 1959, in U.S. District Court by Negro children seeking to enter Yancey County schools instead of traveling about 80 miles daily to schools outside the county. The county had been without schools for Negroes for two years when the suit was filed. After the first hearing, the county built a two-room elementary school. The suit was amended to challenge this. U.S. District Judge Wilson Warlick in December, 1960, ordered Negro children admitted to the two high schools but gave the county time to restudy the Negro assignments to the elementary school. Judge Warlick on Aug. 13, 1962, ruled against a Negro boy seeking a transfer from the Negro elementary to a white school, ruling that the white school was overcrowded and the other was not. Judge Warlick ruled on Sept. 26, 1963, that Yancey County must have complete desegregation of all schools, including two-room Negro Oak Crest School, by end of 1963-64 fall semester.

*Holt v. Raleigh Board of Education*

Filed in U.S. District Court in 1957, by Negro seeking admission to white high school nearer his home. The court held in 1958 that the plaintiff had failed to exhaust the administrative remedies under the Pupil Placement Act and it was necessary for the pupil and parents to appear at a school board hearing instead of being represented by an attorney. The U.S. Fourth Circuit Court of Appeals upheld on March 19, 1959. The U.S. Supreme Court declined to review.

*Hunter et al v. Raleigh City Board of Education*

Filed on May 31, 1961, to desegregate Raleigh schools. Raleigh had admitted its first Negro to a school with whites in 1960. The case is pending.

*In re: Applications for Reassignment*

Filed in 1957 in Superior Court by three whites to appeal assignments of Negroes to formerly all-white Greensboro schools. Court dismissed on grounds that state assignment law allowed parent to request reassignment of his own child, not to appeal assignment of other pupils. State Supreme Court affirmed on Jan. 10, 1958.

*Jeffers v. Whitley*

Negro parents of 43 school children filed suit in U.S. District Court in 1956 to desegregate the schools. The action was filed against Caswell County and state officials but the action as to the latter was dismissed on the ground that they had no authority over specific pupil assignment. On Aug. 4, 1961, the court held that five Negroes had exhausted the administrative remedies but that they could not bring a class action. On Dec. 29, 1961, U.S. District Judge Edwin M. Stanley held that two Negroes were entitled to enroll at Murphy School at the beginning of any regular semester. The Negroes did not apply but on appeal, the U.S. Fourth Circuit Court of Appeals ruled on Oct. 12, 1962, that the county had applied the Pupil Assignment Law unconstitutionally. Judge Stanley on Dec. 21, 1962, ordered the Caswell County school board to desegregate schools. Schools desegregated Jan. 22, 1963. On April 11, 1963, Judge Stanley refused to order special bus service for Negroes.

*McCoy v. Greensboro City Board of Education*

Filed Feb. 10, 1959, in U.S. Middle District Court, seeking admission to white schools. Admission obtained by voluntary board action, however, and then motion amended by remaining plaintiffs who contended board's action in turning former white school into all-Negro school was part of systematic pattern of segregation. Court held Jan. 14, 1960, that it could not interfere with operation of schools.

*McKissick v. Carmichael*

U.S. Fourth Circuit Court of Appeals in 1951 ordered the University of North Carolina Law School opened to Negroes. The court stressed the prestige, reputation and high standing of the school as the determining factors in showing the disparity between it and the law school established at the North Carolina College in Durham.

*McKissick v. Durham City Board of Education*

Filed May 12, 1958, as petition for admission to white schools. Sought to have Pupil Placement Law declared unconstitutional as administered by Durham Board of Education. U.S. District Court held on Sept. 4, 1959, that plaintiffs had failed to appear at the school board hearing and had not exhausted their administrative remedies. Dismissed.

*Morrow v. Mecklenburg County Board of Education*

Filed Feb. 10, 1959, in Western District Federal Court, after 1958 and 1959 refusals by board to transfer Negro students to white schools. Judge Wilson M. Warlick ruled in June, 1961, that admission had not been denied because of race. System merged in 1960 with Charlotte, which had desegregated voluntarily earlier. Case dismissed on Aug. 31, 1961, when Judge Warlick ruled that an appeal had not been perfected in time and inadequate reason for delay had been offered.

*NAACP v. Eure, Secretary of State*

North Carolina Supreme Court held Jan. 11, 1957, that NAACP must register under General Statute Chapter 120, *Article 10*.

*Thompson et al v. Durham County Board of Education et al*

Parents of 61 Negro children filed class action July 23, 1963, in U.S. District Court seeking desegregation of Durham County schools. Pending.

*Vickers v. Chapel Hill City Board of Education*

Filed Feb. 2, 1960, in Middle District Court, after denial of transfer in 1958 and 1959. Judge Edwin M. Stanley ruled Aug. 4, 1961, that the student was entitled to attend a school that was no longer closer to his home than a Negro school because, had he been assigned without regard to race, he normally would have moved from a nearby white school to which he first sought admission to the now more distant junior high school.

*Wheeler v. Durham City Board of Education*
*Spaulding v. Durham City Board of Education*

Wheeler, filed April 29, 1960, and Spaulding, filed Sept. 12, 1960, and consolidated for argument. Involved denial of transfer requests of students in fall of 1959 and 1960. Judge Edwin M. Stanley, in Middle District Court, held that students were entitled to have the board stop using a "white" attendance map and a "Negro" attendance map in making initial assignments. On restudy before school opened in fall of 1961, board admitted six of the plaintiffs. Further reports were to be made to the court on disposition of other applications. On April 11, 1962, the District Court dismissed the case. The U.S. Fourth Circuit Court of Appeals ruled Oct. 12, 1962, that the Durham board must submit a suitable plan for ending "existing discrimination" or stop applying the State Pupil Assignment Law in "an unconstitutional manner." District Judge Stanley on Dec. 21, 1962, ordered open admission of Negroes by request to all schools except high schools. On July 7, 1963, he rejected a Durham school board plan giving freedom of choice to children not in high school during 1963-64 school year and to all children in 1964-65 school year. Board filed appeal with U.S. Fourth Circuit Court of Appeals Nov. 13, 1963.

*Wynn v. Charlotte Community College System Trustees*

Filed in Mecklenburg County Superior Court on May 15, 1961, by Negroes requesting an injunction to stop construction of Carver College, one of two

community colleges. On May 22, 1961, Judge Susie Sharp refused the injunction on the grounds that no student had been barred from either school on the basis of race. The State Supreme Court affirmed the decision on Nov. 8, 1961.

*Ziglar et al v. Reidsville Board of Education*

Class action filed in U.S. District Court on Nov. 30, 1962, by parents of four Negro children charging that Reidsville operated a racially segregated school system. (Schools have begun desegregation). Judge Edwin M. Stanley on Sept. 6, 1963, advised both sides to work out their differences. He will hold a pretrial conference March 20, 1964.

**LEGISLATION (11)**

**1955**

*Res. 29*—Created Advisory Committee on Education.

*Ch. 366*—Established Pupil Placement Law. Amended by *Ch. 7, 1956.*

*Ch. 664*—Repealed teachers' continuing contract law.

*Ch. 1372*—Revised general education law to eliminate reference to race and to transfer school bus titles to counties.

**1956**

*Ch. 1*—Proposed amendment to North Carolina constitution to provide for educational expense grants and local option on closing public schools. Approved in state referendum Sept. 8, 1956.

*Ch. 2*—Provided for election to consider adoption of *Ch. 1.*

*Ch. 3*—Provided granting state funds as "education expense grants" to children whose parents object to their assignment to schools with another race. Grants available only for private nonsectarian schools.

*Ch. 4*—Provided local option on school closings.

*Ch. 5*—Amended compulsory school attendance law to provide for granting "education expense grants."

*Ch. 6*—Provided funds to implement the "education expense grants."

*Ch. 7*—Amended school placement law, *Ch. 366* of 1955.

| Enrollment | 57,253 | 693 | 57,946 |

## Status of Segregation-Desegregation

### PUBLIC SCHOOLS

Oklahoma has 197 desegregated school districts but seven are desegregated in policy only. Two of the latter (Cleo Springs and Weaver) have accepted Negroes in white schools in the past. The first Oklahoma district to desegregate was Poteau, which acted voluntarily June 7, 1955. Although the state records provide no racial breakdown, an estimated 317,670 whites and 34,898 Negroes are believed enrolled in the desegregated districts. Updating of a 1961 state survey indicates 12,048 Negroes are attending 499 schools with whites. Listed below by counties are the known desegregated districts and the number of biracial schools and Negroes involved:

| County<br>Desegregated Districts | Negroes In Schools With Whites | Biracial Schools |

## TEACHERS

About 28 Negro teachers are said to be on desegregated faculties in four districts: Fay, Ponca City, Arcadia and Tulsa (Burroughs Elementary). An estimated 396 Negro teachers have lost their jobs because of desegregation.

## HIGHER EDUCATION

All 23 public colleges and universities are desegregated in practice or policy. Oklahoma admitted its first Negro (G. W. McLaurin) to the University of Oklahoma graduate division in accordance with a U.S. District Court order on Oct. 6, 1948. (*McLaurin v. Oklahoma State Regents*). U.S. Supreme Court had held Ada Lois Sipuel was entitled to a legal education by the state under the "equal protection" clause of the 14th amendment. (*Sipuel v. Board of Regents*). A June 9, 1949, legislative act permitted Negroes to attend white colleges for courses not given at Negro institutions, provided the Negro student remained segregated within the college. A three-judge U.S. District Court held Nov. 22, 1949, that the segregation within the OU graduate division did not deprive McLaurin of his rights under the 14th Amendment. This decision was reversed June 5, 1950, by the U.S. Supreme Court, which ruled segregated facilities within the institution deprived McLaurin of equal protection. The State Board of Regents for Higher Education then adopted a policy of admitting Negroes to any course in a white college not offered by Langston University. On June 6, 1955, the board opened all state-owned colleges and universities to qualified undergraduates of all races. College enrollments are:

| Predominantly White Senior Colleges | Enrollment Total | Negro* | Date Deseg. |
|---|---|---|---|
| Central State | 5,913 | 296 | 1955-V |
| East Central State | 2,038 | 10 | 1955-V |

| STATE TOTALS | 57,946 | 1,542 | |

*Estimated.
**Had at least one Negro from 1958 until this year.
†Only Negro withdrew mid-November.
††Has two whites.

## FACULTIES

The University of Oklahoma has one Negro on its faculty (School of Nursing), plus two or three who are graduate assistants. Langston University has one white faculty member.

## SPECIAL SCHOOLS

Sulphur School for the Blind accepts Negroes. However, most are in the Deaf, Blind, and Orphan School for Negroes at Taft. The 1963 legislature ordered the Negro retarded children from Taft hospital transferred to the other schools for mentally retarded. Special education classes in Oklahoma City have both Negroes and white pupils.

## ETHNIC GROUPS

This has never been an issue in Oklahoma. Indians and other non-whites attend white schools. There are about nine Indian boarding schools operated by the federal government. Indians, many of whom are from out of the state, attend them as a matter of choice because room and board are free.

## LITIGATION (21)

*Appeal by Curtis L. Smith from order of county superintendent of schools, Oklahoma County, denying request for transfer from Arcadia school to Jones school*

Filed June 19, 1957, in Oklahoma County district court. (Three similar appeals also filed). Order denying transfer reversed by district court June 27, 1957.

*Appeal by Independent School District 1-5, Arcadia, from order of transfer issued by Oklahoma County superintendent of schools*

Filed June 19, 1959, in Oklahoma County district court, alleging school superintendent allowed white children to transfer out of district for "health" whereas real reason was the fact school was desegregated and had more Negro than white pupils. Court on June 29, 1959, sustained superintendent's demurrer, thus denying request that he be enjoined from allowing transfers.

*Appeal by Lunett Wilbanks from order of Oklahoma County superintendent of schools denying transfer from Arcadia school to Choctaw school*

Filed June 19, 1958, in Oklahoma County district court. (Eleven similar appeals also filed.) Order denying transfer affirmed in district court June 26, 1958.

*Bailey v. Hodge et al*

Filed March 15, 1957, in U.S. District Court (western) to restrain defendants from discriminating against plaintiff by denying her admission to Oklahoma School for the Deaf, Sulphur. Journal entry judgment filed July 31, 1957, that any Negro of proper age be admitted to school beginning Sept. 2, 1957, or any subsequent semester.

*Brown v. Long*

Intervenor petition by George Dalcour filed Aug. 25, 1958, in U.S. District Court (eastern) to gain transfer of son, Edward, from all-Negro Grayson school to biracial Morris High School. Court denied petition Oct. 10, 1958, ruling plaintiff failed to follow legal procedure by not appealing Morris board's refusal to transfer.

*Brown et al v. Long et al*

Filed March 14, 1957, in U.S. District Court (eastern) to desegregate Morris High School. Court on Sept. 21, 1957, ordered Morris District to admit Negroes to high school.

*Burrough et al v. Elmer Jenkins, Superintendent of Red Bird Dependent School District et al*

Filed Sept. 26, 1955, in U.S. District Court (eastern) alleging racial discrimination by defendant in refusing to cancel transfers of 14 Negro children from Porter and Coweta to all-Negro Red Bird school. Court ruled Dec. 16, 1955, that it was a question of local fiscal policies, not of racial discrimination, and sustained defendants' motion to dismiss.

*Butler et al v. Grant Independent School District et al*

Filed June 14, 1956, in Choctaw County district court to gain admission of 35 Negroes to Grant High School; suit alleged school board fraud in transferring Negroes to Hugo's Booker T. Washington when transfers not requested. Court records show no hearing nor other disposition.

*Carr et al v. Cole et al*

Filed Jan. 10, 1957, in U.S. District Court (western), seeking admission of Negroes to public schools of Earlsboro District. Court granted permanent injunction Jan. 17, 1957, to prevent discrimination against plaintiffs on account of race or color.

*Dowell v. The Board of Education*

Filed in U.S. District Court for Western Oklahoma Oct. 9, 1961, asking that Oklahoma's pupil transfer law be declared unconstitutional and that defendants be enjoined from transferring students to schools in Oklahoma City on a basis of race and color. Three-judge court assigned Oct. 11, 1961. On July 10, 1962, the three-judge court dissolved, holding that it lacked jurisdiction and that the defendant did not discriminate against Negroes in designating schools for students to attend. Amended complaint filed Aug. 22, 1962, alleging specific acts of discrimination. U.S. District Judge Luther Bohanon denied motion to dismiss on Nov. 7, 1962. Judge Bohanon issued order July 11, 1963, banning pupil transfers based on race and requiring immediate desegregation of supervisory and teaching personnel; school board given 90 days to file plan for complete desegregation.

*Mildred King George v. Joint School District No. 5, Kingfisher County (Lacy)*

Filed June 28, 1956, Kingfisher County district court claiming breach of Negro's teacher contract. State supreme court on Nov. 14, 1957, affirmed lower court action sustaining demurrer by defendant.

*Ulysses S. Grant et al v. Paul R. Taylor et al*

Filed Sept. 24, 1954, in U.S. District Court (western) to force admission of three Negro students to El Reno Junior College. Declared moot same court Aug. 22, 1955, on grounds El Reno school board had complied with U.S. Supreme Court order by admitting Negroes to junior college.

*Hill et al v. Board of Education of New Lima School District et al*

Filed Sept. 10, 1963, in U.S. District Court to gain admission of 12 Negro children to all-white New Lima elementary school, Seminole County. Board's answer filed Sept. 30, 1963, claimed majority of Negroes want separate school. Case assigned to U.S. District Judge Fred Daugherty.

*Hole et al v. Wilson et al*

Filed Aug. 15, 1955, in Cleveland County district court to enjoin Stella school board from moving furniture and equipment from white school into Negro school building. Court granted temporary injunction Aug. 26, 1955, with stipulation school opening be allowed. Dismissed Sept. 6, 1955, by plaintiff's attorney without prejudice.

*Jefferson et al v. McCart et al*

Filed Aug. 25, 1958, U.S. District Court (eastern) to desegregate Liberty School. Okmulgee County Court on Oct. 10, 1958, ordered Negroes admitted to the school.

*McHenry and Matlock v. Wagoner County Board of Commissioners*

Filed June, 1954, in Wagoner County district court, protesting use of $431,000 bond issue approved Feb. 9, 1954, for separate school buildings and sites. Oklahoma Supreme Court ruled February, 1955, that U.S. Supreme Court order limited only use of school property, not its construction.

*McLaurin v. Oklahoma State Regents*

U.S. District Court on Oct. 6, 1948, ordered the admission of G. W. McLaurin to the University of Oklahoma. In 1950, the U.S. Supreme Court held that McLaurin was handicapped in being taught in segregated conditions and ordered that he receive the same treatment as other races.

*Riddle et al v. Wagoner County Board of Commissioners et al*

Filed Oct. 7, 1955, in Wagoner County district court to enjoin county from delivering $431,000 in bonds and proceeding with construction of new Negro school at Wagoner and remodeling others at Coweta, Porter and Okay. Defendant's motion for new trial overruled June 16, 1956, and notice to appeal given by Max Finley, county attorney. Oklahoma Supreme Court records show no appeal filed.

*Simms et al v. Hudson et al*

Filed March 14, 1957, in U.S. District Court (eastern) to desegregate Preston High School. Court on Sept. 21, 1957, ordered Preston District to admit Negroes to high school. Granted additional time to arrange elementary desegregation, which began in August, 1958.

*Sipuel v. Board of Regents*

On Jan. 12, 1948, the U.S. Supreme Court held that the state must provide equal facilities for one race as soon as it does another race. It ordered Mrs. Ada Lois Sipuel admitted to the University of Oklahoma law school, which did not accept her until 1949, after it had admitted another Negro student by court order.

*Troullier v. Oklahoma College for Women*

Filed Oct. 8, 1954, in U.S. District Court (eastern) to require OCW to admit Negro as student in September, 1955, and to strike the Oklahoma law limiting attendance to "white female citizens" so Negroes would not be barred in the future. Court dismissed case July 29, 1955, holding legal controversy no longer existed because OCW had enrolled plaintiff.

**LEGISLATION (5)**

**1955**

*HJR 504*—Proposed constitutional ("Better Schools") amendment to substitute four-mill levy for all schools for previous three-mill operating and one-mill building taxes levied countywide for separate minority schools. Adopted at special election April 5, 1955.

*Title 70, Ch. A*—Retained definition of "separate school district" in school code but provided for support of both white and Negro schools and for pupil transfers by race.

*Title 70, Ch. A6*—Authorized schools on military reservations to conform with federal requirements.

**1963**

*SB 175*—Ordered Oklahoma Public Welfare Commission to transfer to the three state schools for mentally retarded, by July 1, 1964, the mentally retarded Negroes now at Taft State Hospital.

*SB 273*—Created state human rights commission, and prohibited discrimination in any state agency or department.

# SOUTH CAROLINA

## Elementary and High Schools

108 Districts: 108 With Negroes and Whites; One Desegregated

| | White | Negro | Total |
|---|---|---|---|
| Enrollment | 368,496 | 258,955 | 627,451 |
| Teachers* | 13,495 | 8,390 | 21,885 |

*Total official; racial breakdown estimated.

## Colleges and Universities

Two Desegregated

| | Predominantly White | Predominantly Negro | Total |
|---|---|---|---|
| Institutions | 5 | 1 | 6 |
| Enrollment | 16,753 | 2,440 | 19,193 |

## Status of Segregation-Desegregation

### PUBLIC SCHOOLS

Only one school district in South Carolina—Charleston County School District 20—has desegregated, beginning in September, 1963. Ten Negro children attend four previously all-white schools by court order. The district is under federal court order to desegregate completely in September, 1964. In the 1962-63 school term, the district had 3,108 white students and 9,539 Negro students. In addition, four schools operated by the federal government for children of military personnel (two at Marine installations near Beaufort, one at Myrtle Beach AFB, and one at Fort Jackson near Columbia) are desegregated. Clarendon County remains under federal court order to desegregate, dating from the Supreme Court's ruling of 1954.

### TEACHERS

Teaching staffs at all public schools remain segregated. The four schools maintained by the federal government noted above have desegregated faculties.

### HIGHER EDUCATION

Two of South Carolina's six institutions of higher learning desegregated by court order during 1963; the others, three all white and one all Negro, remain segregated. Clemson College became the state's first biracial public college in the 20th century when it admitted Harvey Gantt peacefully but under court order in January (*Gantt v. Clemson*). A federal court ordered the University of South Carolina to enroll Henri Monteith for its term beginning in September (*Monteith v. University of South Carolina*). The school admitted her and two other Negroes and another Negro joined Gantt at Clemson. Enrollment figures for 1963-64 are:

| Predominantly White Colleges | Enrollment White | Enrollment Negro | Date Deseg. |
|---|---|---|---|
| The Citadel | 1,980 | 0 | |
| Clemson | 4,374 | 2 | 1963-C |
| Medical College of S.C. | 635 | 0 | |
| Univ. of S.C. | 7,524 | 4 | 1963-C |
| Winthrop | 2,240 | 0 | |
| TOTAL | 16,753 | 6 | |
| Predominantly Negro Colleges | | | |
| S.C. State | 0 | 2,434 | |
| STATE TOTALS | 16,753 | 2,440 | |

### FACULTIES

Faculties at all state-supported institutions are segregated.

### SPECIAL SCHOOLS

The South Carolina Commission on Technical Education permitted its centers to operate on a local option basis in regard to race. The Richland Center (Columbia) opened in September, 1963, with nine Negroes; Greenville has eight for the 1963-64 term; and Tri-County (Pendleton) admitted three Negroes when it opened in September, 1963. Between 400 and 500 Negroes and approximately 4,000 whites were rejected at all centers because they failed to qualify. All other special schools in the state remain segregated.

### ETHNIC GROUPS

With the beginning of the 1961-62 school term, Sumter County school officials closed the last separate school operated for "Turk" children of the Dalzell Community. These dark-complexioned youngsters are part of an ethnic enclave said to comprise descendants of Turks and others of Mediterranean extraction who settled here after service with Gen. Thomas Sumter in the American Revolution. The Turks have been listed as "whites" in marriage ceremonies, military service and otherwise, but had been provided separate schools. Turks have been admitted to the Hillcrest High School for whites since 1951, and now are scattered throughout the white schools of the district and county without distinction.

### LITIGATION (12)

*Briggs v. Elliott*

Harry Briggs Jr. and 45 other Negro elementary and high school students filed suit in U.S. District Court for the Eastern District of South Carolina in December, 1950, to enjoin enforcement of provisions in the state constitution and statutory code that required segregation of Negroes and whites in public schools. A three-judge district court convened in 1951 denied the requested relief. The court found that the Negro schools were inferior to the white school and ordered the defendants to begin immediately to equalize the facilities. The court sustained the validity of the contested provisions and denied the plaintiffs admission to the white schools during the equalization program. Subsequent developments were:

Jan. 28, 1952—The U.S. Supreme Court vacated the lower court decision and remanded it to obtain the District Court's views on a report filed by the defendants on the progress in the equalization program. March, 1952—The District Court considered the reports on the Clarendon County equalization program and found them "to be true and correct." The court praised the school board for having "proceeded promptly in good faith to comply with the court's decree." The court denied an injunction abolishing segregation.

May 17, 1954—The U.S. Supreme Court decided the case along with other segregation cases from Delaware, Kansas, Virginia and the District of Columbia. The court ruled in *Brown v. Topeka* that "separate educational facilities are inherently unequal" and that the Negroes were "deprived of equal protection of the laws guaranteed by the 14th Amendment."

May 31, 1955—The Supreme Court issued an implementing decision in the cases, ordering compliance with its earlier decision "with all deliberate speed." The justices remanded the cases to the respective lower courts.

July 15, 1955—A three-judge U.S. District Court of the Eastern District, South Carolina, set aside its previous decision and declared null and void all South Carolina laws requiring segregation in public schools. In accordance with the "all deliberate speed" decision of the Supreme Court, the court restrained

the defendants from refusing admission to school on account of race. In its decision, the district court said the Supreme Court "has not decided that the states must mix persons of different races in the schools. . . . What it has decided, and all that it has decided, is that a state may not deny to any person on account of race the right to attend any school that it maintains. . . . The Constitution, in other words, does not require integration. It merely forbids discrimination. . . ." The court retained jurisdiction.

*Brown v. School District 20 of Charleston County*

Filed in U.S. District Court on May 28, 1962, by parents of 13 Negro children seeking desegregation of the schools. The complaint claimed that the plaintiffs had exhausted all administrative remedies under the state placement law. On Aug. 22, 1963, District Judge J. Robert Martin ordered the district to admit 11 of the plaintiffs to its white schools in September, 1963. The two other plaintiffs had moved from the district. In addition, the court ordered the district to desegregate completely in September, 1964. The district desegregated but filed notice of appeal.

*Brunson et al v. Board of Trustees of School District No. 1 of Clarendon County*

Filed in Eastern District, U.S. Court, in April, 1960, by 42 Negro petitioners seeking desegregation of white schools. (Issues essentially the same as original *Briggs v. Elliott* suit but with different set of plaintiffs). U.S. District Judge C. C. Wyche ruled on May 31, 1962, that the case could not be brought as a class action. Wyche ordered all stricken from the caption except the first, Bobby Brunson. The U.S. Fourth Circuit Court of Appeals overruled the lower court on Dec. 7, 1962, and returned the case to the district court for trial on its merits. On May 27, 1963, the U.S. Supreme Court refused to review.

*Bryan et al v. Austin et al*

Filed in Eastern District, U.S. Court, September, 1956, by Negro teachers of Elloree, in Orangeburg County, who had refused to execute questionnaires concerning NAACP membership and had not been rehired thereafter. Plaintiffs were directed by three-judge federal court in January, 1957, to proceed through state courts before seeking federal court relief. Case became moot in June, 1957, after South Carolina legislature repealed *Act 741* of 1956, which had required statement of NAACP membership.

*Byrd et al v. Gary et al*

Filed in Eastern District, U.S. Court, in April, 1960, by Negro high school students of Mayo High School at Darlington, charging the Negro school principal with depriving them of their civil rights. The federal suit was filed after a similar suit in State Court was dismissed on grounds that administrative remedies had not been exhausted. The dismissal was appealed to the State Supreme Court, which in November affirmed the lower court action. The federal court case still is pending. The plaintiffs' attorney has died and this case is not expected to be pressed because of other desegregation litigation in the county. (See *Stanley v. Darlington School District 1*)

*Gantt v. Clemson Agricultural College of S.C. et al*

Filed in U.S. District Court on July 9, 1962, for Harvey B. Gantt. The suit asked admission for Gantt and "other qualified Negro residents." U.S. District Judge C. C. Wyche denied a temporary injunction for admission on Sept. 7, 1962, and the U.S. Fourth Circuit Court of Appeals affirmed this on Oct. 5, 1962, but requested a prompt trial. Judge Wyche on Dec. 21, 1962, dismissed the suit on the grounds that Gantt had not completed admission requirements. The circuit court over-ruled Judge Wyche on Jan. 16, 1963. Clemson asked both the Fourth Circuit and the U.S. Supreme Court for a stay pending appeal. On Jan. 21, both denied the request, Gantt entered Clemson Jan. 28, 1963. Clemson then appealed the class action aspects of the case to the U.S. Supreme Court, which on Oct. 14, 1963, upheld the right of all qualified Negroes to enter the college.

*Hood et al v. Board of Trustees of Sumter County School District No. 2 et al*

Filed in Eastern District, U.S. Court, August, 1953, by ethnic group of Sumter County known as "Turks," seeking injunction against the denial of their children's admission to certain white schools. Case moved back and forth between district and circuit courts until February, 1961, when school authorities announced decision to admit complainants to white schools, effective with beginning of next school year. On Oct. 17, 1961, U.S. Fourth Circuit Court of Appeals reaffirmed Turks' right to attend white schools.

*Johnson et al v. Marion County Board of Education*

Filed in Eastern District, U.S. Court, in September, 1960, by parents of Negro students in Marion County who contend they were denied the transfer privileges granted white students of the same school area. Suit did not seek desegregation as such but asked that Negroes be accorded same privileges to attend other (Negro) schools as were granted white students to attend other white schools. Hearing not yet held.

*Montieth v. University of South Carolina et al*

Filed in U.S. District Court on Oct. 31, 1962, on behalf of a Negro girl seeking to enter the university. District Judge J. Robert Martin on July 10, 1963, ruled in favor of Miss Monteith and others similarly situated. The university served notice of appeal on Aug. 19, but Miss Monteith and three other Negroes enrolled, in September, 1963.

*Randall et al v. Sumter School District No. 2 et al*

Filed Sept. 16, 1963, in U.S. District Court by 14 Negro servicemen asking that their 30 children and other Negroes be admitted to schools in the district, which includes Shaw AFB.

*Stanley et al v. Darlington County School District No. 1*

Filed in U.S. District Court on May 29, 1962, by the father of five Negro children. The complaint was similar to *Brown v. School District 20 in Charleston County.*

*Whittenberg v. School District of Greenville County et al*

Filed in U.S. District Court on Aug. 19, 1963, by the father of an 11-year-old Negro girl, seeking desegregation of the district's schools.

## LEGISLATION (34)

### 1951

*S-371*—Concurrent Resolution created a committee "to study and report on the advisable course to be pursued by the State in respect to its educational facilities in the event that the Federal Courts nullify the provisions of the State Constitution requiring the establishment of separate schools for the children of the white and colored races."

### 1952

*Act 902*—Joint Resolution proposed the repeal of the constitutional requirement that the General Assembly provide a public school system.

### 1954

*Act 653*—Ratified constitutional amendment repealing requirement for public school system.

### 1955

*Act 52*—Allowed "visiting teachers" to use persuasion in promoting school attendance upon repeal of com-

pulsory attendance law.

*Act 55*—Strengthened authority of school officials on assignments.

*Act 56*—Repealed school board authorization to set school term length.

*Act 57*—Repealed compulsory attendance law.

*Act 58*—Established regulations for transfers of pupils within and between counties.

*Act 59*—Authorized sale or lease of public school public buildings.

*Act 234 (Part II, Sec. 2)*—Denied public funds to any school involved in transfer of student pursuant to court order.

*Act 295*—Repealed law on continuing contracts for teachers.

**1956**

*Act 662*—Established revised procedural rules for appeals from local school board decisions on local controversies or pupil placement.

*Act 676*—Vested boards of school trustees with general rule-making power and the right to designate board members to hold hearings.

*Act 677*—Vested county boards of education with general rule-making power and the right to designate board members to hold hearings.

*Act 712*—Provided basis for law enforcement officers to transfer students, upon request of school authorities, to prevent civil commotion and disturbance of the peace.

*Act 741*—Barred the employment, by school districts and other public agencies, of members of the NAACP. Repealed by *Act 233* of 1957. Also contested in *Bryan v. Austin*.

*Act 813*—Specified in state appropriations act that appropriations for education be "for racially segregated schools only."

*Act 914*—Condemned and protested usurpation and encroachment on the reserved powers of the states by the U.S. Supreme Court (interposition).

*Act 920*—Created a committee to investigate NAACP activities at State College (for Negroes) at Orangeburg.

*Act 927*—Continued indefinitely and enlarged scope of special Committee created in 1951 to study advisable course to be followed in event of adverse federal court decisions concerning racial separation in public schools.

**1957**

*Act 25*—Prohibited barratry.

*Act 172*—Required the licensing of persons soliciting Abbeville County residents for membership in dues-collecting organizations.

*Act 223*—Required applicants for school and other public jobs to list membership in associations and organizations. Repealed *Act 741* of 1956.

*Act 233*—Required the licensing of persons soliciting Florence County residents for membership in dues-collecting organizations. Exception allowed by *Act 433*.

*Act 349*—Conferred additional powers upon the governor for maintenance of public peace and suppression of violence.

*Act 406*—Required the licensing of persons soliciting McCormick County residents for membership in dues-collecting organizations.

*Act 433*—Waived provisions of *Act 233* (above) with respect to organizations under Railway Labor Act.

*Act 442*—Required the licensing of persons soliciting Kershaw County residents for membership in dues-collecting organizations.

**1958**

*Act 893*—Authorized attorney general to investigate records of foreign and domestic nonprofit corporations operating within the state.

**1959**

*Act 216*—Made it a felony to bomb any church, school, private residence or other building or to communicate threats or false information relating thereto.

**1960**

*Act 802*—Grouped into one section of State Appropriations Act requirements that appropriations for schools and state parks be "on a racially segregated basis only."

*HB 2214, bearing Ratification Number 1142*—Repealed Sec. 91 of Part 1 of General Appropriations Act cited above (*Act 802*) relating to appropriations on "racially segregated basis only." The repealing act was vetoed by Gov. E. F. Hollings at opening of 1961 session, but has not been acted on by the General Assembly.

**1961**

*H-1004*—Concurrent Resolution sought amendment to the U.S. Constitution for invalidating Supreme Court decisions that transfer state powers to the federal government.

**1962**

No acts or resolutions relating to segregation-desegregation in the public schools were passed by the 1962 session of the General Assembly. However, the State Appropriations Act, (*Act 749*) for the second consecutive year, did not contain the "on a racially segregated basis only" clause in sections dealing with public schools and parks. (See *Act 802* of 1960 above.) Some legal authorities in the state believed the deletion had the effect of abrogating Section 22-3 of the 1962 S.C. Code. This section states that since appropriations to state institutions of higher learning are made on "a racially segregated basis," they must close in the event of court-ordered desegregation. The legal authorities felt that since the premise of the law—namely that appropriations are made on a racially segregated basis—was no longer true, then the rest of the law would fall under its own weight.

**1963**

*Act 297*—Provided state scholarship grants to students desiring to attend private, non-sectarian elementary and secondary schools, required that local school district supplement the grants in the amount each district adds to the state's per pupil allotment to the public schools, and gave the State Board of Education power and duty to make rules and establish standards for private schools that accept students under the program.

The State Appropriations Act of 1963 for the third straight year did not contain the clause requiring school appropriations to be made "on a racially segregated basis only." (See 1962 note). In addition some legal authorities think that *Section 89* of the act, which provides that no institution for which the General Assembly has provided shall be discontinued, has the effect of nullifying Sections 22-3 and 21-2 of the 1962 S.C. Code. These sections require the closing of colleges and public schools in the event of court-ordered desegregation. The language of Section 89 has been included in the money measure for many years.

## Status of Segregation-Desegregation

### PUBLIC SCHOOLS

Tennessee has 44 desegregated school districts, but three are desegregated in policy only. The desegregated districts have an estimated 374,621 whites and 119,547 Negroes enrolled. A total of 4,466 Negroes attend classes with whites in 143 schools. Oak Ridge in 1955 became the first Tennessee district to desegregate. Then under federal control, the system voluntarily desegregated all grades. Clinton High School in Anderson County, under a 1956 federal court order, was the first state-supported school in Tennessee to begin biracial classes. Federal court desegregation cases are pending against two districts, Franklin County and Madison County, which have no desegregation. Districts desegregated in policy only are Elizabethton, which voluntarily began a grade-a-year plan in 1961; Humboldt, which adopted a plan to desegregate the first three grades in the fall of 1963; and Watertown, desegregated in 1962 under federal court order. The desegregated districts are:

| District | Enrollment* White | Enrollment* Negro | Negroes w/Whites | Brch. Schs. | Grds. | Date Deseg. |
|---|---|---|---|---|---|---|
| Anderson Co. | 7,890 | 110 | 44 | 2 | 9-12 | 1956-C |

*Estimated. In some instances, no records are kept by race.

**Includes 393 Negroes enrolled with seven white students at Davenport School and 852 Negroes enrolled with 11 white students at East Fifth Street School, both in the Chattanooga District.

†Separate district that serves Clarksville and Montgomery County.

### TEACHERS

Putnam County has five Negro teachers assigned to all-white and predominantly-white classes. Oak Ridge, which has employed Negro teachers in predominantly white schools for several years, has four white teachers and staff members in the 16-teacher Scarborough Elementary School, an all-Negro school because of residential factors. Three Negro teachers lost their jobs when Humphreys County consolidated a white and Negro high school during desegregation in 1962. School officials reported that no action had been taken in connection with Negro teachers previously assigned to Swift Academy, condemned and closed at the beginning of this year, in Hawkins County which with the Rogersville district admitted former Swift students to biracial classes as they desegregated all grades. One former Swift teacher was transferred to another Negro school, while two of the remaining eight took jobs outside the district. All other regular classroom teaching staffs are segregated. There have been no reports of other Negro teachers losing their positions because of desegregation.

### HIGHER EDUCATION

All seven state-supported colleges and universities have desegregated; however, one college, Tennessee Polytechnic Institute at Cookeville, has no Negro students. The University of Tennessee was the first institution of higher learning to desegregate, admitting Negroes to graduate, professional and special levels under federal court order in 1952. Desegregation at two of the other six colleges and universities, which are governed by the State Board of Education, began in 1956 under a gradual desegregation plan later rejected by the U.S. Sixth Circuit Court of Appeals. In 1957, the State Board of Education adopted a policy that removed race as a factor in admissions. The state's colleges and universities are:

| | Enrollment White | Enrollment Negro | Date Deseg. |
|---|---|---|---|
| **Predominantly White** | | | |
| Austin Peay State | 2,009 | 58* | 1956-V |

| Tenn. A & I University†† | 3* | 4,237 | 1956-V |
| STATE TOTALS | 40,229 | 4,640 | |

*Estimated.
**Represents an estimated minimum number of Negroes attending, based on last year's figures. Officials said, however, they believed the number was "slightly" higher this fall, but declined to make new estimate.
†Includes three centers at Tullahoma, Memphis, Oak Ridge.
††A & I officials estimated about 15 to 20 non-Negroes from foreign countries also are enrolled.

### FACULTIES

Tennessee A & I University at Nashville has two full-time white instructors and five part-time, white instructors in engineering and related courses. There has been no report of any Negro teacher losing his job as a result of desegregation.

## SPECIAL SCHOOLS

The Tennessee School for the Blind near Nashville, one of the state's four special schools, began desegregation in 1962 and now has two Negro first-grade students. The Tennessee Youth Center at Joelton, a state corrections facility for training young law offenders, is operated on a biracial basis. Some state-supported vocational programs, including training for practical nurses, also are desegregated. Nashville, Chattanooga and Knoxville districts have desegregated some of their special programs, such as those for the educable mentally retarded, speech and hearing, and cerebral palsy. Nashville also began a pilot kindergarten program in 1962 with some whites and Negroes attending classes together.

## ETHNIC GROUPS

Tennessee has no desegregation programs involving students other than Negroes. State education officials said some non-whites have been admitted for several years in the colleges and universities.

## LITIGATION (17)

*Charles W. Baker et al v. Joe C. Carr, Secretary of State, State of Tennessee et al*

The case, filed in 1959 in U.S. District Court at Nashville, resulted in a court injunction in 1959 against segregation at John Coleman School at Smyrna. The court denied a petition by the Negro plaintiff to apply permanent injunction to all Rutherford County schools because the schools were not yet at issue. The case was held open by the court.

*Booker v. State Board of Education*

Filed in May, 1955, in U.S. District Court at Memphis, the suit sought admission of five Negro students to Memphis State University in a case that became precedent for other state colleges and universities. The State Board of Education submitted a five-year gradual desegregation plan to have begun at the graduate level in 1956-57 for the six colleges and universities under the board's jurisdiction. The U.S. Sixth Circuit Court of Appeals in 1957 refused to review the appellate court's action. A policy removing race as a factor in admissions was adopted by the State Board of Education in 1957 to become effective in the fall of 1958. The board granted Memphis State a one-year delay in desegregation and the U.S. District Court ruled that no further decision was necessary since the institution had been instructed to desegregate in the fall of 1959.

*Carethers et al v. Humphreys County Board of Education*

The suit was filed in October, 1961, in U.S. District Court at Nashville, seeking the admission of nine Negro children to all-white schools. As Judge William E. Miller began a hearing in the case on Oct. 18, the school board submitted a plan to desegregate grades one through five in January, 1962 with an additional grade to be desegregated each year thereafter. Later in the hearing, however, the board presented orally a revised plan calling for desegregation of the first five grades in January, 1962, with the remainder of the grades to be desegregated by August, 1965. Negro counsel objected to the plan and Judge Miller asked the board to present its proposal in writing. On Dec. 21, 1961, Judge Miller ordered the first five grades desegregated in January, 1962, with all other grades to be desegregated in September, 1962. He reserved decision on the teacher desegregation issue.

*Goss et al v. Knoxville Board of Education*

Filed in January, 1957, the suit sought desegregation of Knoxville city schools. U.S. District Court at Knoxville in 1960 approved a grade-a-year desegregation plan to begin in the fall of 1960. The court also ordered a supplementary plan for biracial vocational high school students and, after hearings in 1961, approved a plan by the board for Negro vocational high school students to attend previously all-white classes beginning in the fall of 1961. The U.S. Sixth Circuit Court of Appeals in April, 1962, struck down the grade-a-year plan and ordered a new plan to speed desegregation, but upheld the pupil transfer provisions also under attack by Negro lawyers. The school board filed an amended plan calling for desegregation in the third and fourth grades in September, 1962, and the plan was placed into effect pending a hearing in U.S. District Court. The U.S. Sixth Circuit Court of Appeals on April 3, 1962, held that the board's supplementary plan for vocational students was "too complicated" and directed U.S. District Judge Robert L. Taylor to require an amendment. On June 3, 1963, the U.S. Supreme Court struck down the pupil transfer provisions because they allowed students to transfer from schools where their race was in the minority. The transfer provisions had been incorporated into numerous desegregation plans in Tennessee and the South. While the pupil transfer issue was pending before the Supreme Court, Judge Taylor approved a new plan by the board to desegregate the fifth and sixth grades in September, 1963. The court also ordered the board to file a plan simplifying provisions under which Negroes could transfer to vocational high school classes and instructed the board to make distributive education classes available to Negroes. Negro attorneys, however, appealed Judge Taylor's approval of the accelerated plan to the U.S. Sixth Circuit Court of Appeals, where additional hearings were pending.

*Gray v. University of Tennessee*

U.S. District Court held that the plaintiff was entitled to admission to the university but refused to order an injunction, expressing the belief that university authorities would comply. The U.S. Supreme Court dismissed the case as moot in March, 1952, because the plaintiff already had been accepted as a student.

*Hill et al v. Franklin County Board of Education*

Filed July 3, 1963, in U.S. District Court by four white and four Negro families—the first Tennessee case in which plaintiffs included members of both races. District Judge Charles Neese on Oct. 1, 1963, ordered the school board to present a desegregation plan no later than Oct. 31, but rejected an application by plaintiffs for a preliminary injunction. On Oct. 31, 1963, the board filed a plan proposing to begin desegregation of students, teaching staff and other personnel along with transportation facilities at the beginning of the 1964-65 school year. Unique in Tennessee, the proposed plan establishes a timetable for beginning biracial classes in each of eight geographical zones in the district. Hearing on the merits of the plan was pending.

*Kelly et al v. Nashville Board of Education*

The suit was filed in 1955 in behalf of 21 Negroes seeking admission to previously all-white classes. U.S. District Court at Nashville in 1957 approved a grade-a-year desegregation plan, which has served as a model in many other cities. Court declared *Act 10* of 1957 unconstitutional. U.S. Sixth Circuit Court of Appeals upheld the Nashville plan in 1959 after it was appealed by the Negro plaintiffs and the U.S. Supreme Court later in 1959, by a six to three vote, declined to review the case.

*Mapp et al v. Chattanooga Board of Education*

Seeking admission of Negro students to previously all-white schools, the suit was filed in 1960. U.S. District Court at Chattanooga in 1960 granted summary judgment and ordered the board to present a desegregation plan by December, 1960. The court ruled that the board's subsequent plan, which provided for desegregation in "selected" schools, was unacceptable but did not reject the plan outright. The court's rulings on the summary judgment and the proposed plan were appealed by the board to the U.S. Sixth Circuit Court of Appeals, which in 1961 upheld the rulings of the District Court and

remanded the case to it to work out a final plan for desegregation. On March 1, 1962, U.S. District Judge Frank Wilson ordered the board to desegregate the first three grades in 16 designated schools in September, 1962, and to follow a stairstep plan to include all grades by 1968. Judge Wilson also struck down transfer and admission provisions from an alternate desegregation plan, which had been filed by the school board at the court's instructions while the original plan was being appealed. While no delay in the desegregation plan was requested, both the school board and Negro plaintiffs in 1962 appealed phases of Judge Wilson's ruling to the U.S. Sixth Circuit Court of Appeals. On July 8, 1963, the appeals court affirmed Wilson's ruling but left unresolved the question of assignment of teachers and principals on a non-racial basis. On another issue raised by the plaintiffs, the court said the school board was not obligated to provide "every technical course available" to Negro high school students until gradual desegregation reached their grades. The district court on Sept. 9, 1963, ordered the school board to file a desegregation plan for vocational and technical courses. The board submitted a plan for desegregation of adult classes in December, 1963, and high school technical courses in the fall of 1964 on a limited basis, which was approved by Judge Wilson Nov. 15, 1963. Judge Wilson took under advisement the teacher desegregation issue.

*Maxwell v. Board of Education of Davidson County*

Filed in September, 1960 in U.S. District Court at Nashville, the suit asked desegregation of the school system. U.S. District Court in 1960 ordered the first four grades desegregated in January, 1961, with one additional grade desegregated each fall thereafter. The court refused to rule on the desegregation of teaching and supervisory staffs but held the case open. On April 5, 1962, U.S. Sixth Circuit Court of Appeals upheld the District Court's action. On June 3, 1963, the Supreme Court struck down the pupil transfer provisions, which allowed students to transfer from schools where their race was in the minority.

*McSwain et al v. Anderson County Board of Education*

Filed in behalf of 12 Negro students in 1952, U.S. District Court at Knoxville in 1956 ordered Clinton High School desegregated and enjoined interference by John Kasper and others.

*Monroe et al v. Board of Commissioners of the City of Jackson and the Madison County Board of Education et al*

Filed in 1963 by Negro plaintiffs who sought a temporary injunction and also asked desegregation of both the Jackson and Madison County districts. U.S. District Judge Bailey Brown in January, 1963, ordered the admission of four additional Negroes to biracial schools in Jackson, which had begun desegregation voluntarily during 1961-62. On June 2, 1963, Judge Brown ruled that the county school board could not submit the question of desegregation to a jury trial, as proposed by one board member, Taylor Robinson. The court ordered both school boards to submit plans for school desegregation. Judge Brown set July 20, 1963, as the deadline for the Jackson Board of Commissioners, which also serves as the school board, to submit its plan, and directed that the county board's plan be filed no later than July 15, 1963. Both boards complied with the order, proposing gradual desegregation plans, which called for desegregation of the first three grades in September, 1963. U.S. Sixth Circuit Court of Appeals Judge Paul C. Weick, however, issued a stay order on Robinson's appeal of Brown's ruling on the jury trial issue and further proceedings on the county board's portion of the suit was delayed. The Court of Appeals later rejected Robinson's petition for a writ of mandamus and the board member applied to the U.S. Supreme Court for a hearing on the issue. This question is pending before the Supreme Court. On Aug. 12, 1963, Judge Brown approved the Jackson board's desegregation plan. Negro plaintiffs who objected to transfer provisions included in the plan, filed an appeal with the Sixth Circuit, where a date for arguments on Brown's approval of the plan is pending.

*Northcross et al v. City of Memphis Board of Education*

Seeking desegregation of the Memphis city school system, the suit was filed in U.S. District Court at Memphis in 1960. In April, 1961, U.S. District Judge Marion S. Boyd at Memphis ruled that the board had announced its desire to integrate Memphis schools through compliance with the state pupil assignment law. Boyd rejected a Negro plea for immediate desegregation of the entire system. In October, 1961, 13 Negro first-graders were admitted to four previously all-white schools under provisions of the pupil assignment law. The U.S. Sixth Circuit Court of Appeals ruled on March 23, 1962, that the assignment law could not serve as a desegregation plan and returned the case to District Court. The U.S. Supreme Court refused to review the appeals court decision. Judge Boyd on July 16, 1962, ordered a new plan which the board submitted that August. The plan, placed in effect pending a hearing on Dec. 3, 1962, provided for biracial classes in the first three grades. On March 29, 1963, Boyd refused to order faculty desegregation, but on May 24, 1963, he approved the student desegregation plan. He rejected an NAACP plan for desegregation of all grades by 1965. An appeal by the Negro plaintiffs is pending before the U.S. Sixth Circuit Court of Appeals.

*Robinson et al v. Shelby County Board of Education et al*

Filed June 12, 1963, in behalf of 21 Negro students, the NAACP asked desegregation of the school system and teaching staff. U.S. District Judge Marion S. Boyd refused on Aug. 30, 1963, a board request to dismiss the suit, but he removed Shelby County Court and Shelby County Commission members who also had been named defendants, as parties in the suit. On the same day, the board filed a plan to desegregate all 12 grades beginning in the fall, 1964, providing for transfers of Negro students to biracial classes in the vicinity of segregated schools to which they are assigned. A hearing on the plan is pending.

*Roy et al v. Brittain et al*

The State Supreme Court upheld in 1956 Chancery Court's denial of an injunction to forbid admission of Negroes to Clinton High School despite U.S. District Court's order in *McSwain et al v. Anderson County Board of Education*. State tribunal held invalid Tennessee's constitutional provision and statutes requiring segregation of state-financed schools.

*Sloan et al v. Wilson County Board of Education et al*

The suit originally was filed in 1961 in behalf of two Negro children "and others similarly situated," seeking their admission to McClain Elementary School at Lebanon. U.S. District Court at Nashville on Sept. 12, 1961, directed that the 10th Special School District enroll three students immediately at the previously all-white elementary school. Judge William E. Miller also ordered the 10th Special School District board, the 16th Special School District board and the Wilson County Board of Education to submit a plan for desegregation. On Oct. 23, 1961, Miller ordered complete desegregation of all public schools in Lebanon and Wilson County, effective in January, 1962. The judge rejected a joint proposal by the three boards, which govern separate school systems within the boundaries of Wilson County, to end segregation under the 1957 state pupil assignment law and declared that the law in itself is not a plan for desegregation. Miller ruled that the law could be placed in effect to transfer students from one school to another once desegregation has been accomplished. The case was the first in Tennessee against more than one school board and resulted in the first order calling for desegregation of grades 1-12 at the same time in any Tennessee school system. Miller reserved judgment on a Negro request for the desegregation of the teaching staffs. On Sept.

19, 1963, Miller ordered 12 Negroes transferred to three previously all-white schools ,and ordered a new desegregation plan submitted by May 1, 1964.

*Vick v. Obion County Board of Education*

Asking admission of three Negro students to all-white high school classes, the suit was filed in October, 1961. Two weeks later, the school board asked the U.S. District Court at Jackson to accept a grade-a-year desegregation plan to begin in the fall of 1962 and requested Judge Bailey Brown to deny a temporary injunction and a Negro request for biracial teaching assignments. On Dec. 15, 1961, Judge Brown ordered desegregation of all grades beginning in September, 1962, and instructed the board to file a new plan. On May 11, 1962, the board's revised plan calling for biracial classes in all grades and including "freedom of choice" provisions was approved by Brown and placed into effect in August, 1962.

*Ward et al v. Knoxville Board of Education*

U.S. District Court at Knoxville in 1956 dismissed the suit on technical grounds. It had sought the desegregation of Knoxville city schools.

**LEGISLATION (13)**

**1957**

*HR 1, SR 3*—Protested encroachment of states' rights, and urged amending constitution to allow desegregated schools.

*HR 9*—Condemned Supreme Court decision.

*Ch. 9*—Facilitated transfers of pupils between districts.

*Ch. 10*—Allowed bus transportation for children to nearest school of their race.

*Ch. 11*—Permitted voluntary segregation. (U.S. District Court in 1957 declared the law unconstitutional in *Kelley v. Nashville Board of Education.*)

*Ch. 12*—Authorized consolidated schools to serve two or more districts.

*Ch. 13*—Established pupil assignment. (U.S. District Court at Memphis in 1961 ruled that the Memphis Board of Education had adopted a policy of desegregation through compliance with the law in *Northcross et al v. City of Memphis Board of Education.* U.S. Sixth Circuit Court of Appeals in 1962 reversed the ruling and held that the assignment law was inadequate as a desegregation plan. In *Sloan et al v. Wilson County Board of Education et al,* U.S. District Court at Nashville held that the law in itself did not constitute a plan for desegregation but that it could be used for the transfer of students once desegregation had been accomplished.)

*Ch. 98*—Permitted segregation by sex.

*Ch. 104*—Redefined barratry.

*Ch. 151*—Required registration for racial organizations.

*Ch. 152*—Required information on solicitors for litigation.

**1959**

*Ch. 289*—Made local school boards responsible for enforcing compulsory attendance; permitted parents to withdraw children from school for any good and substantial reason, with school board consent, and to enroll them elsewhere within 30 days.

## Status of Segregation-Desegregation

### PUBLIC SCHOOLS

Texas has 244 desegregated districts, but several have no actual mixing of races due to lack of applicants for the grades involved. Desegregation in the public schools began in 1953 at Friona, in West Texas, before the U.S. Supreme Court decision. In 1954 Texas courts held that the state constitution's requirement for segregation in public schools was void. More than 100 public schools desegregated by board action before the Texas legislature in 1957 required referendum approval for districts to desegregate with loss of state funds as the penalty (*Ch.* 283). This slowed desegregation. In December, 1962, then Attorney General Will Wilson declared this act unconstitutional. This resulted in a large increase in desegregation, including 61 districts starting in September, 1963. A few of these did so by court order but most were voluntary. About 1,290,000 white and 186,000 Negro pupils reside in districts that have desegregated wholly or in part. About 14,000 Negroes actually attend class with white pupils in the public schools. This is a considerable increase since 1962, but it also includes a gain through calculating the number of Negroes where non-Negroes have enrolled at former all-Negro schools. In cities with large Latin-American populations, such as El Paso and San Antonio, this desegregation of former Negro schools has been substantial. In other places, the great majority of Negroes still attend schools only for members of their race, by choice, by zoning or by "stairstep" plans. For example, 227 of Houston's 55,000 Negro students are in desegregated elementary classes, under the grade-a-year program. A federal court has under advisement a Negro request to speed up the process. Dallas' three-year-old desegregation program resulted in 182 of its 31,000 Negroes attending class with whites. Fort Worth desegregated by court order in September, 1963, after lengthy litigation, and 20 of its 15,330 Negro students enrolled with whites in the first grade. The year 1963 saw desegregation extended into "Deep East Texas," where most of the state's Negroes live. Longview acted by court order and saw seven of its 2,800 Negroes enroll in desegregated schools. Nearby Tyler, desegregating by board order, had two Negroes enroll in the first grade with white pupils, but one of the Negroes dropped out. The district has 3,550 Negro students. Several Texas school systems have announced plans to abandon segregation in September, 1964: These include Brazosport, Marlin, Marshall, Mesquite, Taylor, Lewisville, Lockhart, McKinney, and Orange, all voluntary. Desegregated districts by counties follow:

**Andrews County**
- Andrews

**Aransas County**
- Aransas ISD (Rockport)

## TEACHERS

Although desegregation has abolished a number of Negro teaching jobs in Texas, rising enrollment of whites and Negroes has resulted in increasing employment for teachers of both races. A surplus of Negro teachers exists, but is said to be somewhat less than three or four years ago, when 1,000 or more were reported unable to find positions as teachers. A Negro teacher association official said that all those displaced by desegregation have been able to find teaching jobs elsewhere. Some districts with large Latin-American populations are employing Negroes to teach in formerly non-Negro schools. El Paso has seven teachers in this situation; San Antonio, five; and Odessa, four. Others doubtless are unreported. Mostly, the teachers came from formerly segregated classrooms in the same school systems. School superintendents report that the quality of available Negro teachers is improving. Many experienced Negro teachers went back to college after being displaced by desegregation. Others are graduates of desegregated, formerly all-white universities. The Teachers State Association of Texas (Negro) has requested the Texas State Association (white) to discuss merger of their two organizations. The white group referred the question to its executive committee for further study in 1964. There is presently no mixing of races in the associations, although biracial faculty activity has increased on the local level. The minimum salary for public school teachers in Texas is $4,004 for nine months; the estimated pay for classroom teachers, $5,540.

## HIGHER EDUCATION

Of 54 tax-supported colleges in Texas, only 10 white and one Negro institution maintain segregation policies. The University of Texas was the first in the state to desegregate, admitting Heman Sweatt in 1950 by court order in *Sweatt v. Painter*. Prairie View A&M, the state's only college for Negroes, has announced willingness to accept white students but none has applied. Two state teachers colleges have desegregated by court order and four remain for whites only. John Tarleton College also is all-white but all other units of the Texas A&M system have dropped segregation policies. The University of Texas, which is in the Southwest Conference, announced in 1963 the desegregation of its varsity athletic programs, and Texas A&M University took the same action a short time later. Listed below are the total enrollments of the tax-supported colleges on Oct. 15, 1963, with estimated Negro enrollment. Under column "Date Desegregated" these symbols are used: S—retains segregation; V—voluntary desegregation; and C—court-ordered desegregation.

| Predominantly White Senior Colleges | Enrollment Total | Negro | Date Deseg. |

*Estimated.
**Under same board as West Texas State and Southwest Texas State, desegregated by court orders.
†Under Texas A&M board of directors; all other branches desegregated.
††St. Philip's is a branch of San Antonio College, formerly all-Negro.

**FACULTIES**

About one-fourth of Texas Southern University's faculty is white. Generally there has been no desegregation elsewhere in faculties of tax-supported colleges.

**SPECIAL SCHOOLS**

Desegregated special schools in Texas include Abilene State School (epileptics); Austin State School and Mexia State School (mentally retarded); Moody State Home (cerebral palsy); Bexar County Boys School; and Mountain View School for Boys, Coryell County. All these are accredited as independent school districts.

**ETHNIC GROUPS**

Enrollment of non-Negroes in formerly all-Negro schools in Texas is increasing, particularly in cities such as San Antonio, which have large numbers of Latin-Americans.

**LITIGATION (37)**

*Adams v. Longview ISD Board of Trustees*

Filed in state district court in September, 1962, to desegregate Longview ISD and have the state referendum law (*Ch. 283*) declared invalid. *(See Adams et al v. Matthews)*

*Adams et al v. Matthews*

Filed in U.S. District Court on Nov. 23, 1962, to desegregate Longview public schools. In June, 1963, U.S. District Judge Joe M. Sheehy ordered a desegregation plan submitted. The judge rejected a proposal for desegregation in 1964, and in August, 1963, ordered the grade-a-year plan begun in September, 1963. The board complied.

*Atkins v. Mathews*

Filed in 1955 in U.S. District Court, Eastern District of Texas. District judge ordered Negroes admitted to North Texas State College in December, 1955.

*Avery v. Wichita Falls ISD*

Suit filed in 1955 in U.S. District Court, Northern District of Tex. Application to desegregate Wichita Falls schools dismissed by district court. Fifth Circuit Court of Appeals reversed with order to desegregate.

*Barnes v. Calvert*

State District Court in 1955 denied injunction to halt use of funds for desegregated undergraduate education at The University of Texas.

*Battle v. Wichita Falls Junior College*

Suit filed in 1951 in U.S. District Court, Northern District at Wichita Falls, to desegregate municipal junior college (now Midwestern University). District judge ordered desegregation. U.S. Fifth Circuit Court of Appeals affirmed and U.S. Supreme Court denied certiorari.

*Bell v. Rippy (Boson v. Rippy)*

Filed in 1955 in U.S. District Court, Northern District of Texas. In 1960, U.S. District Judge and Fifth Circuit Court of Appeals ordered Dallas school desegregation to commence September, 1961, on grade-a-year pattern starting in first grade.

*Brown v. Hendrix*

Filed September, 1962 in U.S. District Court to desegregate Beaumont ISD, Jefferson County. Pending.

*Butler v. Wilemon*

Filed in 1949 in U.S. District Court, Northern District of Texas. The court ordered Waxahachie ISD to furnish substantially equal teaching facilities for Negroes as for whites.

*Carter v. Hix*

Filed in September, 1962, in U.S. District Court to desegregate Gatesville ISD. The plaintiffs were nine Negro students who refused transportation to another all-Negro school after their own school was closed. U.S. District Judge in March, 1963, ordered the schools desegregated ,and the district complied the following September.

*Cash v. Close City*

Filed in November, 1962, in state district court at Post, by white parents seeking to stop alleged discrimination in favor of Negroes on transfer policies. Pending.

*Dallas Independent School District v. J. W. Edgar*

Filed in U.S. District Court in 1958. Dismissed by district and circuit courts. Filed in State District Court in 1959. Dismissed by all state courts through Supreme Court on the holding that suits against the state cannot be maintained without consent of the legislature. The suit sought to test validity of *Ch. 283* of 1957 requiring referendum approval of desegregation, with loss of state school funds as the penalty.

*Eastland v. Wheat*

Filed in 1960 in U.S. District Court to desegregate Northeast Houston ISD. Grade-a-year plan for September, 1963, approved by agreement, but no Negroes enrolled.

*Evans et al v. Brooks*

Filed at Galveston in U.S. District Court, August 1961, to desegregate public schools at Texas City. U.S. District Judge James Noel on April 10, 1962, ordered desegregation begun in September, 1963, with three high school grades, adding a grade a year.

*Flax v. Potts*

Filed in 1959 in U.S. District Court to desegregate Fort Worth public schools. District Judge Leo Brewster on Dec. 14, 1961, ordered that desegregation begin by September, 1962, but appeals by the board delayed compliance. In February, 1963, the U.S. Fifth Circuit Court of Appeals refused to reverse the order. Judge Brewster in April, 1963, approved a grade-a-year plan, which began in September, 1963.

*Gibbs v. Point Isabel ISD*

U.S. District Court in September, 1962, ordered immediate desegregation. The district had just one Negro family, and no appeal was taken from the trial court decision.

*Jackson v. McDonald*

U.S. District Court in 1956 ordered Lamar State College of Technology desegregated.

*Jackson v. Rawdon*

Filed in 1955 in U.S. District Court, Northern District of Texas at Fort Worth, seeking desegregation of Mansfield, Tex., public schools. District judge denied injunction. U.S. Fifth Circuit Court of Appeals, in June, 1956, overruled and ordered admissions without regard to race.

*Kreger et al v. Board of Trustees, Georgetown ISD*

Filed in State District Court at Georgetown in July, 1962, to halt spending of bonds voted to build a new, separate school for Negroes. C. J. Kreger and other taxpayers called the expenditure improper in view of the U.S. Supreme Court opinions. The trustees won a temporary injunction against the group trying to stop issuance of the $525,000 in bonds. The Third State Court of Civil Appeals ruled in May, 1963, that the district could not spend money to build segregated facilities. The State Supreme Court rejected the trustees' attempts to appeal in August, 1963.

*Liase v. Longview ISD Board of Trustees*
Filed September, 1962, in U.S. District Court, Tyler, to desegregate Longview ISD. Withdrawn same month.

*McGrue v. Williams*
Filed in U.S. District Court in November, 1962, to desegregate Waco ISD. Desegregation began September, 1963, under grade-a-year plan voluntarily adopted by school board.

*McKinney v. Blankenship*
Filed in 1955 in State District Court at Big Spring, attacking constitutionality of requirement that state funds be paid separately to schools based on white and Negro attendance. State trial and appellate courts held law unconstitutional insofar as it prohibited payments to desegregated schools (1955). Went through State Supreme Court.

*Miller v. Barnes*
Filed September, 1962, in U.S. District Court, Austin, to desegregate public schools in Georgetown, Williamson County. The attorneys agreed to work out a plan with the court's approval, and U.S. District Judge Ben Rice in July, 1963, approved the grade-a-year plan scheduled to begin in September, 1964.

*Mills v. Woods*
Filed in 1951 in U.S. District Court, Northern District of Texas, to set aside action of school board at Euless, Tex., to discontinue separate Negro elementary school. District court issued injunction against discontinuance. U.S. Fifth Circuit Court of Appeals overruled, declaring state administrative procedure should have been exhausted before court acted.

*Rainwater v. Smith*
Filed in U.S. District Court on Nov. 8, 1962, to desegregate Carrollton ISD. U.S. District Judge Sarah T. Hughes in December, 1962, ordered "speedy termination of segregation." Desegregation began in September, 1963.

*Rice University v. Carr*
Filed in State District Court in February, 1963, against the state attorney general by university trustees seeking to construe the 1891 will of William Marsh Rice to permit racial desegregation and charging of tuition.

*Richard v. Christ*
Filed U.S. District Court, September, 1962, to desegregate Hamshire-Fannett ISD, Jefferson County. Pending.

*Robinson v. Evans*
Filed in 1960 in U.S. District Court, Southern District of Texas, to desegregate Galveston public schools. Court ordered desegregation to begin on grade-a-year basis in September, 1961. District desegregated.

*Ross v. Rogers*
Filed in 1956 in U.S. District Court. Judge ordered desegregation of Houston schools "with deliberate speed" and in August, 1960, ordered desegregation on grade-a-year plan to begin in first grade in September, 1960. Upheld by U.S. Fifth Circuit Court of Appeals. U.S. District Judge Ben Connally in March, 1962, rejected motions to liberalize transfer provisions. In December, 1962, the U.S. Fifth Circuit Court of Appeals declared the "brother-sister" restriction on pupil assignment to be discriminatory.

*Sanders et al v. Ransom et al*
Filed in U.S. District Court, at Austin in November, 1961, to abolish all segregation in dormitories at the University of Texas. Some men's dormitories there are desegregated; all women's dormitories are segregated. Pending.

*Simmons v. Edwards*
Filed in 1960 in U.S. District Court, Northern District of Texas (Lubbock) to desegregate Frenship School District, Lubbock County. Voters later approved voluntary desegregation.

*Smith v. Flowers*
Filed August, 1962, in U.S. District Court, Austin, to desegregate Southwest Texas State College at San Marcos. U.S. District Judge Ben Rice ordered the school desegregated and six Negroes entered on Feb. 4, 1963.

*Sweatt v. Painter*
Filed in 1946 in U.S. District Court, Western District of Texas. U.S. Supreme Court June, 1950, ordered Heman Sweatt admitted to University Law School in first case declaring "separate, equal doctrine" would not suffice.

*Thomas v. Bowen*
Seeks to desegregate public schools at Bryan. Filed September, 1961, in U.S. District Court at Houston. U.S. District Judge Joe Ingraham in July, 1963, ordered desegregation to begin in September, 1963, and the district complied.

*Washington et al v. Reidel*
Filed August, 1961 in U.S. District Court at Houston to desegregate A&M Consolidated ISD (near Bryan). U.S. District Judge Joe Ingraham in September, 1962, ordered desegregation to begin in September, 1963. District desegregated.

*White v. Smith*
Filed in 1955 in U.S. District Court, Western District of Texas, seeking to admit Negroes to Texas Western College. District judge held state statutes requiring segregation in public schools to be unconstitutional and void.

*Whitmore v. Stilwell*
Filed in 1955 in U.S. District Court, Eastern District of Texas. In the same year, the U.S. Fifth Circuit Court of Appeals ordered Texarkana Junior College desegregated. First Negro admitted in 1963.

## LEGISLATION (8)

### 1957

*HCR 5*—Urged constitutional amendment to limit federal authority on preservation of order.

*HCR 32*—Urged establishment of qualifications for federal judiciary.

*HCR 33*—Urged that preservation of order and operation of schools be left to state.

*Ch. 7*—Authorized closing schools to prevent violence and military occupation.

*Ch. 8*—Authorized attorney general to provide legal defense for school boards.

*Ch. 20*—Required registration with county clerk or judge of organizations interfering with school operations.

*Ch. 283*—Provided local option desegregation elections, requiring voter approval for a desegregated district to continue receiving state aid. Attorney General Will Wilson ruled in 1960 that state aid could be continued for districts that desegregated by court order but without voter approval. Ruled unconstitutional, in effect, in 1961 decision in Dallas case, Attorney General Wilson, in a second ruling, declared the act unconstitutional on Jan. 1, 1963, his last day in office.

*Ch. 287*—Established pupil placement requirements.

# VIRGINIA

## Status of Segregation-Desegregation

### PUBLIC SCHOOLS

Virginia has 55 desegregated school districts out of the 128 districts with students of both races. The 55 districts have 486,231 whites and 145,658 Negroes enrolled. There are 3,721 Negroes actually attending classes with whites in 282 schools. One of these districts, Surry County, has no biracial schools because all the whites withdrew from the consolidated all-white school when the State Pupil Placement Board assigned Negroes there for September, 1963. The whites began attending a private school, the county closed the boycotted school, and the state board reassigned the Negroes to their all-Negro school. Prince Edward County closed its public schools in the summer, 1959, to avoid a desegregation order dating from the original School Segregation Cases before the U.S. Supreme Court in 1954. The county's children attend private schools and the district remains under court orders to desegregate. Desegregation began in February, 1959, when Virginia abandoned its "massive resistance" program and four districts—Alexandria, Arlington County, Norfolk, and Warren County—accepted Negroes in schools with whites by court orders. The desegregated districts are:

| Districts | Enrollment White | Enrollment Negro | Negroes w/Whites | Brcl. Schls. | Date Deseg. |
|---|---|---|---|---|---|
| Albemarle Co. | 4,550 | 1,450 | 26 | 3 | 1963-V |

*County closed its consolidated white school in September, 1963, when all the county's white children enrolled in a private segregated school. Surry continues to operate its consolidated Negro school.

### TEACHERS

In Arlington County, all-Negro Drew elementary school has one white teacher among about 40 Negro teachers, desegregated Wakefield High School has one Negro physics teacher among 110 whites, and all-Negro Hoffman-Boston Elementary School has one Oriental kindergarten teacher among six Negro teachers. All other districts have segregated faculties.

### HIGHER EDUCATION

Six of the 19 predominantly white public institutions now have Negroes enrolled and three others have had Negroes enrolled previously. First desegregation in higher education in Virginia was at the University of Virginia, where a Negro was admitted to the law school under court order in 1950 (*Swanson v. University of Virginia*). Desegregation of the other colleges followed, although there were no court orders at these other institutions. The schools are:

| | Enrollment* White | Enrollment* Negro | Date Deseg. |
|---|---|---|---|

*Includes some estimates.
**Plus undetermined number in evening school.
***Plus two in evening college.
†School reports Negroes enrolled in both day and night classes but number not available.
††A Negro attended the summer session, 1962, but school authorities said this did not necessarily mean a change in the policy for the winter session.
†††A Negro attended classes one day in fall, 1962, but returned to an all-Negro school when she found the classes she wanted were full.

### FACULTIES

Segregation is maintained.

### SPECIAL SCHOOLS

Adult vocational programs in Richmond and Washington County have desegregated.

## ETHNIC GROUPS

Four small schools are operated exclusively for Indians—one by the state on an Indian reservation and three by counties in Indian settlements. Some Indians have attended white public schools and some have attended Negro public schools in Virginia.

## LITIGATION (50)

*Abrams v. York*

Filed in U.S. District Court Aug. 31, 1962, by a Negro girl seeking admission to all-white Grafton-Bethel Elementary. On Sept. 11, 1962, U.S. District Judge Walter E. Hoffman ordered her admitted to the first grade.

*Adkins v. Newport News School Board*

Desegregation plea delayed by U.S. District Court, Eastern Virginia, after Newport News-Warwick merger in 1958 raised new legal issues. Negro attorneys notified court July, 1959, that no Negroes would apply in fall, 1959. Desegregation began in fall, 1961.

*Allen v. Charlottesville School Board*

U.S. District Court, Western Virginia, in August, 1956, ordered desegregation by fall of 1956. State's massive resistance program delayed compliance until September, 1959. The case became *Dillard v. Charlottesville* and on Sept. 17, 1962, U.S. Fourth Circuit Court of Appeals ruled invalid provision of desegregation plan that allowed any child to transfer from a school in which his race was in the minority. On June 17, 1963, U.S. Supreme Court refused to review decision striking down minority transfer provision.

*Almond v. Day*

Test case in which State Supreme Court in November, 1955, approved tuition grants *(Acts of 1954, Ch. 708)*.

*Anderson v. West Point and King William County School Boards*

Suit filed Sept. 22, 1961, in U.S. District Court at Richmond asking injunction against State Pupil Placement Board from denying 10 Negro children admission to white schools in West Point. Placement board had admitted three other Negroes to West Point High. On Aug. 2, 1962, U.S. District Judge John D. Butzner ordered 10 more admitted to the high school. On June 10, 1963, Judge Butzner struck down proposed zoning plan because it included minority transfer provision.

*Beckett v. Norfolk School Board*

U.S. District Court, Eastern Virginia, in January, 1957, held pupil placement law *(Ch. 70, Acts of 1956)* invalid "on its face" and in February, 1957, ordered Negro assignments by September, 1957. Desegregation began February, 1959.

*Bell v. Powhatan School Board*

Filed in U.S. District Court Aug. 17, 1962, by 65 Negroes seeking admission to county white schools. On Jan. 3, 1963, District Judge John D. Butzner Jr. of Richmond ordered three Negroes admitted to county schools and enjoined school board and board of supervisors from closing schools. On July 1, 1963, U.S. Fourth Circuit Court of Appeals upheld the district court order enjoining Powhatan school board from closing schools but threw out reference to supervisors. The court also ordered Powhatan County to pay plaintiffs' counsel fees. On Oct. 28, 1963, Judge Butzner allowed fees of $2,100 to each of two plaintiff lawyers. *(See also Powhatan County School Board v. State Pupil Placement Board.)*

*Belton v. King George County School Board*

Filed Nov. 28, 1962, in U.S. District Court on behalf of 38 Negro children seeking admission to white or predominantly white schools. On June 27, 1963, District Judge John D. Butzner Jr. ordered the children admitted. On Sept. 23, 1963, the school board submitted a desegregation plan.

*Blackwell v. Fairfax County School Board*

Twenty-six Negroes sought admission to eight schools in suit filed in U.S. District Court, Eastern Virginia. On Sept. 22, 1960, court ordered some plaintiffs admitted immediately. Desegregation began in fall, 1960. On June 14, 1963, plaintiffs filed motion contending "dual school system" was still being operated and asked injunction.

*Bradley v. Richmond School Board*

Suit filed in U.S. District Court at Richmond Sept. 5, 1961, on behalf of 11 Negro children whose applications to two predominantly white desegregated schools had been turned down by State Pupil Placement Board. Court asked to require city to adopt "a racially non-discriminatory school system." In July, 1962, U.S. District Judge John D. Butzner ordered 10 Negroes admitted to already desegregated schools. On May 10, 1963, U.S. Fourth Circuit Court ordered school board to eliminate "discriminatory" school assignment procedures.

*Braxton v. Stafford County School Board*

Suit filed in September, 1961, in U.S. District Court at Alexandria challenging the 1956 state law that conferred school assignment authority on the State Pupil Placement Board. Filed on behalf of 18 Negro children who were not among the two admitted to a county white school when desegregation began in September, 1961.

*Brooks v. Galax School Board*

U.S. District Court, Western Virginia, in September, 1959, ordered one Negro admitted in January, 1960, but child decided not to enter. Same court in September, 1960, ordered Negroes admitted from adjoining Grayson County. Desegregation began September, 1960.

*Brown v. Frederick County*

Filed Sept. 18, 1962, in U.S. District Court, by two Negroes seeking immediate admission to all-white James Wood High School. On Oct. 3, U.S. District Judge Thomas J. Michie denied the request pending a hearing on the case.

*Buckner v. Greene County School Board*

Filed April 26, 1963, in U.S. District Court by six Negroes seeking desegregation of county schools.

*Calloway v. Farley*

U.S. District Court, Eastern Virginia, Sept. 18, 1957, granted injunction restraining Pupil Placement Board and city from denying Negroes in Richmond enrollment in school solely because they failed to apply through the board.

*Coley v. Brewbaker*

Norfolk Circuit Court in August, 1958, denied injunction that would have prohibited local school board from making pupil assignments. Reversed three days later by two State Supreme Court justices. In September, 1958, U.S. District Court, Eastern Virginia, overrode State Supreme Court.

*Crisp v. Pulaski School Board*

U.S. District Court, Western Virginia, on April 28, 1960, ordered 14 Negroes admitted to white schools in September, 1960.

*Dorothy E. Davis et al v. County School Board of Prince Edward County (Later Allen v. Prince Edward County School Board, now Griffin v. County School Board.)*

Filed in U.S. District Court on May 23, 1951, by Negro children of high school age residing in Prince Edward County to enjoin the segregation of Negroes and whites in public schools. A three-judge district court found in 1952 that the Negro school was inferior in physical plant, curricula and transporta-

tion, but denied the plaintiffs admission to a white school. The court ordered the defendants to equalize facilities "with all reasonable diligence and dispatch." The case was one of the five school segregation cases decided by the U.S. Supreme Court in 1954. The court ruled on May 17 that the Negroes were "deprived of equal protection of the laws guaranteed by the 14th Amendment." On May 31, 1955, the Supreme Court issued an implementing decision in the five cases, ordering compliance with its earlier decision "with all deliberate speed." The justices remanded the case to the respective lower courts. Subsequent developments:

July 18, 1955—A three-judge federal court for the Eastern District of Virginia entered an "all deliberate speed" decree for the admission of Negroes to county schools without discrimination. It authorized a delay pending necessary arrangements. A motion was made that the constitutionality of the Virginia segregation statutes had been decided and that the three-judge court should be dissolved for the case to be considered by a single judge. The three-judge court dissolved itself on July 17, 1956, and turned over jurisdiction in the case to a single-judge court.

Jan. 23, 1957—This court denied motions by both sides. The court refused to set a requested deadline of September, 1956, for the desegregation of Prince Edward schools. It based its decision on conditions in the county—public opinion unfavorable to desegregation and the possibility of school closings. The court denied the defendants' motion for dismissal of the suit.

Nov. 11, 1957—The case appeared in the U.S. Fourth Circuit Court of Appeals as *Eva Allen et al v. County School Board of Prince Edward County, Va., et al.* The appellate court reversed the district court opinion and remanded the case with directions to enter a decree for abolition of racial discrimination in school admission policies "without further delay."

Aug. 4, 1958—The suit returned to U.S. District Court with the Negroes asking the court to set a date for desegregation. After hearing the school board testify that racial relations in the county had deteriorated, the court fixed 10 years after the 1955 Supreme Court decision as the time for compliance, reserving the right to accelerate or extend the date if necessary.

May 5, 1959—The U.S. Fourth Circuit Court of Appeals again ruled on the case, now styled *Ulysses Allen, an infant, by Hal Edward Allen, his father and next friend, et al, v. the County School Board of Prince Edward County ,Va., et al.* The court reversed and remanded the District Court decision. The higher court set September, 1959, as the deadline for desegregating the high schools and ordered the elementary schools to admit pupils on a non-racial basis "at the earliest practical day."

June 26, 1959—The U.S. Supreme Court denied the school board's request for a delay. The same court denied certiorari on Oct. 12, 1959. The county had ceased operation of all its public schools in the summer of 1959.

Sept. 14, 1959—Private classes opened for the white children by the Prince Edward School Foundation.

April 22, 1960—Once again styled *Eva Allen et al v. County School Board of Prince Edward County, Va., et al,* the case returned to District Court with Judge Albert Bryan eliminating the 1965 deadline. The judge entered an order in accordance with the appellate court's mandate of May 5, 1959.

July 18, 1960—The Board of Supervisors enacted ordinances providing for local tuition grants and tax credits.

Sept. 19, 1960—U.S. District Judge Oren Lewis agreed to hear the Negroes' request for a supplemental plea in the case. The Negroes, in a complaint endorsed by the NAACP, sought to enjoin the county from refusing to operate public schools (closed in 1959) and to bar the sale or lease of the closed schools.

October, 1960—Judge Lewis heard the defendants' request for dismissal of the supplemental complaints. Before a decision, the NAACP counsel asked permission on Jan. 13, 1961, to file other supplemental complaints. The Negroes asked for an order prohibiting spending any public funds for the direct or indirect support of any private school excluding Negroes, or for aiding or reimbursing persons for tuition to any such private schools; for forbidding the award of tax credit for contributions to private schools excluding Negroes.

April 11, 1961—Judge Lewis granted the defendants the right to file their supplemental complaints requested the previous September and January.

April 26, 1961—The attorney general of the United States petitioned the U.S. District Court at Richmond to be allowed to intervene in the Prince Edward case. He asked to be allowed to file a supplemental complaint requesting the court to enjoin the county from paying tuition grants to students attending private schools so long as public schools remained closed, and also asking the court to bar state support of any public schools in Virginia until Prince Edward schools re-opened on a desegregated basis.

June 24, 1961—Judge Lewis ruled that the attorney general had failed to sustain his motion for intervention as a matter of right, and that permissive intervention would unduly delay the case.

Aug. 23, 1961—Judge Lewis ruled that tuition grants and tax credits could not be used to support Prince Edward's private segregated system as long as public schools there remained closed.

September, 1961—The private system reopened for its third year and Prince Edward Negro children began their third year without schools. On Sept. 8, a Negro youth of Prince Edward filed suit, through his father, in the Virginia Supreme Court of Appeals asking for a writ of mandamus to compel the county board of supervisors to appropriate funds for public schools for 1961-62.

July 26, 1962—Judge Lewis declared in a memorandum opinion that public schools of Prince Edward County could not be closed to avoid desegregation while schools elsewhere in Virginia remained open.

Oct. 11, 1962—Judge Lewis issued a formal decree carrying out memorandum opinion but postponed enforcement pending appeal.

Dec. 31, 1962—U.S. Fourth Circuit Court of Appeals authorized U.S. Department of Justice to enter case on side of Negro plaintiffs.

May 22, 1963—Prince Edward Board of Supervisors adopted 1963-64 budget with no funds for public schools.

Aug. 12, 1963—U.S. Fourth Circuit Court overruled District Judge Lewis's order that had called for reopening of the schools. The circuit court, by a 2-to-1 vote, said federal courts should not act in a case until state courts have decided state constitutional questions.

Aug. 14, 1963—Gov. Albertis S. Harrison Jr. announced plans for establishment of the Prince Edward Free School Association, privately financed, to operate a tuition-free school for children not receiving formal education.

Sept. 16, 1963—Free schools opened, with enrollment of about 1,500 Negroes and four whites, other white children of the county continuing to attend the private segregated classes of the Prince Edward School Foundation.

Oct. 30, 1963—Negroes petitioned U.S. Supreme Court to "dispose of in convenient haste" the legal issues relating to the closing of the county's public schools.

Dec. 2, 1963—Virginia Supreme Court ruled state constitution did not require public schools in Prince Edward County, and that county could close its schools.

*Dobbins v. Commonwealth*

State Supreme Court in January, 1957, overruled compulsory attendance law conviction of a Negro who refused to attend a remote Negro school after being denied admission to a nearby white school.

*Estes v. Farley*

U.S. District Court, Eastern Virginia, Sept. 29, 1957, granted injunction against Pupil Placement Board, restraining enforcement of placement act in Norfolk.

*Farley v. Turner*

U.S. Fourth Circuit Court of Appeals on July 28, 1960, upheld the Norfolk school board's admission of four Negroes to white schools without following state pupil placement procedures.

*Gilliam v. Hopewell School Board*

Filed in U.S. District Court Oct. 17, 1962, by nine Negroes seeking admission to white schools. On July 12, 1963, U.S. District Judge John D. Butzner Jr. ordered nine admitted to two white schools. On Sept. 11, 1963, he ordered 15 more Negroes admitted.

*Goins v. Grayson County School Board*

Eight Negroes sought admission to white high school. U.S. District Court, Western Virginia, ordered desegregation to begin immediately. Desegregation began fall 1960.

*Green v. Roanoke City School Board*

Suit filed Aug. 20, 1960, in U.S. District Court at Roanoke seeking admission of 28 Negroes to white schools. Judge Oren R. Lewis on Oct. 4, 1961, ordered one Negro admitted, told the Pupil Placement Board to reconsider rejections of others. (Earlier, PPB had admitted six Negroes to white schools in September, 1960.) On July 18, 1962 District Judge Thomas J. Michie approved a 12-year desegregation plan. On May 22, 1962, the U.S. Fourth Circuit Court threw out the assignment plan as discriminatory. On June 3, 1963, Judge Michie approved Roanoke's five-year desegregation plan.

*Griffin v. Prince Edward Board of Supervisors*

Filed Sept. 18, 1961, in Virginia Supreme Court of Appeals by a Negro child petitioning for mandamus to compel county to levy taxes and appropriate funds for schools. Court ruled March 5, 1962, that state constitution did not require county to operate schools. On Aug. 31, 1962, county school board and State Board of Education asked the Richmond Circuit Court to determine whether the state must operate public schools in the county in the absence of county operation. On March 27, 1963, Richmond Circuit Court Judge John Wingo Knowles ruled that neither the state nor federal constitution requires operation of public schools in the county and also that nothing in the state constitution or law prohibits award of tuition grants there even though public schools are closed. (See *Davis et al v. County School Board of Prince Edward County*).

*Griffin v. Prince Edward School Board* (See *Davis et al v. County School Board of Prince Edward County.*)

*Harrison v. Day*

Virginia Supreme Court in January, 1959, held that Section 129 of state constitution requiring school operation prevented closing of desegregated schools if segregated schools remained open.

*Hill v. Prince George County School Board*

On Nov. 1, 1963, parents of 24 Negro children filed desegregation suit contending they were being denied admission to certain county schools because of race.

*Howard v. Alleghany County School Board*

On Nov. 27, 1961, State Supreme Court invalidated *Chapter 68* of 1959, which permitted 10 per cent of the voters of a locality to force a referendum on sale of school property.

*Isley v. Roanoke County School Board* (Later *Marsh v. Roanoke County School Board)*

Suit filed Aug. 31, 1960, on behalf of seven Negro children. U.S. District Judge Oren R. Lewis on Oct. 4, 1961, ruled against plaintiffs. Appeal made to U.S. Fourth Circuit Court of Appeals on Nov. 1, 1961. Meanwhile, one Negro child assigned by the Pupil Placement Board entered an all-white county school in September, 1961. On July 18, 1962, U.S. District Judge Thomas J. Michie approved plan for complete desegregation in six years. On June 12, 1962, U.S. Fourth Circuit Court of Appeals found the plan discriminatory and ordered county to proceed to desegregate "on an acceptable schedule."

*Jackson v. Lynchburg School Board*

Four Negro students filed suit in U.S. District Court at Lynchburg Sept. 18, 1961, in an effort to force board to admit them to all-white high school. On Nov. 14, 1961, Judge Thomas J. Michie ordered two Negro ninth-graders admitted to the all-white E. C. Glass High School on Jan. 29, 1962. On March 15, 1962, Judge Michie approved a grade-a-year desegregation plan. On July 1, 1963, U.S. Fourth Circuit Court rejected city's grade-a-year plan because too much time would be required for full desegregation, and court ruled minority race transfers invalid.

*James v. Almond*

Special three-judge U.S. District Court in January, 1959, ruled Norfolk's school closing unconstitutional.

*James v. Duckworth*

Federal District Court, Eastern Virginia, in January, 1959, enjoined Norfolk City Council from cutting off funds from secondary schools.

*Jones v. Alexandria School Board*

U.S. District Court on Feb. 4, 1959, ordered desegregation to begin Feb. 10, 1959. On Feb. 13, 1962, District Judge Oren R. Lewis ordered case stricken from docket on ground that no issues remained.

*Jordan v. Farley*

U.S. District Court, Eastern Virginia, Sept. 29, 1957, granted injunction against Pupil Placement Board, restraining enforcement of placement act in Nansemond County.

*Kilby v. Warren County School Board*

U.S. District Court, Western Virginia, in September, 1958, ordered high school desegregated same month. Stay denied Feb. 16, 1959, by Fourth Circuit Court of Appeals Judge Simon E. Sobeloff. Desegregation began in February, 1959.

*Marsh v. Roanoke County School Board* (See *Isley v. Roanoke County.*)

*McLeod v. Chesterfield County School Board*

Filed Feb. 28, 1962, on behalf of 15 Negro children seeking admission to all-white Ettrick Elementary School. On Nov. 15, 1962, U.S. District Judge John D. Butzner Jr. ordered Negroes admitted, and two enrolled.

*NAACP v. Patty* (See *NAACP v. Button*)

*NAACP Legal and Educational Defense Fund v. Patty* (See *NAACP Legal and Educational Defense Fund v. Button*)

*NAACP v. Button*, and
*NAACP Legal and Educational Defense Fund v. Button*

Virginia Supreme Court in September, 1960, ruled *Ch. 36, Acts of 1956*, unconstitutional, but upheld *Ch. 33*. U.S. Supreme Court in March, 1961, agreed to review. (*Ch. 36* banned inducing litigation. *Ch. 33* prohibited solicitation of business for lawyers.) On Sept. 14, 1962, Judge Edmund W. Hening in Richmond Circuit Court ruled out *Chapter 31* of 1956, requiring membership disclosure of organizations such as the NAACP, and *Chapter 35*, which defined barratry. On Jan. 14, 1963, U.S. Supreme Court by a 6-to-3 vote, invalidated *Ch. 33*.

*Pettaway v. Surry County School Board*

On Sept. 3, 1963, seven Negro children filed suit in U.S. District Court to force re-opening of county's white consolidated school, which the school board had closed on Aug. 24 after all the county's 430 white children had enrolled in the private segregated schools of the Surry Educational Foundation. (The State Pupil Placement Board earlier had assigned the seven Negroes to the white school.) On Oct. 2, 1963, U.S. District Judge John D. Butzner Jr. of Richmond, refused to order the re-opening, saying the issues involved were not significantly different from those of the Prince Edward case, and that the U.S. Fourth

Circuit Court of Appeals had said federal courts should abstain from acting in that case until state courts had acted. (See *Davis v. Prince Edward School Board.*)

*Powhatan County School Board v. State Pupil Placement Board*

Filed July 3, 1962, in Richmond Circuit Court asking decision on which of the two boards had the responsibility of verifying pupil placement applications. On May 20, 1963, Richmond Circuit Court Judge E. W. Hening Jr. held that the placement board could not require local school board to verify pupil placement applications.

*Scott v. Fredericksburg School Board*

Filed March 7, 1962, in U.S. District Court by two Negroes seeking admission to all-white James Monroe School. Desegregation began on Aug. 29, 1962, by State Pupil Placement Board assignments. On Jan. 3, 1963, District Judge John D. Butzner Jr. directed admission of six more Negroes. On July 29, 1963, the court rejected the city's grade-a-year desegregation plan.

*Shelton v. Hanover County School Board*

State Supreme Court in June, 1956, reversed Hanover Circuit Court decision that bonds approved for segregated schools in referendum could not be used for non-segregated ones.

*Thompson v. Arlington County School Board* (Later *Brooks v. Arlington County School Board*)

U.S. District Court, Eastern Virginia, in 1956 ordered elementary school desegregation by Jan. 31, 1957, and secondary school desegregation by September, 1957. State's massive resistance program delayed compliance until February, 1959. On March 1, 1962, U.S. District Judge Oren R. Lewis upheld a plan permitting children to transfer out of schools in which their race is in minority. On Oct. 31, 1963, the U.S. Fourth Circuit Court of Appeals ordered reinstatement of an anti-discrimination injunction against the Arlington school board, the injunction having been lifted in March, 1962, by Judge Lewis.

*U.S.A. v. Prince George County School Board*

On Sept. 17 the U. S. Justice Department filed suit in U.S. District Court seeking an end to racial segregation in Prince George County schools attended by children of federal personnel at Ft. Lee. On June 23, 1963, District Judge John D. Butzner Jr. held that the federal government could bring suit to secure desegregated schooling for the children of Ft. Lee personnel because of contract provisions under which the county received federal school aid funds.

*Walden v. Farley*

U.S. District Court, Eastern Virginia, Sept. 29, 1957, granted injunction against Pupil Placement Board, restraining enforcement of placement act in Suffolk.

*Walker v. Floyd County School Board*

U.S. District Court, Western Virginia, on Sept. 14, 1960, ordered 14 Negroes admitted to white high school on Jan. 25, 1960.

*Warden v. Richmond School Board*

Six Negroes sought entry to white schools in suit filed in U.S. District Court, Eastern Virginia, in 1958. Case argued (for one remaining plaintiff) March 30, 1961 and taken under advisement by court. Desegregation began fall, 1960.

*Williams v. Charlottesville and Albemarle County School Boards*

Suit filed April 26, 1963, in U.S. District Court to bar construction of a junior high school at the existing Negro high school, on grounds that the new school would delay desegregation.

*Williams v. Winchester School Board*

Filed March, 1962, in U.S. District Court by two Negroes seeking admittance to all-white Handley High School. On June 7, 1962, Judge Thomas J. Michie ordered plaintiffs admitted. On July 17, 1962, Judge Michie approved a two-grades-a-year desegregation plan. Desegregation began in first and ninth grades in September, 1962.

*Woodson v. Shenandoah County School Board*

Filed Sept. 18, 1962, in U.S. District Court, by Negroes seeking admission to white schools. Desegregation began Aug. 30, 1962, by State Pupil Placement Board assignments.

## LEGISLATION (49)

### 1955

*Ch. 2*—Proposed amendment to revise Section 141 of state constitution to permit public funds for tuition grants to students attending private nonsectarian schools. Approved in referendum Jan. 9, 1956.

### 1956

*SJR 3*—Interposition.

*Ch. 591*—Provided election of school board members by local governing body in Arlington County, replacing popular election.

### 1956

### (Extra Session)

*Ch. 31*—Prohibited solicitations for litigation. Ruled unconstitutional in September, 1962, in *NAACP v. Harrison.*

*Ch. 32*—Required registration of advocates of racial integration or segregation.

*Ch. 33*—Prohibited solicitation of business for lawyers.

*Ch. 34*—Created joint committee to study administration of justice. Repealed 1958.

*Ch. 35*—Banned barratry. Ruled unconstitutional in September, 1962, in *NAACP v. Harrison.*

*Ch. 36*—Banned inducing litigation. Declared unconstitutional by State Supreme Court on Sept. 2, 1960.

*Ch. 37*—Created joint committee to study administration of justice. Repealed 1958.

*Ch. 39*—Provided that State Board of Education shall not refuse to accredit any school for the sole reason that the school is not conducted in a building meeting requirements.

*Ch. 40*—Provided closure of any school policed by federal troops or officers. Repealed 1959.

give placement board subpoena powers, to substitute

*Ch. 56*—Provided funds for private schooling. Repealed 1959.

*Ch. 57*—Authorized taxation and appropriations for tuition grants. Repealed 1959.

*Ch. 58*—Included tuition grants in school budgets. Repealed 1959.

*Ch. 59*—Provided no child would be required to attend desegregated school. Repealed 1959.

*Ch. 60*—Relieved school boards on transportation requirements.

*Ch. 62*—Authorized tuition grants. Repealed 1959.

*Ch. 63*—Provided legal defense for school boards and members.

*Ch. 64*—Extended teacher retirement benefits to private schools.

*Ch. 65*—Directed the attorney general to assist local school boards in legal cases.

*Ch. 66*—Permitted reduction in school terms.

*Ch. 67*—Permitted month-to-month school financing.

*Ch. 68*—Gave state authority over schools ordered to desegregate. Repealed 1959.

*Ch. 69*—Gave governor authority to operate schools. Repealed 1959.

*Ch. 70*—Created Pupil Placement Board. Held invalid in *Beckett v. Norfolk School Board* in 1957. Amended by *Ch. 500* in 1958.

*Ch. 71*—Withheld state funds from desegregated schools. Repealed 1959.

### 1958

*HJR 50*—Directed state bar to punish persons guilty of unethical or unauthorized law practice.

*Ch. 41*—Provided closure of any school policed by federal troops or officers. Repealed 1959.

*Ch. 223*—Created commission on constitutional government.

*Ch. 319*—Closed all schools in a district policed by federal forces. Repealed 1959.

*Ch. 373*—Created committee on offenses against administration of justice.

*Ch. 500*—Amended Pupil Placement Act (*Ch. 70*) to give placement board subpoena powers, to substitute criteria for pupil assignment, and to permit parents to sign assignment applications under protest.

*Ch. 506*—Required registration of non-profit organizations engaged in law practice.

*Ch. 540*—Required federalization of state militia be handled through governor.

*Ch. 631*—Amended school closing law. Repealed 1959.

*Ch. 642*—Limited state funds to "efficient" schools and defined "efficient" as one without racial integration. Repealed in 1959.

**1959**

*Ch. 49*—Authorized localities to provide free transportation for pupils attending nonsectarian, private schools.

*Ch. 50*—Provided for repayment of teacher scholarships by service in either private or public schools.

*Ch. 52*—Gave localities budgetary flexibility so that school appropriations may be cut off in 30 days.

*Ch. 53*—Provided state tuition grants up to $275 per year for private schooling of any child.

*Ch. 68*—Permitted 10 per cent of voters to initiate referendum for disposal of local school property. Invalidated on Nov. 27, 1961, in *Howard v. Alleghany County School Board*.

*Ch. 71*—Gave localities option of remaining under the State Pupil Placement Board or administering their own local assignment plans.

*Ch. 72*—Re-enacted compulsory attendance provisions, but left enforcement to the local school boards and authorized parents to withhold their children from school.

*Ch. 80*—Exempted private school buildings from zoning and building code laws for two years.

**1960**

*Ch. 191*—Authorized localities to permit taxpayers to deduct contributions to nonsectarian private schools from real estate and personal property tax levies.

*Ch. 443*—Revised formula for scholarship grants to children attending private or public schools other than ones to which they normally would be assigned.

*Ch. 461*—Authorized local governing bodies to spend funds for private schooling of children.

**1962**

*Ch. 183*—Permitted teachers to terminate their contracts any time the schools in which they teach become desegregated, either at the student or the faculty level.

# WEST VIRGINIA

## Status of Segregation-Desegregation

### PUBLIC SCHOOLS

Desegregation was first started in the Monogalia County public schools in the fall of 1954. All 44 of the state's school districts with whites and Negroes have begun or completed the desegregation process. An estimated 417,595 whites and an estimated 21,055 Negro pupils are enrolled in the desegregated districts. An estimated 18,500 Negroes are in classes with whites.

| Desegregated Counties | | | All-White Counties |
|---|---|---|---|
| Barbour | Jefferson | Morgan | |
| Berkeley | Kanawha | Ohio | |
| Boone | Lewis | Pendleton | |
| Braxton | Lincoln | Pocohontas | Doddridge |
| Brooke | Logan | Preston | Gilmer |
| Cabell | Marion | Raleigh | Jackson |
| Calhoun | Marshall | Randolph | Nicholas |
| Clay | Mason | Summers | Pleasants |
| Fayette | McDowell | Taylor | Putnam |
| Grant | Mercer | Tucker | Ritchie |
| Greenbrier | Mineral | Upshur | Roane |
| Hampshire | Mingo | Wayne | Tyler |
| Hancock | Monongalia | Wetzel | Webster |
| Hardy | Monroe | Wood | Wirt |
| Harrison | | Wyoming | |

### TEACHERS

A survey four years ago found that 58 Negro teachers had been displaced because of desegregation. Some faculties are desegregated.

### HIGHER EDUCATION

In 1938 West Virginia University voluntarily admitted Negroes to graduate schools. All 11 state-supported colleges and universities have been open to applicants without regard to race since 1954, by directives from the State Board of Education and the University Board of Governors. There have been no court cases dealing with higher education. Enrollments by school are:

| | Enrollment | | Date |
|---|---|---|---|
| Predominantly White | Total | Negro | Deseg. |
| Concord | 1,526 | 5* | 1954-V |
| Fairmont | 1,388 | 24* | 1954-V |

| Bluefield | 637 | 325* | 1954-V |
| STATE TOTALS | 23,318 | 1,549* | |

*Estimated.

### FACULTIES

Bluefield and West Virginia State have predominantly Negro faculties. Both institutions started hiring white instructors four years ago.

### SPECIAL SCHOOLS

The legislature removed racial restrictions for admission to the West Virginia School for the Deaf and Blind, and the special schools at the Boys and Girls industrial schools are desegregated. The former Negro industrial schools have been closed and the children sent to the previously all-white institutions.

### LITIGATION (9)

*Anderson v. Mercer County Board of Education*

Filed in 1953 and voluntary desegregation ordered by the second semester of the 1956-57 school year. Case still held in Southern U.S. District Court. NAACP petitioned in November, 1963, to reopen case.

*Dunn v. Greenbrier County Board of Education*

Filed in 1955 and brought voluntary desegregation Jan. 18, 1956. Case still open in Southern U.S. District Court.

*Goode v. Summers County Board of Education*

Filed in 1959 and charged discriminatory practice in teacher hiring. U.S. District Judge John A. Field ruled on Sept. 3, 1963, that the board did not discriminate in failing to rehire Mrs. Edith Goode for the 1957-8 school year.

*Martin v. McDowell County Board of Education*

Filed in 1955 and brought desegregation in September, 1956. Case still held in Southern U.S. District Court.

*Pierce v. Cabell County Board of Education*

Filed in 1955 and voluntary desegregation ordered by second semester of 1956-57 school term. Case still held in Southern U.S. District Court.

*Shedd v. Logan County Board of Education*

Filed in 1956 and voluntary desegregation ordered by beginning of 1957-58 school year. Case still held in Southern U.S. District Court.

*Starling v. Mingo County Board of Education*

Filed in 1959 and charged discriminatory practice in teacher hiring. Court found for the defendant, but the teacher was reinstated and given a continuing contract.

*Taylor v. Raleigh County Board of Education*

Filed in 1955 and voluntary desegregation ordered by the second semester of the 1956-57 school year. NAACP in 1961 filed notice in Southern U.S. District Court to reopen case; the case now is before the court.

*Wilkinson v. Harrison County Board of Education*

Filed in 1956 and brought desegregation May 28, 1957. Case still held in Northern U.S. District Court.

### LEGISLATION (2)

The West Virginia legislature in 1957 amended statutes governing the business and educational affairs of West Virginia State College, eliminating references to it as a Negro institution. The legislature also eliminated racial restrictions for admission to the West Virginia School for the Deaf and Blind.

# Statistical Developments From 1954

Note: These tables contain the best available figures for each respective school year. The figures in these tables differ in some instances from those given in past issues of Southern School News or the Statistical Summary because of corrections to conform to a consistent policy on statistics, or substitutions of more accurate information that became available later.

## Status Before 1954

When the U.S. Supreme Court first ruled in the school segregation cases on May 17, 1954, 17 Southern and border states, plus the District of Columbia, maintained complete segregation in elementary and secondary schools, except in some communities having only a few Negro children to educate from time to time, or those allowing a few Negroes to attend special courses. Twelve of the states had begun desegregation at the college level. Four states outside the region—Arizona, Kansas, New Mexico, and Wyoming—allowed varieties of local segregation. Sixteen states had laws prohibiting segregation but not all enforced them. Eleven other Northern and Western states had no laws on the subject. The "School Segregation Cases" were *Oliver Brown et al v. Board of Education of Topeka, Kan., et al; Henry Briggs Jr. et al v. R. W. Elliott et al* (Clarendon County, S.C.); *Dorothy E. Davis et al v. County School Board of Prince Edward County, Va., et al; Francis B. Gebhardt et al v. Ethel Louise Belton* (New Castle County, Del.); and *Spottswood Thomas Bolling et al v. Melvin Sharpe et al* (District of Columbia).

# Chronology of Major Desegregation Developments

*This chronology covers the major developments leading to the U.S. Supreme Court's school desegregation ruling and arising from it. Included are the most significant legal developments, the first desegregation in each state in tax-supported colleges and schools, and some of the other more important events that accompanied this major social change.*

## 1936

Donald Murray, a Negro, enrolled at the University of Maryland Law School under a court order. In *Pearson v. Murray*, the Maryland Court of Appeals held that the state must afford equal educational opportunities in its own institutions.

## 1938

The University of West Virginia graduate and professional school voluntarily admitted Negroes.

In *Gaines v. Canada*, the U.S. Supreme Court decreed that the state was bound to furnish equal facilities within its borders. It ordered Lloyd Gaines admitted to the University of Missouri law school since no Negro law school existed. Gaines never enrolled.

## 1948

The U. S. Supreme Court in February, 1948, ordered Mrs. Ada Lois Sipuel admitted to the University of Oklahoma Law School, which did not accept her until 1949. The court said one race must receive equal facilities as soon as another race *(Sipuel v. Board of Regents)*. The university admitted its first Negro, G. W. McLaurin, in October, 1948, by federal court order. *(McLaurin v. Oklahoma State Regents)*.

The University of Delaware announced it would admit Negroes to any graduate courses not offered at Delaware State College for Negroes.

The University of Arkansas voluntarily admitted Negroes to its professional schools.

## 1949

The University of Kentucky opened its graduate schools to Negroes under court order (*Johnson v. Board of Trustees*).

## 1950

The U.S. Supreme Court, in *Sweatt v. Painter*, ordered Heman Sweatt admitted to the University of Texas Law School after ruling the law school at Texas State University for Negroes was inferior in such intangible criteria as standing in the community, tradition and prestige.

In *McLaurin v. Oklahoma State Regents*, the Supreme Court held that G. W. McLaurin, a Negro admitted to the University of Oklahoma Graduate School, in 1948, was handicapped in being taught in segregated conditions. The court ordered that he receive the same treatment as other races.

A U.S. District Court order opened Louisiana State University Law School to a Negro, Roy S. Wilson (*Wilson v. LSU Board of Supervisors*).

The University of Virginia Law School admitted its first Negro under court order (*Swanson v. University of Virginia*).

A state court opened the University of Missouri to Negroes.

## 1951

A federal court order in *McKissick v. Carmichael* opened the University of North Carolina law school to Negroes.

## 1952

The University of Tennessee, under court instructions in *Gray v. University of Tennessee*, admitted Negroes to its graduate, professional and special schools.

## 1953

Friona in West Texas desegregated voluntarily.

Arden and Claymont districts in Delaware voluntarily desegregated.

## 1954

May 17—The U.S. Supreme Court overruled the "separate-but-equal" doctrine of *Plessy v. Ferguson* (1896) in the five school segregation cases titled *Brown v. Topeka Board of Education* and held that "separate educational facilities are inherently unequal."

Aug. 23—Charleston, Ark., admitted 11 Negroes to a formerly all-white high school.

September—District of Columbia schools and colleges desegregated. The two separate colleges merged into a biracial school a year later. Public schools also desegregated in St. Louis, Mo., Baltimore, Md., and Monongalia County, W.Va., the first in the respective states.

## 1955

May 31—The U.S. Supreme Court remanded the segregation cases to their respective district courts, for them to order Negroes admitted to the public schools "on a racially non-discriminatory basis with all deliberate speed . . ."

June 7—Poteau, Okla., desegregated voluntarily.

July 15—U.S. Circuit Judge John Parker, in the Clarendon County, S.C., school case *(Briggs v. Elliott)*, said the high court "has not decided that the states must mix persons of different races in the schools . . . What it has decided . . . is that a state may not deny to any person on account of race the right to attend any school that it maintains . . ."

June 6—Fayette County, Ky., became the first in the state to open on a desegregated basis.

September—Federally operated Oak Ridge, Tenn., voluntarily became the first in the state to desegregate

## 1956

Feb. 1—Autherine Lucy entered the University of Alabama under court order (*Lucy v. Adams*) and attended classes for three days amid riots. The board of trustees expelled her for charging them with conspiracy in the violence.

Feb. 22—In the first legal effort to back up the Supreme Court decision, the federal government intervened in the Hoxie, Ark., school board's appeal to enjoin interference with desegregation (*Hoxie School District v. Brewer*).

March 12—Southern Manifesto signed by 101 congressmen. On the same day, the U.S. Supreme Court ruled (*Hawkins et al v. Board of Control et al*) that the possible delay allowed in its 1955 implementing decision did not involve graduate professional schools. The court ordered Virgil D. Hawkins admitted to the University of Florida. In 1957, by a consent decree, the board agreed to accept all qualified students regardless of race, and Hawkins agreed not to contest further the board's finding that he was ineligible because of a low admission test score.

September—Violence ended a brief desegregation at Mansfield, Tex. The National Guard restored order at Clinton, Tenn., after demonstrations over Negroes attending Clinton High School. Negro students were removed from Clay and Sturgis, Ky., after violence. Louisville, Ky., began its "free choice" plan without incident.

## 1957

May—Desegregation virtually stopped in Texas with the adoption of laws cutting off state funds for schools desegregating without previous approval in a referendum.

September—Greensboro, Charlotte and Winston-Salem, N.C., desegregated voluntarily. Under a court order in *Kelley v. Nashville Board of Education*, Nashville, Tenn., inaugurated a grade-a-year plan, followed by the bombing of Hattie Cotton Elementary School. Riots occurred in Little Rock, Ark., as Negroes entered Central High School under court order (*Aaron v. Cooper*). Gov. Orval Faubus called out National Guard troops to block the desegregation. U.S. troops returned the Negroes to the schools as the riots continued.

## 1958

May—U.S. troops withdrew from Little Rock.

August—The U.S. Eighth Circuit Court of Appeals overturned a lower court order allowing a delay in Little Rock's desegregation. The appeals court held that incidents of violence were "insufficient to constitute a legal basis for suspension of the plan to integrate the public schools in Little Rock."

September—Gov. Faubus closed the Little Rock schools after the U.S. Supreme Court refused to suspend desegregation. Virginia Gov. Lindsay Almond closed the schools under orders to desegregate in Norfolk, Front Royal and Charlottesville. The University of Florida Law School admitted a Negro, George H. Starke.

Oct. 5—Clinton, Tenn., High School was dynamited.

Nov. 24—U.S. Supreme Court held that Alabama's Pupil Placement Law was constitutional on its face (*Shuttlesworth v. Birmingham Board of Education*).

Dec. 14—The Supreme Court allowed Nashville's grade-a-year plan to stand when it refused to hear an appeal in the *Kelley* case.

## 1959

Jan. 19—The Virginia Supreme Court ruled that closing schools violated the state constitution (*Harrison v. Day*). A three-judge federal court ruled the state must make public schools available to all children and not just some (*James v. Almond*).

Feb. 2—Virginia abandoned its "massive resistance" policy and seven public schools opened on a desegregated basis. The state turned to a tuition-grant program.

June—Prince Edward County, Va., school board closed its schools rather than desegregate. White citizens set up private schools.

August—Little Rock schools reopened with four Negroes in formerly white schools.

September—Dade County, Fla., voluntarily desegregated two schools.

## 1960

April 20—The U.S. Fourth Circuit Court of Appeals held that "the maintenance of a dual system of attendance areas based on race offends the constitutional rights of the plaintiffs . . ." in *Jones v. School Board of Alexandria*.

May 17—A survey on the sixth anniversary of the Supreme Court's 1954 decision showed that six per cent of the South's three million Negro students attended classes with whites.

Aug. 29—The U.S. Third Circuit Court of Appeals overruled Delaware's grade-a-year plan and ordered complete desegregation by September, 1961. The court noted other courts' approval of the Nashville plan but said that what constitutes "with all deliberate speed" and "reasonable start towards full compliance" could only be decided "on due consideration of all the pertinent factors and circumstances." The U.S. Supreme Court refused to review the Circuit Court order (*Buchanan v. Evans et al*).

September—The South's public schools opened without violence for the first year since the 1954 decision. Houston, Tex., the nation's largest segregated public school system, followed a court order and admitted 12 Negroes to formerly white classes. The Texas attorney general had ruled that state aid would not be cut off in cases where court orders forced school boards to desegregate. U.S. district and appellate courts held in three Virginia cases that criteria and tests could not be used in assigning Negroes unless also used for assignment of whites.

November—New Orleans, La., desegregated two schools under court order (*Bush v. Orleans Parish School Board*), despite demonstrations, almost complete boycotts of the schools and repeated special laws by the legislature. A three-judge federal court, ruling that interposition was not a constitutional doctrine, blocked all attempts of the legislators to halt the Orleans Parish desegregation.

## 1961

January—The University of Georgia, under federal court order, admitted two Negro students, briefly suspended them because of disorders, then readmitted them under another court order *(Holmes v. Danner)*. The state legislature repealed its compulsory school closing laws, and adpoted local option, tuition grants and freedom-of-choice plans.

Aug. 30—Atlanta desegregated its first four schools, admitting nine Negroes without incident, under court order in *Calhoun v. Latimer*. A three-judge court at New Orleans ruled unconstitutional the state law permitting local option school closing to avoid desegregation. Later upheld by U.S. Supreme Court *(Hall v. St. Helena Parish School Board)*.

Sept. 6—Dallas, the nation's largest segregated school system, admitted 18 Negroes without incident to schools with whites. The South's public schools experienced their second school opening without violence since 1954.

Oct. 23—U.S. District Judge William E. Miller declared that the Tennessee pupil assignment law was not a plan for desegregation, but that school officials could use the law once desegregation had been accomplished *(Sloan v. Wilson County Board of Education et al)*.

## 1962

Jan. 24—U.S. District Judge Irving Kaufman of New York ruled in *Taylor et al v. New Rochelle Board of Education* that education officials are obligated to seek a racial "balance" in a school if they ever in the past deliberately created an "imbalance" by choice of school sites or designation of attendance areas.

February—The NAACP initiated a campaign against school segregation outside the South.

March 30—Abraham Ribicoff, secretary of the U.S. Department of Health, Education and Welfare, announced that in September, 1963, segregated schools would be inadequate for children whose parents both lived and worked on federal installations, which would mean the withdrawal of "impacted area" funds.

April 9—U.S. District Judge John F. Dooling in New York held in *Branche v. Board of Education of Hempstead* that a segregated education was inadequate and said: "That it is not coerced by direct action of an arm of the state cannot, alone, be decisive of the issue."

June—The South's public schools completed their first year without violence since 1954, when the U.S. Supreme Court ruled on school segregation.

Aug. 21—U.S. District Judge Bryan Simpson, in issuing desegregation orders for two Florida counties, Duval and Volusia, ruled that the school boards must desegregate the teachers and other personnel *(Braxton et al v. Board of Public Instruction of Duval County* and *Tillman et al v. Board of Public Instruction of Volusia County)*.

September—Threats of violence, bomb hoaxes, boycotts, gun shots, and jeering crowds accompanied the court-ordered expansion of desegregation in New Orleans public schools and the voluntary desegregation of Catholic schools in Southern Louisiana.

Oct. 1—James Meredith, a Negro enrolled at the University of Mississippi by court order in *Meredith v. Fair*. A riot broke out on the campus the night before, when Meredith arrived on campus accompanied by federal marshals. President John F. Kennedy called in federal troops to restore order, and federal marshals remained on campus until Meredith graduated in June, 1963.

Dec. 7—U.S. Fourth Circuit Court of Appeals ruled that desegregation suits may involve multiple plaintiffs and "others similarly situated"—i.e. as "class actions" *(Brunson et al v. Board of Trustees of School District No. 1 of Clarendon County)*.

## 1963

Jan. 28—Harvey Gantt enrolled, without incident, at Clemson College, S.C., as the school desegregated under court order *(Gantt v. Clemson Agricultural College)*.

May 27—The U.S. Supreme Court, for the first time since its 1954-55 decisions, commented on the pace of school desegregation under its "with all deliberate speed" order. In *Watson v. Memphis*, involving park desegregation, the court issued a sharp warning that continued delay and evasion would not meet the court's test of constitutionality. The opinion said the court "never contemplated that 'deliberate speed' would countenance indefinite delay in elimination of racial barriers in schools . . ."

June 3—The U.S. Supreme Court held unconstitutional the transfer provisions permitting students to transfer from schools in which their race was in a minority *(Maxwell et al v. Davidson County Board of Education* and *Goss et al v. Knoxville Board of Education)*.

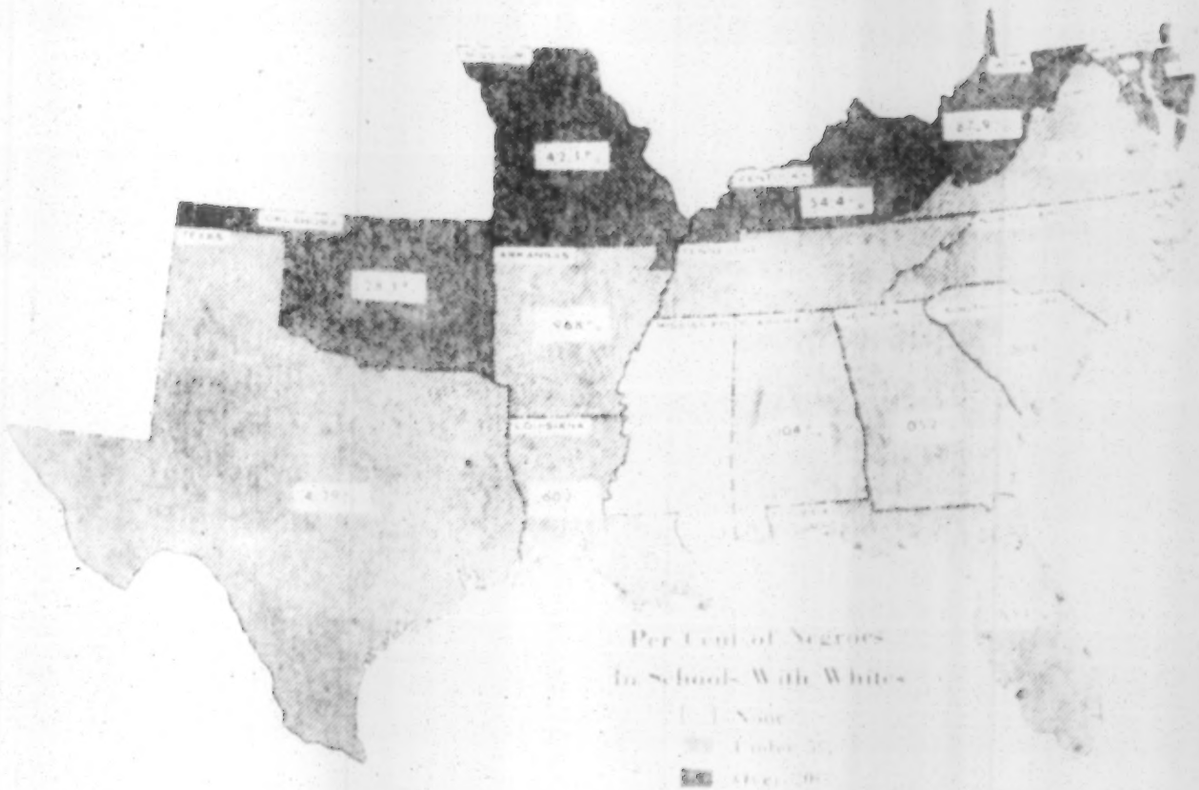
June 11—Gov. George Wallace stood in the doorway of the University of Alabama to prevent entry of two Negroes accompanied by federal officials, although a federal court injunction *(Malone v. Mate)* and a presidential proclamation had ordered him not to intervene. President John F. Kennedy federalized the state National Guard and the Negroes were registered the same afternoon.

September—The 166 school districts desegregating for the first time included the first ones at this level in Alabama and South Carolina. Charleston, S.C., admitted 10 Negroes under court order *(Brown v. School District 20 of Charleston County)*. Negroes entered schools with whites a week late in four Alabama cities—Birmingham, Huntsville, Mobile and Tuskegee—after state troopers under the orders of Gov. George Wallace had attempted to thwart their admission. The governor ceased his efforts after President John F. Kennedy federalized the state National Guard and all five U.S. District Court judges in the state issued restraining injunctions against Wallace. Violence directly connected with school openings included a midnight explosion near the home of Henri Monteith, who had won a court suit to enter the University of South Carolina; a series of gatherings outside the Birmingham schools by protesting whites and student boycotters; a fire explosion that heavily damaged a Catholic parochial school at Buras, La., which had desegregated the previous year but been completely boycotted since then by both races; and bullets fired into the home of Negro parents at Smithville, Tenn. Two newly desegregated schools experienced complete boycotts by whites: In Tuskegee, Ala., the voluntary withdrawal of whites left only 12 Negroes in the formerly all-white high school; Surry County, Va., closed its only public white school after all the whites voluntarily withdrew because the State Pupil Placement Board had assigned Negroes there; the county's Negro school remained open. In Prince Edward County, the Free School Association began operating a desegregated private school for Negroes, who had been without formal classroom instruction since the county closed its public schools in 1959 to avoid desegregation.

Nov. 1—U.S. Seventh Circuit Court of Appeals upheld the Gary, Ind., school board's right to assign students to neighborhood schools, even though it might result in racial imbalance or *de facto* segregation in the schools.

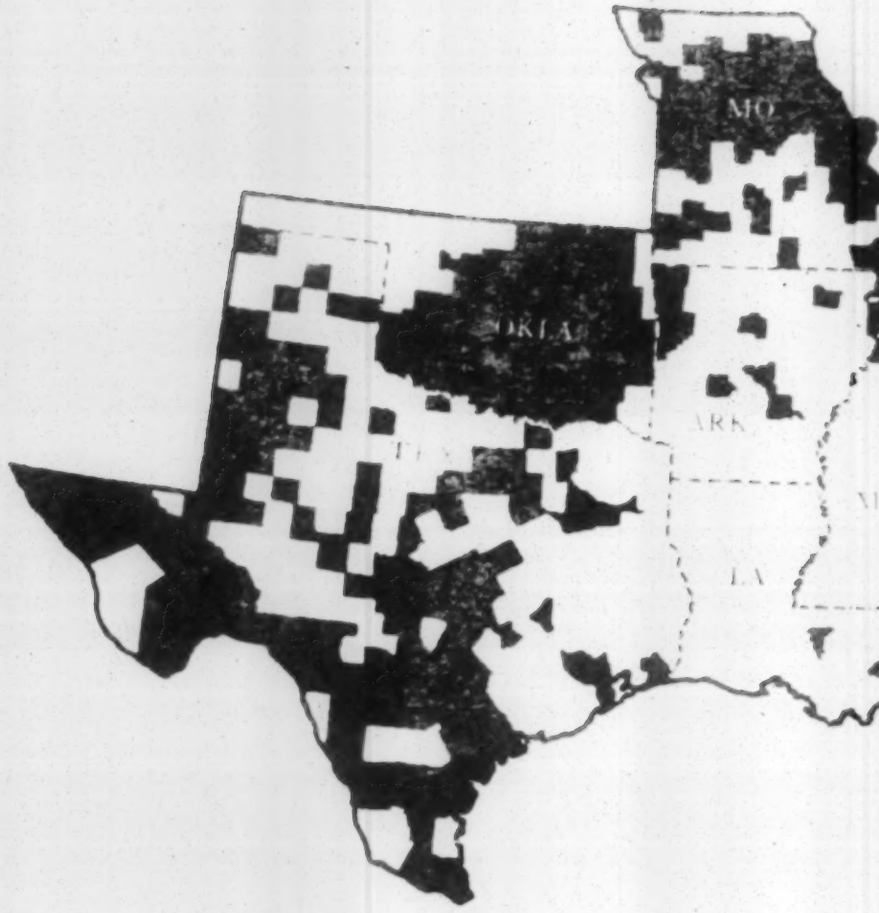
# Statistical Summary

of school segregation-desegregation
in the Southern and border states

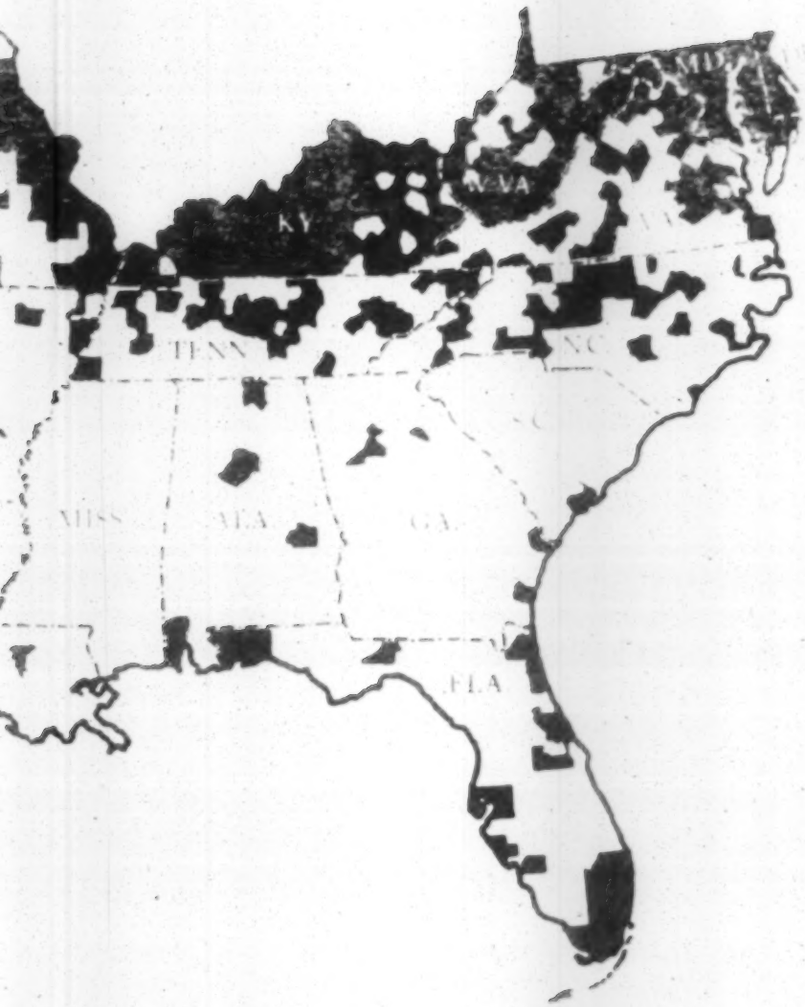


Published by Southern Education Reporting Service

1963-64



The shaded areas are the counties in the region that have at least one public



public school district with desegregation in fact or in principle.

School segregation

I am Joan Hamilton speaking for Southside CORE. We who are concerned about equal educational opportunity wish to emphasize and insist that funds which are allocated to improve the education given to disadvantaged students DO accomplish this end.

A.) Take the money spent for a 2½ man Human Relations staff, for the whole city of Chicago. This does not serve our needs. Abolish this sham. Human Relations is not an isolated function. Administrative and clerical personnel in our neighborhood schools should be chosen on the basis of a successful background in intergroup relations, and on the ability to maintain the respect of the whole community in which they work. Seek our people skilled in human relations---they can be trained in administration if necessary.

Fisk University is a good place to start; there should be brown-skinned faces in every principal's office, and these individuals should be encouraged to contribute as freely as possible to the improvement of school conditions and community relations. The principle of interracial teamwork, of professionals working openly with community people is paramount here. Oftentimes, there is a need for white prople to step back, to listen and learn. Let them not be too arrogant to do so. There are far too many instances of a kind of dictatorship of school authorities alined against responsible parent and community groups, so that sometimes our schools seem to be run like penal institutions.

Millions in tax money have gone into urban renewal in our district; some strain and tension has resulted. It is vitally important how manifestations of this that involve children of different backgrounds are handled. Hostility on the part of school administrators and too ready reliance on the police can have terribly serious consequences in this district. We all have a grave responsibility to see that minor behavior problems are not aggravated into large ones by mishandling and insult.

B) The major justification for a neighborhood school policy rests on the idea of the school as a community institution, does it not? Why, then, are not the schools permitted to become community institutions? There should be no question of funds for evening maintenance during public meetings. Communities all across the country have been developed in this manner. Citizens participate, learn of their particular educational needs, and decide how to achieve them, raise the money, etc. The Woodlawn Organization has some very sound and imaginative proposals on this. And, if this sounds like social change, well, it just might be — Chicago is probably 20 years behind the times — so let's get moving on it.

C) Spend no more money for mobiles. Some of those already bought can provide better lunch and special services space at fully used schools like Ray; another possibility is to use them for the smaller classes of handicapped and blind children. A very small portion of that money should be invested in setting up a couple of bus routes taking the grammer school children from Hyde Park High School to, say, Bradwell and other grade schools which have had high school branches, and then returning the older children from South Shore to Hyde Park High, so that this fine school may carry a full program. Segregate by age, not race.

D) Spend available monies where they DO the most— Take social center, for instance. The children at our school (Ray) who cannot go home for lunch are daily subjected to cruel and irresponsible conditions such that the noon hour is more of an ordeal that a recess. Plainly, the accepting and accommodating atmosphere now achieved only after school hours at Social Center would be a far greater help toward increasing the children's ability to learn if it were instituted in the middle of the day. Personnel from the community can be acquired for such non-teaching duties, as is already done for crossing guards.

E) Standards set for allocating funds should be determined by the end result — that all children in the public school system, no matter what the family circumstances, are to acquire whatever skills and knowledge it takes to participate fully in their American rights, including the right of pursuit of a productive and happy life, and to enable them to carry out their duties in our representative democracy, one of the most important of which is to achieve <u>real</u> representation of low-income and historically disadvantaged groups in governing bodies.

The systematic denigration of the personality and leatning potential of many thousands of non-privileged children must end. The children only fail when we have failed them. No child should become a social outcast by verdict of school administrators, and consigned to living outside the pale of the dominant for the rest of his life. Yet, look how early this process commences — Do the schoolbooks our children look at ever show dark-skinned Americans in everyday context? Millions of brown-skinned kids never see children like themselves; and equally bad, millions of caucasian youngsters never see them either.—What a telling lesson in white supremacy. This kind of identification with the learning materials is basic — order this kind of text from your publishing sources now. This fundamental realism is long past due.

# HIGHER EDUCATION AND THE COLD WAR

by Paul Potter

The complex of relations which exists between American Universities and the institutions, conceptions and modes of operation of the Cold War is so pervasive as to be elusive; and the notion of dealing cogently and productively with these problems is challenging almost to the point of being debilitating. I am increasingly impressed with the deficiencies of analysis which have plagued attempts to chart these relationships and feel that this paper might best be devoted to an effort to develop a more adequate conceptual framework from which to view the nature of the University's entrenchment in the Cold War.

During the last few years an impressive amount of documentation has begun to appear revealing the extent to which Universities are involved officially in Cold War efforts. The bald statistics are in themselves monumental documentation of the commitment of American higher education (one might add the elite of American higher education) to the Cold War. During the current fiscal year, the Federal government will pump $1.2 billion of research and development money into American Universities and Colleges--a 450% increase since 1954. Of that money, 39.8% comes from the Department of Defense, 30.0% from the Public Health Service, 11.1% from the National Science Foundation, 8.0% from the Atmoic Energy Commission, 6.0% from the Department of Agriculture, 3.6% from the National Aeronautics and Space Agency, and 2.0% from the Office of Education. The $1.2 billion figure is twenty per cent more than the total raised by contributions of alumni, friends, foundations, corporations and religious demoninations.

There has been a marked concentration of government funds among the top Universities in the country. In 1960 68% of the money went to 25 Universities, 82% to 50, and 94% to 100. M.I.T. leads the way with appropriations of $80 million a year from the Defense Department, while its regular school budget is about one quarter that amount. The school has the dubious honor of ranking 41st among American corporations in their cut of the defense pie. In contrast, the 186 private liberal arts colleges and 55 state colleges participating in the program received 1.1% of the $1.2 billion appropriation.

The effects of these increments is summed up in the mildest of language in a recent report by the National Student Association. They are:

First, there is a high degree of concentration in federal programs. This means that certain types of institutions face competitive disadvantages. Universities with doctoral facilities have great advantages in attracting federal funds and hence in attracting able young science professors. This in turn makes it all the more unlikely that smaller, independent, non-governmental science programs will emerge from the top hundred schools.

Second, because the government owns the research facilities in many cases, and holds close the purse strings in many other, the independence of the universities benefiting from federal aid is far form assured.

Third, government funds tend to go toward defense work, or work stemming directly from our military or Cold War commitments.

Fourth, the injection of federal funds continues the downgrading of the humanities in our society.

Fifth, federal funds contribute toward the current research over teaching preference of most science professors.

Sixth, there is increasing danger that the imbalance created by federal funds earmarked for science will make it less likely that competent

students will choose to go into the humanities...
Seventh, the federal programs by their nature tend to militate against the concept of full liberal, non-specialized education.[1]

The most disturbing realities of the situation go beyond even these sobering comments. The plain fact of the matter is that the Pentagon has just bought up the nation's foremost institution of science and technology--and the sale was made with virtually no protest--indeed with virtually no public recognition of the fact that the sale was being made. It has also purchased sizeable chunks of the science faculties of the rest of our major Universities, bringing with itall the trappings of military security, team research, distortions of scientific priorities, and neglect of class-room responsibilities--not to mention the headless, unconscious nature of the entire program conception. And as Sidney Lens points out, the Universities seem to be trapped. One can make a reasonably plausible analogy between current federal support and classic examples of imperialism or neo-colonialism. The government has invested in underdeveloped, capital-starved institutions and imposed a pattern of growth and development upon them which if disrupted would lead to economic breakdown and political chaos.

Some of the critics of the current program have in fact urged a sort of colonial rebellion on the part of the Universities--enjoining them to throw off the yoke of federal domination, seize their destinities in their own hands regardless of consequences, and band together to assert their independent bargaining power. The realists in our midsts on the other hand (such as the presidents of well-endowed private Universities) have contented themselves with repreated pleasefor an understanding of the fact that a problem exists and grave warnings (never threats) of what will surely happen if recognition of that problem is not forthcoming. A much larger per centage of institutional spokesmen have devoted themselves quietly (occasionally vociferously) and assiduously to the difficult task of raking in the defense and research contracts.

Although I do not wish to underestimate the somber implications of the current federal program, I do wish to express my skepticism not only about the likelihood of disentangling the Defense Department from the Universities but, more importantly, about the imputed salutary effects such a divorce would have. True, the obvious evils outlined in the above paragraphs would be gone. <u>But that is all</u>. Our Universities would not turn into centers of agitation to find alternatives to the Cold War; our scientists would not automatically redirect their efforts toward peaceful utilization of their skills; the entrenchment of the Cold War in the American University would in fact still be ideologically intact although materially reduced; and of course the government would continue to staff its war research--most probably with scientists seduced away from institutions of higher education. In short, the implicit notion expressed in most critiques of defense spending in the Universities--that the current attitude of the federal government toward higher education is suppressing a natural effort to combat the Cold War--is in my opinion the purest of liberal mythology --a tendency on the part of some people to see a McCarthy under every bed.

The most appropriate question for our consideration at this time is not how to get rid of the defense minions in our Universities but rather to come to understand how they got to be there in the first place. In understanding that,we will understand the status quo which we might restore if they were to be ousted by some act of providential grace.

The most often-repeated and immediately plausible explanation is that the Universities accepted the Defense Department as a benefactor only because of des-

parate financial need engendered by increasing costs of higher education and rapidly rising enrollments. Although this explanation provides part of the answer, it fails to identify a more basic characteristic of the American University --one that should be immediately identifiable and easily comprehended. A most obvious manifestation of this characteristic is that there was not at the end of the Second World War and is not now any good reason why American Universities should have qualms about serving the interests of the United States through military and quasi-military research. Indeed, any dissent from such a role would raise the most cataclysmic kind of conflict between the organized University system and the government and the public in general. The notion that American Universities should be anything but elated about the opportunity of assisting this nation in its Cold War struggle is simply, plainly and demonstrably a notion totally alien to the American University tradition. It has in fact been the hallmark of the country's scholarly development to be responsive to new problem areas in the nation as a whole. Universities have considered it their responsibility to assist in whatever way possible in the solution of new problems. I would stress the word solution--not the examination of problems or the axioms or precepts which have engendered problems; there has been no suggestion that the problems themselves were somehow to be fundamentally questioned. From Ice Cream 102 at the University of Wisconsin to a 4000 man radiation laboratory at M.I.T., American Universities have been ready to assist this nation in the resolution of its felt needs.

This is not the point to launch into a discussion of the American University tradition or lack of it. Rather I wish only to make the simple and obvious observations that the Cold War is not perverting University traditions--it is simply underscoring and accentuating what has always been and bringing starkly to the fore the unconsidered nature of the relationship of the American University to American society. If this simple notion is to be of use to us in an analysis of Cold War problems it must be seen honestly in its stark contrast to the rhetoric of academic freedom, University autonomy, and University as critic and agent of change, which dominates our mythology about the relationship of institutions of higher education to the nation.

Nothing could make this point more clearly than our very academic discussions of academic freedom. We write tomes about the possible circumstances under which we might allow Communists to teach without ever coming to grips with the obvious need to expressed by partisans viewpoints which are given recognition and succor in countries representing almost half the people in the world. Such a notion is totally alien to our discussion of academic freedom because it is fundamentally in conflict with the accepted conception of the University which postulates academic freedom in the negative--as a method of protecting the rights of the majority by extending those rights to a minority--"no matter how abhorrent". Our idea of University autonomy reflects the same negative quality; autonomy in the American sense could be translated as "a little leeway to consider some problems in a slightly unorthodox fashion". We have no notion of a truly autonomous University system removed from the vagaries of nationalistic concerns, dedicated to the fundamental examination of the institutions of society rather than the truncated examination of the methods of manipulating existing institutions.

But enough. The point is clear. It should also be equally clear why it is not accepted. The ideology of liberal education prefers a notion of man as a rational being who examines ideas on the basis of their merits--mysteriously free from the inhibitions which his society has institutionally defined for him. It comforts us with the idea that we can somehow create autonomous man (free from the obvious external restraints that define his culture) who will act justly, prudently and at the same time [illegible]aculously in the best interests of the United States.

Beyond this, the fact of the University as faithful servant of the establishment is rejected because of the equally obvious fact that our Universities (especially the best ones) do demand change of their students, do challenge them, do confront them with previously unperceived problems--do in short succeed in "liberalizing" and making different men out of the people who enter the Universities. But different in what sense? Different in the sense that our best Universities train substantial per centages of their students to participate in the secular enlightenment of the American establishment. Higher education is engaged in the difficult task of creating the men who will lead the existing system and draw from it all the considerable vitality, ingenuity and strength which is demanded from it. Such men must accept to a certain extent the absurdities and contradictions of that system if they are to be effective. Compromise is demanded of them--and its character is insignificantly affected by the wistful and forlorne lament of a handful who cry out that the compromise is unconscious.

This background places the problem of the Cold War and the Universities in greater relief. From this perspective flow two fundamental conclusions: First, we must come to recognize that those of us who accept as valid the basic elements in the above critique stand in a fundamentally different tradition from the vast majority of students and professors in the country; we recognize that we cannot accept their terms of analysis, that we demand a more fundamental, systematic and humane approach to the problems of mankind. We recognize that the Universities are currently concerned with the dev lopment of none of these approaches and are in fact because of their historic commitments to the nourishment of the existing system, a commitment intensified ultimately by the Cold War, in some sense in opposition to their development. And we recognize that the only course for us is to stand outside the existing traditions and on the basis of our own intellectual, economic, political and human resources develop alternatives to the system so compelling as to obtain basic concessions from it.

Second, we must determine criteria of effectiveness which are internally structured, which will allow us to act effectively without consciously making the same compromise which we have criticized our peers for reaching unconsciously. The point is simply that we should dare to be effective.

I would like to contrast these notions with those set forth more frequently by concerned liberals, radicals, and other reformers. Their analysis of the situation is much the same as my own; they have recognized the commitment of the University to the Cold War, its intransigence on questions of basic change, but at the same time the necessity of securing whatever change is possible if we are to escape war.

These groups have proposed many plans for altering the University's commitment to the Cold War which I will grossly compress here into three generalized proposals: (1) balance; (2) counter-balance; and (3) transcendance.

The balance theory suggests that if the University is to be engaged in war planning and research, there should be at least some balancing to insure that peace research is given competitive opportunities in the University.

The second approach, counter-balance, demands that the Univerities oppose or at least constantly re-evaluate the commitments of the society and that in this respect all efforts should be directed toward an assault on the established defense policies of this country. Harold Taylor gives this idea forceful expression in saying, "The Universities and the intellectual community exist to chal-

lenge accepted truth and accepted values, to create new conceptions, to stand against the organized establishment as that part of the social organism which works as the brain and the conscience of the entire enterprise. Unless they are prepared to embrace this mission, they condemn themselves to a history of service to the establishment whatever the establishment may be."[2]

The third notion, that of transcendance, is much like the second with the exception that it views the perversion of the Universities' function as one that will continue unless scholars escape their crisis orientation to the Cold War and return to basic problems of science and the humanities--the partial solution of which may allow us to put at the service of society tools of analysis and control which will be adequate for the immense tasks that confront us. In short, they feel that our techniques of dealing with basic human problems are so crude that no possible reallocation of resources can bring about a peaceful world until there is a "breakthrough" in our understanding of man and his troubles.

All three of these approaches recommend themselves to us in certain ways. The first in that it points up the fact that there is a politically potent case to be made for expenditures for peace research in light of the infinitesimal fraction of our expenditures for war that this would represent.

The second notion of counter-balance is, as I think Taylor intends it, a goad to the conscience of those intellectuals who have forsaken their belief in a truly autonomous, intellectually and socially dedicated, University. It presses home the point that an autonomous University is not only a sound notion for a stable society but the only sane notion for a society trapped in crisis.

All this is well and good, but the critical weakness that all three systems share in common is that they are couched in terms of the established power of the society. But it is the established power that is systematically rooted in the Cold War, in illusory concepts of American beneficence and in ethnocentrically determined impressions of what is at stake in the current conflict and what is politically acceptable as a mode of resolution. A large per centage of those committed to more or less fundamental change in world relations is also committed to the mechanisms of a system which is demonstrably changeable only in superficial ways. Why the commitment? I have already reflected on some of the reasons. Paul Goodman, in his essay "The Ineffectuality of some Intelligent People", (to which this paper is greatly indebted) probes deeper.

> There is a political pathology in the essence of contemporary social theory that makes revolutionary alternatives inconceivable to the social scientists. With the best will in the world they cannot see any source of power outside the established power, so there is no point in wishing or talking in other terms even though the established power has no other raison d'etre than to wage the Cold War. The social scientists are balked by the narrowness of what they regard as admissible evidence. Contemporary social theory consists in analyzing the arrangement and possible rearrangement of units that are defined as entirely socialized to the system of society, or as deviant...
>
> It is characteristic of our social scientists never to mention the function, the satisfaction (or danger), the process, the product or the utility. This leaves out everything in terms of which we could actively change anybody's "acceptance" or "rejection"...
>
> Thus, neglecting history, animal and social nature, political philosophy,

poetry, the social scientists are left with a closed system of society in which nothing is possible but a better arrangement of the same forces.3

Now let us return to our three systems of attack on the Cold War. They are seen now as not only inadequate but also intellectually and politically debilitating.

The transcendance theory can only become viable when it not only escapes the crisis orientation of the Cold War but determines that it will also escape the limits of analysis imposed by the systems that produced the Cold War. It can only become effective when it accepts the principle that its new vision must in all probability find expression outside the current vision.

The counter-balance incentive can only become realizeable when it too dares to renounce its commitment to current institutional mechanisms which are ultimately committed and begins to create new patterns of thought and action which relate ideas to people as well as ideals.

The balance system only becomes operative when it too realizes that peace research can be as sterile and incapacitating as war research when the terms of conflict are not challenged along with the modes of conflict.

In summary, I have presented the point of view that American higher education through institutional inertia and bureaucratic agglutination, through political pressure and educational ideology is deeply, and under the pressures of the current world crisis, ultimately committed to the nourishment of a national and international system in which the Cold War is inextricably rooted. Implicit in all that I have said has been the view that the model for changing that system cannot be an adjustment model. Our problem is not that the system is not working well enough; it is rather that the current system is working entirely too well--that it is working us all into a final catastrophe.

My second major point is then that we must forsake the current adjustment model and begin to search for a revolutionary model which is dynamic enough to extricate us from the continually narrowing concentric circles which define the limits of change within the established political power structure. This does not mean that concessions should not be sought or cannot be gained. It does mean that those concessions in the vast majority of cases will be minor and will fail to provide the basis from which a revolutionary model can be developed. (Examples of "revolutionary" and "adjustment"models are appropriate here. The NAACP in attempting to bring about integration through court action and pressures upon traditional political channels is working on an adjustment model. The Southern Student Movement in employing non-violent direct action which works outside and frequently against established channels is working on a revolutionary model.)

My third point then is that in order to develop a revolutionary model, concerned faculty and students will for the most part have to move outside the University-defined spectrum of lectures, seminars and officially sanctioned research. And more importantly, that they will have to move outside the societally defined spectrum of what is relevant since relevance is defined today as that which is directed at adjusting the current power structure. It is because of this that priorities must be defined internally. Where and how this is done is the topic for another article concerning the counter-university (and perhaps the counter-politics which must accompany its construction). Suffice it to say here that throughout the country students are, in small groups to be sure, beginning to look to their own resources in attempts to redefine the issues of our time in a perspective that is intellectually more honest (if frequently less sophisticated)

than that of their Universities. These are an interesting strain of rebels (who was it that suggested that ideally education should be institutionalized, continuous, intellectual rebellion?); they have chosen, at least for the time being, in an important way to stand outside the organized system. They have chosen to be effective but they have shown the courage to define for themselves what is effective. But there is a grim analogue here. For in daring to be effective, in attempting to develop our own priorities independent of establsihed priorities, in pressing to build our own institutions independent of existing institutions, we dare also to be ineffective. We risk our small influence on the existing structure in order to stand apart from it and build a new one, recognizing full well that basic changesmay be impossible. It is on this point that American liberals and radicals have historically foundered--the only difference today is that civilization promises to founder with us.

## SCHOOL DROPOUT RATE ALARMS EDUCATORS, SOCIOLOGISTS

**The National Urban League Spotlights An Issue**

THEY ARE CONCERNED — City Human Relations Director Alfred E. Cowles, left, and Charles Sims, 28-year-old welfare department caseworker, review the study done by Sims to find out what Negro high school graduates are doing. A February graduate of Aquinas College, Sims did the survey on his own time to help keep more Negroes in high school.

The National Urban League acknowledges with warm appreciation the permission extended by THE GRAND RAPIDS PRESS to reprint this timely and significant report written by Kurt Luedtke and Margaret Moore. The concerns and action reflected in this material is typical of what can be found throughout the sixty-two urban areas of the nation served by the League, in which live 70 percent of the urban Negro population. These concerted activities focus sharply on the problems and incentives for Negro young people today. The Urban League is most pleased that, through support provided by the Carnegie Corporation, it is able to give this article wide distribution.

# Negroes Quit School At Alarming Rate

Time was, during the school-building boom of the '50's, when a popular illustration had would-be students standing before closed schoolroom doors, unable to get in because of overcrowded classrooms and inadequate facilities. "Equal opportunity" and "more schools" became battle cries and the country now is catching up with its booming school population.

Today another problem is pushing itself to the fore, causing increasing concern and consternation among educators, economists, law enforcement officials and sociologists: that of the growing number of young people who are unwilling to complete their high school education, who leave school at the legal minimum age of 16 pathetically ill-equipped to provide for themselves and to cope with the problems of American society.

For them, the door swings the other way.

The number of high school dropouts is rising each year and although any dropout is a matter of concern, that of the staggering number of Negro boys and girls who deliberately do not avail themselves of the educational opportunities for which the race has waged an unceasing fight is a unique and complicated problem with implications that are both far-reaching and dangerous.

## *Dropout Rate Much Higher Than That of White Students*

The Grand Rapids Human Relations Commission last week released a followup report on the city's 1960 and 1961 Negro graduates, who they are and what they are doing today. The entire group of nonwhite graduates for the two years was contacted. Their total number, from five city high schools, was 124—47 in 1960 and 77 in 1961.

For each of these classes, four years earlier when the age groups were 15 years old, the figures were 128 and 138 respectively. Only a little more than a third of the Negro class of 1960 and a little more than half of the class of 1961 completed high school.

For the same years, nearly 90 per cent of the white students who started the ninth grade graduated.

Somewhere between the time the students became 16 and graduation day, the school system lost more than half of the young Negroes who are optimistically being relied upon to help solve the problems of the Negro in America.

For the 16-year-old Negro lacking a diploma, the prospects are bleak. It is difficult for him to get a job; only the unskilled trades will take him. Economically, he is a liability from the moment he leaves school; socially, he is neither equipped nor inclined to accept the responsibility of improving himself and his community. Indeed, he has already been earmarked by law enforcement agencies as one of those most likely to commit a major crime during his lifetime.

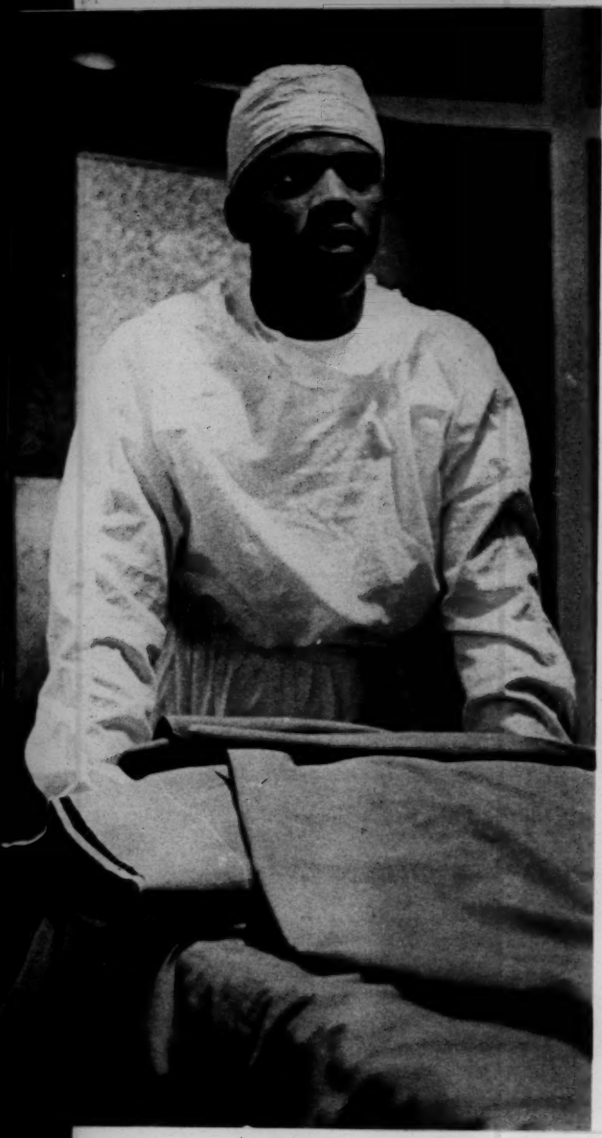
Why, then, do they leave?

## *'Youngsters Aren't Motivated To Improve Themselves'*

No single answer explains their situation. It is complicated and highly individual.

Tough-talking Paul Phillips, a Negro himself and executive secretary of the Urban League, has one answer:

"It's motivation, or rather, the lack of it, that creates this



I-don't-care-attitude. On the one hand, the youngsters are not being motivated by the Negro community to improve themselves. Many are the products of nearly illiterate homes with low economic situations and high unemployment.

"The children grow up in a state of flux, one in which goals are not defined, ambitions not encouraged. Parents who are used to discrimination, who are consciously inferior, feel 'beat.'

"On the other hand, we have the employment situation in Grand Rapids which is greatly affected by prejudice and discriminatory hiring practices. Realizing that even completing high school is not going to make things easy, too many are taking the quick way out, blaming their own lack of initiative on external conditions."

High school counselors point up other areas of difficulty.

"The simple fact is," said one, "that these kids are not happy in school. They leave to get away from social pressures which make them feel awkward, uncomfortable, unwanted.

"Many of our Negro transfer students arrive so poorly educated that they are immediately put back one, two, even three grades. They are objects of ridicule by their classmates. Much older and larger than their fellows, they cover up by telling themselves it's not important. By the time they realize it is, it's too late."

Another maintains that most parents want the children to complete high school but can find no way of providing the motivation to encourage them to do so.

There are other factors. A very few must leave school to help support large families or, as an alternative, at least to get out of an already overburdened home. And some even drop out just before graduation because they cannot afford the cost of renting cap and gown, printed announcements and other expenses considered minor by their fellow students.

## *Society Will Pay Dearly In the Decade Ahead*

Thus, at a time when many well-informed white and Negro leaders are looking to a new generation of educated Negro young people to lead the race toward a higher standard of living, better job opportunities and social responsibility, less than half in Grand Rapids are meeting educational minimums.

Society is paying for the problem already and will pay more, much more, in the decade ahead.

In unemployment compensation and welfare budgets alone, the figures grow astronomically. When they are combined with deficits from low

◀ WHY GRADUATE AT ALL?—Nolan Groce, 19, left, an orderly at Butterworth Hospital, graduated from high school and spent a year and a half at Junior College. George Lowe, 21, finished the 10th grade, then quit, works in the housekeeping department at Butterworth.

tax bases in Negro housing areas and the high costs of law enforcement and social rehabilitation programs for this group, discrimination becomes an extravagance that society can no longer afford.

At least half the problem is job discrimination. Figures from the Human Relations Commission report show the average salary for Negro high school graduates who are working in Grand Rapids to be $42.50 per week, barely a living wage. Nearly 20 per cent of those who finished school in 1960 and 1961 are unemployed. A list of the jobs they hold largely consists of menial, unskilled labor positions with little opportunity for advancement.

## *Much Is Being Done, But It's an Uphill Struggle*

Much is being done to aid the young Negro, both to keep him in school and to help him find work if and when he graduates. An expanded high school counseling sytsem fights continually to help white and Negro alike stay in school, to help him enjoy it while he's there and to motivate him toward a degree. With limited time, they are not often successful.

The Board of Education's vocational training and apprenticeship programs make it possible for the youngster who does not have the grades or the money to go to college to learn a trade. The Urban League last week asked the Grand Rapids board to consider re-establishing a vocational or technical training school.

Phillips himself each year attempts to place promising Negro graduates in local industry.

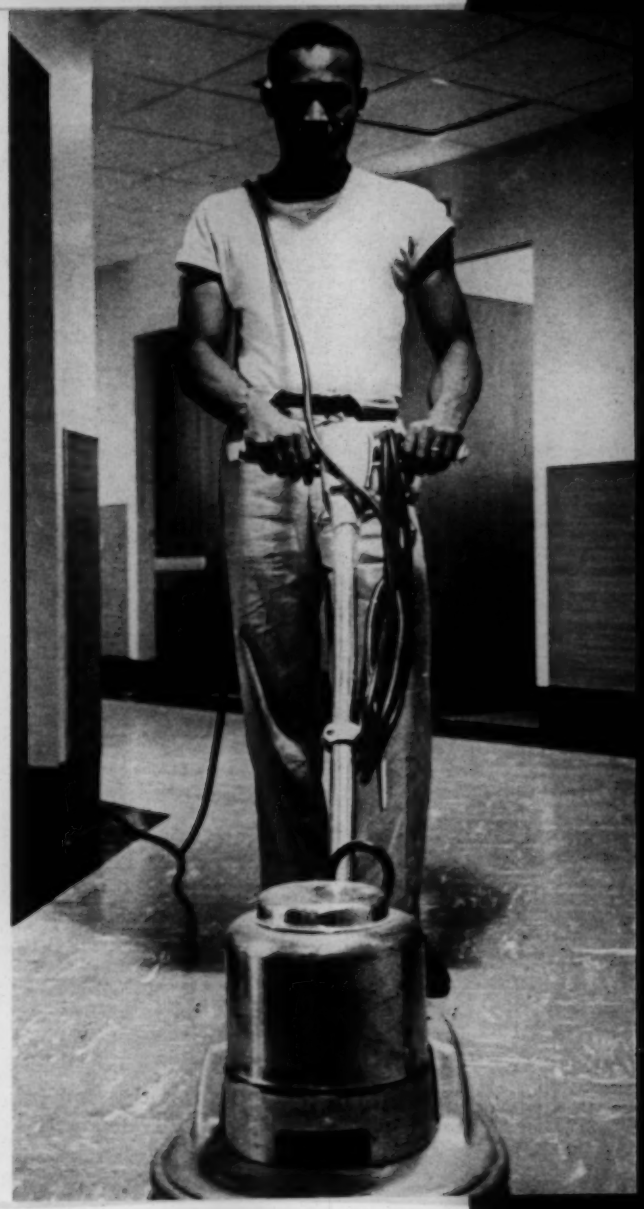
Under consideration, with no formal action as yet, is establishment of remedial classes in junior high and high school subjects for students who fall behind in their work or who transfer to Grand Rapids badly deficient in their studies.

Human Relations Commission Director Alfred Cowles sums up the problem which is taking an increasing amount of his time:

"The situation is getting dangerous. Changing job patterns in the '60's threaten to throw more and more unprepared Negroes on to unemployment rolls. The Negro populations across the country are growing.

"Both races must reappraise their positions and act soon if we are going to avoid what can be a major social and economic crisis."

The door that swings both ways is swinging out too soon and too often.



Both make the same wage. Married and the father of a child, Lowe ▶ cannot afford to go back to school. Groce hopes to return to JC, go on to get a medical degree.

**THIS TIME, SUCCESS**—South High School Counsellor Tony LaPenna talks with a recent dropout who now intends to return to school. More often, counsellors never get a chance to talk to a potential dropout until it's too late. More than half of the city's Negro students do not graduate from high school.

**'ALMOST HELPLESS' AGAINST DROPOUT PROBLEM**

# Counsellors Save Some, but Usually It's Too Late

"I used to sleep 'til noon every day but lately I've been better, getting up early. Sometimes I take the truck to the dump with trash. Mostly I watch television or work on my friend's cars."

Twenty years old, an intelligent, well-mannered Negro called Nathan (because that's not his real name) has nothing to do.

After failing the 10th grade—"I got a car that year; it wasn't the car's fault, it was mine"—Nathan repeated the grade, then left school only months before he was to graduate. Now he attends night school to make up the three credits he lacks and hopes to graduate in June. He is not working.

**Hopes to Enter JC Program**

Nathan thinks he knows the score. He has taken vocational courses in high school and shows promise of becoming a good mechanic. He has already read all the books on automotive

mechanics he can afford to buy. After he graduates he hopes to enter the apprenticeship program at Junior College.

If and when he completes it, he will go to Chicago. "I can get work there and learn my trade. They're funny about that here."

Susan is a 17-year-old Negro girl who moved to Grand Rapids from a small Northern Michigan town. The change was too much for her.

Large classes, new people, difficult social circumstances made her dislike school. She quit school a month ago, weeks away from graduation, against her family's wishes. She intends to return to school, not the same one, next year.

Nathan and Susan are exceptions. They are two students whose contact with their high school counsellor made a difference.

**Experience Is Frustrating**

Working against nearly insurmountable odds, the city's counsellors battle years of behavior patterns, home environments and social problems to keep their youngsters in school. It is a frustrating experience.

"By the time they get to us, it's too late," said one. "Against a backlog of drifting, misbehavior and lack of motivation, we're almost helpless. We have only so much time and a large number of students, not just dropouts, to deal with. Sometimes we can help a boy or girl. Usually we just have to let them go."

Pupil Personnel Director Donald D. Fink knows as much about the dropouts as anyone. His doctoral thesis is a dissertation on the validity of criteria used to identify the dropouts.

"The quicker we can reach a potential dropout, the better chance we have of correcting the problem," he said. Teachers and counselors in Grand Rapids Schools agree with him. An informal committee, under the leadership of Robert Stark of the Grand Rapids Board of Education, is composed of teachers who have volunteered their time to study the problem. Many of them feel that new students coming into city schools, especially from the South, should be tested, counselled and taught separately before they encounter the discouragement of falling behind their age groups in the regular schools.

**"Become Lost Children."**

"Sometimes their English is so poor, they cannot understand or be understood. They become lost children," said Miss Marjorie Sheppard, principal of South High School. "Overage and oversize for their grade, they become either potential dropouts or social problems."

Strangely enough, many students about to leave school don't seem to know why they are leaving. Even the ones who leave seem to recognize the importance of getting a diploma, and what is more, they are under pressure from friends who stay in school.

"When I first left," Susan admitted, "my friends wouldn't even talk to me for a couple of weeks."

She wanted to graduate and her family wanted her to stay in school, but as she said, "They realized they shouldn't make me stay where I wasn't learning anything."

**Exceptional Students Graduate**

Dr. Fink said, "We find that many of the criteria used for identifying dropouts don't work here. Our dropout intelligence quotient average is normal and factors like low economic status don't appear to have much validity in Grand Rapids at the high school level."

The exceptional students graduate. Eighty per cent of the graduates are employed. Thirty-four per cent have gone to college where the majority of them take education courses. The problem is to encourage the average student who will not get scholarships or outstanding job offers, to make it possible for him to equip himself to cope with the problems of society.

Mr. Floyd McKissick
National CORE
200 West 135th Street
New York, New York

Dear Mr. McKissick:

We'd like your reactions to the enclosed piece. It's on how to launch a mass disruptive rent strike, and we think it could work.

You may remember that about a year ago (at the time we first circulated a strategy for welfare organizing), you wrote to us suggesting a meeting. Somehow or other that meeting never came off, and we'd like to suggest it again. Maybe we could have dinner together one night when you're free.

Sincerely,

Frances Fox Piven

# RENT STRIKE

## Disrupting the Slum System

by Frances Fox Piven and Richard A. Cloward
Columbia University School of Social Work

For a few feverish months during the winter of 1963-64, rent strikes broke out in New York's ghettoes. Activists of various persuasions moved in to canvass the tenements, blending the language of the building codes with the language of direct action. In a short time, some 500 buildings were on strike. But almost as quickly as it had erupted; the movement subsided. By late spring, there were few traces to be seen.

The rent strike of 1963-64 was not the first. In the 1890's, after a half century of turbulence among the urban poor, rent strikes were common in New York. They occurred again after the first World War and during the early years of the depression. Accused of bolshevism and threatened with reprisals, tenants nonetheless compelled government to limit rent increases and curtail evictions.*/ These earlier strikes usually began spontaneously, often leading to massive street violence. Radicals tried to capitalize upon these uprisings to build permanent "people's organizations," hoping by education and exhortation to turn the seemingly incoherent energy of the mob into consistent pressure for continuing reform through the electoral process. And this is ironic, for the reforms produced by rent strikes resulted from the disruptions themselves, not from the influence of tenant organizations which, if they emerged at all, were small and unstable. In

---

*/ Virtually the only historical description of rent strikes is to be found in an unpublished paper by Marc Naison. His work was very helpful in preparing this analysis.

retrospect, the rent strike of 1963-64 was probably the least disruptive in history; it was also the least successful in producing any important reforms. Its failure suggests some lessons for the future.

## The Strike of 1963-64

By the early 1960's, New York City had been plagued with a housing shortage for at least two decades. Then as now, the shortage took its severest toll from blacks and Puerto Ricans, who occupied the 550,000 units classified by the Census as "deteriorated, dilapidated, or lacking essential facilities" and the 100,000 other units classified as "overcrowded." The hardships created by inadequate and insufficient housing were intensified by the destruction and dislocation caused by urban renewal and public-works programs, which had set the city's low-income neighborhoods on edge. And by the late summer of 1963, after the March on Washington, activists were beginning to turn to the ghettoes of New York and other northern cities to stimulate blacks to act on political and economic issues.

In this climate of discontent and protest, a maverick radical named Jesse Gray announced a Harlem rent strike. On November 1st Gray took out 16 buildings. A month later, the number had risen to 50. Volunteers from the Northern Student Movement then joined forces with Gray, and another 50 Harlem buildings went on strike. A CORE chapter on the Lower East Side took six buildings out on strike in the fall, and later its efforts were augmented when Mobilization for Youth, an anti-poverty project sponsored by the federal and city governments, helped a variety of community groups to form "The Lower East Side Rent Strike," bringing about 50 more buildings into the movement. Meanwhile, an especially effective CORE group in

Brooklyn organized 200 buildings. In East Harlem, 50 buildings struck, some organized by the East Harlem Tenants Council and others by two local CORE chapters. A union of low-paid blacks and Puerto Ricans, Local 1199 of the Drug and Hospital Workers, helped put 30 more buildings on strike by working with tenants who were union members. With Gray at its head, a massive protest seemed about to burst forth from the black slum. The civil-rights movement had indeed come North.

But day-to-day organizing had little drama. After the first flush of enthusiasm, young and inexperienced organizers began to accept the guidance of the Metropolitan Council on Housing, an organization of older radicals which had formed during the earlier struggles against urban renewal. Met Council's leaders urged cautious tactics consistent with the complex statutes governing rent withholding. The law prescribed an elaborate bureaucratic course, and the courts interpreted the law rigidly. Judges admitted only the inspection records of the Department of Buildings as evidence of hazardous violations. To obtain those records, organizers had to fill out forms and arrange and follow up appointments for inspections; check agency files to make sure that hazardous violations had been posted; and meanwhile see that rents withheld by tenants were being collected and deposited in a private escrow account. (If the tenants lost in court, these funds were turned over to the landlord; if they won, the money was turned over to the clerk of the court, to be given to the landlord after repairs were made.) Finally, organizers had to shepherd tenants through the courts. And all of this turned out to require enormous effort and expertise.

At the outset, rent-strike cadres were not dismayed by these elaborate procedures. Indeed, they defined them as a means of educating tenants and building tenant associations. Canvassing door-to-door to discover housing violations was a way of making contact with tenants; filing "multiple form" complaints was a way of stimulating building meetings; assigning tenants the responsibility for collecting rents and managing escrow accounts was a way of strengthening building committees and developing leadership. And through these tenant groups, organizers believed the poor could be educated to the larger political issues underlying slum housing. Such "radicalizing" of tenants was presumably to produce mass associations capable of exerting regular influence on government. In this way each arduous bureaucratic task would contribute to the creation of a permanent "people's organization." That public agencies were thereby dictating the tactics of the movement struck no one as anomalous.

The emphasis on bureaucratic rules and procedures was also dictated by fear that tenants would be evicted if other tactics were followed. A few evictions did occur, and they sometimes evoked frenzied but haphazard resistance. Early in February, Gray and ten of his aides were arrested for attempting to prevent an eviction by "strong-arming" city marshalls. Sometimes, when marshalls appeared, organizers sat on the furniture while one of their number hurried to file a stay of eviction with the court. When furniture was already piled on the street, organizers occasionally moved it back to gain time to get the tenant into court. But while such "holding" tactics usually worked, they were not employed regularly, for the organizers

concentrated on using legal safeguards. When CORE organizers failed to resist the eviction of a family on the Lower East Side, other striking tenants, fearing that they also would be turned out, hysterically demanded the rent money from their escrow accounts. That event broke the strike in the CORE stronghold on Eldridge Street. Such experiences seemed to affirm the importance of adhering all the more to elaborate bureaucratic procedures. In time, organizers became clerks, and political action was reduced to bookkeeping.

The test of these tactics was to come in the courts. The first two cases were heard during a barrage of publicity and were won by the tenants. But public interest quickly faded, and in subsequent decisions judges reaffirmed traditional property rights. When, sometimes mysteriously and sometimes because of slip-ups, records subpoenaed from the Department of Buildings failed to show hazardous violations, judges rejected the testimony of tenants or photographs of building conditions and ordered the rents to be paid, often berating the organizers for trouble-making. Landlords frequently asked for adjournments, since they knew that many tenants would prefer to pay the rent rather than spend another day in court. Such failures led organizers to adhere even more rigidly to procedures, to focus more and more energy on fewer and fewer buildings.

But the bureaucratic rites by which repairs were to be exacted, and tenants educated, exhausted organizers and bewildered tenants. To cope with agency procedures required precisely those resources of money, expertise, and forbearance which are scarcest among the poor. Meanwhile landlords

exploited bureaucratic intricacies and corruptibility to evade or overcome the challenge. Even occasional tenant victories in the courts yielded only minor and temporary repairs. Unable to produce repairs quickly and to multiply them widely, tenant affiliation did not expand, and the strike developed little political force. Thus the movement began to subside only a few months after it formed.

## What Should Have Been Done?

At first blush, rent strike appears to be a simple and powerful strategy to bring about housing reform. It can be just that, but only if it acquires the momentum to compel government action. In the strike of 1963-64, the landlord was the target, and that was the first mistake. Slum landlords generally do not have the resources to rehabilitate their buildings - not, at least, unless rents are substantially increased. The slum is the underbelly of the real-estate market: tenants who cannot compete for housing elsewhere are preyed on by entrepreneurs who lack the capital or competence to compete for profit elsewhere. More prosperous and stable real-estate investors put their capital in the regular market, where money can be made in less demeaning ways, leaving the slum to be exploited by men who seek to gain on dubious speculative exchanges or who, restrained by rent-control laws from levying large increases, shore up their declining profits by skimping on repairs and services. The result is inflated prices and deteriorated buildings - a situation that can be remedied only by public action.

Public programs exist on the books, but are unused. In New York City, for example, low-cost municipal loans can be made to landlords to reduce

the burden of undertaking rehabilitation; by 1963, however, only one such loan had been made, because the city was reluctant to become implicated in the shadowy finances of slum housing. The receivership program empowers the city to take over and repair hazardous buildings; after a year of operation, only 16 buildings had been acquired and, at that, the Commissioner of Real Estate reported indignantly that the city was finding the venture unprofitable! Thus, despite a wide variety of programs and powers available to municipalities, the bulk of slum housing remains and worsens - the rent strikers of 1963-64 lived in some of the same tenements which inspired the protests of such nineteenth-century reformers as Jacob Reis and Lillian Wald.

Political leaders and public agencies never became the target of the 1963-64 strike. On the surface, municipal agencies were conciliatory. The Department of Buildings put an inspector at Gray's disposal, and similar concessions were made to leaders elsewhere. Meanwhile the Mayor and his aides spoke out publicly against the slums, bewailing housing conditions and invoking the villain landlord of ancient myth. They called for more housing inspectors as well as legislation authorizing higher fines and jail sentences. These responses were predictable, if not perennial: the law already permitted considerably higher fines than were being levied by the courts, and housing agencies, we have noted, already had substantial powers and programs they were not employing. In the end, government escaped unscathed, having made only a few meaningless concessions.

How can government be forced to act? One thing is certain: the tactics used in 1963-64 won't do. Organizers reasoned that with the promise of repairs as the initial inducement to participate, stable organizations of the poor

would eventually be formed, and that these would influence government. But the continuing emphasis on building permanent associations rests on a mistaken premise: that public decisions are made only in response to organized voting numbers. This view overlooks the impact of crisis as a way of compelling public action. When crisis occurs, many groups are aroused; they view disorder as a failure of governmental responsibility and demand measures (whether concessions or repression) to restore order. Crisis thus has a potential political force far greater than the number of citizens, organized or not, who participate in the disruptive action itself. The legalistic tactics of 1963-64 did not generate a public crisis, but other, more disruptive rent strike tactics would. */

---

*/ For an analysis of the potential impact of disruptive tactics in the field of income guarantees, see Cloward and Piven, "A Strategy to End Poverty," The Nation, May 2, 1966, and "Birth of a Movement," The Nation, May 6, 1967.

The key to a disruptive rent strike is for tenants to pocket the rent, not place it in escrow. Widespread action of this kind would throw the slum housing economy into chaos, for many landlords would have to abandon their property, leaving thousands of tenants in buildings without services or even minimal maintenance. As health hazards multiplied and the breakdown of landlord-tenant relations threatened to spread, the clamor would mount for governmental action to solve the crisis.

Pocketing the rent money would mean an immediate gain for tenants -- a far more compelling incentive to participate than the vague hope of getting minor repairs. The main job of organizers would be to expand the strike by exciting indignation and urging tenants to spend their rent money for other needs. Such activity is much more compatible with the skills and temperament of organizers than canvassing for violations, filing forms, searching records, maintaining escrow accounts, and sitting endlessly in courtrooms. Relieved of these wearisome chores, they should be able to reach far more people than in 1963-64.

What of the dangers? It will be argued that the city can retaliate -- at the very least, evictions might result. To minimize this risk, organizers need to mobilize at least a few hundred buildings to launch the strike, adding more buildings during the two- or three-month period it takes landlords to process evictions. It is unlikely that thousands, or even hundreds, of families would be put out on the

streets, especially on the streets of ghettoes whose growing and turbulent populations politicians can no longer afford to antagonize flagrantly. Furthermore, mass evictions would be viewed by many in the wider public as an even greater disorder than the breakdown of slum property relations.

It is important to understand that political leaders can prevent evictions, for the decision to evict is as much political as judicial. City governments, for example, have the legal right to initiate court proceedings against landlords who fail to correct violations. New York City has, in addition, the power to undercut legal actions by landlords who fail to correct violations. New York City has, in addition, the power to undercut legal actions by landlords against tenants simply by reducing rents to a dollar a month in buildings with multiple violations. Nor would housing courts in most cities, typically run by politically appointed judges, be so lenient with landlords when pressed by political leaders. Finally, to obtain time to wash out dispossess actions, mayors in most cities, can simply order city marshalls to delay all evictions, as a New York mayor did during the violent rent strike of 1933. The legalistic tactics employed by the tenants in 1963-64 enabled political leaders to leave the strikers at the mercy of the agencies and the courts. But faced with tactics which ignore bureaucratic procedures and court proceedings, public officials would have to use their powers to forestall mass evictions or risk a major threat to political stability. Except in the face of a crisis,

however, chief executives will not use these powers.

Even if officials did act, organizers would have to develop cadres to resist isolated evictions, defending the lone tenant by pitting the ghetto against the city's marshalls and thus raising the spectre of large-scale violence. Street action is far easier to mobilize than stable organizations of tenants. In 1963-64, however, organizers did not encourage street action, having pinned hope on the bureaucracies and courts.

By now it should be abundantly clear that the strategy we advocate is in no way limited to those few cities with statutes authorizing rent withholding. These laws are irrelevant, if not diversionary. Our analysis shows the futility of efforts to help masses of tenants make individual use of cumbersome procedures of legal redress. Disruptive tactics have an entirely different purpose: to shift the burden of action against slum landlords from tenants to city governments.

## Public Ownership of the Slums

There are measurable gains to be made by a disruptive rent strike. At the very least, this tactic should impel cities to use such programs as exist, whether offering low-cost loans to landlords who are willing to make repairs or making extensive emergency repairs and billing landlords for the cost. Most important, under the cumulative impact of disruptive actions, thousands of buildings would be abandoned --

left to government to take over. It is crucial to understand why this result would follow.

Slum housing is rampantly illegal, yet public agencies have never made much effort to enforce housing codes in New York. Even in those few cases where landlords were taken to court, the fines levied per violation averaged only $22 in 1963. By 1966 they had fallen to $14. Code-enforcement machinery is not allowed to work for good reason: a crackdown would produce massive dislocation of landlords and tenants. Repairs are extremely expensive, and building income is limited by the poverty of the captive tenant market as well as by rent-control laws. Just a modest step-up in enforcement activity under a new administration in New York City recently resulted in an upsurge in the number of foreclosures, tax delinquencies, and vacate orders. If slumlords were pushed out, government would have to house the minority poor. So the enforcement agencies use their powers gingerly and selectively, usually paying heed only when tenants have the tenacity or the "pull" to compel enforcement.

In other words, slum profits have depended on collusion between city agencies and landlords: in return for non-enforcement of the codes, the slumlord takes the blame for the slum and enables the city to evade the political ire of the ghetto. But once municipal agencies are compelled to act on the codes, many owners of deteriorated

buildings will be forced out of business, unable or unwilling to make the required repairs. Considering the highly marginal character of the slum market, the rent-strike tactics we propose could precipitate change no less fundamental than large-scale public takeover of land and buildings.

What would a city government do with slum buildings? Very likely, it would divest itself as quickly as possible of responsibility for them. To maintain the slums could only be expensive and politically onerous. City officials would run the risk of angering tenants dissatisfied with repairs and services, as well as taxpayers disgruntled by new investments in housing for the black and poor. Under such circumstances, municipalities might well move to sell or lease slum lands and buildings to private redevelopers. New governmental schemes are now in the making to stimulate investments in ghettoes by national corporations, with federal subsidies to guarantee profits (e.g., tax benefits, low-cost loans and insurance, and rent supplements). */ These schemes, if implemented, would provide a way out for municipalities thrust by disruptive rent strikes into the role of slum landlord.

Federally subsidized corporate redevelopment will result in better housing and facilities; it will also bring the ghetto under the hegemony of an alliance of national corporations and federal bureaucracies.

---

*/ See Cloward and Piven, "Corporate Imperialism for the Poor," The Nation, October 16, 1967.

Now that blacks are coming into power in many large cities, the ghettoes would be much better off with the municipality acting as re-developer and landlord. Nevertheless, corporate ownership appears to be the wave of the future, and the leverage of the vote will have limited effect on corporate policies regarding location and design, tenant selection, rents, and similar matters.

To deal with corporations on these policies, tenants will need to develop modes of influence beyond the vote. In this connection, corporate ownership might provide a favorable context for organizing mass-based tenant unions. As we noted earlier, most tenants now live in buildings owned by small entrepreneurs who themselves have limited financial resources and so cannot yield to tenant demands; with nothing much to gain, tenants cannot easily be organized. Furthermore, ownership is so fragmented that efficient negotiating is virtually impossible. Under a system of national corporate ownership, however, tenants would confront large-scale landlords with ample resources to be conceded at the bargaining table. Tenant organization would then be comparable to the organization of workers in the factory system or in that sector of agriculture controlled by large corporations. Thus rent strikes could be mobilized to demand partial control of management policies and lower rents ([redacted] it would fall to large corporations, not the poor, to fight with Congress for higher rent subsidies). Most

important, strikers might hold out for concessions which would nurture stable tenant unions -- especially collective-bargaining contracts and a dues check-off from rent payments. In Chicago, a few tenant groups have used rent strike as leverage against several large landlords, forcing through contracts which include check-offs. But whether the object is to compel housing improvements in a system of fragmented slum ownership or to create tenant unions in a system of large-scale ownership, the fact remains that disruptive tactics are the key.

There are only certain periods when a disruptive force can be mobilized, for the poor are ordinarily passive, obeisant to the rules prescribed by dominant institutions. But from time to time normative control weakens and unrest mounts, as in 1963-64. Now such a time is upon us again; there is greater turbulence in the ghetto than ever before. Young and aggressive leaders are emerging who are unencumbered by ties to white institutions. Whatever else might be said about the rhetoric of black power, it serves to undermine the legitimacy of established arrangements, freeing people for militant action.

This is also a time when disruption might have unique force in moving government. The black masses are swelling in many cities, and more than a few white municipal leaders remain in office merely because blacks are not yet sufficiently mobilized, or antagonized,

to unseat them. Under the impact of disruptive tactics, white politicians wishing to retain control of municipal government would have to make concessions. In New York, for example, Mayor Lindsay, a Republican, was assured of election in 1965 because blacks, ordinarily Democratic, gave him an unprecedented 42 percent of their vote. Were he to permit mass evictions, his subsequent defeat would seem a foregone conclusion. Elsewhere, the potential for black reprisals against white politicians is far greater; blacks compose a mere 15 percent of New York's population, but they are approaching (or have already reached) a majority in many cities.

Of course, a disruptive strategy is always uncertain because it is not guided by legal and political conventions. But if in violating these conventions the poor are exposed to risk, they are worse off on what may seem less treacherous ground. For in playing by institutional rules, they take on the full complement of inhibiting requirements imposed by powerful groups who make the rules. Unable to meet these requirements, they can only lose.

# THE EDUCATIONAL COMPLEX

Collated from the Robt. A.Dentler Report detailing the idea of the Educational Complex and from "Desegregating the Public Schools of New York City" prepared by the State Education Commissioner's Advisory Committee on Human Relations and Community Tensions

An educational complex should contain from two to six elementary or primary schools and one or two middle schools. It is administered as a unit and can include the participation of other community facilities such as museums, colleges and libraries. As opposed to an educational park, the complex would not be "campus style". The primary school would consist of the first four grades and be within easy reach of the students. The middle school would house grades five through eight and would be either within walking distance or necessitate a short bus trip similar to that of our current junior highs. At present, existing school buildings would be used, but future school construction should be planned toward the development of this type of school organization. The new complex should be created or zoned first wherever it will contribute to desegregation or better integration.

The "senior administrator" of an educational complex should be given authority and autonomy to develop a program which meets appropriate city-wide standards but is also directly relevant to the needs of the locality. The schools within the complex should share among themselves facilities, faculties, and special staff and should be coordinated to encourage frequent association among students and parents from the several units. Parent-teacher and parent-school relations should be built on the basis of both the individual school and the complex.

Although it may not be possible to desegregate all primary schools, ultimately most of them should be integrated educationally and efforts should be utilized to gain the maximum in quality-integrated education, not only for the individual complex school, but for the complex taken as an entity. Considering the make-up and zoning, the middle school will offer a greater measure of integration, thus introducing students more fully to this concept at the fifth grade level rather than the current 7th grade of the junior high school.

High standards and expectations can be set up for the complex as anunit. This can be achieved because of the fluidity and interchange of specialists, educational aids and special services within a complex For instance, remedial reading aids, science laboratories and special language programs can be shared by all students attending a given school complex. It is important that ideas and positive results achieved in one complex be shared with other groupings so that uniformity of high standards will permeate the entire system. Since the total administration of the complex is under a single administrator, there could be great teacher mobility so that the talents of a truly gifted educator could influence the education of the entire student body assigned to the indicated complex. In a sense, the complex is an educational entity developing quality programs in a decentralized manner. Therefore a unique position would be assigned to the Board of Education since the Board would become the central coordinator, standard setter and research development office for improving and deseminating successful programs as developed in the individual groupings.

High schools can be developed in such a manner as to be comprehensive offering quality academic, commercial and vocational educational tduall students. A high school can be assigned to one or more complexes and can continue the policy of decentralized programs under the coordinating aegis of the Board of Education.

The complex offers an excellent opportunity for teacher-training capitalizing on the talents of master teachers in the new technique of team teaching or closed circuit T.V. demonstrations.

The new school division 4-4-4 would result in a concentration in the teaching of basic skills to the elementary student. Furthermore, congestion would be relieved and an atmosphere conducive to learning can be more readily achieved. The middle school would emphasize the change from the learning of basic skills to their applications to intellectual and personal growth. The larger school plant would mean that better and more extensive facilities would be made available to help the youngsters develop their full potential. The comphehensive high school will develop a greater sense of direction and greater continuity for those desiring terminal education as well as education that will prepare them for further study.

# MARCH FOR DEMOCRATIC SCHOOLS

## Schedule

## Monday, May 18, 1964

| | |
|---|---|
| 7:30 - 8 A.M. | Study-in parents, guardians and children meet at MARCH headquarters, 312 West 125th Street, to be taken to study-in schools by bus. |
| 8:30 - 9 A.M. | School boycott begins at P.S. 39, 216 East 126th St. |
| 9 A.M. | Freedom Schools begin sessions at:<br>- Third Moravian Church, 127th St. and Lexington Ave.<br>- All Saints R.C. Church, 47 East 129th St.<br>- Chambers Memorial Church, 219 East 123rd St.<br>- LaGuardia House, 309 East 116th St. |
| 9 - 9:30 A.M. | Study-ins begin at:<br>- P.S. 6, 45 East 81st St., Manhattan<br>- P.S. 81, West 256th St. and Riverdale Ave., Bronx<br>- P.S. 269, 1957 Nostrand Ave. near Farragut Road, Brooklyn<br>- P.S. 164, 77th Ave. at 137th St., Flushing<br>- Jr. High School 52, 650 Academy St., Manhattan |
| 2:30 - 3:30 P.M. | Poster-walk demonstration at the office of Governor Nelson A. Rockefeller, 22 West 55th St. |
| 4 - 5:45 P.M. | Picketing and Mass Rally at City Hall - Among the speakers will be James Farmer, A. Philip Randolph, Roy Wilkins; also Rabbi Balfour Brickner, Rev. Dr. Lawrence Durgin, Rt. Rev. Msgr. Gregory L. Mooney; also representatives of labor, entertainment, etc. |
| 5:45 - 6:30 P.M. | March across Brooklyn Bridge to Board of Education at 110 Livingston St., Brooklyn (via Washington St., Red Cross Pl., Adams St., and Boerum Pl.) |
| 6:45 - 7 P.M. | Brief demonstration and remarks at Board of Education and affixing of MARCH demands on the main front door of Board headquarters. |
| 7 P.M. | End of MARCH FOR DEMOCRATIC SCHOOLS |

(Call Press) 7:30 — WASHINGTON CORE — P.S. 136 P.S. 139 — Evening Century Harlem — Scottish Rite Group — NOT A BOYCOTT.

September 20,1967

Dear East Harlemite,

Our children are the pawns in a power play between the United Federation of Teachers and the Board of Education. The Board of Education now controls our public schools. The U.F.T. wants to take that control from the board of our schools. Where are the parents and the community in these negotiations? THEY ARE IGNORED. Come prepared to discuss and vote on the following actions!

1. Community voice in the reopening of our schools.
   If the teachers stay out, we will go in. THESE ARE OUR SCHOOLS.
2. Close so-called freedom schools. We have public schools. Teachers will never lead us to our freedom.
3. Demand from the Board, a contract to guarantee children's rights.

Come and support your children, come to gain a voice in your schools.

TIME: 7:30 P.M.

DATE: Friday, September 22,1967

PLACE: P.S. 83 - Auditorium
109th Street and Second Avenue

UNITED BLACK FRONT

FOR IMMEDIATE RELEASE September 21, 1967

Contact: Lincoln O. Lynch, Acting Chairman
212 281 9650

The United Black Front, a city-wide and city representative co-ordinating council of community organizers, committed to the organization of Black People around those issues pertinent to their survival and to the Black Liberation Movement, here on the steps of City Hall on this 21st of September, 1967, give notice to: Mayor John V. Lindsay, Superintendent of Schools Bernard Donovan, President Harry Guardino (Board of Education), and President Albert Shanker (United Federation of Teachers) that since:

1. The Black and Puerto Rican People of this city have once more been castigated, rebuffed, insulted and made to suffer by a union of unprincipled and immoral teachers, and by a weak and do-nothing Board of Education.
2. Under the guise of a commitment to better education, the UFT has attempted to hoodwink and mesmerize the ghetto community, while in reality, striking for personal benefit (see the New York Post (Money is the issue) - Sept. 19.
3. The UFT has failed to involve and relate to the Black and Puerto Rican parents and children.
4. The UFT has attempted to placate our communities by suggesting the establishment of Freedom Schools, a concept which they themselves rejected in 1967 and subsequently.
5. The Board of Education has proven itself to be ineffective and unable to supply necessary leadership for the solution of our educational problems
6. Since parents of the ghetto communities have been forced to sit and twiddle their thumbs while the mis-educators decided the fate of their children.

The United Black Front strongly denounces:

1. The Board of Education, the UFT, and the city of New York as equal partners in the heinous crime committed against our youth.
2. Demands that a second stage of negotiations be entered. This second stage must include the parents of ghetto schools in the planning, servicing and administration of our local schools.
3. Calls for complete and total decentralization of the New York City School System.
4. Demands that the Taylor Act be invoked against those teachers who have been striking illegally and have deprived our children of an education.

If these demands are not met, the United Black Front is prepared to and will:

1. Mount a massive campaign to gain control of local schools, by any means necessary.
2. Encourage civil disobedience, as well as other means, for securing control of local communities.
3. Mobilize parents to continue an unceasing attack on the UFT and the

(cont.)

Board of Education.

4. Inform the Black Community that John V. Lindsay has failed us on this vital issue.

5. If punitive measures are not enacted against the teachers who struck illegally, the United Black Front will advise the Black Community that they too have the same rights to disobey the law with impunity.

The United Black Front further makes it known that it will not rest until Black Communities are controlled by Black and Puerto Rican People.

UNITED BRONX PARENTS, INC.
791 PROSPECT AVENUE
BRONX, N. Y. 10455

EXECUTIVE DIRECTOR
EVELINAANTONETTY 842-6666

October 16, 1967

TO: COMMUNITY LEADERS AND AGENCIES CONCERNED
ABOUT EDUCATION

We are pleased to enclose for your information a copy of our Publications Catalogue, which describes the Parent Education material we developed this past year in our various leadership training programs.

We are also enclosing one sample piece from each of our kits.

On the last page of the catalogue, you will find a price list and order form. We would like to be able to give our material away, but since we have not as yet received any funding to continue our program, we must charge this modest fee in order to offset our costs. Nevertheless, as you will note, prices for bulk orders are very low.

We are eager to have your comments and reactions after you have read our material.

Sincerely,

UNITED BRONX PARENTS

Evelina Antonetty

Evelina Antonetty
Executive Director

DO PARENTS AND COMMUNITY WORKERS KNOW ENOUGH TO BE ABLE TO TELL:

## WHO IS A GOOD TEACHER?

We suggest that you form a "Watchdog" committee, or an Evaluation Committee, and go into classrooms, quietly, without disturbing the lessons, and observe the teacher performing. Do this several times. In addition, ask some of the children and the parents in that class these same questions. These are fair and professionally acceptable criteria for evaluating teacher performance in many suburban communities.

1. Are the children restless, talking a lot, shouting in confusion?

2. Do the children seem to know what they are doing and why? Do they understand what they are supposed to do at home, and can they explain clearly to their parents what is expected of them?

3. Do the children seem to be wasting their time? Do they look bored and unhappy? Do they show they dislike the class?

4. Do the children treat each other and the teacher with respect?

5. Does the teacher treat the children with respect? Is the teacher fair? Does the teacher treat all the children with equal rules, or does the teacher accept some things from one child that is not tolerated from another?

6. Does the teacher try to interest the children? Does the teacher create a desire to work, make school work a pleasure?

7. Is the teacher cheerful, happy , good-natured? Does the teacher have a sense of humor? Is the teacher proud to be teaching in this school?

8. Are the children learning? Are the children improving? Is the teacher helping the children to "reach beyond their grasp?"

9. Does the teacher give reasonable assignments? Does the teacher set standards ? Is the teacher either "too strict" or "too easy?" Does the teacher have control of the class?

10. Is class work and homework regularly corrected?

11. Does the teacher compliment the pupils when they do something well? Does the teacher ever write home a note to tell the parents something nice about the child? Does the teacher reach out to the parents, helping them to feel comfortable and wanted? Or do parents find out about any problems <u>after</u> things have progressed to a crises?

12. Is the teacher often tired or ill? Does the teacher allow personal problems to interfere with classroom performance?

13. Does the teacher keep up professionally with new literature and materials so that his lessons are interesting and clearly related to our world here in New York City as it is today ?

14. Are lessons dull and repetitious? Or are they planned inadequately without any goal, with setting a standard of achievement for the children?

15. Does the teacher welcome visitors?

16. Do parents feel comfortable in talking to this teacher? Are conferences with him "two-way streets" where both are able to make suggestions for the benefit of the child? Or do parents come away feeling tense and angry and frustrated after meeting with the teacher?

17. Does the teacher feel a part of the community? Does the teacher put in a full professional day, expecting to give a reasonable amount of volunteer time to visitng parents, helping children, joining some community project? Or does the teacher push the children down as he runs out of the school at 3 o'clock?

EQUAL
COMMUNITY EDUCATION PROGRAM

DIVISION OF ELEMENTARY SCHOOLS CIRCULAR: FROM THE BOARD OF EDUCATION, 110 LIVINGSTON ST., TO PRINCIPALS OF ELEMENTARY SCHOOLS AND JUNIOR HIGH SCHOOLS WITH ELEMENTARY CLASSES.

RE: HOMEWORK POLICY FOR ELEMENTARY SCHOOLS

IN THIS CIRCULAR, THE DIVISION OF ELEMENTARY SCHOOLS SETS FORTH ITS POLICIES IN REGARD TO THE KIND, EXTENT AND SUPERVISION OF HOMEWORK, AS WELL AS TO THE PART THE PARENT PLAYS IN IT. THE PURPOSE OF HOMEWORK IS TO EXTEND AND REINFORCE LEARNINGS AND TO DEVELOP THE SENSE OF SELF-DISCIPLINE, PERSONAL RESPONSIBILITY, AND INDEPENDENT THINKING. TO THIS END, ALL ASSIGNMENTS SHOULD BE PURPOSEFUL AND RELATED TO CLASS ACTIVITIES, AS WELL AS TO INDIVIDUAL CHILDREN'S INTERESTS, NEEDS AND ABILITIES. HOMEWORK SHOULD BE CAREFULLY CHECKED AND SUPERVISED. PARENTS SHOULD BE INFORMED ABOUT THE PLACE AND PURPOSE OF HOMEWORK IN THE SCHOOL'S PROGRAM SO THAT THEY CAN PROVIDE SUITABLE STUDY CONDITIONS, UNDERSTAND WHAT THE SCHOOL EXPECTS HOMEWORK TO ACCOMPLISH, AND COOPERATE WITH THE SCHOOL IN MAKING HOMEWORK EFFECTIVE, THUS HELPING THE SCHOOL TO ACHIEVE ITS PURPOSES AND GOALS.

## I. ESSENTIAL CHARACTERISTICS OF HOMEWORK

1. HOMEWORK SHOULD BE RELATED TO CLASSROOM INSTRUCTION.
2. HOMEWORK SHOULD BE DEFINITE AND CLEAR.
3. HOMEWORK SHOULD BE ADAPTED TO THE NEEDS, INTERESTS AND ABILITIES OF GROUPS OF CHILDREN. THIS WOULD HELP MAKE CERTAIN THAT CHILDREN CAN DO THEIR HOMEWORK WITHOUT ASSISTANCE, AND THEREBY RECEIVE TRAINING IN STUDYING INDEPENDENTLY. THERE MAY BE CHILDREN WHO DO NOT REQUIRE THE SAME ASSIGNMENT GIVEN TO ANY OF THE GROUPS IN THE CLASS. THEREFORE, THESE CHILDREN SHOULD BE GIVEN INDIVIDUAL HOMEWORK ASSIGNMENTS.
4. HOMEWORK SHOULD BE PURPOSEFUL. FOR INSTANCE, THROUGH IT A SENSE OF RESPONSIBILITY AND DESIRABLE WORK HABITS MAY BE DEVELOPED, AND ADDITIONAL PRACTICE IN A SKILL MAY BE GIVEN. HOMEWORK SHOULD NEVER BE GIVEN AS A PUNISHMENT.
5. HOMEWORK SHOULD BE GIVEN DAILY AND SHOULD ALWAYS BE CHECKED AND RETURNED BY THE TEACHER.
6. HOMEWORK MIGHT OFFER A CAPABLE CHILD THE OPPORTUNITY TO DEVELOP HIS CREATIVE ABILITY BY DOING RESEARCH WORK AND BY REPORTING ON A NEW OR RELATED TOPIC.

## II. KINDS OF HOMEWORK ASSIGNMENTS

1. WRITTEN ASSIGNMENTS:
   FOR MOST PUPILS IN THE FIRST YEAR OF THE ELEMENTARY SCHOOL NO FORMAL WRITTEN HOMEWORK SHOULD BE ASSIGNED. THEREAFTER, WRITTEN HOMEWORK MAY FORM PART OF THE ASSIGNMENT.
2. HOME STUDY:
   IN ALL GRADES SOME HOME STUDY SHOULD BE ASSIGNED. THIS MAY TAKE THE FORM OF SUPPLEMENTARY READING, SELECTING PERTINENT NEWS ARTICLES, FINDING PICTURES OR OTHER UNIT MATERIALS, INTERVIEWING PEOPLE OR VISITING PLACES WHICH RELATE TO SCHOOL STUDY.

IN THE FORTH THROUGH SIXTH YEARS, IN ADDITION TO THE ABOVE, HOME STUDY FROM BOOKS SHOULD RECEIVE GREATER EMPHASIS.

III. TIME ALLOTMENT

IN THE FIRST YEAR HOMEWORK ASSIGNED SHOULD REQUIRE ABOUT FIFTEEN MINUTES.

IN THE 2ND AND 3RD, AND 4TH YEARS THE TOTAL TIME REQUIRED FOR THE HOMEWORK ASSIGNED SHOULD BE TWENTY - THIRTY MINUTES A DAY.

IN THE FIFTH AND SIXTH YEARS, HOMEWORK SHOULD REQUIRE APPROXIMATELY FORTY-FIVE MINUTES.

IV. PARENT COOPERATION:

IT IS ESSENTIAL THAT SCHOOLS HELP PARENTS UNDERSTAND THE SCHOOLS' POLICY ON HOMEWORK, IN ORDER TO PROMOTE THE PARTNERSHIP OF THE SCHOOL AND THE HOME IN THE EDUCATION OF CHILDREN. THROUGH CONFERENCES WITH PARENTS, AND WORKSHOPS GIVEN FOR THEIR BENEFIT, TOPICS SUCH AS THE FOLLOWING MIGHT BE EXPLAINED TO THEM:

- PURPOSE OF THE KINDS OF ASSIGNMENTS GIVEN.
- LENGTH OF TIME NEEDED TO CARRY OUT THE ASSIGNMENT.
- BENEFITS DERIVED FROM PARENT-SUPERVISION.
- SUITABLE PARENT GUIDANCE.

JAN. 20, 1964

UNITED BRONX PARENTS
LEADERSHIP TRAINING MATERIAL

A PARENT EDUCATION KIT OF MATERIALS ON
DISCIPLINE & KIDS WHO ARE CALLED "DISRUPTIVE"

1. Many times we hear parents in our poor communities talk loudly: "There are terrible kids in this neighborhood. They don't care what they do in school and their parents don't take proper care of them; they should be kicked out of school so the rest of our children can learn."

   Before parents like these can be involved in fighting suspension procedures, or even in fighting for improved education, they must first get rid of these negative feelings about their own people. We have developed three parent activities which are especially helpful for RE-EDUCATING PARENTS WHO HAVE BEEN TURNED AROUND AGAINST THEIR OWN!!

   A. A TREASURE HUNT FOR PARENTS WHO BLAME THEMSELVES

      The Treasure Hunt (attached) takes a group of parents into a middle class neighborhood, and forces them to look for resources available in such neighborhoods which are completely lacking in their own community. It helps parents to go back into their own neighborhood with more open eyes, they compare facilities and services there.

   B. A ROLE PLAY TO SHOW A GROUP OF PARENTS HOW PEOPLE WITH POWER (the white majority) PUT PRESSURE ON THE POWERLESS TO CONFORM

      In this group role play (attached) parents will learn rather quickly that very often we adapt our thinking in order to please people who are important. Thus, if teachers and principals blame the children and their parents for all the problems in the schools, it is easy to agree with them because we want them to like us!!

   C. A DEBATE

      Attached is a copy of an interview with a young boy drop-outs who picketted the schools during the shutdown several years ago. Read this interview out loud in your group. Ask half of the parents to take the boy's side and to list all the things they think the schools should be doing to make that boy successful in school. Ask the other half of your group to take the school system's side, and to list all the things the boy and his family should be doing differently if he wants success in school. Let the two groups argue it out. Distribute the two newspaper articles which blame the riots and crime on bad schools, and let the group comment.

2. THE CHECKLIST "HOW DO YOU KNOW IF YOUR KID IS BAD OR IF YOUR KID HAS A BAD TEACHER" could then become the next activity for your parents. Let them visit some classes and observe or if they are not quite ready for this, let them ask a group of youngsters to fill out that questionnaire. Then let them discuss their findings. WHOSE FAULT IS IT IF THE KID IS "DISRUPTIVE?"

3. Finally the kit includes a great deal of material on suspensions.

   A. THE BOARD OF EDUCATION suspension regulations themselves.
   B. A document which analyzes the regulations, discusses the UFT demand which would strip children of all their rights, and would permit suspensions virtually at the whim of a teacher. This document includes some hints to parents as they become involved in fighting a suspension case.

## FOREWORD

The following report is the second one describing a year-long study of the effectiveness of a programed method of reading instruction, called the Progressive Choice Reading Method, conducted at Macfarland Junior High School and at Garnet Patterson Junior High Summer School during 1963-64. The first report described a pilot study of the Progressive Choice Method during the 1963 summer session at Banneker Junior High School. For the benefit of the many people who did not see the first report but have expressed interest in our project, we have included some of the material which appeared in the first report describing the Progressive Choice Method, the background, etc. Moreover, our own understanding and concepts about the rationale and method on which Progressive Choice is based have considerably increased after a year-long experience with this program.

This investigation was made possible through the generosity of Dr. Myron Woolman and his assistant, Mrs. Ann O'Keefe, who gave unstintingly both materials and the benefits of their experience in helping us to conduct this study. Permission to conduct the study was granted by Mr. Arthur Storey, Principal, Macfarland Junior High School, Mr. Bernard F. Sewell, Director of Summer Schools, Mr. John F. Koontz, Assistant Superintendent in charge of Junior-Senior High Schools, and Dr. Carl F. Hansen, Superintendent of D.C. Schools, to whom this report is submitted.

It should be noted here that this report was a cooperative undertaking in every aspect but teaching. The instruction in this project was conducted by the teacher in the investigation without assistance from the Co-investigator or the Institute of Educational Research. The reason for this is that one of the purposes for which the larger experiment was conducted by the Institute of Educational Research was to determine the extent to which teachers could learn the rationale and method without professional assistance from the Institute or reading specialists.

> " Thus, the experiment was designed to minimize the amount of contact with E teachers. They were required to apply the programs in their classrooms with no assistance or support whatever from research personnel....the approach taken was to attempt to avoid the 'Hawthorne' effect by reducing contact with teacher and other school personnel to a minimum, eliminating teacher knowledge and involvement with research methods and objectives...." 1/

1. Woolman, Myron and Davy, Anne. Developing Symbolic Skills in the Mentally Retarded, Institute of Educational Research, Inc. Washington, D.C.

" The use of the Program Rationale also has the function of making the Progressive Choice Reading rogram available to the school system without requiring staff members to return to college for special course work. The integration of this Self-Instructional Program in the Teacher's Manual has been very favorably received by teachers because they can functionally apply the rationale in a day-to-day teaching situation. The interaction of methodology and practice is reacted to as being superior to taking a college course, where the methods, information and the practice are necessarily separated by substantial periods of time. "

This Self-Instructional Program provided teachers in the Manual offered considerable insight into new concepts in the psychology of reading and also provided better appreciation for professional courses in which the instructor enrolled during the second semester. If for no other reason than this, it seems that Progressive Choice makes a valuable contribution to reading instruction.

To maximize experimental effectiveness and at the same time limit teacher involvement with research methods , the Coordinator carried the major responsibility for liaison with the Institute of Educational Research, diagnosis, and supervision of classroom evaluation.

# INTRODUCTION

In May 1962 the National Institute of Mental Health awarded the Institute of Educational Research, Inc., Washington, D.C. a three year grant to develop, test and revise the Progressive Choice Method for teaching reading to retarded children, under the direction of Dr. Myron Woolman, Psychologist and presently Director of the Institute. The purpose of this study is three fold: (1) to test Progressive Choice method in teaching reading to retarded children; (2) to teach teachers the rationale and the method; and (3) to improve and refine the materials in this year's program for widespread experimental use in 1963-64. The materials in this year's program are designed for use by all classes of mentally retarded children including severely retarded, mildly retarded, and children with perceptual difficulties.

The above study, titled A Programed Reading Method for the Mentally Handicapped, involves some 800 pupils assigned to experimental and control groups in public and private schools throughout the country. It is an example of the cooperative research supported by the Federal Government as an outgrowth of the President's Panel on Mental Retardation. It represents new trends in research on mental retardation in which scientists and educators have joined forces in developing theories of learning and the art of teaching in the laboratory and then testing these theories in the schools against the realities of overcrowded classes, indifferent pupils and teacher shortages. As Kirk has pointed out, this emphasis on the teaching-learning process marks a new stage of development in the field of mental retardation where the concern now is for diagnosis and remediation rather than for identification and classification.

> " In planning remediation of a disability, whether it is a learning problem, personality disturbance or whatever, a classification label, such as paronoid schizophrenic, E.M.I.T., or dyslexia is of relatively little value. The process of finding an appropriate label is classification and must be distinguished from diagnosis which should lead directly to specific remediation or treatment. .....Ultimately, when this stage has been reached and we are able to demonstrate the programed instruction can ameliorate, if not remove specific deficits in children, we will have arrived at what Alfred Binet tried to accomplish in his procedures of mental orthopedics, which he described in his classic report on the Educability of Intelligence." 2/

---

2. Kirk, Samuel A., Director, and Baleman, Barbara, Research Associate, Institute for Research on Exceptional Children, Paper delivered to Council of Exceptional Children, April 1962: " Diagnosis and Remediation of Learning Disabilities".

Although the Progressive Choice Reading Method has been found effective for both normal and retarded children, the present research is confined to the mentally retarded in the belief that the teaching of reading skills to retarded children offers a vital research area which promises to benefit all children, both retarded and non-retarded. " First normal children can learn to read by any method," explains Woolman, " phonics or whole-word, because the normal learner perceives the objectives of the teacher and is more able to compensate by his own effort for defects in the reading method. The retardate, on the other hand, can usually make little contribution toward achievement of reading skills and therefore requires more powerful reading methods to achieve the same level of competence. Thus the population classified as mentally retarded offers an excellent baseline for determining the power of any teaching method. Once a method has proven that it can penetrate the perceptual and emotional screens of the retardate, there is a high probability that it can be used with normal children to facilitate learning rate by reducing the number of failures occurring through emotional blocks, inadequate teaching, and deficiencies inherent in available methods. " 3/

At the time this experiment was initiated at the Banneker Junior High Summer School, the investigators were unable to find developmental reading materials for illiterate adolescents which were not of the " Here Spot ", " Come Spot " variety. We welcomed the opportunity when, at our request, Dr. Woolman consented to permit us to adapt his program to our non-readers. It should be noted, however, that the present study, the Macfarland-Garnet Patterson investigation, was not a controlled experiment but was undertaken as short-term practical research for the purpose of attempting to answer one question: " To what extent will programed instruction increase the reading skills of non-reading adolescents? " The problem of the illiterate in junior high school is immediate and acute. It cannot wait for long-term experiments such as that conducted at the Institute of Educational Research, if we are to head off the imminent threat of the drop-out among these frustrated pupils. Our study, therefore, represented what Blackman described as a " last ditch " effort to teach the children participating in this study to read.

## BACKGROUND

In nearly every class of Basic Track pupils in the D.C. junior high schools there are some children who are " functional " illiterates who cannot read above a third grade level and some who are " absolute " illiterates who have not attained even a first grade reading level. Questions which are raised persistently at every meeting of Basic Track teachers are: " How do these children spend seven or eight years in school without learning anything?" " How can we teach science, history, geography, etc . to pupils who cannot read at all? " " How much can we accomplish in three or four years when progress has been practically nil for seven or eight years? "

The problem of illiteracy among adolescents is by no means confined to any one school system or any one area. It is one of the most important questions facing educators today. In a four year study of the effects of special class placement on the development of mentally retarded children at the University of Illinois, Moss reports: " From the results to date, it appears that retarded children may be classified into three groups as far as school placement is concerned: (a) those who succeed in regular class, (b) those who fail in regular class but succeed in a special class, and (c) those who fail in even the best of special classes. ...It is quite apparent that these children need a different type of program than presently is being offered in special classes. Question: What kind of program do we need for these non-learning retarded children? What kind of facilities, what kind of teacher preparation, what kind of ancillary services? " 6/

Several studies have been conducted under the support of the Federal Government to find the answer to why some mentally retarded pupils fail in spite of years of instruction. A notable one which has just been completed is a four year research project at Johnstone Training and Research Center, Bordentown, New Jersey, under the direction of Blackman and Smith and supported by a grant from the U.S. Department of Health, Education and Welfare, 1960 - 1964. Because this study was very similar in purpose and design to the study conducted by the investigators of the D.C. Study, and because it suggests important implications for our study, we will discuss it in some detail.

The Blackman-Smith study proposed to cast some light on the question, " Will a carefully programmed course of reading instruction taught via a self-instructional device, but with teaching supervision and reinforcement, help non-reading mental retardates (IQs 50 to 75), 10 to 15 years of age, learn to read?" 7/

---

7. Blackman, Leonard and Smith, Marshall. The Development and Evaluation of a Curriculum for Educable Mental Retardates Utilizing Self-Instructor Devices or Teaching Machines, Johnstone Training and Research Center, Bordentown, New Jersey. February 29, 1964

BACKGROUND - Continued

The material in this program consisted of the whole-word method presented in a teaching machine constructed by the investigators. The use of a teaching machine was described as a " last ditch " attempt to teach the children participating in this study to read. " Past school history and mental handicap itself almost compel a new approach to reading. " 8/ The investigators compared a teaching machine method of teaching reading to traditional special class placement methods. In both cases the whole-word method was used. The investigators found no significant differences between programmed instruction and traditional methods. They reported a mean gain of .24 of a grade for the Experimental group and .21 for the Control group. In this experiment 19 subjects in the teaching machine group had a mean C.A. of 14-1 and a mean IQ of 54.3. The Control group was comprised of 17 subjects whose mean C.A. and IQ were 14-3 and 54.2 respectively. The authors conclude:

> " By any criteria this study must be considered a pioneering effort in the application of prgrammed instruction to the mentally retarded. Continuing improvements in hardware and programs as well as demands by educators for information, will undoubtedly entice other investigators into a comparison of methods attempted in this report. More important, however, educational psychologists now find themselves on the brink of an era which will witness the development of a true educational technology. Instructional systems are now available that can create the reliable and replicable stimulus environments for learning that sophisticated psychological theory demands. PROFITABLE RESEARCH IN THIS AREA, THEREFORE, RESTS NOT WITH THE COMPARISON OF ONE GROSSLY DEFINED INSTRUCTIONAL METHOD WITH ANOTHER EVEN MORE POORLY DEFINED ONE, BUT RATHER, RESEARCH IN PROGRAMMED INSTRUCTION WHICH SEEMS TO FULFILL ITS PROMISE WHEN IT EMPLOYS THE RIGOR AND CONTROLS AT ITS DISPOSAL TO ACHIEVE A BETTER UNDERSTANDING OF THE PSYCHOLOGICAL PROPERTIES OF SCHOOL TASKS AS THEY INTERACT WITH THE ABILITIES AND DISABILITIES OF INDIVIDUAL LEARNERS." 9/

The question which this study raises is whether the whole-word method alone is an effective method for overcoming the learning disabilities of mentally retarded pupils, whether the method is programed or traditional. The use of the whole-word method to instruct mentally retarded pupils is at least a controversial one among reading specialists. The Illinois study of the effectiveness of special

8. Ibid., p. 57
9. Ibid., p. 172

BACKGROUND - Continued

education, mentioned here previously, reports:

> " It is quite obvious that there are differences between retarded children and that they will perform differently under different educational environments. We have made mistakes in assuming that all retarded children were alike and in not asking why some children succeeded while others fail."

Blackman and Smith state that while both groups gained in the Johnstone study, their gains were not " educationally dramatic ". The rather undramatic gains might suggest that what was needed here was a change not only in methodology but also in curriculum, or content. This idea was suggested by the Center for Programed Instruction (Komoski) in 1962:

> " Porgraming was recognized as having the potential of becoming an ultra-conservative force in education if it were simply to teach faster and better those things which educators are anxious to weed out of elementary and secondary education. It was this commitment ( to programed instruction as a vehicle for curriculum change ) which made it impossible for us at Collegiate to use any of the material that was available to us in 1959. And it was for this reason that we as teachers had to begin programing in earnest, or perhaps have our acceptance of available program material be interpreted as a willingness to teach out of date approaches to subject matter, with a revolutionary technique. " 10/

In his study of the psycho-linguistic abilities of retarded readers, Kirk found the need to extend remedial measures beyond whole-word or phonetic methods. Poor readers showed definite deficits in linguistic abilities, in the ability to obtain meaning from visual and auditory linguistic stimuli, etc. These deficits were not related to mental retardation. The Illinois Test of Psycholinguistic Abilities, developed by Kirk and Associates at the University of Illinois, attempts to diagnose the deficits and assess the abilities of disabled readers and to develop a program for a remedial teaching situation. "Ultimately,

---

10. Komoski, K.P. Origin of Collegiate School Automated Teaching Project. New York: Collegiate School, 241 W. 77th St., 1960.

BACKGROUND - Continued

when this stage has been reached and we are able to demonstrate that programed instruction can ameliorate, if not remove specific deficits in children, we will have arrived at what Alfred Binet tried to accomplish in his procedures of mental orthopedics which he described in his classic report on the Educability of intelligence."

The I.T.P.A. Study and other studies of linguistics have added a a new dimension to programed instruction - the area of psycholinguistics. "Reading instruction is being moved forward today by two significant interdisciplinary approaches," states Betts. 11/ The significance of these approaches stems from the promise they extend of fruitful future improvement. First, the linguists offer important concepts regarding the structure of language - the system of symbols with which thinking is done. Second, psychologists offer important concepts regarding individual differences, motivation, perception and concept formation - which provide the basis for differentiated instruction and methods of teaching.

The study of psycholinguistics is by no means a new area of concern in education. The need to add linguistics as a dimension to reading instruction has increased, however, with the influx of culturally impoverished children in public schools. Investigations at the Institute of Developmental Studies of New York Medical College under the direction of Dr. Martin Deutsch suggest that failures of pupils in later school years might well be prevented by an early concern for the linguistic aspects of reading. The slum youngster, these studies indicate, may lack auditory discrimination, the ability to distinguish very subtle differences and nuances in sound, that is essential in reading. Moreover, the lower class child has not had the experience of having adults correct his pronunciation, so that he fails to acquire the ability to distinguish the subtle differences of sound and language. The lower class youngster is poorly motivated, the investigators have found, because they have had little experience in receiving approval for success in a task or disapproval for failure. The failure to acquire a specific set of skills - auditory and visual discrimination, etc. - which are prerequisite to learning to read appear tp handicap the young child from the beginning of his school career when verbal skills become synonymous with intelligence. To what extent these low verbal skills are the cause or effect of his poverty of experiences is not known at this stage of research. The fact that schools have not broken the vicious cycle between cultural deprivation and low verbal skills and seeming low intelligence is attested by the Deutsch studies.

---

11. Betts, Emmett A. "A New Area: Reading and Linguistics". Education May, 1964.

BACKGROUND - Continued

> " Given his poverty of experience," reports Silberman, " it is almost inevitable that the slum child will fail when he enters school. He simply has not been prepared to produce what the school demands, and by and large the school makes no attempt to adjust its curriculum to the realities of what its children actually know as opposed to what they are assumed to know. "

It appears to have become the task of the psychologists to fill the void by adjusting the curriculum which would meet the needs of the culturally deprived. The Progressive Choice Reading Method was born of Woolman's personal need to teach his own daughter to read and was developed from his own bias as a behavioral psychologist working on his doctorate at Columbia University. Its development has continued, however, as a cooperative effort with psychologists, linguists, reading specialists, educators and teachers in constructing a reading program that shows potential for breaking the vicious cycle of impoverished language skills - mental retardation - school failure - cultural and economic deprivation.

SUMMARY

In summary, the important point which the studies described here have shown is that reading failures which increase in number in upper grades may be due to inherent inability on the part of some children, but these failures might also be due to faulty concepts on the part of education of the learning-teaching process. These investigations point up a gap in the curriculum planning for reading instruction, a gap which may explain reading failures among educationally and mentally retarded pupils. This deficiency in curriculum provision has become more apparent because of the increase in the number of children from language impoverished homes who lack the audial and perceptual skill which schools assumed they had. The fact that some children seem to learn in spite of these deficiencies in the school curriculum may mean that children seem to learn in spite of teaching methods rather than because these methods are adeqaute, or as Woolman points out: " Normal children can learn to read by any method, phonics or whole-word, because the normal learner perceives the objectives of the teacher and is more able to compensate by his own effort for defects in the reading method. The retardate, on the other hand, can usually make little contribution

toward the achievement of reading skills and therefore requires more powerful methods to achieve the same level of competence." 12/

One healthy aspect of these studies is the amount of self-criticism on the part of reading specialists and special educators who join with the linguists and psychologists in insisting that defects in the teaching-learning process can be overcome by extending the curriculum to include the linguistic aspects of learning to read. The problem is not limited to an improvement in method but also includes the need for improvement in content. The need for change should be directed not only toward how to teach but what to teach. Out of this atmosphere of self-criticism there have emerged several studies which are concerned with developing new concepts which incorporate a linguistic, phonetic, whole-word approach to the teaching of reading. The Progressive Choice Readimg Method is an example of the studies which are now being conducted throughout the country. It incorporates many aspects of the linguistic, kinaesthetic, whole-word and phonetic methods of teaching reading. It is a linguistic, analytic-synthetic method as opposed to other methods which are either synthetic-analytic (whole-word) or analytic-synthetic (phonetic). Throughout , the emphasis is on meaning - beginning with audial meaning and ending with visual meaning.

An outline of the Progressive Choice Reading Method, describing ways in which this program differs from other reading programs, is presented in the APPENDIX.

## PROBLEMS INVESTIGATED

The present research was designed to add to the body of research surveyed above by investigating the effectiveness of a programed method of reading instruction. Specifically, the study sought to evaluate the effectiveness of the BASAL Progressive Choice Reading designed for educable mentally retarded pupils and the ACCELERATED Progressive Choice method developed for a delinquency prevention program for adolescent educationally retarded children.

## DESIGN OF THE STUDY

In November 1963 the major study(Basal Progressive Choice Reading Method) was initiated with fourteen eighth grade pupils at Macfarland Junior High School. To enable the pupils to complete at least two cycles of the three cycle program, the investigation was continued during the summer session at Garnet Patterson Junior High School. Ten of the fourteen pupils continued with the program.

C.A.'s ranged from 13 years 9 months to 16 years 5 months with a mean C.A. of 14 years and 9 months. Mental ages ranged from 9 years 2 months tp 12 years 12 years 9 months with a mean of 11 years 3 months. Mean I.Q. was 76; range in I.Q. , 63 to 88. Many of the pupils were products of culturally impoverished home environments; many came from psychologically stricken parental backgrounds.

Cumulative records revealed that most of the pupils had been in and out of an abnormally high number of schools and classrooms. Having been subjected to many different personalities and techniques in the process, they had acquired a strong resistance to reading. Except for four who could read primer material, they were non-readers. Progress in reading had been practically nil despite NINE* years of previous schooling and reading instruction.

---

* PROMOTION POLICIES: Elementary- Junior High Schools, May 5, 1960. p. 2

> " It is expected that below average children will need one or two additional years in the elementary schools to obtain minimum standards of achievement.....
>
> " Children from the Washington Elementary Schools should be promoted at age thirteen years, seven months, provided they been in a public schools sixth grade for one year.....
>
> " Children entering the city at thirteen years, seven months or above, should be placed in the junior high school....."

The ten Macfarland pupils involved in the major study were enrolled in the first period class at the Garnet Patterson Junior High Summer School. However, it should be noted that the necessity for meeting the reasonable requirements for class size in summer school demanded the inclusion of five pupils new to the program. Their results are reported separately.

The second period summer school class was comprised of twelve pupils in grades 7, 8, 9 and 10 from several junior high schools and two senior high schools. Accelerated Progressive Choice Materials were used with group. These pupils were enrolled just for the summer session.

## DATA COLLECTED

To determine the amount of gain by pupils, three pretests and post-tests were administered. In November the Macfarland pupils were administered the MAT (Metropolitan Achievement Tests, primary and/or elementary), the Gray Oral Reading Paragraphs, and the Progressive Choice Diagnostic Tests which were constructed to measure performance specifically on material included in the program. * All of the tests were re-administered at the end of the school year and repeated at the end of summer school. (alternate forms)

Pupils new to the program in summer school - five in the Period I Class and 12 in the Period II Class - were administered the MAT, The Gates Reading Survey Test for Grades 4 to 11, and the Progressive Choice Diagnostic Tests at the beginning and end of the six week summer session.

## TREATMENT OF DATA

The first part of the analysis involved comparisons between pre- and

---

* The Center for Programed Instruction. " Some Possible New Research Frontiers in Programed Instruction". June 1964.

" Because traditional achievement tests are designed to magnify differences between students rather than differences between methods of instruction, they are generally inappropriate for determining the results of a program or for establishing the relative merits of alternate forms of instruction. It is not at all surprising that findings of no significant difference in achievement are obtained in most studies involving comparisons between programs or between a program and traditional classroom practice. What is needed is the development of methods for describing attainment in terms of comprehensive inventories of proficiency rather than samples of often irrelevant performance. Furthermore, one of the outstanding attributes of programed instruction is that it can produce whatever criterion behavior has been specified."

post-test scores for the Macfarland pupils involved in the major study and the pupils new to the program. This method for evaluating progress involved simply determining differences between reading test scores obtained at the beginning and those obtained at the end of the period of instruction. The differences represent gains. (Table I)

To limit analysis to this "typical" method for evaluating progress, however, ignores the fact that what has been "normal" progress for the average child has not been "normal" progress for the slow learner.

> " The characteristic of the low achiever is that his rate of growth in achievement is significantly less than the rate of growth of the average student. For example the average student will make one year of achievement in one year of instruction, while the low achiever may make only one-half of that amount of achievement during the same period of instruction because his characteristic rate of growth is much less than the average.....It is known also that the handicap of the low achiever is cumulative as he progresses through the school program." 13/

For this reason the following two methods for evaluating the progress of the group in the major study were employed:

1. Comparison of gains during the "Progressive Choice Year" ,1963-1964, gain with the average yearly gains during the years in school before the Progressive Choice Reading Method was used.

2. Determination of amount of decrease in the potential-achievement gap after the year of instruction with Progressive Choice. The I.Q.'s (individuals - WISC) were viewed as ratios of mental age to chronological age. The M.A.'s of the children as of November, the starting date of the Progressive Choice Program, were then determined by using the C.A.'s of the children as of that date. Grade placement levels corresponding to obtained mental ages were then considered as indications of potential reading achievement levels. Next, for each child, the difference between his potential reading level and his reading achievement level - his potential-achievement gap - was found. and this difference,or gap, was viewed as the amount of retardation at the beginning of the study. Similar procedures were used for determining potential reading levels and potential-achievement gaps as of July 1964 , the ending date of the experimental program; and the decrease in potential-achievement gap was then determined for each pupil. Average potential-achievement gap decreases are presented in Table III.

---

TABLE IV

Comparison of Reading Difference Scores (MAT) from Pre-to Post tests for the Macfarland Progressive Choice Class and a Representative Sampling from Basic Classes in Four Other Schools

| Group | No. | IQ | Initial Mean | Final Mean | Prev. Rate of Gain | Expected Gain | Actual Gain | % of Prev. Gain |
|---|---|---|---|---|---|---|---|---|
| Macfarland PC | 10 | 76 | 2.6 | 3.6 | .29 | .26 * | 1.0 | 385 |
| Other Classes | 66 | 75 | 3.1 | 3.6 | .38 | .87 ** | .5 | .57 |

* Teaching interval : 9 months

** Teaching interval : 23 months

Finally, gains in reading (MAT) from November to June for the Macfarland group were compared with gains of a representative sampling of Basic Track pupils . (Table IV) For this comparison, six classes in four junior high schools which represented a cross-section of the city were selected: two from the northwest section, one of which was located in upper northwest; one from the southeast section; and one from the far northeast. It should be noted that the latter was a new school in which much emphasis and attention were given to the Basic Track program.

## RESULTS

The scores on the three measures employed in this study indicate that improvement in reading was evidenced by ALL pupils in the major study. Pretest means and post-test means, and the standard deviations of pretest and post-testscores for this group are presented in Table II. Differences between three consecutive scores can be observed. The mean gain of 1.7 ( one year seven months) over the nine month teaching interval represents significant growth for these pupils. Further analysis revealed a more striking result: ninety percent made a grade and a half progress in reading; twenty per cent made better than two year's gain. Since the I.Q. range was from 63 to 88, no single child would have been expected to make so much progress in a single year.

Comparison of Progressive Choice gains and average yearly gains (Table III) reveals Progressive Choice gains to be about five to eight times as great as average yearly gains before the Progressive Choice method was used in grade eight. The explanation can only be that the special instruction brought this about, since all of the children, with the exception of one, had progressed through NINE years of schooling and had arrived at grade as non-readers. No child exceeded the grade level expected for his mental age but all progress was made within the range of the child's known ability - which was to be expected considering the level at which they entered.

Examination and analysis of the various data for Groups Ia and II in Table I show that, in the case of mean gains, those indicated by both the MAT and the Gates scores were above what might be considered a "normal" amount of gain for an average child in a regular summer school class. The most noticeable aspect of these data is the improvement in reading for the five students in Period I who began the summer with the BASAL Progressive Choice Reading Program and, after two weeks, transferred to the ACCELERATED Program. With a mean I.Q. of 79, mean gain for these students on both standardized tests was significantly above expected: 1.6 ( one year six months ) on the Metropolitan and 1.5 (one year five months ) on the Gates. At the time the teacher transferred these pupils to the Accelerated program, she anticipated unusual gains for them.

It is interesting to note that the new-found success in reading was accompanied by improvements in the children's general attitudes toward school work. During the school year and through the summer the teacher reported an important change of approach and attitude in the children. They became more confident, their oral expression improved, and certain initial behavior difficulties disappeared. These improvements in attitudes toward reading and other learning tasks were maintained throughout the summer.

Another significant evidence of growth appeared in the pupils' own appraisal of their reading. During the summer session several pupils evaluated their progress in the amount, type, and general utility of their reading. We believe a reading program is achieving its purposes when there are pupil comments such as this: " If we had been taught this way before, so many of the children from my school wouldn't be here in summer school. " Another student whose severe language handicap was evidenced in his complete dependence on his dictionary at the beginning of the program, explained near the end that he no longer needed it. (Bavaria).

The fact that ten of the fourteen Macfarland children were willing to forego a summer vacation or job possibilities to continue this program suggests that they must have been convinced that it was of value. All of these pupils paid carfare as they did not live in the Garnet Patterson area as did other students. The attendance was excellent and not one dropped out of the program.

## DISCUSSION

At the beginning of this study we pointed out that we wanted to answer one question: " To what extent can we increase the reading skills of the pupils participating in this study so that the non-readers can read something and the poor readers can read better." The results speak for themselves as far as the question goes - the non-readers are reading something and the poor readers are reading better. We feel, too, that the Macfarland pupils who had a year's experience with the program have been given a good foundation, which will permit them to progress in conventional reading methods with a considerable degree of assurance.

We do not, however, feel justified in making generalizations from our results about the effectiveness of this program as a remedial method

for junior high school pupils. We can say that the results are provocative , if not definitive. The small sampling and the short period, together with the many variables during which the investigation was conducted, preclude further conclusions. Means should be found to extend the investigation of Progressive Choice's merits and limitations to a wider sample of teachers and children under better controlled conditions.

The tragedy that underlies the problem of the illiterate in the junior high school is that we have so far to and so little time to get there. A mentally retarded pupil who made a year or two year's growth in one year is making dramatic growth, but if he starts out at a primer level in junior high school, where is he even if he has grown as much as two years?

In the face of this kind of picture we can nly hope that we have headed off these children becoming members of the drop-out group.

We must be even more cautious in generalizing from the results of this experiment on educable mentally retarded non-readers to the situation of the normal child beginning reading in a public school setting, and judgement on the effectuveness of Progressive Choice as a preventive measure against reading failure must be reserved until the results of Dr. Woolman's three year study of Progressive Choice's use among young beginners becomes available.

## IMPLICATIONS

Research often raises more questions than it answers. In our attempt to answer one question, several questions have been raised which demand continued, more extended and refined study of this method of teaching. The implication of the findings is important enough for educational procedure and psychological theory to warrant thorough and controlled investigation. We have tried to pull together the most pertinent questions for further study.

The FIRST question concerns the problem of diagnosis and remediation. Until we can find ways to prevent the failures of pupils, we will need to continue extensive research into the problem of diagnosis and remediation. The question that occurs is whether a project started in the seventh grade and continued through the completion of

the program would throw more light on the problem of overcoming illiteracy among junior high school pupils?

The SECOND question concerns prevention. The mentally retarded child already starts school with many counts against him. His problem is compounded when he reaches junior high school unable to read even as well as a first grade child. Nine years is a long time for a child to spend in school with nothing to show for it. Does this sort of thing have to happen to children? As we increase our knowledge about the way children learn, can we not prevent illiteracy from happening by using what we have learned? If, as some studies have shown, we started in the pre-school years, could we prevent failure before it occurs?

The THIRD question: Can mental retardation itself be overcome or ameliorated by increasing the reading skills of very young children? What relation does the absence of verbal skills have upon a diagnosis of mental retardation? Available literature on the subject underscores the fact that there is a relationship between a pauperized environment and ultimate classification as a mental retardate. Is it possible to break the vicious cycle of mental retardation - poor enviornment- poor verbal skills by increasing reading skills?

Happily, educators, scientists and other leading authorities in the field are no longer content just to ask questions, but are now conducting research which will answer the questions. The Institute of Educational Research, for instance, plans a longitudinal study described in a recent publication which will throw some light on these questions. 14/

It would be a fine and wonderful advancement for education if the Nation's Capital should find the answers to these most important questions which are facing educators of retarded children.

87TH CONGRESS
1ST SESSION

# H. R. 7111

IN THE HOUSE OF REPRESENTATIVES

MAY 16, 1961

Mr. ZELENKO introduced the following bill; which was referred to the Committee on Education and Labor

# A BILL

To provide for the desegregation of public schools, with all deliberate speed, including nationwide first-step compliance by 1963, and for other purposes.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Public School Desegregation Act".

## TITLE I—DEFINITIONS

SEC. 101. As used in this Act—

(a) "Desegregation" means the assignment of all students to public schools irrespective of their race or color. No assignment system in which race or color is a factor in the initial assignment of students to particular public schools shall

be deemed to have achieved desegregation even though placement or other tests or transfers or other options may be available to change such assignment.

(b) "Public school" means any elementary or secondary educational institution operated by a State, subdivision of a State, or governmental agency within a State, or operated principally or substantially from or through the use of governmental funds, or funds derived from a governmental source.

(c) "School board" means any agency or agencies, the members, agents, and employees thereof, and any other person or persons, authorized to determine, control, or direct the institutions, structures, or places at which particular students are assigned to or attend public school.

(d) "First-step compliance" means the affording of desegregated education to a substantial number of students at each public school within the jurisdiction of the school board, not later than the commencement of the 1963–1964 school year.

## TITLE II—DUTY TO ADOPT AND IMPLEMENT DESEGREGATION PLANS

SEC. 201. Every school board which, on the date of the enactment of this Act, has failed to achieve desegregation in all public schools within its jurisdiction, shall adopt a desegregation plan as provided in section 202 and shall file said

plan, within one hundred and eighty days of the date of enactment of this Act with the Secretary of Health, Education, and Welfare.

SEC. 202. Every desegregation plan required under section 201 shall—

(1) provide for achieving desegregation in all public schools within the jurisdiction of the school board with all deliberate speed, pursuant to a schedule setting forth the time when and the manner in which desegregation is to be achieved for each class, grade, school, and district within the jurisdiction of the school board involved; and

(2) provide for at least first-step compliance not later than the commencement of the 1963–1964 school year.

SEC. 203. Every school board required to adopt a desegregation plan pursuant to section 201 shall forthwith implement the same in accordance with its terms immediately upon its adoption and thereafter continue its implementation in good faith and with all deliberate speed until desegregation is fully achieved in all public schools within its jurisdiction.

SEC. 204. Whenever any school board subject to the requirements of this title loses or relinquishes any of its authority over public schools formerly within its jurisdiction or

its authority to assign students to schools within its jurisdiction, the duties prescribed in this Act shall immediately devolve upon the person or persons to whom such authority has been transferred or relinquished.

SEC. 205. Wherever, because of overlapping or complementary jurisdiction, more than one school board is subject to the requirements of this title with respect to the same schools or students, the boards concerned shall exercise their obligations hereunder jointly.

SEC. 206. The requirements of this title shall not apply to any public school which, on the date of enactment of this Act, is subject to a court order providing for or approving a desegregation plan for the said school.

## TITLE III—TECHNICAL ASSISTANCE BY SECRETARY OF HEALTH, EDUCATION, AND WELFARE TO FACILITATE DESEGREGATION

SEC. 301. The Secretary of Health, Education, and Welfare shall upon application render technical assistance to school boards by such means as he deems appropriate in the preparation, adoption, and implementation of desegration plans required by this title. Technical assistance may include, but shall not be limited to, such matters as the assembling, publishing, and distributing of information, including successful case histories of desegregation, the planning, calling, and holding of conferences, the appointment of ad-

visory councils and the assisting by such other means as the Secretary deems appropriate of progress toward desegregation in the public schools of the Nation.

## TITLE IV—FINANCIAL ASSISTANCE BY SECRETARY OF HEALTH, EDUCATION, AND WELFARE TO FACILITATE DESEGREGATION

SEC. 401. Every plan submitted to the Secretary of Health, Education, and Welfare pursuant to section 201 of this Act shall be reviewed by the Secretary to determine whether it conforms with the requirements of this Act. Whenever the Secretary determines that a desegregation plan submitted to him meets the requirements of this Act, he is authorized for the purpose of facilitating the carrying out of any such desegregation plan and upon receipt of application therefor to make grants to school boards, States, municipalities, school districts, and other governmental units to assist in meeting costs he determines to be reasonably necessary for the implementation of such desegregation plan. Grants may be made under this section for—

(1) the cost of employing additional schoolteachers;

(2) the cost of giving to teachers and other school personnel in-service training in dealing with problems incident to desegregation;

(3) the cost of employing specialists in problems

incident to desegregation and of providing other assistance to develop understanding by parents, schoolchildren, and the general public of desegregation in order to reduce the possibility of community hostility or resistance to such desegregation;

(4) the cost of replacement of funds to schools or schoolteachers withheld because such schools or schoolteachers have undertaken or may undertake desegregation;

(5) the cost of construction, enlargement, or alteration of school facilities when the Secretary finds that lack or inadequacy of existing facilities makes the carrying out of a desegregation plan impracticable or materially more difficult; and

(6) other costs directly related to the process of eliminating segregation in public schools.

SEC. 402. The Secretary of Health, Education, and Welfare is further authorized for the purpose of facilitating the carrying out of desegregation in accordance with any court-approved desegregation plan not subject to the requirements of title II of this Act, to make grants to school boards, States, municipalities, school districts, and other governmental units to assist in meeting costs he determines to be reasonably necessary for the implementation of such de-

segregation plan in the same manner and for the same purposes as provided for in the foregoing section of this title.

SEC. 403. Each application made for a grant under this title shall provide such detailed breakdown of the measures for which financial assistance is sought as the Secretary may by regulations prescribe. Each grant under this section shall be made in such amounts and on such terms and conditions as the Secretary shall prescribe, which may include a condition that the applicant expend certain of its own funds in specified amounts for the purpose for which the grant is made. In determining whether to make a grant, and in fixing the amount thereof and the terms and conditions on which it will be made, the Secretary shall take into consideration the amount available for grants under this section and the other applications which are pending before him; the financial condition of the applicant and the other resources available to it; the nature, extent, and gravity of its problems incident to desegregation; and such other factors as he finds relevant.

SEC. 404. Payments of grants under this title may be made in advance or by way of reimbursement, and at such intervals as the Secretary may determine.

SEC. 405. There are hereby authorized to be appropriated for the fiscal year in process at the date of enactment of this Act and for each succeeding fiscal year, such sums,

not exceeding $40,000,000 for any fiscal year, as may be necessary to carry out the provisions of this title.

## TITLE V—ENFORCEMENT OF DUTY TO ADOPT AND IMPLEMENT DESEGREGATION PLANS

SEC. 501. In the event that a school board, or its successor as provided in section 204, subject to the requirements of title II of this Act has violated any of the obligations prescribed therein, the Attorney General is authorized to institute for or in the name of the United States in the United States district court for the district wherein such school board or its successor is located or meets, a civil action or other proceeding for preventive relief, including an application for an injunction or other order, against such school board or its successor. The court wherein such action is instituted is authorized, upon finding that there has been a violation of title II of this Act, without limitation upon the grant of such other relief as may be appropriate under the circumstances, to require the school board or its successor (1) to adopt and implement a plan of school desegregation pursuant to the requirements of title II of this Act, (2) to implement any other school desegregation plan which the court may find appropriate and consistent with the requirements of this Act, or (3) to issue such other orders and grant such other relief as will most expeditiously achieve first-step compliance and desegregation with all deliberate speed in the public

schools under the jurisdiction of the school board or its successor.

SEC. 502. The district courts of the United States shall have jurisdiction over proceedings instituted under section 501 of this Act, and shall exercise the same without regard to whether any administrative or other remedies that may be provided by law shall have been exhausted, and in a manner calculated to achieve desegregation in accordance with the requirements of this Act.

## TITLE VI—MISCELLANEOUS PROVISIONS

SEC. 601. Nothing in this Act shall be construed to impair any right guaranteed by the Constitution or laws of the United States or any remedies already existing for their protection or enforcement, nor to prevent any individual or private organization from acting to enforce or safeguard any constitutional right in any manner now or hereafter permitted by law.

SEC. 602. If any provision of this Act or the application of such provision to any person or circumstance is held invalid, the remainder of this Act, or the application of such provision to persons or circumstances other than those to which it is held invalid, shall not be affected thereby.

87TH CONGRESS
2D SESSION

# H. R. 10783

IN THE HOUSE OF REPRESENTATIVES

MARCH 15, 1962

Mr. KOWALSKI introduced the following bill; which was referred to the Committee on Education and Labor

# A BILL

To provide for the desegregation of all public schools with all deliberate speed; requires every school board which has failed to achieve desegregation in its schools to adopt and file with the Secretary of Health, Education, and Welfare a desegregation plan providing for first-step compliance.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Federal Equality of Education Act of 1962."

## TITLE I—DESEGREGATION PLANS

SEC. 101. For purposes of this title and titles II, III, and IV of this Act—

(a) The term "desegregation" means the assignment of

all students to public schools irrespective of their race or color. No assignment system in which race or color is a factor in the initial assignment of students to particular public schools shall be deemed to have achieved desegregation even though placement or other tests or transfers or other options may be available to change such assignment.

(b) The term "public school" means any elementary or secondary educational institution operated by a State, subdivision of a State, or governmental agency within a State, or operated principally or substantially from or through the use of governmental funds, or funds derived from a governmental source.

(c) The term "school board" means any agency or agencies, the members, agents, and employees thereof, and any other person or persons, authorized to determine, control, or direct the institutions, structures, or places at which particular students are assigned to or attend public school.

(d) The term "first-step compliance" means the affording of desegregated education to a substantial number of students at each public school within the jurisdiction of a school board.

(e) The term "Secretary" means the Secretary of Health, Education, and Welfare.

SEC. 102. Every school board which, on the date of the enactment of this Act, has failed to achieve desegregation

of all public schools within its jurisdiction, shall adopt a desegregation plan as provided in section 103 and shall file such plan, within 180 days after the date of enactment of this Act, with the Secretary.

SEC. 103. Every desegregation plan required under section 102 shall—

(1) provide for achieving desegregation of all public schools within the jurisdiction of the school board with all deliberate speed, pursuant to a schedule setting forth the time when and the manner in which desegregation is to be achieved for each class, grade, school, and district within the jurisdiction of the school board involved; and

(2) provide for at least first-step compliance not later than the commencement of the first school year which begins after the submission of such plan.

SEC. 104. Every school board required to adopt a desegregation plan pursuant to section 102 shall forthwith implement the same in accordance with its terms immediately upon its adoption and thereafter continue its implementation in good faith and with all deliberate speed until desegregation is fully achieved in all public schools within its jurisdiction.

SEC. 105. Whenever any school board subject to the requirements of this title loses or relinquishes any of its au-

thority over public schools formerly within its jurisdiction or its authority to assign students to schools within its jurisdiction, the duties prescribed in this title shall immediately devolve upon the person or persons to whom such authority has been transferred or relinquished.

SEC. 106. Wherever, because of overlapping or complementary jurisdiction, more than one school board is subject to the requirements of this title with respect to the same schools or students, the boards concerned shall exercise their obligations hereunder jointly.

SEC. 107. The requirements of this title shall not apply with respect to any public school which, on the date of enactment of this Act, is subject to a court order providing for or approving a desegregation plan for such public school.

SEC. 108. (a) In the event that a school board, or its successor as provided in section 105, subject to the requirements of this title has violated any of the obligations prescribed herein, the Attorney General is authorized to institute for or in the name of the United States in the United States district court for the district wherein such school board or its successor is located or meets, a civil action or other proceeding for preventive relief including an application for an injunction or other order, against such school board or its successor. The court in which such action is instituted is authorized, upon finding that there has been a violation of

this title, without limitation upon the grant of such other relief as may be appropriate under the circumstances, to require the school board or its successor (1) to adopt and implement a plan of school desegregation pursuant to the requirements of this title, (2) to implement any other school desegregation plan which the court may find appropriate and consistent with the requirements of this title, or (3) to issue such other orders and grant such other relief as will most expeditiously achieve first-step compliance and desegregation with all deliberate speed in the public schools under the jurisdiction of the school board or its successor.

(b) The district courts of the United States shall have jurisdiction over proceedings instituted under subsection (a), and shall exercise the same without regard to whether any administrative or other remedies that may be provided by law shall have been exhausted, and in a manner calculated to achieve desegregation in accordance with the requirements of this title.

## TITLE II—GRANTS TO SCHOOL BOARDS AND LOCAL GOVERNMENTS TO FACILITATE DESEGREGATION

SEC. 201. Whenever the Secretary determines that a desegregation plan submitted to him by a school board pursuant to section 102 meets the requirements of title I he is

authorized, for the purpose of facilitating the carrying out of any such desegregation plan and upon receipt of application therefor, to make grants to such school board, or to the local government having authority to provide funds for such school board, to assist in meeting the costs he determines to be reasonably necessary for—

(1) employing specialists in problems incident to desegregation, and providing other assistance to develop understanding by parents, schoolchildren, and the general public of desegregation in order to reduce the possibility of community hostility or resistance to desegregation;

(2) providing in-service training to teachers, guidance counselors, and other school personnel for dealing with problems incident to desegregation; and

(3) establishing programs designed to identify and assist teachers who are handicapped in their professional endeavors as a result of inferior training or educational opportunity, and to identify and assist talented and able students who are handicapped in their scholastic efforts as a result of inferior educational opportunity.

SEC. 202. The Secretary is further authorized, for the purpose of facilitating the carrying out of desegregation in accordance with any desegregation plan provided or approved by a court, or of carrying out desegregation by any

other school board not subject to the requirements of title I, to make grants to school boards, and local governments, to assist in meeting costs he determines to be reasonably necessary for the purposes enumerated in section 201.

SEC. 203. Each application made for a grant under this title shall provide such detailed breakdown of the measures for which financial assistance is sought as the Secretary may by regulations prescribe. Each grant under this title shall be made in such amounts and on such terms and conditions as the Secretary shall prescribe, except that a grant may be made only on condition that the applicant will, during the period for which the grant is made, expend for the same purpose or purposes for which the grant is made an amount of its own funds equal to the amount of the grant.

In determining whether to make a grant and in fixing the amount thereof and the terms and conditions on which it will be made, the Secretary shall take into consideration the amount available for grants under this title and the other applications which are pending before him; the financial condition of the applicant and the other resources available to it; the nature, extent, and gravity of its problems incident to desegregation; and such other factors as he finds relevant.

SEC. 204. Payments of grants under this title may be made in advance or by way of reimbursement, and at such intervals as the Secretary may determine. No payment of a

grant shall be made to any school board, or to the local government having authority to provide funds for such school board, after the expiration of five years from the date on which a desegregation plan was submitted by such school board under section 102, or, in the case of a school board subject to a desegregation plan provided or approved by a court, after the expiration of five years from the date on which the court provided or approved such desegregation plan, or, in the case of any other school board not subject to the requirements of title I, after the expiration of five years from the date on which a program of desegregation was begun by such school board.

SEC. 205. There are authorized to be appropriated for the fiscal year in process on the date of the enactment of this Act and for each succeeding fiscal year, such sums, not exceeding $40,000,000 for any fiscal year, as may be necessary for making grants under the provisions of this title.

## TITLE III—TECHNICAL ASSISTANCE BY SECRETARY OF HEALTH, EDUCATION, AND WELFARE WITH RESPECT TO DESEGREGATION PROBLEMS

SEC. 301. The Secretary is authorized, upon receipt of application therefor, to give technical assistance to school boards eligible for assistance under title II, and to local nonprofit organizations in the communities served by such school

boards, in training school personnel and community leaders in techniques useful in solving desegregation problems, including training and other assistance in establishing home study programs for academically and culturally handicapped students. Such technical assistance may be given to any such school board, or local nonprofit organization, whether or not such school board or the local government having authority to provide funds for such school board has applied for or received a grant under title II.

SEC. 302. Technical assistance authorized by section 301 may be given by the Secretary by such means as he deems appropriate to carry out the purposes of such section. No technical assistance shall be given to any school board, or to any local nonprofit organization in the community served by such school board, after the expiration of five years from the date on which a desegregation plan was submitted by such school board under section 102, or, in the case of a school board subject to a desegregation plan provided or approved by a court, after the expiration of five years from the date on which the court provided or approved such desegregation plan, or, in the case of any other school board not subject to the requirements of title I, after the expiration of five years from the date on which a program of desegregation was begun by such school board.

## TITLE IV—LOANS TO SCHOOL BOARDS AND LOCAL GOVERNMENTS

SEC. 401. The Secretary is authorized, upon receipt of application therefor, to make loans—

(1) to any school board, if he finds that—

(A) part or all of the funds which would otherwise be available to such school board have been withheld or withdrawn by action of the State or local government because of the desegregation, in whole or in part, of one or more schools under the jurisdiction of such school board; and

(B) such school board has authority to receive and expend the proceeds of such loan; or

(2) to any local government within the jurisdiction of which any school board operates, if he finds that—

(A) part or all of the funds of such local government which would otherwise be available to such school board have been withheld or withdrawn by action of the State because of the desegregation, in whole or in part, of one or more schools under the jurisdiction of such school board; and

(B) such local government has authority to receive such loan and to make the proceeds thereof available for the use of such school board.

SEC. 402. (a) Loans may be made by the Secretary under section 401 to any school board or local government only if he is satisfied that the proceeds of such loans will be used for the same purposes for which the funds withheld or withdrawn would otherwise be used, and that such purposes are necessary for the operation and maintenance of the school system under the jurisdiction of such school board.

(b) Loans may be made by the Secretary under section 401 to any school board or local government only if he is satisfied that funds cannot be borrowed by such school board or local government, as the case may be, from private financial institutions.

SEC. 403. Any loan under section 401 shall be made upon such terms and conditions, not inconsistent with the provisions of this title, as the Secretary deems appropriate. Any such loan shall be repaid within such time as the Secretary prescribes after the funds withheld or withdrawn are restored to the school board or local government concerned, or after funds are available to such school board or local government by borrowing from private financial institutions.

SEC. 404. There are authorized to be appropriated for each fiscal year such sums as may be necessary for making loans under the provisions of this title.

## TITLE V—ASSISTANCE BY COMMISSION ON CIVIL RIGHTS TO FACILITATE DESEGREGATION

SEC. 501. Part I of the Civil Rights Act of 1957 is amended by inserting after section 104 the following new section:

"ADDITIONAL DUTIES OF THE COMMISSION

"SEC. 104A. In addition to the duties imposed by section 104 (a), the Commission is authorized—

"(1) to collect and disseminate information concerning programs and procedures used by school districts in the various States to achieve an organization and operation of their schools in accordance with constitutional requirements, including data as to the known effects of such programs and procedures on the quality of education and to the costs of such programs and procedures; and

"(2) to establish an advisory and conciliation service to assist local school officials in developing desegregation plans designed to meet constitutional requirements and local conditions, and to attempt to mediate and conciliate disputes between school officials and school patrons, upon the request of either, relating to desegregation of schools, including proposed plans for desegregation and the implementation of desegregation plans already in operation."

## TITLE VI—RESTRICTIONS ON FEDERAL FINANCIAL AID FOR SEGREGATED PUBLIC SCHOOLS, COLLEGES, AND UNIVERSITIES

SEC. 601. (a) In the case of any program providing Federal grants-in-aid to the States for elementary or secondary education in public schools, the amount of such grant-in-aid for any fiscal year to any State shall be reduced in accordance with the provisions of this section if the head of the Federal department or agency administering such programs determines, at the time of determining the amount of such grant-in-aid for such year, that the public elementary or secondary schools of any local educational agency in such State are operated in such a manner as to segregate pupils of any race or color. If the head of such department or agency determines at such time that all local educational agencies in such State practice such segregation in the operation of such schools, then such grant-in-aid shall only be 50 per centum of the amount it would have been but for the provisions of this section. If the head of such department or agency determines at such time that one or more local educational agencies in such State have initiated a program of desegregation, or do not practice segregation, in the operation of such schools, then such grant-in-aid shall be 50 per centum of the amount it would have been but for the provisions of this section, plus such proportion of the remaining 50

per centum as the number of pupils enrolled in the public elementary and secondary schools of all the local educational agencies which have initiated a program of desegregation or do not practice desegregation, bears to the number of pupils enrolled in all the public elementary and secondary schools in such State.

(b) For the purposes of this section—

(1) the term "local educational agency" means a board of education or other legally constituted local school authority having administrative control and direction of public elementary or secondary schools in a city, county, township, school district, or political subdivision in a State; and

(2) enrollments shall be determined on the basis of the latest reliable figures available to the department or agency head concerned.

(c) Nothing in this section shall be construed to authorize any department, agency, officer, or employee of the United States to exercise any direction, supervision, or control over the curriculum, program of instruction, administration, or personnel of any educational institution or school system.

SEC. 602. (a) No Federal department or agency shall make any grant or loan to any publicly controlled college or university unless satisfactory proof is submitted to the head

of such department or agency that such college or university does not discriminate on the basis of race, color, religion, or national origin in accepting students for enrollment.

(b) Nothing in this section shall be construed to authorize any department, agency, officer, or employee of the United States to exercise any direction, supervision, or control over the curriculum, program of instruction, administration, or personnel of any educational institution or school system.

## TITLE VII—PROTECTION OF INDIVIDUALS FROM BODILY HARM

SEC. 701. The Attorney General is authorized to take such action as may be necessary to protect—

(1) the members of any school board having under its jurisdiction one or more public schools which are desegregated or in which desegregation has been commenced;

(2) the officials, teachers, and other employees of any public school which is desegregated or in which desegregation has been commenced, or of any public school system of which any such public school is a part;

(3) children attending any such public school and the parents of such children; and

(4) any other individual assisting any such member, any such official, teacher, or other employee, or

any such child or parent, from physical injury and from harassment, intimidation, or reprisal by any person or group of persons.

TITLE VIII—ANNUAL SCHOOL SURVEYS

SEC. 801. The Secretary of Health, Education, and Welfare shall conduct an annual survey to determine the number and ethnic classification of students enrolled in all public educational institutions in the United States. The Secretary shall prepare and publish each year data obtained from each annual survey setting forth the number and ethnic classification of students enrolled—

(1) in all public educational institutions in each State,

(2) in each elementary and secondary public educational institution in each school district, and the totals for each school district, and

(3) in each public institution of higher education in each State.

TITLE IX—MISCELLANEOUS PROVISIONS

SEC. 901. Nothing in this Act shall be construed to impair any remedies already existing for the protection or enforcement of rights guaranteed by the Constitution or laws of the United States, nor to prevent any individual or private organization from acting to enforce or safeguard any con-

stitutional right in any manner now or hereafter permitted by law.

SEC. 902. If any provision of this Act or the application of such provision to any person or circumstance is held invalid, the remainder of this Act or the application of such provision to persons or circumstances other than those to which it is held invalid, shall not be affected thereby.

SEC. 903. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

KOWALSKI

H 15, 1962
ee on Education and Labor

[redacted]

[redacted] Committee on [redacted] Federally Assisted Public Education, Friday, June 15, 1962, at 10:00 A.M., Room 429, Old House Office Building

Mr. Chairman and Members of the Subcommittee, on behalf of the National Association for the Advancement of Colored People, I wish to thank you for this opportunity to testify in support of H.R. 10783, introduced by Mr. Kowalski of Connecticut and H.R. 7111, introduced by Mr. Zelenko of New York.

It should be noted that the principle of these bills is also supported by the Leadership Conference on Civil Rights. Our organization is a member of the Leadership Conference and Mr. Roy Wilkins, who is Executive Secretary of the NAACP, is also Chairman of the Leadership Conference.

At the outset, I wish to go on record as saying that none of the failures to desegregate, none of the acts of violence which have been used to thwart compliance with the law, and none of the irresponsible criticisms that have been made by opponents of civil rights can diminish the monumental importance of the 1954 United States Supreme Court decision which outlawed school segregation on the basis of race. No other decision of that Tribunal has meant so much to all of the citizens of the United States who believe that our Constitution is a vital instrument designed to protect freedom and human rights in all times of stress and in any period of our nation's history. Millions of our fellow humans of numerous races, differing religious faiths, and who owe loyalties to other nations in many parts of the world, have been inspired by this action of the Court.

Here in this forum, I wish to assert that the name of Chief Justice Earl Warren and the names of his associates on the Court, who were participants in the unanimous decision of May 17, 1954, will live and be honored long after the last echo of [redacted] has faded out over the trash heaps of discredited detraction.

It is also a tribute to the vitality and strength of our country that one of the Justices who joined in that unanimous decision was once a Senator from the State of Alabama. In spite of all that some spokesmen from that State may say to the contrary, I prefer to believe that there are more people in Alabama and elsewhere in the South who follow the views of Mr. Justice Black on the matter of school desegregation than there are people who wish to defy the law. One of the great tragedies of our time is that the Congress has failed to give adequate support to the men and women of good will in the South who place the preservation of public education above petty prejudices based on race.

The courageous decision of the United States Supreme Court opened the door through which hundreds of major new advances in Washington and elsewhere have been made because of the elevation of the nation's concept of what the term, "equal justice under law" really means. The fact that Congress, eight years after this historic decision, is still pondering whether it will pass implementing and supplementing legislation should trouble the conscience of every single candidate for public office who has told the voters of our nation that he would work for the passage of human rights legislation.

The hard fact that we face in the consideration of these bills is that it is now June 15 and neither this Subcommittee nor the Senate Committee on Labor and Public Welfare has approved a bill. It is also a fact of life that even if this Subcommittee does approve either of these bills, or possibly improved versions of them, there still looms ahead the formidable obstacle of what has been described as "liberalized" Rules Committee in this Body. They also face the hazard of a cave of winds known as the "filibuster" through which blow noisy gales of fantastic destruction. In spite of these known threats to enactment of these bills, let no man concede that it is impossible to pass them in this Session of the 87th Congress. Whenever there is the will to pass legislation, whenever the leaders of the country, beginning with the President and including the leaders of both parties in the House and Senate, are determined to write legislation to correct injustices, they can do so regardless

of the time factors and regardless of the processes of obstruction in the hands of a few. Those who will oppose these bills and those who have opposed even so innocuous a measure as the so-called literacy test, cannot be successful without the assistance of Republicans and Democrats who come from areas outside the South. One has only to look at the record of emasculating amendments when the Civil Rights Bills of 1957 and 1960 were passed to see that the successful dilution of strong legislation was accomplished by a thimble full of Dixie and a bucket full of Yankee cooperation.

On the matter of contents of these proposed bills, it should be noted that the subject of adoption of a desegregation plan as proposed by Section 201 of Title II in the Zelenko Bill and Section 102 of Title I in the Kowalski Bill permit a 180-day period of grace after enactment in which plans may be filed with the Secretary of Health, Education, and Welfare. This provision has caused great soul-searching among many who support these bills. Eight years in which to comply with the Supreme Court decision are more than enough time. Nevertheless, this provision has been agreed upon by friends of civil rights in good faith and with clear consciences. We must make certain that if and when these bills become law, there will be no last minute changes which will lengthen the period from what is now approximately six months to a longer time.

The bills contain provisions for technical and financial assistance to be provided to aid school desegregation through the Department of Health, Education, and Welfare. These features should be of value to all who wish to obey the law, but who honestly believe that they can do a better job with help from the Federal Government.

As one travels about the states which still resist compliance with the U.S. Supreme Court decision, it is appalling to see the run-down, low-grade arrangements which are set up to educate children, whether they be colored or white. If some of the areas of greatest resistance would open the doors of classrooms to all races tomorrow, it would mean merely a mingling of promising children in buildings that are health hazards, in classrooms that are

undesirable, and under teachers who are over burdened because of low pay and inadequate working conditions. The passage of these provisions would mean that not only would there be a moral rebirth in the school districts that comply with the law, but there would also be a physical rejuvenation to prepare all of our children for the challenging world and the times of high adventure in which we live.

In this respect, these bills are vastly superior to what are popularly described as Federal Aid to Education bills. All of those proposals make an incredible attempt to have the Federal Government become a party to racial segregation by giving money for school construction or other educational purposes without any requirement that the new schools and the new facilities be available to all children without regard to race.

Under Title V of the Zelenko Bill and under Section 108a, Title I, of the Kowalski Bill, the Attorney General of the United States is authorized to institute for, or in the name of the United States, civil actions or other proceedings or preventive relief, and an application for an injunction or other order against school boards or their successors for failure to comply with the provisions of the new law. This is of great value and without it the passage of these bills would be an empty gesture.

The majority of the American people are law-abiding and respect even those statutes with which they do not agree. There are, however, enough hoodlums and enough apostles of violence to intimidate and obstruct compliance. These opponents of human freedom often succeed in delays merely by threatening reprisals. Unfortunately, also there are some holders of public office who seem to believe that they, rather than the U.S. Supreme Court, are the final arbiters on constitutional questions. For those who would obstruct and for those who would delay by betraying their positions of trust, there is needed the firm hand of the Federal Government to accomplish obedience to the law and to thwart those who seek to evade the law with sophisticated or simple-minded schemes.

Section 601 of Title VI in the Zelenko Bill and Section 901 of Title IX in the Kowalski Bill are of great value. These assure that if the Executive Branch of Government is not diligent and forthright in the administration of the law, the citizens who are being denied their constitutional rights will still be able to seek redress with their own resources.

In conclusion, Mr. Chairman and Members of the Subcommittee, I would like to point out that there are some voices that have been raised in the Congress and on various radio and television programs asserting that there is no interest in civil rights legislation. It is difficult to know what newspapers these persons read. It is difficult to know what occupies their minds when hundreds of colored citizens are daily engaged in protests against injustices in all parts of our country.

I believe every member of this Subcommittee knows that if the subject of civil rights had the glamour of some major government scandal or had the television possibilities of such things as juvenile delinquency or organized crime, there would be tremendous activity in the hearing rooms and on committee staffs, even though not a single postcard, letter or telegram had been received by any member of either House asking for action on the problem presented. Even if there was not a single voice raised urging passage of this legislation, all who have taken an oath to uphold the Constitution of the United States should feel compelled to pass laws of this kind. You, by your interest and by the diligent work of your staff members, and the gentlemen who have introduced these bills, have shown that you are conscious of your duty. I congratulate you for this and earnestly hope that your colleagues who are not members of this Subcommittee will rally to support this valuable action and that they will join you in working for passage in this Session of the Congress.

Statement of Norman Hill, Assistant
to the Program Director, CORE -
the Congress of Racial Equality
before the Committee on Education and
Labor of the U. S. House of
Representatives, June 15, 1962,
Washington, D. C.

MR. CHAIRMAN AND MEMBERS OF THE COMMITTEE:

My name is Norman Hill and I am the Assistant to the Program Director of the Congress of Racial Equality whose office is located in New York City, at 38 Park Row. I wish to thank the Committee for this opportunity to appear and to present testimony on the urgent need for the passage of a bill providing for the desegregation of public schools and requiring every school board which has failed to achieve desegregation in its schools to adopt and file a desegregation plan of first step compliance with the Secretary of Health, Education and Welfare.

The Supreme Court in 1954 in the case of Brown v. Board of Education of Topeka declared that enforced racial segregation in public education is a denial of equal protection under the 14th amendment.

Yet today, eight years after this historic decision, 2,800,000 Negro children in the South still attend segregated schools. In the states of Alabama, Mississippi and South Carolina, no effort has been made to comply with the Supreme Court ruling. According to the U.S. Commission on Civil Rights in 1960-61 only 7% of all Negroes in public schools in the 17 southern states attended school with white pupils. The public schools in Prince Edward County, Virginia have been closed since September of 1959 in defiance of a court order, Tuition grants involving state and local funds have been used to circumvent the Supreme Court decision. In Louisiana measures have been taken by the executive and legislative

branches of the government to maintain segregation despite a Federal court order. Accompanying the defiance on a state level were civic disorder and a boycott of the public schools serving as the foci of the controversy. A further indication of the breakdown of law and order were the harassment and economic reprisals directed against the few whites who attempted to comply with the Federal order.

Such evidence clearly manifests the urgent and immediate need for further steps on a federal level -- namely the enactment of a public school desegregation bill. The relevant and pressing question is: how to extinguish public school segregation. Open defiance continues. Progress is excruciatingly slow. Millions of minority group children are suffering under an inferior physical and psychological educational environmnent, are experiencing an incalculable harm which may never be undone.

Granting the existing widespread school segregation is in the South, it is in reality a national problem, a cancer of the North as well as the South. On May 17, 1954 the Supreme Court held that "separate educational facilities are inherently unequal," thus clearly encompassing segregation de facto as well as de jure. Examples of segregation in northern and western school systems occur by official action in the form of gerrymandering, zoning, selection of sites for schools and staffing and by culpable inaction, particularly in view of widespread residential segregation.

In reiterating support for a public school desegregation bill, I would cite Title II providing for grants to school boards and local

governments to facilitate desegregation and Title III authorizing technical assistance by the Secretary of Health, Education and Welfare for desegregation problems. These provisions are the means by which desegregation can occur and at the same time maintain and improve the quality of education. Concurrently the passage of a bill providing for the desegregation of public schools and requiring every school board which has failed to achieve desegregation in its schools to adopt and file a desegregation plan of first step compliance with the Secretary of Health, Education and Welfare is a recognition of the necessity and urgency of school desegregation, a realization of the importance of avoiding the compounding of existing inequalities in facilities, staffing and quality of education resulting from segregation.

Millions of minority group children, North and South, await fulfillment of the 1960 Democratic Party platform pledge, "that every school district affected by the Supreme Court's decision should submit a plan providing for at least first step compliance by 1963," and the Republican plank stating that, "We believe that each of the pending court actions should proceed as the Supreme Court has directed and that in no district should there be any such delay." The time is now!

June 6, 1962

Dear Mr. Farmer:

This will confirm our recent telephone conversation in which you agreed to testify at the hearings before the Subcommittee on Integration in Federally Assisted Public Education, to be held Friday, June 15, 1962, at 10:00 a.m. in Room 429 of the Old House Office Building.

As you will recall, the hearings will be centered around testimony on H. R. 7111 (introduced by Congressman Zelenko of New York) and H. R. 10783 (introduced by Congressman Kowalski of Connecticut), copies of which are enclosed.

I am also enclosing an information sheet for witnesses to assist in preparing you for this presentation.

I look forward to seeing you on June 15.

Sincerely,

Deborah P. Wolfe

STANDARDS FOR WITNESSES

Ad Hoc Subcommittee on Integration

1. Testimony will be taken, as far as possible, on higher education first, with secondary education and elementary education to follow. Witnesses will be scheduled with this in mind, as far as practicable.

2. A written statement shall be submitted to the subcommittee in 75 copies, at least 20 of which should be mailed to reach the committee office the day before the witness appears, so that pertinent questions may be prepared.

3. The witness may have 10 to 15 minutes to make his oral presentation. He may either read from his prepared text or submit it for the record and request permission to use his allotted time to amplify his material or to present additional related material. Findings of any studies on which the witness may rest his testimony should be submitted in detail unless they are otherwise published.

4. The witness is available for questioning by Members after his presentation, confining his answers to the substance of the question asked, which will be based on the statement made.

5. The witness' time on the stand will be at the discretion of the subcommittee chairman.

87TH CONGRESS
1ST SESSION

# H. R. 7111

IN THE HOUSE OF REPRESENTATIVES

MAY 16, 1961

Mr. ZELENKO introduced the following bill; which was referred to the Committee on Education and Labor

# A BILL

To provide for the desegregation of public schools, with all deliberate speed, including nationwide first-step compliance by 1963, and for other purposes.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Public School Desegregation Act".

## TITLE I—DEFINITIONS

SEC. 101. As used in this Act—

(a) "Desegregation" means the assignment of all students to public schools irrespective of their race or color. No assignment system in which race or color is a factor in the initial assignment of students to particular public schools shall

be deemed to have achieved desegregation even though placement or other tests or transfers or other options may be available to change such assignment.

(b) "Public school" means any elementary or secondary educational institution operated by a State, subdivision of a State, or governmental agency within a State, or operated principally or substantially from or through the use of governmental funds, or funds derived from a governmental source.

(c) "School board" means any agency or agencies, the members, agents, and employees thereof, and any other person or persons, authorized to determine, control, or direct the institutions, structures, or places at which particular students are assigned to or attend public school.

(d) "First-step compliance" means the affording of desegregated education to a substantial number of students at each public school within the jurisdiction of the school board, not later than the commencement of the 1963–1964 school year.

## TITLE II—DUTY TO ADOPT AND IMPLEMENT DESEGREGATION PLANS

SEC. 201. Every school board which, on the date of the enactment of this Act, has failed to achieve desegregation in all public schools within its jurisdiction, shall adopt a desegregation plan as provided in section 202 and shall file said

plan, within one hundred and eighty days of the date of enactment of this Act with the Secretary of Health, Education, and Welfare.

SEC. 202. Every desegregation plan required under section 201 shall—

(1) provide for achieving desegregation in all public schools within the jurisdiction of the school board with all deliberate speed, pursuant to a schedule setting forth the time when and the manner in which desegregation is to be achieved for each class, grade, school, and district within the jurisdiction of the school board involved; and

(2) provide for at least first-step compliance not later than the commencement of the 1963–1964 school year.

SEC. 203. Every school board required to adopt a desegregation plan pursuant to section 201 shall forthwith implement the same in accordance with its terms immediately upon its adoption and thereafter continue its implementation in good faith and with all deliberate speed until desegregation is fully achieved in all public schools within its jurisdiction.

SEC. 204. Whenever any school board subject to the requirements of this title loses or relinquishes any of its authority over public schools formerly within its jurisdiction or

its authority to assign students to schools within its jurisdiction, the duties prescribed in this Act shall immediately devolve upon the person or persons to whom such authority has been transferred or relinquished.

SEC. 205. Wherever, because of overlapping or complementary jurisdiction, more than one school board is subject to the requirements of this title with respect to the same schools or students, the boards concerned shall exercise their obligations hereunder jointly.

SEC. 206. The requirements of this title shall not apply to any public school which, on the date of enactment of this Act, is subject to a court order providing for or approving a desegregation plan for the said school.

## TITLE III—TECHNICAL ASSISTANCE BY SECRETARY OF HEALTH, EDUCATION, AND WELFARE TO FACILITATE DESEGREGATION

SEC. 301. The Secretary of Health, Education, and Welfare shall upon application render technical assistance to school boards by such means as he deems appropriate in the preparation, adoption, and implementation of desegration plans required by this title. Technical assistance may include, but shall not be limited to, such matters as the assembling, publishing, and distributing of information, including successful case histories of desegregation, the planning, calling, and holding of conferences, the appointment of ad-

visory councils and the assisting by such other means as the Secretary deems appropriate of progress toward desegregation in the public schools of the Nation.

## TITLE IV—FINANCIAL ASSISTANCE BY SECRETARY OF HEALTH, EDUCATION, AND WELFARE TO FACILITATE DESEGREGATION

SEC. 401. Every plan submitted to the Secretary of Health, Education, and Welfare pursuant to section 201 of this Act shall be reviewed by the Secretary to determine whether it conforms with the requirements of this Act. Whenever the Secretary determines that a desegregation plan submitted to him meets the requirements of this Act, he is authorized for the purpose of facilitating the carrying out of any such desegregation plan and upon receipt of application therefor to make grants to school boards, States, municipalities, school districts, and other governmental units to assist in meeting costs he determines to be reasonably necessary for the implementation of such desegregation plan. Grants may be made under this section for—

(1) the cost of employing additional schoolteachers;

(2) the cost of giving to teachers and other school personnel in-service training in dealing with problems incident to desegregation;

(3) the cost of employing specialists in problems

incident to desegregation and of providing other assistance to develop understanding by parents, schoolchildren, and the general public of desegregation in order to reduce the possibility of community hostility or resistance to such desegregation;

(4) the cost of replacement of funds to schools or schoolteachers withheld because such schools or schoolteachers have undertaken or may undertake desegregation;

(5) the cost of construction, enlargement, or alteration of school facilities when the Secretary finds that lack or inadequacy of existing facilities makes the carrying out of a desegregation plan impracticable or materially more difficult; and

(6) other costs directly related to the process of eliminating segregation in public schools.

SEC. 402. The Secretary of Health, Education, and Welfare is further authorized for the purpose of facilitating the carrying out of desegregation in accordance with any court-approved desegregation plan not subject to the requirements of title II of this Act, to make grants to school boards, States, municipalities, school districts, and other governmental units to assist in meeting costs he determines to be reasonably necessary for the implementation of such de-

segregation plan in the same manner and for the same purposes as provided for in the foregoing section of this title.

SEC. 403. Each application made for a grant under this title shall provide such detailed breakdown of the measures for which financial assistance is sought as the Secretary may by regulations prescribe. Each grant under this section shall be made in such amounts and on such terms and conditions as the Secretary shall prescribe, which may include a condition that the applicant expend certain of its own funds in specified amounts for the purpose for which the grant is made. In determining whether to make a grant, and in fixing the amount thereof and the terms and conditions on which it will be made, the Secretary shall take into consideration the amount available for grants under this section and the other applications which are pending before him; the financial condition of the applicant and the other resources available to it; the nature, extent, and gravity of its problems incident to desegregation; and such other factors as he finds relevant.

SEC. 404. Payments of grants under this title may be made in advance or by way of reimbursement, and at such intervals as the Secretary may determine.

SEC. 405. There are hereby authorized to be appropriated for the fiscal year in process at the date of enactment of this Act and for each succeeding fiscal year, such sums,

not exceeding $40,000,000 for any fiscal year, as may be necessary to carry out the provisions of this title.

## TITLE V—ENFORCEMENT OF DUTY TO ADOPT AND IMPLEMENT DESEGREGATION PLANS

SEC. 501. In the event that a school board, or its successor as provided in section 204, subject to the requirements of title II of this Act has violated any of the obligations prescribed therein, the Attorney General is authorized to institute for or in the name of the United States in the United States district court for the district wherein such school board or its successor is located or meets, a civil action or other proceeding for preventive relief, including an application for an injunction or other order, against such school board or its successor. The court wherein such action is instituted is authorized, upon finding that there has been a violation of title II of this Act, without limitation upon the grant of such other relief as may be appropriate under the circumstances, to require the school board or its successor (1) to adopt and implement a plan of school desegregation pursuant to the requirements of title II of this Act, (2) to implement any other school desegregation plan which the court may find appropriate and consistent with the requirements of this Act, or (3) to issue such other orders and grant such other relief as will most expeditiously achieve first-step compliance and desegregation with all deliberate speed in the public

schools under the jurisdiction of the school board or its successor.

SEC. 502. The district courts of the United States shall have jurisdiction over proceedings instituted under section 501 of this Act, and shall exercise the same without regard to whether any administrative or other remedies that may be provided by law shall have been exhausted, and in a manner calculated to achieve desegregation in accordance with the requirements of this Act.

## TITLE VI—MISCELLANEOUS PROVISIONS

SEC. 601. Nothing in this Act shall be construed to impair any right guaranteed by the Constitution or laws of the United States or any remedies already existing for their protection or enforcement, nor to prevent any individual or private organization from acting to enforce or safeguard any constitutional right in any manner now or hereafter permitted by law.

SEC. 602. If any provision of this Act or the application of such provision to any person or circumstance is held invalid, the remainder of this Act, or the application of such provision to persons or circumstances other than those to which it is held invalid, shall not be affected thereby.

87TH CONGRESS
2D SESSION

# H. R. 10783

IN THE HOUSE OF REPRESENTATIVES

MARCH 15, 1962

Mr. KOWALSKI introduced the following bill; which was referred to the Committee on Education and Labor

# A BILL

To provide for the desegregation of all public schools with all deliberate speed; requires every school board which has failed to achieve desegregation in its schools to adopt and file with the Secretary of Health, Education, and Welfare a desegregation plan providing for first-step compliance.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Federal Equality of Education Act of 1962."

## TITLE I—DESEGREGATION PLANS

SEC. 101. For purposes of this title and titles II, III, and IV of this Act—

(a) The term "desegregation" means the assignment of

all students to public schools irrespective of their race or color. No assignment system in which race or color is a factor in the initial assignment of students to particular public schools shall be deemed to have achieved desegregation even though placement or other tests or transfers or other options may be available to change such assignment.

(b) The term "public school" means any elementary or secondary educational institution operated by a State, subdivision of a State, or governmental agency within a State, or operated principally or substantially from or through the use of governmental funds, or funds derived from a governmental source.

(c) The term "school board" means any agency or agencies, the members, agents, and employees thereof, and any other person or persons, authorized to determine, control, or direct the institutions, structures, or places at which particular students are assigned to or attend public school.

(d) The term "first-step compliance" means the affording of desegregated education to a substantial number of students at each public school within the jurisdiction of a school board.

(e) The term "Secretary" means the Secretary of Health, Education, and Welfare.

SEC. 102. Every school board which, on the date of the enactment of this Act, has failed to achieve desegregation

of all public schools within its jurisdiction, shall adopt a desegregation plan as provided in section 103 and shall file such plan, within 180 days after the date of enactment of this Act, with the Secretary.

SEC. 103. Every desegregation plan required under section 102 shall—

(1) provide for achieving desegregation of all public schools within the jurisdiction of the school board with all deliberate speed, pursuant to a schedule setting forth the time when and the manner in which desegregation is to be achieved for each class, grade, school, and district within the jurisdiction of the school board involved; and

(2) provide for at least first-step compliance not later than the commencement of the first school year which begins after the submission of such plan.

SEC. 104. Every school board required to adopt a desegregation plan pursuant to section 102 shall forthwith implement the same in accordance with its terms immediately upon its adoption and thereafter continue its implementation in good faith and with all deliberate speed until desegregation is fully achieved in all public schools within its jurisdiction.

SEC. 105. Whenever any school board subject to the requirements of this title loses or relinquishes any of its au-

thority over public schools formerly within its jurisdiction or its authority to assign students to schools within its jurisdiction, the duties prescribed in this title shall immediately devolve upon the person or persons to whom such authority has been transferred or relinquished.

SEC. 106. Wherever, because of overlapping or complementary jurisdiction, more than one school board is subject to the requirements of this title with respect to the same schools or students, the boards concerned shall exercise their obligations hereunder jointly.

SEC. 107. The requirements of this title shall not apply with respect to any public school which, on the date of enactment of this Act, is subject to a court order providing for or approving a desegregation plan for such public school.

SEC. 108. (a) In the event that a school board, or its successor as provided in section 105, subject to the requirements of this title has violated any of the obligations prescribed herein, the Attorney General is authorized to institute for or in the name of the United States in the United States district court for the district wherein such school board or its successor is located or meets, a civil action or other proceeding for preventive relief including an application for an injunction or other order, against such school board or its successor. The court in which such action is instituted is authorized, upon finding that there has been a violation of

this title, without limitation upon the grant of such other relief as may be appropriate under the circumstances, to require the school board or its successor (1) to adopt and implement a plan of school desegregation pursuant to the requirements of this title, (2) to implement any other school desegregation plan which the court may find appropriate and consistent with the requirements of this title, or (3) to issue such other orders and grant such other relief as will most expeditiously achieve first-step compliance and desegregation with all deliberate speed in the public schools under the jurisdiction of the school board or its successor.

(b) The district courts of the United States shall have jurisdiction over proceedings instituted under subsection (a), and shall exercise the same without regard to whether any administrative or other remedies that may be provided by law shall have been exhausted, and in a manner calculated to achieve desegregation in accordance with the requirements of this title.

## TITLE II—GRANTS TO SCHOOL BOARDS AND LOCAL GOVERNMENTS TO FACILITATE DESEGREGATION

SEC. 201. Whenever the Secretary determines that a desegregation plan submitted to him by a school board pursuant to section 102 meets the requirements of title I he is

authorized, for the purpose of facilitating the carrying out of any such desegregation plan and upon receipt of application therefor, to make grants to such school board, or to the local government having authority to provide funds for such school board, to assist in meeting the costs he determines to be reasonably necessary for—

(1) employing specialists in problems incident to desegregation, and providing other assistance to develop understanding by parents, schoolchildren, and the general public of desegregation in order to reduce the possibility of community hostility or resistance to desegregation;

(2) providing in-service training to teachers, guidance counselors, and other school personnel for dealing with problems incident to desegregation; and

(3) establishing programs designed to identify and assist teachers who are handicapped in their professional endeavors as a result of inferior training or educational opportunity, and to identify and assist talented and able students who are handicapped in their scholastic efforts as a result of inferior educational opportunity.

SEC. 202. The Secretary is further authorized, for the purpose of facilitating the carrying out of desegregation in accordance with any desegregation plan provided or approved by a court, or of carrying out desegregation by any

other school board not subject to the requirements of title I, to make grants to school boards, and local governments, to assist in meeting costs he determines to be reasonably necessary for the purposes enumerated in section 201.

SEC. 203. Each application made for a grant under this title shall provide such detailed breakdown of the measures for which financial assistance is sought as the Secretary may by regulations prescribe. Each grant under this title shall be made in such amounts and on such terms and conditions as the Secretary shall prescribe, except that a grant may be made only on condition that the applicant will, during the period for which the grant is made, expend for the same purpose or purposes for which the grant is made an amount of its own funds equal to the amount of the grant.

In determining whether to make a grant and in fixing the amount thereof and the terms and conditions on which it will be made, the Secretary shall take into consideration the amount available for grants under this title and the other applications which are pending before him; the financial condition of the applicant and the other resources available to it; the nature, extent, and gravity of its problems incident to desegregation; and such other factors as he finds relevant.

SEC. 204. Payments of grants under this title may be made in advance or by way of reimbursement, and at such intervals as the Secretary may determine. No payment of a

grant shall be made to any school board, or to the local government having authority to provide funds for such school board, after the expiration of five years from the date on which a desegregation plan was submitted by such school board under section 102, or, in the case of a school board subject to a desegregation plan provided or approved by a court, after the expiration of five years from the date on which the court provided or approved such desegregation plan, or, in the case of any other school board not subject to the requirements of title I, after the expiration of five years from the date on which a program of desegregation was begun by such school board.

SEC. 205. There are authorized to be appropriated for the fiscal year in process on the date of the enactment of this Act and for each succeeding fiscal year, such sums, not exceeding $40,000,000 for any fiscal year, as may be necessary for making grants under the provisions of this title.

## TITLE III—TECHNICAL ASSISTANCE BY SECRETARY OF HEALTH, EDUCATION, AND WELFARE WITH RESPECT TO DESEGREGATION PROBLEMS

SEC. 301. The Secretary is authorized, upon receipt of application therefor, to give technical assistance to school boards eligible for assistance under title II, and to local nonprofit organizations in the communities served by such school

boards, in training school personnel and community leaders in techniques useful in solving desegregation problems, including training and other assistance in establishing home study programs for academically and culturally handicapped students. Such technical assistance may be given to any such school board, or local nonprofit organization, whether or not such school board or the local government having authority to provide funds for such school board has applied for or received a grant under title II.

SEC. 302. Technical assistance authorized by section 301 may be given by the Secretary by such means as he deems appropriate to carry out the purposes of such section. No technical assistance shall be given to any school board, or to any local nonprofit organization in the community served by such school board, after the expiration of five years from the date on which a desegregation plan was submitted by such school board under section 102, or, in the case of a school board subject to a desegregation plan provided or approved by a court, after the expiration of five years from the date on which the court provided or approved such desegregation plan, or, in the case of any other school board not subject to the requirements of title I, after the expiration of five years from the date on which a program of desegregation was begun by such school board.

## TITLE IV—LOANS TO SCHOOL BOARDS AND LOCAL GOVERNMENTS

SEC. 401. The Secretary is authorized, upon receipt of application therefor, to make loans—

(1) to any school board, if he finds that—

(A) part or all of the funds which would otherwise be available to such school board have been withheld or withdrawn by action of the State or local government because of the desegregation, in whole or in part, of one or more schools under the jurisdiction of such school board; and

(B) such school board has authority to receive and expend the proceeds of such loan; or

(2) to any local government within the jurisdiction of which any school board operates, if he finds that—

(A) part or all of the funds of such local government which would otherwise be available to such school board have been withheld or withdrawn by action of the State because of the desegregation, in whole or in part, of one or more schools under the jurisdiction of such school board; and

(B) such local government has authority to receive such loan and to make the proceeds thereof available for the use of such school board.

SEC. 402. (a) Loans may be made by the Secretary under section 401 to any school board or local government only if he is satisfied that the proceeds of such loans will be used for the same purposes for which the funds withheld or withdrawn would otherwise be used, and that such purposes are necessary for the operation and maintenance of the school system under the jurisdiction of such school board.

(b) Loans may be made by the Secretary under section 401 to any school board or local government only if he is satisfied that funds cannot be borrowed by such school board or local government, as the case may be, from private financial institutions.

SEC. 403. Any loan under section 401 shall be made upon such terms and conditions, not inconsistent with the provisions of this title, as the Secretary deems appropriate. Any such loan shall be repaid within such time as the Secretary prescribes after the funds withheld or withdrawn are restored to the school board or local government concerned, or after funds are available to such school board or local government by borrowing from private financial institutions.

SEC. 404. There are authorized to be appropriated for each fiscal year such sums as may be necessary for making loans under the provisions of this title.

## TITLE V—ASSISTANCE BY COMMISSION ON CIVIL RIGHTS TO FACILITATE DESEGREGATION

SEC. 501. Part I of the Civil Rights Act of 1957 is amended by inserting after section 104 the following new section:

"ADDITIONAL DUTIES OF THE COMMISSION

"SEC. 104A. In addition to the duties imposed by section 104 (a), the Commission is authorized—

"(1) to collect and disseminate information concerning programs and procedures used by school districts in the various States to achieve an organization and operation of their schools in accordance with constitutional requirements, including data as to the known effects of such programs and procedures on the quality of education and to the costs of such programs and procedures; and

"(2) to establish an advisory and conciliation service to assist local school officials in developing desegregation plans designed to meet constitutional requirements and local conditions, and to attempt to mediate and conciliate disputes between school officials and school patrons, upon the request of either, relating to desegregation of schools, including proposed plans for desegregation and the implementation of desegregation plans already in operation."

## TITLE VI—RESTRICTIONS ON FEDERAL FINANCIAL AID FOR SEGREGATED PUBLIC SCHOOLS, COLLEGES, AND UNIVERSITIES

SEC. 601. (a) In the case of any program providing Federal grants-in-aid to the States for elementary or secondary education in public schools, the amount of such grant-in-aid for any fiscal year to any State shall be reduced in accordance with the provisions of this section if the head of the Federal department or agency administering such programs determines, at the time of determining the amount of such grant-in-aid for such year, that the public elementary or secondary schools of any local educational agency in such State are operated in such a manner as to segregate pupils of any race or color. If the head of such department or agency determines at such time that all local educational agencies in such State practice such segregation in the operation of such schools, then such grant-in-aid shall only be 50 per centum of the amount it would have been but for the provisions of this section. If the head of such department or agency determines at such time that one or more local educational agencies in such State have initiated a program of desegregation, or do not practice segregation, in the operation of such schools, then such grant-in-aid shall be 50 per centum of the amount it would have been but for the provisions of this section, plus such proportion of the remaining 50

per centum as the number of pupils enrolled in the public elementary and secondary schools of all the local educational agencies which have initiated a program of desegregation or do not practice desegregation, bears to the number of pupils enrolled in all the public elementary and secondary schools in such State.

(b) For the purposes of this section—

(1) the term "local educational agency" means a board of education or other legally constituted local school authority having administrative control and direction of public elementary or secondary schools in a city, county, township, school district, or political subdivision in a State; and

(2) enrollments shall be determined on the basis of the latest reliable figures available to the department or agency head concerned.

(c) Nothing in this section shall be construed to authorize any department, agency, officer, or employee of the United States to exercise any direction, supervision, or control over the curriculum, program of instruction, administration, or personnel of any educational institution or school system.

SEC. 602. (a) No Federal department or agency shall make any grant or loan to any publicly controlled college or university unless satisfactory proof is submitted to the head

of such department or agency that such college or university does not discriminate on the basis of race, color, religion, or national origin in accepting students for enrollment.

(b) Nothing in this section shall be construed to authorize any department, agency, officer, or employee of the United States to exercise any direction, supervision, or control over the curriculum, program of instruction, administration, or personnel of any educational institution or school system.

## TITLE VII—PROTECTION OF INDIVIDUALS FROM BODILY HARM

SEC. 701. The Attorney General is authorized to take such action as may be necessary to protect—

(1) the members of any school board having under its jurisdiction one or more public schools which are desegregated or in which desegregation has been commenced;

(2) the officials, teachers, and other employees of any public school which is desegregated or in which desegregation has been commenced, or of any public school system of which any such public school is a part;

(3) children attending any such public school and the parents of such children; and

(4) any other individual assisting any such member, any such official, teacher, or other employee, or

any such child or parent, from physical injury and from harassment, intimidation, or reprisal by any person or group of persons.

TITLE VIII—ANNUAL SCHOOL SURVEYS

SEC. 801. The Secretary of Health, Education, and Welfare shall conduct an annual survey to determine the number and ethnic classification of students enrolled in all public educational institutions in the United States. The Secretary shall prepare and publish each year data obtained from each annual survey setting forth the number and ethnic classification of students enrolled—

(1) in all public educational institutions in each State,

(2) in each elementary and secondary public educational institution in each school district, and the totals for each school district, and

(3) in each public institution of higher education in each State.

TITLE IX—MISCELLANEOUS PROVISIONS

SEC. 901. Nothing in this Act shall be construed to impair any remedies already existing for the protection or enforcement of rights guaranteed by the Constitution or laws of the United States, nor to prevent any individual or private organization from acting to enforce or safeguard any con-

stitutional right in any manner now or hereafter permitted by law.

SEC. 902. If any provision of this Act or the application of such provision to any person or circumstance is held invalid, the remainder of this Act or the application of such provision to persons or circumstances other than those to which it is held invalid, shall not be affected thereby.

SEC. 903. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

Memorandum

To: Norman Hill

From: James Farmer

The A. D. A. people in Washington urgently suggest that we should have someone testify on the hearing on this bill (HR 10783) which is up dating of the Clark-Celler bill.

The hearing is at 10 a.m., June 15th, Room 429 Old House offices building, Washington 25, D. C. If we are going to testify we have to notify them in advance so that it can be placed on the docket and also we have to prepare our statement. It seems to me a good idea that we testify.

I would suggest that either you or Haley do it. Give me your reaction.

Bill H. R. 7111

---

June 15, 1962

Gentlemen: I am Mrs. Ethel James Williams representing the National Council of Negro Women. The National Council of Negro Women is a coordinating, planning body, founded and organized in 1935 by Dr. Mary McLeod Bethune, together with a group of outstanding women leaders. Its purpose is to meet the need for united planning and concerted action for the economic, social, educational and cultural welfare of Negro women in the United States. It has brought together national organizations of Negro women to achieve the numerical strength and stature necessary for effective representation. To further implement the broad program of the National Council of Negro Women, councils were organized in local communities. In 1962, there are twenty three national member organizations and ninety six local councils capable of reaching some 850,000 women. It is affiliated with the National Council of Women of the United States, Inc. and with the International Council of Women.

Mr. Chairman, our democratic form of government depends on an educated citizenry. It demands that every individual have an equal opportunity to realize his full potential through education. President Kennedy made this point clear in a message to Congress last year when he said, "Our progress as a Nation can be no swifter than our progress in education." At the same time, there are citizens in this great Nation of ours who suffer inferior schooling for no reason apart from race. This discrimination not only causes personal humiliation and suffering, it restricts the economic and social development of our country.

In addition, the continuing challenge to our democratic government by totalitarian regimes has made it increasingly clear that an educated citizenry, long recognized as essential to government by the people, has become in the context of the cold war, the bulwark of freedom itself. The opportunity, therefore, of each citizen to receive the education necessary to develop his full potential has become an even more vital concern.

Thanks to the unanimous Supreme Court decision in 1954, increased desegregation of our public schools is taking place today. The walls of discrimination are crumbling for there is a growing realization that discrimination is wasteful; that it is contrary to our basic sense of justice and to our respect for fundamental human rights.

The problem of discrimination in education, however, is far from being solved. The goal of equal educational opportunity is still far distant for there is still heavy resistance in sections of our country to compliance with the Supreme Court's historic decision.

The progress which has been made in eliminating segregation in public elementary and secondary schools throughout this nation has been very slow. Since the 1954 school desegregation decision, 2,062 school districts in the South that enroll both white and Negro pupils had not even started to comply with the requirements of the Constitution. These included all the districts in Alabama, Georgia, Mississippi, and South Carolina. All but one in Florida and one in Louisiana have done likewise. According to the Civil Rights Commission report, some of the 75 that have initiated desegregation have barely started a twelve-year progression. During the period 1959 to 1961 only 44 school districts in the 17 southern and border States had initiated desegregation programs. Of those, 13 had acted under court order and 15 others were being pressed for action by pending litigation.

Here, I should state, however, that the problem is not that of southern and border States only. I must frankly concede that in the Northern states, we have our problems also. I merely point out to the New Rochelle case in the State of New York. It is also commonly recognized that this problem exists in the West and the Southwest. Thus, the problem is

truly national in scope, although it is most severe in the South. Nevertheless, when the Court spoke it spoke to all sections of our nation, just as the proposal before you speaks to all of the nation.

I am sure that you, as members of this Committee, are as well acquainted with the problems which have been imposed upon those local agencies who sought to comply with the desegregation decision. The legislative resistance to compliance with that decision has taken many and varied forms. We are all familiar with the so-called interposition doctrine, the massive resistance plan, pupil placement law, tuition grants, and the closing down of schools which attempted to desegregate.

Shortly after the 1954 decision, even though the Court had ordered desegregation to take place with all deliberate speed, many sincere people pleaded for time in order to accomplish this changeover. The advocates of gradualism argued sincerely that the impact and ramifications on the mold of life and the local mores of some communities could be devastating. Many supporters of the Supreme Court decision understandably accepted this plea. However, based on the facts as we find them today after nearly eight years of gradualism, I am convinced that the need for Federal intervention to carry out the mandate of the Court must be accomplished by legislation. There is an urgent need for positive action now. We have depleted all the resources short of this remedy, including persuasion and understanding.

I do not expect enactment of a proposal such as I support here today to be a cure-all panacea in this field; I recognize that no one pattern of desegregation is adaptable to all communities. Any

plan which is adopted must include careful planning and community education in order to be a success. This calls for technical knowledge and expertness. Such personnel means additional costs and it is for these purposes that my proposal provides for technical and financial assistance to those state and local agencies in their attempt to comply with the desegregation decree of the Supreme Court.

I should like specifically to speak for H. R. 7111, a bill to provide for the desegregation of public schools, with all deliberate speed, including nationwide first-step compliance by 1963, and for other purposes.

I shall not undertake a title-by-title analysis of these proposals for I am aware of the fact that the committee has been advised as to title contents by some of the other witnesses and the author of the bill, Congressman Zelenko.

I would like to comment, however, on several significant features of the proposals. First of all, I am impressed with the language of the bill which places upon individual school boards the duty to adopt and implement desegregation plans. As an initial provision, this is important for we are ever mindful that each of our several States has its own system of public education. The efforts of the State citizens and State educators are commendable and gloriously reflected in the history of education in America. Even in the consideration of a problem area, such as compliance with the Court decision, I am pleased to note the cognizance of the author of the various proposals of the fact that local school boards are to be encouraged to develop desegregation plans.

A second major point of emphasis I wish to endorse is the provision for Federal financial and technical assistance to help facilitate desegregation, including such factors as (1) the cost of employing additional schoolteachers; (2) the cost of giving to teachers and other school personnel inservice training in dealing with problems incident to desegregation; and (3) the cost of employing specialists in problems incident to desegregation and of providing other assistance to develop understanding by parents, school children, and the general public.

It has often been said that this is an age of specialization. The field of human relations or race relations or intergroup relations have developed and expanded because of the particular need today for greater understanding among men and groups. I am sure that you will agree with me that not only the conditions of the race relations in America -- of which desegregation is only one facet -- but also the awakening of peoples of the world make it mandatory that we act on behalf of the accomplishment of the greater aims of our society.

Today, the United States has had placed on its shoulders the responsibility of world leadership. In the past few years many new nations have come into being, nations peopled by individuals of color. Through our foreign aid programs we preach the dignity of man and you may be sure that our message is evaluated in the light of the manner in which we Americans treat our own minorities who happen to be non-white in color. Often, Americans abroad are asked, "Do you really practice what you preach?" Certainly, there can be nothing more basic to equality of treatment than the education of children.

Therefore, I urge the passage of H. R. 7111 with all deliberate speed.

# BEFORE THE U.S. SUPREME COURT:
## Prayers and Bible Reading in the Public Schools

**A Fact Sheet**

Presently before the U.S. Supreme Court are two cases involving religious practices in the nation's schools. It is expected that before adjournment (June), the Court will rule on the constitutionality of recitations of the Lord's Prayer and reading of the Bible as religious exercises in public schools.

It is inevitable that the issues posed in these cases will attract nationwide attention. The recent Court decision declaring unconstitutional the New York State Regents' Prayer (June 1962) was the topic of headline treatment for weeks after it was handed down. Unfortunately, in many instances the reactions reflected a lack of information and historical perspective. Insufficient knowledge of the core of the case—the religion clauses of the First Amendment to the U.S. Constitution, with their twin guarantees of religious liberty and separation of church and state—led to widespread misunderstanding of the decision, its intent and import.

Since the Court's current deliberations are addressed to the same general issue, opinion leaders in the mass media and elsewhere can render a significant public service by presenting the facts which well-informed citizens need to bear in mind. The purpose of this digest is briefly to present such background material.

Much of the debate on the Regents' Prayer decision and the two pending cases has been predicated on two assumptions that bear scrutiny: (1) that challenges to prayer and Bible reading in the public schools are unprecedented in American history; and (2) that these exercises are customary in the vast majority of public schools.

The following review of the facts shows: (1) that the question of prayers and Bible reading is not new; and (2) that daily prayer recitations and Bible reading are widespread in particular regions, but not throughout the nation as a whole.

### 1. A Long-Standing Question

The general question—does religion belong in public schools?—has been raised and resolved in various ways throughout the nation since the mid-19th century, when the public schools were in their infancy.

—Bible reading was challenged as early as 1854 when Catholic parents objected to use of the King James (Protestant) rather than the Douay (Catholic) Bible in the public schools of Maine.
—Between 1872 and 1905, Catholic parents in seven other states instituted actions on similar grounds.
—In later years, Jewish parents joined with Catholics in questioning use of the King James Bible in the public schools.

Until the current cases, the U.S. Supreme Court had never reviewed the question. Numerous and often contradictory rulings by state courts constituted the highest official word on Bible reading in the public schools until 1959, when a Federal Court in Pennsylvania deemed the practice unconstitutional.

Here are two state decisions, diametrically opposed:

> **The law knows no distinction between the Christian and the Pagan, the Protestant and the Catholic. All are citizens. . . . The school, like the Government, is secular and not religious in its purposes. The truths of the Bible are the truths of religion, which do not come within the province of the public schools.**
>
> **—*People ex rel. Ring* v. *Board of Education*, Illinois, 1910**

> **It would require a strained and unreasonable construction to find anything in the ordinance which interfered with the natural and unalienable right to worship God according to the dictates of one's own conscience. The mere listening to the reading of an extract from the Bible and a brief prayer at the opening of school exercises would seem far remote from such interference.**
>
> **—*Wilkerson* v. *City of Rome*, Georgia, 1921**

These contradictory decisions reflect the divergence in opinion which has long existed.

**2. State Laws and School Practices Differ from Region to Region**

Some 26 states, principally in the East and South, *require* or *permit* Bible reading, and often the Lord's Prayer, by law or regulation.[1] Ten states, most of them in the West, *forbid* such activities in the public schools.[2]

A recent survey polled school superintendents in a sample of some 4,000 communities on the extent of religious influence in their schools.[3] As the following replies indicate, religious exercises are conducted rarely in public schools in the West, while most schools in the South and East open with either a prayer or the reading of a Biblical passage.

***Question:*** **Are homeroom devotional services[4] held in the schools of your system?**

***United States as a Whole***

**Yes: 50.24%  No: 49.76%**

***By Sections of the Country***

| | West | Midwest | South | East |
|---|---|---|---|---|
| Yes: | 8.62% | 25.95% | 88.69% | 80.16% |
| No: | 91.38% | 74.05% | 11.32% | 19.83% |

***Question:*** **Is Bible reading conducted in the schools of your system?**

***United States as a Whole***

**Yes: 41.74%  No: 58.26%**

***By Sections of the Country***

| | West | Midwest | South | East |
|---|---|---|---|---|
| Yes: | 11.03% | 18.26% | 76.84% | 67.56% |
| No: | 88.97% | 81.74% | 23.16% | 32.44% |

Thus the present-day framework against which the Supreme Court cases must be viewed is far from clear-cut. It is marked by sharply divergent public-school policies and practices throughout the country.

## THE CASES BEFORE THE COURT

The Supreme Court is considering two similar cases. Both question the constitutionality of Bible reading and recitation of the Lord's Prayer as part of opening exercises in the public schools. In neither case is Bible reading limited to passages of the Old Testament. The lower courts have arrived at conflicting decisions. In Maryland (*Murray* v. *Curlett*), the state Court of Appeals upheld the propriety of these practices. In Pennsylvania (*Abington Township* v. *Schempp*), a Federal Court found Bible reading, with or without recitation of the Lord's Prayer, unconstitutional under the First Amendment.

**1. Murray v. Curlett**

William J. Murray III, a student attending Woodbourne Junior High School in Baltimore, and his mother, who describe themselves as atheists, are challenging the constitutionality of a regulation of the Board of School Commissioners of Baltimore, adopted in 1905:

---

[1] *Required* in the District of Columbia and the following 11 states: Alabama, Arkansas, Delaware, Florida, Georgia, Idaho, Maine, Massachusetts, New Jersey, Pennsylvania and Tennessee.

*Permitted* in 15 states: Colorado, Hawaii, Indiana, Iowa, Kansas, Kentucky, Maryland, Minnesota, Mississippi, New Hampshire, New York, North Dakota, Ohio, Oklahoma and Texas.

[2] Alaska, Arizona, California, Illinois, Louisiana, Nebraska, Utah, Washington, Wisconsin and Wyoming.

[3] Richard B. Dierenfield, associate professor of education, Macalester College, St. Paul, Minnesota, *Religion in American Public Schools*, Public Affairs Press, Washington, D.C., 1962.

[4] "Homeroom devotional services" most often include prayers and Bible reading, sometimes accompanied by short devotional talks and the singing of religious hymns.

> **Opening Exercises. Each school, either collectively or in classes, shall be opened by the reading, without comment, of a chapter in the Holy Bible and/or the use of the Lord's Prayer. The Douay version may be used by those pupils who prefer it. . . .**

After the Murrays questioned these practices, the Board amended its regulation by adding the following proviso:

> **Any child shall be excused from participating in the opening exercises or from attending the opening exercises upon written request of his parent or guardian.**

The Murrays contend that the regulation, even as amended, violates their freedom of religion and the principle of separation of church and state. They lost their case in the lower courts. The Court of Appeals of Maryland concurred, in a 4-3 decision, judging that the daily opening exercises of the Baltimore City public schools violated no constitutional rights. The plaintiffs' appeal is now before the U.S. Supreme Court.

**2. Abington Township v. Schempp**

Mr. and Mrs. Edward Lewis Schempp, who are Unitarians and parents of three children attending the public schools in Abington Township, Pennsylvania, have asserted that the Federal Constitution is violated by a Pennsylvania law which requires:

> **At least ten verses from the Holy Bible shall be read, or caused to be read, without comment, at the opening of each public school on each school day, by the teacher in charge. If any school teacher, whose duty it shall be to read the Holy Bible, or cause it to be read, shall fail or omit to do so, said school teacher shall, upon charges preferred for such failure of omission, and proof of the same, before the board of school directors of the school district, be discharged.**

A three-judge Federal Court unanimously found the Pennsylvania statute unconstitutional under the First Amendment. The judges rejected the contention that the Bible was being used principally as a work of art or for its literary or historical significance. The Holy Bible, they said, regardless of the version being read, is "a religious document devoted primarily to bringing man in touch with God."

> **The daily reading of the Bible, buttressed with the authority of the State and, more importantly to children, with the authority of their teachers, can hardly do less than inculcate or promote the inculcation of various religious doctrines in childish minds. Thus, the practice required by the statute amounts to religious instruction or a promotion of religious education. It makes no difference that the religious "truths" inculcated may vary from one child to another. It also makes no difference that a sense of religion may not be instilled.**

The state legislature then amended the law as follows:

> **At least ten verses from the Holy Bible shall be read, without comment, at the opening of each public school on each school day. Any child shall be excused from such Bible reading, or attending such Bible reading, upon the written request of his parent or guardian.**

After a new hearing, the three-judge court again unanimously declared the law unconstitutional. The school board's appeal is currently before the U.S. Supreme Court.

**The Single Question to Be Decided**

These cases do not question the propriety or constitutionality of using the Bible as a source or reference work in the teaching of such subjects as literature, history, art appreciation or social studies which may be part of the regular school curriculum.

The basic question presented is this: Are readings from the Holy Bible and recitation of the Lord's Prayer, conducted by school authorities as part of the opening daily exercises in the public schools, essentially religious services, thus constituting an "establishment of religion" in violation of the U.S. Constitution?

This issue cannot be discussed knowledgeably without going back to its deep-rooted sources in American history.

## THE ROOTS OF RELIGIOUS LIBERTY

The guarantees of full religious liberty governing our country today developed slowly and painfully.

### 1. From Persecution to Toleration

Many of our early colonists came to America in search of freedom from England's governmentally ordained and supported church. But during the century and a half before the American Revolution, most of the Colonies adopted the familiar Old World concept of an established church supported by public funds and legal enforcement of orthodoxy.

—In early Virginia and New England, punishments for heresy were severe. Absence from church services was considered a serious civil offense. Only gradually did the practice of inflicting harsh penalties on dissenters fall into disrepute.

—As late as 1776, at least eight of the 13 colonies had a government-established church—either Anglican or Congregational.

—Although a few early crusaders for freedom of conscience, notably Roger Williams and William Penn, welcomed dissenters and separated church and state in their Colonies, it was not until after the Revolution that the movement toward religious freedom for all, including minority religious groups and non-believers, made significant headway.

### 2. Church-State Separation Enters the Constitution

Even before the drafting of the Bill of Rights, there was mounting conviction among the Founding Fathers that a union of church and state endangered not only individual freedom, but the institutions of religion and government as well. European experience had proved to the leaders of the American Revolution that in every marriage of religion and government, one partner dominated to the detriment of the other. Where the state was all-powerful, the churches became the agent of government, and religious dissent became synonymous with disloyalty. Where the church dominated, civil authority was used to enforce particular beliefs, and political criticism became synonymous with heresy.

Leaders in the drive to write the separation principle into law were James Madison and Thomas Jefferson:

> **We maintain, therefore, that in matters of religion no man's right is abridged by the institution of civil society; and that religion is wholly exempt from its cognizance.**
> **—James Madison, *A Memorial and Remonstrance on the Religious Rights of Man*, 1778.**

The first major step in the development of church-state separation was the Virginia Statute of Religious Liberty, drafted by Jefferson and enacted in 1786:

> **. . . no man shall be compelled to frequent or support any religious worship, place or ministry whatever, nor shall . . . suffer on account of his religious opinions or beliefs, but that all men shall be free to profess, and by argument to maintain, their opinions in matters of religion, and that the same shall in no wise diminish, enlarge or affect their civil capacities.**

Finally came the First Amendment to the U.S. Constitution, written by Madison and adopted as part of the Bill of Rights (1791):

> **Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof . . .**

These few words are known as the religion clauses of the First Amendment. The first ten words—called the establishment clause — build, in the words of Jefferson, "a wall of separation between church and state."[5] The last six words — called the free exercise clause—assure the right to hold religious beliefs, to worship at will, and to educate one's own children in the faith of one's choice.

It is the first clause—"Congress shall make no law respecting an establishment of religion"—that is being interpreted by the U.S. Supreme Court in the two current cases.

---

[5]Letter to the Danbury Baptists, 1802.

## THE SUPREME COURT DEFINES "SEPARATION"

For a century and a half, the Supreme Court was rarely called upon to interpret the religion clauses of the First Amendment. It was not until 1940 that the Court had occasion to hold those clauses binding on the states as well as the Federal Government under the 14th Amendment.

Since 1947, there has been a steady flow of cases. Within 15 years, the Supreme Court spoke out on the establishment clause six times. Two decisions were outside the field of education.[6] Four dealt with the separation principle as it applies to religion and education:

### 1. The Court Defines Establishment (Everson v. Board of Education)

In 1947, in a 5-4 decision, the Court held that New Jersey could provide free bus transportation to children attending private — including church-related — schools. Free bus rides to parochial schools were viewed as a service to the child, not to the religious institution, and hence were judged not in violation of the separation principle. In interpreting that principle, the Court, speaking through Justice Hugo Black, laid down the following list of specific prohibitions:

> **Neither a state nor the Federal Government can set up a church. Neither can pass laws which aid one religion, aid all religions, or prefer one religion over another. Neither can force nor influence a person to go to church or to remain away from church against his will or force him to profess a belief or disbelief in any religion. No person can be punished for entertaining or professing religious beliefs or disbeliefs, for church attendance or non-attendance. No tax in any amount, large or small, can be levied to support any religious activities or institutions, whatever they may be called, or whatever form they may adopt to teach or practice religion. Neither a state nor the Federal Government can, openly or secretly, participate in the affairs of any religious organizations or groups or vice versa. In the words of Jefferson, the clause was intended to erect "a wall of separation between church and state."**

### 2. The Court Reiterates the Definition (McCollum v. Board of Education)

In 1948, the *Everson* definition of the establishment clause was the Court's frame of reference for declaring unconstitutional the released-time program of religious education held on public-school premises in Champaign, Illinois.

### 3. The Court Carves an Exception (Zorach v. Clauson)

In 1952, in a 6-3 decision, the Court upheld the constitutionality of New York's released-time program, which involved religious education off public-school premises. This decision caused some confusion and encouraged some religious leaders to reassert that the First Amendment does not bar non-preferential aid to religion.

The majority opinion, written by Justice William O. Douglas, did say, "We follow the *McCollum* case." But it also said, "We are a religious people whose institutions presuppose a Supreme Being." As a caution, the ruling stressed that public authorities may not "undertake religious instruction nor blend secular and sectarian instruction."

### 4. The Court Clarifies (Engel v. Vitale)

In 1962, in a 6-1 decision, the Court reaffirmed once again the far-reaching 1947 interpretation of the separation principle, holding that the required recital of an official prayer[7] in New York public schools was unconstitutional. Justice Black, again speaking for the majority, declared:

> **[The establishment clause] stands as an expression of principle on the part of the Founders of our Constitution that religion is**

---

[6] It is unconstitutional to require belief in God as a condition to holding public office (*Torcaso* v. *Watkins*, 1961). Sunday closing laws do not constitute an establishment of religion (*McGowan* v. *Maryland*, 1961).

[7] "Almighty God, we acknowledge our dependence on Thee, and we beg Thy blessing upon us, our parents, our teachers and our country."

**too personal, too sacred, too holy, to permit its "unhallowed perversion" by a civil magistrate.**

**. . . each separate government in this country should stay out of the business of writing or sanctioning official prayers and leave that purely religious function to the people themselves and to those the people choose to look to for religious guidance.**

**Significance of the Regents' Prayer Decision**

Public opinion is divided as to precisely what prayers and religious references are banned—or permitted—by the Court's ruling in *Engel* v. *Vitale.* Disagreement ranges from one extreme to another.

*The Narrow Interpretation:* That the 1962 decision rules out of the public schools *only* state-composed prayers.

This view overlooks the broad compass of Justice Black's majority opinion. Seemingly the Court had more in mind than prayers written by state officials, since it cautioned expressly against *any* prescribed prayers:

**The first amendment was added to the Constitution to stand as a guarantee that neither the power nor the prestige of the Federal Government would be used to control, support or influence the kinds of prayer the American people can say . . .**

**. . . government in this country, be it state or federal, is without power to prescribe by law the particular form of prayer which is to be used as an official prayer in carrying out any program of governmentally sponsored religious activity.**

*The Broad Interpretation:* That the decision is a sweeping ban against all references to a Supreme Being in public life.

This does not take into consideration a footnote clearly to the contrary in Justice Black's ruling:

**There is of course nothing in the decision reached here that is inconsistent with the fact that school children and others are officially encouraged to express love for our country by reciting historical documents such as the Declaration of Independence which contain references to the Deity or by singing officially espoused anthems which include the composer's professions of faith in a Supreme Being, or with the fact that there are many manifestations in our public life of belief in God. Such patriotic or ceremonial occasions bear no true resemblance to the unquestioned religious exercise that the State of New York has sponsored in this instance.**

*A careful reading of the decision suggests:* The Court's actual intent lies somewhere between these two extremes. The Regents' Prayer decision does more than merely forbid state-composed prayers in the schools—and does less than rule out all references to God from public life.

## ARGUMENTS PRO AND CON

Those in favor of the Lord's Prayer and Bible reading as part of public-school exercises generally argue that these practices (1) enrich young people spiritually and strengthen their moral values; and (2) do not violate the establishment clause, being neither sectarian nor compulsory.

Those in opposition reason that these exercises (1) breach the wall of separation between church and state by officially imposing a sectarian "religion" on public-school children; and (2) violate sound educational and religious principles, with both public education and religion suffering as a result.

The following rundown presents the principal arguments on each side.

**For Prayers and Bible Reading in the Public Schools**

– The Founding Fathers did not intend to exclude all religious content from civic life. To ban recitation of the Lord's Prayer and reading of the Bible is to deny children the right to share in their country's spiritual heritage.

– A brief prayer or reading from the Bible at the start of the school day gives an uplifting tone to all school activities and strengthens traditional moral and religious values.

– Bible reading familiarizes children with lessons which the Bible alone is capable of imparting with authority.

- It is not enough to study the Bible as part of the world's great literature. It should be used for continued spiritual inspiration as the mainspring of faith, the base upon which our great Western religions were founded.
- Even if some youngsters do not understand the selected excerpts, they serve as a minimal symbolic recognition of the place of religion in our culture.
- The Lord's Prayer expresses a devotion shared by all who believe in one God.
- Since the Bible is read without comment, and pupils are given a choice of the King James or Douay version, the simple reading of a passage is not a sectarian exercise.
- Since students may be excused for reasons of conscience, religious freedom is preserved.
- Prayers and Bible reading reflect the religious commitment of the majority of Americans. Religious freedom is infringed when a minority persuades the Court to rule religion out of the public schools.
- Government is not required to be hostile to religion, but to be neutral among the various beliefs that Americans profess.

**Against Prayers and Bible Reading in the Public Schools**

- Any prayer is an act of devotion, a basic avowal of faith. The Bible is recognized as the Word of God by those who sponsor its use in the schools. The requirement that a passage be read "without comment" is acknowledgment of the religious nature of the work. Thus the opening exercises are clearly religious.
- Devotional exercises in the public schools blend the secular and religious, constituting an aid to religion banned by the establishment clause.
- When state agencies place their stamp of approval on particular religious exercises, these exercises are given special status.
- Majority rule cannot impose a state-sanctioned religion in public education; under the establishment clause, no orthodoxy may ever gain preference over unorthodoxy.
- The Lord's Prayer, so named because it was set forth by Jesus as a prayer for his followers, is a sectarian, Christian prayer.
- The necessary choice of which Bible to use as the school text reopens a historic conflict: Catholics have objected to the King James version; Jews have objected to passages of the New Testament; nonbelievers have objected to any version of the Bible being presented as the Word of God.
- The Bible should have a place in the school curriculum. Just as young people become acquainted with sacred music or religious art, so they should study the Bible in the context of literature and history. This is, however, quite different from using the Bible for religious stimulation.
- It is pedagogically unsound to read passages from the Scriptures which are not understood by many children, since explanatory comment is forbidden.
- When, for reasons of conscience, a school child is excused from participating in the prayer or reading, the situation is psychologically damaging. If he absents himself, he is branded as "different"; thus the public school, ideally a unifying force, is cast into a divisive role. If he remains despite his personal convictions, the school is then guilty of encouraging hypocrisy.
- A desire to keep religious practices out of the schools should not be equated with hostility to religion. The aim of separating the two institutions is to strengthen and enrich both.
- Laws and school directives that make prayer recitation and Bible reading part of classroom routine do not foster sincere devotion. By requiring participation in "public-school" or "least-common-denominator" religious exercises, the schools encourage surface piety rather than true religious commitment and inner response. Religion flourishes best when nurtured by the church and the home, free of official coercion.

Whatever the outcome of the Court's deliberations may be in the present cases, the forthcoming ruling will mark yet another effort to clarify American church-state relationships—for the greater benefit of religion and democracy.

The goal, for the Court as for all Americans, was summarized in 1960 by President John F. Kennedy:

> **I believe in an America that is officially neither Catholic, Protestant nor Jewish . . . where no religious body seeks to impose its will directly or indirectly upon the general populace or the public acts of its officials . . . where religious intolerance will someday end—where all men and all churches are treated as equal—where every man has the right to attend or not to attend the church of his choice.**

The problem of religion in education is a vital national concern. Like many other problems, it can be best met by a thoughtful citizenry armed with facts and an understanding of the basic issues at stake.

The American Jewish Committee, founded in 1906, is a pioneer human-relations organization dedicated to combating bigotry, safeguarding the civil and religious rights of Jews here and abroad, and advancing those rights for all people of all religions and ancestries.

CALVIN BANKS, NAACP

# ORGANIZATION OF FREEDOM SCHOOLS

I Elementary Schools

A. Transportation: Students should be transported to their Freedom Schools by busses that pick them up in front of their boycotted schools. Busses should be decorated with "Freedom School" banners.

B. Curriculum for the day

1. Begin with Assembly session: (9-10 A.M.)

   a. Divide children into grades
   b. Presentation by a speaker from the movement
   c. Division of grades into classes of 15 who are then assigned to classrooms.

2. Morning classes (10-12 A.M.)

   a. Discussion of Assembly speaker's presentation (10-11 A.M.)
   b. Reading or English lesson: (11-12 Noon)

      1) Grades 1-3 use integrated readers from Detroit
      2) Grades 4-6 read mimeographed poetry of Langston Hughes

3. Lunchbreak in Auditorium (12-1 P.M.)

   Simple sandwiches, milk, fruit.

4. Afternoon classes (1-2 P.M.)

   a. Grades 1-3 return to readers or react to them (by drawing, discussion, etc.)
   b. Grades 4-6 concentrate on history or current events appropriate to their grade levels.

5. Return to Auditorium for special program:

   a. Ossie Davis
   b. Learning and singing freedom songs

C. Teaching and Administrative Staff

1. School principal to take overall responsibility
2. Teacher for every 15 pupils
3. Teaching assistants to be recruited from among parents to assist in lunchbreak, taking kids to bathroom, etc.
4. A nurse (and doctor, if possible) assigned to each school.

II Junior High Schools --should be organized in same manner as above, with the following exceptions

A. Morning Assembly session should be shorter (just a brief welcome)
B. Students remain in auditorium for performance (if possible) of "In White America."
C. Afternoon classroom sessions should be devoted to discussion of the morning assembly program

Corresponding Secretary
Chicago CORE
54 West Randolph,,Room 405
Chicago 1, Illinois

Dear Faith:

Thanks for keeping in touch with us and informing us of develppments in regard to the school segregation problems in Chicago. You are no doubt aware thatCCORE is active in this same field here in New York, but not as intensibely.

Richard Haley mentioned something about your request to the National Education Association.. Is there any way in which we can be of assistance to you on this?

If you still have extra copies of your leaflets on the double shifts in the schools I would appreciate receiving about a dozen more. Please continue to send us whatever information you put out on this subject.

The written reports and minutes of the convention have not yet been prepared. I'm afraid we sort of lag behind in this clerical aspect of our work. Maybe this is not unreasonable for an action organization.

Sincerely,

Gordon R. Carey
Field Director

Marvin Rich
CORE
38 Park Row, New York 38

Dear Mr. Rich,

Enclosed are some studies of the Chicago school situation which indicate that a just administration of the schools would automatically integrate them.

We in CORE are asking the National Education Association to follow their study of double shift and crowding, published this spring, by another on empty rooms and bus transportation. We are wondering if all the double shift they reported is as unnecessary as the Chicago example.

As you probably know, our Board of Education President is R. Sargent Shriver, Jr., brother-in-law of the Democratic candidate for the Presidency Kennedy. Our Superintendent of Schools, Benjamin C. Willis, had all his administrative experience up to about 1950 in the legally segregated state of Maryland. After that, he got his PHD from Columbia and became Superintendent of Schools in Buffalo, New York. From there he came here in 1954. He has never been known to comment in any way on the Supreme Court decision of 1954 and has parried all questions relating to it.

When I was Chairman of the Chicago Branch NAACP's Education Committee I analyzed the school budget for several years. Considered from the point of view of racial integration, it seemed to have been drafted by an unreconstructed Southerner.

Shriver's response to our leaflet was to write us that he was forwarding it to Willis.

The Catholics are now integrating their parochial schools here even in the all-white areas.

Sincerely yours,

Faith Rich

Gordon Carey
CORE
38 Park Row, New York 38

Dear Gordon,

Sorry not to have answered your last letter about the leaflets and the Conference-Convention sooner. We received the leaflets COD and trust that we are up to date on all moneys owed the national office. We are looking forward to the written report of the convention, as we still have not had time to discuss the reports thoroughly or even to have all the reports presented. Mr. Ceynar has been in Europe all summer but should be back for the next meeting.

At our meeting on September 2, we voted to send you the enclosed material about the school situation here. The National Education Association in May, I believe it was, issued a report about the double shift and crowded schools. We are beginning to wonder if they are all as unnecessary as Chicago's. We are writing to them and asking them to make a survey of vacant classrooms, dual administrative practices in various sections of cities, use of bus transportation, etc. If you would let us know how many copies of our leaflet you could use, perhaps you could send a copy to each of the local CORES and ask them to check the practices in their cities?

Sincerely yours,

Faith Rich

# School Board Pick

By Ruth Dunbar

Parents picketed the Board of Education Wednesday, demanding that empty classrooms be used to eliminate half-day sessions.

But the board, occupied with matters ranging from the sale of candy bars to multimillion-dollar financial problems, ignored the protest.

In the course of a seven-hour meeting devoted mainly to 1961 budget deliberations, the board:

1 Overruled a recommendation of Schools Supt. Benjamin C. Willis and decided to continue an experimental ban on candy sales in two high school cafeterias for another semester.

2 Agreed tentatively not to seek anothter school biulding bond issue before 1963. Instead, it will make a slight cut in the amount allocated for school construction each year and will finance more buildings on a pay-as-you-go basis.

The placard-bearing pickets represented the Lawndale Citizens Schools Committee and the Chicago Committee of Racial Equality. They passed out sheets which stated that there are 50,000 unused seats in the city's public schools. The pickets urged the board to assign youngsters now on half-day sessions in overcrowded schools to the vacant rooms, providing transportation where necessary.

After a plea by board member John L. Reichert, the board agreed to continue the ban on the sale of candy, carmel apples and soft drinks at Hyde Park and Steinmetz High Schools. Willis had recommended restoring the sweets to cafeteria shelves because in a three-month trial the

# Mercury At 9

Water service was interrupted in two south suburban communities Wednesday, while they sizzled in the hottest weather of the year.

A break in the main feeding Evergreen Park from a reservoir at 89th and Albany, dried out that entire suburb for two hours.

A two-block area of Hazel Crest, from 167th to 169th along Lincoln, was waterless for an hour when a feeder main in the area broke.

Both droughts came in the afternoon, when the temperature reached 96 degrees, the highest of the summer.

The board's tentative decision not to seek a new building bond issue in 1961 was made when Willis assured them the needed classrooms could be provided without it. He recommended that the $25,000,000 remaining from the last bond issue be spread over the next three years, rather than spent completely in 1961.

The bond funds would be supplemented by money from the school building tax, which the board has authorization to raise from 28 cents to 30 cents per $100 of assessed valuation in 1961.

Together, the bond funds and tax levy would provide $21,850,000 a year, a decrease from the current $25,000,000-a-year building program.

Charles Spiker, foreman of the Hazel Crest Public Works Department, said service was restored in that community by Wednesday evening. An interruption of an hour was necessary to complete repairs on the broken main.

The high for the day came at 5:15 p.m., beating by a degree the year's previous top temperature of 95 on July 22.

Chicago Park District officials reported pools and beaches heavily patronized. At North Av. Beach about 15,000 people went for a dip. Lifeguards said it was twice as large as the customary weekday crowd.

Officials said their estimates of the crowds at the beaches were difficult to make because "no one was on the beach, everyone headed straight for the water."

The weather bureau said similar temperatures are expected Thursday.

NO EXCUSE FOR DOUBLE SHIFT IN CHICAGO PUBLIC SCHOOLS
Capacity for 50,000 Pupils Not Used for Classroom Seats

The Chicago Committee of Racial Equality (CORE), affiliated with the Congress of Racial Equality, is vitally concerned to see justice done in the schools of the north as well as the south. Double shift schools have affected mainly Negro children for the past generation in Chicago. It is a question whether they have not lost as much time in Chicago double shift as they would have in the cotton fields of Mississippi.

Now the studies of CORE are unearthing the fact that there is no need of double shift for any Chicago public school children.

The Board of Education is being asked to change the districting system and to authorize transfers to take the pupils off double shift. If the change is made at the Board meeting Wednesday, August 31, 1960, then all public school pupils will have full time when school opens after Labor Day.

"In October, 1959, 47 schools and 30,457 pupils were on double shift. Half that number of seats, or 15,229, would restore these pupils to full day sessions. Our Committee found potential classroom seating capacity for 50,000 pupils unused in 117 schools, many of them near the double shift areas" says Dr. Faith Rich, Chairman, CORE Schools Committee.

Pupil Population Down Now From 1932; Number of Schools Up

There are fewer pupils in Chicago public schools today than there were in 1932-3. At that time there were 472,789 pupils; in 1958-9, only 438,203. (facts and figures, May, 1953, p. 12; September, 1959, p. 15)

It is difficult for the public to learn the capacities of the various schools or of the school system as a whole. Through the year 1931-2, the number of classrooms in each school was listed in the Directory of Chicago Public Schools. Since then, there has been no comprehensive information readily available to the public. There are, however, various ways to estimate the potential classroom space.

The school plant has greatly increased since the year of peak enrollment in 1932-3. At that time, the double shift was a necessity. A thorough, independent study of the Chicago public schools in 1931-2, the five-volume, $100,000 Strayer report*, reveals a net shortage of 401 elementary classrooms and of about 40,000 high school classroom seats, or the equivalent of 20 schools of 20 classrooms each and of 20 high schools of 2000 pupil population.

114 - 457

In 1931-2, there were only 338 elementary schools, including junior high schools, and 24 high schools. The September, 1959, Directory of Chicago Public Schools, shows that there are now 114 more elementary schools, not counting branches, and 27 more high schools than in 1931. Yet the school population is now about 28,000 less than then. However, the 1931-2 school population was not properly housed. It needed 20 more elementary schools and 20 more high schools. By 1958-9, allowing for these 40 schools, there are still 94 elementary schools and 7 high schools more in the present school plant than in the 1931. In other words, there are 100 more schools to house 28,000 fewer pupils now than in 1931.

* George D. Strayer, Director, Report of the Survey of the Schools of Chicago, Illinois, Teachers College, Columbia University, New York, 1932, Vol. IV, pp. 13-37

The above is a crude estimation of school space, but it errs on the conservative side. It takes no account of the many branches which are independent buildings or of the numerous additions which added many thousands of school seats, especially in Negro areas. These additions greatly outnumber the demolitions of parts of the schools presently in use.

Whatever the precise figures may be, a greatly expanded school plant is housing a slightly diminished school population.

## PTA Study Also Showed Enough Classroom Space to End Double Shift

The December, 1957, Chicago Region News of the Chicago Parent Teachers Association had the following statement: "During the current semester 49 schools have had double sessions. The number of pupils affected exceeds 27,000. To put these children on a full day schedule it would be necessary to have approximately 416 additional classrooms. ...Last semester there were 303 vacant rooms and 1000 which were being used for other than regular teaching purposes. Some of these could be reconverted into normal classrooms without curtailing any essential services."

## Superintendent Willis Defeated in Efforts to End Double Shift by Building

In October, 1950, just before the first $60 million school bond issue, there were 15 schools, 5,386 pupils, on double shift. (Division of Statistics, Chicago Public Schools, October 19, 1954) By October, 1959, 47 schools and 30,457 pupils were on shift.

## 50,000 Seats Potentially Available; Some of These Near Crowded Areas

Since even $150 million extra bond issue money could not bring the schools to the children fast enough, try bringing the children to the schools with available space.

To locate unused capacity, list the schools whose capacity is known from the 1931-2 Chicago Public Schools Directory and which are still in use. Multiply the number of classrooms by 35 to get pupil capacity. Subtract the 1959-60 pupil membership as given in the Illinois School Directory.

The resulting unused capacity is so great that it was cut down to allow a large margin of error. From those schools built by 1931 and still in use were subtracted all those having branches of other schools in them, since the Illinois School Directory does not give the number of pupils in Branches. After that, all the school buildings given a rating below 400 points in the Strayer report (op.cit., Vol IV, pp.17-19), in other words a low rating, were cast out. There remained 117 schools, some of them within a short distance of the crowded areas, with an unused capacity of about 50,000 seats.

## Redistricting and Transfers Needed

Most of the crowded, double shift schools are in the areas where Negroes and other minority groups live. They pay equal taxes for unequal schools. CORE asks the Board of Education to authorize Superintendent Willis to issue transfers out of double shift and crowded schools into underused schools.

# End Double Shifts in Schools!

Half-time education is depriving over 30,000 Chicago school children of their rightful heritage of an adequate education. It creates double burdens for mothers, who often have children attending school on different shifts. It leaves youngsters many hours a day without supervision.

Those who deplore growing juvenile delinquency can help strike at its roots by demanding an end now to double shift schools!

**DISCRIMINATES AGAINST MINORITIES!**

Most of the double-shift schools are in neighborhoods with Negro and Spanish speaking residents. Ten schools in the Lawndale area have over 12,000 children on double shifts--over a third of Chicago's total. Double shifts violate the spirit if not the letter of Supreme Court decisions that all Americans are entitled to equal educational opportunities.

**DOUBLE SHIFTS COULD BE ENDED THIS SEPTEMBER.**

There is no shortage of school rooms for Chicago as a whole. Twenty-three schools within a 3-mile radius of the Lawndale area have unused class-room capacities for nearly 13,000 additional students. By shifting 6,000 Lawndale pupils to these schools and providing transportation where necessary, double shifts could be ended without building one new classroom.

Additional school facilities could also be made available in Lawndale through the lease or purchase of unused buildings--pending the construction of more modern schools.

**THIS IS CHICAGO'S PROBLEM**

The Chicago Board of Education has the power--and responsibility--to end double shifts by a sensible utilization of class-room space now available. There is no other cure. More children are on double-shift than ever before (though school enrollment is less than 1930-1), and the number is growing every year. Since 1950, $150,000,000 was spent for new school construction, but double shift attendance has increased by six times.

Every year a child is on double shift is a deficit for Chicago's future.

Demand a change in Board of Education policy now!

NO EXCUSE FOR DOUBLE SHIFT IN CHICAGO PUBLIC SCHOOLS
Capacity for 50,000 Pupils Not Used for Classroom Seats

The Chicago Committee of Racial Equality (CORE), affiliated with the Congress of Racial Equality, is vitally concerned to see justice done in the schools of the north as well as the south. Double shift schools have affected mainly Negro children for the past generation in Chicago. It is a question whether they have not lost as much time in Chicago double shift as they would have in the cotton fields of Mississippi.

Now the studies of CORE are unearthing the fact that there is no need of double shift for any Chicago public school children.

The Board of Education is being asked to change the districting system and to authorize transfers to take the pupils off double shift. If the change is made at the Board meeting Wednesday, August 31, 1960, then all public school pupils will have full time when school opens after Labor Day.

"In October, 1959, 47 schools and 30,457 pupils were on double shift. Half that number of seats, or 15,229, would restore these pupils to full day sessions. Our Committee found potential classroom seating capacity for 50,000 pupils unused in 117 schools, many of them near the double shift areas" says Dr. Faith Rich, Chairman, CORE Schools Committee.

Pupil Population Down Now From 1932; Number of Schools Up

There are fewer pupils in Chicago public schools today than there were in 1932-3. At that time there were 472,789 pupils; in 1958-9, only 438,203. (facts and figures, May, 1953, p. 12; September, 1959, p. 15)

It is difficult for the public to learn the capacities of the various schools or of the school system as a whole. Through the year 1931-2, the number of classrooms in each school was listed in the Directory of Chicago Public Schools. Since then, there has been no comprehensive information readily available to the public. There are, however, various ways to estimate the potential classroom space.

The school plant has greatly increased since the year of peak enrollment in 1932-3. At that time, the double shift was a necessity. A thorough, independent study of the Chicago public schools in 1931-2, the five-volume, $100,000 Strayer report*, reveals a net shortage of 401 elementary classrooms and of about 40,000 high school classroom seats, or the equivalent of 20 schools of 20 classrooms each and of 20 high schools of 2000 pupil population.

In 1931-2, there were only 338 elementary schools, including junior high schools, and 24 high schools. The September, 1959, Directory of Chicago Public Schools, shows that there are now 114 more elementary schools, not counting branches, and 27 more high schools than in 1931. Yet the school population is now about 28,000 less than then. However, the 1931-2 school population was not properly housed. It needed 20 more elementary schools and 20 more high schools. By 1958-9, allowing for these 40 schools, there are still 94 elementary schools and 7 high schools more in the present school plant than in the 1931. In other words, there are 100 more schools to house 28,000 fewer pupils now than in 1931.

* George D. Strayer, Director, Report of the Survey of the Schools of Chicago, Illinois, Teachers College, Columbia University, New York, 1932, Vol. IV, pp. 13-37

The above is a crude estimation of school space, but it errs on the conservative side. It takes no account of the many branches which are independent buildings or of the numerous additions which added many thousands of school seats, especially in Negro areas. These additions greatly outnumber the demolitions of parts of the schools presently in use.

Whatever the precise figures may be, a greatly expanded school plant is housing a slightly diminished school population.

## PTA Study Also Showed Enough Classroom Space to End Double Shift

The December, 1957, Chicago Region News of the Chicago Parent Teachers Association had the following statement: "During the current semester 49 schools have had double sessions. The number of pupils affected exceeds 27,000. To put these children on a full day schedule it would be necessary to have approximately 416 additional classrooms. ...Last semester there were 303 vacant rooms and 1000 which were being used for other than regular teaching purposes. Some of these could be reconverted into normal classrooms without curtailing any essential services."

## Superintendent Willis Defeated in Efforts to End Double Shift by Building

In October, 1950, just before the first $50 million school bond issue, there were 15 schools, 5,386 pupils, on double shift. (Division of Statistics, Chicago Public Schools, October 19, 1954) By October, 1959, 47 schools and 30,457 pupils were on shift.

## 50,000 Seats Potentially Available; Some of These Near Crowded Areas

Since even $150 million extra bond issue money could not bring the schools to the children fast enough, try bringing the children to the schools with available space.

To locate unused capacity, list the schools whose capacity is known from the 1931-2 Chicago Public Schools Directory and which are still in use. Multiply the number of classrooms by 35 to get pupil capacity. Subtract the 1959-60 pupil membership as given in the Illinois School Directory.

The resulting unused capacity is so great that it was cut down to allow a large margin of error. From those schools built by 1931 and still in use were subtracted all those having branches of other schools in them, since the Illinois School Directory does not give the number of pupils in Branches. After that, all the school buildings given a rating below 400 points in the Strayer report (op.cit., Vol IV, pp.17-19), in other words a low rating, were cast out. There remained 117 schools, some of them within a short distance of the crowded areas, with an unused capacity of about 50,000 seats.

## Redistricting and Transfers Needed

Most of the crowded, double shift schools are in the areas where Negroes and other minority groups live. They pay equal taxes for unequal schools. CORE asks the Board of Education to authorize Superintendent Willis to issue transfers out of double shift and crowded schools into underused schools.

## FACTS SHOW DOUBLE SHIFT AND CROWDED SCHOOLS NO LONGER NECESSARY

If the pupils were properly distributed in the available classroom space, there would apparently be neither double shift nor crowding in Chicago public schools.

The peak enrollment took place in 1932-3 when there were 472,789 pupils, 325,401 in elementary and 147,388 in high schools.

The following table shows the enrollment by decades:

Historical Pattern of Average Daily Membership in Elementary[a] and High Schools[b], 1930-1 to 1958-9 - Selected Years

| Year | Elementary | High School | Total |
|---|---|---|---|
| 1930-1 | 338,738 | 123,696 | 462,434 |
| 1940-1 | 280,993 | 134,537 | 415,530 |
| 1950-1 | 261,127 | 89,652 | 350,779 |
| 1958-9 | 340,577 | 97,626 | 438,203 |

a. Excludes continuation and apprentice schools. 1924-5 through 1951-2 figures are from facts and figures, Chicago Public Schools, May, 1953, p. 12. 1952-3 figures through 1958-9 are from facts and figures, September, 1959, p. 15.
b. Includes junior high schools from 1924-5 to 1932-3, inclusive.

### DOUBLE SHIFT

During the years from 1930 to the present there was always some double shift, although in September, 1946, there were only seven (7) schools, 45 classes, and 1,831 pupils on shift in the entire city. (Division of Statistics, Chicago Public Schools, October 19, 1954) The enrollment in 1946 was the lowest in more than 30 years.

In the early thirties double shift was probably unavoidable. But with the drop in total public school enrollment after 1933, the emigration to the suburbs and the building of parochial schools, double shift and crowded schools could have been avoided by redistricting and transportation to under-utilized schools.

In the 1930-1 Directory of Chicago Public Schools, fifty (50) schools were listed as "double" or "half-day" -- in other words, partially or totally on double shift. These schools were widely scattered over the city, the majority on the north side. Only five (5) were in Negro areas.

By 1940-1, fourteen (14) schools were listed as "double" schools. All fourteen were in the south side Negro area. This concentration of the double shift in Negro areas took place as early as 1935. A study prepared of that year by the Citizens Schools Committee showed that of fourteen schools on double shift at that time, thirteen were Negro. From that time to the present most, though not all, of the pupils affected by double shift have been Negro.

## Has Double Shift Been Reduced by New Building Financed by the School Bond Issue?

In October, 1950, just before the first $50 million school bond issue, there were fifteen (15) schools, 146 classes, 5,386 pupils, on double shift.

In September, 1954, after the proceeds from the first $50 million bond issue in 1951 had been largely spent, the double shift had increased to 11,412 pupil, with 18 schools and 309 classes on shift.

By February, 1957, after another $50 million school bond issue, the double shift had risen to 22,192 pupils.

By October, 1959, 47 schools and 30,457 pupils were on shift. This was after the fourth (4th) $50 million bond issue had been secured but not yet spent.

Thus, new building financed by the first three school bond issues not only failed to reduce the double shift; double shift actually increased with each issue. To be sure the school enrollment was rising during this period but not to the peak number of 1932. Meanwhile all the regular building fund money as well as the bond issues have been increasing the school plant. There are many more classrooms than in 1932.

## Plenty of Room Near Lawndale to Take Its Schools Off Double Shift

In some areas even the classrooms built before 1930 with a smaller enrollment now because of pupils lost to the suburbs and the parochial schools are sufficient to relieve double shift in other areas.

This is the case with Lawndale and surrounding areas. Study of nine (9) Lawndale schools and twenty-three (23) schools within three miles of the area, which have changed little if any in capacity since 1930, shows that there is no real shortage of classroom space. The nine Lawndale schools' enrollment is about 8,000 over capacity, the twenty-three outside Lawndale, nearly 13,000 under capacity.

**********

*Capacity is figured at 35 pupils per room for the number of rooms shown in the 1930-1 Directory of Chicago Public Schools, from which the 1930-1 enrollment is also taken. The 1959-60 enrollment is from the Illinois School Directory.
**Hammond and Plamondon are within the Greater Lawndale Conservation Commission's area but are included with other schools south of it because they have under-utilized classroom space.

**********

DOUBLE SHIFT COMPARED WITH CROWDED CLASSROOMS

Comparison of the table above with the one below shows that pupils must be removed to relieve crowding in addition to those removed to relieve double shift. The Table above shows the need to remove over 8,000 pupils from only nine schools whereas, to take the ten off double shift in the Table below, only about 6,000 would have to be taken out. (In reckoning with double shift, take out half the number and the rest can remain all day.)

Number of Pupils on Double Shift in Lawndale
(Dates for which records were obtained varies as shown)

## Dr. Willis Can Recommend that Crowded, Double Shift Schools End Now

Bringing the schools to the crowded areas has proved a failure. Not even $150 million extra school bond money succeeded in ending the double shift, let alone the crowded classrooms.

On the other hand, the classroom space is available outside the crowded areas. Teachers will be more readily available if the conditions are evened out in the various schools.

Superintendent Willis can recommend to the Board of Education a change in the district and transfer procedures to allow for the more even use of the whole school plant. He can recommend the provision of transportation where necessary.

The suggestion was made at a meeting on July 11 at the Sears YMCA that the Upper Grade Center buildings in Lawndale be used for the pupils in the lower grades and the children in the upper grades be transferred to under-utilized schools outside the area within three miles of Lawndale.

Dr. Willis may be addressed as Dr. Benjamin C. Willis, General Superintendent of Schools, 228 N. La Salle St., Chicago 1, Illinois. Telephone number is DEarborn 2 7801.

THE BOARD OF EDUCATION CAN PASS THE DISTRICTING AND TRANSFER CHANGES TO END DOUBLE SHIFT AT THEIR WEDNESDAY, AUGUST 31, MEETING, 2:00 P.M., 228 N. La Salle St.

The members of the Board of Education with their addresses are given below. They serve without pay as a public service. But surely they will be glad to take a little extra time to read thoughtful letters asking them to change their districting arrangements to permit all pupils to enjoy a full school day in an uncrowded classroom.

They will undoubtedly be glad to see a good attendance at their August 31 meeting. The public is welcome to attend all Board of Education meetings.

Robert Sargent Shriver, Jr., President Board of Education, 2430 N. Lakeview (14)
Raymond W. Pasnick, 9700 S. Avalon (28) Joseph Pois, 6817 S. Crandon (49)
Mrs. John B. Allen, 1357 E. 56th St. (37) Edward S. Scheffler, 1141 N. Damen (22)
Loraine R. Green (Mrs. Wendell), 5333 S. Maryland (15) Thomas J. Murray, 9130 S. Damen (20) Thomas L. Marshall, 135 S. LaSalle St. (3)
Frank M. Whiston, 55 E. Washington St. (2) Dr. John L. Reichert, 1791 W. Howard (26) William C. Caples, 63 E. Bellevue (11)

# DESEGREGATE CHICAGO PUBLIC SCHOOLS

**Question 1** Are Chicago public schools segregated?

**Answer 1** Yes, many of them are in fact (de facto) segregated. That is, some schools contain only or mostly Negro pupils or only or mostly white pupils. Some have teachers of only one race. According to a 1957 estimate, 90% of the elementary pupils attend schools predominantly of one race.*

**Question 2** Is not the actual segregation of Chicago schools due entirely to housing segregation?

**Answer 2.** No. It is true that Chicago is considered to be the most segregated of northern cities in housing. But the Negro ghettoes are long and narrow and schools if districted to cut across these long ribbons could be integregated. (See the attached map.) Some of the actual segregation is caused by schools administrative practices.*

**Question 3** Does the actual segregation in Chicago schools, since it is not caused by law as in the south, have any bad effects on the pupils?

**Answer 3** Yes. Dr. Kenneth B. Clark writes: "School segregation arising from these causes (i.e. in the north) is no less damaging to human personality than school segregation based on laws." #

A. Segregated schools are a poor preparation for living in a modern metropolis.

B. The schools attended by Negro pupils are typically much larger than the average so that the child receives less individual attention.

C. Loss of school time through double shift is very great among Negro pupils, negligible by comparison of either numbers of pupils or length of time among white. One study based on 1957 estimates* found that 40% of the predominantly Negro elementary schools were on double shift, only 2% of the predominantly white. (Compare the attached map.)

D. Poor preparation of Negro pupils through crowded classrooms and inexperienced teachers is common.

---

*De Facto Segregation in Chicago Public Schools, issued by the Chicago Branch of the National Association for the Advancement of Colored People, 1957. Available at the Chicago Public Library, Randolph and Michigan, 4th Floor, Teachers' Room, at Hall Branch, 4801 S. Michigan, and at the Chicago Branch NAACP Office, 3856 South Parkway, Chicago 53, telephone OAkland 4-5400.

#Kenneth B. Clark, Prejudice and Your Child, Beachon Press, Boston, 1955, p.87.

Question 4 Has the $150 million of building bond money since 1951 and prior to the present 1959 bond issue been equitably spent on Negro and white pupils?

Answer 4 No. During that period the white population of Chicago declined slightly. The Negro population increased greatly. Theoretically, therefore, there would need to be no building in white areas and much in Negro. In fact, however, about twice as many buildings and additions were built in white as in Negro areas.

Question 5 Did the 1958 redistricting of Chicago high schools, the first in about 20 years, increase integration?

Answer 5 No. It increased segregation.

A. Shakespeare, 1119 E. 46th St., and Oakenwald, 4071 S. Lake Park Ave., schools with Negro pupils, were taken out of racially mixed Hyde Park High School's district, and assigned to all-Negro high schools. (Hyde Park High School is at 6220 S. Stony Island Ave.)

B. A section inhabited by whites was removed from the district of the racially mixed high school Marshall, 3250 W. Adams St., and placed in the district of an all-white school. A Negro area was also assigned to a predominantly Negro High School.

C. No Negroes were placed in white high schools or whites in Negro high schools to balance these increases in <u>de facto</u> segregation.

D. The Chicago Branch of the National Association for the Advancement of Colored People suggested to the Board of Education and Superintendent Willis districting which would have integrated all of the Negro high schools and some white high schools. These suggestions and the entire question of integration in districting were ignored by the school administration.

Question 6 In high schools in mixed areas does the Board of Education enforce the district boundaries and attempt to promote integration?

Answer 6 Not consistently.

A. Several years ago, Marshall High School, 3250 W. Adams St., became a predominantly Negro school although its feeder elementary schools were majority white. After two years of meetings and newspaper publicity exposing the excessive transfers of students over the city, of which Marshall was one example, ther was a shift in district superintendents. The permits were no longer easily available and the school soon became reintegrated with about 50% of each race. The experience of segregation resulting from boundary violations continues to affect the school adversely. A disproportionate number of substitute teachers are still there as a result of the loss of assigned teachers from the period of "skipping."

Answer 6 continued

B. At the present time, a large new vocational school, Dunbar, 3000 South Parkway, has a racially integrated district with about half the feeder schools white. There are said to be three white students out of some 2300 attending the day school. It is often noted that Negro students ride the suburban buses daily to and from far outside its district which extends from 22nd Street to 55th and from the Lake to the city limits.

Question 7 Are the new general high schools recently built or in process so located as to increase integration?

Answer 7 No, their location increases segregation. All except one are in white areas. That one, Harlan, 9652 S. Michigan Avenue., withdraws nearly all Negroes from mixed high schools Fenger and Calumet to put them in a new mixed school built in the path of the expanding Negro ghetto. There is thus a possibility that the new school Harlan will become all Negro in the near future unless the housing segregation is checked; and that the formerly mixed high schools will become almost entirely white.

Question 8 Does the Chicago Board of Education have an explicit, positive policy of racial integration in harmony with the 1954 Supreme Court decision on education?

Answer 8 No.

A. Official spokesmen of the school board and administration have stated publicly that they felt the schools had no responsibility in regard to racial integration any more than for the integration of Americans of Polish, Irish or German descent.

B. Early in 1959 a meaningless statement in favor of better human relations was adopted by the Board of Education. It failed to mention either the Supreme Court decision or racial integration.

Question 9 Does Illinois law prohibit racial segregation in Chicago public schools?

Answer 9 Yes. Illinois Revised Statutes, Chapter 122, 6 - 37: "...but no pupil shall be excluded from or segregated in any such school on account of his color, race or nationality."

Chapter 122, 18 - 14: "No State aid claim may be filed for any district unless the clerk or secretary of the school board executes and files with the Superintendent of Public Instruction, on forms prescribed by him, a sworn statement that the district has complied with the requirements of Section 6 - 37 in regard to the non-segregation of pupils on account of color, race or nationality."

"No State aid claim may be filed...unless...a sworn statement that to the best of his knowledge or belief the employing personnel have not discriminated in the employment of teachers on the basis of color, creed, race or nationality."

Question 10 Is the actual or de facto segregation in Chicago schools illegal?

Answer 10 We do not know. To our knowledge, no test case has been brought into court in Illinois.

Question 11 Is there an Illinois law prescribing racial integration as a factor in school districting?

Answer 11 No. A bill to provide for this in Chicago only was introduced by Representative Charles F. Armstrong in the 1957 Illinois Legislature. It passed the House but was defeated in the Senate Education Committee. In 1959, a similar bill applying to Chicago only, H. B. 331, was introduced by Representative Armstrong. It passed the House with a high vote, was recommended by the Senate Education Committee, and received a favorable final Senate vote of 15-4, but failed to obtain the necessary 30 votes to pass.

Question 12 Is a uniform standard maintained throughout the public schools?

Answer 12 No. We know of no comprehensive study of this question, but from observation made by teachers and parents we believe that the failure to maintain uniform standards is one of the important causes of the inferior achievements of Negro pupils.

A. Negro parents moving into white areas frequently find that their children require private tutoring to keep up to grade level even though they may have been top students in their previous Negro school.

B. Pupils in one grade may be using books for a lower grade.

C. Pupils' performance may be that of the grade below although the books are at grade level.

D. High school standards are lowered by omitting courses when the school becomes predominantly Negro and by substituting "essential math" for algebra and "remedial English" for the standard English courses.

E. Failure to provide tutoring as a remedy. (Student tutoring is done in some non-Negro high schools.)

Question 13 Can more nearly equal schooling and more integration besecured in spitd of the segregated housing pattern?

Answer 13 Yes, by proper administration.

A. A full school day for all pupils.

1. Redistricting in places where the crowded schools are near schools with empty or underpopulated rooms.

2. Transportation to schools with empty or underpopulated rooms.*

*Report of the PTA School Education Committee on Vacant Classrooms in the Chicago Public Schools presented to the March, 1958 Chicago Region Assembly.

Answer 13 continued

3. Revision of the building program and postponing the replacement of old schools until the double shift has been eliminated.

B. Keeping the schools small or medium-sized.

1. Building new elementary schools when needed rather than additions.

2. Division into two or more schools of the over-sized schools.

C. Setting a maximum and a minimum number of pupils for each class room rather than an average. An average conceals the spread between 46 in one school and 28 in the classrooms of another, for example, the average being 37 which is about the city average.

D. Assuring a certain percentage of experienced teachers to each school.

E. Equipping the schools with teaching materials which give proper recognition to minority group achievements.

F. Redistricting the high schools to integrate the Negro high schools and as many of the white as feasible.

G. Maintenance of uniform standards and provision for tutoring where needed or desired.

Question 14 What can I as a Chicago resident do to help secure more nearly equal schools for all?

Answer 14 Here are some suggestions.

A. Examine your neighborhood schools with respect to the points in Answer 13.

B. Secure further background information from

1. George T. Wilkins, State Superintendent of Public Instruction, Springfield, Illinois. Request, free, The Illinois School Code and the Illinois School Directory.

2. Benjamin C. Willis, General Superintendent of Schools, 228 N. La Salle St., Chicago 1, DEarborn 2-7801. Ask for the Directory of Chicago Public Schools, Facts and Figures, the adopted Budget, and any handbook on procedures which may be available.

3. Chicago Urban League, 2410 S. Michigan, Chicago 16, CAlumet 5-0600. Ask for their latest map on the distribution of the Negro population in Chicago.

Answer 14 continued

4. National Association for the Advancement of Colored People, Chicago Branch, 3856 South Parkway, Chicago 53, OAkland 4-5400, has Desegregated Chicago Public Schools, De Facto Segregation in Chicago Public Schools, and copies of school budget hearing testimonies.

5. Buy or borrow from the public library Prejudice and Your Child, Kenneth B. Clark, Beacon Press, Boston, 1955.

C. Bring your thoughts and information to an organization concerned with school problems--PTA, NAACP, Urban League, Citizens Schools Committee, a local civic group.

D. Encourage a representative of your organization to attend the Board of Education meetings on the second and fourth Wednesdays 2 P.M., 228 N. LaSalle Street, and make sure that your organization testifies at the school budget hearings.

E. If your child is in a school on double shift or expected to be at the beginning of the school year, why not seek to enroll him in a school with empty or underpopulated rooms? Let the NAACP, 3856 South Parkway, Chicago 53, OAkland 4-5400, know of your experience.

Schools

## PETITION FOR SCHOOL TRANSFER

As a parent living near a school which has been crowded I request the transfer of my child or children to an uncrowded school in September, 1962, unless the conditions in the school near me are corrected. I further request that any necessary transportation be provided by the Board of Education. I do not wish my child to be instructed in a mobile classroom nor a school whose classrooms contain more pupils than the city average at standard usage of the school building.

DUAL EDUCATION DR. WILLIS' POLICY IN SPITE OF JUDGE HOFFMAN'S PRAISES
Schools to Open Next Month Crowded, Unequal, Segregated, Expensive

Dr. Willis' Excuses Phony

M Each year we are given the impression that there has been a school population explosion. In point of fact, there were more students in the public schools in 1932-3 than in 1960-1. Check for yourself in facts and figures, 1953, p. 13, and September, 1961, p. 20, published by the Board of Education. (Four $50 million bond issues in 1951,5,7,9)

Enough Room, We Estimate, But Poorly Administered

M According to Dr. Willis' figures and methods, there is not enough room in the elementary or high schools for the students. Whenever the students move, build a school or a mobile, leaving the previous school empty. We believe it would make more sense to move the students to the schools.

This Summer: Questionable Branches Deprive White Students Mainly

M By assigning a very low capacity to high school buildings, Dr. Willis maintains that they are crowded and establishes branches of freshmen in elementary school buildings. In Marshall High School, at Adams & Kedzie, he filled up nearly half the high school building with elementary pupils and is now putting most of the white Freshmen in a branch in Orr elementary school, because the high school is crowded!

M Wherever the parents have protested vigorously they have succeeded in postponing or changing some decisions on branches. The Southwest parents effected a postponement of the decision on branches of Bogan and Lindblom. On the North Side the parents in the Mather High School district got the time of the Freshmen reduced from a year to a semester for next year. But why even one semester? Why not transfer to Senn?

TRANSFER!

M If your child will be in a mobile, a branch, or a crowded or segregated classroom in September, ask for a transfer. Write to Clair M. Roddewig, President, Board of Education, 228 N. LaSalle St., Chicago 1, Illinois.

Put Your Name in CORE SAC

M If you want to take action for good schools for Chicago children as well as for equal opportunity generally, fill out the Social Action Census (SAC) form on the back and send to CORE. We will call you for action.
